2019-2020 Graduate Calendar

The information published in this Graduate Calendar outlines the rules, regulations, curricula, programs and fees for the 2019-2020 academic year, including the Summer Semester 2019, Fall Semester 2019 and the Winter Semester 2020.

For your convenience the Graduate Calendar is available in PDF format.

If you wish to link to the Graduate Calendar please refer to the Linking Guidelines.

Disclaimer

The Office of Graduate and Postdoctoral Studies has attempted to ensure the accuracy of this on-line Graduate Calendar. However, the publication of information in this document does not bind the university to the provision of courses, programs, schedules of studies, fees, or facilities as listed herein.

Limitations

The University of Guelph reserves the right to change without notice any information contained in this calendar, including any rule or regulation pertaining to the standards for admission to, the requirements for the continuation of study in, and the requirements for the granting of degrees or diplomas in any or all of its programs.

The university will not be liable for any interruption in, or cancellation of, any academic activities as set forth in this calendar and related information where such interruption is caused by fire, strike, lock-out, inability to procure materials or trades, restrictive laws or governmental regulations, actions taken by the faculty, staff or students of the university or by others, civil unrest or disobedience, Public Health Emergencies, or any other cause of any kind beyond the reasonable control of the university.

The University of Guelph reaffirms section 1 of the Ontario Human Rights Code, 1981, which prohibits discrimination on the grounds of race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, sex, sexual orientation, handicap, age, marital status or family status.

The university encourages applications from women, aboriginal peoples, visible minorities, persons with disabilities, and members of other under-represented groups.
Introduction

Collection, Use and Disclosure of Personal Information

Personal information is collected under the authority of the University of Guelph Act (1964), and in accordance with Ontario's Freedom of Information and Protection of Privacy Act (FIPPA). This information is used by University officials in order to carry out their authorized academic and administrative responsibilities and also to establish a relationship for alumni and development purposes. Certain personal information is disclosed to external agencies, including the Ontario Universities Application Centre, the Ministry of Advanced Education and Skills Development, and Statistics Canada, for statistical and planning purposes, and is disclosed to other individuals or organizations in accordance with the Office of Registrarial Services Departmental Policy on the Release of Student Information. For details on the use and disclosure of this information call the Office of Registrarial Services at the University at (519) 824-4120 or see https://www.uoguelph.ca/registrar.

Statistics Canada - Notification of Disclosure

For further information, please see Statistics Canada's web site at http://www.statcan.gc.ca and Section XIV Statistics Canada.

Address for University Communication

Depending on the nature and timing of the communication, the University may use one of these addresses to communicate with students. Students are, therefore, responsible for checking all of the following on a regular basis:

Email Address

The University issued email address is considered an official means of communication with the student and will be used for correspondence from the University. Students are responsible for monitoring their University-issued email account regularly.

Home Address

Students are responsible for maintaining a current mailing address with the University. Address changes can be made, in writing, through Registrarial Services.

Name Changes

The University of Guelph is committed to the integrity of its student records, therefore, each student is required to provide either on application for admission or on personal data forms required for registration, their complete, legal name. Any requests to change a name, by means of alteration, deletion, substitution or addition, must be accompanied by appropriate supporting documentation.

Student Confidentiality and Release of Student Information Policy Excerpt

The University undertakes to protect the privacy of each student and the confidentiality of their record. To this end the University shall refuse to disclose personal information to any person other than the individual to whom the information relates where disclosure would constitute an unjustified invasion of the personal privacy of that person or of any other individual. All members of the University community must respect the confidential nature of the student information which they acquire in the course of their work.

Complete policy at https://www.uoguelph.ca/secretariat/office-services/university-secretariat/university-policies.
Learning Outcomes

Graduate Degree Learning Outcomes

On May 27, 2013, the University of Guelph Senate approved the following five University-wide Learning Outcomes as the basis from which to guide the development of graduate degree programs, specializations and courses:

1. Critical and Creative Thinking
2. Literacy
3. Global Understanding
4. Communication
5. Professional and Ethical Behaviour

These learning outcomes are also intended to serve as a framework through which our educational expectations are clear to students and the broader public; and to inform the process of outcomes assessment through the quality assurance process (regular reviews) of programs and departments.

