2018-2019 Graduate Calendar

The information published in this Graduate Calendar outlines the rules, regulations, curricula, programs and fees for the 2018-2019 academic year, including the Summer Semester 2018, Fall Semester 2018 and the Winter Semester 2019.

For your convenience the Graduate Calendar is available in PDF format.

If you wish to link to the Graduate Calendar please refer to the Linking Guidelines.

Disclaimer
The Office of Graduate Studies has attempted to ensure the accuracy of this on-line Graduate Calendar. However, the publication of information in this document does not bind the university to the provision of courses, programs, schedules of studies, fees, or facilities as listed herein.

Limitations
The University of Guelph reserves the right to change without notice any information contained in this calendar, including any rule or regulation pertaining to the standards for admission to, the requirements for the continuation of study in, and the requirements for the granting of degrees or diplomas in any or all of its programs.

The university will not be liable for any interruption in, or cancellation of, any academic activities as set forth in this calendar and related information where such interruption is caused by fire, strike, lock-out, inability to procure materials or trades, restrictive laws or governmental regulations, actions taken by the faculty, staff or students of the university or by others, civil unrest or disobedience, Public Health Emergencies, or any other cause of any kind beyond the reasonable control of the university.

The University of Guelph reaffirms section 1 of the Ontario Human Rights Code, 1981, which prohibits discrimination on the grounds of race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, sex, sexual orientation, handicap, age, marital status or family status.

The university encourages applications from women, aboriginal peoples, visible minorities, persons with disabilities, and members of other under-represented groups.
Introduction

Collection, Use and Disclosure of Personal Information

Personal information is collected under the authority of the University of Guelph Act (1964), and in accordance with Ontario's Freedom of Information and Protection of Privacy Act (FIPPA) http://www.e-laws.gov.on.ca/DLB_Laws/Statutes/English/90f31_e.htm. This information is used by University officials in order to carry out their authorized academic and administrative responsibilities and also to establish a relationship for alumni and development purposes. Certain personal information is disclosed to external agencies, including the Ontario Universities Application Centre, the Ministry of Advanced Education and Skills Development, and Statistics Canada, for statistical and planning purposes, and is disclosed to other individuals or organizations in accordance with the Office of Registrarial Services Departmental Policy on the Release of Student Information. For details on the use and disclosure of this information call the Office of Registrarial Services at the University at (519) 824-4120 or see https://www.uoguelph.ca/registrar/.

Statistics Canada - Notification of Disclosure

For further information, please see Statistics Canada's web site at http://www.statcan.gc.ca and Section XIV Statistics Canada.

Address for University Communication

Depending on the nature and timing of the communication, the University may use one of these addresses to communicate with students. Students are, therefore, responsible for checking all of the following on a regular basis:

Email Address
The University issued email address is considered an official means of communication with the student and will be used for correspondence from the University. Students are responsible for monitoring their University-issued email account regularly.

Home Address
Students are responsible for maintaining a current mailing address with the University. Address changes can be made, in writing, through Registrarial Services.

Name Changes

The University of Guelph is committed to the integrity of its student records, therefore, each student is required to provide either on application for admission or on personal data forms required for registration, his/her complete, legal name. Any requests to change a name, by means of alteration, deletion, substitution or addition, must be accompanied by appropriate supporting documentation.

Student Confidentiality and Release of Student Information Policy Excerpt

The University undertakes to protect the privacy of each student and the confidentiality of his or her record. To this end the University shall refuse to disclose personal information to any person other than the individual to whom the information relates where disclosure would constitute an unjustified invasion of the personal privacy of that person or of any other individual. All members of the University community must respect the confidential nature of the student information which they acquire in the course of their work. Complete policy at https://www.uoguelph.ca/secretariat/office-services/university-secretariat/university-policies.

Physics

The Departments of Physics at the Universities of Guelph and Waterloo offer a joint program leading to MSc and PhD degrees in the following fields:

- Astrophysics and Gravitation
- Atomic, Molecular and Optical Physics
- Biophysics
- Chemical Physics
- Condensed Matter and Material Physics
- Industrial and Applied Physics
- Subatomic Physics
- Quantum Computing

The Guelph-Waterloo Physics Institute consists of members from both university departments and is administered by a joint co-ordinating committee. Students interested in graduate work in physics at either university should consult the application requirements and the on-line application procedures available from the web-site http://gwp.on.ca. Students are ultimately registered at the university at which their advisor is located. A student comes under the general regulations of the university at which he or she is registered, and the degree is granted by that university.

