# Disclaimer

The Office of Graduate Studies has attempted to ensure the accuracy of this on-line Graduate Calendar. However, the publication of information in this document does not bind the university to the provision of courses, programs, schedules of studies, fees, or facilities as listed herein.

# Limitations

The University of Guelph reserves the right to change without notice any information contained in this calendar, including any rule or regulation pertaining to the standards for admission to, the requirements for the continuation of study in, and the requirements for the granting of degrees or diplomas in any or all of its programs.

The university will not be liable for any interruption in, or cancellation of, any academic activities as set forth in this calendar and related information where such interruption is caused by fire, strike, lock-out, inability to procure materials or trades, restrictive laws or governmental regulations, actions taken by the faculty, staff or students of the university or by others, civil unrest or disobedience, Public Health Emergencies, or any other cause of any kind beyond the reasonable control of the university.

The University of Guelph reaffirms section 1 of the Ontario Human Rights Code, 1981, which prohibits discrimination on the grounds of race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, sex, sexual orientation, handicap, age, marital status or family status.

The university encourages applications from women, aboriginal peoples, visible minorities, persons with disabilities, and members of other under-represented groups.

# **Collection, Use and Disclosure of Personal Information**

Personal information is collected under the authority of the University of Guelph Act (1964), and in accordance with Ontario's Freedom of Information and Protection of Privacy Act (FIPPA) <a href="http://www.e-laws.gov.on.ca/DBLaws/Statutes/English/90f31\_e.htm">http://www.e-laws.gov.on.ca/DBLaws/Statutes/English/90f31\_e.htm</a>. This information is used by University officials in order to carry out their authorized academic and administrative responsibilities and also to establish a relationship for alumni and development purposes. Certain personal information is disclosed to external agencies, including the Ontario Universities Application Centre, the Ministry of Training, Colleges and Universities, and Statistics Canada, for statistical and planning purposes, and is disclosed to other individuals or organizations in accordance with the Office of Registrarial Services Departmental Policy on the Release of Student Information. For details on the use and disclosure of this information call the Office of Registrarial Services at the University at (519) 824-4120 or see <a href="https://www.uoguelph.ca/registrar/">https://www.uoguelph.ca/registrar/</a>

# **Statistics Canada - Notification of Disclosure**

For further information, please see Statistics Canada's web site at http://www.statcan.gc.ca and Section XIV Statistics Canada.

#### Address for University Communication

Depending on the nature and timing of the communication, the University may use one of these addresses to communicate with students. Students are, therefore, responsible for checking all of the following on a regular basis:

#### **Email Address**

The University issued email address is considered an official means of communication with the student and will be used for correspondence from the University. Students are responsible for monitoring their University-issued email account regularly.

#### **Home Address**

Students are responsible for maintaining a current mailing address with the University. Address changes can be made, in writing, through the Office of Graduate Studies.

# Name Changes

The University of Guelph is committed to the integrity of its student records, therefore, each student is required to provide either on application for admission or on personal data forms required for registration, his/her complete, legal name. Any requests to change a name, by means of alteration, deletion, substitution or addition, must be accompanied by appropriate supporting documentation.

# Student Confidentiality and Release of Student Information Policy Excerpt

The University undertakes to protect the privacy of each student and the confidentiality of his or her record. To this end the University shall refuse to disclose personal information to any person other than the individual to whom the information relates where disclosure would constitute an unjustified invasion of the personal privacy of that person or of any other individual. All members of the University community must respect the confidential nature of the student information which they acquire in the course of their work. Complete policy at <a href="http://www.uoguelph.ca/policies">http://www.uoguelph.ca/policies</a>.

# Appendix A - Courses

Courses are listed in the appendix in alphabetic order and may also be found listed under the program in which they are offered.

# Agricultural Business

GBU*6070 Research Methods for Managers W [0.50]
he objective of the course is to provide students with a working knowledge of quantitative
nd qualitative techniques used in the analysis of management problems. The emphas
on the application and interpretation of quantitative and qualitative methods rath
han on theoretical background.
<i>estriction(s):</i> CBE Executive Programs students only
Department(s): Executive MBA Programs
GBU*6100 Food and Agribusiness Economics and Policy U [0.50]
n analysis of economic and policy issues relevant for food and agribusiness manage
affluent economies, with emphasis on the economic and policy environment that exis
rithin North America.
<i>estriction(s):</i> CBE Executive Programs students only
Department(s): Executive MBA Programs
GBU*6120 Food and Agribusiness Marketing W [0.50]
study of marketing decision-making in food and agribusiness firms, with emphasis of
ne formulation of strategic marketing plans.
estriction(s): CBE Executive Programs students only
Department(s): Executive MBA Programs
GBU*6300 Problems in Agribusiness - Summer Residency S [0.50]
seven-day intensive session, delivered at the University of Guelph, that focuses on the
evelopment of a management plan for an agribusiness organization through the use or roup case studies, seminars and speakers.
• •
estriction(s): CBE Executive Programs students only Department(s): Executive MBA Programs
GBU*6400 Strategic Management & Business Game U [0.50]
n advanced course requiring the application of conceptual, analytical, proble lentification, and problem solving skills to develop organizational strategy. Foo
gribusiness and other cases are used to explore the development and implementation
rategy and to assess the dynamic relationship between strategy and competition.

# AGBU\*6700 Special Topics: Agribusiness Management U [0.50]

A special topic course focusing on relevant business issues or problems allowing students to enhance and further develop expertise in specific areas of management. May be offered to students in any semester.

Restriction(s): CBE Executive Programs students only

Department(s): Executive MBA Programs

#### AGBU\*6800 Directed Research Project U [1.00]

A management research project leading to a referenced report focusing on selected topics of interest in agricultural business.

 Restriction(s):
 CBE Executive Programs students only

 Department(s):
 Executive MBA Programs

# **Animal Science**

#### ANSC\*6010 Topics in Comparative Animal Nutrition F [0.50]

Current topics in the feeding and nutrition of agricultural, companion and captive animal species. Emphasis is placed on the influence of nutrients on metabolic integration at tissue, organ and whole-animal levels. A nutritional case study will be conducted to allow students to solve practical feeding problems by applying basic nutritional principles. The course is offered every other year on even years.

Department(s): Department of Animal and Poultry Science

#### ANSC\*6020 Poultry and Swine Nutrition W [0.50]

A discussion of current topics in the feeding and nutrition of domestic fowl and swine based on the critical appraisal of selected journal readings.

Department(s): Department of Animal and Poultry Science

#### ANSC\*6030 Modelling Metabolic Processes F [0.50]

Building and testing of mathematical models of metabolic processes using continuous simulation software to assist in weekly assignments. Choice of model based on students' research interests (e.g. protein synthesis, nutrient uptake, rumen fermentation). Term project to reproduce model from scientific knowledge.

Department(s): Department of Animal and Poultry Science

#### ANSC\*6050 Biometry for Animal Sciences F [0.50]

For students involved in animal research. The course will provide outlines of appropriate presentation and analysis of experimental data with emphasis on different analytical techniques.

Department(s): Department of Animal and Poultry Science

#### ANSC\*6100 Special Project F,W,S [0.50]

Supervised program of study in some aspect of animal and poultry science that can involve an experimental project and/or detailed analysis of the literature.

Department(s): Department of Animal and Poultry Science

#### ANSC\*6210 Principles of Selection in Animal Breeding W [0.50]

Definition of selection goals, prediction of genetic progress and breeding values, and the comparison of selection programs.

Department(s): Department of Animal and Poultry Science

ANSC\*6240 Topics in Animal Genetics and Genomics F [0.50]

Current literature and classical papers pertaining to quantitative genetics, animal breeding and animal genomics are reviewed in detail through presentation, discussion and critical analysis.

Department(s): Department of Animal and Poultry Science

#### ANSC\*6250 Growth and Metabolism W [0.50]

Animal growth and metabolism are considered at the cellular level in a manner that extends beyond the basic disciplines of biometrics and biochemistry with attention focused on the main carcass components — muscle, fat and bone.

Department(s): Department of Animal and Poultry Science

#### ANSC\*6360 Techniques in Animal Nutrition Research W [0.50]

Theory and/or practices of techniques to evaluate feedstuffs and determine nutrient utilization in poultry, swine and ruminants is covered through lectures, short laboratories and a major project.

Department(s): Department of Animal and Poultry Science

ANSC\*6370 Quantitative Genetics and Animal Models F [0.50]

The course covers quantitative genetics theory associated with animal models; linear models applied to genetic evaluation of animals; estimation of genetic parameters for animal models; and computing algorithms for large datasets.

# Department(s): Department of Animal and Poultry Science

# ANSC\*6390 QTL and Markers W [0.50]

Advanced training in QTL mapping and selection assisted by genetic markers. *Department(s):* Department of Animal and Poultry Science

ANSC*6400 Mammalian Reproduction W [0.50]	ANSC*6900 Major Paper in Animal and Poultry Science F,W,S [1.00]
Discussions and applications of methodology for collection and examination of gametes and embryos and for measurements of hormones in biological fluids. <i>Offering(s):</i> Offered in odd-numbered years.	A detailed, critical review of an area of study related to the specialization of students in the MSc by course work and major paper option that includes analysis and interpretation of relevant data.
Department(s): Department of Animal and Poultry Science	Department(s): Department of Animal and Poultry Science
ANSC*6440 Advanced Critical Analysis in Applied Ethology F [0.50]	Anthropology
Students explore the process of scientific inquiry and experimental design within the context of applied ethology research. Discussions include the peer review process, critical evaluations and explores and explores and explores and explores are applied entities and explores are applied entities a	ANTH*6000 Public Issues Anthropology F [0.50] This course will examine the interface between anthropological and public understandings
analyses and applications of methods for applied animal behaviour research. <i>Department(s):</i> Department of Animal and Poultry Science	of public issues, with sensitivity to the presence or absence of anthropological insights. The course will assure that students become well versed in how to synthesize the resources
ANSC*6450 Topics in Animal Biotechnology W [0.50]	of various branches of the discipline.
The impact of recombinant DNA techniques on present and future research in animal science and on the livestock industry is critically appraised. <i>Department(s):</i> Department of Animal and Poultry Science	Restriction(s):Restricted to incoming students in the program.Department(s):Department of Sociology and Anthropology
ANSC*6460 Lactation Biology F [0.50]	ANTH*6080 Anthropological Theory F [0.50]
An in-depth systems analysis of lactation, comparing the cow, pig, rat, human and seal. Mammary development from conception through to lactogenesis, lactation and involution	An examination of classical and contemporary anthropological theory, including an emphasis on the most recent directions in the discipline. <i>Department(s):</i> Department of Sociology and Anthropology
will be covered. Hypotheses of regulation of the biochemical pathways of milk synthesis will be tested in relation to experimental observations.	ANTH*6140 Qualitative Research Methods W [0.50]
Department(s): Department of Animal and Poultry Science	An examination of the methods of qualitative research, including participant observation
ANSC*6470 Advanced Animal Nutrition and Metabolism I F [0.50] A systematic review of key aspects of energy, protein, amino acid and carbohydrate	and unstructured interviews, as well as the ethical considerations of fieldwork. ANSC\*6740 Special Topics in Applied Animal Welfare Science S [0.50]

A lecture/seminar course covering in depth topics in applied animal welfare science. The course will review the scientific research into the welfare of a specific animal species or a specific animal welfare problem common across species, focusing on the main threats to welfare, relevant indicators of welfare, and possible solutions to improve welfare. Department(s): Department of Animal and Poultry Science

A program of directed reading, complemented with the writing of papers or participation

in research. Reading courses are arranged by students through their advisors or advisory

committees and must be approved by the chair of the department. This course may be

repeated provided different content is involved.