An on-line guide to the learning outcomes, links to the associated skills, and detailed rubrics designed to support the development and assessment of additional program and discipline-specific outcomes, are available for reference on the Learning Outcomes website.

Critical and Creative Thinking

Critical and creative thinking is a concept in which one applies logical principles, after much inquiry and analysis, to solve problems with a high degree of innovation, divergent thinking and risk taking. Those mastering this outcome show evidence of integrating knowledge and applying this knowledge across disciplinary boundaries. Depth and breadth of understanding of disciplines is essential to this outcome. At the graduate level, originality in the application of knowledge (master’s) and undertaking of research (doctoral) is expected.

In addition, Critical and Creative Thinking includes, but is not limited to, the following outcomes: Independent Inquiry and Analysis; Problem Solving; Creativity; and Depth and Breadth of Understanding.

Literacy

Literacy is the ability to extract information from a variety of resources, assess the quality and validity of the material, and use it to discover new knowledge. The comfort in using quantitative literacy also exists in this definition, as does using technology effectively and developing visual literacy.

In addition, Literacy includes, but is not limited to, the following outcomes: Information Literacy, Quantitative Literacy, Technological Literacy, and Visual Literacy.

Global Understanding

Global understanding encompasses the knowledge of cultural similarities and differences, the context (historical, geographical, political and environmental) from which these arise, and how they are manifest in modern society. Global understanding is exercised as civic engagement, intercultural competence and the ability to understand an academic discipline outside of the domestic context.

In addition, Global Understanding includes, but is not limited to, the following outcomes: Global Understanding, Sense of Historical Development, Civic Knowledge and Engagement, and Intercultural Competence.

Communication

Communication is the ability to interact effectively with a variety of individuals and groups, and convey information successfully in a variety of formats including oral and written communication. Communication also comprises attentiveness and listening, as well as reading comprehension. It includes the ability to communicate and synthesize information, arguments, and analyses accurately and reliably.

In addition, Communication includes, but is not limited to, the following outcomes: Oral Communication, Written Communication, Reading Comprehension, and Integrative Communication.

Professional and Ethical Behaviour

Professional and ethical behaviour requires the ability to accomplish the tasks at hand with proficient skills in teamwork and leadership, while remembering ethical reasoning behind all decisions. The ability for organizational and time management skills is essential in bringing together all aspects of managing self and others. Academic integrity is central to mastery in this outcome. At the graduate level, intellectual independence is needed for professional and academic development and engagement.

In addition, Professional and Ethical Behaviour includes, but is not limited to, the following outcomes: Teamwork, Ethical Reasoning, Leadership, Personal Organization and Time Management, and Intellectual Independence.

X. Collaborative Specializations

Collaborative specializations are intra-university graduate fields of study that provide additional multidisciplinary experiences for students enrolled in and completing the degree requirements of an approved masters or doctoral program.
Artificial Intelligence

The Collaborative Specialization in Artificial Intelligence (AI) provides thesis-based masters students in Computer Science, Engineering, Mathematics and Statistics, and Bioinformatics with a diverse and comprehensive knowledge base in AI. Students wishing to undertake graduate studies at the masters level with emphasis on artificial intelligence will be admitted by a participating department and will register in both the participating department and in the collaborative specialization.

Students will learn from a multidisciplinary team of faculty with expertise in fundamental and applied deep learning and machine learning, while conducting AI-related research guided by a faculty advisor. By the end of this program, graduates will have comprehensive understanding of leading-edge AI techniques and will be able to apply this knowledge to solve real-world problems.

MSc/MASc Collaborative Specialization

Admission Requirements

Masters students in the Collaborative Specialization in Artificial Intelligence must meet the admission requirements of the participating department in which they are enrolled. The application process has two stages. First, prospective students will apply to their primary program of interest, identifying interest in the collaborative specialization as a focus. If the student is admitted to the primary program as a thesis student, the second stage is then admission to the collaborative specialization. All applications to participate in the Collaborative Specialization in Artificial Intelligence will be vetted by the specialization’s Graduate Program Coordinator.

