

MCB*4500 Research Project in Molecular & Cellular Biology I

Summer 2019

Section(s): C01

Department of Molecular and Cellular Biology

Credit Weight: 1.00

Version 2.00 - May 01, 2019

1 Course Details

1.1 Calendar Description

This course involves independent research of a practical or theoretical nature on a specific topic in molecular and cellular biology. It is carried out under the supervision of an individual faculty member. Students should make arrangements with both a faculty advisor and the course coordinator at least one semester in advance of taking the course. The signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from, and submitted to, the course coordinator no later than the 2nd class day of the semester in which the student is registered for the course.

Pre-Requisites: MBG*3350 or equivalent laboratory experience at the discretion of the student's faculty advisor. Normally, students must have completed 6 semesters in an appropriate program in the biological sciences.

Restrictions: Minimum 70% cumulative average in science courses during the first 6 semesters of the relevant majors. Students in programs offering project courses cannot enroll in MCB*4500. Grade requirements may be waived in exceptional circumstances at the discretion of faculty advisor and course coordinator. Course coordinator consent required.

1.2 Timetable

The scheduling of your work in the research lab is based on discussion between you, your faculty advisor, and other lab members.

1.3 Final Exam

There is no final exam for this course.

2 Instructional Support

2.1 Instructional Support Team

Course Co-ordinator: Dr. Enoka Wijekoon
Email: ewijekoo@uoguelph.ca
Office: SC1 3517

Your Faculty Advisor is the most important member of your Teaching team. Students should be sure that they know how to contact them for guidance and advice.

3 Learning Resources

3.1 Required Resources

Courselink (Website)

<https://courselink.uoguelph.ca>

Information on the Courselink site include:

- Deadlines for all assignments in the Courselink Calendar
 - Assignment outlines, grading rubrics with standards
 - This course outline
-

4 Learning Outcomes

The Research Project course 1 is a capstone course for students doing molecular bioscience research. The main qualities of the course are immersion in current research in a faculty advisor's laboratory, where students can apply their accumulated knowledge and experience to performing real research in a real laboratory setting.

4.1 Course Learning Outcomes

By the end of this course, you should be able to:

1. Problem Solving and Critical Thinking
 - Practice gathering and critically assessing the primary literature through completion of a literature review and research proposal in their chosen research area
 - Report proposed experiments to advance an area of research as part of a research proposal
 - Evaluate the limits of and troubleshoot experimental approaches as part of

their research proposal and through hands on research

2. Communication

- Compose a written literature review and research proposal
- Deliver an effective short oral presentation and answer questions regarding their research proposal from an audience of their peers

3. Professional and Ethical Behaviour

- Work effectively and independently and in the context of a team, taking responsibility for their own research
- Demonstrate good work ethic by setting goals and meeting deadlines
- Add to their career planning by determining if they are capable of graduate school through direct experience with genuine research

4. Scientific Method

- Design and conduct authentic experiments on a real research problem as reported through a research proposal and oral presentation
- Interpret scientific data with relevant tools through their research proposal and oral presentation

5. Breadth & Depth of Understanding in a Particular Discipline

- Demonstrate advanced, contemporary and relevant knowledge in the research area of their choice through written and oral communication

6. Scientific Technology & Techniques in a Scientific Discipline

- Design and conduct experiments using relevant techniques, using relevant technologies as reported through a research proposal and oral presentation

5 Teaching and Learning Activities

The primary activities of this course are the production of a literature review and research proposal for your research, an oral presentation of that proposal to an audience of your peers, and activity in a research group under the supervision of a faculty advisor.

5.1 Responsibilities of the Students

(See Research Performance Rubric for how you will be assessed for your research work)

- Participate in real research in an area of your choice
- Initiate discussions with faculty advisor or others to solve problems
- Display independence in the lab
- Develop a strong grounding in the research area and produce a literature review and research proposal
- Deliver an oral presentation of your research proposal
- Begin experimentation toward your research goals

5.2 Responsibilities of the Faculty Advisor

- Provides direction to the project
- Provides safety training and a safe environment in which to work
- Provides resources for the project, including mentoring, supplies, and certifications
 - May assign a day-to-day mentor, but is ultimately responsible for supervision
- Assesses their student's written literature review and research proposal*
- Assesses research proposal seminar presentations*
- Assesses their student's semester research performance

