

Description of Practica

(Note: As the CCAP program is designed as a MA and PhD level program in which clinical competencies are assessed continuously and cumulatively across both degrees towards preparation for residency application, both MA and PhD level practica are described below).

Overview

Practica are an integral part of the CPA accredited Clinical Child and Adolescent Psychology (CCAP) program and involve supervised placements which take place both in the Department's in-house training facility, Maplewoods Centre, and externally in school boards, community mental health agencies, and hospitals. Practica provide opportunities for students to apply knowledge, clinical skills, and ethical decision-making gained in coursework in a clinical setting. While on practicum, students practice and develop the professional competencies that are an essential part of the training program. The PhD Qualifying Examination provides an evaluation of these clinical competencies to determine suitability for Doctoral candidacy. Moreover, documented skilled performance and experience in practica are essential preparation for the required year-long CPA accredited clinical internship (PSYC*8000). **Before applying for this internship year, students should have developed both breadth and depth of clinical skills through a minimum of 300 direct contact hours with clients and 200 hours of supervision.** Direct contact hours may include assessment, consultation, intervention, or other clinical activities with clients. Note that to be competitive for internship placement, most of our students will achieve greater than 300 direct contact hours (see recommended sequence of practicum experiences in subsequent section). The CCAP Practicum Coordinator, supported by the DCT, provides guidance to students regarding practica. The CCAP program is designed as a combined MA and PhD program in which clinical competencies are assessed continuously and cumulatively. Therefore, the sequence of both MA and PhD level practica is described below.

Broad Competency Areas Assessed Via Practicum Training

The following broad competency areas (comprised of numerous more specific competency facets) are developed and assessed on the integrated series of practicum experiences.

Foundational Competencies: Foundational competencies cut across each of the functional competencies of the practice of professional psychology on practica (i.e., assessment, intervention, consultation, and supervision).

Individual, Social, and Cultural Diversity*: Students demonstrate an awareness and understanding of the importance of addressing issues of human rights and **social justice** in all aspects of training.

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

Professionalism and Interpersonal Relationships: Students demonstrate knowledge and ability to establish, develop, and maintain effective interpersonal and professional relationships (e.g., with clients, supervisors, students, research participants, colleagues). Psychologists normally do their work in the context of interpersonal relationships. They must therefore be able to establish and maintain a constructive working alliance with clients and other professionals (e.g., colleagues, learners) from myriad backgrounds and experiences.

Evidence-Informed Knowledge and Methods: Students demonstrate professional knowledge and skills that are based on the integration of research evidence, clinical expertise, and **client** values and contextual information.

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

Reflective Practice, Bias Evaluation: Students are able to reflect on their own biases, assumptions, beliefs, power, and privilege concerning professional practice and to be aware of cognitive biases in deriving and organizing information, as well as arriving at conclusions and recommendations (e.g., confirmation bias, recency effect).

Ethics and Standards: Students demonstrate knowledge and application of ethical principles, standards of professional conduct, and jurisprudence in relation to the practice of psychology.

**Aligned with the new CPA accreditation standards, Indigenous Interculturalism need also form its own foundational competency area. As a program, we support this perspective and are moving towards this goal. Expect this competency area to be highlighted in future revisions of the policy document.*

Functional Competencies: The following functional competencies are common to all psychologists at the point of entry to practice; learning across each competency area is scaffolded across the MA and PhD programs.

Assessment and Evaluation: Demonstrates knowledge about how and ability to assess, conceptualize, diagnose, and communicate the needs, challenges, and strengths of clients to inform practical plans of action. The primary purpose of psychological assessment is to provide an understanding that informs a practical plan of action. It may result in a diagnostic classification or in the identification of strengths or competencies. The skills required for assessment can and should be applied to many situations other than initial evaluation (e.g., treatment outcome, program evaluation, problems occurring in a broad spectrum of non-clinical settings).

Intervention and Consultation: Demonstrates knowledge about and ability to implement activities that promote, restore, sustain, and/or enhance positive functioning and a sense of wellbeing; this includes addressing clients' needs, concerns, distress, and impairment. A broad, comprehensive vision of the intervention competency should include explicit theory as well as knowledge and skills.