Program Requirements

Masters students in the collaborative specialization in artificial intelligence must complete:

UNIV*6080 [0.25] Computational Thinking for Artificial Intelligence
UNIV*6090 [0.50] Artificial Intelligence Applications and Society

One of the following Elective Core courses:

CIS*6020 [0.50] Artificial Intelligence
ENGG*6500 [0.50] Introduction to Machine Learning
STAT*6801 [0.50] Statistical Learning

Two of the following Complementary AI-related courses:

BINF*6970 [0.50] Statistical Bioinformatics
CIS*6050 [0.50] Neural Networks
CIS*6060 [0.50] Bioinformatics
CIS*6070 [0.50] Discrete Optimization
CIS*6080 [0.50] Genetic Algorithms
CIS*6100 [0.50] Parallel Processing Architectures
CIS*6120 [0.50] Uncertainty Reasoning in Knowledge Representation
CIS*6140 [0.50] Software Engineering
CIS*6160 [0.50] Multiagent Systems
CIS*6320 [0.50] Image Processing Algorithms and Applications
CIS*6420 [0.50] Soft Computing
ENGG*6100 [0.50] Machine Vision
X. Collaborative Specializations, Artificial Intelligence

ENGG*6140 Optimization Techniques for Engineering [0.50]
ENGG*6570 Advanced Soft Computing [0.50]
MATH*6020 Scientific Computing [0.50]
MATH*6021 Optimization I [0.50]
MATH*6051 Mathematical Modelling [0.50]
PHIL*6760 Science and Ethics [0.50]
STAT*4000 [ ]
STAT*6821 Multivariate Analysis [0.50]
STAT*6841 Computational Statistical Inference [0.50]

And an acceptable AI-related thesis. Requirements of this collaborative specialization may also serve as core and/or elective requirements in the student’s home program.

Courses

Required Courses

UNIV*6080 Computational Thinking for Artificial Intelligence U [0.25]
This course will provide students with an overview of the mathematical and computational foundation that is required to undertake artificial intelligence and machine learning research. Students will also gain an understanding of the historical context, breadth, and current state of the field. Students are expected to have already taken undergraduate courses in probability & statistics, calculus, linear algebra, and data structures & algorithms (STAT*2120, MATH*1210, ENGG*1500, and CIS*2520, or equivalents).
Offering(s): Also offered through Distance Education format.
Department(s): Dean's Office, College of Engineering and Physical Sciences

UNIV*6090 Artificial Intelligence Applications and Society U [0.50]
This multidisciplinary, team-taught course provides an in-depth study of how artificial intelligence methodologies can be applied to solve real-world problems in different fields. Students will work in groups to propose solutions whilst considering social and ethical implications of artificial intelligence technologies.
Prerequisite(s): UNIV*6080
Restriction(s): Restricted to students in the collaborative specialization in Artificial Intelligence
Department(s): Dean's Office, College of Engineering and Physical Sciences

Elective Core

CIS*6020 Artificial Intelligence U [0.50]
An examination of Artificial Intelligence principles and techniques such as: logic and rule based systems; forward and backward chaining; frames and script models; and the object-oriented approach; the evaluation of intelligent systems and knowledge acquisition. A sizeable project is required and applications in other areas are encouraged.
Department(s): School of Computer Science

ENGG*6500 Introduction to Machine Learning U [0.50]
The aim of this course is to provide students with an introduction to algorithms and techniques of machine learning particularly in engineering applications. The emphasis will be on the fundamentals and not specific approach or software tool. Class discussions will cover and compare all current major approaches and their applicability to various engineering problems, while assignments and project will provide hands-on experience with some of the tools.
Department(s): School of Engineering

STAT*6801 Statistical Learning U [0.50]
Topics include: nonparametric and semiparametric regression; kernel methods: regression splines; local polynomial models; generalized additive models; classification and regression trees; neural networks. This course deals with both the methodology and its application with appropriate software. Areas of application include biology, economics, engineering and medicine.
Department(s): Department of Mathematics and Statistics

Complementary AI-related

BINF*6970 Statistical Bioinformatics W [0.50]
This course presents a selection of advanced approaches for the statistical analysis of data that arise in bioinformatics, especially genomic data. A central theme to this course is the modelling of complex, often high-dimensional, data structures.
Prerequisite(s): Introductory courses in statistics, mathematics and programming
Restriction(s): Restricted to students in Bioinformatics programs. Students in other programs may consult with course instructor.
Department(s): Dean's Office, College of Biological Science

