University of Guelph 2007

The information published in this Undergraduate Calendar outlines the rules, regulations, curricula, programs and fees for the 2007-2008 academic year, including the Summer Semester 2007, the Fall Semester 2007 and the Winter Semester 2008.

The University reserves the right to change without notice any information contained in this calendar, including any rule or regulation pertaining to the standards for admission to, the requirements for the continuation of study in, and the requirements for the granting of degrees or diplomas in any or all of its programs. The publication of information in this calendar does not bind the University to the provision of courses, programs, schedules of studies, or facilities as listed herein.

The University will not be liable for any interruption in, or cancellation of, any academic activities as set forth in this calendar and related information where such interruption is caused by fire, strike, lock-out, inability to procure materials or trades, restrictive laws or governmental regulations, actions taken by faculty, staff or students of the University or by others, civil unrest or disobedience, or any other cause of any kind beyond the reasonable control of the University.

In the event of a discrepancy between a print version (downloaded) and the Web version, the Web version will apply.

Introduction

Collection, Use and Disclosure of Personal Information

Personal information is collected under the authority of the University of Guelph Act (1964), and in accordance with Ontario's Freedom of Information and Protection of Privacy Act (FIPPA) http://www.e-laws.gov.on.ca/DBLaws/Statutes/English/90f31_e.htm. This information is used by University officials in order to carry out their authorized academic and administrative responsibilities and also to establish a relationship for alumni and development purposes. Certain personal information is disclosed to external agencies, including the Ontario Universities Application Centre, the Ministry of Training, Colleges and Universities, and Statistics Canada, for statistical and planning purposes, and is disclosed to other individuals or organizations in accordance with the Office of Registrarial Services Departmental Policy on the Release of Student Information. For details on the use and disclosure of this information call the Office of Registrarial Services at the University at (519) 824-4120 or see <http://www.uoguelph.ca/registrar/registrar/index.cfm?index>.

Statistics Canada - Notification of Disclosure

For further information, please see Statistics Canada's web site at <http://www.statcan.ca> and Section XIV Statistics Canada.

Address for University Communication

Depending on the nature and timing of the communication, the University may use one of these addresses to communicate with students. Students are, therefore, responsible for checking all of the following on a regular basis:

Email Address

The University issued email address is considered an official means of communication with the student and will be used for correspondence from the University. Students are responsible for monitoring their University-issued email account regularly. See Section I--Statement of Students' Academic Responsibilities for more information.

Home Address

Students are responsible for maintaining a current mailing address with the University. Address changes can be made, in writing, through Undergraduate Program Services.

Name Changes

The University of Guelph is committed to the integrity of its student records, therefore, each student is required to provide either on application for admission or on personal data forms required for registration, his/her complete, legal name. Any requests to change a name, by means of alteration, deletion, substitution or addition, must be accompanied by appropriate supporting documentation.

Student Confidentiality and Release of Student Information Policy Excerpt

The University undertakes to protect the privacy of each student and the confidentiality of his or her record. To this end the University shall refuse to disclose personal information to any person other than the individual to whom the information relates where disclosure would constitute an unjustified invasion of the personal privacy of that person or of any other individual. All members of the University community must respect the confidential nature of the student information which they acquire in the course of their work.

XII. Course Descriptions

General Information

Course Labelling and Levels

Each course is identified by a two-part code. The first part of the code refers to the subject area, the second to the level of the course. Thus, the course PSYC*3570 is a course in the subject area of Psychology (PSYC*XXXX), and is of a level that places it among courses in the 3000 series. The series 1000, 2000, 3000 and 4000 numbers are intended to indicate progressively more demanding content, and correspondingly increasing competence on the part of the students enrolled in the course. Courses in the 1000 series are mainly for first year students, those in the 2000 series are mainly for second year students, and those in the 3000 series are for third year students. Similarly, courses in the 4000 series are mainly intended to be taken by students in the fourth year of honours programs. It is important that students planning their courses have clearly in mind the significance of these numbers so that they may guard against undertaking course work at levels for which they are insufficiently prepared. A two-semester course (e.g. AGR*2351/2) is taken over 2 continuous semesters and counts as 1 course attempt per semester for classification, continuation of study and calculation of fees. Two-semester courses cannot be split.

Course Information

The letters S, F, W indicate the University's intention to offer the course in the Summer (S), Fall (F) or Winter (W) semester during the academic year covered by this Calendar. Although courses normally will be offered in the semester indicated, students preparing their course programs are advised to consult the Undergraduate Course Timetable. The University cannot guarantee that all courses will be offered in the exact semester indicated.

The letter U indicates that an intended offering has not been assigned to the course. Students should consult the Undergraduate Course Timetable posted on WebAdvisor <<https://webadvisor.uoguelph.ca/>> or contact the departments offering those courses to determine the semester offerings.

The figures in parentheses () following the semester designation are a general guide to the lecture and laboratory contact hours per week, the first digit being the number of lecture hours and the second, the number of laboratory hours. The credit weight for each course appears in brackets []. A credit weight of [0.50] indicates 10-12 student effort hours, including class time, on academic tasks associated with the course.

Detailed course descriptions are maintained at the office of the department offering the course. Some courses, designated "Experiential Learning" courses in the Calendar description, are deliberately designed to accommodate the need to grant academic credit for experiential learning external to regular courses, in such contexts as co-operative education, field observation/job shadowing, internship/externships, practical, service learning, or work study (and other approved experience). Prior approval for admission to these courses must be obtained from the department and instructor concerned.

Some courses are offered in the Guelph-Humber degree program and on the Humber campus only. Those courses will be identified in the course restriction information. See the University of Guelph-Humber web site at for more information about the Guelph-Humber degree programs (<http://www.guelphhumber.ca/>).

Course Prerequisites

In lists of course prerequisites, "or" conditions are spelled out explicitly, but "and" conditions are indicated with a comma ",". For example: "CSTU*2270, FRHD*2010, NUTR*2010" means "CSTU*2270 and FRHD*2010 and NUTR*2010". A number of courses have stated prerequisites which are prior requirements for entry to the course. Students who do not satisfy course prerequisites, or who in the opinion of the instructor do not possess an equivalent background to that of the stated prerequisites, are not eligible to enroll in the course. When some specific background is desirable but not required, the course description will include a statement of recommended background. It is understood that the instructor may accept equivalent courses from other institutions in place of the stated prerequisites. Students who wish to enroll in courses for which they do not have the stated prerequisite(s) must obtain instructor approval as outlined in Section VIII, Undergraduate Degree Regulations and Procedures, in this Calendar.

Course Equates and Restrictions

Equates - Equate indicates a course identical to the one under which it is listed. The course may have been re-numbered or may be cross-listed under two subject areas.

Students will not be permitted to register in equated courses.

Restrictions - A restriction is a "rule" that is placed on the computer system (Colleague) at the direction of an academic department so that particular students may not register in particular courses. The course may be restricted because there is sufficient over-lap in content with another course so that it is inappropriate for the student to take a similar course for credit. In a different instance, the course may be restricted by "Instructor Consent" so that the student must discuss the special requirements of the course with the instructor before enrolling. Or, alternatively, the restriction may reflect a "Priority Access" designation for enrollment management purposes. (See Priority Access).

Agricultural Economics

Department of Food, Agricultural and Resource Economics

AGEC*1100 Introduction to Business F (3-0) [0.50]

This course provides an overview as well as a foundation in the fundamentals of business management. The basic functions of business and management to be examined include: operations, human resources, marketing, finance, and strategic management. Small Business and entrepreneurship are also studied, along with other forms of business ownership, competition within a global economy, and the political and economic realities of business in Canada today. Students will develop basic competencies in business management through assignments and case studies requiring the practice of learned theory.

Equate(s): BADM*1000

Restriction(s): Registration in BBRM.

AGEC*1300 Poverty, Food & Hunger W (3-0) [0.50]

This course examines the nature of poverty, food security and hunger at both the local and global levels. In so doing, it explores the nature of international development more broadly and its relevance to students studying a wide range of disciplines. It aims to provide students with the basic concepts and analytical tools required to reflect critically on international development issues in the world today and the how global poverty, food insecurity and hunger might be alleviated.

AGEC*2110 Sales and Society F (3-2) [0.50]

The course is geared towards the global impact of trade on local sales environments. Students will learn the selling techniques and skills necessary to assess sales scenarios and react accordingly. Sales presentations will be covered extensively as well as buyer motivation and behaviour. Students will have ample opportunity to practice their sales skills through real-world cases and role-playing activities.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

AGEC*2300 Organic Marketing F,W (3-0) [0.50]

Economic theory of markets principles are applied to the marketing of organically-produced and processed products, through exploring open market price formation, value added, marketing margins, alternative marketing outlets and branding. Adherence to organic production and marketing standards, quality management, supply chain management, and advertising and promotion issues are also addressed. (Offered in distance education format only.)

Prerequisite(s): MCS*1000 or ECON*1050

Location(s): Kemptville

AGEC*2410 Agrifood Markets and Policy W (3-0) [0.50]

Students will be provided with an introduction to agrifood markets, policies and institutions. Focus will be placed on: the role and function of futures markets; domestic agrifood policies; and agrifood trade policies, instruments and institutions. Economic analysis of contemporary issues in agrifood markets will be emphasized.

Prerequisite(s): AGR*2400

Co-requisite(s): ECON*2310

Restriction(s): AGR*2402

AGEC*2700 Survey of Natural Resource Economics F (3-0) [0.50]

This course examines how humans, within a society, allocate natural resources - e.g., water, land, forests, and fisheries. Economic concepts and methods provide the basis for discussing and understanding both the use and misuse of natural resources.

Prerequisite(s): ECON*1050

AGEC*3030 The Firm and Markets F (3-1) [0.50]

A course in microeconomic theory applied to agricultural economics research. The theory of the firm is used to analyze production and resource use in agriculture. Resource allocation issues, risk responsive decision-making, and firm strategy on vertical and horizontal integration are studied. Consumer theory is used to analyze food purchase decision. How theoretical relationships are quantified and used in the analysis of public policy issues is emphasized.

Prerequisite(s): ECON*2310, ECON*2770, ECON*3740

AGEC*3170 Cost-Benefit Analysis W (3-0) [0.50]

This course covers the principles and applications of cost-benefit analysis (CBA) in environmental and natural resource issues. This course will present basic concepts and principles, supplemented with case studies of projects applying CBA to illustrate the different issues arising from the use of the CBA technique. Quantitative exercises involving analysis of actual environmental and natural resource data will be used to illustrate the mechanics of established valuations methods such as contingent valuation, hedonic approach and travel cost approach.

Prerequisite(s): 1 of AGEC*2700, ECON*2100, ECON*2310

AGEC*3190 Markets, Firms & Natural Amenities F (3-0) [0.50]

This course deals with how firms use different types of markets related to natural resources and the environment as they respond to heightened regulatory stringency and increasing environmental compliance costs while attempting to maintain their competitive edge. This course covers the microeconomic theory of the firm while using case studies from the business area to illustrate how different markets work for natural resource and environmental commodities. The types of markets and examples of environmental practices that will be discussed include: direct markets for resource and environmental amenities and markets for pollution; and indirect markets such as final goods market, the capital market and the market for new technologies.

Prerequisite(s): 1 of AGEC*2700, ECON*2100, ECON*2310

AGEC*3250 Food, Nutrition & International Development F (3-0) [0.50]

This course aims to provide students with an economic perspective on issues in international development related to food and nutrition, exploring the ways in which economic analysis can enhance understanding of processes of international development in the contemporary world with a particular focus on food and nutrition. Students are encouraged to consider critically an economic approach to the analysis of development issues related to food and nutrition, alongside the perspectives of other social science disciplines. Throughout the course, food and nutrition as development issues are considered in the global context, especially related to trade.

Prerequisite(s): ECON*1050, (AGEC*1300 or ECON*1100)

AGEC*3310 Operations Management F,W (3-0) [0.50]

The decision-making role of the operations manager in transforming inputs into desired outputs is the primary focus of this course. The major issues and problems of designing, scheduling, operating, and controlling the production system will be examined.

Prerequisite(s): AGECE*2220 or BUS*2220

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

AGEC*3400 Agribusiness Financial Management F (3-0) [0.50]

The course will focus on the application of principles and tools of finance to managerial problems in agribusiness, food and resource industries. The focus is on evaluating and controlling profitability, growth, risks, and liquidity in agribusiness firms. Key concepts covered in the course include, credit, leverage, capital budgets, and capital costs. These concepts are applied using financial analysis and developed in the context of farming and agribusiness. The course also examines how and from whom farmers and agribusinesses obtain loans.

Prerequisite(s): AGECE*2230 or BUS*2230

Restriction(s): Registration in B.Comm. AGBU, AGBU Co-op, B.Sc.(Agr.) AGECE or B.A. AGECE.

AGEC*4000 Agricultural and Food Policy W (3-0) [0.50]

A critical analysis of agricultural income, marketing, adjustment and trade problems and policies in the developed countries, with particular emphasis on Canadian agricultural policies.

Prerequisite(s): 15.00 credits including ECON*2310

AGEC*4210 World Agriculture and Economic Development F (3-0) [0.50]

The role of agriculture in economic development. Analyses of economic policies and programs in developing countries and their effect on economic development.

Prerequisite(s): 10.00 credits including ECON*1050 and ECON*1100

AGEC*4220 Advanced Farm Management W (2-3) [0.50]

A course oriented toward practical application of theory and analytical principles to the identification, analysis and solution of farm business organization/management problems. Students work on a major farm project as management consultants with a farm owner/operator. The course builds upon students' prior training in accounting, finance, mathematical analysis, computer applications, economics, agriculture and farm management.

Prerequisite(s): 1 of AGECE*2410, AGECE*3320, AGR*2402, BUS*3320, ECON*2770, instructor's consent

AGEC*4240 Futures and Options Markets W (3-0) [0.50]

An introduction to the study of the theory and application of futures, options and other derivative instruments for marketing, hedging, investment and speculative purposes. Emphasis is placed on applications of agricultural and financial instruments to real business situations.

Prerequisite(s): 1 of AGECE*2410, AGECE*3320, AGR*2402, BUS*3320, ECON*3560, ECON*3660

AGEC*4290 Land Economics F (3-0) [0.50]

The economics of property rights is applied to issues in the allocation of land among agricultural, urban and other uses: contemporary trends, problems and policies in land planning, including expropriation and regulatory takings, soil erosion policy, farmland protection policy, endangered species policy and landfills and recycling. (Offered in even-numbered years.)

Prerequisite(s): AGECE*2700 or ECON*2310

AGEC*4310 Resource Economics W (3-0) [0.50]

This course explores the role of property rights and related institutions in natural resource stewardship. Potential applications of this perspective to natural resource policy, both in Canada and internationally, are considered. Classes use a discussion based approach. The learning objective for the course is the development of critical thinking skills. The readings emphasize original sources. Students are expected to conduct original research on some aspect of the role of property rights and related institutions in the resolution of a current natural resource stewardship problem.

Prerequisite(s): 1 of AGECE*2700, ECON*2310, ECON*2100, instructor consent

AGEC*4360 Marketing Research W (3-0) [0.50]

A study of the marketing research function in business with emphasis on its role in providing information to assist managers in making marketing decisions.

Prerequisite(s): 0.50 credits in statistics

AGEC*4370 Food & Agri Marketing Management F (3-0) [0.50]

The course focuses on the decision making role of the marketing manager who is responsible for formulating the strategic marketing plan for food and agricultural businesses. The theory of selecting market target(s) for the firm's product and/or services and the development of the marketing mix (product, price, promotion, distribution) with the aid of market research is covered. Note: Students with credit for this course may not proceed to MCS*1000.

Prerequisite(s): 10.00 credits including (1 of AGECE*2230 , BUS*2230, COST*2600 , MCS*2600)

Equate(s): MCS*4370

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

AGEC*4500 Decision Science F (3-0) [0.50]

Quantitative techniques such as classical optimization, mathematical programming, simulation and input-output models are applied to firm, interregional, industry, and international problem situations in agricultural economics, including those dealing with resources and the environment. Time and risk and uncertainty dimensions are addressed.

Prerequisite(s): ECON*2770

AGEC*4550 Independent Studies I S,F,W (3-0) [0.50]

A project based independent study course for majors in Agricultural Economics (of the Bachelor of Arts or Bachelor of Science in Agriculture degree programs), Agribusiness (of the Bachelor of Commerce degree program), and Environmental Economics and Policy (of the Bachelor of Science in Environmental Sciences degree program).

Prerequisite(s): 10.00 credits including 1 of AGECE*2410, AGECE*2700, AGR*2401/2

Restriction(s): Permission of the instructor and Chair of the Department of Food, Agriculture and Resource Economics is required.

AGEC*4560 Independent Studies II S,F,W (3-0) [0.50]

An opportunity to conduct a second independent study project for majors in Agricultural Economics (of the Bachelor of Arts or Bachelor of Science in Agriculture degree programs), Agribusiness (of the Bachelor of Commerce degree program), and Environmental Economics and Policy (of the Bachelor of Science in Environmental Sciences degree program).

Prerequisite(s): 10.00 credits including 1 of AGECE*2410, AGECE*2700, AGR*2401/2

Restriction(s): Permission of the instructor and Chair of the Department of Food, Agriculture and Resource Economics is required.

Agriculture

Ontario Agricultural College, Dean's Office

AGR*1050 Communication Skills W (3-2) [0.50]

Students will develop written language skills, oral communication, and presentation skills. The development of practical skills includes writing business letters and other business correspondence, formal and informal reports, instructional writing, critical thinking and critical writing. Students will present and deliver a variety of information and persuasive oral presentations.

Restriction(s): Registered in B.B.R.M. Instructor consent required.

Location(s): Ridgetown, Kemptville

AGR*1100 Introduction to the Agrifood Systems F (2-3) [0.50]

This course examines current events within various production and maintenance sectors in an effort to gain up-to-date knowledge and analytical skills when dealing with issues in agri-food, landscape and associated industries.

Restriction(s): AGR*1150, UNIV*1500, enrolment in the B.Sc. (Agr.), B.COMM. (Ag. Bus.), or B.A. (Ag. Ec.) program

AGR*1250 Agrifood System Trends & Issues W (3-2) [0.50]

The course examines the complexities and contributing factors within the food system, production agriculture and landscapes management. From producer to consumer, students will examine ways in which each stage of a system process is empowered by various inputs as well as directed by various influences.

AGR*2030 Pasture Management F (2-2) [0.50]

This course focuses on forage and weed identification, establishing, maintaining and improving pasture for grazing or cropping, and environmental and conservation stewardship approaches to pasturelands. (First offering Fall 2008.)

Prerequisite(s): BIOL*1040, SOIL*2010

Restriction(s): Registered in B.B.R.M. Equine Management.

Location(s): Kemptville

AGR*2100 Human Resource Management W (3-2) [0.50]

This course will introduce students to theoretical and practical skills of management and interacting with people. Topics will include recruiting, supervising, motivation, training employees, effective listening, dealing with difficult people, group dynamics and leadership skills.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown, Kemptville

AGR*2320 Soils in Agroecosystems F (3-3) [0.50]

This course is an introduction to soil resources with emphasis on management practices that will sustain the productivity of these resources and enhance the quality of the ecosystems of which they are a part. Students will develop a management plan for a farm that will take into account the roles of geological, geomorphological, biological, climatic and temporal factors on the formation, properties and uses of soils. The management plans will be placed in the broader context of provincial policies related to soil, air and water resources and local zoning regulations.

Prerequisite(s): BIOL*1040, CHEM*1040, MATH*1080

Restriction(s): AGR*2301/2, SOIL*2010

AGR*2350 Animal Production Systems and Industry F (3-3) [0.50]

This course is designed to give students an overview of animal production systems and will consist of lectures dealing with major farm livestock species. Laboratories correlate with lectures and involve field trips, video and computer analyses of production alternatives.

