PSYC*4440, Course Outline: Winter 2017

General Information

Course Title: Contemporary Issues in Child Development: Pediatric Psychology

Course Description:
This course is designed to provide students with an overview of the field of pediatric (child health) psychology including history, theory, research, and clinical practice. Topics will include an introduction to the specialty incorporating theoretical perspectives, common assessments and interventions. An overview of different issues/disorders/diseases (e.g., oncology, pain, feeding disorders, sleep) within the field will be provided including etiology, theoretical perspectives, relevant research findings, and evidence-based assessment and treatment. Issues such as comorbidity, social influences, as well as legal and ethical concerns will be discussed for topics as appropriate. Through exploration of the various topics, students will learn about overarching factors of importance across disorders (e.g., impact on development, family factors). Knowledge from related fields of developmental and clinical psychology as well as behavioural medicine will be used to inform understanding of topics. Case studies and examples of “real-world” treatment programs will be used to illustrate clinical concepts.

Credit Weight: 0.5 credits

Academic Department (or campus): Psychology

Semester Offering: Winter 2017

Class Schedule and Location: Tuesdays 8:30 – 11:20 am in MacKinnon 227

Instructor Information

Instructor Name: C. Meghan McMurtry, Ph.D., C. Psych
Instructor Email: cmcmurtr@uoguelph.ca (when sending an email, please put 4440 in the subject line)
Office location and office hours: 4004 MacKinnon Extension; Tuesdays 3:15 to 4:15 pm or by appointment only.

GTA Information

GTA Name: Rachel Moline
GTA Email: rmoline@uoguelph.ca
GTA office location and office hours: by appointment only
Course Content

Specific Learning Outcomes:
In completing this course, students should be able to:

1. Demonstrate an understanding of the field of pediatric psychology and its relationships with clinical psychology and medicine
2. Describe the role of pediatric psychologists in collaborating with other clinical professionals in a variety of settings
3. Identify the signs and symptoms, evidence-based assessments, as well as treatments of a variety of disorders/issues within pediatric psychology within a child development context
4. Develop and implement basic knowledge dissemination skills in communicating pediatric psychology topics to community audiences
5. Demonstrate collaborative group work including problem-solving, responsible completion of assigned tasks, organization, and respect for others
6. Evaluate self and peer contributions to group work
7. Demonstrate appropriate academic independence, personal organization, and time management in completing assigned course tasks

Lecture Content:

The course format is a combination of lecture-based and more active learning. Attendance and active participation in the class are expected. In-class discussion, examples from the popular media, and videos will be used in combination with a more traditional didactic component. Students are expected to lead the class in an individual and group presentation. PowerPoint presentations will be used for all of my lectures and a draft of these will be posted by midnight the day before the lecture on Courselink. However, the presentation outlines that I post on Courselink will not include some of the slides/information that I will present in class (e.g., case studies, elaborations, practical examples). It is in your best interests to attend class and take good notes. While there will be overlap between the readings and the lectures, there will also be information unique to both. To be familiar with all of the information required for the final exam, you need to complete the readings and attend all the lectures.

</table>

**Additional Notes (if required):**
Details and marking schemes for each course component will be posted on Courselink, what follows is a simple overview.

**Class Participation:**
There are two components to your class participation:
1) Your ongoing participation/discussion in class (worth 5% of your final mark). You are expected to attend all classes, including when groups are presenting. As this is a fourth year course, active participation in discussions is encouraged and expected. Although the quantity of your ongoing contributions will also be taken into account, the quality is very important.
2) Your class discussant assignment (worth 10% of your final mark). This is a 10 minute presentation consisting of a brief introduction to a real world parallel that you have chosen (e.g., video clip from a TV show, celebrity story) followed by your facilitation of a class discussion based on two discussion questions.