CIS*6050 Neural Networks U [0.50]
Department(s): School of Computer Science

CIS*6060 Bioinformatics U [0.50]
Data mining and bioinformatics, molecular biology databases, taxonomic groupings, sequences, feature extraction, Bayesian inference, cluster analysis, information theory, machine learning, feature selection.
Department(s): School of Computer Science

CIS*6070 Discrete Optimization U [0.50]
This course will discuss problems where optimization is required and describes the most common techniques for discrete optimization such as the use of linear programming, constraint satisfaction methods, and genetic algorithms.
Department(s): School of Computer Science

CIS*6080 Genetic Algorithms U [0.50]
This course introduces the student to basic genetic algorithms, which are based on the process of natural evolution. It is explored in terms of its mathematical foundation and applications to optimization in various domains.
Department(s): School of Computer Science

CIS*6100 Parallel Processing Architectures U [0.50]
Parallelism in uniprocessor systems, parallel architectures, memory structures, pipelined architectures, performance issues, multiprocessor architectures.
Department(s): School of Computer Science

CIS*6120 Uncertainty Reasoning in Knowledge Representation U [0.50]
Representation of uncertainty, Dempster-Schafer theory, fuzzy logic, Bayesian belief networks, decision networks, dynamic networks, probabilistic models, utility theory.
Department(s): School of Computer Science

CIS*6140 Software Engineering U [0.50]
This course will discuss problems where optimization is required and describes the most common techniques for discrete optimization such as the use of linear programming, constraint satisfaction methods, and meta-heuristics.
Department(s): School of Computer Science

CIS*6160 Multiagent Systems U [0.50]
Intelligent systems consisting of multiple autonomous and interacting subsystems with emphasis on distributed reasoning and decision making. Deductive reasoning agents, practical reasoning agents, probabilistic reasoning agents, reactive and hybrid agents, negotiation and agreement, cooperation and coordination, multiagent search, distributed MDP, game theory, and modal logics.
Department(s): School of Computer Science

CIS*6320 Image Processing Algorithms and Applications U [0.50]
Brightness transformation, image smoothing, image enhancement, thresholding, segmentation, morphology, texture analysis, shape analysis, applications in medicine and biology.
Department(s): School of Computer Science

CIS*6420 Soft Computing U [0.50]
Neural networks, artificial intelligence, connectionist model, back propagation, resonance theory, sequence processing, software engineering concepts.
Department(s): School of Computer Science

ENGG*6100 Machine Vision U [0.50]
Computer vision studies how computers can analyze and perceive the world using input from imaging devices. Topics covered include image pre-processing, segmentation, shape analysis, object recognition, image understanding, 3D vision, motion and stereo analysis, as well as case studies.
Department(s): School of Engineering

ENGG*6140 Optimization Techniques for Engineering U [0.50]
This course serves as a graduate introduction into combinatorics and optimization. Optimization is the main pillar of Engineering and the performance of most systems can be improved through intelligent use of optimization algorithms. Topics to be covered: Complexity theory, Linear/Integer Programming techniques, Constrained/Unconstrained optimization and Nonlinear programming, Heuristic Search Techniques such as Tabu Search, Genetic Algorithms, Simulated Annealing and GRASP.
Department(s): School of Engineering

ENGG*6570 Advanced Soft Computing U [0.50]
Neural dynamics and computation from a single neuron to a neural network architecture. Advanced neural networks and applications. Soft computing approaches to uncertainty representation, multi-agents and optimization.
Prerequisite(s): ENGG*4430 or equivalent
Department(s): School of Engineering

X. Collaborative Specializations, International Development Studies

The International Development Studies (IDS) collaborative specialization provides a focal point for graduate teaching and research in the area of international development. The collaborative specialization combines training in a particular discipline with exposure to a broad range of social science perspectives. Faculty expertise encompasses various aspects of development in Asia, Africa, Eastern and Western Europe and the Americas. Students wishing to pursue a Master's or PhD degree with the designation “International Development Studies” must enter the collaborative specialization in International Development through a participating department.