Supervision: Students value clinical supervision as central to their own development as a psychologist and come prepared and open to feedback as a supervisee. Students also demonstrate an understanding that to engage in the practice of clinical supervision has the simultaneous purpose of enhancing professional functioning and supporting the well-being of the more junior members of the profession, while monitoring the quality of services/research provided to individuals and groups.

Required Practicum Hours

Students often raise questions about how many practicum hours they need to accrue to be prepared and competitive for their internship. **Directors of internship sites repeatedly stress that it is the quality of the practicum**

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

experiences rather than the quantity of hours that is important in preparing for students for internship. The expectations in our accredited program are informed by practicum hours guidelines set by both the Canadian Psychological Association (CPA) and recommendations from the Canadian Council of Professional Psychology Programs (CCPPP).

In their recent document outlining the documentation of practicum hours, CCPPP (2021) notes, ["typically 1000 hours \(400-600 direct service hours\) of wisely chosen practicum experience is required to attain sufficient breadth and depth. This would include an appropriate balance of direct service, supervision, and support hours. Students and programs should strive in their practica for experience with cases varying in complexity in different service delivery settings, with a variety of populations, presenting questions, assessment and therapeutic models and methods, case conferences, and supervisors to acquire competencies for a successful residency year. The quality of training is more important than the number of hours recorded"](#) (Documentation of Professional Psychology Training Experiences, CCPPP 2021). CPA's recent update to the Accreditation Standards (approved June, 2023) also describe accruing 1000 practicum hours, requiring at least 300 direct or face-to-face hours at the time of application for residency. In keeping with these recommendations, the following table details the practicum experiences and hours that are expected throughout the program.

Practicum Guidelines by Year of Program

Please note that hours in one particular practicum may vary between students and these hours are meant to serve as a guide rather than requirement (e.g., PhD external practica vary in proportion of assessment and intervention activities). The CCAP program is designed such that all students will have sufficient hours and experiences and competencies to engage in the predoctoral internship.

Year	Activities	Total Hours	Direct Contact Assessment	Direct Contact Intervention	
MA1 FWS	PSYC*7991 Phone intake, shadowing assessment, carry out one assessment in pairs		10	10	
MA2 F	PSYC*7991 One assessment in pairs		10		
MA2 W	PSYC*7992 External Practicum Approximately five to six assessments	200	65		
MA Total			85	10	
PhD1 FW	PSYC*7994 CBT Practicum One CBT client			10	

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

PhD1 WS	PSYC*7991 At least one additional therapy client and one assessment		10	20	
PhD2 FW	PSYC*7993 External Practicum Typically hospital or community clinic based; therapy and assessment	400	20	90	
Total before QE			115	130	
PhD3 F	PSYC*7991 At least two therapy clients and one assessment.		10	25	
PhD3 W	PSYC*7991 At least two therapy clients PSYC*7996 Supervise a junior student on one therapy client			25+	10 Providing Supervision
PhD3 S	PSYC*7991 – At least two therapy clients and complete or supervise one assessment		10	20	
Practicum Guidelines by Year of Program Cont'd.					
Year	Activities	Total Hours	Direct Contact Assessment	Direct Con	Intervention
PhD4 F	PSYC*7991 – At least two therapy clients and carry out or supervise at least one assessment if time allows			25	
TOTAL (Planned Practica)			135	235	
Additional Clinical Experiences	Students are expected to accrue additional hours throughout their degree in activities such as additional assessment and intervention, consults, program development, group therapy, ASD team, outreach, supervision of junior students, etc.				
GRAND TOTAL		1000	200	250

Description of Practicum Courses

Clinical Psychology Practicum I: (PSYC*7991) taken in most semesters of the program

Faculty Instructor (Coordinator): Practicum Coordinator or Clinical Faculty Member

Throughout their MA and PhD studies, students are required to undertake ongoing supervised clinical work with children, adolescents, and their families at the Maplewoods Centre. This practicum is undertaken in multiple semesters to permit a broad variety of clients and supervisory experiences. This includes experiences from shadowing clients and performing intake duties early in MA training, to handling complex assessment and eventually therapy clients during PhD training. Senior PhD students will also participate in supervised supervision activities. Supervision of clinical work at Maplewoods Centre is provided by the Clinic Director and several clinical faculty.