Prerequisite(s): BIOL*1030 or BIOL*1040

AGR*2400 Economics of the Canadian Food System F (3-1) [0.50]

This course introduces students to the major aspects of economics, business and resource use in the Canadian agrifood sector. Students will be exposed to the techniques used by agrifood firms to plan, invest and measure performance. Decision making under both certainty and uncertainty will be considered. Students will be shown how the market equilibrium model can be used to conduct welfare analysis and modified to account for imperfect competition and externalities.

Prerequisite(s): AGR*1250, ECON*1050

Restriction(s): AGR*2401/2

AGR*2470 Introduction to Plant Agriculture F (3-3) [0.50]

The basic principles of plant morphology, nutrition, growth and development will be related to where and how agriculturally significant plants are grown. Agroecosystems and farming systems will be considered as frameworks for crop production analyses. The course uses examples from temperate, sub-tropical and tropical crops and cropping systems. Labs include problem-solving exercises in the context of plant production.

Prerequisite(s): BIOL*1030

Restriction(s): AGR*2451/2

AGR*2500 Field Trip in International Agriculture W (3-0) [0.50]

A 2 week field study program to Costa Rica costing approximately \$2000 per student in addition to regular tuition fees during winter semester reading week. Students will visit corporate and individual farms, university and government research stations and become familiar with agricultural production systems. Projects and/or assignments will be completed during the winter semester. Classes are scheduled to meet once a week in the evening during the winter semester. It is important that students identify their interest in taking this course by contacting the OAC Dean's Office in September of the previous year. A deposit of \$875 in the form of a cheque made payable to the University of Guelph must be in the OAC Dean's Office by November in order to confirm a reservation for travel arrangements. Scholarship support is available to B.SC.(AGR.) students through the Cavers Memorial Scholarship and the Wolff International Scholarships. Applications are due in Student Financial Services, Office of Registrarial Services by April 1. This course must be recorded as part of your Winter course selection and tuition and compulsory fees will be calculated accordingly.

Prerequisite(s): AGR*1250 or registration in International Development

Restriction(s): Registration in B.Sc.(Agr.) or B.A.(I.D.). Instructor consent required.

AGR*3010 Special Studies in Agricultural Science I S,F,W (3-0) [0.50]

A special study option that enables undergraduate students in semesters 5 through 8 to undertake specific projects in agricultural sciences. The topic of the special study will be determined in consultation with a faculty member and the individual student. Students are responsible for making appropriate arrangements with faculty at the departmental and/or college level prior to registration for the course.

Prerequisite(s): 10.00 credits

Restriction(s): Instructor consent required.

AGR*3500 Experiential Education F (0-0) [0.50]

Student initiated experiential learning opportunities can be developed as a credit course in consultation with a supervising faculty member. Details of the activities included in the program will be outlined in a learning contract initiated by the student and agreed by the faculty supervisor in the April prior to the commencement of the work experience. The employer will also provide a description of the project and/or the work experience. The course is designed to meet the needs of B.SC.(Agr.), B.B.R.M. and Agricultural Business students.

Prerequisite(s): 5.00 credits

Restriction(s): Instructor consent required.

AGR*4010 Special Studies in Agricultural Science II S,F,W (3-0) [0.50]

A special study option that enables undergraduate students in semesters 5 through 8 to undertake specific projects in agricultural science. The topic of the special study will be determined in consultation with an OAC faculty member and the individual student. Students are responsible for making appropriate arrangements with faculty member prior to registration for the course.

Prerequisite(s): 15.00 credits

Restriction(s): Instructor consent required.

AGR*4050 Professionalism and Agrology W (3-0) [0.50]

This course is designed for students in the final year of the B.SC.(Agr.) program who wish to understand the responsibilities of professionals in agrology and the responsibilities that professional organizations have in Ontario and Canada. The course is offered in conjunction with the Ontario Institute of Agrologists and will be offered in a series of ten 3-hour evening sessions. The first three sessions will deal with the topics of professionalism, ethics and professional development and utilize materials prepared jointly by the OIA and OAC Access. The remainder of the course will be comprised of discussions of ethical issues and workshops that will help students develop their personal professional development plan, improve their personal resume, and provide a framework for identifying potential professional employment opportunities.

Prerequisite(s): 15.00 credits

AGR*4450 Research Project I S,F,W (0-12) [1.00]

Independent study of a current topic in Agriculture designed to encourage senior undergraduates to conduct research in Agriculture. The course includes participation in meetings organized by the coordinator, work with a faculty advisor to develop a research project, formulate hypotheses, design and carry out preliminary experiments to test the hypotheses. Students will carry out independent library research, begin experimental work, prepare a written report and make a presentation to other students in the course of the research plan and preliminary results. Students must make arrangements with both the faculty supervisor and the course coordinator at least one semester before starting the course. Open to students in semesters 6, 7, and 8 of the B.SC. (Agr.) degree program. This course will normally be followed by AGR*4460 to provide 2 semesters to complete the research project.

Prerequisite(s): Completion of semester 5 of the B.Sc. (Agr.) program, 70% cumulative average.

Restriction(s): AGR*4400, permission of the course coordinator (contingent on the availability and agreement of a faculty advisor)

AGR*4460 Research Project II S,F,W (0-12) [1.00]

Independent study of a current topic in Agriculture designed to encourage senior undergraduates to conduct research in Agriculture. The focus of this course will be the completion of the research plan developed in AGR*4450 by the student in consultation with a faculty advisor. The course includes participation in meetings organized by the coordinator and meetings with a faculty advisor to review research progress. Students will carry out independent research, prepare a written report of the research findings in a scholarly style and make a presentation to other students in the course of the research results. Open to students in semesters 7 and 8 of the B.Sc. (Agr.) degree program.

Prerequisite(s): AGR*4450

Restriction(s): AGR*4500, permission of the course coordinator and faculty advisor

AGR*4500 Agrifood Industry Problem-Solving W (1-6) [0.50]

This course will provide senior level students in agricultural and related sciences with experience in working as a team to propose solutions to agrifood industry problems. The perspective of the best solution will be the agrifood system rather than any individual stakeholder group. Attention will be given to integrating material from different disciplines, further refining skills in problem-solving, and communication. Students and faculty will meet prior to the conclusion of the preceding semester to identify industry projects, student expertise, and to develop a preliminary strategy.

Prerequisite(s): 3.50 credits at the 3000 level or 1.50 credits at the 4000 level in any agricultural science area or agricultural business area.

Anatomy

Department of Biomedical Sciences

For course listings and descriptions see Biomedical Sciences.

Additional course listings may be found in the course descriptions for Human Kinetics, Veterinary Medicine and Zoology.

Animal Science

Department of Animal and Poultry Science

ANSC*2330 Horse Management Science F (3-2) [0.50]

An introduction to horse management designed to give those with an interest in the various segments of the horse industry a strong scientific basis for production and management decisions. The course includes study of the evolution of our current industry, the biology of growth, performance and management of the equine athlete. The evaluation of conformation as it relates to performance as well as aspects of behaviour, nutrition, reproduction and genetics consistent with the level of the course are included. Laboratories are designed to familiarize the student with current management and handling techniques in addition to augmenting information presented in lectures.

Prerequisite(s): BIOL*1040 or consent of the instructor

ANSC*2340 Structure of Farm Animals W (3-1) [0.50]

An introduction to the carcass structure of cattle, pigs, sheep and poultry. Animal growth and development are considered in relation to meat production. The course is for students intending to major in Animal Science and Animal Biology. (Also offered through Distance Education Format.)

Prerequisite(s): BIOL*1040

ANSC*2360 Challenges and Opportunities in Animal Production F (2-3) [0.50]

This course consists of lecture presentations on current aspects of beef cattle, dairy cattle, swine and poultry production. Selected projects in these areas expose students to the practical application of animal science to production systems.

Prerequisite(s): AGR*2350

Restriction(s): AGR*2360 . Registration in B.Sc.(Agr.), B.Comm.(Ag.Bus.), or B.Sc. Animal Biology.

ANSC*3050 Aquaculture: Advanced Issues F (3-0) [0.50]

This course examines the fundamental principles and advanced interdisciplinary issues involved in the farming of aquatic organisms. The course will concentrate primarily on finfish species due to their worldwide commercial importance. Lectures will cover fish physiology, behaviour, nutrition, genetics, water quality, health and disease, reproductive techniques, economic, political and legal issues and various culture technologies. Students will analyze contemporary challenges facing the aquaculture industry through exercises requiring interdisciplinary knowledge, lateral thinking, creative problem solving and bridging science and technology to issues management. (Offered in odd-numbered years.)

Prerequisite(s): A minimum of 8.00 credits in biology, including AGR*2350 or ZOO*2090

Restriction(s): ANSC*2200

ANSC*3080 Agricultural Animal Physiology F (3-1.5) [0.50]

This course is an introduction to the physiology of domesticated farm animals. The course will emphasize homeostatic control of the major body systems. The lectures cover the nervous, cardiovascular, respiratory, urinary, immune, digestive, endocrine and reproductive systems. The lectures and laboratories are closely integrated.

Prerequisite(s): BIOC*2580

ANSC*3120 Introduction to Animal Nutrition F (3-2) [0.50]

The application of principles of nutrition to the development of diets and feeding programs for the various species of animals of agricultural importance.

Prerequisite(s): NUTR*3190 or NUTR*3210

ANSC*3170 Nutrition of Fish and Crustacea W (3-0) [0.50]

The nutrition of fish and crustaceans with emphasis on those species used in aquaculture. Nutritional biochemistry, nutritional pathology and comparative nutrition of cold blooded, ammonotelic animals mainly carnivorous, contrasted with warm blooded ureotelic omnivores. (Offered in even-numbered years.)

Prerequisite(s): NUTR*3190 or NUTR*3210

Equate(s): NUTR*3340

ANSC*3180 Wildlife Nutrition W (3-0) [0.50]

A study of the nutrition of avian and mammalian wildlife with emphasis on North American species. The role of nutrition in survival and population growth of wildlife in their natural habitat. Formulation of diets for wild species in captivity.

Prerequisite(s): NUTR*3190 or NUTR*3210

Equate(s): NUTR*3350

ANSC*3210 Principles of Animal Care and Welfare W (3-1) [0.50]

Students will be introduced to the major ethical theories that deal with humanity's duties to animals. The relationship of ethics to science will be discussed. Factors that contribute to the quality of life of animals will be considered and methods of assessing animal welfare will be described. Common causes of reduced animal welfare will be covered. The course will also deal with how different cultures approach animal welfare and attempt to regulate it.

Prerequisite(s): A minimum of 7.50 credits including AGR*2350

Restriction(s): ANSC*3150

ANSC*3300 Animal Reproduction W (3-0) [0.50]

The course supplies basic knowledge to aid in the explanation of reproductive phenomena in domestic animals. Special attention will be given to the regulatory mechanisms of male and female fertility.

Prerequisite(s): ANSC*3080

Restriction(s): ANSC*4120

ANSC*4020 Genetics of Companion Animals F (3-0) [0.50]

This course includes theoretical and applied aspects of practical breeding programs for performance, pleasure and hobby animal populations leading to genetic improvement and population stability. Quantitative genetics and biotechnology are integrated using case studies to develop practical and sustainable breeding programs for horses, dogs, cats, rabbits and hobby livestock. Legislative requirements governing animal registration and breed development are also explored.

Prerequisite(s): MBG*3060

ANSC*4050 Biotechnology in Animal Science F (3-2) [0.50]

Starting from the principles of recombinant DNA, DNA marker identification, stem cell and generation of transgenic animals, the course provides an overview on how biotechnology has impacted biomedical science and animal production. The current challenges and potential opportunities in this field are discussed.

Prerequisite(s): MBG*2000

ANSC*4090 Applied Animal Behaviour F (3-0) [0.50]

This course deals with why domesticated animals behave as they do with reference to causation, function, ontogeny and phylogeny. Basic principles are illustrated by examples taken from all the common domesticated and captive species. Emphasis is placed on the application of behavioural knowledge to improve captive environments and animal production systems. Designing housing, facilities and management procedures to suit the behaviour of the animals in question is also covered.

Prerequisite(s): ANSC*3080

Restriction(s): ANSC*4070

ANSC*4100 Applied Environmental Physiology and Animal Housing W (3-0) [0.50]

Basic concepts of environmental physiology and their application to animal housing and management will be introduced. The course will review the physics of heat flow, light and air quality as they relate to animal biology and health. Other aspects, such as the physical environment, that impact on animal health and well-being will be discussed.

Prerequisite(s): ANSC*3080

Restriction(s): ANSC*4080

ANSC*4130 Reproductive Management and Technology W (3-2) [0.50]

Management of reproductive events at the farm level in the major classes of domestic livestock. An introduction to modern and emerging reproductive technologies as these relate to livestock propagation.

Prerequisite(s): ANSC*3300 or ANSC*4120

ANSC*4260 Beef Cattle Nutrition W (3-0) [0.50]

This course is designed for students to evaluate problems in feeding beef cattle. Relevant aspects of digestion and metabolism of nutrients as well as current issues of feeding beef cattle and diagnosing nutritional deficiencies will be included.

Prerequisite(s): ANSC*3120

Restriction(s): ANSC*4160

ANSC*4270 Dairy Cattle Nutrition W (3-0) [0.50]

This course is designed to apply principles of dairy cattle nutrition to solving on-farm nutritionally based problems. A case study approach will be used in conjunction with computer modeling and computer ration formulation programs.

Prerequisite(s): ANSC*3120

Restriction(s): ANSC*4170

ANSC*4280 Poultry Nutrition F (3-0) [0.50]

This course is designed to evaluate nutrient requirements of poultry. Students will learn how to apply feeding programs for meat, laying birds and breeders and how feeding affects poultry meat and egg composition.

Prerequisite(s): ANSC*3120

Restriction(s): ANSC*4180

ANSC*4290 Swine Nutrition F (3-0) [0.50]

This course is designed to explore details of evaluating feed ingredients and formulating diets for swine. Students will use models to evaluate various aspects of nutrient partitioning for growth and reproduction in pigs.

Prerequisite(s): ANSC*3120

Restriction(s): ANSC*4190

ANSC*4350 Experiments in Animal Biology W (0-6) [0.50]

This course provides an opportunity for hands-on projects involving live animals and laboratory techniques. Projects will be provided by APS faculty within their broad fields of study, for example animal behaviour and welfare, environmental physiology, endocrinology, and reproduction. Approval of the ABIO Faculty Advisor must be obtained before course selection.

Prerequisite(s): ANSC*3080, ANSC*3300, ANSC*4090

Co-requisite(s): ANSC*4100, ANSC*4490

Restriction(s): Registration in Animal Biology Major. Instructor consent required.

ANSC*4470 Animal Metabolism W (3-0) [0.50]

Current concepts in whole animal metabolism and the quantitative techniques used to measure whole body metabolic kinetics will be presented. Tissue and organ specific biochemical processes will be integrated with whole body control mechanisms.

Prerequisite(s): NUTR*3190 or NUTR*3210

ANSC*4490 Applied Endocrinology W (3-0) [0.50]

This course examines the endocrine systems of farm animals and their applications to livestock production. Considerable emphasis will be placed upon understanding how knowledge of endocrine regulation can be applied within animal production systems.

Prerequisite(s): ANSC*3080

Restriction(s): ANSC*4480

ANSC*4550 Horse Nutrition W (3-0) [0.50]

This course is designed to provide students with the most current knowledge of nutrition of horses and other domestic non-ruminant herbivores. Influence of nutrition on musculo-skeletal development and function will be emphasized.

Prerequisite(s): NUTR*3190 or NUTR*3210

Restriction(s): ANSC*4500

ANSC*4560 Pet Nutrition F (3-0) [0.50]

This course covers nutrient requirements, feed formulation and nutritional idiosyncrasies for dogs, cats, and exotic pets.

Prerequisite(s): NUTR*3190 or NUTR*3210

Restriction(s): ANSC*4510

ANSC*4610 Critical Analysis in Animal Science W (3-0) [0.50]

Each student will select and critically review a topic of emerging importance in animal science. The topic will be presented to the group as a written paper in journal format, as a poster, and as a formal seminar. This course is designed for students in their final year of the Animal Biology Major.

Prerequisite(s): 12.00 credits including 2.00 in animal sciences

ANSC*4650 Immune Mechanisms of Animals W (3-0) [0.50]

Livestock and fish have developed common and unique defense strategies for resisting microbial and viral infections. The focus of this course is to review and compare these defense mechanisms in different tissues, and describe the significance of neuroendocrine signalling, genetic polymorphisms, nutrition and food-borne toxins, and host-microbial interaction in regulating innate and acquired immune responses and disease resistance.

Prerequisite(s): ANSC*3080

ANSC*4700 Research in Animal Biology I S,F,W (0-6) [0.50]

This course is an opportunity for those students potentially interested in postgraduate studies to work with a committed faculty advisor to research a problem, analyse data and/or design experiment(s) that address a solution. Evaluation of the course requires a substantive literature review and/or data analysis. Selection of a faculty supervisor and approval from course coordinator must be obtained before course selection.

Prerequisite(s): 14.00 credits

Restriction(s): Registered in Animal Biology Major. Instructor consent required.

ANSC*4710 Research in Animal Biology II S,F,W (0-6) [0.50]

This course is a continuation of ANSC*4700, Research in Animal Biology I. It allows more sophisticated projects to be undertaken or to provide an opportunity to build upon the work of ANSC*4700. Evaluation of the course requires a greater emphasis on data analysis or experimental design than for ANSC*4700. Selection of a faculty advisor and approval of course coordinator must be obtained before course selection.

Prerequisite(s): 14.00 credits

Restriction(s): Registration in Animal Biology Major. Instructor consent required.

Anthropology

Department of Sociology and Anthropology

The Department of Sociology and Anthropology offers three types of courses: sociology courses with the prefix SOC*; anthropology courses with the prefix ANTH*; and departmental courses with the prefix SOAN*.

Courses will normally be offered in the semesters designated. For information on other semesters these courses will be offered and the semesters those courses without designations will be offered, please check with the department. In addition to regularly scheduled courses, students may elect to do independent study. A student who wishes to do a reading course should first consult the professor with whom he/she wishes to work. Please note: a student is allowed a total of 1.00 credits only for reading courses.

Please note: The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

ANTH*1150 Introduction to Anthropology S,F,W (3-0) [0.50]

An introductory course dealing with humankind from a broad historical and cross-cultural perspective. Theoretical models, case studies and specific methods will be presented. Course topics may include the origin and transformations of human society, the relationship between biological and cultural traits, human language, variation in family structure and religion, the economic and political aspects of human society. (Also offered through distance education format.)

ANTH*2160 Social Anthropology W (3-0) [0.50]

This course will cover basic concepts that contribute to various anthropological approaches to the study of culture and society, such as the case study method and participant observation. The development of theory and methods will be examined through reading selected classic and contemporary ethnographies.

Prerequisite(s): ANTH*1150

ANTH*2230 Regional Ethnography F (3-0) [0.50]

This course offers a survey of ethnographic studies on selected cultural/geographical areas of the world. Topics covered may include social, economic and political systems, the colonial encounter, and the theoretical, methodological and political contexts of ethnographic representation. Focus may be given to such areas as Latin America, Sub-Saharan Africa, Asia, or Oceania.

Prerequisite(s): ANTH*1150

Restriction(s): ANTH*4230

ANTH*2660 Contemporary Native Peoples of Canada W (3-0) [0.50]

An analysis of the impact of Euro-Canadian society on native culture. Particular emphasis will be given to contemporary issues relating to Canadian native peoples (Indians, Inuit and Metis) such as education, treaties and reserves, land claims, government administration and economic development. (Offered in even-numbered years.)

Prerequisite(s): ANTH*1150 or SOC*1100

ANTH*3400 The Anthropology of Gender W (3-0) [0.50]

This course will address theoretical innovation in the discipline of socio-cultural anthropology in the study of gender and feminist issues on the basis of cross-cultural ethnographic case studies. Theoretical problems such as gender inequality, complementarity, the domestic/public divide, ritual and symbolic valuations and the division of labour will be considered in the context of cultural relativity. (Offered in even-numbered years.)