***In the rare instance when a faculty supervisor is unable to grade course assignments, the faculty supervisor is responsible for finding another faculty member to grade in their place.**

5.3 Responsibilities of the Course Coordinator

- Administers the course
- Organizes and communicates the structure of the course, including sign-up, course outlines, CourseLink, and assessments
 - Provides access to the CourseLink page to all students and their faculty supervisors
- Schedules assessment deadlines
- Organizes seminar schedule
- Assigns second graders for the written report (of the two graders, at least one must be from the MCB department)
- Collects and reports course grades

6 Assessments

Students will find details of all Assessments on CourseLink.

6.1 Marking Schemes & Distributions

Name	Scheme A (%)
Safety Training Documentation	0
Progress Report	0
Seminar Presentation	20
Literature Review and Research Proposal	40
Research Performance	40
Total	100

6.2 Assessment Details

Safety Training Documentation (0%)

Date: Tue, May 21, 4:00 PM

- Ungraded requirement
- Grader: Faculty Advisor

Progress Report (0%)

Date: Wed, Jun 19, 4:00 PM

- Ungraded requirement
- Grader: Faculty Advisor

Seminar Presentation (20%)

Due: Fri, Jul 26, 4:00 PM

- Seminars: July 29- August 2
- Grader: 2 faculty members
- See Seminar Presentation Rubric for details of the criteria assessed and standards

Literature Review and Research Proposal (40%)

Due: Fri, Aug 9, 4:00 PM

- Grader: Faculty advisor + one other faculty member assigned by the course coordinator
- See Literature Review and Research Proposal Rubric for details of the criteria assessed and standards

Research Performance (40%)

- Grader: Faculty advisor

6.3 Seminar Presentations (20%)

- DATES: Seminar powerpoint file DUE in Dropbox, July 26;
- LATE PENALTIES: 10% + 10% / day up to 50%, including weekends. A grade of zero will be assigned after 5 days late.
- Seminar presentation July 29 - August 2, 2019; exact schedule TBD
- A 12-minute presentation followed by a 3-minute question period.
- Each seminar session will be 2 hrs long
- You are expected to attend all seminars in the session in which you present your seminar.
- PowerPoint presentations are strongly encouraged.
- Seminars are graded based on:
 - demonstration of understanding in your area of study
 - developing a hypothesis and / or objectives
 - distilling the most important ideas
 - oral presentation skills
 - delivering an effective presentation to an audience of your peers
- (see Seminar Presentation rubric for full details and standards)
- Students are encouraged to discuss their seminar presentations with their faculty advisor and lab colleagues well in advance of their seminar date to obtain feedback with time to make changes.

6.4 Literature Review and Research Proposal (40%)

- DUE DATE: Friday, August 9, 2019 at 4:00pm
- SUBMISSION: submit a pdf of your paper to the Courselink Dropbox by the due

date

- LATE PENALTIES: 10% + 10% / day up to 50%, including weekends. A grade of zero will be assigned after 5 days late.
- Requirements: Approximately 20 pages double-spaced, margins 1-inch all around, 12-pt Times or 11-pt Arial font. Page limits do not include a required Title page and list of references. Use the in-text citation style used in the journal Cell. Discuss the format and contents with your Advisor as they will be grading the paper along with another faculty member.
- The literature review presents a critical review of the literature and a rationale for the research. The focus is on the biological (less than the technical) aspects of your research project.
- The research proposal must outline the objectives of your research and outline the experiments (including methods) planned to meet those objective. Potential pitfalls and alternatives should be addressed. A timeline to completion is advised. Please see the Student Information Paper S19 document on CourseLink for further information and advice. In particular, note the following:
 - While you are not expected to include data, you may show preliminary data to demonstrate the feasibility of your proposal. Control experiments that show a certain technique works or a DNA gel showing your production of a construct you will be using in your work are some examples.
- NOTE: Technical breakdowns are not a valid reason for requesting an accommodation. Important documents and drafts of documents should ALWAYS be backed up.

6.5 Research Performance (40%)

Students should realize that it is important that the experiments and analyses are done logically and thoroughly, so that results can be meaningfully interpreted. A lack of positive results in their project will not lead to a lower grade, as long as what has been done has been properly carried out. "Negative" results may be useful if they demonstrate that an initial hypothesis was wrong, or if it can be shown that the experimental procedures used were not appropriate.