Administrative Staff

Graduate teaching and research in physics at the University of Guelph are operated through Graduate Studies in Physics, University of Guelph, University of Waterloo.

Director of the Institute
Melanie Campbell (Waterloo - (519) 888-4567, Ext. 36273)
melanie.campbell@uwatertoo.ca

Associate Director of the Institute
Robert Wickham (Guelph, 448 MacNaughton, Ext. 53704)
rwickham@uoguelph.ca

Assistant to the Director
Kiley Rider (Waterloo (519) 888-4567, Ext. 37598, Ext. Guelph (519) 824-4120 Ext. 52263)
gwp@uwatertoo.ca

Chair
Paul Garrett (Guelph, 220 MacNaughton, Ext. 52192)
garrettpt@uoguelph.ca

Graduate Program Coordinator
Robert Wickham (Guelph, 448 MacNaughton, Ext. 53704)
rwickham@uoguelph.ca

Associate Graduate Program Coordinator
Xiaorong Qin (449 MacNaughton, Ext. 53675)
xqin@uoguelph.ca

Graduate Program Assistant
Reggi Vallillee (209 MacNaughton, Ext. 52262)
rvaliile@uoguelph.ca

Graduate Faculty

Leonid S. Brown
MSc, PhD Moscow State - Professor

John R. Dutcher
BSc Dalhousie, MSc, PhD British Columbia, PhD Simon Fraser - Professor and Canada Research Chair in Soft Matter & Biological Physics and Director Nanoscience

Paul E. Garrett
BSc Queen's, MSc, PhD McMaster - Professor, Chair

Ralf Gellert
Dipl Phys, PhD Darmstadt - Associate Professor

Alexandros Gezerlis
Dipl National Technical University Athens, PhD Urbana-Champaign - Assistant Professor

De-Tong Jiang
BSc Jilin, PhD Simon Fraser - Associate Professor

Stefan W. Kyeia
BSc McGill, MS Pennsylvania; PhD Iowa - Associate Professor

Vladimir Ladihzansky
BS Moscow Institute of Physics and Technology; MS, PhD Weizmann Institute of Science (Rehovot, Israel) - Professor and Canada Research Chair in Biophysics Tier II

Michael Massa
BSc Guelph, MSc, PhD McMaster - Assistant Professor

Dennis Mücher
BSc University of Cologne, Germany, Ph.D University of Cologne, Germany - Assistant Professor

Elisabeth J. Nicol
BSc Mount Allison, MSc, PhD McMaster - Professor

Joanne M. O’Meara
BSc, PhD McMaster - Professor

Eric Poisson
BSc Laval, MSc, PhD Alberta - Professor

Xiao-Rong Qin
BSc, MSc Tsinghua (Beijing), PhD Simon Fraser - Associate Professor

Carl E. Svensson
BSc, PhD McMaster - Professor

Robert Wickham
BSc Toronto, PhD Chicago - Associate Professor and Graduate Coordinator, Associate Chair (Graduate), Associate Director Graduate Studies in Physics, University of Guelph, University of Waterloo

Martin Williams
PhD Imperial College, London - Associate Professor and Undergraduate Coordinator/Academic Counsellor, and Associate Chair (Undergraduate)

Huan Yang
BSc California Institute of Technology, PhD California Institute of Technology - Assistant Professor

Associated Graduate Faculty

Liliana Caballero
BSc Universidad Nacional de Colombia, PhD Indiana University - Contractually Limited Faculty, Department of Physics, University of Guelph

Graduate Faculty from the University of Waterloo

Nasser Abukhaled
BSc Carnegie Mellon, MChE Carnegie Mellon, PhD McGill University - Associate Professor

Niayesh Afshordi
BA Iran, BSc Providence, PhD Princeton - Associate Professor

Michal Bajcsy
BS Harvard, PhD Harvard - Assistant Professor

Michael Balogh
BSc McMaster, PhD Victoria - Professor and Associate Chair of Department of Physics and Astronomy

Dayan Ban
BSc, MSc University of Science and Technology China, PhD University of Toronto - Professor