Prerequisite(s): 10.00 credits including (ANTH*2160 or SOAN*2400), (SOAN*2120 or WMST*3000)

ANTH*3650 Prehistory of Canadian Native Peoples F (3-0) [0.50]

This is a course in Aboriginal studies which uses archaeological, ethno-historical and contemporary research to examine the culture and social organization of First Nations peoples in Canada from their early beginnings to European contact.

Prerequisite(s): ANTH*2160, (ANTH*2230 or ANTH*2660)

Restriction(s): ANTH*2650

ANTH*3670 Indigenous Peoples: Global Context W (3-0) [0.50]

This course will focus on aboriginality as a political and cultural identity. Historical, political, and cultural similarities between indigenous peoples the world over will be traced and key issues such as assimilation, cultural survival, protection of the commons, and the environment and cultural identity within the nation state will be examined. International organizations of indigenous peoples will be considered as well as other forms of transnational assertions of common identity and resistance. (Offered in odd-numbered years.)

Prerequisite(s): (1 of ANTH*2160, ANTH*2230, ANTH*2660, SOC*2660, IDEV*2010), SOAN*2120

ANTH*3690 History of Anthropological Thought F (3-0) [0.50]

This course offers a historical survey of the main trends in anthropological theory from the 19th century to the present.

Prerequisite(s): ANTH*2160, ANTH*2230, SOAN*2120

ANTH*3770 Kinship and Social Organization W (3-0) [0.50]

This course will deal with the theoretical implications of the study of kinship systems for an analysis of human society in general, including a comparative study of the social organization of kinship-based societies.

Prerequisite(s): ANTH*2160, ANTH*2230, SOAN*2120

ANTH*3840 Seminar in Anthropology F,W (3-0) [0.50]

This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

Prerequisite(s): 10.00 credits including ANTH*2160, SOAN*2120

ANTH*3850 Seminar in Anthropology F,W (3-0) [0.50]

This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

Prerequisite(s): 10.00 credits including ANTH*2160, SOAN*2120

ANTH*3950 Special Projects in Anthropology S,F,W (3-0) [0.50]

This special study option/reading course is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the study is required.

Prerequisite(s): 10.00 credits

Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.

ANTH*4300 Anthropological Issues F (3-0) [0.50]

Current issues and future trends in the discipline of socio-cultural anthropology will provide the subject matter of this variable content course. This course is meant to provide an opportunity for socio-cultural anthropology majors to consider the latest developments in the sub-discipline. Course topics will be announced and course outlines will be available at course selection time.

Prerequisite(s): 12.50 credits including ANTH*3690, SOAN*3070

ANTH*4440 Culture, Rights and Development W (3-0) [0.50]

This course examines the theoretical and practical problems associated with respecting local cultures while also respecting human dignity universally. Various definitions of 'development' will be explored in terms of how they reflect cultural values and global inequalities.

Prerequisite(s): 12.50 credits including ANTH*3690, SOAN*3070

ANTH*4540 Seminar in Anthropology F,W (3-0) [0.50]

This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

Prerequisite(s): 12.50 credits including (ANTH*3690 or SOC*3310), SOAN*3070

ANTH*4640 Seminar in Anthropology F,W (3-0) [0.50]

This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

Prerequisite(s): 12.50 credits including (ANTH*3690 or SOC*3310), SOAN*3070

ANTH*4700 Issues in Contemporary Anthropological Theory W (3-0) [0.50]

This course critically examines current anthropological theories, which may include post-structuralism, post-modernism, neo-Marxism and processual approaches. Attention may also be given to the theoretical and political implications of constructionism and calls for ethnographic reflexivity.

Prerequisite(s): 12.50 credits including ANTH*3690, SOAN*3070

ANTH*4740 Seminar in Anthropology F,W (3-0) [0.50]

This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

Prerequisite(s): 12.50 credits including (ANTH*3690 or SOC*3310), SOAN*3070

ANTH*4840 Seminar in Anthropology F,W (3-0) [0.50]

This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

Prerequisite(s): 12.50 credits including (ANTH*3690 or SOC*3310), SOAN*3070

ANTH*4880 Special Projects in Anthropology S,F,W (3-0) [0.50]

This special study/reading course option is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the project is required.

Prerequisite(s): 12.50 credits

Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.

ANTH*4890 Special Projects in Anthropology S,F,W (3-0) [0.50]

This special study/reading course option is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the project is required.

Prerequisite(s): 12.50 credits

Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.

ANTH*4900 Honours Anthropology Thesis I S,F,W (3-0) [0.50]

Development and design of an honours thesis proposal conducted under the supervision of a faculty member. Recommended to honours major students.

Prerequisite(s): 15.00 credits including ANTH*3690, (SOAN*3070 or SOAN*3120)

Restriction(s): Instructor consent required. As well as a cumulative average of 70% in all Sociology and Anthropology courses.

ANTH*4910 Honours Anthropology Thesis II S,F,W (3-0) [0.50]

Completion and presentation of honours thesis.

Prerequisite(s): ANTH*4900

Restriction(s): Instructor consent required.

Art History

School of Fine Art and Music

Students with a special interest in particular courses in Art History should consult the School concerning prerequisites.

ARTH*1220 The Visual Arts Today F (3-0) [0.50]

An introduction to contemporary visual culture, its current controversies and its historical roots. The avant-grade movements of the modern period and the impact of new technologies and media will be examined within a rich historical context. Topics will include international exhibitions, selling art, art and popular culture, censorship, and the relation between words and images.

ARTH*1510 Art Historical Studies I F (3-0) [0.50]

This course considers the visual arts in the Western tradition from prehistory through the Middle Ages. Emphasis will be placed on historical and critical analysis of key monuments and on the prerequisite technologies, as well as on various ways of looking at the visual past and present.

ARTH*1520 Art Historical Studies II W (3-0) [0.50]

A consideration of the visual arts in the Western tradition. Emphasis will be placed on historical and critical analysis of key monuments and on the prerequisite technologies, as well as on various ways of looking at the visual past and present. Focus will be on the visual arts from the Renaissance to today.

ARTH*2050 Modern Latin American Art F (3-0) [0.50]

An exploration of Latin American art in the context of cultural, social and political experience, with emphasis on the work of the painter Frida Kahlo, the Mexican muralists, performance artists Guillermo Gomez-Pena and Coco Fusco, and other important contemporary artists who have represented identity, culture, and political experience as complex and multifaceted because they have lived between nations and cultures.

ARTH*2060 Aboriginal Arts in the Americas W (3-0) [0.50]

An introduction to the aboriginal cultures of North, South, and Central America with special emphasis on the pre-contact period. The interdisciplinary approach will take into account recent debates about methodology, ethnocentricity, and aboriginal viewpoints.

ARTH*2070 Art of the USA F (3-0) [0.50]

In art, the 20th century has been referred to as "The American Century." Artists in the USA have a tradition of creating new visual languages, of using new ideas and technologies, and of representing the vanguard. Where did these ideas originate, and how has the USA determined our notions of what art is? This survey course focuses on modern American artists, on the evolution and growth of modern visual culture, and on how technologies and societies impact on artistic taste.

ARTH*2120 Introduction to Museology W (3-0) [0.50]

The course will examine the history of collections, traditions of cultural representation and display, constructions of authenticity, trade and exchange.

ARTH*2150 Art and Archaeology of Greece F (3-0) [0.50]

A survey of Ancient Greek Art and Archaeology, with stress on form and function plus stylistic trends and aesthetic values. The course will illuminate the cultural, social, and political life in Ancient Greece. (Also listed as CLAS*2150).

Equate(s): CLAS*2150

ARTH*2280 Modern Architecture W (3-0) [0.50]

An investigation of architectural theory and practice within the social and spatial complexities of national and international life.

ARTH*2290 History of Photographic Media W (3-0) [0.50]

An introduction to the history of photography through to its application in contemporary visual arts.

ARTH*2480 Introduction to Art Theory and Criticism F (3-0) [0.50]

This course provides an overview of some of the most significant methodological approaches and critical practices used by art historians to write about visual culture. Traditional methods of art historical analysis include connoisseurship, iconography, and formalism. With these we will be exploring newer interpretative models and multidisciplinary approaches such as structuralism, semiotics, post-structuralism, and psychoanalytic theory as well as political theories such as feminism and socio-cultural theory.

Prerequisite(s): (2 of ARTH*1220, ARTH*1510, ARTH*1520), (1 of SART*1050, SART*1060)

ARTH*2490 History of Canadian Art F (3-0) [0.50]

An overview of the visual arts in Canada from the earliest times to the present, with emphasis on the diverse contributions made by the First Nations, by French and British colonization, and by subsequent settlers from a great variety of different cultural origins.

ARTH*2540 Medieval Art F (3-0) [0.50]

This course considers visual arts during a period when the Christian church built a new synthesis out of the legacies of the late Roman Empire and its "barbarian invaders".

ARTH*2550 The Italian Renaissance F (3-0) [0.50]

An investigation of the myths and realities of the Renaissance in the visual arts. The artists to be studied will include Giotto, Duccio, Ghiberti, Donatello, Alberti, the Bellini, Verrocchio and Michelangelo. Their careers will be placed against the theoretical beginnings of art writing and the intricate relationships of the emerging city-states of Siena, Florence, Milan, and the republic of Venice.

ARTH*2580 Late Modern Art: 1900-1950 F (3-0) [0.50]

A study of the historical avant-gardes in the social and political contexts of the period 1900-1950.

ARTH*2600 Early Modern Art to 1900 W (3-0) [0.50]

A study of visual culture as it was transformed by the revolutions - industrial, political, and colonial - of the eighteenth and nineteenth centuries. (Offered in even-numbered years.)

ARTH*2950 Baroque Art W (3-0) [0.50]

The visual arts in an age of religious crisis and the growth of great trading empires.

ARTH*3010 Contemporary Canadian Art W (3-0) [0.50]

The wide range of contemporary Canadian visual arts, from painting to new technological media, from 'high' culture to punk, will be examined in the context of specifically Canadian social and historical conditions during the modern and post-modern periods. (Offered in odd-numbered years.)

Prerequisite(s): 10.00 credits including 2.00 credits in Art History.

ARTH*3050 Pre-Columbian Art F (3-0) [0.50]

This course investigates the history and artistic traditions of pre-contact America with special focus on selected cultural areas. The course will bring together such perspectives as archaeology, art history and ethnography.

Prerequisite(s): 10.00 credits including 2.00 credits in Art History.

ARTH*3060 Public Art W (3-0) [0.50]

This course investigates what constitutes the "public" and the "private" domain in the arenas of art and visual culture. Provocative iconography, matters of race, nationality, sexuality, language, and identity in artistic practice, issues of censorship, controversial shows and exhibitions, the ethics of propriety and impropriety will be considered. Artists such as Linda Montano, Andres Serrano, Keith Haring, Annie Sprinkle, Robert Mapplethorpe and others will be discussed.

Prerequisite(s): 10.00 credits including 2.00 credits in Art History.

ARTH*3100 Perspectives: Structure & Space in Western Art F (3-0) [0.50]

This course investigates the visual arts in Europe with special emphasis on issues of illusionism, mimesis, and the representation of space. (Offered in even-numbered years.)

Prerequisite(s): 10.00 credits including 2.00 credits in Art History.

ARTH*3150 Space: Roman Art and Urbanism W (3-0) [0.50]

Roman art and urbanism from the Early Republic to the end of the imperial period. The course will survey the developments of Roman art with an emphasis in architecture, sculpture and painting. It will illuminate the development of the urban space in the context of cultural, social and political life. (Also listed as CLAS*3150). (Offered in even-numbered years.)

Equate(s): CLAS*3150

Restriction(s): ARTH*3530, ARTH*4500

ARTH*3200 Colour: Practice & Meanings in Western Art W (3-0) [0.50]

This course explores the role colour has played in the work of selected artists and periods.

Prerequisite(s): 10.00 credits including 2.00 credits in Art History.

ARTH*3210 Critical Issues in Art History F (3-0) [0.50]

This course investigates art and its histories. Art writing, art history, and art historical methodology will be examined through the work of key art historians, cultural critics, and philosophers such as Clement Greenberg, Rosalind Krauss, Griselda Pollock, and Jacques Derrida for example. Critical issues such as intention and reception, authorship, creativity and originality will be discussed. (Offered in odd-numbered years.)

Prerequisite(s): 10.00 credits including 2.00 credits in Art History.

ARTH*3220 Nationalism and Identity in Art F (3-0) [0.50]
This course considers issues of identity formation and representation as they intersect with the agendas and interests of the nation state. The course looks at questions of power and exclusion, theories of representation and notions of centre/periphery, cultural hybridity and border-crossing in the age of globalization. It will examine the representation of identity in cultural institutions (including museums, and international art events) in cultural policy, and in cultural forms (fine art and popular culture, journals and periodicals).
<i>Prerequisite(s):</i> 10.00 credits including 2.00 credits in Art History.
ARTH*3310 Image: Pictures & Their Power W (3-0) [0.50]
This course examines the role that images play in conveying religious, political and aesthetic messages, and how these powerfully reveal themselves in forms of iconophobia and iconophilia.
<i>Prerequisite(s):</i> 10.00 credits including 2.00 credits in Art History.
<i>Equate(s):</i> ARTH*3540
ARTH*3320 Lives: Aspects of Western Art W (3-0) [0.50]
This course examines how the theory and practice of art history has often been informed by biography and other constructions of stereotypes and social practices concerning the 'Artist', the artist's audiences, and the various contexts that inform artists' lives, real and imagined. (Offered in even-numbered years.)
<i>Prerequisite(s):</i> 10.00 credits including 2.00 credits in Art History.
<i>Equate(s):</i> ARTH*3550
ARTH*3330 Display: Visual Culture in Western Europe W (3-0) [0.50]
This course examines the politics of visual representation in various contexts and how it shapes the meaning of artworks. An interpretation of culture through liturgical display, museums, cabinets of curiosities, tourist art, World's Fairs and shopping mall will be considered.
<i>Prerequisite(s):</i> 10.00 credits including 2.00 credits in Art History.
<i>Equate(s):</i> ARTH*3570
ARTH*3340 The Art Object & Material Culture F (3-0) [0.50]
This course considers selected topics in the visual arts in Italy, Spain and France, with attention to questions of the political, social, economic, gendered, and aesthetic meanings of works of art. (Offered in odd-numbered years.) (First offering Fall 2009.)
<i>Prerequisite(s):</i> 10.00 credits including 2.00 credits in Art History.
<i>Equate(s):</i> ARTH*3640
ARTH*3460 English Art, 1750 to Present F (3-0) [0.50]
In conjunction with the London Semester, this course will survey the visual arts in England from the mid-18th century to the present. Visits to galleries, museums, libraries, studios, and other cultural institutions will supplement lectures and stress the experience of actual works of art.
<i>Prerequisite(s):</i> Admission to London Semester
ARTH*3520 Idea: Art Since 1950 F (3-0) [0.50]
An analysis of the visual arts of painting, sculpture, photographic media and non-traditional media World War II to the present. Selected artists of North America and Western Europe will be considered, as well as the institutions of the art world.
<i>Prerequisite(s):</i> 10.00 credits.
ARTH*3640 Objects: Baroque Art and Rococo Art F (3-0) [0.50]
Selected topics investigating the visual arts in Italy, Spain, and France. These may include the study of key practitioners, the development of a complex artistic theory that reflects patterns of local and national discourse and instruction in the arts, the emergence of female artists. Key artists are Caravaggio, Bernini, Artemisia Gentileschi, Borromini, Velazquez et al. (Offered in odd-numbered years.) (Last offering Fall 2007.)
<i>Prerequisite(s):</i> 10.00 credits
ARTH*3780 Gender and Art W (3-0) [0.50]
This course considers how the practice and reception of the visual arts intersect with constructs of gender in contemporary and historical contexts.
<i>Prerequisite(s):</i> 10.00 credits including 2.00 credits in Art History.
ARTH*4050 Seminar in the Americas I W (3-0) [0.50]
Selected topics in the visual arts of the Americas with special emphasis on Pre-Columbian, Latin American, or Aboriginal arts.
<i>Prerequisite(s):</i> A minimum of 14.00 credits including 1 of ARTH*2050, ARTH*2060, ARTH*3050, ARTH*3220

ARTH*4060 Seminar in the Americas II F (3-0) [0.50]
Selected topics in the visual arts of the Americas with special emphasis on the arts in Canada and the USA.
<i>Prerequisite(s):</i> A minimum of 14.00 credits including 1 of ARTH*2070, ARTH*2490, ARTH*3010, ARTH*3060, ARTH*3220
<i>Restriction(s):</i> ARTH*4250
ARTH*4150 Seminar in Western Art I W (3-0) [0.50]
This course examines selected topics in the area of Western Art.
<i>Prerequisite(s):</i> A minimum of 14.00 credits including (ARTH*2540 or ARTH*3540).
ARTH*4160 Seminar in Western Art II F (3-0) [0.50]
This course examines selected topics in the area of Western Art.
<i>Prerequisite(s):</i> A minimum of 14.00 credits including 1 of ARTH*2550, ARTH*2950, ARTH*3100, ARTH*3550, ARTH*3640
ARTH*4550 Questions in Criticism W (3-0) [0.50]
This course examines selected topics in the area of Art Theory, Critical Methodology and Museology.
<i>Prerequisite(s):</i> A minimum of 14.00 credits including (ARTH*2480 or ARTH*3210).
ARTH*4600 Individual Study - Art History S,F,W (3-0) [0.50]
Each student establishes, in consultation with the faculty member chosen, the content of this special study within the area of expertise of that instructor.
<i>Restriction(s):</i> This course is available with the approval of the Director for students who have completed their 5th semester and for whom there is no suitable course available.
ARTH*4620 Museum Studies W (3-0) [0.50]
This seminar course will be offered in conjunction with the staff and facilities of the Macdonald Stewart Art Centre and will deal with historical matters relating to the role of the art museum in western life and the critical day-to-day management of a contemporary one. Students will participate, when possible, in the preparation of a current or forthcoming exhibition in the Centre.
<i>Prerequisite(s):</i> 10.00 credits
ARTH*4850 Honours Thesis I S,F,W (0-9) [0.50]
Under the guidance of a faculty member over two semesters (ARTH*4850 in the first semester and ARTH*4860 in the second semester), the honours student will research and complete a major independent project in art history or criticism for final approval by a faculty member. Recommended for all honours students.
<i>Restriction(s):</i> Registration in semester 7 or 8 and a cumulative average of 70% in Studio and Art History courses. Instructor consent and approval of the Director required.
ARTH*4860 Honours Thesis II S,F,W (0-9) [0.50]
Under the guidance of a faculty member over two semesters (ARTH*4850 in the first semester and ARTH*4860 in the second semester), the honours student will research and complete a major independent project in art history or criticism for final approval by a faculty member. Recommended for all honours students.
<i>Prerequisite(s):</i> ARTH*4850
<i>Restriction(s):</i> Instructor consent and approval of the Director required.

Arts and Sciences

Dean's Office, College of Arts

Registration in ASCI courses is limited to students in the Bachelor of Arts and Sciences degree program.*

ASCI*1000 Society and Science I: Historical Perspectives F (3-0) [0.50]

This course explores historically the complex interrelations between science and society. It focuses on the ways in which science has both shaped, and been shaped by, its larger social and cultural contexts.

Restriction(s): HIST*1250. Registration in the Bachelor of Arts and Sciences degree program.

ASCI*1010 Society and Science II: Current Issues W (3-0) [0.50]

This interdisciplinary course examines scientific and technological activities in modern society, including a number of current controversies. Case studies and debates will be used to examine the multiplicity of impacts and reactions to these activities.

Prerequisite(s): ASCI*1000

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program.

ASCI*2000 Modes of Inquiry and Communication Across Disciplines F,W (3-0) [0.50]

This course considers the process of inquiry and quest for knowledge in the natural and applied sciences, and the social sciences and humanities as they are constituted as disciplines within the modern university. The course will consider the social forces that shape inquiry, including funding for research, and consider the communication of findings, both inside and outside the academy.

Prerequisite(s): ASCI*1000

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program.