Department(s): Department of Sociology and Anthropology

BIOM*6490 Introduction to Drug Development W [0.50]	Biophysics
Drug development is the process of integrating scientific data from several disciplines in order to demonstrate efficacy and safety of the new chemical entity for regulatory approval. This course will provide an overview of the drug development process including	BIOP*6000 Concepts in Biophysics W [0.50] This course will emphasize basic concepts in molecular, cellular and structural biophysics
preclinical and clinical aspects of drug development. <i>Restriction(s):</i> Instructor consent required.	arising from key journal publications and their impact on present day research trends. <i>Department(s):</i> Dean's Office, College of Physical and Engineering Science
Department(s): Department of Biomedical Sciences	BIOP*6010 Biophysics Seminar U [0.00]
<b>BIOM*6570 Biochemical Regulation of Physiological Processes U [0.50]</b> This course focuses on the regulation of vertebrate physiological processes, such as electrolyte and water balance, temperature regulation, growth and energy metabolism, by hormones and other biological regulators that act through cellular receptors and	Public research seminar presented by all PhD students in the Biophysics program in yearly intervals after passing the qualifying exam. Students are required to attend all seminars presented during the semester in which they are registered for the course. <i>Department(s):</i> Dean's Office, College of Physical and Engineering Science
intracellular biochemical-control pathways.	BIOP*6100 Scientific Communication and Research Methods in Biophysics U [0.50]
Department(s):         Department of Biomedical Sciences           BIOM*6601 Special Topics in Reproductive Biology and Biotechnology U [0.25]	The development and refinement of the skills of scientific communication, emphasizing oral presentation and writing skills, in the context of developing a literature review or
Permits in-depth exploration of interdisciplinary aspects of biomedical research. Topics such as inflammation, reproductive immunology and neoplasia have been offered. <i>Department(s):</i> Department of Biomedical Sciences	thesis proposal. All Biophysics students will normally take this within 4 semesters of entering the program. Department(s): Dean's Office, College of Physical and Engineering Science
BIOM*6602 Special Topics in Reproductive Biology and Biotechnology U [0.50]	BIOP*6950 Advanced Topics in Biophysics U [0.50]
See BIOM*6601 above.         Department(s):       Department of Biomedical Sciences         BIOM*6610 Vascular Biology U [0.50]	This course provides opportunities for graduate students to study special topics in contemporary biophysical research under the guidance of graduate faculty members with pertinent expertise. Proposed course descriptions are considered by the Director of the Biophysics program on an ad hoc basis, and the course will be offered according to demand.
An interdisciplinary course in which the interrelationships between vascular proteins, cellular elements and the maintenance of vascular integrity are examined.	<i>Department(s):</i> Dean's Office, College of Physical and Engineering Science
Structural-functional relationships in vascular biology are explored through seminar presentations, group discussions and small group participation in problem based examples	Business
of vascular dysfunction.	BUS*6180 Financial and Managerial Accounting F [0.50]
Department(s):         Department of Biomedical Sciences           BIOM*6701 Special Topics in Development, Cell and Tissue Morphology U [0.25]	This course emphasizes the gathering and use of financial information to facilitate effective financial and management decisions. Cases are used to approach the subject from the
Permits further in depth study of developmental and morphological sciences.	perspective of the user of accounting information rather than that of the supplier.

CHEM*7280 Electroanalytical Chemistry U [0.50]	CHEM*7560 Spectroscopy U [0.50]
A study of electroanalytical techniques and their role in modern analytical chemistry. The underlying principles are developed. Techniques include chronamperometry, chronocoulometry, polarography, voltammetry, chronopotentiometry, coulometric titrations, flow techniques, electrochemical sensors and chemically modified electrodes. <i>Department(s):</i> Department of Chemistry	Aspects of electronic vibrational and rotational spectroscopy of atoms, molecules, and the solid state. Relevant aspects of quantum mechanics, Dirac notation, and angular momentum will be discussed. Group Theory will be presented and its implications for spectroscopy introduced. Prerequisites: one semester-long undergraduate course in quantum mechanics or the approval of the instructor.
CHEM*7290 Surface Analysis U [0.50]	Department(s): Department of Chemistry
Department(s): Department of Chemistry	CHEM*7600 Selected Topics in Organic Chemistry U [0.50]
CHEM*7300 Proteins and Nucleic Acids U [0.50] Determination of protein sequence and 3-dimensional structure, protein anatomy; prediction of protein structure; intermolecular interactions and protein-protein association;	Two or three topics from a range including: bio-organic chemistry; environmental organic chemistry; free radicals; heterocyclic molecules; molecular rearrangements; organometallic chemistry; photochemistry; natural products.
effects of mutation. Nucleic acid structure and anatomy; DNA and chromatin structure;	Department(s): Department of Chemistry
RNA structure; snRNPs and ribozymes; protein-nucleic acid interactions.	CHEM*7640 Synthetic Organic Reactions U [0.50]
Department(s): Department of Chemistry	Named organic reactions and other synthetically useful reactions are discussed. The mechanism, stereochemical implications and use in organic synthesis of these reactions
CHEM*7310 Selected Topics in Biochemistry U [0.50]	will be presented. Examples from the organic literature will be used to illustrate these
Discussion of specialized topics related to the research interests of members of the centre:	aspects.
for example, recent offerings have included peptide and protein chemistry, biochemical	Department(s): Department of Chemistry
toxicology, medical aspects of biochemistry, glycolipids and glycoproteins, redox enzymes, biological applications of magnetic resonance, etc.	CHEM*7650 Strategies in Organic Synthesis U [0.50]
Department(s): Department of Chemistry	The synthesis of organic compounds is discussed and emphasis is placed on the design
CHEM*7360 Regulation in Biological Systems U [0.50]	of synthetic routes. Examples drawn from the literature are used to illustrate this synthetic
Mechanisms of regulation of metabolism - enzyme clusters; phosphorylation and protein	planning.
kinases/phosphatases, repression and induction, protein turnover. Regulation of	Prerequisite(s): CHEM*7640
transcription, translation and mRNA processing. Cell cycle and control of cell division.	Department(s): Department of Chemistry

Appendix A - Courses, Engineering	231	
EDRD*6690 Program Evaluation U [0.50]	ENGG*6120 Fermentation Engineering U [0.50]	
An advanced seminar dealing with the theory and practice of program evaluation focusing on public sector programs in agriculture and rural development, international and domestic case studies. <i>Department(s):</i> School of Environmental Design and Rural Development	Modelling and design of fermenter systems. Topics include microbial growth kinetics, reactor design, heat and mass transfer. Instrumentation and unit operations for feed preparation and product recovery. Prerequisite: undergraduate course in each of microbiology, heat and mass transfer, and biochemistry or bioprocess engineering.	
Engineering	Department(s): School of Engineering	
ENGG*6000 Advanced Heat and Mass Transfer U [0.50]	ENGG*6130 Physical Properties of Biomaterials U [0.50]	
Basic physical principles of transport phenomena. Heat and mass transfer methods for physical systems. Time and volume averaging. Dimensional analysis.	Rheology and rheological properties. Contact stresses between bodies in compression. Mechanical damage. Aerodynamic and hydro-dynamic characteristics. Friction. <i>Department(s):</i> School of Engineering	
Department(s): School of Engineering	ENGG*6140 Optimization Techniques for Engineering U [0.50]	
ENGG*6010 Assessment of Engineering Risk U [0.50] The question of "how safe is safe enough?" has no simple answer. In response, this course develops the bases by which we can assess and manage risk in engineering. Course deals with fate and transport issues associated with risk, as relevant to engineering and how these aspects are employed in the making of decisions. <i>Prerequisite(s):</i> STAT*2040 or STAT*2120 <i>Department(s):</i> School of Engineering	This course serves as a graduate introduction into combinatorics and optimization. Optimization is the main pillar of Engineering and the performance of most systems can be improved through intelligent use of optimization algorithms. Topics to be covered: Complexity theory, Linear/Integer Programming techniques, Constrained/Unconstrained optimization and Nonlinear programming, Heuristic Search Techniques such as Tabu Search, Genetic Algorithms, Simulated Annealing and GRASP. <i>Department(s):</i> School of Engineering	
ENGG*6020 Advanced Fluid Mechanics U [0.50]	ENGG*6150 Bio-Instrumentation U [0.50]	
Laminar and turbulent flow. Turbulence and turbulence modelling. Boundary-layer flow. Compressible flow. Potential flow. <i>Department(s):</i> School of Engineering	ninar and turbulent flow. Turbulence and turbulence modelling. Boundary-layer flow. npressible flow. Potential flow. Instrumentation systems. Transducers. Amplifier circuits. Recording method Spectroscopy & colorimetry. Radiation, humidity, pH and noise measurement	
ENGG*6030 Finite Difference Methods U [0.50]	Restriction(s): ENGG*3450 or equivalent. Department(s): School of Engineering	
Numerical solution of partial differential equations of flow through porous media; flow of heat and vibrations; characterization of solution techniques and analysis of stability;	ENGG*6160 Advanced Food Engineering U [0.50]	
convergence and compatibility criteria for various finite difference schemes. <i>Department(s):</i> School of Engineering	Application of heat and mass transfer, fluid flow, food properties, and food- processing constraints in the design and selection of food process equipment. Development of process	
ENGG*6050 Finite Element Methods U [0.50]	specifications for the control of the flow of heat and moisture and the associated microbial, nutritional and organoleptic change in foods. Food system dynamics and process	
Boundary-value problems. Methods of approximation. Time dependent problems. Isoparametric elements. Numerical integration. Computer implementation. Mesh generation and layouts. Two-dimensional finite elements.	development. Department(s): School of Engineering	
Department(s): School of Engineering	ENGG*6170 Special Topics in Food Engineering U [0.50]	
<b>ENGG*6060 Engineering Systems Modelling and Simulation U [0.50]</b> A study of theoretical and experimental methods for characterizing the dynamic behaviour	A course of directed study involving selected readings and analyses in developing knowledge areas of food engineering. <i>Department(s):</i> School of Engineering	
of engineering systems. Distributed and lumped parameter model development. Digital	ENGG*6180 Final Project in Biological Engineering U [1.00]	
simulation of systems for design and control. Department(s): School of Engineering	A project course in which a problem of advanced design or analysis in the area of	
ENGG*6070 Medical Imaging U [0.50]	biological engineering is established, an investigation is performed and a final design or	
Digital image processing techniques including filtering and restoration; physics of image formation for such modalities as radiography, MRI, ultrasound.	<ul> <li>solution is presented.</li> <li><i>Restriction(s):</i> This course is open only to students in the biological MEng program.</li> <li><i>Department(s):</i> School of Engineering</li> </ul>	
Prerequisite(s): ENGG*3390 or equivalent Department(s): School of Engineering	ENGG*6190 Special Topics in Biological Engineering U [0.50]	
ENGG*6080 Engineering Seminar U [0.00] The course objective is to train the student in preparing, delivering and evaluating technical	A course of directed study involving selected readings and analyses in developing knowledge areas of biological engineering.	
presentations. Each student is required to: (a) attend and write critiques on a minimum	Department(s): School of Engineering	
of six technical seminars in the School of Engineering; and (b) conduct a seminar, presenting technical material to an audience consisting of faculty and graduate students in the school. This presentation will then be reviewed by the student and the instructor. <i>Department(s):</i> School of Engineering	ENGG*6290 Special Topics in Agricultural Engineering U [0.50] A course of directed study involving selected readings and analyses in developing knowledge areas of agricultural engineering.	
ENGG*6090 Special Topics in Engineering U [0.50]	Department(s):         School of Engineering           ENGG*6300 Research Methods in Bioengineering U [0.50]	
A course of directed study involving selected readings and analyses in developing knowledge areas which are applicable to several of the engineering disciplines in the School of Engineering. <i>Department(s):</i> School of Engineering	Research methodologies used in bioengineering are reviewed and assessed in the context of a diverse range of applications: biomechanics, control and instrumentation, ergonomics, diagnostic tools, biomaterials and food safety. The scientific method is discussed in terms of defining research problems, appropriate tests and hypotheses, experimental methods,	
ENGG*6100 Machine Vision U [0.50]	data analysis and drawing conclusions. The objective is to guide students as they develop a coherent research proposal and deepen their understanding of the breadth of the	
Computer vision studies how computers can analyze and perceive the world using input from imaging devices. Topics covered include image pre-processing, segmentation, shape analysis, object recognition, image understanding, 3D vision, motion and stereo analysis, as well as case studies.	discipline. (Offered in alternate years) <i>Restriction(s):</i> Instructor consent required. <i>Department(s):</i> School of Engineering	
Department(s): School of Engineering	ENGG*6440 Advanced Biomechanical Design U [0.50]	
ENGG*6110 Food and Bio-Process Engineering U [0.50] Kinetics of biological reactions, reactor dynamics and design. Food rheology and texture; water activity and the role of water in food processing; unit operations design-thermal	Biomechanical Design from concept through prototyping and testing. This course will investigate and apply techniques used for biomechanical design including reverse engineering, solid modelling, geometric tolerancing, testing and rapid prototyping Instructor's signature required.	
processing; and drying, freezing and separation processes.         Department(s):       School of Engineering	Department(s): School of Engineering	