Jonathan Baugh
BS Tennessee, PhD North Carolina - Associate Professor

Kostadinka Bizheva
BS, MS Plovdiv, MS, PhD Tufts - Associate Professor

Avery Broderick
BS Stony Brook, PhD CalTech - Associate Professor

Raffi Budakian
BS UCLA, MS UCLA, PhD UCLA - Professor

Anton Burkov
BS, MS Plovdiv, MS, PhD Tufts - Associate Professor and Associate Graduate Officer

Melanie C. Campbell
BSc Toronto, MSc Waterloo, PhD Australian National, FAAO - Professor and Director Graduate Studies in Physics, University of Waterloo, University of Guelph

Z.Y. 'Jeff' Chen
BS Fuden, PhD Maryland - Professor and University Research Chair

Kyung Soo Choi
BS Stony Brook University, PhD CalTech - Assistant Professor

David Cory
BA, PhD Case Western Reserve - Professor

Joseph Emerson
MSc, PhD British Columbia - Associate Professor

Michael Fich
BSc Waterloo, MSc, PhD California - Professor

James Forrest
BSC Simon Fraser, MSc, PhD Guelph - Professor, Faculty of Science and University Research Chair

Michel Gingras
BSc, MSc Laval, PhD British Columbia - Professor and Canada Research Chair in Condensed Matter Theory & Statistical Mechanics

Rae-Youn Ha
BSc, MS Korea, PhD Maryland - Professor

David G. Hawthorn
BSc McMaster, PhD Toronto - Associate Professor

Thorsten Hesjedal
BSc Universitat Stuttgart, MSc Eberhard-Karls-Universitäta Tuebingen, PhD Humboldt Universitäet - Associate Professor
Robert Hill  
BSc, PhD Bristol - Associate Professor and Associate Dean of Science, Graduate Studies

Michael Hudson  
BSc Montreal, PhD Cambridge - Professor

Rajibul Islam  
BSc Jadavpur University, MSc Tata Institute of Fundamental Research, PhD University of Maryland - Assistant Professor

Thomas Jennewein  
MSc Innsbruck, PhD Vienna - Associate Professor

Achim Kempf  
BSc Heidelberg, PhD Munich - Professor and Canada Research Chair in the Physics of Information

Na Young Kim  
BS Seoul National University, PhD Stanford University - Associate Professor

Jan Kycia  
BSc McGill, MSc Pennsylvania, PhD Northwestern - Professor

Raymond Laflamme  
BSc Laval, PhD Cambridge - Professor and Canada Research Chair

Vasudevan Lakshminarayan  
BSc, MSc University of Madras, PhD UC Berkeley - Professor

Zoya Leonenko  
MSc, PhD Novosibirsk - Professor

Tong K. Leung  
BSc, PhD British Columbia - Associate Professor

Qing-Bin Lu  
BSc, MSc Fuzhou, China, PhD Newcastle - Professor

Adrian Lupascu  
BSc, MSc Bucharest (Romania), PhD Netherlands - Associate Professor

Norbert Lütkenhaus  
MSc München, PhD Scotland, Habilitation Germany - Professor

Robert B. Mann  
BSc McMaster, MSc, PhD Toronto - Professor

Matteo Mariantoni  
MSc Chalmers University of Technology, PhD Technical University of Munich - Assistant Professor

James Martin  
BSc, MSc, PhD Waterloo - Associate Professor

Eduardo Martin-Martinez  
BSc, MSc, PhD Universidad Complutense de Madrid - Assistant Professor

Mark Matsen  
BSc Simon Fraser, MA, PhD Guelph - Professor

Brian McNamara  
BS Villanova, MA, PhD Virginia - Professor and Department Chair

Roger Melko  
BSc, MSc Waterloo, MA, PhD UC Santa Barbara - Associate Professor and Canada Research Chair in Computational Many-Body Physics

Guo-Xing Miao  
BSc Shandong University, PhD Brown University - Assistant Professor

Zoran Miskovic  
PhD University of Belgrade - Professor

Ruxandra Moraru  
- Associate Professor

Michele Mosca  
BMath Waterloo, MSc, DPhil Oxford - Professor

Christine Muschik  
BSc, MSc, PhD Ludwig-Maximillians-Universität - Assistant Professor