ASCI*3000 Arts and Sciences Community Project W (0-3) [0.50]

This course integrates the curricular, co-curricular and cross-disciplinary strands of the Arts and Sciences program through continued academic study and its application, modification, and critique in a community context. Students will conduct research and seminars on a selected topic while simultaneously completing a placement in a community agency appropriate to that topic. (See the B.A.S. program website for topics.)

Prerequisite(s): ASCI*2000

Restriction(s): ASCI*3100. Registration in the Bachelor of Arts and Sciences degree program.

ASCI*3100 Case Studies in Arts and Sciences Research F (3-0) [0.50]

This variable-content course introduces students to case studies in the integration of academic knowledge and practices with social movements, investigating the ways in which cultural, social, and scientific endeavours meet to work on real-world problems. The course may contain both historical and current case studies.

Prerequisite(s): ASCI*2000

Restriction(s): ASCI*3000. Registration in the Bachelor of Arts and Sciences degree program.

ASCI*3700 Independent Studies in Arts/Sciences S,F,W (3-0) [0.50]

This course offers an opportunity for individual students to pursue unique curricular opportunities when they arise and are approved as appropriate to B.A.S. students (e.g., independent reading and/or research under a faculty member's supervision in a research lab or program; a course taken while studying on exchange or abroad; a course developed in conjunction with experiential learning situations, etc.). See the B.A.S. website for learning contracts and other requirements that must be completed well in advance to permit registration for independent studies.

Prerequisite(s): A minimum of 9.00 credits.

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program. Instructor consent required.

ASCI*4000 Arts and Sciences Honours Seminar F,W (3-0) [0.50]

This senior-level integrating course builds on the principles learned in ASCI*2000, and requires research into an area of investigation relevant to the interdisciplinary focus of the program. Students will examine a topic from multiple theoretical and disciplinary perspectives, explore appropriate methodological approaches, prepare working bibliographies and annotations, and report on research. Students who take ASCI*4010 will build on work completed in ASCI*4000.

Prerequisite(s): 12.00 credits including ASCI*2000

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program.

ASCI*4010 Arts and Sciences Honours Research Seminar W (3-0) [0.50]

Under faculty supervision students will plan, develop, peer-edit and complete a major paper on a research topic developed in ASCI*4000 or revised therefrom. Designed to function as a senior-level writing seminar, this course is particularly recommended to students who plan to pursue graduate study and who have a cumulative average of at least 75%.

Prerequisite(s): ASCI*4000

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program.

ASCI*4020 Topics in Arts and Sciences Research F,W (3-0) [0.50]

This variable-content course provides a senior-level seminar experience in the conduct, presentation, and writing of research relevant to the interdisciplinary core of the Bachelor of Arts and Sciences degree program. (See the B.A.S. website for topics.)

Prerequisite(s): 12.00 credits including ASCI*2000

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program.

ASCI*4030 Topics in Arts and Sciences Research F,W (3-0) [0.50]

This variable-content course provides a senior-level seminar experience in the conduct, presentation, and writing of research relevant to the interdisciplinary core of the Bachelor of Arts and Sciences degree program. (See the B.A.S. website for topics.)

Prerequisite(s): 12.00 credits including ASCI*2000

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program.

ASCI*4700 Independent Studies in Arts/Sciences S,F,W (3-0) [0.50]

This course offers an opportunity for individual students to pursue unique curricular opportunities when they arise and are approved as appropriate to B.A.S. students (e.g., independent reading and/or research under a faculty member's supervision in a research lab or program; a course taken while studying on exchange or abroad; a course developed in conjunction with experiential learning situations, etc.) See the B.A.S. website for learning contracts and other requirements that must be completed well in advance to permit registration for independent studies.

Prerequisite(s): A minimum of 14.00 credits.

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program. Instructor consent required.

ASCI*4710 Independent Studies in Arts/Sciences S,F,W (3-0) [0.50]

This course continues work undertaken in ASCI*4700, and will normally be planned in concert with planning for ASCI*4700. This course offers an opportunity for individual students to pursue unique curricular opportunities when they arise and are approved as appropriate to B.A.S. students. See the B.A.S. website for learning contracts and other requirements that must be completed well in advance to permit registration for independent studies.

Prerequisite(s): ASCI*4700

Restriction(s): Registration in the Bachelor of Arts and Sciences degree program. Instructor consent required.

Biochemistry

Department of Molecular and Cellular Biology

BIOC*2580 Introductory Biochemistry S,F,W (3-3) [0.50]

The evolution, chemical structure, and biological roles of the major molecular components of the cell: proteins, nucleic acids, lipids, and carbohydrates, enzymology, intermediary metabolism, with emphasis on catabolic processes.

Prerequisite(s): CHEM*1050 or CHEM*2300

BIOC*3560 Structure and Function in Biochemistry F,W (3-0) [0.50]

This course develops the understanding of biochemical processes, by examining the enzymatic molecular mechanisms underlying specific cellular and physiological systems. Examples may include oxygen binding/transport and the evolution of globin genes/proteins; regulation of carbohydrate and lipid metabolism; proteins that change shape, including enzymes, membrane proteins, and prion proteins, blood clotting; neurotransmission.

Prerequisite(s): BIOC*2580

BIOC*3570 Analytical Biochemistry S,F (3-3) [0.50]

The tools and techniques by which biological molecules are isolated, separated, identified, and analyzed. Detailed discussion of experimental methods for macromolecule purification characterization.

Prerequisite(s): (CHEM*2400 or CHEM*2480), BIOC*2580

Restriction(s): MICR*3110

BIOC*4520 Metabolic Processes F (3-0) [0.50]

An in-depth study of the role of bioenergetics, regulation, and chemical mechanisms in carbohydrate, lipid, and nitrogen metabolism.

Prerequisite(s): BIOC*3560 or BIOC*3570

BIOC*4540 Enzymology W (3-4) [0.50]

A laboratory-intensive course. Enzyme active sites and the mechanisms of enzyme action; enzyme kinetics and regulation; recombinant proteins and site-directed mutagenesis as tools for understanding enzymes.

Prerequisite(s): BIOC*3560 (may be taken concurrently), BIOC*3570

BIOC*4580 Membrane Biochemistry W (3-0) [0.50]

An examination at the molecular level of structure and functions of cell membranes, cell surfaces and associated structures. Topics may include: membrane lipids; membrane protein structure; membrane transporters; ATP production; cytoskeleton; cell surface carbohydrates; membrane biogenesis; signal transduction.

Prerequisite(s): BIOC*3560 or BIOC*3570

Biology

Department of Human Health and Nutritional Sciences

Department of Integrative Biology

Department of Molecular and Cell Biology

BIOL*1020 Introduction to Biology F (3-2) [0.50]

This course will introduce important concepts concerning the organization of life on our planet, from cells to ecosystems. The dynamic and interactive nature of all living systems will be emphasized. This course will be valuable for students without 12U or OAC biology who are interested in environmental issues, medicine, advances in biotechnology and related topics.

Restriction(s): BIOL*1030, BIOL*1040, or equivalent

BIOL*1030 Biology I F,W (3-3) [0.50]

A lecture and laboratory course which introduces the concepts and controversies in contemporary biology and their implications. Using an integrative approach, the course examines some of the basics of biology and two of the common challenges of life, acquisition and processing of nutrients and information flow. How these challenges are faced by animals, microbes and plants and the diversity of structures and processes that have evolved in response to them will be discussed. This is the first course in a two course biology series. When you select it, you are strongly advised to take the second course, BIOL*1040, immediately thereafter. Material from BIOL*1030 will be referred to in BIOL*1040 to emphasize the integrated nature of biology. Students lacking 4U or OAC Biology should consult with their program counsellor prior to taking BIOL*1030.

BIOL*1040 Biology II F,W (3-3) [0.50]

A continuation of BIOL*1030. A lecture and laboratory course which continues with additional challenges of life faced by animals, microbes and plants and the diversity of structures and processes that have evolved in response to them. To indicate the value of biology to society, some topical issues in biology will be addressed. This is the second course in a two course biology series and should be taken immediately after successfully completing BIOL*1030. Materials introduced in BIOL*1030 will be built on and referred to in BIOL*1040.

Prerequisite(s): BIOL*1030

BIOL*2060 Ecology F,W (3-1) [0.50]

This is a basic course that presents a discussion of the ecology of plants, animals, fungi and bacteria as individual organisms, interacting populations, communities and ecosystems. Lectures and discussion groups are used to demonstrate the tremendous difficulty of interpreting ecological data derived from field studies. The value of laboratory-based research in ecology will also be discussed. The course will be important for anyone who wishes to understand what we know and need to know about the way ecological systems work. Department of Integrative Biology. (Also offered through distance education format.)

Prerequisite(s): BIOL*1040

BIOL*2210 Introductory Cell Biology S,F,W (3-0) [0.50]

The structure and function of eukaryotic cells with emphasis on multicellular organisms. Role of subcellular structures and organelles in cellular processes of bioenergetics, division, differentiation, motility, secretion, nutrition, and communication. (Also offered through distance education format.)

Prerequisite(s): BIOL*1040

BIOL*2250 Biostatistics and the Life Sciences W (3-2) [0.50]

This course in biostatistical methods will emphasize the design of research projects, data gathering, analysis and the interpretation of results. Statistical concepts underlying practical aspects of biological research will be acquired while working through the process of scientific enquiry. Weekly computer laboratory sessions will focus on practical data visualization and statistical analysis using computer statistical packages. Simple parametric and nonparametric methods are reviewed, followed by more advanced topics that will include some or all of the following: two factor ANOVA and multiple regression, and introductions to discriminant analysis, cluster analysis, principle components analysis, logistic regression, and resampling methods. (Also listed as STAT*2250.) Departments of Mathematics and Statistics and Integrative Biology.

Prerequisite(s): STAT*2040 or STAT*2100

Equate(s): STAT*2250

Restriction(s): STAT*2050

BIOL*3010 Laboratory and Field Work in Ecology F (0-6) [0.50]

This course emphasizes field and laboratory work in ecology. Students will gain experience in experimental designs, sampling, analysis and interpretation of data collected to answer ecological questions. Local field sites will be used to run in-course experiments. Critical thinking about ecological issues relevant to society will be emphasized. Department of Integrative Biology.

Prerequisite(s): BIOL*1040 or STAT*2040

Co-requisite(s): BIOL*2060 or BIOL*3110

BIOL*3050 Mycology W (3-3) [0.50]

This course provides an introduction to the fungal lifestyle and to classification and evolution of the major groups of fungi, including microfungi, yeasts and other eukaryotic microbes. The characteristics of fungal cell structure, genetics and metabolism will be presented, and fungal reproduction and sporulation processes discussed with reference to the life cycles of representative forms. The ecological and economic importance of fungi will be demonstrated by considering fungal ecology, symbiotic relationships, mycotoxins and pathogenic fungi and industrial applications of fungi and yeasts. Laboratory work will provide familiarity with procedures for culturing, examining and identifying fungi and yeasts. Department of Integrative Biology and Department of Molecular and Cellular Biology.

Prerequisite(s): BOT*2100 or MICR*2030

Restriction(s): BOT*3200, MICR*3100

BIOL*3110 Population Ecology F,W (3-1) [0.50]

An exploration of the structure and dynamics of animal and plant populations. The first part of the course will focus on demographic characteristics of populations and simple models of population growth and natural regulation. The second part of the course will concentrate on a variety of population processes, including predator-prey interactions, spatial dynamics, and disease-host interactions, and consider how these processes affect population dynamics. A quantitative approach emphasizing the use of mathematical models, graphical analysis, and statistics will provide the basic conceptual framework, which will be illustrated by selected case studies. Department of Integrative Biology.

Prerequisite(s): (MATH*1080 or MATH*1200), STAT*2040

BIOL*3120 Community Ecology F,W (3-1) [0.50]

A course on the structure and dynamics of communities, dealing with both theoretical and applied aspects of community ecology. Emphasis is on the modern quantitative view of community ecology, and on the development of problem-solving skills. Department of Integrative Biology.

Prerequisite(s): BIOL*3110

BIOL*3130 Conservation Biology W (3-0) [0.50]

An introduction to the biological basis for the management of wild, living resources, including freshwater and marine fish and wild life. Topics will include an overview of processes related to resource population abundance and dynamics, theory and practice of sustained-yield harvesting, and conservation and restoration of endangered species and/or ecosystems. Both theoretical and applied aspects of resource management will be emphasized. Department of Integrative Biology.

Prerequisite(s): BIOL*3110

BIOL*3300 Applied Bioinformatics W (3-2) [0.50]

New molecular genetic and information technologies have enabled biologists to produce and to access large and informative data sets. This course will provide an introductory understanding of the databases and methods used in computational molecular data analysis. Topics covered will include introducing the UNIX-related operating system, reviewing major molecular databases and their structures, constructing sequence alignments, constructing phylogenies, and finding motifs and genes in biological sequences. Lab sessions will include an introduction to Unix and Perl for the biologist and hands-on use of several molecular data analysis programs.

Prerequisite(s): MBG*2020, (STAT*2040 or STAT*2100)

BIOL*3450 Introduction to Aquatic Environments F,W (3-3) [0.50]

An introduction to the structure and components of aquatic ecosystems, how they are regulated by physical, chemical and biological factors, and the impact of humans on these environments and their biota. Laboratory periods will centre around computer-based exercises and simulation of aquatic systems. Department of Integrative Biology. (Also offered through distance education format.)

Prerequisite(s): BIOL*1040, (CHEM*1050 or CHEM*1310), ZOO*2070 is strongly recommended

BIOL*4050 Advanced Eukaryotic Microbiology F (3-0) [0.50]

This course will focus on several selected topics concerning yeasts, fungi, and protists. It will emphasize the ecology of fungi in natural environments, fungi pathogens of animals and plants, use of yeasts and fungi as model systems in biology, and other topics in contemporary eukaryotic microbiology. Department of Integrative Biology and Department of Molecular and Cellular Biology. (Offered in even-numbered years.)

Prerequisite(s): BIOL*3050

BIOL*4060 Restoration Ecology W (3-1) [0.50]

An overview of the process used to restore naturally occurring ecological systems that have been degraded by human activity. Students will review restoration projects in Canada and abroad, to become more familiar with experimental design, analysis and data management, as it is currently used in restoration ecology. Emphasis will be placed on the scientific method and the role of ecological theory. Political, social, and economic aspects of restoration will also be considered. Department of Integrative Biology.

Prerequisite(s): BIOL*2060 or (BIOL*3110 and BIOL*3120)

BIOL*4100 Molecular Evolution and Phylogenetics F (2-2) [0.50]

This course is designed to provide students with an appreciation for the uses of molecular data in the study of evolutionary processes. An overview of the principles of molecular data analysis using a phylogenetic approach will be given. In addition, the importance of incorporating evolutionary history into biodiversity research and other applied topics will be emphasized. Laboratory sessions will be devoted to practical training in analytical tools using specialized computer software, and for student presentation of independent research projects. The course will involve practical training in molecular data analysis using a phylogenetic approach and discussion of current topics from the primary literature. Department of Integrative Biology.

Prerequisite(s): MBG*3000 or ZOO*3300

BIOL*4110 Ecological Methods F (3-3) [0.75]

An advanced course designed to present theoretical and practical aspects of research methods in ecology. Emphasis will be placed on experimental design, sampling, population estimation, statistical inference, and community characteristics of producers and consumers. Students will participate in research projects of their own design, and will gain experience in preparing research proposals, research papers and posters, and making oral presentations. Department of Integrative Biology.

Prerequisite(s): BIOL*3010, BIOL*3120, STAT*2040

BIOL*4120 Evolutionary Ecology W (3-1) [0.50]

An examination of common ecological circumstances faced by plants and animals and the morphological, behavioral and life history characteristics that have evolved in response. Particular emphasis will be placed on evolutionary processes and on adaptive aspects of thermoregulation, foraging strategies, spatial distribution, social and reproductive strategies. The course will emphasize both the theoretical basis and the empirical evidence for ecological adaptation. There is a 1-hour seminar each week for class discussion of selected lecture topics. Department of Integrative Biology.

Prerequisite(s): BIOL*3110, MBG*2000, (MBG*3000 or ZOO*3300)

BIOL*4150 Wildlife Conservation and Management W (3-0) [0.50]

This course builds on previous courses in population and community ecology to evaluate the long-term dynamics of threatened populations in the context of human intervention. The course will also provide a "hands-on" introduction to computer modeling, with application to contemporary issues in population ecology and resource management. Lectures will be drawn from the following topics: growth and regulation of single populations, long-term persistence of ecological communities, harvesting, bio-economics, and habitat modification. Department of Integrative Biology.

Prerequisite(s): BIOL*3110 or BOT*2050

Restriction(s): ZOO*4110

Biomedical Sciences

Department of Biomedical Sciences

Some Biomedical Science courses are Priority Access Courses and enrollment may be restricted to particular programs or specializations. See department for more information.

Additional course listings may be found in the course descriptions for Toxicology and Veterinary Medicine.

BIOM*2000 Concepts of Physiology F,W (3-0) [0.50]

An introductory course covering the fundamental integrative aspects of human physiology. The basic physiology of the cardiovascular, respiratory, gastrointestinal, nervous, endocrine, renal and reproductive systems will be discussed. (Also offered in distance education Format.)

Restriction(s): ANSC*3080, BIOM*3100, HK*3940, ZOO*3200, ZOO*3210. Not available to B.Sc. Students in biological science specializations.

BIOM*3000 Mammalian Neuroanatomy W (3-2) [0.50]

The basic organization of the mammalian nervous system. Includes 3 dimensional examination and dissection of the spinal cord, brain stem, cerebellum and cerebral hemispheres and study of serial sections. Emphasis is on the morphological basis of function.

Prerequisite(s): 1 of BIOL*1040, PSYC*2410, equivalent

BIOM*3010 Laboratory Animal Anatomy F (2-3) [0.50]

The anatomy of common laboratory animals including primates. Emphasis is placed on similarities of the basic mammalian plan. Functional differences are considered. An introduction to avian anatomy is included.

Prerequisite(s): BIOL*1040

BIOM*3030 Biomedical Histology F (3-3) [0.75]

This histology course is designed for students with interests in Bio-Medical Sciences and Toxicology. Basic tissue types and major organ systems, will be examined focusing on structural/functional relationships. Human and common experimental mammals will be emphasized.

Prerequisite(s): BIOL*2210, BIOC*2580

Restriction(s): Priority Access Courses. Enrolment may be restricted to particular programs or specializations. See department for more information.

BIOM*3040 Medical Embryology W (2-3) [0.50]

The patterns and principles of fertilization and normal embryonic and fetal development of mammalian organ systems are covered with a focus on the medical implications. The teratology of structural and functional prenatal anomalies in development is mentioned.

Prerequisite(s): BIOL*1040 (an anatomy course is recommended)

BIOM*3090 Principles of Pharmacology W (3-0) [0.50]

This course will introduce students to the basic principles of pharmacology. Topics to be covered include pharmacokinetics and drug-receptor interactions as well as the mechanism of action and toxicity of drugs acting on the cardiovascular and central nervous system.

Prerequisite(s): BIOC*2580, (1 of BIOM*3100, HK*3940, ZOO*3200)

Co-requisite(s): if BIOM*3100 taken, BIOM*3110

BIOM*3100 Mammalian Physiology I F (3-0) [0.50]

The first part of a two-semester sequence. A series of lectures concerning the normal functioning of the body treating in a detailed manner the physiology of the nervous, endocrine, and reproductive systems.

Prerequisite(s): BIOC*2580

BIOM*3110 Mammalian Physiology II W (3-0) [0.50]

This second lecture course in mammalian physiology deals with the cardiovascular and digestive systems and with homeostasis as reflected in respiratory and renal function.

Prerequisite(s): BIOM*3100 or HK*3940

BIOM*3120 Laboratory Exercises in Mammalian Physiology W (0-3) [0.25]

A series of laboratory exercises in which the students measure cardiovascular, neuromuscular and respiratory parameters on themselves using a computer based acquisition system. These exercises complement the lectures in BIOM*3100, BIOM*3110, and HK*3940.

