## Congratulations to this year's recipients of the **Dr. Donald Robert Phillips Scholarship**

**Alison Berezuk**

(Khursigara Lab)

and

**Vero Taylor**

(Lam Lab)

These two awards were established in memory of Dr. Donald Robert Phillips, OAC'66, a genetics researcher, and are awarded to graduate students in MCB on the basis of their contributions to research, as evidenced by their published papers, conference presentations, and achievement at the graduate level.

Alison and Vero will present seminars describing their work this summer (date and place yet to be determined).

Please join me in congratulating Alison and Vero on their awards!

Roz Stevenson  
Chair, MCB Awards Committee
