An MBA that Improves Life

The Gordon S. Lang School of Business and Economics is a globally ranked business school with the bold mission of using business to improve life in our communities. We believe that sustainable, ethical leaders are unquestionably the future of business. We are one of 39 global Champions of the United Nations PRME initiative for responsible business education and our MBA is ranked #9 in the world for its focus on sustainability.

The Gordon S. Lang School of Business and Economics is built upon three pillars:

THREE PILLARS

Active Learning

We foster teamwork, critical-thinking and problem-solving skills that connects modern academics to solve real-world business challenges.

Research with Impact

We aim to push the frontiers of knowledge through research in business, management and economics, building on industry foundations unique to the University of Guelph.

Community Engagement

We are recognized locally and globally for our commitment to developing leaders for a sustainable world, who aspire to use business to improve both the bottom line and our communities.

I AM PASSIONATE ABOUT THE ENVIRONMENT. FOR ME, IT IS ABOUT CHANGING THE WORLD IN A SUSTAINABLE WAY. I WANT TO LEARN HOW TO DEVELOP A FORWARD-THINKING SUSTAINABILITY POLICY FOR MY COMPANY.

The Lang MBA

Lang's MBA program is an intensive two-year program for working professionals that combines on-site residential experiences with interactive online learning. You will immediately join our impressive network of alumni who are making an impact throughout the world.

We select the best and brightest professionals who want to maximize their career potential and make a real impact.

HERE'S A QUICK RUNDOWN:

Admission Requirements

A four-year undergraduate degree or its equivalent (from a recognized university) with a minimum average of B- (70-72%) in the last two years of study, and a minimum of three years of industry related experience including supervisory and managerial responsibility, or a minimum of three years of industry related experience (without supervisory and managerial responsibility) and a minimum GMAT score of 550.

Alternate admission may be offered to those with a three-year general degree, diploma and/or an acceptable professional designation with a minimum average of B- (70-72%) in the last two years of study, and at least five years of relevant work experience showing progressive increases in responsibility.

The Best of Both Worlds: Online + On-site Learning

It can be difficult to pause your career to pursue an on-campus MBA, and online-only MBA programs don't allow you to immerse yourself in course content or to receive the full student experience. At Lang, we combine intensive on-site experiences with interactive, engaging, online learning. The Lang MBA gives you the

flexibility to complete the program on your own schedule, as well as the benefit of face-to-face interactions with your fellow peers and our world-class faculty. This creates a community of business connections that stay with you for the rest of your career.

Online Learning

Lang's online learning platform allows you to complete your degree while maintaining your career and personal commitments. Our team will send you the course materials far in advance, allowing you to plan for your learning when your schedule allows. You can expect to commit 20-25 hours each week during the online portion of the program.

I LIKED BEING ABLE TO ACCESS MY CLASS FROM ANYWHERE. IF I WAS OUT OF TOWN FOR WORK OR NOT AT HOME, I WAS STILL ABLE TO ACCESS MY COURSE WORK AND SEE WHAT I HAD TO DO, WHICH MADE IT EASIER TO GET MY ASSIGNMENTS DONE.

Onsite Experiences

Lang MBA's on-site residential experiences provide a career defining opportunity for you to learn from our world-class faculty who have significant industry experience and have developed industry-changing research. Just as important, you tackle your coursework with peers who are in a diverse range of industries. We strive to create an innovative cohort experience that mixes class time with experiential learning and off-site, team-building excursions. This collaborative process is crucial to our learning approach. You not only learn new strategies and skills relevant to your career, you make connections with your classmates that last a lifetime!

NOT ONLY IS IT GREAT THAT YOU CAN PUT A FACE TO THE NAME, YOU START SEEING, THROUGHOUT THE RESIDENCE EXPERIENCE, THE TYPE OF PERSON THAT YOU WILL BE WORKING WITH THROUGHOUT YOUR PROGRAM.

We are flexible.

We believe education shouldn't be offered in one-dimensional settings. That is why we combine online learning with brief, intensive and interactive on-site experiences; allowing you to learn and complete course work around your busy life.

We also provide two unique ways of completing your MBA degree, either through a major research project OR by taking two elective courses. This allows you to tailor your program to meet your needs.

We are specialized.

We developed this MBA for you. Our three specializations draw upon University of Guelph's strengths in sustainable commerce, food and agriculture business, and hospitality and tourism management. You delve deep into specialized, industry-specific topics taught by faculty who are experts in their fields. You can be sure that the concepts that you learn in our MBA program are important to your industry and will advance your career to the next level.

Specialize your MBA.

SUSTAINABLE COMMERCE

Become the sustainability expert of your organization

In today's global and complex economy, businesses need to focus their efforts on more than just the financial bottom line. The Lang MBA in Sustainable Commerce emphasizes responsible social and environmental business practices, as well as traditional financial drivers for growth and sustainability.

This approach allows you to develop your skills as a leader in sustainable commerce. Let us show you how to build triple-bottom-line focused strategies to help your organization thrive.

The Lang MBA Major Research Project

Near the end of your MBA you have the option of completing two elective courses or a major research project. This project will allow you to conduct a meaningful and publishable academic paper. You are mentored by one of our world-class faculty members and conduct research in your chosen area.

Students often focus their paper in an area that impacts their organization, allowing them to take a high-impact report back to their organization to advance a specific priority.

As the Canadian seed industry outlines their vision for a next-generation seed system, blockchain technology can be utilized as a foundational technology. Lang MBA grad, Doug Miller focused his major research project to investigate how blockchain technology can be incorporated into the industry. He also leveraged the opportunity to make an impact in a pilot project (funded by the Canadian Agricultural Strategic Priorities Program) for farm-to-table traceability using blockchain technology to follow locally produced certified soybean seed through production, processing, and ending on store shelves. In 2018, Miller was named one of Canada's 20 most influential leaders in the germination and seed industry for his work in the field.