7 Course Statements

7.1 Resolving Conflict

Working in teams can involve differences of opinions or personalities. If you experience a conflict with a member of your lab, bring this conflict to the attention of your faculty advisor

for help. If you experience a conflict with your faculty advisor that you are not able to resolve on your own, contact the Chair of the Department of Molecular and Cellular Biology for advice and assistance.

7.2 Turnitin

- In this course, we will be using Turnitin, integrated with the CourseLink Dropbox tool, to detect possible plagiarism, unauthorized collaboration or copying as part of the ongoing efforts to maintain academic integrity at the University of Guelph.
- All submitted assignments will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers. Use of the Turnitin.com service is subject to the Usage Policy posted on the Turnitin.com site.
- A major benefit of using Turnitin is that students can educate and empower themselves in preventing academic misconduct. In this course, you may screen your own assignments through Turnitin as many times as you wish before the due date. You will be able to see and print reports that show you exactly where you have properly and improperly referenced the outside sources and materials in your assignment.

8 Department of Molecular and Cellular Biology Statements

8.1 Academic Advisors

If you are concerned about any aspect of your academic program:

- Make an appointment with a program counsellor in your degree program. [B.Sc. Academic Advising](#) or [Program Counsellors](#)

8.2 Academic Support

If you are struggling to succeed academically:

- Learning Commons: There are numerous academic resources offered by the Learning Commons including, Supported Learning Groups for a variety of courses, workshops related to time management, taking multiple choice exams,

and general study skills. You can also set up individualized appointments with a learning specialist. <http://www.learningcommons.uoguelph.ca/>

- Science Commons: Located in the library, the Science Commons provides support for physics, mathematic/statistics, and chemistry. Details on their hours of operations can be found at: <http://www.lib.uoguelph.ca/get-assistance/studying/chemistry-physics-help> and <http://www.lib.uoguelph.ca/get-assistance/studying/math-stats-help>

8.3 Wellness

If you are struggling with personal or health issues:

- Counselling services offers individualized appointments to help students work through personal struggles that may be impacting their academic performance. <https://www.uoguelph.ca/counselling/>
- Student Health Services is located on campus and is available to provide medical attention. <https://www.uoguelph.ca/studenthealthservices/clinic>
- For support related to stress and anxiety, besides Health Services and Counselling Services, Kathy Somers runs training workshops and one-on-one sessions related to stress management and high performance situations. <http://www.uoguelph.ca/~ksomers/>

9 University Statements

9.1 Email Communication

As per university regulations, all students are required to check their e-mail account regularly: e-mail is the official route of communication between the University and its students.

9.2 When You Cannot Meet a Course Requirement

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons please advise the course instructor (or designated person, such as a teaching assistant) in writing, with your name, id#, and e-mail contact. The grounds for Academic Consideration are detailed in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Academic Consideration and Appeals

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

Graduate Calendar - Grounds for Academic Consideration

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

9.3 Drop Date

Courses that are one semester long must be dropped by the end of the fortieth class day; two-semester courses must be dropped by the last day of the add period in the second semester. The regulations and procedures for course registration are available in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml>

Graduate Calendar - Registration Changes

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/genreg-reg-regchg.shtml>

9.4 Copies of Out-of-class Assignments

Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

9.5 Accessibility

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required; however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to book their exams at least 7 days in advance and not later than the 40th Class Day.

More information can be found on the SAS website

<https://www.uoguelph.ca/sas>

9.6 Academic Integrity

The University of Guelph is committed to upholding the highest standards of academic integrity, and it is the responsibility of all members of the University community—faculty, staff, and students—to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff, and students have the responsibility of supporting an environment that encourages academic integrity. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

Undergraduate Calendar - Academic Misconduct

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml>

Graduate Calendar - Academic Misconduct

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

9.7 Recording of Materials

Presentations that are made in relation to course work - including lectures - cannot be recorded or copied without the permission of the presenter, whether the instructor, a student, or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

9.8 Resources

The Academic Calendars are the source of information about the University of Guelph's procedures, policies, and regulations that apply to undergraduate, graduate, and diploma programs.

Academic Calendars