232	Appendix A - Courses, Engineering
ENGG*6450 Queueing Theory & Traffic Modeling in Data Networks U [0.50]	ENGG*6590 Final Project in Engineering Systems and Computing U [1.00]
Network traffic modeling. Transient and steady-state analysis of Markov chains. Queueing analysis. Admission and access control. Flow control protocols. Congestion control. End-to-end performance bounds analysis. <i>Restriction(s):</i> Engineering graduate students. Instructor consent required.	A project course in which a problem of advanced design or analysis in the area of Engineering Systems and Computing is established by the student, an investigation is performed, and a report on the final design or solution selected is presented. <i>Restriction(s):</i> This course is only open to students in the engineering systems and
Department(s):       School of Engineering         ENGG*6500 Introduction to Machine Learning U [0.50]	computing MEng program. Department(s): School of Engineering
-	ENGG*6600 Special Topics in Engineering Systems and Computing U [0.50]
The aim of this course is to provide students with an introduction to algorithms and techniques of machine learning particularly in engineering applications. The emphasis will be on the fundamentals and not specific approach or software tool. Class discussions will cover and compare all current major approaches and their applicability to various engineering problems, while assignments and project will provide hands-on experience with some of the tools.	A course of directed study involving selected readings and analyses in developing knowledge areas of Engineering Systems and Computing. Department(s): School of Engineering ENGG*6610 Urban Stormwater Management U [0.50]
Department(s): School of Engineering	Continuous stormwater management models and model structure. Catchment discretization and process disaggregation. Pollutant build-up, wash off and transport. Flow and pollutant
ENGG*6510 Analog Integrated Circuit Design U [0.50] In this course, operating principles and design techniques of analog integrated circuits are introduced with emphasis on device and system modelling. These circuits include analog and switched-capacitor filters, data converters, amplifiers, oscillators, modulators, circuits for communications, sensor readout channels, and circuits for integrated memories.	routing in complex, looped, partially surcharged pipe/channel networks including pond storage, storage tanks, diversion structures, transverse and side weirs, pump stations, orifices, radical and leaf gates and transient receiving water conditions (including tides). Pollutant removal in sewer networks, storage facilities and treatment plants. <i>Department(s):</i> School of Engineering
Prerequisite(s):       ENGG*3450 or equivalent.         Department(s):       School of Engineering	ENGG*6620 Water Pollution Control Planning U [0.50]
<b>ENGG*6520 VLSI Digital Systems Design U [0.50]</b> This course will introduce the principles of VLSI MOSFET digital design from a circuit and system perspective. Advanced topics include: power issues related to each level of	Methods of developing area-wide pollution control plans and sustainable use plans in Ontario and elsewhere. Quantitative and non-quantitative information is examined in the context of planning, using continuous models such as HSP-F. Field trips. <i>Department(s):</i> School of Engineering
design abstraction; voltage and frequency scaling; power to speed trade-offs; ASIC digital	ENGG*6630 Environmental Contaminants: Fate Mechanisms U [0.50]
design flow; Verilog intergration, ASIC case studies.         Prerequisite(s):       ENGG*3450 or equivalent.         Department(s):       School of Engineering	Analysis of fate mechanisms associated with environmental contaminants. Focus on substances which are generally considered to be hazardous to humans, or other animal life at low concentrations. Study of physicochemical properties and fate estimation on
ENGG*6530 Reconfigurable Computing U [0.50]	control and remediation strategies. Quantitative analysis of contaminant partitioning and mass flows, including cross-media transport and simultaneous action of contaminant fate
This course serves as a graduate introduction into reconfigurable computing systems. It introduces students to the analyses, synthesis and design of embedded systems and implementing them using Field Programmable Gate Arrays. Topics include: Programmable Logic devices, Hardware Description Languages, Computer Aided Design Flow, Hardware Accelerators, Hardware/Software Co-design techniques, Run Time Reconfiguration, High Level Synthesis. <i>Prerequisite(s):</i> ENG6*2410 or equivalent.	mechanisms.         Department(s):       School of Engineering         ENGG*6640 Environmental Contaminants: Control Mechanisms U [0.50]         Analysis of conventional and innovative technologies for toxic contaminants; technologies for contaminated municipal and industrial waste waters, including physical, chemical, and biological treatment processes for trace toxic contaminants in water and wastewater;
Department(s): School of Engineering	control technologies for contaminated gas streams, including activated carbon absorption, biofiltration, bioscrubbing, wet scrubbing, thermal- oxidation methods, and process
ENGG*6540 Advanced Robotics U [0.50] This course is intended for graduate students who have some knowledge and interest in robotics. The course covers modelling, design, planning control, sensors and programming of robotic systems. In addition to lectures, students will work on a term project in which a problem related to robotics systems will be studied. Instructors signature required. <i>Department(s):</i> School of Engineering	<ul> <li>modifications to reduce emissions of toxic air contaminants; remediation includus, and process modifications to reduce emissions of toxic air contaminants; remediation techniques for contaminated soil, including external and in-situ physical, chemical and biological treatment methods; cross-media contaminant control issues; toxicity testing and evaluation; relevant regulatory programs.</li> <li>Department(s): School of Engineering</li> </ul>
ENGG*6550 Intelligent Real-Time Systems U [0.50]	Analysis of analytical and computational models used to predict the fate of airborne
Soft real-time systems, hard real-time systems, embedded systems, time handling and synchronization, deadlines, preemption, interruption, RTS languages, RTS/ operating systems, system life-cycle, petri nets, task scheduling and allocation, fault-tolerance, resource management, RTS/search techniques, dealing with uncertainty. <i>Department(s):</i> School of Engineering ENGG*6560 Advanced Digital Signal Processing U [0.50]	contaminants; role of air quality models for the solution of engineering-related problems; analysis of important boundary layer meteorology phenomena that influence the fate of air pollutants; conservation equations and mathematical solution techniques; model input requirements such as emissions inventories; Gaussian models; higher-order closure models; Eulerian photochemical grid models. <i>Department(s):</i> School of Engineering
Discrete-time signals and systems, z transform, frequency analysis of signals and systems,	ENGG*6660 Renewable Energy U [0.50]
fourier transform, fast fourier transform, design of digital filters, signal reconstruction, power spectrum estimation. <i>Department(s):</i> School of Engineering ENGG*6570 Advanced Soft Computing U [0.50]	The engineering principles of renewable energy technologies including wind, solar, geothermal and biomass will be examined, including technology-specific design, economic and environmental constraints. Students will compare the relative merits of different energy technologies and gain a knowledge base for further study in the field.
Neural dynamics and computation from a single neuron to a neural network architecture.	<i>Restriction(s):</i> Engineering graduate students. Instructor consent required.
Advanced neural networks and applications. Soft computing approaches to uncertainty representation, multi-agents and optimization.	Department(s): School of Engineering
Prerequisite(s): ENGG*4430 or equivalent	ENGG*6670 Hazardous Waste Management U [0.50] This course will define the different types of hazardous wastes that currently exist and
Department(s): School of Engineering	outline the pertinent legislation governing these wastes. Information will be presented
ENGG*6580 Advanced Control Systems U [0.50] This course will start with state space analysis of multi-input multi-output control systems. Then state space design will be presented. After that, nonlinear control systems and soft computing based intelligent control systems will be studied. Finally, hybrid control systems, H infinite control and uncertainty and robustness in control systems will be addressed. Department(s): School of Engineering	on different ways to handle, treat and dispose the hazardous waste, including separation, segregation, minimization, recycling and chemical, physical, biological, and thermal treatment. Also to be discussed are hazardous waste landfills and site remediation technologies. Specifics include design and operation of hazardous landfill sites, handling and treatment of leachate, comparison of pertinent soil remediation technologies. Case studies will be reviewed. <i>Department(s):</i> School of Engineering
Department(s). Sensor of Englishering

#### FARE\*6940 Food Firms, Consumers and Markets II U [0.50]

This course builds on Food Firms, Consumers and Markets I by extending the breadth and depth of student's understanding and scope of economic analysis. Advanced techniques in producer and consumer theory, as well as advance market analysis techniques are presented and utilized. Understanding of the research process and advanced methods is emphasized throughout.

Prerequisite(s): AGEC\*6930 or FARE\*6930

Department(s): Department of Food, Agricultural and Resource Economics

# FARE\*6950 Natural Resource Economics I W [0.50]

Natural Resources I introduces conventional theoretical modeling approaches to renewable resources, e.g. fisheries & forestry. Seminal theoretical literature is discussed. Emphasis is placed on setting up economic models, deriving and interpreting general results. Applied methods include dynamic optimization and regression analysis. Additional topics include Land Economics and the property rights approach.

Prerequisite(s): FARE\*6380

Department(s): Department of Food, Agricultural and Resource Economics

#### FARE\*6960 Natural Resource Economics II U [0.50]

Natural Resources II reviews & extends conventional theoretical modeling approaches to renewable resources, e.g. fisheries & forestry. Seminal literature is reviewed and contemp. theoretical work and empirical papers discussed. Emphasis on extending economic models addressing natural resource issues - uncertainty, externalities & policy instruments, and derive reduced-form versions of forestry & fishery for empirical estim. & analysis. Primary method of math analysis involves dyn. opt. techniques. Detailed math derivations & proofs expected. Also- extinction, climate change, carb sequest.

*Prerequisite(s):* AGEC\*6950 or FARE\*6950

Department(s): Department of Food, Agricultural and Resource Economics

FARE\*6970 Applied Quantitative Methods for Agricultural Economists F [0.50]

This course exposes students to the empirical tools agricultural economists use when conducting research. Emphasis is placed on what tool(s) to use in a variety of circumstances. Topics covered will include advanced econometric techniques, optimization and simulation modelling. Students will also be exposed to the different quantitative software packages used in empirical research.

*Prerequisite(s):* ECON\*3740 or equivalent and ECON\*2770 or equivalent

Department(s): Department of Food, Agricultural and Resource Economics

### FARE\*6980 Agricultural Trade Relations W [0.50]

An examination of the institutional, theoretical and empirical aspects of international agrifood trade.

