

MATH*1200

Calculus I

Fall 2018

(Revision 0: August 23rd, 2018)

1 INSTRUCTIONAL SUPPORT

1.1 Instructor

Kimberly M. Levere, Ph.D.

Office: MacN 539, ext. 56908

Email: klevere@uoguelph.ca

Office hours: Mondays 3:30pm-4:30pm, THRN*1425

Tuesdays 11:30am-12:30pm and 4:00pm-5:00pm, THRN*1425

Wednesdays 12:00pm-1:00pm and 3:30pm-4:30pm, THRN*1425

Due to large class size, office hours are held in a group setting. I have found this to be a very productive and supportive learning environment in the past. Should you require an individual, private appointment, please contact me by email to set up a meeting.

1.2 Teaching Assistants

TBA

2 LEARNING RESOURCES

2.1 Course Website

Course material, news, announcements, and grades will be regularly posted to the MATH*1200 Courselink website. You are responsible for keeping up-to-date on this site.

2.2 Required Resources

M. Demers and K. Levere, *MATH*1200 – Calculus I Course Manual (6th Edition)*, available at the MacNaughton Bookstore.

- This is the primary resource for this course and functions both as a textbook, and as a notebook that we will complete together in class as the course progresses. Please be sure that you have the current version, the 6th edition, (only available at the MacNaughton Bookstore) as a number of changes have been made to last year's manual.

2.3 Recommended Resources

Not applicable.

2.4 Additional Resources

Past tests, supplementary questions, and other resources may be posted on the Course website as needed. Again, it is important that you check regularly to keep up-to-date.

Lecture Information:

Completed lecture notes will be uploaded to the Course website at the end of every week. This is not a substitute for lecture attendance! I strongly recommend that you attend every class.

Lab Tutorial Information: A weekly lab session will give you the opportunity to tackle tougher problems or extra practice questions. I may also use this time to cover course material directly from the Course Manual. It is your responsibility to obtain completed notes from lab tutorials if you cannot attend as **these will *not* be posted online** unless otherwise specified.

Online Quizzes: A link to the Maple TA website is available through the Course website. Do not try to find the Maple TA site by doing a web search; you may find the wrong page if you do this. You can login using your Central Student ID and password. If you have any issues accessing the online quizzes, please contact me at the email addresses listed on page 1 of this outline. Be as specific as you can so that I can more easily be helpful; include your name and student number.

2.5 Communication & Email Policy

Please use office hours and Courselink discussion forums as your main opportunity to ask questions about the course. Major announcements will be posted to the course website. **It is your responsibility to check the course website regularly.** As per university regulations, all students are required to check their <uoguelph.ca> e-mail account regularly: e-mail is the official route of communication between the University and its students.

3 ASSESSMENT

3.1 Dates and Distribution

Your grade will be determined using the more favourable of the two grading schemes:

Grading Scheme 1	Grading Scheme 2
Miniquizzes 10% **	Miniquizzes 10% **
Warm-up Test 10%	Warm-up Test 0%
Term Test 1 20%	Term Test 1 20%
Term Test 2 20%	Term Test 2 20%
Final Exam 40%	Final Exam 50%

**You must receive at least 50% of the marks available, in total, on term tests and final exam that are used to calculate your final grade. That is,

$$(\text{Total marks earned on term tests and exam}) \div (\text{Total marks available on term tests and exam}) \geq 50\%$$

If you do not achieve this, your maximum possible final grade will be 48%, *no matter what grade you receive on the Miniquizzes component*. Provided that you satisfy the above equation, your final grade will be calculated using the more favourable of the above two grading schemes. Considerations may be made according to the policies listed in Section 3.2.

Miniquizzes: There will be 1-2 Maple TA miniquizzes posted each week for you to complete. The content of these quizzes will be material covered in the previous week of classes. You have unlimited attempts to do each miniquiz up until their assigned due date. Your grade for each miniquiz will be equal to the highest grade received from all attempts you have taken at the miniquiz within the allotted time. The first MapleTA miniquizzes that will count toward your final grade will be due on **Thursday, September 20st, at 6:00pm (Week 2)** Quizzes will continue to be due weekly, each Thursday at 6:00pm throughout the semester.

To help you to learn the Maple TA system, I have posted a syntax quiz that will help you to learn how to properly input your answers and navigate the system. I highly recommend that you attempt this quiz a few times so that you are comfortable.

Warm-up Test: Friday, September 21st, 2018, during your scheduled lab time
(40 minutes to write, excess in case of delay)

Locations: Your scheduled lab location:
ROZH*101 or ROZH*104.