Linda F. Nazar  
BSc British Columbia, PhD Toronto - Professor

Will Percival  
BSc, PhD Oxford - Assistant Professor

Kevin Resch  
BSc Queen's, MSc, PhD Toronto - Professor

Pierre-Nicholas Roy  
BSc McGill, MSc, PhD Université de Montréal - Professor

Joseph Sanderson  
BSc, PhD London - Associate Professor

Crystal Senko  
BSc Duke University, PhD University of Maryland - Assistant Professor

Donna Strickland  
BEng McMaster, PhD Rochester - Associate Professor

James Taylor  
BSc, MSc Toronto, PhD Victoria - Associate Professor

Russell Thompson  
BSc Ottawa, MSc Regina, PhD Western Ontario - Associate Professor

Adam Wei Tsen  
BS UC Berkeley, PhD Cornell University - Assistant Professor

Zbigniew Wasilewski  
MSc University of Warsaw, PhD Institute of Physics, Polish Academy of Sciences - Professor

Christopher Wilson  
BS MIT, PhD Yale University - Associate Professor

David Yevick  
AB Harvard, MA, PhD Princeton, Docent Lund - Professor

MSc Program

The MSc programs is offered in the following fields: 1) astrophysics and gravitation; 2) atomic, molecular and optical physics; 3) biophysics; 4) chemical physics; 5) condensed matter and material physics; 6) industrial and applied physics; 7) subatomic physics; and 8) quantum computing.

Admission Requirements

Application for admission should be made as early as possible using on-line application methods described on the web-site https://uwaterloo.ca/waterloo-graduate-studies/student-resources/how-apply. Successful applicants are encouraged to start their graduate studies in May or September, but a January starting date is possible. Program offices should be consulted for admission deadlines. The admission requirements are as follows:

- An honours BSc degree in physics (or equivalent) with at least a B standing (75%) from a recognized university.
- Three letters of reference, two of which normally are from academic sources.
- Proof of competency in English (for applicants whose prior education was in a language other than English). See the University regulations on English Language Proficiency Certification.
- GRE Physics Subject Test score for all applicants who have completed their post-secondary education outside of Canada.

Successful applicants are encouraged to start their graduate studies in May or September, but a January starting date is possible. Academic transcripts and other supporting documents should be forwarded as soon as they become available. Admission to the program cannot be granted until all requirements have been met and all documents submitted.

Applications are considered by the Admissions Committee. It should be noted that students will normally be admitted only if an advisor can be found to oversee their research. Since there are a limited number of openings each year, applicants are advised to state alternative areas of research on the preference form supplied (see web-site http://grp.on.ca/).

Degree Requirements

Students enrol in one of two study options: 1) thesis, or 2) course work and major research project.

Thesis

Four one-term courses (at least 2.0 course credits) acceptable for graduate credit and a thesis based on original research are required. The subject of research must be approved by the candidate's advisory committee and the thesis must be read and approved by the advisory committee. One of the four courses may be an undergraduate course approved by the student's advisory committee and the Graduate Program Coordinator. If it is a physics course, it must be at the fourth-year level.

For all students one of the courses must include at least one of Quantum Mechanics 1 (PHYS*7010), Introduction to Quantum Field Theory (PHYS*7030), Statistical Physics 1 (PHYS*7040), Electromagnetic Theory (PHYS*7060), and Fundamentals of Astrophysics (PHYS*7810). An MSc student in this program who shows a particular aptitude for research and has a superior record in fourth-year undergraduate and three one-term graduate courses may be permitted, upon recommendation of the advisor and with the approval of the co-ordinating committee, to transfer into the PhD program without completing an MSc thesis.

An average of at least 70% must be obtained in the required courses. A minimum grade of 65% is required for a pass in each course. No more than two courses, of the first four taken, can have a grade of less than 70%. If a student does not meet these minimum grade requirements, or receives a failing grade in any course, he/she may be required to withdraw from the program.
Course Work and Major Research Project (MRP)

Eight one-term courses (0.50 unit weight) acceptable for graduate credit, including a project course summarized in a report, are required. The project must be approved by the candidate's advisor and the report read and approved by the advisor and one other faculty member. [Exception: biophysics students taking the course-based MSc option are required to take only one of the core courses PHYS*7010, PHYS*7030, PHYS*7040, PHYS*7060, PHYS*7870, and PHYS*7810]. Two of the courses may be undergraduate courses approved by the advisor and the Graduate Advisory Committee. If they are Physics courses, they must be at the fourth year level. This program is recommended for those planning careers requiring a broad non-specialized knowledge of physics (for example, high school teaching).