### Departmental or Program Requirements

Students in the collaborative specialization may undertake two optional interdisciplinary courses:

- IDEV*6000 [1.00] Development Theory, Issues and Process
- IDEV*6300 [0.50] Research and Analysis in a Development Context

### Optional IDS Courses

Students in the collaborative specialization may undertake two optional interdisciplinary courses:

- IDEV*6000 [0.50] Regional Context
- IDEV*6500 [0.50] Fieldwork in International Development Studies

### Program Requirements

Students complete International Development Studies core requirements and the requirements of their home department. The following are requirements for select departments; consult the IDS Graduate website for other departments.

### IDS Master's Core Courses*

### Master's Collaborative Specialization

Students wishing to pursue a Master's degree with the designation “International Development Studies” must enter the collaborative specialization in International Development through a participating department.

### Admission Requirements

Students must meet the University's general requirement a four-year Honours degree, or equivalent, from a recognized post-secondary institution with a B- average over the last two years of full-time equivalent study. Note that some departments set their admission requirement higher than B-.

Students must have completed the following:

- One undergraduate course in economics.
- One undergraduate course in a social science discipline
- One course in social science research methods or equivalent.

### Program Requirements

Students complete International Development Studies core requirements and the requirements of their home department. The following are requirements for select departments; consult the IDS Graduate website for other departments.
X. Collaborative Specializations, International Development Studies

Capacity Development and Extension (MSc)
- CDE*6700 [0.50] Foundations of Capacity Building and Extension
- CDE*6260 [0.50] Research Design
- One of:
  - RPD*6380 [0.50] Application of Quantitative Techniques in Rural Planning and Development
  - EDRD*6000 [0.50] Qualitative Analysis in Rural Development

Two additional courses from the following CDE restricted electives group:
- CDE*6290 [0.50] Special Topics in Capacity Building and Extension
- CDE*6311 [0.50] Community Engagement and Public Participation
- CDE*6320 [0.50] Capacity Building for Sustainable Development
- CDE*6330 [0.50] Facilitation and Conflict Management
- CDE*6410 [0.50] Readings in Capacity Building and Extension
- CDE*6420 [0.50] Communication for Social and Environmental Change
- CDE*6690 [0.50] Community Environmental Leadership

One open elective [0.50] (one IDS Master’s Core Course will fulfill this requirement)

A thesis OR
- CDE*6900 [1.00] Major Research Paper

plus two more courses from the restricted electives group (see course list above)

Economics (MA)
- ECON*6000 [0.50] Microeconomic Theory I
- ECON*6020 [0.50] Macroeconomic Theory I
- ECON*6940 [1.00] Research Project

One of:
- ECON*6050 [0.50] Introduction to Econometric Methods
- AND
- ECON*6180 [0.50] Econometric Methods

OR
- ECON*6140 [0.50] Econometrics I

Engineering (MEng in Environmental Engineering or Water Resources Engineering)
Six courses from the list of required graduate courses in Engineering (to be selected in consultation with advisor)

Plus one of:
- ENGG*6900 [1.00] Final Project in Environmental Engineering
- ENGS*6900 [1.00] Final Project in Water Resources Engineering

Engineering (MA in Environmental Engineering or Water Resources Engineering)
Three courses from the list of required graduate courses in Engineering (to be selected in consultation with advisor)

Plus:
- Thesis

English (MA)
- Four English courses and a thesis
- Six English courses
- ENGL*6803 [1.00] Research Project

Environmental Sciences (MSc)
- ENV*6900 [0.50] Research Seminar in Environmental Sciences

Two other courses in consultation with the department.

Plus:
- Thesis

Family Relations and Applied Nutrition (MSc)
Applied Human Nutrition
For all students in the MSc program in the field of Applied Human Nutrition, a minimum of 2.25 graduate credits will be chosen in consultation with the student's advisor and advisory committee including:
- FRAN*6000 [0.50] Quantitative Research Methods
- FRAN*6010 [0.50] Applied Statistics
- FRAN*6020 [0.50] Qualitative Research Methods
- FRAN*6550 [0.25] Research Seminar

One additional [0.5] graduate elective course such as FRAN*6610, FRAN*6510 or another graduate level elective course related to the student’s research specialization. It can be taken within Family Relations and Applied Nutrition or in other academic units of the university.

Students who enter the MSc-AHN program from a non-nutrition undergraduate program will also be required to take those undergraduate and/or graduate courses necessary to meet foundational knowledge in applied human nutrition. In addition, students must complete a research thesis.