Prerequisite(s): BIOM*3100 or HK*3940

Co-requisite(s): BIOM*3110

BIOM*4010 Teratology F (2-3) [0.50]

The principles and practices of the study and analysis of birth defects in individuals and populations will be examined through lectures, lab projects and seminars. An on-going theme is the medical, social and moral/ethical impact of birth defects and testing for teratogenic safety.

Prerequisite(s): (1 of BIOM*3010, HK*3402, ZOO*2090), (BIOM*3040 or ZOO*2100), (BIOM*3120 or HK*3940)

BIOM*4020 Physiology of Digestion F (3-1) [0.50]

A comparative study of the function and control of the mammalian digestive system with an emphasis on domestic species and on the human. (Offered in even-numbered years.)

Prerequisite(s): 1 of BIOM*3110, HK*3940, ZOO*3210, or instructor consent.

BIOM*4030 Endocrine Physiology W (3-0) [0.50]

The course is designed to provide a senior level introduction to the endocrine discipline, focusing largely on mammals, with some examples taken from other vertebrate taxa. The course will give an introduction to the historical developments in the discipline, explore the actions of hormones and other chemical signalling pathways, examine processes of hormone synthesis and secretion. The focus of the course will be the integrative nature of hormone actions in the regulations of various physiological processes in animal systems, such as metabolic control, growth, and reproduction. The course will also explore aspects of "non-classical" endocrinology, endocrine dysfunctional states and emerging environmental concerns related to endocrine dysfunction.

Prerequisite(s): BIOC*2580, [1 of BIOM*3110, HK*3940, (ZOO*3200, ZOO*3210)]

BIOM*4050 Biomedical Aspects of Aging F (3-0) [0.50]

Aging is accompanied by alterations in the physiological and biochemical functioning of body organ systems. The relationship between aging and the cardiovascular, respiratory, digestion/nutrition and reproductive systems will be discussed as will homeostatic functions associated with bone metabolism and fluid balance.

Prerequisite(s): BIOM*3110 or HK*3940

BIOM*4090 Pharmacology F (3-0) [0.50]

Topics covered in this course include drugs used in the treatment of inflammatory, allergic, hormonal, infectious, neoplastic and hemorrhagic/thromboembolic disease. The focus will be on drug targets and mechanisms of action that explain therapeutic and toxicological effects.

Prerequisite(s): BIOM*3090

BIOM*4110 Mammalian Reproductive Biology F (2-2) [0.50]

This multidisciplinary course provides an introduction to various aspects of mammalian reproduction of medical and veterinary significance. The course will cover the normal physiology and gross and micro anatomy of the female and male reproductive systems including the brain. Placentation will also be addressed. The impact of the normal biology on social issues will be discussed.

Prerequisite(s): (1 of BIOM*3010, HK*3402, ZOO*2090), (BIOM*3030 or ZOO*3000), (1 of BIOM*3110, HK*3940, ZOO*3210)

BIOM*4120 Mammalian Reproductive Biotechnologies W (2-2) [0.50]

This course examines medically significant aspects of applied mammalian reproduction in detail. The pre-clinical medical disciplines will provide the basis for the analysis of key reproductive processes, which will be presented in the context of modern techniques and applications of reproductive manipulation and biotechnologies, and the ethical problems they pose.

Prerequisite(s): BIOM*3040, BIOM*4110, ZOO*2100

BIOM*4420 Research Modules W (0-6) [0.50]

This course is taught as a series of modules on various research topics, techniques and approaches that are current in laboratories of the Departments of Biomedical Sciences and Human Health and Nutritional Sciences. This course is primarily aimed at students in the Neurosciences, Biomedical Sciences, Human Kinetics and Nutritional and Nutraceutical Sciences programs, who prefer a more structured approach to their hands-on research experience.

Prerequisite(s): 14.00 credits. Recommended: HK*4410

Equate(s): HK*4420

Restriction(s): BIOM*4510, BIOM*4521/2, HK*4360, HK*4371/2. Instructor consent required.

BIOM*4500 Research in Biomedical Sciences I S,F,W (0-6) [0.50]

Independent theoretical and/or practical research of a current topic in any of the biomedical sciences (such as anatomy, physiology, pharmacology, toxicology, genetics, biochemistry). Students work under the supervision of individual faculty. Faculty consent must be obtained prior to being admitted into the course by the course coordinator.

Prerequisite(s): 14.00 credits

Restriction(s): Instructor consent required. Enrolment restricted to Bio-Medical Science majors or Neuroscience minors.

BIOM*4510 Research in Biomedical Sciences II S,F,W (0-12) [1.00]

Students will conduct independent laboratory research on a current topic in any of the biomedical sciences (such as anatomy, physiology, pharmacology, toxicology, genetics, biochemistry). Students work under the supervision of individual faculty. Faculty consent must be obtained prior to being admitted into the course by the course coordinator.

Prerequisite(s): 14.00 credits

Restriction(s): BIOM*4521/2. Instructor consent required. Enrolment restricted to Bio-Medical Science majors or Neuroscience minors.

BIOM*4521 Research in Biomedical Sciences II S,F,W (0-6) [0.50]

First part of the two-semester course BIOM*4521/2. Refer to BIOM*4521/2 for course description.

Prerequisite(s): 14.00 credits

Restriction(s): BIOM*4510. Instructor consent required. Enrolment restricted to Bio-Medical Science majors or Neuroscience minors.

BIOM*4521/2 Research in Biomedical Sciences II S-F,F-W,W-S [1.00]

Independent research of a current topic in any of the biomedical sciences (such as anatomy, physiology, pharmacology, toxicology, genetics, biochemistry). Students work under the supervision of individual faculty. Faculty consent must be obtained prior to being admitted into the course by the course coordinator. This is a two-semester course offered over consecutive semesters. When you select it you must select BIOM*4521 in the first semester and BIOM*4522 in the second semester. A grade will not be assigned in BIOM*4521 until BIOM*4522 has been completed.

Prerequisite(s): 14.00 credits

Restriction(s): BIOM*4510. Instructor consent required. Enrolment restricted to Bio-Medical Science majors or Neuroscience minors.

BIOM*4522 Research in Biomedical Sciences II F,W,S (0-6) [0.50]

Second part of the two-semester course BIOM*4521/2. Refer to BIOM*4521/2 for course description.

Prerequisite(s): BIOM*4521.

Botany

Department of Integrative Biology

Department of Molecular and Cellular Biology

Additional course listings may be found in the course descriptions for Biology and Plant Biology.

Senior students are encouraged to inquire about graduate courses, particularly in the areas of Vascular Plant Systematics and Morphology, that can be taken for credit.

BOT*1200 Plants and Human Use W (3-0) [0.50]

This course will examine past and present interactions between humans and plants with emphasis on major changes in civilization and cultures as a result of these interactions. The approach will be to consider several case studies of how unique structural and chemical properties of various plant organs have played a role in their use by humans. Not an acceptable course for students in B.S.C. Biological Sciences Programs. (Also offered through distance education format.)

Restriction(s): BIOL*1030, BIOL*1040

BOT*2000 Plants, Biology and People F (3-1) [0.50]

The course deals with the biology of plant species of historical and cultural importance. It will focus on plants used as a source of drugs, herbal medicines, industrial raw materials, food products, perfumes and dyes. Examples of plant products that will be looked at include cocaine, chocolate, tea, opium, hemp and ginseng. The relevant morphology, physiology, distribution and ethnobotany of these plant species will be discussed.

Prerequisite(s): BIOL*1040

Restriction(s): BOT*1200

BOT*2030 Plants in the Ontario Landscape F (3-3) [0.50]

In this course you will learn to identify plants and their habitats in the Ontario landscape. In addition, you will apply methods typically used for field studies in plant biology. Through a series of field exercises, this course will foster an appreciation of local natural areas and provide a foundation for further studies and careers in ecology and environmental assessment.

Prerequisite(s): BIOL*1040

BOT*2050 Plant Ecology F (3-3) [0.50]

This course supplies the tools needed to assess plant populations and communities quantitatively. Field work is carried out at semi-natural sites on campus to provide practical experience in data collection. These data are analyzed to address conceptual and practical issues raised in lectures. This course is especially valuable for students interested in plant or wildlife biology and in environmental management.

Prerequisite(s): BIOL*1040

BOT*2100 Life Strategies of Plants F,W (3-3) [0.50]

This course introduces the structures and processes used by plants in the greening of our planet, and how and why plants are basic to the functioning of the biosphere. This course includes hands-on experience in examining the cells, tissues and architectures of plants as well as selected processes of plant function.

Prerequisite(s): BIOL*1040

BOT*3310 Plant Growth and Development W (3-3) [0.50]

The unique function and structure of plants is explored in relation to their growth, survival and adaptation to the environment. The control of growth and development by environmental and hormonal signals is explained through lectures and "hands-on" laboratories.

Prerequisite(s): BIOL*1040

BOT*3410 Plant Anatomy F (3-3) [0.50]

The intricate internal structure of plants is explored in this course. The development, pattern and significance of cells, tissues and organs will be emphasized as well as the histological and microscopical methods used to study them. The lab emphasizes interpretation of plant structure as it relates to function.

Prerequisite(s): BIOL*1040

BOT*3710 Classification and Morphology of Seed Plants W (3-3) [0.50]

The interpretation of floral and vegetative morphology for purposes of classification and identification of flowering plants and conifers; flower and cone structure as related to function; principles of plant classification, fundamentals of nomenclature and economic importance of selected plant families are covered. Labs stress interpretation of plant form and plant identification at the ranks of family to species by use of a key to the flora of North-Eastern North America.

Prerequisite(s): BOT*2100

BOT*4380 Metabolism in the Whole Life of Plants W (3-0) [0.50]

This course follows the developmental changes that take place in plants, and explores the molecular, biochemical and physiological mechanisms that are responsible for development. Emphasis will be placed on the importance of modern experimental methods and critical evaluation of data.

Prerequisite(s): BIOL*1040, BIOC*2580

Business

Department of Business - College of Management and Economics

BUS*2220 Financial Accounting F,W (3-0) [0.50]

An introductory course designed to develop an understanding of current accounting principles and their implication for published financial reports of business enterprises. The course approaches the subject from the view of the user of accounting information rather than that of a person who supplies the information.

Prerequisite(s): 1 of ECON*1050, ECON*1100, ENGG*3240

Equate(s): AGECE*2220

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

BUS*2230 Management Accounting F,W (3-0) [0.50]

This course emphasizes the use of accounting information to facilitate effective management decisions. Topics include cost determination, cost control and analysis, budgeting, profit-volume analysis and capital investment analysis.

Prerequisite(s): AGECE*2220 or BUS*2220

Equate(s): AGECE*2230

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

BUS*3320 Financial Management F,W (3-0) [0.50]

The viewpoint taken in the course is that of the senior financial officer of a business firm. The focus is on the management of cash, accounts receivable, inventory and short and intermediate term liabilities. Emphasis is placed on the analysis and forecasting of financial statements, and financial modeling for planning and controlling the growth of the business enterprise.

Prerequisite(s): 1 of AGECE*2230, BUS*2230, HAFA*3070, HTM*3070

Equate(s): AGECE*3320

Restriction(s): Registration in BCOM programs, BA Management Economics programs, BA International Development area of emphasis Economic & Business Development or BA European Studies area of emphasis in European Business Studies.

BUS*3330 Intermediate Accounting F (3-0) [0.50]

A critical evaluation of accounting concepts, principles and practices in relation to both the traditional and current value accounting measurement models. Emphasis will be on the effect of alternative accounting practices and measurement models on income determination and asset valuation.

Prerequisite(s): 10.00 credits including AGECE*2220 or BUS*2220

Equate(s): AGECE*3330

BUS*4250 Business Policy F,W (3-0) [0.50]

Business policy is a synthesis of the principles of business management with emphasis upon the formation of business decisions and policies. The purpose of this course is to enable the student to draw on analytic tools and factual knowledge from all other courses in analyzing comprehensive business problems.

Prerequisite(s): AGECE*3310, (AGECE*3320 or BUS*3320), ECON*3560

Equate(s): AGECE*4250

Restriction(s): Registration in semester 6 or higher. Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

BUS*4550 Applied Business Project I S,F,W (3-0) [0.50]

This is a project-based independent study course on a business issue for third or fourth year students in an agreed program of study with the instructor.

Prerequisite(s): 10.00 credits

Restriction(s): AGECE*4550. Instructor consent required.

BUS*4560 Applied Business Project II S,F,W (3-0) [0.50]

This course provides an opportunity to conduct a second independent study on a business issue for third or fourth year students in an agreed program of study with the instructor.

Prerequisite(s): BUS*4550

Restriction(s): AGECE*4560. Instructor consent required.

Chemistry

Department of Chemistry

Credit may be obtained in only 1 of CHEM*1040, CHEM*1100; 1 of CHEM*2400, CHEM*2480; 1 of CHEM*2820, CHEM*2880.

*A 1 hour tutorial is scheduled in the third hour of the time slot. Laboratory period extends 3 hours.

Laboratory Deposit: During the first week of classes, a refundable laboratory deposit of \$10.00 will be collected from each student who registers in any of the courses in Chemistry, designated below by the symbol "+". Breakages will be charged against this deposit.

CHEM*1040 General Chemistry I F,W (3-3) [0.50]

A course which introduces concepts of chemistry, the central link between the physical and biological sciences. Principles discussed include chemical bonding, simple reactions and stoichiometry, chemical equilibria and solution equilibria (acids, bases, and buffers), and introductory organic chemistry.

Prerequisite(s): 1 of 4U Chemistry, OAC Chemistry (or equivalent), CHEM*1060

Restriction(s): CHEM*1100, CHEM*1300

CHEM*1050 General Chemistry II F,W (3-3) [0.50]

An introductory study of the fundamental principles governing chemical transformations: thermodynamics (energy, enthalpy, and entropy); kinetics (the study of rates of reactions); and redox/electrochemistry.

Prerequisite(s): CHEM*1040

Restriction(s): CHEM*1300, CHEM*1310

CHEM*1060 Introductory Chemistry F (3-0) [0.50]

A course stressing fundamental principles of chemistry, designed for students without 4U or OAC Chemistry or equivalent. Topics include: atomic theory, the periodic table, stoichiometry, properties of gases and liquids, acid-base concepts and chemical equilibria. This course is intended only for students who require the equivalent of 4U or OAC Chemistry in order to proceed to CHEM*1040 or CHEM*1300.

CHEM*1100 Chemistry Today F (3-0) [0.50]

A chemistry course for non-scientists. This course will outline the involvement of chemistry in our daily lives and will provide an appreciation of chemistry from atoms to important complex molecules. Topics will include energy sources, air and water pollution, natural and synthetic polymers, household chemicals, foods, drugs and biochemicals.

Restriction(s): CHEM*1040, CHEM*1300

CHEM*2060 Structure and Bonding F (3-2) [0.50]

Applications of symmetry, simple crystal structures and principles of bonding. Molecular orbital theory is used to explain the fundamental relationship between electronic and molecular structure. This course provides the elementary quantum background for an understanding of the electronic structures of atoms and molecules.

Prerequisite(s): CHEM*1050, MATH*1210, PHYS*1010

CHEM*2070 Structure and Spectroscopy S,W (3-2) [0.50]

An introduction to spectroscopy and its relationship to molecular structure and dynamics. Rotational, vibrational, electronic and magnetic resonance spectroscopies will be studied. Concepts introduced in CHEM*2060 will be applied to chemical and biochemical problems through spectroscopic techniques. Central to this course is the use of spectroscopy for the determination of molecular structures and the investigation of molecular motions.

Prerequisite(s): CHEM*2060

CHEM*2300 Chemical Reactivity F (3-3) [0.50]

A general coverage of the reactivity of the elements and some of their compounds, with an emphasis on the compounds of carbon.

Prerequisite(s): CHEM*1050 or CHEM*1310

Restriction(s): CHEM*2700

CHEM*2400 Analytical Chemistry I S,F,W (2-6) [0.75]

Quantitative analysis of important inorganic species in solution by volumetric, gravimetric and spectrophotometric techniques. Spreadsheet applications to solution equilibria and data analysis. This course is intended to build the foundations of good analytical laboratory practice.

Prerequisite(s): CHEM*1050

Restriction(s): CHEM*2480

CHEM*2480 Analytical Chemistry I S,F,W (2-3) [0.50]

Same as CHEM*2400 with a 3 hour laboratory component.

Prerequisite(s): CHEM*1050 or CHEM*1310

Restriction(s): CHEM*2400

CHEM*2700 Organic Chemistry I S,W (3-3) [0.50]

An introduction to organic chemistry, stereochemistry, discussion of the major mechanisms and related reactions: nucleophilic substitution and elimination, electrophilic addition, free radical reactions, electrophilic aromatic substitution, nucleophilic addition and nucleophilic acyl substitution.

Prerequisite(s): CHEM*1050

Restriction(s): CHEM*2300

CHEM*2820 Thermodynamics and Kinetics F (3-3) [0.50]

The laws and applications of chemical thermodynamics and chemical kinetics.

Prerequisite(s): CHEM*1050, (MATH*1210 or MATH*2080)

Restriction(s): CHEM*2880

CHEM*2880 Physical Chemistry F (3-2) [0.50]

A survey course for students who are not specializing in chemistry or chemical physics. Topics include basic thermodynamics, chemical equilibrium, macromolecular binding, chemical kinetics, enzyme kinetics, transport processes, colligative properties and spectroscopy. This course describes macroscopic observable properties of matter in terms of molecular concepts.

Prerequisite(s): CHEM*1050, (1 of MATH*1000, MATH*1080, MATH*1200)

Restriction(s): CHEM*2820

CHEM*3360 Environmental Chemistry and Toxicology S,W (3-0) [0.50]

The chemistry of the natural environment; the influence of pollutants upon the environment, including methods of introduction of pollutants to, and removal of pollutants from the environment. (Also listed as TOX*3360.)

Prerequisite(s): CHEM*1050

Equate(s): TOX*3360

Restriction(s): CHEM*1310

CHEM*3430 Analytical Chemistry II: Instrumental Analysis S,W (3-3) [0.50]

Methods for the separation, identification and quantification of substances in the solid, liquid and vapour states. Emphasis will be placed on modern instrumental methods and trace analysis.

Prerequisite(s): (CHEM*2400 or CHEM*2480), CHEM*2070 (may be taken concurrently)

Restriction(s): TOX*3300

CHEM*3440 Analytical Chemistry III: Analytical Instrumentation F (3-3) [0.50]

Analytical Instrumentation, data acquisition, processing and applications in Chemistry and Biological Chemistry.

Prerequisite(s): CHEM*3430

CHEM*3640 Chemistry of the Elements I F (3-3) [0.50]

A comprehensive introduction to concepts used by inorganic chemists to describe the structure, properties, and reactivity of compounds of the main group elements. The most important concepts covered are: Electronic Structure of Atoms, Symmetry, MO theory, Acids and Bases, Structure of Solids, Trends in the Periodic System.

Prerequisite(s): CHEM*2070

CHEM*3650 Chemistry of the Elements II W (3-3) [0.50]

The chemistry and structure of transition metal compounds; electronic spectral and structural properties of transition metal complexes; mechanisms of their substitution and redox reactions. Introduction to organometallic chemistry.

Prerequisite(s): CHEM*3640

CHEM*3750 Organic Chemistry II S,F (3-3) [0.50]

A continuation of the coverage of fundamental aspects of organic chemistry using an assimilation of carbonyl chemistry, unsaturated systems and carbon-carbon bond forming processes to acquaint students with methods of organic synthesis. Topics also include an introduction to spectroscopic methods for the identification of organic compounds.

Prerequisite(s): CHEM*2700

CHEM*3760 Organic Chemistry III W (3-3) [0.50]

An in-depth treatment of various aspects of organic chemistry. This will include such topics as the chemistry of heterocycles, bio-organic chemistry, polar rearrangements, organic photochemistry and a detailed discussion of organic spectroscopy.