PhD Program

The PhD program is research-based and offered in the fields of: 1) astrophysics and gravitation; 2) atomic, molecular and optical physics; 3) biophysics; 4) chemical physics; 5) condensed matter and material physics; 6) industrial and applied physics; 7) subatomic physics; and 8) quantum computing.

Admission Requirements

There are three pathways for admission to the PhD program:

1. An MSc degree in physics from an approved university or college with at least a B standing (75%) is normally required for entrance into the PhD program. Other requirements are the same as those described above for the MSc program (see web-site http://gwp.on.ca/).
2. Students with an undergraduate degree in Physics may apply for admission directly to the PhD program. Successful applicants will have an outstanding academic record, breadth of knowledge in physics, previous research experience, and strong letters of recommendation.
3. Students wishing to be considered for transfer to a PhD program prior to completion of the MSc program must request the transfer up to 3 full-time terms after initial registration and have an excellent academic record as well as a strong aptitude for research.

Degree Requirements

The core courses for the program are Quantum Mechanics 1 PHYS*7010, Introduction to Quantum Field Theory PHYS*7030, Statistical Physics 1 PHYS*7040, Electromagnetic Theory PHYS*7060, Introduction to Quantum Information Processing PHYS*7670, and Fundamentals of Astrophysics PHYS*7810. By the end of the first year of the program, three of the core courses, including one of Quantum Mechanics 1 PHYS*7010, Statistical Physics 1 PHYS*7040, and Electromagnetic Theory PHYS*7060 by the completion of the first year of the PhD program.)

Two-one-term courses not including any already taken for MSc credit are required; courses taken during the MSc program and in excess of those required will, however, be allowed for PhD credit. The extra courses must be identified prior to admission. One of the required courses may be an undergraduate course outside the student's main field of study and must be approved by the student's advisor committee and the Graduate Program Coordinator. No undergraduate course in physics may be taken for credit.

An average of at least 70% must be obtained in the required courses. A minimum grade of 65% is required in the course required of each course. No more than two courses, of the first four taken, can have a grade of less than 70%. If a student does not meet these minimum grade requirements, or receives a failing grade in any course, he/she may be required to withdraw from the program.

Students who transfer to the PhD, or who enter the PhD directly, will need to complete the course work requirements of both the MSc and PhD degrees, a total of six one-term graduate courses. Three of the core courses including one of Physics 7010, Physics 7040 or Physics 7060 will have been taken by the end of the first year of the PhD program.

Interdepartmental Programs

Biophysics Interdepartmental Group

The Department of Physics participates in the MSc/PhD programs in biophysics. Please consult the Biophysics listing for a detailed description of the graduate programs offered by the Biophysics Interdepartmental Group.

Courses

* Courses offered annually. Other courses are offered on an alternate year basis and as requested.

Perimeter Scholars' Institute Courses

PHYS*6010 PSI Quantum Field Theory I U [0.50]
Canonical quantization of fields, perturbation theory, derivation of Feynman diagrams, applications in particle and condensed matter theory, renormalization in phi^4.  
Department(s): Department of Physics

PHYS*6020 PSI Statistical Physics U [0.50]
A brief review of ensembles and quantum gases, Ising model, landau theory of phase transitions, order parameters, topology, classical solutions.  
Department(s): Department of Physics

PHYS*6030 PSI Quantum Field Theory II U [0.50]
Feynman Path Integral, abelian and nonabelian gauge theories and their quantization, spontaneous symmetry breaking, nonperturbative techniques: lattice field theory, Wilsonian renormalization.  
Department(s): Department of Physics

PHYS*6040 PSI Relativity U [0.50]
Special relativity, foundations of general relativity, Riemannian geometry, Einstein's equations, FRW and Schwarzschild geometries and their properties.  
Department(s): Department of Physics

PHYS*6050 PSI Quantum Theory U [0.50]
Department(s): Department of Physics

PHYS*6060 PSI Information and Data Analysis U [0.50]
Probability, entropy, Bayesian inference and information theory. Maximum likelihood methods, common probability distributions, applications to real data including Monte Carlo methods.  
Department(s): Department of Physics