Food, Agricultural and Resource Economics (MSc or MFARE)
Thesis based MSc
- FARE*6380 [0.50] Applied Microeconomics for Agricultural Economists
- FARE*6970 [0.50] Applied Quantitative Methods for Agricultural Economists

FARE*6910 [0.50] Applied Policy Analysis I
FARE*6600 [0.50] Food Security and the Economics of Agri-Food Systems in Developing Countries
FARE*6800 [0.00] Seminar in Agricultural Economics

One additional course

Course Work and Major Research Paper MFARE
- FARE*6380 [0.50] Applied Microeconomics for Agricultural Economists
- FARE*6910 [0.50] Applied Policy Analysis I
- FARE*6970 [0.50] Applied Quantitative Methods for Agricultural Economists
- FARE*6100 [0.50] The Methodologies of Economics
- FARE*6600 [0.50] Food Security and the Economics of Agri-Food Systems in Developing Countries
- FARE*6400 [0.50] Advanced Topics in Agricultural Economics
- FARE*6800 [0.00] Seminar in Agricultural Economics
- FARE*6140 [1.00] Major Paper in Food, Agricultural and Resource Economics

One additional course

Course Work MFARE
In order to satisfy the degree requirements of the course work option, students will complete successfully the following courses:
- FARE*6380 [0.50] Applied Microeconomics for Agricultural Economists
- FARE*6910 [0.50] Applied Policy Analysis I
- FARE*6970 [0.50] Applied Quantitative Methods for Agricultural Economists
- FARE*6100 [0.50] The Methodologies of Economics
- FARE*6600 [0.50] Food Security and the Economics of Agri-Food Systems in Developing Countries
- FARE*6800 [0.00] Seminar in Agricultural Economics

along with three additional graduate courses approved by the student’s advisory committee. Students in this option are restricted from taking FARE*6140

Geography (MA or MSc)
- GEOG*6090 [0.50] Geographical Research Methods I
- GEOG*6091 [0.50] Geographical Research Methods II

One other Geography course (which can be taken from the IDS core)
Either a thesis OR
- GEOG*6180 [1.00] Research Project in Geography

plus one other Geography course not taken as part of the IDS core

History (MA)
Three History courses
One of:
- Thesis
- HIST*6400 [1.00] Major Paper

Latin American and Caribbean Studies (MA)
- LACS*6010 [0.50] Latin American Identity & Culture
- LACS*6020 [0.50] Re-Imagining Community in Latin America
- LACS*6030 [0.50] Globalization & Insecurity in the Americas

Plus:
- Thesis
- OR:
  - LACS*6100 [1.00] Research Project
  - One other LACS course

Management (MA)
Degree Requirements
Students are required to take 8 courses (4.0 credits) plus the major research project (1.0 credit).

Core Courses:
- MGMT*6100 [0.50] Evidence Based Management Research
- MGMT*6200 [0.50] Leadership Assessment and Development

Fields:
- Management Research
  - MGMT*6300 [0.50] Business Consulting
  - MGMT*6400 [0.50] Project Management
  - BUS*6800 [0.50] Readings in Leadership I
  - BUS*6810 [0.50] Readings in Leadership II
  - BUS*6820 [0.50] Readings in Management
  - BUS*6840 [0.50] Foundational Theories of Management

- Accounting
  - ACCT*6100 [0.50] Integrated Cases I
  - ACCT*6200 [0.50] Integrated Cases II
  - ACCT*6300 [0.50] Taxation
  - ACCT*6400 [0.50] Performance Management
  - ACCT*6500 [0.50] Assurance
  - ACCT*6600 [0.50] Financial Management

September 2, 2019
X. Collaborative Specializations, International Development Studies

Other courses from the Department of Management with permission from the Graduate Program Coordinator.

**Restricted Electives:**
One quantitative or qualitative methods course (0.5 credits) with permission:

**PhD Collaborative Specialization**

The collaborative specialization in International Development Studies (IDS) in a PhD program provides an opportunity for advanced students to engage with interdisciplinary development theories and to conduct research on international development issues based on approaches of selected academic disciplines. The collaborative specialization in IDS is undertaken jointly with a discipline-based degree. Students enter IDS through a participating department with a PhD program. At present these include Sociology; Plant Agriculture, Philosophy, Political Science; Population Medicine, Geography; Food, Agricultural and Resource Economics; Economics; History; Engineering; Environmental Sciences.