Prerequisite(s): CHEM*2070, CHEM*3750

CHEM*3860 Quantum Chemistry F (3-1) [0.50]

Elementary quantum mechanics for the understanding of the electronic structure of atoms and molecules.

Prerequisite(s): CHEM*2070, MATH*2170

CHEM*3870 Symmetry and Spectroscopy W (3-3) [0.50]
Elementary group theory with applications to molecular spectroscopy. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> CHEM*2070, (MATH*2150 or MATH*2160)
CHEM*4010 Chemistry and Industry W (3-0) [0.50]
This course examines industrial processes for the production of organic and inorganic chemicals. The environmental impact and the challenges of a large-scale operation will be considered alongside the actual chemical processes involved. <i>Prerequisite(s):</i> (CHEM*2300 or CHEM*2700), (CHEM*3430 or TOX*3300), (MATH*1210 or MATH*2080)
CHEM*4400 Advanced Topics in Analytical Chemistry W (3-0) [0.50]
Recent developments in instrumental methods of chemical analysis. A typical selection will include topics from the areas of surface analysis and the applications of lasers in chemical analysis. <i>Prerequisite(s):</i> CHEM*3430 or CHEM*3450
CHEM*4620 Advanced Topics in Inorganic Chemistry F (3-0) [0.50]
A contemporary treatment of subjects of current interest in modern inorganic chemistry. Possible topics include solid state chemistry and organometallic chemistry. <i>Prerequisite(s):</i> CHEM*3650
CHEM*4630 Bioinorganic Chemistry W (3-0) [0.50]
The role and importance of transition metal systems in biological processes. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> BIOC*2580, CHEM*3650 (may be taken concurrently) <i>Co-requisite(s):</i> CHEM*3650
CHEM*4720 Organic Reactivity W (3-0) [0.50]
Introduction to physical organic chemistry, including discussion of reactive intermediates, substituent effects, medium effects, the mechanisms of organic reactions and the theoretical description of the bonding in organic molecules. (Offered in even-numbered years.) <i>Prerequisite(s):</i> CHEM*3760 (may be taken concurrently)
CHEM*4730 Synthetic Organic Chemistry F (3-0) [0.50]
Introduction to synthetic organic chemistry, including discussion of retrosynthetic analysis, natural products and organic reactions. The integration of these topics for the rational design of synthetic schemes will also be discussed. <i>Prerequisite(s):</i> CHEM*3760 or XSEN*4020
CHEM*4740 Topics in Bio-Organic Chemistry F (3-0) [0.50]
This course covers the principles, methods and techniques of current bio-organic chemistry with emphasis on modern synthetic and analysis methods applied to biological molecules, a molecular based approach to structure recognition, and an introduction to molecular modeling and drug design. <i>Prerequisite(s):</i> BIOC*2580, CHEM*3750
CHEM*4880 Topics in Advanced Physical Chemistry W (3-0) [0.50]
Selected topics in advanced physical chemistry. (Offered in even-numbered years.) <i>Prerequisite(s):</i> (CHEM*2820 or PHYS*3240), (CHEM*3860 or PHYS*3230)
CHEM*4900 Chemistry Research Project I S,F,W (0-9) [0.75]
Research project and seminar in chemistry. This course is designed to provide senior undergraduates with an opportunity to conduct research in an area of chemistry. Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration. Students cannot choose a supervisor with whom they already have research experience in another capacity (e.g. a summer research position). Students should note that most projects are of two semesters' duration, and should plan their studies on the expectation that they will also register in CHEM*4910 in a subsequent semester. <i>Prerequisite(s):</i> 5.00 credits in chemistry including 1.50 credits from (CHEM*3430 or CHEM*3450), CHEM*3640, CHEM*3650, CHEM*3760, CHEM*3870 <i>Restriction(s):</i> Instructor consent required.
CHEM*4910 Chemistry Research Project II S,F,W (0-9) [0.75]
Research project and seminar in chemistry. Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration. <i>Prerequisite(s):</i> CHEM*4900 <i>Restriction(s):</i> Instructor consent required.

Classical Studies

School of Languages and Literatures

Unless otherwise noted, these courses do not require a knowledge of the Greek or Latin languages.

CLAS*1000 Introduction to Classical Culture F,W (3-0) [0.50]

A wide-ranging look at essential features of Greek and of Roman culture and society. Considerable emphasis will be given to the classical views of the human condition.

CLAS*2000 Classical Mythology W (3-0) [0.50]

An examination of the nature and function of myth in Classical Antiquity. The course shows how the narrative and symbolic structure of myths orders individual and communal experience. The myths that have influenced Western civilization receive special emphasis.

CLAS*2150 Western Art: Greece F (3-0) [0.50]

A survey of Ancient Greek Art and Archaeology, with stress on form and function plus stylistic trends and aesthetic values. The course will illuminate the cultural, social, and political life in Ancient Greece. (Also listed as ARTH*2150).

Equate(s): ARTH*2150

CLAS*2350 The Classical Tradition W (3-0) [0.50]

This course examines the transmission of Graeco-Roman culture in circumstances radically different from those in which it originated. It highlights the aspects of classical culture most influential in forming the Western tradition. (Offered in odd-numbered years.)

Prerequisite(s): CLAS*1000 or CLAS*2000

CLAS*2360 The Classical Tradition (in Latin) W (6-0) [1.00]

This course augments CLAS*2350 for Classical Languages students through the reading and study in Latin of certain primary sources, in particular Cicero, Quintilian, Augustine. (Offered in odd-numbered years.)

Prerequisite(s): LAT*2000

Restriction(s): Registration in Classical Languages.

CLAS*3000 The Rise and Fall of Athens F (3-0) [0.50]

Greek history in the 5th century; the development of Athenian democracy; the Peloponnesian War and the decline of Athenian dominance. Special attention is paid to the literature and thought of the period. (Offered in even-numbered years.)

Prerequisite(s): 1 of CLAS*1000, CLAS*2000, HIST*2850

CLAS*3010 The Roman Revolution W (3-0) [0.50]

An examination of the collapse of the Roman Republic and the development of the Imperial government under Augustus. The paradox of the external power and inner instability of Rome. (Offered in even-numbered years.)

Prerequisite(s): 1 of CLAS*1000, CLAS*2000, HIST*2850

CLAS*3020 History of the Hellenistic World F (3-0) [0.50]

The rise and fall of the Hellenistic states from the death of Alexander the Great until the Roman conquest, with political emphasis on the development of the monarchies and cultural emphasis on the Hellenization of the East. (Offered in odd-numbered years.)

Prerequisite(s): 1 of CLAS*1000, CLAS*2000, HIST*2850

CLAS*3030 Epic Heroes and Poems W (3-0) [0.50]

The nature and significance of the epic hero. Epic as code and as critique of tradition. Oral poetry, and critical problems raised by it. The central texts are The Iliad, The Odyssey, and Virgil's Aeneid; other poems are also studied. (Offered in odd-numbered years.)

Prerequisite(s): CLAS*1000 or CLAS*2000

CLAS*3040 Greek Tragedy and Comedy W (3-0) [0.50]

The nature of tragedy, and the existential and moral questions raised by the plays of Aeschylus, Sophokles, and Euripides. Comedy, fantasy, and society in Aristophanes. (Offered in even-numbered years.)

Prerequisite(s): CLAS*1000 or CLAS*2000

CLAS*3050 The Rise and Fall of Athens (in Greek) F (6-0) [1.00]

This course augments CLAS*3000 for Classical Languages students through the reading and study in Greek of selected primary sources, such as Herodotus, Thucydides, and Plutarch. (Offered in even-numbered years.)

Prerequisite(s): GREK*2020

Restriction(s): Registration in Classical Languages.

CLAS*3060 The Roman Revolution (in Latin) W (6-0) [1.00]

This course augments CLAS*3010 for Classical Languages students through the reading and study in Latin of selected primary sources, notably Sallust, Cicero, Caesar, and Suetonius. (Offered in even-numbered years.)

Prerequisite(s): LAT*2000

Restriction(s): Registration in Classical Languages.

CLAS*3070 History of the Hellenistic World (in Greek) F (6-0) [1.00]

This course augments CLAS*3020 for Classical Languages students through the reading and study in Greek of selected Greek sources pertaining to the history of the Hellenistic World, primarily Polybius and Plutarch. (Offered in odd-numbered years.)

Prerequisite(s): GREK*2020

Restriction(s): Registration in Classical Languages.

CLAS*3080 Epic Heroes and Poems (in Greek) W (6-0) [1.00]

This course augments CLAS*3030 for Classical Languages students through the reading in Greek of selected books from the Iliad and/or Odyssey. The course will include close study of the epic dialect and features of its formulaic language. (Offered in odd-numbered years.)

Prerequisite(s): GREK*2020

Restriction(s): Registration in Classical Languages.

CLAS*3090 Greek Tragedy and Comedy (in Greek) W (6-0) [1.00]

This course augments CLAS*3040 for Classical Languages students through the reading and study in Greek of an extant play. (Offered in even-numbered years.)

Prerequisite(s): GREK*2020

Restriction(s): Registration in Classical Languages.

CLAS*3100 Religion in Greece and Rome F (3-0) [0.50]

An examination of the varieties of religious experience and of religious activity in Greece and Rome, before the establishment of Christianity. Particular attention is paid both to the relations of religion to state and to the relations of the individual to gods. (Offered in even-numbered years.)

Prerequisite(s): CLAS*1000 or CLAS*2000

CLAS*3120 Religion in Greece and Rome (in Latin) F (6-0) [1.00]

This course augments CLAS*3100 for Classical Languages students through the reading and study of Latin primary sources. (Offered in even-numbered years.)

Prerequisite(s): LAT*2000

Restriction(s): Registration in Classical Languages.

CLAS*3150 Space: Roman Art and Urbanism W (3-0) [0.50]

Introduction to Roman art and urbanism from the Early Republic to the end of the imperial period. The course will survey the developments of Roman art with an emphasis on architecture, sculpture and painting. It will illuminate the development of the urban space in the context of cultural, social and political life. (Also listed as ARTH*3150). (Offered in even-numbered years.)

Equate(s): ARTH*3150

CLAS*3200 Sport in Antiquity F (3-0) [0.50]

The history of sport in Greece and Rome from Homer to the Caesars, with emphasis on its relationship to religion, education, literature, and community life. (Offered in odd-numbered years.)

Prerequisite(s): CLAS*1000, CLAS*2000

CLAS*3750 Greek Myth in the Western Tradition F (3-0) [0.50]

This course will study the functions of Greek myths in the non-Greek cultures which adopted them and so transmitted them to the later general culture of the West. The period to be explored extends from Augustan Rome through the European Middle Ages to the Early Renaissance in Italy. (Offered in even-numbered years.)

Prerequisite(s): CLAS*2000

CLAS*4000 Novel and Romance in Antiquity F (3-0) [0.50]

The historical and formal roots of fiction in the classical prose romances. Special attention is paid to the influence of myth, religion, historiography and ethical biography. Among texts studied are Daphnis and Chloe, Satyricon, and Aithiopia. (Offered in odd-numbered years.)

Prerequisite(s): CLAS*3030 or CLAS*3040

CLAS*4010 Novel and Romance in Antiquity (in Latin) F (6-0) [1.00]

This course augments CLAS*4000 for Classical Languages students through the reading and study in Latin of an extant novel. (Offered in odd-numbered years.)

Prerequisite(s): LAT*2000

Restriction(s): Registration in Classical Languages.

CLAS*4150 Research Paper in Classics F,W (3-0) [0.50]

This course is intended to complement courses in specified studies in classics. It engages the student in research and in critical writing, and permits the examination, in depth, of a topic of importance to the discipline and of interest to the student.

Prerequisite(s): 1.50 credits in Classical Studies courses at the 3000 level

CLAS*4400 Seminar in Classics W (3-0) [0.50]

A seminar course complementing courses of specific study in classics. It seeks to define the nature of the discipline, its values and its procedures. Attention will be paid to recent methodological and ideological trends in the discipline.

Prerequisite(s): 1.50 credits in Classical Studies at the 3000 level

Computing and Information Science

Department of Computing and Information Science

Note: Credit may be obtained for 1 of CIS*1000 or CIS*1200. Students with credit for MCS*2020 may not register in CIS*1000 or CIS*1200. Students who major or minor in Computing and Information Science may not receive credit for the following courses unless taken to satisfy the requirements of another program: MCS*2020, MATH*1050.

CIS*1000 Introduction to Computer Applications S,F,W (3-2) [0.50]

A survey of computer systems and software. An introduction to computer programming and data organization. An emphasis on using application packages for personal and business use. The social impact of computing. Not recommended for students with previous computer science background. Cannot be taken for credit by students taking a major or minor in Computing and Information Science.

Restriction(s): CIS*1200, MCS*2020, Not available to students registered in B.A.Sc. Program (Applied Human Nutrition major)

CIS*1200 Introduction to Computing F,W (3-2) [0.50]

An introduction to computer hardware and software, data organization, problem-solving and programming. Exposure to application packages for personal and business use. For students who wish a balance between programming and the use of software packages. Cannot be taken for credit by students taking a major or minor in Computing and Information Science.

Restriction(s): MCS*2020, CIS*1000

CIS*1500 Introduction to Programming F,W (3-2) [0.50]

Introductory problem-solving, programming and data organization techniques required for applications using a general purpose programming language. Topics include control structures, data representation and manipulation, program logic, development and testing. For students who require a good understanding of programming or are planning on taking additional specialist Computing and Information Science courses. This is the entry point to all CIS programs. (Also offered in distance education format.)

Restriction(s): CIS*1650

CIS*1900 Discrete Structures in Computer Science W (3-2) [0.50]

Provides a foundation in finite mathematics which is required for further computer science courses. Abstract representation of structures and algorithms. Topics include graph theory, logic, and set theory. (Also offered in distance education format.)

Restriction(s): CIS*1910, CIS*2910

CIS*1910 Discrete Structures in Computing I W (3-2) [0.50]

An introduction to discrete structures and formal methodologies used in computer science, including Boolean, propositional and predicate logic, finite set theory, functions, relations, and proof techniques.

Restriction(s): CIS*1900

CIS*2030 Structure and Application of Microcomputers S,F (3-3) [0.50]

Components of a computer system, including memories, CPU, buses, and input/output subsystems and interface hardware. Instruction sets, addressing modes, assembly/machine language programming. Development of algorithms for data acquisition, display, and process control.

Prerequisite(s): (CIS*1900 or CIS*1910), (CIS*2500 or CIS*2650)

CIS*2100 Scientific Computing and Applications Development S,F (3-2) [0.50]

This course is intended to introduce the student to techniques in modern applications development using current technologies and practices. The emphasis of the first part of the course ranges from building and maintaining WEB sites to search engines and multimedia presentations. The second part of the course is concerned with building and maintaining simple databases as needed for the management of scientific data. This is done in conjunction with packages for mathematical and statistical analysis, and presentation techniques. Cannot be taken for credit by students taking a major or minor in Computing and Information Science.

Prerequisite(s): 1 of CIS*1000, CIS*1200, CIS*1500

CIS*2430 Object Oriented Programming S,F (3-2) [0.50]

Introduces the Object Oriented (OO) approach to programming and algorithm design. Topics will include the creation and use of objects from class libraries, user defined objects, inheritance, modularity, generic code, components, collections and containers, and an introduction to OO design methodologies.

Prerequisite(s): CIS*2500

CIS*2460 Modelling of Computer Systems F (3-2) [0.50]

Discrete simulation based on event queues. Random number generation. How to generate input data, measure and evaluate results using standard statistical tests. Model calibration and validation. Algebraic, probabilistic and simple queuing models of software and hardware operation.

Prerequisite(s): CIS*2500, CIS*2910, (STAT*2040 or STAT*2100)

CIS*2500 Intermediate Programming W (3-2) [0.50]

How to interpret a program specification and implement it as reliable code. Experience with pointers, complex data types, and important algorithms. Intermediate tools and techniques in problem-solving, programming and program testing.

Prerequisite(s): CIS*1500

Equate(s): CIS*2650

CIS*2520 Data Structures S,F (3-2) [0.50]

Basic data structures: stacks, queues, lists, trees, hashing, search trees, and graphs. Their representation, uses, and algorithms for their traversal and manipulation. The emphasis is on using these structures in implementations and assessing the relative effectiveness of alternative implementations.

Prerequisite(s): (CIS*1910 or CIS*1900), CIS*2500

Co-requisite(s): CIS*2910

Equate(s): CIS*2420

CIS*2750 Software Systems Development and Integration W (3-2) [0.75]

Techniques and tools used in the development of large software systems. Methods for organizing and constructing modular systems, manipulating files, an introduction to interface design, and use of databases. Software tools for managing projects, database connectivity, configuration management, and system application programmer interfaces.

Prerequisite(s): CIS*2430, CIS*2520

Restriction(s): CIS*2450

CIS*2910 Discrete Structures in Computing II S,F (3-2) [0.50]

Introduces graph theory, combinatorics and other discrete structures used in computer science, including graph representations, traversal and simple graph algorithms, trees, counting strategies, summations, and an introduction to finite probability, recursion, and finite state machine models.

Prerequisite(s): CIS*1500, CIS*1910

Restriction(s): CIS*1900

CIS*3000 Social Implications of Computing F (4-0) [0.50]

This course focuses on social, ethical, legal and managerial issues in the application of computer science to the information technology industry. Through seminars and case studies, human issues confronting Computer Science professionals will be addressed.

Prerequisite(s): 2.00 credits in CIS courses

CIS*3110 Operating Systems W (3-1) [0.50]

Operating Systems in theory and practice. Components in a system: scheduling and resource allocation; process management, multi-programming, multi-tasking; I/O control and file systems; mechanisms for client-server computing. Examples from contemporary operating systems.

Prerequisite(s): (CIS*2500 or CIS*2650). Recommended (CIS*2030 or ENGG*2410).

CIS*3120 Digital Systems S,W (3-2) [0.50]

Boolean algebra, minimization of Boolean expressions. Design of combinational and sequential logic circuits. Memory design. Control, ALU, bus design. Microprogramming and CPU design.

Prerequisite(s): CIS*2030

CIS*3210 Computer Networks F (3-1) [0.50]

This course covers the high-level (protocol) oriented aspects of computer networks, specifically: application, session, transport and network layers. It includes the internet, socket-level programming, multimedia and quality of service issues. The hardware aspects (switches, LANs, modems, transmission paths) are covered at only a functional level.

Prerequisite(s): CIS*3110

Restriction(s): CIS*4200

CIS*3460 System Simulation F (3-2) [0.50]

Simulation model classification. Continuous and discrete languages. Process and transaction oriented systems. GPSS: entities, processing logic, chains, queue disciplines. Random number generators. Design and optimization of simulation applications and validation techniques.

Prerequisite(s): (CIS*2420 or CIS*2520), CIS*3110, STAT*2040

CIS*3490 The Analysis and Design of Computer Algorithms S,W (3-2) [0.50]

The design and analysis of efficient computer algorithms: standard methodologies, asymptotic behaviour, optimality, lower bounds, implementation considerations, graph algorithms, matrix computations (e.g. Strassen's method), NP-completeness.