PHYS*6070 PSI Dynamical Systems U [0.50]
Maps, flows, stability, fixed points, attractors, chaos, bifurcations, ergodicity, approach to chaos. Hamiltonian systems, Liouville, measure, Poincare theorem, integrable systems with examples.  
Department(s): Department of Physics

PHYS*6080 PSI Computation U [0.50]
Common algorithms for ode and pde solving, with numerical analysis. Common tasks in linear algebra. Focus on how to write a good code, test it, and obtain a reliable result. Parallel programming.  
Department(s): Department of Physics

PHYS*6210 PSI Cosmology U [0.25]
FRW metric, Hubble expansion, dark energy, dark matter, CMB, Thermodynamic history of early universe. Growth of perturbations, CDM model of structure formation and comparison to observations, cosmic microwave background anisotropies, inlation and observational tests.  
Department(s): Department of Physics

PHYS*6220 PSI Standard Model U [0.25]
Application of Yang-Mills theory to particle physics, QCD and its tests in the perturbative regime, theory of weak interactions, precision tests of electroweak theory, CKM matrix and flavour physics, open questions.  
Department(s): Department of Physics

PHYS*6230 PSI String Theory U [0.25]
Superstring spectrum in 10d Minkowski, as well as simple toroidal and orbifold compactifications. T-duality, D-branes, tree amplitudes. Construct some simple unified models of particle physics. Motivate the 10- dimensional supergravities. Simple supergravity solutions and use these to explore some aspects of Ads/CFT duality.  
Department(s): Department of Physics

PHYS*6240 PSI Mathematical Physics Topics U [0.25]
Differential forms, de Rham cohomology, differential topology and characteristic classes, monopoles and instantons, Kahler manifolds, Dirac equations, zero modes and index theorems.  
Department(s): Department of Physics

PHYS*6350 PSI Quantum Information Review U [0.25]
Review of selected topics in Quantum Information.  
Department(s): Department of Physics

PHYS*6360 PSI Gravitational Physics Review U [0.25]
Review of selected topics on Gravitational Physics.  
Department(s): Department of Physics

PHYS*6770 PSI Condensed Matter Theory U [0.25]
Review of selected topics in Condensed Matter Theory.  
Department(s): Department of Physics
PHYS*6380 PSI Quantum Gravity U [0.25]  
Review of selected topics in Quantum Gravity.  
Department(s): Department of Physics

PHYS*6390 PSI Foundations of Quantum Theory U [0.25]  
Review of selected topics in Foundations of Quantum Theory.  
Department(s): Department of Physics

PHYS*6410 PSI Explorations in Quantum Information U [0.25]  
Review of selected topics in Quantum Information.  
Department(s): Department of Physics

PHYS*6420 PSI Explorations in Gravitational Physics U [0.25]  
Review of selected topics in Gravitational Physics.  
Department(s): Department of Physics

PHYS*6430 PSI Exploration in Condensed Matter Theory U [0.25]  
Review of selected topics in Condensed Matter Theory.  
Department(s): Department of Physics

PHYS*6440 PSI Exploration in Quantum Gravity U [0.25]  
Review of selected topics in Quantum Gravity.  
Department(s): Department of Physics

PHYS*6450 PSI Explorations in Foundations of Quantum Theory U [0.25]  
Review of selected topics in Foundations of Quantum Theory.  
Department(s): Department of Physics

PHYS*6460 PSI Explorations in Particle Physics U [0.25]  
Review of selected topics in Particle Physics.  
Department(s): Department of Physics

PHYS*6470 PSI Explorations in String Theory U [0.25]  
Review of selected topics in String Theory.  
Department(s): Department of Physics

PHYS*6480 PSI Explorations in Complex Systems U [0.25]  
Review of selected topics in Complex Systems.  
Department(s): Department of Physics

PHYS*6490 PSI Explorations in Cosmology U [0.25]  
Review of selected topics in Cosmology.  
Department(s): Department of Physics