Prerequisite(s): FARE\*6380 Department(s): Department of Food, Agricultural and Resource Economics

# Food Safety and Quality Assurance

#### FSQA\*6000 Food Safety and Quality Assurance Seminar S,F [0.50]

Provides experiential training in forms of communication that are likely to be required in professional or academic careers in food science and technology.

Restriction(s):This course is open only to students in the MSc FSQA program.Department(s):Department of Food Science

#### FSQA\*6100 Food Law and Policy F [0.50]

The fundamentals of food policy development and Canadian and international food law are learned and practiced through online presentations, independent study and online interactions with other students and industry professionals.

*Offering(s):* Offered through Distance Education format only.

Department(s): Department of Food Science

#### FSQA\*6150 Food Quality Assurance Management W [0.50]

Examination and review of principles and concept of quality assurance and their application to consumer products and services. Topics include applied aspects of total-quality management principles.

*Offering(s):* Offered through Distance Education format only.

Department(s): Department of Food Science

FSQA\*6200 Food Safety Systems Management W [0.50]

Food safety systems are studied in four modules. (1) A brief review of plant hygiene and HACCP principles. Students with insufficient background will do supplemental study in these areas; (2) HACCP implementation and verification; (3) HACCP-based food safety programs in Canada; and (4) International Food Safety Management Systems. *Offering(s):* Offered through Distance Education format only.

Department(s): Department of Food Science

# FSQA\*6500 Food Safety and Quality Assurance Research Project S,F,W [1.00]

An original research project related to food safety and quality assurance which includes the preparation of a written report suitable for publication and an oral presentation of the findings to the graduate faculty.

Department(s): Department of Food Science

#### FSQA\*6600 Principles of Food Safety and Quality Assurance S,F [0.50]

An integrated approach to factors affecting food safety and quality including microbial and chemical contamination is provided. Major food-borne disease outbreaks are studied as examples. Modern methods of quality management to minimize contamination of processed foods is discussed.

*Offering(s):* Offered through Distance Education format only.

Department(s): Department of Food Science

#### Food Science

#### FOOD\*6190 Advances in Food Science U [0.50]

Topics of current research interest and importance are examined. A project supervised by a faculty member is undertaken, the topic of which is chosen after considering the interests of the student.

*Department(s):* Department of Food Science

#### FOOD\*6300 Food Science Communication U [0.50]

This course provides experiential training in forms of communication that are likely to be required in professional or academic careers in food science and technology.

*Restriction(s):* This course is only open to students in the MSc Food or PhD Food programs.

Department(s): Department of Food Science

FOOD\*6710 Special Topics in Food Chemistry U [0.25]

This is a modular course in which several faculty members lecture and/or lead discussions in current topics in food chemistry. Students will complete an independent review in the area of food chemistry, participate in discussions, complete case studies, and present talks related to food chemistry.

*Department(s):* Department of Food Science

#### FOOD\*6720 Special Topics in Food Microbiology U [0.25]

This is a modular course in which several faculty members lecture and/or lead discussions in current topics in food microbiology. Students will complete an independent review in the area of food microbiology, participate in discussions, complete case studies, and present talks related to food microbiology.

Department(s): Department of Food Science

#### FOOD\*6730 Special Topics in Food Physics U [0.25]

This is a modular course in which several faculty members lecture and/or lead discussions in current topics in food physics. Students will complete an independent review in the area of food physics, participate in discussions, complete case studies, and present talks related to physics in foods.

Department(s): Department of Food Science

#### FOOD\*6740 Special Topics in Food Processing U [0.25]

This is a modular course in which several faculty members lecture and/or lead discussions in current topics in food processing. Students will complete an independent review in the area of food processing, participate in discussions, complete case studies, and present talks related to conventional and emerging methodologies for the processing of foods. *Department(s):* Department of Food Science

## FOOD\*6750 Special Topics in Food for Health U [0.25]

This is a modular course in which several faculty members lecture and/or lead discussions in current topics in food for health. Students will complete an independent review in the area of food and health, participate in discussions, complete case studies, and present talks related to the impact of food for health.

Department(s): Department of Food Science

#### FOOD\*6760 Special Topics in Food Quality U [0.25]

This is a modular course in which several faculty members lecture and/or lead discussions in current topics in food quality. Students will complete an independent review in the area of food quality, participate in discussions, complete case studies, and present talks related to quality of foods.

Department(s): Department of Food Science

#### French

#### FREN\*6000 Research Methods Seminar F [0.50]

This course will introduce students to the field and research methods of various disciplines and of interdisciplinary studies, and it will familiarize them with field-relevant research skills and methodologies.

Department(s): School of Languages and Literatures

FREN*6020 Topics in French Literature U [0.50]	GEOG*6091 Geographical Research Methods II W [0.50]
This course will focus on European French literature in relation to thematic approaches including: gender and feminism, transgression, (post)colonialisms, identity and alterity.	A review of philosophies and research methods in geography. The development ar presentation of a research proposal for the thesis or research project.
Department(s): School of Languages and Literatures	Presentation of a research proposal for the mesis of research project. Prerequisite(s): GEOG*6090

This course builds on the foundation of Services Management I and explores key contemporary research areas on services management in more detail. Students will examine services management and value chains theory research and practice in a selection of industries, with a focus on one	including instrumentation, analog-to-digital conversion, signal processing and analysis including kinematics, electromyography and tissue mechanics. Students will also be responsible for conducting bi-weekly seminars which will analyze and critique original research investigations in the area of biomechanics instrumentation/processing techniques.

# Integrative Biology

## IBIO\*6000 Advances in Ecology and Behaviour U [0.50]

This is a modular course in which several faculty lecture and/or lead discussion groups in tutorials about advances in their broad areas, or related areas, of ecology and behaviour. Topics may include animal communication, optimal foraging, life-history evolution, mating systems, population dynamics, niche theory and food-web dynamics. The course includes lectures and seminars in which the students participate. Offered annually. *Department(s):* Department of Integrative Biology

# IBIO\*6010 Advances in Physiology U [0.50]

A modular course format in which several faculty members lecture and/or lead discussion groups in tutorials on advances in their areas, or related areas, of physiology. Topics may include metabolic adaptation to extreme environments, behavioural and molecular endocrinology, and exercise and muscle physiology. The course includes lectures and seminars in which the students participate. Offered annually.

*Department(s):* Department of Integrative Biology

#### IBIO\*6020 Advances in Evolutionary Biology U [0.50]

This modular course reviews books and/or other publications in the field of evolutionary biology, providing knowledge of progress in this area of biology. Topics may include epigenetics, phylogenetics, developmental basis of evolutionary change, and molecular evolution. The course includes lectures and seminars in which the students participate. Offered annually.

Department(s): Department of Integrative Biology

### IBIO\*6040 Special Topics in Ecology U [0.50]

Students will explore aspects of ecology not otherwise covered in existing graduate courses. A program of study will be developed with a faculty advisor according to the student's requirements. Research papers, laboratory work and/or written and oral presentations may be required.

Department(s): Department of Integrative Biology

#### IBIO\*6060 Special Topics in Evolution U [0.50]

Students will explore aspects of evolution not otherwise covered in existing graduate courses. A program of study will be developed with a faculty advisor according to the student's requirements. Research papers, laboratory work and/or written and oral presentations may be required.

*Department(s):* Department of Integrative Biology

#### IBIO\*6070 Topics in Advanced Integrative Biology I U [0.50]

This course provides graduate students, either individually or in groups, with the opportunity to pursue topics in specialized fields of integrative biology under the guidance of graduate faculty. Course topics will normally be advertised by faculty one semester prior to their offering. Courses may be offered in any of lecture, reading/seminar, or individual project formats. A minimum enrolment may be required for some course offerings.

*Department(s):* Department of Integrative Biology

IBIO\*6080 Topics in Advanced Integrative Biology II U [0.50]

This course provides graduate students, either individually or in groups, with the opportunity to pursue topics in specialized fields of integrative biology under the guidance of graduate faculty. Course topics will normally be advertised by faculty one semester prior to their offering. Courses may be offered in any of lecture, reading/seminar, or individual project formats. A minimum enrolment may be required for some course offerings.

Department(s): Department of Integrative Biology

#### IBIO\*6090 Special Topics in Physiology U [0.50]

Students will explore aspects of physiology not otherwise covered in existing graduate courses. A program of study will be developed with a faculty advisor according to the student's requirements. Research papers, laboratory work and/or written and oral presentations may be required.

Department(s): Department of Integrative Biology

IBIO\*6630 Scientific Communication U [0.50]

This course involves development and refinement of the skills of scientific communication, with emphasis on writing skills, in the context of developing a thesis proposal. This course is mandatory for MSc AND DIRECT ENTRY PhD students in the Department of Integrative Biology.

Department(s): Department of Integrative Biology

#### **International Development Studies**

## IDEV\*6000 Regional Context U [0.50]

This reading course provides an opportunity for in-depth investigation about a particular region in preparation for a thesis, major paper or research project. The course normally is directed by the student's advisor.

Department(s): Dean's Office, College of Social and Applied Human Sciences

### IDEV\*6100 International Development Studies Seminar U [0.50]

A bi-weekly seminar discussion of issues which arise in the study of international development. Led by faculty and visitors from a variety of disciplines. *Department(s):* Dean's Office, College of Social and Applied Human Sciences

IDEV\*6500 Fieldwork in International Development Studies U [0.50]

This course recognizes an intensive commitment to research in an archival repository, 'in the field' or at an appropriate development institution in Canada or abroad. The course normally is directed by the student's advisor in consultation with the advisory committee *Department(s):* Dean's Office, College of Social and Applied Human Sciences

#### IDEV\*6800 Theories and Debates in Development F [0.50]

This course examines recent approaches in development theory explaining international inequality, poverty and long-term change. It also investigates selected current debates in international development – such as food security, trade, good governance, sustainability or gender – from various discipline-based and interdisciplinary perspectives, and analyzes selected regional experiences of development.

*Restriction(s):* Restricted to students in doctoral IDEV programs or instructor's consent. *Department(s):* Dean's Office, College of Social and Applied Human Sciences

## IDEV\*6850 Development Research and Practice W [0.50]

In this course students establish the linkages between their doctoral research topic and the wider field of development studies and practice. The course will examine development policies and projects, ethical issues related to (cross-cultural) development research, and relationships between research and development practice.

*Restriction(s):* Restricted to students in doctoral IDEV programs or instructor's consent. *Department(s):* Dean's Office, College of Social and Applied Human Sciences

# Landscape Architecture

#### LARC\*6010 Landscape Architecture Studio I F [0.50]

Studio and field instruction introduces the student to landscape architecture through acquisition of basic professional skills and knowledge. Topics include design theory, landscape inventory and analysis, application of the design process to projects at the site scale, graphic and oral communication.

*Restriction(s):* Available only to students registered in the MLA program. *Department(s):* School of Environmental Design and Rural Development

#### LARC\*6020 Landscape Architecture Studio II F [0.50]

Studio and field instruction introduces the student to basic knowledge and skills of site engineering as it relates to landscape architecture. Topics include surveying, principles of site grading and drainage, introduction to materials and methods of construction, and graphic communication.

 Restriction(s):
 Available only to students registered in the MLA program.

 Department(s):
 School of Environmental Design and Rural Development

#### LARC\*6030 Landscape Architecture Studio III W [0.50]

Studio and field instruction continues the student's development of professional knowledge and skills at the site scale. Topics include site planning principles, social factors in design, introduction to principles of planting design and architectural structures, facilitation and computer applications in design.