Based on the experience of faculty advisors in key participating departments, the program focuses on issues such as international political economy, food security, environmental dynamics and governance, gender inequality, rural development, long-term economic change, and other interdisciplinary cutting-edge topics in international development.

**Admission Requirements**

To be considered for admission, an applicant must have a recognized Bachelor's degree and a Master's degree in a relevant discipline or related interdisciplinary field. Applicants to the IDS collaborative specialization must meet the specific departmental admission requirements, which vary from one department to another. For information on the admission requirements and application deadlines of your selected department, please contact the relevant department directly.

In addition to the specific departmental admission requirements, applicants are expected to have a strong background in the social sciences a demonstrable track record of experience in the course-based study of development issues, development research and/or development practice and a stated research interest relating to international development.

**Program Requirements**

Students complete requirements for the departmental degree as well as the IDS components which consist of two core courses, including an interdisciplinary course on theories and debates in development and a course on development research and practice. Students must obtain a minimum final grade of 75% in each of the two IDS PhD core courses to remain in the IDS collaborative specialization. While the students have to successfully complete these courses to remain in the IDS collaborative specialization, they do not have to pass a separate qualifying examination in addition to the departmental qualifying exam. Furthermore, the expectation is that the IDS students’ PhD research will bridge two or more disciplines in a way that relates to the field of IDS. The departmental supervisor must have knowledge and understanding of International Development Studies as it relates to the requirements of the IDS collaborative specialization. One of the members on the student’s advisory committee needs to be an appointed IDS affiliated faculty member approved by the IDS Admissions Committee.

For further information regarding course offering, please contact the IDS Graduate Program Assistant.

</thead>
<tbody>
<tr>
<td>IDEV*6200</td>
<td>1.00</td>
</tr>
</tbody>
</table>

This course will examine key issues in development, for example: social justice, poverty and inequality, sustainability, governance and inclusiveness, and how perspectives on these issues have changed over time and differ across disciplinary perspectives. The course will be writing-intensive and focus on the development of skills in oral communication of development issues.

**Department(s):** Dean's Office, College of Social and Applied Human Sciences
### IDEV*6300 Research and Analysis in a Development Context S [0.50]

Students will explore alternative approaches to development research and analysis across documentary, qualitative and quantitative methods and the ethical issues associated with research in a development context. The course involves guided readings and seminar based discussions related to development research. There will be emphasis on written and oral communication of development research and analysis to diverse audiences. The course will be taught over a two-week period at the start of the summer semester. Subsequently, students will reflect on their own positionality and the development context of their research of practicum through the remainder of the Summer semester and while engaged in this activity.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

### IDEV*6500 Fieldwork in International Development Studies U [0.50]

This course recognizes an intensive commitment to research in an archival repository, 'in the field' or at an appropriate development institution in Canada or abroad. The course normally is directed by the student's advisor in consultation with the advisory committee.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

### IDEV*6800 Theories and Debates in Development F [0.50]

This course examines recent approaches in development theory explaining international inequality, poverty and long-term change. It also investigates selected current debates in international development – such as food security, trade, good governance, sustainability or gender – from various discipline-based and interdisciplinary perspectives, and analyzes selected regional experiences of development.

*Restriction(s):* Restricted to students in doctoral IDEV collaborative specializations. A minimum final grade of 75% is required to remain in the IDEV collaborative specialization.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

### IDEV*6850 Development Research and Practice W [0.50]

In this course students establish the linkages between their doctoral research topic and the wider field of development studies and practice. The course will examine development policies and projects, ethical issues related to (cross-cultural) development research, and relationships between research and development practice.