Note: In senior PhD years, some students elect to take PSYC*7991 as an external practicum (i.e., outside Maplewoods Centre). If a student would like to complete an additional PSYC*7991 in a setting other than the Maplewoods Centre, the student must obtain approval from the Practicum Approval Committee. It must be clear that the potential site offers sufficient quality clinical training and supervision and that the particular experience is not readily available at Maplewoods Centre within the same timeframe.

Clinical Psychology Practicum II: Masters Level Assessment Practicum (PSYC*7992)

Approximately 200 hours (65 Direct; 40 Supervision)

Faculty Instructor (Coordinator): Practicum Coordinator or Clinical Faculty

This practicum is intended to provide students with a broad range of experience in psychological assessment and typically occurs in the psychological services department of a school board. Under supervision, students are expected to be involved in all aspects of psychological assessment services. PSYC*7992 students gain exposure to a range of client populations and presenting problems. Typically, students take on between 5 and 6 assessments over the course of a semester depending on the complexity of the cases and depth of the assessments. Students may also be involved in consultation or other in-service work.

CBT Practicum: PhD Level Practicum (PSYC*7994)

Approximately 100 hours (20 Direct; 20 Supervision)

Faculty Instructor: Assigned to teach PSYC*7994

This practicum course is taken in the first year of the PhD at Maplewoods Centre. It is intended to provide extensive support for students working with their first psychotherapy clients. The course will foster graduate student training in early therapy skills with a focus on cognitive behaviour therapy (CBT) and will include didactic and experiential components. Students will gain competency with the practice of CBT for child and adolescent mental health challenges, be exposed to treatment manuals, and undertake at least one ongoing therapy case using a CBT approach.

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

Practicum III: PhD Level Practicum (PSYC*7993)

Approximately 400 hours (100 Direct; 50 Supervision)

Faculty Instructor (Coordinator): Practicum Coordinator

This practicum is intended to provide students with in-depth experience in the assessment of and intervention for complex social-emotional and mental health problems. Often this practicum takes place in a hospital or community mental health setting. On this practicum, students continue to develop assessment, therapy and consultation competencies. Most students apply to sites that comprise the Toronto Area Practicum Group.

Clinical Supervision, Consultation, and Program Evaluation Practicum: PhD Level Practicum (PSYC*7996)

Approximately 36 hours (10 Direct; 5 Supervision)

Faculty Instructor: Assigned to Teach PSYC*7996

The 7996 course is normally taken in PhD Year 3 or 4 at Maplewoods Centre. Because it is a practicum, it can be taken the same year as applying/interviewing for internship. This practicum is designed to introduce students to the theory, research, and practice of supervision, consultation, and program evaluation in the field of clinical psychology. Students will become familiar with the professional literature relevant to supervision, gain competency with ethical, culturally-competent clinical supervision, and explore their own development as a supervisor.

Selecting a Site

For all practica, students should meet with the Practicum Coordinator to identify training objectives and potential practicum sites. Together, the student and Practicum Coordinator will develop a rough plan of activities for the practicum to be finalized in consultation with the on-site practicum supervisor. When applying for external practica, students should have an up-to date curriculum vitae that includes coursework, clinical experience, and research.

For Practicum II (PSYC*7992), students need to meet with the faculty instructor for this course 4-5 months in advance of placement to review possibilities for placements at different school boards. Students should supply a recent CV to the instructor who will initiate contact with the lead psychologist and gain potential matches for students to follow-up on. If students are interested in placement with a school board or other agency that is part of the Toronto-Area Practicum Group, they will need to apply one year in advance.

For Practicum III (PSYC*7993), preparation begins in the Fall of the year before students begin the practicum. Students who are interested in completing a practicum in one of the Toronto Area Practicum settings are advised that this group of settings is organized into a **Toronto Area Practicum Group** with a coordinated application date (usually early February), notification date (usually March), and procedure. Reference letters, transcripts and cover letters will be requested when applying for Practicum III.