Restriction(s):Available only to students registered in the MLA program.Department(s):School of Environmental Design and Rural Development

#### LARC\*6040 Landscape Architecture Studio IV W [0.50]

Studio instruction emphasizes design implementation, materials and methods of construction, principles of stormwater management, construction specifications and graphic communication using computer applications.

Restriction(s):Available only to students registered in the MLA program.Department(s):School of Environmental Design and Rural Development

#### LARC\*6120 Community Design W [0.50]

Studio and field instruction emphasizes integration of ecological, social, cultural and historical factors in the comprehensive design of urban and special use landscapes at the neighbourhood and community scale.

*Restriction(s):* Available only to students registered in the MLA program. *Department(s):* School of Environmental Design and Rural Development

#### LARC\*6340 Landscape History Seminar F [0.25]

A lecture/seminar course focussed on the history of Landscape Architecture. Skills emphasize the development of oral and writing skills.

Restriction(s):Available only to students registered in the MLA program.Department(s):School of Environmental Design and Rural Development

LARC*6360 Professional Practice Seminar F [0.25]	LACS*6020 Latin American Identity & Culture II W [0.50]
A lecture/seminar course focussed on the legal, business, ethical and professional practices of Landscape Architecture professionals. Skills emphasize the development of oral and writing skills. <i>Restriction(s):</i> Available only to students registered in the MLA program.	This course is a continuation of LACS*6010. Students going on an exchange may replace this course with a similar course taken at the exchange university. This course will study minority cultures and the relationship of the periphery and the centre. Feminist, queer, Latina/o and indigenous marginalized cultures will be studied in the context of
Department(s): School of Environmental Design and Rural Development	Internationalism and Globalization.
LARC*6380 Research Seminar W [0.25]	Department(s):       School of Languages and Literatures
A seminar course focussed on the process and communication of research, influenced by the current research of the participants. Participants organize a conference to present their research results. <i>Restriction(s):</i> Available only to students registered in the MLA program. <i>Department(s):</i> School of Environmental Design and Rural Development	LACS*6030 Globalization & Insecurity in the Americas F [0.50] An analytical,critical and inerdisciplinary introductory overview of Latin America and the Caribbean in the larger context of the Americas, from the point of view of the security and insecurity of its people. It will concentrate on the interplay of environmental, economic, social, political, and cultural factors upon such security in an era of
LARC*6430 Landscape Resource Analysis F [0.50]	globalization. Department(s): School of Languages and Literatures
Integrated field and classroom instruction introduces the student to inventory and analysis	LACS*6040 Novel & Nation in Spanish America U [0.50]
of biological, physical, social and cultural elements of the landscape. Projects will incorporate principles of landscape ecology and landscape planning. Field study will require some travel at student's expense. <i>Restriction(s):</i> Available only to students registered in the MLA program.	This course will study the constitution of Spanish American nation in the novel since 1900 from a variety of theoretical perspectives. Particular attention will be paid to the novel's appropriation of foreign artistic and cultural influences to articulate Spanish American history.
Department(s): School of Environmental Design and Rural Development	Department(s): School of Languages and Literatures
LARC*6440 Environmental Design F [0.50]	LACS*6050 Globalization & Latin American Representation in Art W [0.50]
This course integrates field and classroom study to apply landscape ecology to current landscape problems, including analysis of regional landscapes, restoration of degraded landscapes, and application of aesthetic and ecological principles across scales in site to regional settings. Case studies component will require some travel at students' expense. <i>Restriction(s):</i> Available only to students registered in the MLA program.	This course will examine the continuous flow of large, temporary high-profile identity-based "blockbuster" exhibitions based on Latin American and Caribbean art in Canada and the United States. These exhibitions play a key role as cultural agents, and raise questions of the concept of converging visual cultures.
Department(s): School of Environmental Design and Rural Development	Department(s):         School of Languages and Literatures           LACS*(100 Descent)         Project U [1 00]
LARC*6470 Integrative Environmental Planning W [0.50]	LACS*6100 Research Project U [1.00] This research project will result in a major paper of about 15,000 words. The student
Landscape planning emphasizing the integration and interrelationships between biophysical and cultural resources, with application at a regional landscape planning scale. This course typically incorporates community-outreach projects.	chooses a topic and writes a paper on the topic with the guidance of a faculty member. The topic must be approved by the Graduate Program Committee. <i>Department(s):</i> School of Languages and Literatures
Restriction(s):       Available only to students registered in the MLA program.         Department(s):       School of Environmental Design and Rural Development	LACS*6200 Topics in Latin American and Caribbean Studies U [0.50]
LARC*6600 Critical Inquiry & Research Analysis W [0.50]	An independent study course, the nature and content of which is agreed upon between the individual student and the person offering the course.
Students are introduced to critical inquiry as a method of evaluating information, design, and planning. The focus of the course is on the quantification and analysis of research data. Modelling and simulation are introduced and discussed in the context of planning, design, and research.	Restriction(s):       Instructor and Graduate Co-ordinator signatures required. Course cannot be taken in first semester.         Department(s):       School of Languages and Literatures
<i>Restriction(s):</i> Available only to students registered in the MLA program.	Leadership Studies
Department(s):         School of Environmental Design and Rural Development           LARC*6610 Research Methods F [0.50]	LEAD*6000 Foundations of Leadership S,F [0.50]
An introduction to a broad array of research methods as they apply to landscape planning and design, with a focus on the connections between research and design. Emphasis is on developing foundations for the creation of appropriate research questions.	The course will enhance participants' interpersonal competency, as well as their knowledge and understanding of the theory and research underlying the impact of team management and collaboration on the organization. <i>Restriction(s):</i> CBE Executive Programs students only
<i>Restriction(s):</i> Available only to students registered in the MLA program. <i>Department(s):</i> School of Environmental Design and Rural Development	Department(s): Executive Leadership Program
LARC*6710 Special Study S,F,W [0.50]	LEAD*6100 Theories of Leadership S,F [0.50]
Independent study. A proposal for the content and product required for this course must be developed in conjunction with the student's Advisory Committee. <i>Restriction(s):</i> Instructor consent required.	This course traces the development of the concept of leadership. Through the interplay of theory and practical application, participants will gain a deeper appreciation for the requirements, responsibilities, and consequences of effective leadership. <i>Restriction(s):</i> CBE Executive Programs students only
Department(s): School of Environmental Design and Rural Development	Department(s): Executive Leadership Program
Latin American and Caribbean Studies	LEAD*6200 Leadership of Organizational Change F,W [0.50]
LACS*6000 Research Methods Seminar U [0.50]	This course studies the role of leadership in the management of change within an organization and the changes required of management. The course examines the
This course will introduce students to the field and research methods of various disciplines and of interdisciplinary studies, and it will familiarize them with field-relevant research skills and methodologies.	development of trust, the building of organizational loyalty, and motivation and inspiring of high performance teams.
Department(s): School of Languages and Literatures	Restriction(s):         CBE Executive Programs students only           Department(s):         Executive Leadership Program
LACS*6010 Latin American Identity & Culture I F [0.50]	LEAD*6220 Strategic Leadership and Management W [0.50]
This is the first of the two required LACS culture core courses. They will address theoretical issues relevant to Latin American identities and cultures, and will use these as heuristic devices in the study of major and marginalized cultural events, narratives, and visual and musical expressions. In LACS*6010 students will analyze the concept of "hybridity" and study how hybrid culture has been incorporating past with the present, and how it is and has been incorporating local and African forms and themes with European and US derived high culture.	As a research intensive course in the MA Leadership, this course examines the conceptual and practical dimensions of strategic leadership and management in a variety of organizational, external and individual contexts using a selection of readings, discussions, case analyses and a final paper. Department(s): Executive Leadership Program

*Department(s):* School of Languages and Literatures

Appendix A - Courses, Literature and Theatre Studies		
LEAD*6300 Role of the Leader in Decision-Making F,W [0.50]	LTS*7900 Directed Studies U [0.50]	
The role of the leader in decision-making is explored through the study of the rational model for decision-making, human biases, creativity, and risk and uncertainty in decision-making. The course will also examine ethical issues and group decision-making.	The study of a special topic under the guidance of a member of the graduate faculty. <i>Department(s):</i> School of English and Theatre Studies	
Restriction(s): CBE Executive Programs students only	Management	
<i>Department(s):</i> Executive Leadership Program	MGMT*6800 Philosophy of Social Science Research F [0.50]	
<b>LEAD*6350 The Role of the Leader as Reflective Practioner F [0.50]</b> This course will enhance the leader's ability to navigate the complexity of organizational life and contribute to building a more sustainable society by developing skills in reflective practice. Reflective practice is divided into four areas that stretch over eight modules:	This course introduces students to the underlying philosophical assumptions that support empirical research methods within social science disciplines. The aim of this course is to examine the philosophy of knowledge generation and claims, particularly in the context of management phenomena.	
Rethinking, Relating, Responding and Reinventing.	Department(s): Department of Marketing and Consumer Studies	
Restriction(s):         CBE Executive Programs students only           Department(s):         Executive Leadership Program	MGMT*6820 Theory of Management F [0.50]	
LEAD*6400 Research Methods for Decision-Making S [0.50]	This course examines the evolution of management thought and the overarching theories that have been successfully applied to multiple functional areas of the organization.	
The course will explore both quantitative and qualitative techniques used in the analysis of research results from a variety of sources (surveys, government statistics, in-depth interview, focus groups and program evaluation results). Case studies will be used to demonstrate the application of multiple research methods.	Examples of theories that apply to such disparate areas as operations, marketing, and organizational behaviour include agency theory, transaction cost analysis, and contingency theory. <i>Department(s):</i> Department of Management	
Restriction(s): CBE Executive Programs students only	MGMT*6830 Applied Univariate Statistical Analysis for Management F [0.50]	
Department(s):       Executive Leadership Program         LEAD*6500 Ethics in Leadership W,S [0.50]         Issues in the use and application of ethical standards by leaders are explored through examples from history, current events, novels, films and television. Relevant theory is applied to leadership examples to help students develop an ethical framework for the exercise of leadership skills.	This course focuses on the use of univariate statistics as applied to social and behavioural research within the fields of organizational, management, and consumer studies. Emphasis will be place on providing a solid understanding of descriptive statistics, mean difference testing, analysis of variance and covariance, linear and logistic regression, and power and effect size. Laboratory sessions will focus on analysis application using statistical packages such as SPSS, R, SAS, Stata, and Mplus. <i>Department(s):</i> Department of Management	
Restriction(s):         CBE Executive Programs students only           Department(s):         Executive Leadership Program	MGMT*6840 Quantitative Research Methods: Multivariate Techniques W [0.50]	
<b>LEAD*6600 Foundations of Leadership for Retirement and Senior Living U [0.50]</b> Leadership in the senior living sector requires unique skills, competencies and practice. The purpose of this course is to explore leadership theories and concepts in this context. Understanding the rights and choices of seniors, the future of the aging population, care and support services available and legislative requirements is essential to individuals interested in pursuing career growth in senior living.	This course provides a review of selected multivariate analysis techniques with applications to management. Students will learn to determine which multivariate technique is appropriate for a specific research problem and how to apply multivariate quantitative techniques to research questions. Topics include regression analysis, anova, principal components, factor and discriminant analysis, nonmetric scaling and trade-off analysis. The course uses a hands-on approach and requires computer-program analysis. <i>Department(s):</i> Department of Management	
Restriction(s): CBE Executive Programs students only	MGMT*6850 Qualitative Research Methods W [0.50]	
Department(s):       Executive Leadership Program         LEAD*6720 Politics of Organizations W [0.50]         This elective course reviews a variety of theories and models that help to explain the behavioural underpinnings that influence and shape management and leadership processes within organizations. Examples from history and current events are explored to illustrate	This doctoral seminar provides students with the historical roots, underlying theoretical frameworks, and methods of qualitative research for consumer and management studies. Students will develop their capacity to conduct qualitative research through the development of an original qualitative research project. Department(s): Department of Management