Basic Group

PHYS*7010 Quantum Mechanics I * U [0.50]  
Department(s): Department of Physics

PHYS*7020 Quantum Mechanics II U [0.50]  
Concepts of relativistic quantum mechanics, elementary quantum field theory, and Feynman diagrams. Application to many-particle systems.  
Prerequisite(s): PHYS*7010 or equivalent  
Department(s): Department of Physics

PHYS*7040 Statistical Physics I* U [0.50]  
Statistical basis of thermodynamics; microcanonical, canonical and grand canonical ensembles; quantum statistical mechanics, theory of the density matrix; fluctuations, noise, irreversible thermodynamics; transport theory; application to gases, liquids, solids.  
Department(s): Department of Physics

PHYS*7050 Statistical Physics II U [0.50]  
Phase transitions. Fluctuation phenomena. Kubo's theory of time correlation functions for transport and spectral properties; applications selected from a variety of topics including linearized hydrodynamics of normal and superfluids, molecular liquids, liquid crystals, surface phenomena, theory of the dielectric constant, etc.  
Prerequisite(s): PHYS*7040 or equivalent  
Department(s): Department of Physics

PHYS*7060 Electromagnetic Theory * U [0.50]  
Solutions to Maxwell's equations; radiation theory, normal modes; multipole expansion; Kirchhoff's diffraction theory; radiating point charge; optical theorem. Special relativity; transformation laws for the electromagnetic field; line broadening. Dispersion; Kramers-Kronig relations. Magnetohydrodynamics and plasmas.  
Department(s): Department of Physics

PHYS*7080 Applications of Group Theory U [0.50]  
Introduction to group theory; symmetry, the group concept, representation theory, character theory. Applications to molecular vibrations, the solid state, quantum mechanics and crystal field theory.  
Department(s): Department of Physics

PHYS*7670 Introduction to Quantum Information Processing F [0.50]  
Department(s): Department of Physics

Subatomic and Nuclear

PHYS*7030 Quantum Field Theory U [0.50]  
Prerequisite(s): PHYS*7010 or equivalent.  
Department(s): Department of Physics

PHYS*7090 Green's Function Method U [0.50]  
Department(s): Department of Physics

PHYS*7150 Nuclear Physics U [0.50]  
Static properties of nuclei; alpha, beta, gamma decay; two-body systems; nuclear forces; nuclear reactions; single-particle models for spherical and deformed nuclei; shell, collective, interacting boson models.  
Department(s): Department of Physics

PHYS*7160 Special Topics in Subatomic and Nuclear Physics U [0.50]  
Restriction(s): Instructor consent required.  
Department(s): Department of Physics

PHYS*7170 Intermediate and High Energy Physics U [0.50]  
Strong, electromagnetic and weak interactions. Isospin, strangeness, conservation laws and symmetry principles. Leptons, hadrons, quarks and their classification, formation, interactions and decay.  
Department(s): Department of Physics

PHYS*7180 Special Topics in Subatomic and Nuclear Physics U [0.25]  
Restriction(s): Instructor consent required.  
Department(s): Department of Physics

Astronomy and Astrophysics

PHYS*7810 Fundamentals of Astrophysics U [0.50]  
The fundamental astronomical data: techniques to obtain it and the shortcomings present. The classification systems. Wide- and narrow-band photometric systems. The intrinsic properties of stars: colours, luminosities, masses, radii, temperatures. Variable stars. Distance indicators. Interstellar reddening. Related topics.  
Department(s): Department of Physics

PHYS*7840 Advanced General Relativity W [0.50]  
Department(s): Department of Physics

PHYS*7850 Quantum Field Theory for Cosmology U [0.50]  
Introduction to scalar field theory and its canonical quantization in flat and curved spacetimes. The flat space effects of Casimir and Unruh. Quantum fluctuations of scalar fields and of the metric on curved space-times and application to inflationary cosmology. Hawking radiation.  
Prerequisite(s): PHYS*7010  
Department(s): Department of Physics

PHYS*7860 General Relativity for Cosmology U [0.50]  
Department(s): Department of Physics

Department(s): Department of Physics

<td>PHYS*7520 Molecular Biophysics</td>
<td>[0.50]</td>
<td>Physical methods of determining macromolecular structure: energetics, intramolecular and intermolecular forces, with application to lamellar structures, information storage, DNA and RNA, recognition and rejection of foreign molecules. Offered in conjunction with PHYS*4540. Extra work is required of graduate students.</td>
