

Fall 2021: Important information and dates for enrolling in PSYC courses

Based on current public health projections, we anticipate that a significant number of Fall 2021 PSYC courses will be offered face-to-face or will include in-person components such as labs or tutorials that REQUIRE you to be on campus. Some courses will be delivered remotely. You can see the planned delivery format in Webadvisor. Updates will be posted [here](#) when they are available. We encourage you to check back regularly as information becomes available.

Psychology students: It is CRITICAL that you select your courses as soon as possible!

Psychology majors and minors have priority access to most PSYC courses, but once priority access is removed (July 19), the majority of PSYC courses will become full, and you will no longer be able to enroll.

Course size is NOT expected to increase over time. Once a course is full, it is full! *

Non-psychology students: Students in some non-psychology majors/minors also have priority access to some PSYC courses. If your program requires a PSYC course, or has a PSYC restricted elective, you will have priority access to that course.

Be sure that you know when your [course selection window](#) opens.