	Appendix A - Courses, 1 hysics
PHIL*6310 Plato U [0.50]	PHIL*6960 PhD Graduate Seminar U [0.50]
A study of some of the major works of Plato.	A seminar course in which students work on developing a range of academic skills for
Department(s): Department of Philosophy	doing professional philosophy. This course is pass/fail and is mandatory for all second
PHIL*6311 Aristotle U [0.50]	year PhD students. Please refer to the Philosophy Department website for a comprehensive
A study of some of the major works of Aristotle.	description of this course. Department(s): Department of Philosophy
Department(s): Department of Philosophy	
PHIL*6320 Medieval Philosophy U [0.50]	PHIL*6990 Guided Research Project U [1.00]
A close examination of particular problems and texts of the medieval period	A guided research project undertaken by students doing an MA by course work, under the supervision of a faculty member.
Department(s): Department of Philosophy	Department(s): Department of Philosophy
PHIL*6340 Modern Philosophy U [0.50]	Physics
An examination of major texts, from Descartes to Mill.	
Department(s): Department of Philosophy	PHYS*6010 PSI Quantum Field Theory I U [0.50]
PHIL*6500 John Locke U [0.50]	Canonical quantization of fields, perturbation theory, derivation of Feynman diagrams,
A critical examination of the works of John Locke.	applications in particle and condensed matter theory, renormalization in phi <sup>4</sup> .
Department(s): Department of Philosophy	Department(s): Department of Physics
PHIL*6530 Kant U [0.50]	PHYS*6020 PSI Statistical Physics U [0.50]
A critical examination of the works of Immanuel Kant.	A brief review of ensembles and quantum gases, lsing model, landau theory of phase transititions, order parameters, topology, classical solutions.
Department(s): Department of Philosophy	Department(s): Department of Physics
PHIL*6600 Social and Political Philosophy U [0.50]	PHYS*6030 PSI Quantum Field Theory II U [0.50]
A critical examination of some selected contemporary works or central problems in the	Feynman Path Integral, abelian and nonabelian guage theories and their quantization,
field of social philosophy.	spontaneous symmetry breaking, nonperturbative techniques: lattice field theory,
Department(s): Department of Philosophy	Wilsonian renormalization.
PHIL*6700 Survey of Ancient Philosophy U [0.50]	Department(s): Department of Physics
A survey of ancient philosophy.	PHYS*6040 PSI Relativity U [0.50]
Department(s): Department of Philosophy	Special relativity, foundations of general relativity, Riemannain geometry, Einstein's
PHIL*6710 Survey of Early Modern Philosophy U [0.50]	equations, FRW and Schwarzschild geometries and their properties.
A survey of modern philosophy from Hobbes to Hume.	Department(s): Department of Physics
Department(s): Department of Philosophy	PHYS*6050 PSI Quantum Theory U [0.50]
PHIL*6720 History of the Philosophy of Science U [0.50]	Schrodinger equation: free particle, harmonic oscillator, simple time-dependent problems,
A survey of the history of the philosophy of science from the Presocratics to the Positivists.	Heisenberg picture and connection with classical physics. Entanglement and non-locality. Pure and mixed states, quantum correlators, measurement theory and interpretation.
Department(s): Department of Philosophy	Department(s): Department of Physics
PHIL*6730 Contemporary Philosophy of Science U [0.50]	PHYS*6060 PSI Information and Data Analysis U [0.50]
An examination of the contemporary discipline of the philosophy of science.	Probability, entropy, Bayesian inference and information theory. Maximum likelihood
Department(s): Department of Philosophy	methods, common probability distributions, applications to real data including Monte
PHIL*6740 Philosophy of Biology U [0.50]	Carlo methods.
A general introduction to the history and philosophy of biology.	Department(s): Department of Physics
Department(s): Department of Philosophy	PHYS*6070 PSI Dynamical Systems U [0.50]
PHIL*6760 Science and Ethics U [0.50]	Maps, flows, stability, fixed points, attractors, chaos, bifurcations, ergodicity, approach
A consideration of the problems which arise in the conjunction of science and ethics.	to chaos. Hamiltonian systems, Liouville, measure, Poincare theorem, integrable systems with examples.
Department(s): Department of Philosophy	Department(s): Department of Physics
PHIL*6810 Survey of Late Modern Philosophy U [0.50]	PHYS*6080 PSI Computation U [0.50]
A survey of modern philosophy from Kant to the late 19th century.	Common algorithms for ode and pde solving, with numerical analysis. Common tasks
Department(s): Department of Philosophy	in linear algebra. Focus on how to write a good code, test it, and obtain a reliable result.
PHIL*6900 Reading Course U [0.50]	Parallel programing.
Department(s): Department of Philosophy	Department(s): Department of Physics
PHIL*6930 Selected Topics I U [0.50]	PHYS*6210 PSI Cosmology U [0.25]
Topics in this course will vary from offering to offering.	FRW metic, Hubble expansion, dark energy, dark matter, CMB, Thermodynamic history
Department(s): Department of Philosophy	of early universe. Growth of perturbations, CDM model of structure formation and comparison to observations, cosmic microwave background anisopropies, inlation and
PHIL*6940 Selected Topics II U [0.50]	observational tests.
Topics in this course will vary from offering to offering.	Department(s): Department of Physics
Department(s): Department of Philosophy	PHYS*6220 PSI Standard Model U [0.25]
PHIL*6950 MA Seminar U [0.50]	Application of Yan-Mills theory to particle physics, QCD and its tests in the perturbative
A seminar course in which students work on developing a range of academic skills for	regime, theory of weak interactions, precisions tests of electroweak theory, CKM matrix
doing professional philosophy. This course is pass/fail and is mandatory for all incoming	and flavour physics, open questions.
MA students. Please refer to the Philosophy Department website for a comprehensive description of this course.	Department(s): Department of Physics
Department(s): Department of Philosophy	PHYS*6230 PSI String Theory U [0.25]
· · · · · · · · · · · · · · · · · · ·	Superstring spectrum in 10d Minkowski, as well as simple toroidal and orbifold
	compactifications. T-duality, D-branes, tree amplitudes. Construct some simple unified models of particle physics. Motivate the 10- 11-dimensional supergravities. Simple
	supergravity solutions and use these to explore some aspects of adS/CFT duality.
	Department(s): Department of Physics

2014-2015 Graduate Calendar

PHYS*6240 PSI Mathematical Physics Topics U [0.25]	PHYS*7030 Quantum Field Theory U [0.50]
Differential forms, de Rham cohomology, differential topology and characteristic classes,	Review of relativistic quantum mechanics and classical field theory. Quantization of free
monopoles and instantons, Kahler manifolds, Dirac equations, zero modes and index	quantum fields (the particle interpretation of field quants). Canonical quantization of
theorems.	interacting fields (Feynman rules). Application of the formalism of interacting quantum fields to lowest-order quantum electrodynamic processes. Radiative corrections and
Department(s): Department of Physics	renormalization.
PHYS*6350 PSI Quantum Information Review U [0.25]	Prerequisite(s): PHYS*7010 or equivalent.
Review of selected topics in Quantum Information.	Department(s): Department of Physics
Department(s): Department of Physics	PHYS*7040 Statistical Physics I* U [0.50]
PHYS*6360 PSI Gravitational Physics Review U [0.25]	Statistical basis of thermodynamics; microcanonical, canonical and grand canonical
Review of selected topics in Gravitational Physics.	ensembles; quantum statistical mechanics, theory of the density matrix; fluctuations,
Department(s): Department of Physics	noise, irreversible thermodynamics; transport theory; application to gases, liquids, solids.
PHYS*6370 PSI Condensed Matter Theory U [0.25]	Department(s): Department of Physics
Review of selected topics in Condensed Matter Theory.	PHYS*7050 Statistical Physics II U [0.50]
Department(s): Department of Physics	Phase transitions. Fluctuation phenomena. Kubo's theory of time correlation functions
PHYS*6380 PSI Quantum Gravity U [0.25]	for transport and spectral properties; applications selected from a variety of topics
Review of selected topics in Quantum Grativity.	including linearized hydrodynamics of normal and superfluids, molecular liquids, liquid crystals, surface phenomena, theory of the dielectric constant, etc.
Department(s): Department of Physics	
PHYS*6390 PSI Foundations of Quantum Theory U [0.25]	Prerequisite(s): PHYS*7040 or equivalent. Department(s): Department of Physics
Review of selected topics in Foundations of Quantum Theory.	PHYS*7060 Electromagnetic Theory * U [0.50]
Department(s): Department of Physics	
PHYS*6410 PSI Explorations in Quantum Information U [0.25]	Solutions to Maxwell's equations; radiation theory, normal modes; multipole expansion; Kirchhoff's diffraction theory; radiating point charge; optical theorem. Special relativity;
Review of selected topics in Quantum Information.	transformation laws for the electromagnetic field; line broadening. Dispersion;
Department(s): Department of Physics	Kramers-Kronig relations. Magnetohydrodynamics and plasmas.
PHYS*6420 PSI Explorations in Gravitational Physics U [0.25]	Department(s): Department of Physics
Review of selected topics in Gravitational Physics.	PHYS*7080 Applications of Group Theory U [0.50]
Department(s): Department of Physics	Introduction to group theory; symmetry, the group concept, representation theory, character
PHYS*6430 PSI Exploration in Condensed Matter Theory U [0.25]	theory. Applications to molecular vibrations, the solid state, quantum mechanics and
Review of selected topics in Condensed Matter Theory.	crystal field theory.
Department(s): Department of Physics	Department(s): Department of Physics
PHYS*6440 PSI Exploration in Quantum Gravity U [0.25]	PHYS*7090 Green's Function Method U [0.50]
Review of selected topics in Quantum Gravity.	Review of essential quantum field theory. Zero and finite temperature. Green's functions.
Department(s): Department of Physics	Applications. Department(s): Department of Physics
PHYS*6450 PSI Explorations in Foundations of Quantum Theory U [0.25]	PHYS*7100 Atomic Physics U [0.50]
Review of selected topics in Foundations of Quantum Theory.	
Department(s): Department of Physics	Emphasis on atomic structure and spectroscopy. Review of angular momentum, rotations, Wigner-Eckart theorem, n-j symbols. Energy levels in complex atoms, Hartree-Fock
PHYS*6460 PSI Explorations in Particle Physics U [0.25]	theory, radiative-transitions and inner-shell processes. Further topics selected with class
Review of selected topics in Particle Physics.	interest in mind, at least one of which is to be taken from current literature.
Department(s): Department of Physics	Department(s): Department of Physics
PHYS*6470 PSI Explorations in String Theory U [0.25]	PHYS*7120 Special Topics in Theoretical Physics U [0.50]
Review of selected topics in String Theory.	Department(s): Department of Physics
Department(s): Department of Physics	PHYS*7130 Molecular Physics U [0.50]
PHYS*6480 PSI Explorations in Complex Systems U [0.25]	Angular momentum and the rotation of molecules; introduction to group theory with
Review of selected topics in Complex Systems.	application to molecular vibrations; principles of molecular spectroscopy; spectra of
Department(s): Department of Physics	isolated molecules; intermolecular interactions and their effects on molecular spectra; selected additional topics (e.g., electronic structure of molecules, experimental
PHYS*6490 PSI Explorations in Cosmology U [0.25]	spectroscopic techniques, neutron scattering, correlation functions, collision induced
Review of selected topics in Cosmology.	absorption, extension of group theory to molecular crystals, normal co-ordinate analysis,
Department(s): Department of Physics	etc.).
PHYS*7010 Quantum Mechanics I * U [0.50]	Department(s): Department of Physics
	PHYS*7140 Nonlinear Optics U [0.50]
Review of formalism of nonrelativistic quantum mechanics including symmetries and invariance. Approximation methods and scattering theory. Elementary quantum theory	Classical and Quantum Mechanical descriptions of nonlinear susceptibility, nonlinear
of radiation. Introduction to one-particle relativistic wave equations.	wave propogation, nonlinear effects such as Peckel's and Kerr effects, harmonic generation, phase conjugation and stimulated scattering processes.
Department(s): Department of Physics	<i>Department(s):</i> Department of Physics
PHYS*7020 Quantum Mechanics II U [0.50]	
Concepts of relativistic quantum mechanics, elementary quantum field theory, and	PHYS*7150 Nuclear Physics U [0.50]
Feynman diagrams. Application to many-particle systems.	Static properties of nuclei; alpha, beta, gamma decay; two-body systems; nuclear forces: nuclear reactions; single-particle models for spherical and deformed nuclei; shell
<i>Prerequisite(s):</i> PHYS*7010 or equivalent	collective, interacting boson models.
Department(s): Department of Physics	Department(s): Department of Physics
	PHYS*7160 Special Topics in Subatomic and Nuclear Physics U [0.50]
	Restriction(s): Instructor consent required.