Prerequisite(s): (CIS*1900 or CIS*2910), (CIS*2420 or CIS*2520)

CIS*3530 Data Base Systems and Concepts F (3-1) [0.50]
Review of data organization and data management principles with the perspective of analyzing applications suitable for implementation using a DBMS. Analysis of several data base models, query specification methods, and query processing techniques. Overview of several related issues including concurrency control, security, integrity and recovery. Students are expected to demonstrate concepts through project assignments. <i>Prerequisite(s):</i> (CIS*2420 or CIS*2520), (CIS*2450 or CIS*2750)
CIS*3620 Programming Language Foundations F (3-1) [0.50]
This course explores finite automata, formal languages, parsing, sequential machines and models of computation, including an introduction to Turing machines and the hierarchy of machines/languages. <i>Prerequisite(s):</i> (CIS*2450 or CIS*2750), CIS*3490 <i>Restriction(s):</i> CIS*4600
CIS*3700 Introduction to Intelligent Systems W (3-1) [0.50]
This course covers the core topics of Artificial Intelligence, namely: agents and environment, search, knowledge representation, reasoning, and learning. The last 3 topics are covered using logic as the common formalism for coherence. The course introduces a broad range of basic concepts, terminology, and applications, in addition to providing some specific, widely applicable methodologies. <i>Prerequisite(s):</i> (CIS*3430 or CIS*3750), STAT*2040 <i>Restriction(s):</i> CIS*4750 , CIS*4760
CIS*3750 System Analysis and Design in Applications F (3-2) [0.75]
An introduction to the issues and techniques encountered in the design and construction of software systems. The theory and models of software evolution. Topics include requirements and specifications, prototyping, design principles, object-oriented analysis and design, standards, integration, risk analysis, testing and debugging. <i>Prerequisite(s):</i> CIS*2750 <i>Restriction(s):</i> CIS*3430
CIS*3760 Software Engineering S,W (3-2) [0.75]
Examination of the software engineering process and the production of reliable systems. Techniques for the design and development of complex software. Topics include object-oriented analysis, design and modeling, software architectures, software reviews, software quality, software engineering, ethics, maintenance and formal specifications. <i>Prerequisite(s):</i> CIS*3530, CIS*3750 (CIS*3110 recommended) <i>Restriction(s):</i> CIS*3200
CIS*4000 Applications of Computing Seminar F,W (0-6) [0.50]
This capstone course of the B.Comp. program provides students an opportunity to combine their area of application with their studies in computing via a course project and seminar series. Application areas discussed in any particular semester will depend on areas of application selected by students. Students are required to present their work in a seminar and also to participate in the critical analysis and review of the work of other students taking this course. <i>Prerequisite(s):</i> Registration in semester 7 or higher of the B.Comp. Program and completion of a minimum of 2.50 credits in an Area of Application.
CIS*4050 Advanced Computer Architectures F (3-1) [0.50]
Central processor architectures, control and microprogramming, memory systems, special architectures, underlying support for special architectures, architectures suitable for very large scale integration. (Offered in even-numbered years and may be offered in odd-numbered years.) <i>Prerequisite(s):</i> CIS*2030, CIS*3110, CIS*3120
CIS*4150 Software Reliability and Testing F (2-2) [0.50]
This course serves as an introduction to systematic methods of testing and verification, covering a range of static and dynamic techniques and their use within the software development process. Concepts such as defining necessary reliability, developing operational profiles, techniques to improve and predict software reliability, preparing and executing tests, black box testing, white box testing, unit testing, system testing, and integration testing will be explained. (First offering Fall 2008.) <i>Prerequisite(s):</i> CIS*3200 or CIS*3760
CIS*4210 Telecommunications W (3-1) [0.50]
This course covers the low-level and the hardware-oriented aspects of computer communications, specifically the physical, link, and network layers. It includes basic telecommunication technology, local area networks, low level protocols, switching technologies, wireless and mobile networking, data and stream compression, and error coding. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> CIS*3210 <i>Restriction(s):</i> CIS*4200

CIS*4300 Human Computer Interaction F (2-2) [0.50]
Methods for user interface software design, including interface representations and testing. Evaluation and design of sample application systems. Impacts of computer-based information systems on individuals and organizations. Implementation and testing tools. Planning of learning stages and design of assistance subsystems. (Offered in odd-numbered years and may be offered in even-numbered years.) <i>Prerequisite(s):</i> CIS*3110, (CIS*3430 or CIS*3750)
CIS*4400 Distributed Information Systems F (3-2) [0.50]
This course addresses the basic concepts and methodologies used to build distributed systems applications. The course deals with building information infrastructures involving a base network layer, middleware and application layer. The emphasis is on the enabling methodologies for building complex distributed information systems. <i>Prerequisite(s):</i> (CIS*3210 or CIS*4200), (CIS*3430 or CIS*3750), CIS*3530
CIS*4410 Trends in Distributed Systems W (3-1) [0.50]
A course that examines the technical issues surrounding modern and future distributed commercial enterprises. Special attention is given to new communication modes, high volume, data-intensive systems, distributed transactions and security mechanisms. <i>Prerequisite(s):</i> (CIS*3210 or CIS*4200), (CIS*3430 or CIS*3750), CIS*3530
CIS*4430 Information Organization and Retrieval W (3-1) [0.50]
Advanced techniques for information management. Analysis of advanced indexing structures. Information retrieval, feedback strategies, text searchings, automatic indexing. Database query optimization and system support. Web based retrieval. (Offered in even-numbered years and may be offered in odd-numbered years.) <i>Prerequisite(s):</i> CIS*3110, CIS*3530, (CIS*3430 or CIS*3750)
CIS*4450 Special Topics in Information Science U (3-1) [0.50]
A variety of advanced topics mainly from areas within general information processing. Subject areas discussed in any particular semester will depend on the interests of the students and the instructor. Students should check with the Department of Computing and Information Science to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate. <i>Restriction(s):</i> Instructors consent required.
CIS*4500 Special Topics in Computing Science U (3-1) [0.50]
A variety of advanced topics within Computing Science. Subject areas discussed in any particular semester will depend upon the interests of both the students and the instructor. Students should check with the Department of Computing and Information Science to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate. <i>Restriction(s):</i> Instructor consent required.
CIS*4620 Computability and Complexity W (3-1) [0.50]
This course explores the theory of computation: Turing machines and variants, computability, NP and NP-completeness, complexity classes, reductions, undecidability and intractability. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> CIS*3620 <i>Restriction(s):</i> CIS*4600
CIS*4650 Compilers W (3-1) [0.50]
This course is a detailed study of the compilation process. Topics include interpreters, overall design implementation of a compiler, techniques for parsing, building and manipulating intermediate representations of a program, implementation of important features, code generation and optimization. <i>Prerequisite(s):</i> (CIS*2030 or IPS*2010), CIS*3110, CIS*3620 <i>Restriction(s):</i> CIS*3650
CIS*4720 Image Processing and Vision W (3-1) [0.50]
This course is an introduction to the process of image processing. Emphasis is placed on topics such as image enhancement, segmentation morphological analysis, texture analysis, visualization and image transformations. Applications of image processing in medicine, forensics, food and security are surveyed. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> (CIS*2450 or CIS*2750), CIS*3110, STAT*2040 (CIS*3700 recommended) <i>Restriction(s):</i> CIS*4760

CIS*4730 Pattern Recognition W (3-1) [0.50]

This course introduces fundamental concepts, theories and algorithms for pattern recognition, which are used in areas including computer vision, signal processing, speech recognition and linguistics. Major themes include statistical pattern classification, supervised and unsupervised learning, feature selection and extraction, clustering, image classification, and syntactical pattern recognition. (Offered in even-numbered years.) (First offering Winter 2008)

Prerequisite(s): (CIS*2450 or CIS*2750), CIS*3110, STAT*2040 (CIS*3700 recommended)

Restriction(s): CIS*4760

CIS*4770 Topics in Artificial Intelligence F (3-1) [0.50]

This course explores selected topics in Artificial Intelligence at an intermediate level. Topics will be chosen to acquaint students with important aspects of Artificial Intelligence having the greatest current interest. (Offered in even-numbered years.)

Prerequisite(s): CIS*3700

Restriction(s): CIS*4750

CIS*4780 Computational Intelligence F (3-1) [0.50]

This course introduces concepts of soft computing: modelling uncertainty, granular computing, neurocomputing, evolutionary computing, probabilistic computing and soft computing for software engineering. (Offered in odd-numbered years.) (First offering Fall 2007.)

Prerequisite(s): (CIS*3430 or CIS*3750), CIS*3490, STAT*2040 (CIS*3700 recommended)

Restriction(s): CIS*4750

CIS*4800 Computer Graphics W (3-1) [0.50]

Introduction to computer graphics. Topics include graphics programming concepts, geometrical transformations, viewing 3-D projections, raster graphics, sculptured surfaces, visible surface determination, image processing and other special topics. Practical issues will be covered by assignment using currently available graphics equipment. (Offered in even-numbered years.)

Prerequisite(s): CIS*3110, (CIS*3430 or CIS*3750)

CIS*4820 Game Programming W (3-1) [0.50]

This course will focus on the components found in modern 3-D game engines. It will emphasize the algorithms and data structures required to create real-time computer graphics, sound and network communications. (Offered in odd-numbered years.)

Prerequisite(s): CIS*3110, (CIS*3430 or CIS*3750)

CIS*4900 Computer Science Project S,F,W (0-6) [0.50]

Planning, developing and writing a research proposal under individual faculty supervision. The course, in continuation with CIS*4910 provides senior undergraduates an opportunity to pursue an independent course of study. The topic selected will be determined by agreement between the student and the faculty member with expertise in the area.

Prerequisite(s): 2 CIS courses at the 4000 level

Restriction(s): Instructor consent required.

CIS*4910 Computer Science Thesis S,F,W (0-6) [0.50]

This course is a continuation of CIS*4900. The student will conduct and write an undergraduate thesis under the individual supervision of a faculty member. In addition the student is required to present his/her work in a seminar and also participate in the critical analysis and review of the work of other students taking this course.

Prerequisite(s): CIS*4900

Restriction(s): Instructor consent required.

Co-operative Education

Co-operative Education Services

*COOP*XXXX courses are limited to students registered in a co-operative education program.*

COOP*1000 Co-op Work Term I F,W,S (3-0) [0.00]

This is a semester long experience in a paid work setting. Co-op work semesters differ depending on the program and major. Location of the semester is varied. Refer to program of study for the semester in which this is scheduled. Students must obtain a passing grade in order to continue in the Co-op Program.

Prerequisite(s): COOP*1100

COOP*1100 Introduction to Co-operative Education F,W (1-0) [0.00]

This course will introduce students to the theory and practice of co-operative education at the University of Guelph. Students will learn to take full advantage of the co-op option. They will acquire practice in the skills required to succeed in the competitive process of securing suitable work terms. Specifically, the course will cover: characteristics and expectations of the "new" world of work, interview skills, resume and cover letter writing, as well as general skills required to be successful in the co-op program. Students also obtain practice in the co-op employment process.

Prerequisite(s): 2.00 credits

Restriction(s): Enrolment in a co-operative education program

COOP*2000 Co-op Work Term II F,W,S (3-0) [0.00]

This is a semester long experience in a paid work setting. Co-op work semesters differ depending on the program and major. Location of the semester is varied. Refer to program of study for the semester in which this is scheduled. Students must obtain a passing grade in order to continue in the Co-op Program.

Prerequisite(s): Completion of previous co-op work requirements in COOP*1000

COOP*3000 Co-op Work Term III F,W,S (3-0) [0.00]

This is a semester long experience in a work setting. Co-op work semesters differ depending on the program and major. Location of the semester is varied. Refer to program of study for the semester in which this is scheduled. Students must obtain a passing grade in order to continue in the Co-op Program.

Prerequisite(s): Completion of previous co-op work requirements in COOP*2000

COOP*4000 Co-op Work Term IV F,W,S (3-0) [0.00]

This is a semester long experience in a work setting. Co-op work semesters differ depending on the program and major. Location of the semester is varied. Refer to program of study for the semester in which this is scheduled. Students must obtain a passing grade in order to continue in the Co-op Program.

Prerequisite(s): Completion of previous co-op work requirements in COOP*3000

COOP*5000 Co-op Work Term V F,W,S (3-0) [0.00]

This is a semester long experience in a work setting. Co-op work semester differ depending on the program and the major. Location of the semester is varied. Refer to program of study for the semester in which this is scheduled. Students must obtain a passing grade in order to continue in the Co-op program.

Prerequisite(s): Completion of previous co-op work requirements in COOP*4000

Crop Science

Department of Plant Agriculture

CROP*2050 Gateway to Organic Agriculture F (3-3) [0.50]

Students taking this course will be exposed to the full spectrum of opportunities in the field of organic agriculture, from social policy and marketing to crop rotation and rare breeds. In addition to lectures provided by faculty from several departments, guest speakers will offer practical insights into the field. Experiential learning will be encouraged, through data collection and analysis from organically managed land and from site interviews with practitioners in the field.

Prerequisite(s): 5.00 credits

Restriction(s): CROP*3400

CROP*2110 Crop Ecology W (3-0) [0.50]

Fundamental ecological principles are applied to managed agricultural ecosystems. Crop selection and management are viewed as influencing interactions among species and the environment. Adaptation and distribution of temperate zone crops are related to both environmental constraints and human intervention.

Prerequisite(s): BIOL*1040

CROP*2280 Crops in Land Reclamation F (2-2) [0.50]

The use of vegetation to reclaim land disturbed by human intervention, including mining and extraction, construction of right-of-ways, waste disposal, and logging, are introduced. Fundamentals of soil, plant, and associated microbial relations are reviewed, with emphasis on plant adaptation to soil constraints. Presentations by guest speakers and visits to nearby sites are used to identify the off as well as on-site environmental implications of land disturbance.

CROP*3130 Tutorials in Organic Agriculture II W (3-2) [0.50]

Building on the introductory exposure offered in CROP*2050, this course will rely on small group mentoring to stimulate independent, learner-centered analysis of selected topics in organic agriculture. Students will participate in an interdisciplinary analysis of case study topics offered in the form of two, 6-week modules in biophysical and social areas, including organic certification, non-chemical pest management, organics in an international context, and enhancing soil and crop health. The goal is to encourage holistic, systematic thinking in students learning to become self-directed analysts and decision-makers. Seminar periods will support both guest speakers and student presentations.

Prerequisite(s): CROP*2050

CROP*3300 Grain Crops W (3-0) [0.50]

Management strategies and world production of the major temperate grain crops are studied relative to their botanical and physiological characteristics and to available environmental resources. The utilization of grain crops for human food, livestock feed, and various industrial products are examined. (Offered in odd-numbered years.)

Prerequisite(s): 1 of AGR*2451/2 , AGR*2470, CROP*2110

CROP*3310 Protein and Oilseed Crops F (3-0) [0.50]

Management strategies and world production of the major temperate protein and oilseed crops are studied relative to their botanical and physiological characteristics and to available environmental resources. The utilization of protein and oilseed crops for human food, livestock feed and various industrial products are examined. (Offered in odd-numbered years.)

Prerequisite(s): 1 of AGR*2451/2 , AGR*2470, CROP*2110

CROP*3340 Managed Grasslands W (3-2) [0.50]

Managed forage grasses and legumes provide grazing, conserved feed, and a wider range of services to the environment and society at large. Agro-ecological, genetic, and managerial considerations will be integrated toward addressing questions of ruminant production and environmental management. Species will be distinguished morphologically and physiologically, focusing on adaptation to climatic, edaphic, and managerial constraints. Topics will include: physiological attributes of forage species, sward lifespan, establishment and maintenance practices, forage quality indices and harvest management. (Offered in even-numbered years.)

Prerequisite(s): 1 of AGR*2451/2 , AGR*2470, CROP*2110

CROP*4220 Cropping Systems W (3-2) [0.50]

Design of cropping systems for specific livestock, poultry and cash crop enterprises; integration of all factors affecting crop yields, quality and economy of production such as choice and interchangeability of crops, crop sequence, tillage, pest control, seasonal work programming, harvesting, drying and storage.

Prerequisite(s): (2 of CROP*3300, CROP*3310, CROP*3320 , CROP*3330), (SOIL*3080 or SOIL*4090)

CROP*4240 Weed Science F (3-3) [0.50]

Weeds will be studied in relation to agricultural practices. Principles of chemical, mechanical and biological control will be outlined. Laboratories will include weed identification, weed control methods, and demonstrations of the effects of various herbicides.

Prerequisite(s): AGR*2451/2 or AGR*2470

CROP*4260 Crop Science Field Trip F (0-4) [0.50]

A field study designed to increase the student's knowledge of agricultural production and agri-business. Students will tour a selected area of North America prior to the fall semester, visiting cash crop and livestock farms, supporting industries (e.g. processing, manufacturing) and markets (e.g. elevators, stockyards). A fee of approximately \$750.00 per student will be assessed.

Prerequisite(s): 12.50 credits including AGR*2451/2 or AGR*2470

Restriction(s): Instructor consent required.

CROP*4340 Seminar: Selected Topics in Crop Science F (2-0) [0.50]

This course is designed to permit students to study topics of current interest in the production of crops for feed and food purposes. Students will present seminars and prepare video presentations on the selected topics.

Prerequisite(s): 0.50 credits at the 3000 level in Crop Science

Economics

Department of Economics

For courses without semester designations, please check with the department. Advance schedules are available in the department.

ECON*1050 Introductory Microeconomics S,F,W (3-0) [0.50]

An introduction to the Canadian economy: price determination, market structure and resource allocation; the behaviour of consumers and firms; market intervention by government. Some of the economic issues addressed may include agricultural price supports, rent control, the NAFTA, environmental regulation, price discrimination, pay equity, and taxation. (Also offered through distance education format.)

Prerequisite(s): ECON*1200

ECON*1100 Introductory Macroeconomics S,F,W (3-0) [0.50]

The Canadian economy: aggregate performance and policy; an analysis of the determinants of national income, employment and the price level, the role of government monetary and fiscal policies in improving the rate of economic growth. (Also offered through distance education format.)

Prerequisite(s): ECON*1050

ECON*2000 Economic Problems in Canada U (3-0) [0.50]

This course is a study of important socio-economic issues in Canada using the basic principles of macro and microeconomics. Topics may include population, poverty, foreign ownership, regional development, etc.

Prerequisite(s): ECON*1050, ECON*1100

ECON*2100 Economic Growth and Environmental Quality F (3-0) [0.50]

An examination of the implications of economic growth on the quality of the environment, employing the basic principles of economic analysis. (Also offered through distance education format.)

Prerequisite(s): ECON*1050

ECON*2200 Industrial Relations F (3-0) [0.50]

This is a survey course of the Canadian industrial relations system. Among the topics covered are: the growth and objectives of unions, the legal framework of collective bargaining, the effects of unions on industry and the economy, industrial conflict and public policies.

Prerequisite(s): ECON*1050

ECON*2310 Intermediate Microeconomics S,F,W (3-1) [0.50]

The analysis of the behaviour of households and firms under alternative assumptions and market conditions. (Also offered through distance education format.)

Prerequisite(s): ECON*1050, (AGR*1101/2 or ECON*1100)

ECON*2410 Intermediate Macroeconomics S,F,W (3-1) [0.50]

The analysis of closed economy models of aggregate spending, output, employment, prices and interest rates under alternative assumptions about the nature of labour, product and financial markets. The analysis of theories of consumption, investment and money demand. (Also offered through distance education format.)

Prerequisite(s): ECON*1050, ECON*1100

ECON*2420 Canadian Economic History U (3-0) [0.50]

This course surveys the development of the Canadian economy from the aboriginal economy to the early fur and fish trades, agricultural settlement, industrialization, the Great Depression, growth of the public sector and fast economic growth after World War Two. Particular attention is paid to international economic relations and to regional differences within Canada.

Prerequisite(s): ECON*1050, (ECON*1100 or HIST*2450)

ECON*2500 Introduction to the Economics of Law, Crime and Enforcement U (3-0) [0.50]

An introduction to the economic analysis of law, participation in illegal labour and product markets and optimal law enforcement. Topics covered may include the economics of property, contract and tort law, the costs of crime and crime control, measurement of deterrence, regulatory enforcement, trade-offs in the likelihood and severity of punishment and tax evasion.

Prerequisite(s): ECON*1050

ECON*2650 Introductory Development Economics F (3-0) [0.50]

This course introduces students to the economic experience of developing countries, the ways in which economists try to understand it, and the implications for policy. The basic tools of economic analysis as taught in the introductory courses are used to analyse topics that may include theories of growth, trade, education, foreign investment, exchange rates, labour markets, the role of government, environmental sustainability and strategies related to agriculture, population, industry and investment.

Prerequisite(s): ECON*1050, ECON*1100

ECON*2720 Business History F (3-0) [0.50]

This course surveys the evolution of economic activity and organization from the industrial revolution to the present. Particular attention is given to the changing relationship between technology and business organization, the shift from proprietorship to corporation and the rise of multinational enterprise. Other topics may include the relationship between business and government, the role of the entrepreneur in the process of technical change and the evolution of work patterns and standards of living.