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

Insurance

Work completed as part of required studies is covered under the Canadian Universities Reciprocal Insurance Exchange insurance policy. Practicum settings may request proof of this Insurance Certificate. This documentation can be arranged through the faculty instructor or the DCT.

Police Checks, Vaccination Coverage, and Tuberculosis Clearance

Many practicum settings require that all regular and visiting personnel have a criminal record check with a vulnerable sector screen, proof of vaccination coverage/history, and certificate of being free of tuberculosis. Policies vary from setting to setting and may change from one year to the next. Students must determine what the policies are at the setting and ensure that appropriate documentation is submitted in advance of beginning the practicum. Sometimes the processing of this and other paperwork involves substantial time; thus, students should organize themselves and coordinate with the sites well in advance.

Registering in Practica

Registration in each practicum course requires the consent and signature of the faculty instructor or Practicum Coordinator (depending on the course). It is the student's responsibility to supply the instructor of these courses with the appropriate Add Form. Once a practicum setting and supervisor has been determined, the student and supervisor complete the Practicum Agreement/Supervision Agreement Form.

Practicum Responsibilities

Responsibilities of the Student

Students are responsible for establishing training goals and objectives and monitoring their experience in conjunction with their supervisors. At minimum, progress toward these goals should be discussed with the supervisor at the mid-point and at the end of the practicum. Students must also keep a record of their hours and activities and submit these to their practicum supervisor for approval and signature.

Students are expected to resolve issues in a professional manner and to seek prompt advice from their supervisors should any difficulties arise. Students are also able to bring any issues related to their clinical training to the Faculty Instructor, DCT, and/or Practicum Coordinator for discussion.

Hours Tracking

The Department also subscribes to the software program Time2Track to facilitate tracking practicum experiences and students are required to use it for their benefit and also so that their clinical training hours can be cumulatively tracked by the DCT and Practicum Coordinator. Information about how to track hours in Time2Track can be found in the

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

Tracking Hours folder on the Intake Drive.

Responsibilities of Clinical Supervisors

Clinical supervisors are expected to follow the College of Psychologists of Ontario's professional standards related to supervision. Clinical supervisors should provide students with information about the policies and procedures for the setting, highlighting particular professional and legislative standards that apply. Supervisors should provide students with ongoing feedback about their progress and development of clinical competencies throughout the practicum. In addition, as per the CPA Accreditation Standards, on average, one hour of face-to-face supervision is to be provided for every two hours of direct, face-to-face client work. Supervision is expected to follow the student's level of competency. Typically, more supervision is required when students undertake new or more complex tasks. For example, students at earlier stages of training or undertaking new responsibilities on practica may require more intensive supervision ratios. Practicum students may also engage in other service-related activities such as report writing, scoring, progress notes, and classroom observations that require additional supervision. Students may count up to 25% of their "indirect" supervision (e.g., report reviewing/feedback, video viewing) as supervision hours. Supervisors will need to tally and convey these hours to students for addition to their practicum evaluation forms and Time2Track accounts. Supervisors should expect to be contacted one or two times by the faculty member responsible for evaluating the training experience to discuss the student's progress.

The supervisor completes (an) evaluation form(s) regarding the student's competencies, recommends future training goals, discusses this with the student, and verifies that the documentation of hours and experiences compiled by the student is accurate; this occurs at the mid and/or end-point of the practicum depending on practicum length (i.e., shorter practica may only have an evaluation at the end). At any point during the practicum, supervisors are to convey any serious or immediate concerns regarding the student's practicum work to the faculty instructor identified on the Practicum Agreement Form and/or the DCT.

Responsibilities of the Course Instructor

Often, the Practicum Coordinator acts as instructor for PSYC*7991, and PSYC*7993 whereas a clinical faculty member acts as instructor for PSYC*7992, PSYC*7994, and PSYC*7996. The instructor assists students in locating and setting up practica.