PSYC*7170 Industrial/Organizational Psychology Doctoral Research Internship I U [0.50]	Rural Planning and Development
Participants work with an Industrial Organizational faculty member to conduct research on a topic of mutual interest (other than their doctoral research). They collect and/or	RPD*6030 International Rural Development Planning: Principles and Practices U [0.50]
analyze data and write up results with the goal of producing a conference presentation and/or a quality publication manuscript. <i>Prerequisite(s):</i> PSYC*7130 <i>Co-requisite(s):</i> PSYC*7140 <i>Restriction(s):</i> Instructor consent required. <i>Department(s):</i> Department of Psychology	This course presents the scope and nature of international development planning and alternative roles for development planners; has a rural emphasis; reviews the evolution of development planning from macroeconomic beginnings to more integrated local planning approaches; examines the development planning process and its organizational and spatial dimensions; compares policy, program, project, sectoral and integrated area planning; and compares rural development planning in market, mixed and state-driven societies.
PSYC*7180 Industrial/Organizational Psychology Doctoral Research Internship II U [0.50]	Department(s): School of Environmental Design and Rural Development
Participants work with an Industrial Organizational faculty member to conduct research on a topic of mutual interest (other than their doctoral research). They collect and/or analyze data and write up results with the goal of producing a conference presentation and/or a quality publication manuscript. <i>Prerequisite(s):</i> PSYC*7130, PSYC*7140, PSYC*7170 <i>Restriction(s):</i> Instructor consent required. <i>Department(s):</i> Department of Psychology	<b>RPD*6050 Professional Practice Course in Development and Planning U [0.50]</b> This course offers a planned but flexible program for developing skills that are relevant to professional practice in the rural planning and development field. It also fills the skill knowledge gaps for students who cannot take full courses. Students, in consultation with his/her Academic Advisor, asses their knowledge and skills need and aquire them through selected 'modules'. <i>Department(s):</i> School of Environmental Design and Rural Development
PSYC*7190 Work Motivation and Leadership U [0.50]	RPD*6070 Project Development: Principles, Procedures, and Selected Methods U [0.50]
This course examines theories, research, and application of work motivation and leadership within an organizational context. The course will include a description of classic and contemporary theories of work motivation and leadership, a critical evaluation of the research findings, and a discussion of the application of the research findings to the work environment. <i>Restriction(s):</i> Psychology students only. <i>Department(s):</i> Department of Psychology	This course introduces students to the principles, procedures and methods in developing a project. It examines the project cycle: identification, preparation, appraisal, implementation/supervision, monitoring and evaluation. It gives an understanding of the major methods involved and teaches selected methods. The focus is on the international, rural context and on small non-farm projects: small industries, small physical infrastructure and social projects. <i>Department(s):</i> School of Environmental Design and Rural Development
PSYC*7991 CP:ADE Clinical Practicum I U [0.25]	<b>RPD*6080 Environment and Development: Biophysical Resources and Sustainable</b>
This CP:ADE practicum is typically undertaken at the Center for Psychological Services, one day a week over a semester, to enhance skills introduced in other clinical courses. Expectations for the course will be based on the student's current level of clinical skill. Students will work with diverse clients, and gain knowledge of ethics and jurisprudence in a clinical setting. <i>Restriction(s):</i> Restricted to students in the CP:ADE area of specialization <i>Department(s):</i> Department of Psychology	<b>Development in Rural Environments U [0.50]</b> This course will examine the problems and potential for ecologically sustainable development in the context of rural development planning particularly in the Third World environments. The course critically examines the strategic planning approaches and methods which involve the interaction between social systems and natural ecosystems in the context of planned intervention and change in rural environments. <i>Department(s):</i> School of Environmental Design and Rural Development
PSYC*7992 CP:ADE Clinical Practicum II U [0.50]	RPD*6170 Rural Research Methods U [0.50]
This CP:ADE practicum is undertaken in a school board, psychological services department for two days a week over one semester. Students will develop clinical assessment skills with a diversity of clients, work with interdisciplinary teams, and apply knowledge of ethics and jurisprudence to educational settings. A passing grade and a satisfactory rating on the practical component must be acheived in PSYC*6690 and PSYC*6700 to enrol in this course. <i>Prerequisite(s):</i> PSYC*6010, PSYC*6690, and PSYC*6700 <i>Restriction(s):</i> Restricted to students in the CP:ADE area of specialization <i>Department(s):</i> Department of Psychology	The course provides rural planning and development professionals with a number of theoretical frameworks and practical approaches to problem solving in rural Canadian and international contexts. The course content provides an introduction to hypothesis development, data collection, analytical frameworks, research management, and information synthesis and presentation methodologies that are appropriate to the practicing rural planner and developer. It views the roles of the researcher and research as interventionist and intervention in the rural community. Research methods are discussed as an integral and supporting part of the planning and development process. <i>Department(s):</i> School of Environmental Design and Rural Development
PSYC*7993 CP:ADE Clinical Practicum III U [1.00]	RPD*6220 Planning and Development Policy Analysis U [0.50]
This CP:ADE practicum is undertaken in a children's mental health setting two days a week over two semesters. Students will develop complex assessment and therapy skills with diverse clients, work with interdisciplinary team, and apply knowledge of ethics and jurisprudence to mental health settings.	Planning and development policy has experienced a significant evolution. This course examines the history of policy, and the theory, methods and processes of policy development and governance in planning and management of environment and resources. <i>Department(s):</i> School of Environmental Design and Rural Development
Prerequisite(s): PSYC*6471 or PSYC*7992 Restriction(s): Restricted to students in the CP: ADE area of specialization Instructor	RPD*6240 Planning and Development Theory U [0.50]
Restriction(s):       Restricted to students in the CP:ADE area of specialization. Instructor consent required.         Department(s):       Department of Psychology         PSYC*8000 Clinical Internship U [0.00]       A mark of satisfactory (SAT) in this course indicates that a student in the Clinical Psychology: Applied Developmental Emphasis (CP:ADE) field has successfully completed a full year (1800-2000 hour) internship in an accredited clinical setting (e.g., CPA or	Examines basic concepts, theories and perspectives in rural planning and development. A conceptual examination of 'rural', 'planning' and 'development' precedes an examination of how rural planning and development is viewed from alternative, often conflicting theories of rural change and planned intervention. The implications for practice are discussed. Department(s): School of Environmental Design and Rural Development
APA) approved by the Director of Clinical Training for CP:ADE.	RPD*6250 Foundations in Rural Planning Practice F [0.50] This course provides an introduction to rural planning practice. This includes: i) Concepts
Prerequisite(s):       Completion of all course work in the CP:ADE field, the PhD qualifying examination, and the PhD Thesis proposal at the time of application, one year in advance of beginning the clinical internship.         Department(s):       Department of Psychology	in Public Administration - The structure, responsibility and functions of public sector administration and government. ii) The workings of local government. iii) Rural Planning Practice - An introduction to planning and development in rural regions and small municipalities. <i>Department(s):</i> School of Environmental Design and Rural Development

# Sociology

### SOC\*6070 Sociological Theory F [0.50]

Classical and contemporary theoretical perspectives and their inter-relationships. A central concern will be to develop the student's ability to assess theory critically and to understand how theory and research relate to each other.

School of Environmental Design and Rural Development

Department(s): Department of Sociology and Anthropology

### SOC\*6130 Quantitative Research Methods W [0.50]

The application of multiple regression to data generated by non-experimental research, e.g., survey data and data from other sources (census, archival). In large part a course in theory construction, a thorough grounding in the mechanics and statistical assumptions of multiple regression is followed by its application to the construction of structural equation (or causal) models representing substantive theories in sociology and related disciplines.

*Department(s):* Department of Sociology and Anthropology

### SOC\*6140 Qualitative Research Methods F [0.50]

An examination of the methods of qualitative research, including participant observation and unstructured interviews, as well as the ethical considerations of fieldwork. Other topics, such as comparative and historical methods, may be included.

Department(s): Department of Sociology and Anthropology

### SOC\*6270 Diversity and Social Equality U [0.50]

This course will examine a range of approaches used in the study of intergroup relations, with special emphasis on struggles over influence and power. Students will acquire a deeper understanding of the complex intersection, as well as the overlap among forms of identity and group mobilization based on ethnic, linguistic, regional, class, gender, racial and other forms of social division. The course may also cover native issues and policies related to multiculturalism, equity and local or regional autonomy. Department(s): Department of Sociology and Anthropology

SOC\*6350 Society, Crime and Control U [0.50]

This seminar course surveys classical theoretical perspectives and more recent theoretical developments in the sociology of crime. It will examine the assumptions and logical structure of each perspective and justifications of particular criminal justice/public policy responses. The course will also critically assess recent empirical research relevant to each perspective.

*Department(s):* Department of Sociology and Anthropology

Communities U [0.50]

studies.

planning, management and organizational design/development issues. Alternative economic concepts and perspectives are critically examined. Includes international case Department(s): School of Environmental Design and Rural Development RPD\*6380 Application of Quantitative Techniques in Rural Planning and Development U [0.50]

Analysis and application of standard quantitative, statistical and computer-based techniques utilized in rural planning and development. Problems of data collection, analysis and interpretation.

Department(s): School of Environmental Design and Rural Development

# RPD\*6390 Rural Social Planning U [0.50]

This course will provide students who have an interest in social development with an avenue for linking that interest to the policy, planning and intervention process. Department(s): School of Environmental Design and Rural Development

# SOC\*6420 Global Agro-Food Systems, Communities and Rural Change U [0.50]

This course will reflect recent sociological interests in food studies and global agro-food systems, resources and the environment, community sustainability, rural-urban linkages, the transnationalization of labour regimes, and social movements in the rural context. The course will encourage students to take a comparative and historical approach, focusing on cross-national and inter-regional studies where possible, and to examine how class, gender, race and ethnicity play out in each particular substantive topic comprising the rural field.

Department(s): Department of Sociology and Anthropology

### SOC\*6460 Gender and Development F [0.50]

Cross-cultural and historical changes in gender relations and the roles/positions of women brought about by industrialization and the development of the world system. Critical examination of the predominant theories of gender relations, in so far as these inform development research and action in societies with different socio-economic systems. Introduction to the latest theories and research in the area of women and development, as well as with social and political actions undertaken by women themselves. This is one of the two alternative core courses for the collaborative International Development Studies program.