**Communication Product:**
Pediatric psychologists commonly need to work within teams, have to understand the research literature, and explain it to different groups of people. This assignment is designed to give you practice within each of these areas. This year’s project has been commissioned by Vicky Sardi-Brown President of Mattie’s Miracle Cancer Foundation and Lori Wiener of the Pediatric Oncology Branch of the National Institutes of Health National Cancer Institute! You have the unique opportunity to create something that will help families and clinicians in pediatric oncology. The academic evidence which you will be summarizing is a series of papers in a
special issue of the journal, Pediatric Blood & Cancer. You will be randomly assigned to specific articles along with several other (random) students. Each group will find a way to very briefly summarize their articles for the public and then take the information from the other groups to form a product which represents a series of articles on psychosocial needs in pediatric cancer. In consultation with the commissioning parties, your TA, and me, your group will complete: 1) a work plan; 2) textual summaries of the communication; 3) a draft communication product; 4) a presentation giving an overview of the product; and 5) the final communication product. Individually, each person will also prepare an explanation of the communication product and reflect on his/her learning experiences through this process.

Final examination date and time: Tuesday April 11, 2017 from 7 to 9 pm.

Final exam weighting and format: The final exam will be multiple choice and short answer. It is a cumulative, closed-book test: you will not be able to access the text, your notes, or other material during the exam. The content will be based on both the readings and the lecture material. In addition, some of the exam questions may be chosen from the student prepared discussion questions. Thus, you need to attend all of the classes. The last class will be used to review the material. Worth 26% of your final mark.

Course Resources

Required Texts:
The Handbook of Pediatric Psychology, 4th edition. Editors: Michael Roberts & Ric Steele. One copy is on reserve in the library. Readings are to be completed prior to the lectures so that you will derive maximum benefit and can meaningfully contribute to class discussion.

Other Resources:
Please get to know our course website on Courselink. It is your responsibility to keep up to date on materials and announcements posted on this website. Copies of the lecture slides will be posted on Courselink by midnight the night before class. Grades will be shared through Courselink and you are also asked to submit a number of course components through Dropbox.

Course Policies

General:
All students are required to check their @mail.uoguelph.ca e-mail account regularly
One of the course learning outcomes is “Demonstrate appropriate academic independence, personal organization, and time management in completing assigned course tasks.” This outcome was not chosen lightly; there are a number of deadlines and substantial organization required in completing this course. It is your responsibility to organize yourself and meet these deadlines – I will not spend time in class reminding you of various deadlines.
Grading Policies

Late Assignments:
It is your responsibility to meet deadlines. Group project components (see assignment table) that are not handed in before their respective due dates and times will be immediately deducted 5 points and 5 additional points will be taken off for each day of lateness. Discussant assignments uploaded to Courselink after 11:59 the Friday before the assigned date will be immediately deducted 2 marks and an additional 2 marks will be taken off for each additional day of lateness. No extensions will be granted. The only exceptions to these rules are for unforeseen, serious circumstances of personal illness or other issues.

Missed Exams:
The only accepted reasons for missing the final are: a) medical reasons, b) compassionate reasons, and c) conflict with a religious holiday. Be sure to review your exam schedule prior to making travel arrangements for the end of term, as this does not constitute a valid reason for missing a final exam according to university policy. Students are not permitted to remain in courses that have final exams in the same time slot; please check your courses carefully. You should consult with the Bachelor of Counselling Office (x. 52140; or equivalent for your degree program) in advance if you will be missing the final exam.

Course Policy on Group Work:
This course has both individual and group work. There are a variety of checks and balances in place to maximize equitable distribution of effort in the group work and this has worked well in the past. Each group member is expected to contribute to all components of the project. If there is an issue in group effort, it is your responsibility try to work it out and to let the TA and me know as soon as possible if your efforts have not been successful. In addition to the group work plan contract, all members of the group will complete two peer review work effort forms indicating the amount of effort each group member devoted towards the completion of the group assignment and adherence to the group work plan contract. This includes factors such as involvement in planning, preparation for meetings, contributions to group discussions, completion of assigned work. Although ideally, each group member will contribute equally, this is not always the case. These group effort forms and their ratings will be taken into account when assigning each student’s grade for the components of the group assignment. For example, if a pattern emerges in which one group member consistently receives lower effort scores than the other members, this will likely result in a lower grade for that person. Any group members who do not attend the day of the presentation will receive a 0 for that portion of the assignment without a documented medical or compassionate reason; there will be no make-up presentations. Group effort forms will be posted on Courselink and submitted via Dropbox.