- Term Test 1:** Friday, October 19th, 2018, 6:00pm-7:15pm
(60 minutes to write, excess in case of delay)
- Locations:** Last Names starting with A-R report to ROZH*104
Last Names starting with S-Z report to ROZH*103
- Term Test 2:** Friday, November 16th, 2018, 6:00pm-7:15pm
(60 minutes to write, excess in case of delay)
- Locations:** Last Names starting with A-R report to ROZH*104
Last Names starting with S-Z report to ROZH*103
- Final Exam:** Friday, December 14th, 2018, 2:30pm-4:30pm
(2 hours to write)
- Locations:** TBA on Courselink and in class when information becomes available

3.2 Course Grading Policies

Academic Consideration: When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons, please advise the course instructor in writing, with your name, ID number, and e-mail contact. See the academic calendar for information on regulations and procedures for Academic Consideration:

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

Accommodation of Religious Obligations: If you are unable to meet an in-course requirement due to religious obligations, please email the course instructor at the start of the semester to make alternate arrangements. See the undergraduate calendar for information on regulations and procedures for Academic Accommodation of Religious Obligations:

<http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-accomrelig.shtml>

Missed midterm tests: Missed test and/or miniquizzes will receive a grade of 0%, unless they are missed due to any of the above reasons, in which case the weight of the missed test or miniquiz will be added to the final exam. There will be no makeup tests or miniquizzes.

Passing grade: In order to pass the course, you must receive a final grade of at least 50%. Additionally, in order to pass this course, you must receive at least 50% of the marks available, in total, on the term tests and final exam that are used to calculate your final grade. If you do not achieve this, your maximum possible final grade will be 48%.

Group Work: While you are encouraged to work together to learn the course material and complete For You to Try exercises, all miniquizzes must be completed individually. It is academic misconduct to complete another student's quizzes. Please see section 6 of this outline for further details on academic misconduct.

Copies of out-of-class assignments: Keep paper and/or other reliable back-up copies of all out-of-class assignments (for instance, the work you did for the mini-quizzes). You may be asked to submit this work at any time.

4 AIMS, OBJECTIVES & GRADUATE ATTRIBUTES

4.1 Calendar Description

This is a theoretical course intended primarily for students who expect to pursue further studies in mathematics and its applications. Topics include inequalities and absolute value; compound angle formulas for trigonometric functions; limits and continuity using rigorous definitions; the derivative and derivative formulas (including derivatives of trigonometric, exponential and logarithmic functions); Fermat's theorem; Rolle's theorem; the mean value theorem; applications of the derivative; Riemann sums; the definite integral; the fundamental theorem of Calculus; applications of the definite integral; the mean value theorem for integrals.

Credit Weight: 0.5 **Department:** Mathematics & Statistics **Campus:** Guelph

Prerequisite: 1 of 4U Calculus and Vectors, 4U Advanced Functions and Calculus or Grade 12 Calculus

4.2 Course Aims

This course is an introductory course in Calculus. The objective of the course is to give you a strong mathematical background that you will require as you progress through your degree. The main goals of the course are (1) to teach students the Calculus concepts listed in section 4.1 at a level that promotes a deep understanding and (2) to explain how such concepts are applicable in their various degrees by exploring real-world problems.

4.3 Learning Objectives

At the successful completion of this course, the student will have demonstrated the ability to:

1. Evaluate, graph and know the properties of a variety of functions, including trigonometric, logarithmic, and exponential functions.
2. Establish a set of techniques for solving inequalities (perhaps involving absolute value).
3. Establish a set of techniques for treating a wide variety of limits including basic limits and indeterminate forms. Have an understanding of what a limit is calculating.
4. Prove limits using a delta-epsilon definition.
5. Understand what the derivative of a function is and how to calculate it using basic formulas, or the first-principles definition of the derivative.
6. Apply theoretical results in mathematical reasoning.
7. Calculate antiderivatives (definite and indefinite) of basic, through to complicated functions and compositions of functions.
8. Understand the Riemann sum and how it motivates the definite integral.
9. Calculate the area under a curve or between several curves.

10. Solve word problems by applying formulas and techniques learned in class.
11. Identify inadmissible solutions that arise mathematically but are not logical possibilities in a given problem.
12. Think critically about complicated mathematical problems. Question the potential subtleties of such problems and give a complete and correct answer.

4.4 Graduate Attributes

Successfully completing this course will contribute to the following CEAB Graduate Attributes:

Graduate Attribute	Learning Objectives	Assessment
1. Knowledge Base for Engineering	1-12	Quizzes, Exams, Labs
2. Problem Analysis	1-12	Quizzes, Exams, Labs
3. Investigation	1-12	Quizzes, Exams, Labs
4. Design	-	-
5. Use of Engineering Tools	-	-
6. Communication	-	-
7. Individual and Teamwork	1-12	Labs
8. Professionalism	-	-
9. Impact of Engineering on Society and the Environment	-	-
10. Ethics and Equity	-	-
11. Environment, Society, Business, & Project Management	-	-
12. Life-Long Learning	-	-

4.5 Instructor's Role and Responsibility to Students

As your instructor, I must:

1. Develop and deliver course material in a professional way that facilitates learning for a variety of students and learning styles;
2. Attend all lectures, filling in the course notes as we proceed in each lecture. I will provide completed course notes online regularly, but I strongly urge you to come to class. Bear in mind that most Tutorials will not use the Course Manual and these completed notes might not be provided to you.
3. Respond to you. This includes, as time permits, questions in lectures, after classes, during office hours, or through email (where I reserve the right to reply within a timeframe of 1-2 days). You are more than welcome to contact me at any time through these means if you have questions or concerns about the course or the course material.
4. Evaluate you fairly, and fairly as compared to your peers, providing prompt feedback on your performance and justification for your grade. I must provide academic consideration, where appropriate, as described in Section 3.