The instructor is responsible for coordination and evaluation of students' progress and experiences while on practica and helping to resolve any problems that might arise. Monitoring is typically handled through a combination of scheduled cohort meetings and one-to-one consultation. Following the Guidelines of Council of Chairs for Training Councils Voluntary Guidelines for Communication between Graduate Programs and Internships, the faculty instructor should make 1-2 informal (telephone or email) contacts with the site supervisor to elaborate on or answer any questions on the nature of the program and expectations for supervision and accountability and to monitor student progress. In cases in which a site supervisor expresses concerns over a student, the instructor is to document these concerns as they are conveyed, address them with the student, and follow-up with the on-site supervisor accordingly. These communications should be brought to DCT's attention and in some cases may involve the DCT directly.

At the end of the practicum, the instructor ensures that all practicum documentation for each student is complete and signed and that the final grade is submitted. Practicum documentation for each student is to be provided to the

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

Practicum Coordinator, who will place it in the student's practicum file. This file may be periodically reviewed by the DCT and Practicum Coordinator.

The PhD Qualifying Exam takes place following completion of PSYC*7993. At this time, the Practicum Coordinator writes a summary and recommendation as to whether the student demonstrates clinical competency commensurate with a senior PhD student based on information in the student practicum file. This letter will be weighed when making overall decisions about student PhD candidature.

Responsibilities of the Director of Clinical Training

It is the responsibility of the DCT to consult with the Practicum Coordinator and/or Faculty Instructor who coordinates PSYC*7991, PSYC*7992, PSYC*7993, PSYC*7994, and PSYC*7996 to be aware of the progress made by students in the various practica. The DCT meets with individual students as needed to address any questions/concerns about progression in the program including practica. The DCT will also be available for consultation about professional and ethical matters pertaining to the practica and to ensure that the accreditation standards of CPA are followed.

Competency Benchmark Challenges: Remediation and Action Plans

During practica, students will receive regular written and oral feedback about their developing clinical competencies. A detailed written Practicum Evaluation will be completed by the student's direct clinical supervisor and become part of the student's clinical training record. In the interest of ensuring optimal student development, the DCT, practicum committee, and Maplewoods clinical supervisors meet regularly to discuss student progress in clinical competence, performance and behavior, as well as to plan appropriate clinical experiences. These discussions may include review of the student's clinical training record, communications from clinical supervisors, and Time 2 Track hours accrued.

Student overall performance in the CCAP program, including but not limited to clinical competence, performance, and behavior in clinical settings, is also discussed by CCAP Faculty in each semesterly Student Review meeting. Regardless of grade attained in a practicum course, a student may be identified in the Student Review as needing remediation in one or more of clinical competence, performance and/or behavior in clinical settings. If the need for remediation is identified, an Action Plan will be created to meet these needs. To support ongoing competency development, information about students' clinical competencies (including any remediation plans) may be shared with the student's clinical supervisor(s) in upcoming clinical practica. Whether the practicum takes place at the Maplewoods Centre, or at an external site, there is ongoing communication between external practicum supervisors, the Practicum Coordinator, Course Instructor (as relevant), and the DCT regarding development of clinical competencies.

Practicum Credit

Evaluation

Students are graded on a pass/fail basis by the instructor based on written evaluation and verbal feedback from the clinical supervisor. Practicum evaluations are reviewed by the Practicum Coordinator at various times to gain an overview of student progress and provide guidance for future training experiences, as well as to provide a summary of clinical competence as part of the PhD Qualifying Examination. Should a student fail a practicum, the CCAP area will

Description of Practica

Published on Department of Psychology (<https://www.uoguelph.ca/psychology>)

review to determine a recommendation that may range from remedial work to withdrawal from the program.

Incomplete Practica

Practicum experiences that continue from semester to semester may be given a grade of Incomplete (INC) at the end of the first semester. Automatically, the student carries the practicum into the next registered semester and **should not re-register for the practicum**.

In the following registered semester, with the exception of extraordinary circumstances, the practicum must be completed, and the appropriate paperwork submitted to the instructor as per Practicum Responsibilities above. An evaluation of satisfactory or unsatisfactory will be assigned by the faculty instructor, replacing the INC on the student's transcript.

Funding

While most practica are unpaid positions, students may occasionally be provided compensation by an external practicum site. In such situations, care must be taken to manage the inherent dual relationship between student and supervisor to make sure that the focus remains on the development of the student's competencies. As with any external practicum experience, these placements must be reviewed and approved by the Practicum Committee.