Course Policy regarding use of electronic devices and recording of lectures:
Electronic recording of classes is expressly forbidden without consent of the instructor. When recordings are permitted they are solely for the use of the authorized student and may not be reproduced, or transmitted to others, without the express written consent of the instructor.
**University Policies**

**Academic Consideration**

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons, please advise the course instructor in writing, with your name, id#, and e-mail contact. See the academic calendar for information on regulations and procedures for Academic Consideration: [Academic Consideration, Appeals and Petitions](#)

**Academic Misconduct**

The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community, faculty, staff, and students to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring.

University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection. Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

The Academic Misconduct Policy is detailed in the Undergraduate Calendar: [Academic Misconduct Policy](#)

**Accessibility**

The University of Guelph is committed to creating a barrier-free environment. Providing services for students is a shared responsibility among students, faculty and administrators. This relationship is based on respect of individual rights, the dignity of the individual and the University community's shared commitment to an open and supportive learning environment. Students requiring service or accommodation, whether due to an identified, ongoing disability or a short-term disability should contact the [Student Accessibility Services](#) as soon as possible.

For more information, contact SAS at 519-824-4120 ext. 54335 or email csdexams@uoguelph.ca or the [Student Accessibility Services Website](#)

**Course Evaluation Information**

Please refer to the [Course and Instructor Evaluation Website](#).
Drop date

The last date to drop one-semester courses, without academic penalty, is Friday March 10, 2017. For regulations and procedures for Dropping Courses, see the Schedule of Dates in the Academic Calendar. Current Undergraduate Calendar

Additional Course Information

My Role and Responsibilities:
To spark your curiosity about pediatric psychology! Deliver well-organized lectures based on the class text and other sources, supplemented by information from my real world experience, case examples, description of treatment programs, etc. Encourage and foster an open class environment that facilitates lively discussion. Be available to answer your questions. Provide fair evaluation. Adhere to this syllabus. In exceptional circumstances, changes may need to be made to the syllabus. In such cases, I will announce the changes in class as soon as possible as well as on CourseLink.

Your Role and Responsibilities:
Be an engaged learner. Complete the reading assignments and come prepared for class. Speak up! Active discussion is key for this course. I encourage healthy debate in our discussions but you must also be respectful to other members of the class. Be on time for class. Put thought and effort into your course work. Be an active and dedicated group member.

Classroom Conduct: Please be on time and attentive during class as coming in late and talking during class are disruptive to other students. Cell phones should be turned off during class other than in emergency situations. If you are using your laptop in class, be sure that it is only to take notes; doing other activities on your laptop is disrespectful to me (and students when they are presenting) and distracting to your fellow students.

Turnitin.com: Course instructors are allowed to use software to help in detecting plagiarism or unauthorized copying of student assignments. Plagiarism is one of the most common types of academic misconduct on our campus. Plagiarism involves students using the work, ideas and/or the exact wording of other people or sources without giving proper credit to others for the work, ideas and/or words in their papers. Students can unintentionally commit misconduct because they do not know how to reference outside sources properly or because they don't check their work carefully enough before handing it in. As the 2016/17 Undergraduate Calendar states: "Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it".

In this course, your instructor will be using Turnitin.com to detect possible plagiarism, unauthorized collaboration or copying as part of the ongoing efforts to prevent plagiarism in the College of Social and Applied Human Sciences.

A major benefit of using Turnitin is that students will be able to educate and empower themselves in preventing misconduct. In this course, you may screen your own assignments through Turnitin as many times as you wish before the due date. You will be able to see and
print reports that show you exactly where you have properly and improperly referenced the outside sources and materials in your assignment.