Department(s): Department of Sociology and Anthropology

### SOC\*6480 Work, Gender and Change in a Global Context U [0.50]

This course will consider some of the theoretical frameworks available for examining work, workers and work places in the context of globalization, economic restructuring, and shifts in public policy. Using case studies of particular work worlds, the course may include topics such as changing patterns of work and employment in comparative contexts, labour regimes, industrial and organizational change, organizations and protest, education for work, and the regulation of work. The course will focus on the dialectical relationship between the configurations of gender, class, race and ethnicity and the transformation of work.

Department(s): Department of Sociology and Anthropology

### SOC\*6500 Social Movements in Latin America W [0.50]

Students will critically review the major theoretical perspectives on social movements and consider their relevance in understanding the timing, tactics, and impact of movements in Latin America. Movements to be examined may include labour, peasant, armed insurgent, indigenous, feminist, gay rights, and anti-globalization struggles.

Department(s): Department of Sociology and Anthropology

### SOC\*6550 Selected Topics in Theory and Research U [0.50]

This course will be offered with varying content focusing on theory or research. *Department(s):* Department of Sociology and Anthropology

Department(s). Department of Sociology and Anthropolog

# SOC\*6600 Reading Course U [0.50]

A program of directed reading, complemented with the writing of papers or participation in research. Reading courses are arranged by students through their advisors or advisory committees and must be approved by the chair of the department. This course may be repeated provided different content is involved.

Department(s): Department of Sociology and Anthropology

### SOC\*6660 Major Paper U [1.00]

The major paper is an extensive research paper for those who do not elect to complete a thesis. It may be taken over two semesters.

Department(s): Department of Sociology and Anthropology

### SOC\*6700 Pro-seminar F-W [0.00]

The pro-seminar concerns matters involved in graduate studies and later work as a professional sociologist, including how to form a graduate advisory committee, assistantship responsibilities, presentation skills, exploration of careers in sociology, writing grant proposals, reports and articles, and teaching.

 Restriction(s):
 Students in the MA program in Sociology only

 Department(s):
 Department of Sociology and Anthropology

# SOC\*6800 Advanced Topics in Sociology F [0.50]

This course will focus on the foundations of sociological theories and the broader philosophical context of inquiry in sociological research. Students will develop an advanced understanding of the research process through study, analysis and critical assessment of a range of theoretical and methodological approaches and issues.

Prerequisite(s): MA in Sociology

*Restriction(s):* Students in the PhD program in Sociology only

Department(s): Department of Sociology and Anthropology

# SOC\*6810 Reading Course U [0.50]

A program of supervised independent reading, complemented with the writing of papers or participation in research. Reading courses are arranged by students in consultation with their advisor or advisory committee and must be approved by the chair of the department.

 Restriction(s):
 Students in the PhD program in Sociology only

 Department(s):
 Department of Sociology and Anthropology

# SOC\*6820 Directed Readings U [0.50]

A program of directed readings related to the student's field of specialization. The nature and content of the course are agreed upon by the student and instructor in consultation with the student's advisor or advisory committee. The course must be approved by the chair of the department.

Restriction(s):Students in the PhD program in Sociology onlyDepartment(s):Department of Sociology and Anthropology

# **Statistics**

### STAT\*6550 Computational Statistics U [0.50]

This course covers the implementation of a variety of computational statistics techniques. These include random number generation, Monte Carlo methods, non-parametric techniques, Markov chain Monte Carlo methods, and the EM algorithm. A significant component of this course is the implementation of techniques.

*Department(s):* Department of Mathematics and Statistics

# STAT\*6700 Stochastic Processes U [0.50]

The content of this course is to introduce Brownian motion leading to the development of stochastic integrals thus providing a stochastic calculus. The content of this course will be delivered using concepts from measure theory and so familiarity with measures, measurable spaces, etc., will be assumed.

Department(s): Department of Mathematics and Statistics

### STAT\*6721 Stochastic Modelling U [0.50]

Topics include the Poisson process, renewal theory, Markov chains, Martingales, random walks, Brownian motion and other Markov processes. Methods will be applied to a variety of subject matter areas.

Department(s): Department of Mathematics and Statistics

### STAT\*6741 Statistical Analysis for Reliability and Life Testing U [0.50]

Statistical failure models, order statistics, point and interval estimation procedures for life time distributions, testing reliability hypotheses, Bayes methods in reliability, system reliability.

Department(s): Department of Mathematics and Statistics

### STAT\*6761 Survival Analysis U [0.50]

Kaplan-Meier estimation, life-table methods, the analysis of censored data, survival and hazard functions, a comparison of parametric and semi-parametric methods, longitudinal data analysis.

Department(s): Department of Mathematics and Statistics

# STAT\*6801 Statistical Learning U [0.50]

Topics include: nonparametric and semiparametric regression; kernel methods; regression splines; local polynomial models; generalized additive models; classification and regression trees; neural networks. This course deals with both the methodology and its application with appropriate software. Areas of application include biology, economics, engineering and medicine.

Department(s): Department of Mathematics and Statistics

STAT\*6802 Generalized Linear Models and Extensions U [0.50]

Topics include: generalized linear models; generalized linear mixed models; joint modelling of mean and dispersion; generalized estimating equations; modelling longitudinal categorical data; modelling clustered data. This course will focus both on theory and implementation using relevant statistical software.

Department(s): Department of Mathematics and Statistics

### STAT\*6821 Multivariate Analysis U [0.50]

This is an advanced course in multivariate analysis and one of the primary emphases will be on the derivation of some of the fundamental classical results of multivariate analysis. In addition, topics that are more current to the field will also be discussed such as: multivariate adaptive regression splines; projection pursuit regression; and wavelets. *Department(s):* Department of Mathematics and Statistics

### STAT\*6841 Statistical Inference U [0.50]

Bayesian and likelihood methods, large sample theory, nuisance parameters, profile, conditional and marginal likelihoods, EM algorithms and other optimization methods, estimating functions, MonteCarlo methods for exploring posterior distributions and likelihoods, data augmentation, importance sampling and MCMC methods. *Department(s):* Department of Mathematics and Statistics

TRMH*6200 Contemporary Issues in Tourism W [0.50]	UNIV*6000 The Structure and Function of Muscle U [0.50]
The course will acquaint students with the tourism industry. An overview of the scale	An interdisciplinary course covering basic aspects of muscle from a range of viewpoints:
and scope, involved stakeholders, and the organization of the industry will be examined	structure, metabolism, protein content, energetics, mechanics, biological adaptations, growth and development. The course is designed for graduate students from a wide range
and critiqued. An emphasis will be placed on the sustainable development and management	of specific disciplines and will provide a broad background to muscle biology as well as
of tourism resources and organizations.	more detailed insights into specific aspects of each area covered.
Prerequisite(s): TRMH*6100	Department(s): Office of Graduate Studies
<i>Department(s):</i> School of Hospitality, Food and Tourism Management	

### UNIV\*6010 Regulation in Muscle Metabolism U [0.50]

An interdisciplinary course emphasizing the regulation of muscle metabolism in vivo. The course focuses on the integration of metabolic fuel utilization to meet cellular energy demands under a variety of conditions in the whole animal. Topics include: sources of energy demand, integration of energy supply to meet energy demands, and regulation of cell growth, maintenance and adaptation.

Department(s): Office of Graduate Studies

### UNIV\*6030 Seminars and Analysis in Animal Behaviour and Welfare F-W [0.50]

This seminar-based course offers an interdisciplinary forum for the discussion of broad topics in animal welfare and human-animal relationships. Students analyze topics presented by visiting guest lecturers using perspectives from various disciplines such animal science, philosophy, history, psychology, ethics, and biology.

*Department(s):* Office of Graduate Studies

#### UNIV\*6040 Selected Topics in Critical Studies in Improvisation S [0.50]

Intended for students who have an interest in musical improvisation, this interdisciplinary course provides a forum to investigate the possibility of improvised artistic practices to inform community-building models and to shape public debate and policy decisions regarding the role of the arts in society.

*Department(s):* Office of Graduate Studies

#### UNIV\*6050 The Integration of Science and Business in Agrifood Systems F-W [1.00]

Designed specifically for students enrolled in OMAFRA/UoG HQP Scholarship program but open to all students. To provide market-readiness for students as they enter business, government or academia. Teaching modules will cover business developments, intellectual property, patent and licence protection as well as societal issues impacting agriculture.

 Restriction(s):
 Limited of 36 students. Priority to HQP Scholarship Program students

 Department(s):
 Office of Graduate Studies

UNIV\*6060 Mechanisms of Tissue and Cellular Mechanotransduction in Health and Disease F [0.50]

This course explores fundamental mechanisms and signalling pathways that dynamically regulate cell and tissues responses to physical forces in health and disease. It is relevant to a wide range of areas of study, from biomechanics and tissue engineering to gastro-intestinal health, food and nutrition.

*Restriction(s):* Instructor consent required. *Department(s):* Office of Graduate Studies

#### UNIV\*6070 Topics and Analysis in Sustainability F [0.50]

This course will allow students to examine, analyze and discuss the evolving concept of "sustainability" in a transdisciplinary context and build upon their knowledge and experience in this area. We will examine various current issues (e.g., climate change, natural resource management, environmental governance) at the interface of more than one discipline (or transdisciplinary) and which require some degree of global understanding. Students will be encouraged to share their diverse backgrounds in discussions and assignments.

*Restriction(s):* Instructor consent required. Must be enrolled in a graduate program at the University of Guelph.

Department(s): Office of Graduate Studies

### UNIV\*6500 International Study Option U [0.00]

A period of study in another country as part of a graduate program at the University of Guelph. Details may be obtained from the Office of Graduate Studies.

*Department(s):* Office of Graduate Studies

### UNIV\*6600 Animal Care Short Course S,F,W [0.00]

The course includes on-line training modules covering the following topics: Legislation, Regulation & Guidelines, Ethological Considerations in Animal Management, Ethics in Animal Experimentation, Research Issues, The Three Rs of Humane Animal Experimentation, Occupational Health and Safety when Working with Animals, Euthanasia, Recognition and Alleviation of Pain and Distress in Animals. Graduate students using or caring for live animals or assisting in teaching courses involving live vertebrate animals also must attend the Animal Care Services species-specific Workshops as part of the Animal User Training Program.

*Department(s):* Office of Graduate Studies

UNIV\*6710 Commercialization of Innovation F [0.50]

This course is designed to help participants better understand the process, the analytical tools that can assist the process and how best to prepare technologies to survive commercialization. The course includes elements of entrepreneurship, relationship building, organizational change, as well as project and personnel management. *Department(s):* Office of Graduate Studies

#### UNIV\*6800 University Teaching: Theory and Practice F [0.50]

Participants will critically examine aspects of teaching in higher education and develop teaching skills such as lecturing, demonstrating, leading discussions, and problem solving. Satisfactory (SAT) or unsatisfactory (UNS) will be used to evaluate the student's performance in this course.

*Department(s):* Office of Graduate Studies

UNIV\*7100 Academic Integrity for Graduate Students S,F,W [0.00]

Academic integrity is a code of ethics for teachers, students, researchers, and writers. It is fundamental to the University of Guelph's educational mission and to ensuring the value of the scholarly work conducted here. This course provides definitions, examples, and exercises to help graduate students understand the importance of academic integrity and learn how to avoid academic misconduct in their own work. This course required of all graduate students has to be completed within 20 days of commencing their graduate program.

Department(s): Office of Graduate Studies