4.6 Students' Learning Responsibilities

As a member of this class, you are expected to:

1. Take advantage of the learning opportunities provided during lectures and in tutorials.
2. Treat others with respect and dignity whenever you address them, in-class or online.
3. Genuinely attempt all homework in a timely manner, including the online miniquizzes and the "For You to Try" component of the Course Manual, on your own time.
4. Seek help if you have tried the homework and are still having difficulty with the course content. This means contacting me (*not* just at the last minute!) and possibly considering other resources as I recommend them to you;
5. Check all grades against tests that have been returned to you, once they are posted to the Course website, to verify that the correct mark has been recorded.
6. Notify me, as described in Section 3, in the case that there are missed tests or academic conflicts that are known in advance. If illness, work, or extra-curricular activities are causing you to struggle, you are advised to keep me up-to-date on your progress, so that I can be more helpful to you.

5 TEACHING AND LEARNING ACTIVITIES

5.1 Timetable

Lectures (Section 01):

Monday	2:30 pm – 3:20 pm	ROZH*104
Wednesday	2:30 pm – 3:20 pm	ROZH*104
Friday	2:30 pm – 3:20 pm	ROZH*104

Lectures (Section 02):

Monday	5:30 pm – 6:50 pm	WMEM*103
Wednesday	5:30 pm – 6:50 pm	WMEM*103

Tutorials:

Friday	12:30 pm – 1:20 pm	ROZH*104
Friday	3:30 pm – 4:20 pm	ROZH*101

5.2 Lecture Schedule

(schedule is approximate and subject to change depending on time constraints)

Lectures (Week)	Lecture Topics	References
Self-study	Review of Functions – basic functions, trigonometric functions, exponential and logarithmic functions.	Chapter 1
1	Piecewise functions, the absolute value function, and inequalities.	Chapter 2
2	Limits & Continuity	Chapter 3
3	The Formal Definition of a Limit	Chapter 4
4	Continuity Theorems	Chapter 5
5	Derivatives	Chapter 6
6	Implicit Derivatives & Applications	Chapter 7
7	Derivative Theory	Chapter 8
8	Applications of Differentiation	Chapter 9
9	Antiderivatives	Chapter 10
10-11	Riemann Sums and Definite Integrals	Chapter 11
12	Applications of Integration	Chapter 12

5.3 Lab Schedule

Lab topics will correspond to weekly topics. Together we will practice the material covered in class as well as extend it to more interesting problems.

5.4 Other Important Dates

First day of classes: Thursday, September 6th, 2018.

Thanksgiving: Monday, October 8th, 2018. (no classes)

Fall Study Day: Tuesday, October 9th, 2018. (no classes)

40th Class Day: Friday, November 2nd, 2018.

Last day of classes: Friday, November 30th, 2018.

Drop Date: Courses that are one semester long must be dropped by the end of the fortieth class day (**Friday, November 2nd, 2018**); two-semester courses must be dropped by the last day of the add period in the second semester. The regulations and procedures for [Dropping Courses](#) are available in the Undergraduate Calendar.

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml>

Course Evaluation Information: Near the end of the term, you will be given the opportunity to evaluate your instructor and provide comments regarding your experience. The evaluations for this class will be done in-class. Your instructor will inform you of when these are to take place.

6 ACADEMIC MISCONDUCT

The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community faculty, staff, and students to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it.

Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member.

6.1 Resources

The Academic Misconduct Policy is detailed in the Undergraduate Calendar:

<http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml>

A tutorial on Academic Misconduct produced by the Learning Commons can be found at:
<http://www.academicintegrity.uoguelph.ca/>

7 ACCESSIBILITY

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required, however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to book their exams at least 7 days in advance, and not later than the 40th Class Day.

More information: www.uoguelph.ca/sas

8 RECORDING OF MATERIALS

Presentations which are made in relation of course work – including lectures – cannot be recorded or copied without the permission of the presenter, whether the instructor, classmate or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

9 RESOURCES

The Academic Calendars are the source of information about the University of Guelph's procedures, policies and regulations which apply to undergraduate, graduate and diploma programs.

<http://www.uoguelph.ca/registrar/calendars/index.cfm?index>
