

Science For A Better Life

MUCK CROPS RESEARCH STATION IPM 2017

This is the Muck Crops Research Station Report and IPM Information for Tuesday June 27, 2017

The rain keeps continuing after our heavy downpour Friday, with flooding and pooling water common throughout the marsh. Over the past week, we have received 120 mm of rain on station, putting June to a month total of 198 mm of rain. Fields are too wet to really get in to and we are monitoring the situation on station. Once fields become workable, we can begin examining the extent of possible losses and we will discuss recommendations for recovery.

Soil Temperatures:

June 26: 5 cm – 17.4
10 cm – 16.6
20 cm – 18.1

DATE (June, 2017)	TEMPERATURE (°C)		ACCUMULATED RAINFALL (mm)
	MAX	MIN	
23	25.4	9.5	78.4
24	25.9	18.9	0.0
25	23.4	14.7	2.2
26	20.6	13.6	27.6
