Clinical Child and Adolescent Psychology Program

The Clinical Child and Adolescent Psychology (CCAP) Program's mission is to cultivate excellence in training highly skilled child clinical psychologists within a scientist-practitioner model who are well-equipped to serve diverse populations of children, adolescents, and families. The CCAP program stresses developmental processes as a foundation for understanding and addressing child and adolescent psychopathology and how to best foster well-being in an increasingly complex world. Children, adolescents, and their families face numerous challenges and also present with many strengths and resources to address these challenges and improve quality of life. Clinical Child and Adolescent Psychologists have much value to this end.