*Restriction(s):* Restricted to students in doctoral IDEV collaborative specializations. A minimum final grade of 75% is required to remain in the IDEV collaborative specialization.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences
Neuroscience

The Neuroscience collaborative specialization provides an opportunity for MSc/MBS/PhD students engaged in research in the rapidly expanding field of neuroscience, to combine their departmental degree program with multidisciplinary exposure to the field of neuroscience. This unique combination of multidisciplinary studies provides students with the best possible foundation for academic careers in neuroscience and related areas. The collaborative specialization includes participation from core faculty in the following departments: Animal Biosciences, Biomedical Sciences, Clinical Studies, Human Health and Nutritional Sciences, Integrative Biology, Molecular and Cellular Biology, Pathobiology, Population Medicine and Psychology. Students wishing to pursue a Master's or PhD degree with the designation Neuroscience must enter the collaborative specialization in Neuroscience through a participating department.

As a practical matter, any faculty member who is approved by the Board of Graduate Studies for graduate faculty status and is a member of a participating unit within the collaborative specialization will be able to advise a master’s or doctoral student.

Associated Graduate Faculty

Geoffrey Power
Contractually Limited Faculty, Human Health and Nutritional Sciences

MSc/MBS Collaborative Specialization

The MSc/MBS collaborative specialization in Neuroscience enables students engaged in neuroscience research to combine their departmental degree program with a multidisciplinary specialization in the field of neuroscience.

Admission Requirements

MSc/MBS students in the collaborative specialization in Neuroscience must meet the admission requirements of the participating department in which they are enrolled. The application process has two stages: first, application to the primary program of interest, identifying interest in the collaborative specialization as a secondary focus. If the student is admitted to the primary program, the second stage is then admission to the collaborative specialization.

Program Requirements

In addition to coursework in their respective departments, students in the MSc/MBS collaborative specialization must complete NEUR*6000 as well as registering for NEUR*6100 each term that they are in the collaborative specialization. In NEUR*6100, students and faculty will meet once a month to discuss issues/hear talks/present research in neuroscience.

PhD Collaborative Specialization

The PhD collaborative specialization in Neuroscience enables students engaged in neuroscience dissertation research to combine their departmental degree program with a multidisciplinary specialization in the field of neuroscience.

Admission Requirements

PhD students in the collaborative specialization in Neuroscience must meet the PhD admission requirements for the participating department in which they are enrolled.

Program Requirements

If a student enters the PhD collaborative specialization in Neuroscience at the doctoral level, in addition, to coursework in their respective departments, students must complete NEUR*6000, or show evidence of course equivalence in prior training. Students must be engaged in neuroscience dissertation research. During each term of their program of studies, doctoral students must enroll in NEUR*6100. The seminar will meet monthly. Students must take their qualifying exams within five semesters of entering the program, as required by University graduate policies. One member on the qualifying exam committee must be a core member of the collaborative specialization in Neuroscience outside the student’s home department or a faculty member from another university approved by graduate studies. As well one member of the student’s advisory committee must be a core member of the neuroscience collaborative specialization outside the student’s home department or a faculty member from another university approved by graduate studies.

The collaborative specialization is the focal point for graduate teaching and research in toxicology. Students wishing to undertake graduate studies at the masters or doctoral level with emphasis on toxicology will be admitted by a participating department and will register in both the participating department and in the collaborative specialization. The participating academic units include the Departments of Animal Biosciences, Biomedical Sciences, Chemistry, Food Safety and Quality Assurance, Human Health and Nutritional Sciences, Integrative Biology, Molecular and Cellular Biology, Pathobiology, Plant Agriculture and the School of Environmental Sciences.

**Masters Collaborative Specialization**

**Admission Requirements**
Masters students in the collaborative specialization in toxicology must meet the masters admission requirements of the participating department in which they are enrolled.

**Program Requirements**
Masters students in the collaborative specialization in toxicology must complete a minimum of 1.50 graduate credits, which must include the toxicology courses TOX*6000 and TOX*6200 and courses required by the participating department in which they are enrolled. It is expected that students’ research (MRP or Thesis) or at least 30% of the courses in a course-based program be in the area of toxicology.

**Doctoral Collaborative Specialization**

**Admission Requirements**
Doctoral students in the collaborative specialization in toxicology must meet the doctoral admission requirements of the participating department in which they are enrolled.

**Program Requirements**
Doctoral students in the collaborative specialization in toxicology must meet all the academic requirements specified by the participating department in which they are enrolled. They must also complete the courses TOX*6000 and TOX*6200 if they, or equivalent courses, were not taken as part of a masters program. It is expected that the students' doctoral research be in the area of toxicology.