Prerequisite(s): ECON*1050, (ECON*1100 or any 1.50 credits in history)

ECON*2740 Economic Statistics F,W (3-1) [0.50]

A course designed to prepare students conceptually and mathematically for ECON*3560, Theory of Finance and ECON*3740, Introduction to Econometrics. Topics include the summation operator, descriptive statistics, frequency distributions, probability and statistical independence, the binomial distribution, algebra of the expectation operator, discrete bivariate distributions, covariance, variance of a linear function of random variables, the normal and t distributions, sampling distributions, point and interval estimation, hypothesis testing and an introduction to ordinary least squares. Additional topics may be included at the instructor's discretion. Examples and assignment questions are drawn from economics and finance.

Prerequisite(s): ECON*1050, ECON*1100, (1 of MATH*1000, MATH*1050, MATH*1080, MATH*1200)

ECON*2770 Introductory Mathematical Economics F,W (3-1) [0.50]

This course applies the elements of calculus and matrix algebra to simple microeconomic and macroeconomic problems.

Prerequisite(s): ECON*1050, ECON*1100, (1 of MATH*1000, MATH*1080, MATH*1200)

ECON*3100 Game Theory W (3-1) [0.50]

The course introduces students to non-cooperative game theory, which is an important method of analysis for economics situations involving small numbers of interacting economic agents. The course is centered on the concept of Nash equilibrium, and applies this equilibrium concept to static and dynamic games with full as well as incomplete information. The purpose of the course is to enable students to take any economic situation, find an economic model (game) that depicts the incentives facing the participants, and analyze the game to predict the behaviour of the economic agents.

Prerequisite(s): ECON*2310, ECON*2410, (ECON*2770 or MATH*1210)

Restriction(s): ECON*3770

ECON*3200 Economics of Industrial Relations U (3-0) [0.50]

An economic analysis of the Canadian industrial relations system. Emphasis is placed on understanding the theoretical implications of unions and collective bargaining practices for wage and employment outcomes. Empirical analysis of the nature and growth of unions and of their effect on industrial conflicts, public policy and the performance of the economy.

Prerequisite(s): ECON*2310

ECON*3300 Economics of Health and the Workplace U (3-0) [0.50]

This course will introduce students to concepts of health economics with particular relevance to workplace issues. Topics to be covered include the determinants of health, the demand for and supply of health care, the market for health care providers, health insurance, public and private, the role of health insurance in the labour market, whether not having to provide comprehensive health insurance to their workers gives Canadian firms an edge over their American competitors, workplace health risks and their effects on working conditions and salaries, workplace wellness programs and their evaluation, and the analysis of the cost effectiveness of health interventions.

Prerequisite(s): ECON*2310, (ECON*2740 or STAT*2040)

ECON*3460 Introduction to Finance F (3-0) [0.50]

This course examines some important principles of the theory of finance which underlie investment (capital budgeting) and associated financing decisions of financial managers. These decisions are necessarily interdependent and typically carried out under conditions of uncertainty regarding the future values of key economic variables, for example, cash flows. Problems, illustrations and short case studies are used to demonstrate how finance theory can be applied and assist financial managers to make optimal decisions. (Not open to B.Comm. MEIF or MEIF:C students.)

Prerequisite(s): ECON*1050, ECON*1100, (1 of ECON*2740, PSYC*2010, STAT*2060, STAT*2080)

Restriction(s): For B.Comm. students only. But, B.Comm.(MEIF) not allowed to take this course.

ECON*3500 Urban Economics U (3-0) [0.50]

This course is designed to apply the basic principles of intermediate economic theory to problems facing urban areas with emphasis on Canada. Topics to be covered will include such things as housing, urban poverty, municipal financing, transportation.

Prerequisite(s): ECON*2310

ECON*3510 Money, Credit and the Financial System U (3-0) [0.50]
Economics of the payments system, banking and other financial institutions and of credit markets. Bank of Canada operations and policy instruments. Monetary theory and policy. <i>Prerequisite(s):</i> ECON*2310, ECON*2410
ECON*3520 Labour Economics U (3-0) [0.50]
A study of the labour market, wage determination and the relationship between wages, employment, and prices. <i>Prerequisite(s):</i> ECON*2310
ECON*3530 Industrial Organization U (3-0) [0.50]
This course examines industries in which firms have the potential to exercise market power. Topics include how the competitive environment affects the behaviour of firms, measuring the extent of market power on welfare. The performance of markets under monopolies, dominant firms, cartels and oligopolies is examined and related aspects of Canadian competition policy and regulations are discussed. <i>Prerequisite(s):</i> ECON*2310, (ECON*2770 or MATH*1210)
ECON*3560 Theory of Finance F,W (3-0) [0.50]
Capital budgeting and long-term finance and investment decisions by firms and individuals. Introduction to capital asset pricing under uncertainty and to concept of efficient markets. Major emphasis is on corporate finance. (Also offered through distance education format.) <i>Prerequisite(s):</i> ECON*2310, (1 of ECON*2740, PSYC*2010, STAT*2040, STAT*2050, STAT*2060, STAT*2080, STAT*2090, STAT*2100, STAT*2120)
ECON*3580 Economics of Regulation U (3-0) [0.50]
A study of the economic reasons for government intervention in the marketplace. Emphasis will be placed on the role of crown corporations, regulatory agencies, regulation rules and public sector price-setting in the Canadian economy. <i>Prerequisite(s):</i> ECON*2310
ECON*3600 Macroeconomics in an Open Economy W (3-0) [0.50]
This course focuses on international macroeconomic issues; the balance of payments; models of exchange rate determination; foreign exchange risk and covered interest arbitrage; alternative exchange rate regimes; small versus large economies; monetary and fiscal policy in an open economy. <i>Prerequisite(s):</i> ECON*2410, (ECON*2740 or STAT*2040), (ECON*2770 or MATH*1210)
ECON*3610 Public Economics U (3-0) [0.50]
This course examines the interventionist role of government in the economy. It examines several sources of market failure which are used to justify government intervention. These include public goods, externalities and redistribution. The course also evaluates alternative sources of government revenue from the perspectives of both equity and efficiency. These include the personal and corporate income taxes, sales taxes and wealth taxes. <i>Prerequisite(s):</i> ECON*2310
ECON*3620 International Trade U (3-0) [0.50]
An introduction to the general equilibrium analysis of international trade, international factor movements and commercial policy. Special emphasis is given to Canada's international trade relationships. <i>Prerequisite(s):</i> ECON*2310
ECON*3660 Economics of Equity Markets U (3-0) [0.50]
This course studies the economic literature regarding the determination of security prices and the operation of the stock market. (Also offered through distance education format.) <i>Prerequisite(s):</i> ECON*3560
ECON*3710 Advanced Microeconomics F,W (3-1) [0.50]
This course provides an in-depth treatment of consumer and producer theory leading to the general equilibrium model of the economy and the study of welfare economics. <i>Prerequisite(s):</i> ECON*2310, (ECON*2770 or MATH*1210). A grade average of 70% or more in these courses is recommended.
ECON*3720 History of the World Economy Since 1850 U (3-0) [0.50]
Study of the evolution of the world economy since 1850. Topics may include the costs and benefits of empire to Britain, Anglo-German trade rivalry, the rise to prominence of "settler colonies", economic growth in the Third World, reparations and war debt, agricultural overproduction, origins of the Great Depression, the 1945-1973 boom in world production and trade. <i>Prerequisite(s):</i> ECON*1050, ECON*1100, (1 of ECON*2310, EURO*2070, HIST*2450, HUMN*2070, IDEV*2010)

ECON*3730 Europe and the World Economy to 1914 U (3-0) [0.50]
This course surveys the world economy with a particular focus on the industrial revolution in Europe, demographic change, the rise to prominence of the 'settler colonies', the origins of international inequality and the experience of globalization during the later nineteenth century. Particular attention is given to international trade, capital flows and migration. <i>Prerequisite(s):</i> ECON*1050, ECON*1100, (1 of ECON*2310, EURO*2070, HIST*2450, HUMN*2070, IDEV*2010)
ECON*3740 Introduction to Econometrics F,W (3-1) [0.50]
This computer-based course involves the specification and estimation of economic models and the testing of economic hypotheses using appropriate test statistics. Topics include the summation operator, expectation operator, ordinary least squares estimation, dummy variables, seasonality, multicollinearity, heteroskedasticity, autocorrelation, data sources (including uses of the Data Resource Centre). Additional topics may be included at the instructor's discretion. Heavy emphasis will be placed on applications and writing up results. Some use of spreadsheet software (e.g. QuattroPro, Excel) and statistical software (e.g. TSP, SHAZAM) will be required. <i>Prerequisite(s):</i> ECON*2310, ECON*2410, (ECON*2740 or STAT*2040), (ECON*2770 or MATH*1210)
ECON*4400 Economics of Organizations and Corporate Governance U (3-0) [0.50]
This course introduces students to the latest developments in the economic analysis of the inside workings of firms. The course is centered on the concept of organizational structure, which is made up of three variables: allocation of decision rights, performance evaluation and performance incentives. The course tries to explain the diversity of economic organizations, and more generally, why economic activity is sometimes carried out through firms and sometimes through markets. (Offered through Distance Education only.) <i>Prerequisite(s):</i> ECON*2310 Students must have completed a minimum of 12 credits.
ECON*4500 Topics in Urban Economics U (3-0) [0.50]
This course will investigate selected theoretical and applied topics in urban economics in depth. Among topics which might be treated are location theory, the theory of spatial structure, transportation economics, the economics of housing, the economics of land use regulation, urban public finance. <i>Prerequisite(s):</i> ECON*3710, ECON*3740
ECON*4560 Advanced Topics in Finance U (3-0) [0.50]
This course will examine selected advanced topics in finance, such as optimal capital structure under asymmetric information; theoretical and empirical analysis of mergers and acquisitions; asset pricing theory; pricing derivative securities; and financial econometrics. <i>Prerequisite(s):</i> ECON*3560, ECON*3710, (ECON*3100 or ECON*3770)
ECON*4640 Applied Econometrics I F (3-0) [0.50]
This course discusses the classical linear regression model and its extensions including generalized least squares and the theory and application of F tests. The maximum likelihood principle is introduced, as are alternative approaches to testing, e.g. LM, LR and Wald tests. Additional topics may be included at the instructor's discretion. Matrix algebra is used and proof of the Gauss-Markov theorem is included, but discussion of proofs is in general limited in order to allow substantial applications to data using statistical software such as TSP, SHAZAM, SAS, STATA. <i>Prerequisite(s):</i> ECON*3740 <i>Equate(s):</i> ECON*4740
ECON*4710 Advanced Topics in Microeconomics F (3-0) [0.50]
An intensive study of the scope, methodology, and content of contemporary microeconomics; selected topics in partial and general equilibrium analysis. <i>Prerequisite(s):</i> ECON*3710
ECON*4720 Topics in Economic History U (3-0) [0.50]
The use of economic theory to analyse the process of historical economic change. <i>Prerequisite(s):</i> 12.50 credits including ECON*2310
ECON*4750 Topics in Public Economics U (3-0) [0.50]
This course examines selected topics related to the expenditure and taxation functions of government. Topics may include issues in public good theory such as the free rider problem, the problem of eliciting truthful revelation of preferences and the use of taxes as a corrective device for externalities. The course may also address optimal taxation as well as tax evasion. Throughout this course the trade-off between efficiency and equity is emphasized. <i>Prerequisite(s):</i> ECON*3710

ECON*4760 Topics in Monetary Economics U (3-0) [0.50]
Selected topics in monetary economics such as theories of the demand for and supply of money, the nature and role of private banks and central banks, the transmission processes of monetary policy. <i>Prerequisite(s):</i> ECON*3600, ECON*3710, ECON*3740
ECON*4780 Topics in Industrial Organization U (3-0) [0.50]
Selected topics in the theoretical and empirical study of the organization and performance of firms and markets. Topics may include: strategic behaviour of firms such as actions to deter entry of rivals, pre-emptive choice of location and product quality, and research and development; the regulation of firms under uncertainty; econometric analysis of the use of market power; and modern advances in the theory of the firm. <i>Prerequisite(s):</i> ECON*3530, ECON*3710, ECON*3740, (ECON*3100 or ECON*3770)
ECON*4790 Topics in Labour Market Theory U (3-0) [0.50]
Selected topics in advanced labour market theory with emphasis on empirical evidence for the Canadian labour market. <i>Prerequisite(s):</i> ECON*3710, ECON*3740
ECON*4800 Theory of Strategic Management U (3-0) [0.50]
This course is about the creation and maintenance of long-term vision for the corporation from the perspective of the general manager. It is concerned with both the determination of strategic direction and the management of the strategic process. ECON*4800 may not be counted as a 4000 level economics course for purposes of satisfying the minimum 4000 level economics course requirements in the B.A. Honours Economics or B.A. Management Economics programs. <i>Prerequisite(s):</i> (AGE*3320 or BUS*3320), ECON*2740. Completion of semester 5.
ECON*4810 Advanced Macroeconomic Theory W (3-0) [0.50]
The theory of complex aggregate economic models; their assumptions, construction, and use in the analysis of macroeconomic activity. <i>Prerequisite(s):</i> ECON*3600, ECON*3740
ECON*4830 Economic Development U (3-0) [0.50]
A study of the theories, problems and policies of economic growth with special reference to underdeveloped countries. <i>Prerequisite(s):</i> ECON*2310
ECON*4840 Applied Econometrics II W (3-0) [0.50]
This is a continuation of ECON*4640 and deals with asymptotic theory, maximum likelihood estimation, instrumental variables, simultaneous equation models and selected topics such as models for limited dependent variables, models for panel data, ARCH models, units roots and error correction models. There will be applications to data using statistical software. <i>Prerequisite(s):</i> ECON*4640
ECON*4860 Seminar in Current Economic Problems U (3-0) [0.50]
Examination in a seminar setting of selected contemporary economic problems. <i>Prerequisite(s):</i> ECON*3600, ECON*3710, ECON*3740, or instructor consent
ECON*4870 Mathematical Economics: Dynamics F (3-0) [0.50]
The purpose of this course is to introduce the student to the techniques and application of dynamic analysis. The discussion concentrates on systems of differential equations, optimal control theory, etc. <i>Prerequisite(s):</i> ECON*3600, ECON*3710
ECON*4880 Topics in International Economics U (3-0) [0.50]
Selected topics involving the advanced analysis of the causes and effects of trade and financial flows and international factor movements. <i>Prerequisite(s):</i> ECON*3600, ECON*3710, or instructor consent
ECON*4890 History of Economic Thought U (3-0) [0.50]
A study of the development of economic theory, the tools of economic analysis, and the evaluation of economics as a science, together with an analysis of the circumstances affecting this development. <i>Prerequisite(s):</i> ECON*2310, ECON*2410

ECON*4900 Special Study in Economics S,F,W (3-0) [0.50]
The special study option is designed to provide senior undergraduate students with an opportunity to pursue an independent course of study. The subject matter will be related to regular 4000 level courses. Students will be required to submit a major paper/report on the subject matter studied. Formal agreement between the student and instructor of the course is required as well as the approval of the department chair or designate. One only of ECON*4900/ECON*4910 may count as one of the required minimum number of 4000 level economics courses in the B.A. programs. <i>Prerequisite(s):</i> ECON*3600, ECON*3710, ECON*3740
ECON*4910 Special Study in Economics S,F,W (3-0) [0.50]
Same description as for ECON*4900.
ECON*4930 Environmental Economics U (3-0) [0.50]
An advanced treatment of the interrelationship between economic activities and the state of the natural environment from the economists' point of view. <i>Prerequisite(s):</i> ECON*2410, ECON*3710
ECON*4940 Model Building and Economic Analysis U (3-0) [0.50]
Progress in economic theory is increasingly made by studying the properties of small artificial economies or competitive general equilibrium models. This course examines the construction of competitive general equilibrium models and outlines the computational techniques required to solve them. These models may be used to study a range of subject areas, including topics in macroeconomics with a particular emphasis on business cycle analysis or the economics of the environment. The subject areas will vary from year to year and are chosen at the instructor's discretion. <i>Prerequisite(s):</i> ECON*3740
ECON*4950 Applied Economics Research Project W (3-0) [0.50]
Students plan, develop and conduct a research project under individual faculty supervision and structured co-ordination. The supervisor is a faculty member with expertise in the area being investigated. The co-ordinator is a faculty member who leads group sessions on research project objectives, expectations, potential topics, data sources, available software and other relevant issues. Students will also present proposals, progress reports and final products in this group setting. <i>Restriction(s):</i> Students registered in the B.A. Applied Economics program. Students must have completed 17.0 credits.

Environmental Design and Rural Development

School of Environmental Design and Rural Development

EDRD*1150 Landscape Design W (2-3) [0.50]

This course is an introduction to the design of the built landscape environment, with an emphasis on graphic communication skills, creativity, and the design process. Basic drawing and drafting techniques along with the principles and styles of design, landscape materials and structures, and the incorporation of plant materials will be covered.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

EDRD*2000 Introduction to Rural Extension F (3-0) [0.50]

Introduction to Rural Extension including history and philosophy; learning and motivation; the rural setting; adoption/ technology transfer processes; marketing; planning; extension teaching/communication methods and technology; evaluation; extension agencies and programs.

Equate(s): REXT*2000

EDRD*2010 Introduction to Landscape Management F (2-3) [0.50]

Students taking this course will be exposed to the range of issues and opportunities in the field of Landscape Management. Reviewing historic and contemporary practices they will explore the benefits of a scientific and multidisciplinary approach to addressing the environmental, political, social and cultural imperatives of open space and natural resources in urban and rural areas.

Restriction(s): Registered in B.Sc. (Agr.).

EDRD*2020 Interpersonal Communication F,W,S (3-0) [0.50]

This course introduces to dyadic and small-group communication. The focus is on communication style and effectiveness with attention to verbal and nonverbal communication, listening behaviour and conflict. (Offered through Distance Education only.)

EDRD*2050 Landscape Construction and Planning F (1-4) [0.50]

Students will be engaged in the creation of landscape structures, including plan reading and estimating. Practical skills and experience will be obtained through real-life and simulated projects, using actual materials and design scenarios taken from industry examples. Technical and professional guidance will enable students to undertake typical landscape structure layout, estimates, and installation, based on design plans and specifications.

Prerequisite(s): EDRD*1150

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

EDRD*3000 Program Development and Evaluation W (3-0) [0.50]

Concepts and processes of program development and evaluation of rural extension programs. Programs designed with client involvement, situational analysis and priority setting will receive particular attention. (Offered in odd-numbered years.)

Prerequisite(s): 10.00 credits

Equate(s): REXT*3000

EDRD*3050 Agricultural Communication I F (3-0) [0.50]

Practical and effective ways of communicating information to a broad audience via the media, focusing mainly on print media (newspapers and magazines) and agricultural media. Strong emphasis on writing and preparing ready-to-use material and strategies for getting it published. (Students will develop an understanding of the news/communications business and find where they can fit into it or use it to their advantage to get a job. Contact with professionals will be a major part of the course).

Prerequisite(s): 10.00 credits

Equate(s): REXT*3050, REXT*4050

EDRD*3120 Educational Communication W (3-0) [0.50]

This course addresses the communication concepts and practices within the formal and non-formal educational contexts. Communication is central to teaching and learning because communication mediates a conscious effort either on the part of the learners to learn, or on the part of the teachers to provide and transfer knowledge, attitudes and skills. (Offered through Distance Education only.)

Prerequisite(s): 5.00 credits

Restriction(s): REXT*3100

EDRD*3140 Organizational Communication W (3-0) [0.50]

This course explores the application of communication process theory to organizations with special emphasis on internal organizational processes experienced at individual, group and organizational levels. Students examine communication in different organizational contexts including civil society, government, business and transnational corporations. (Offered through Distance Education only.)

Prerequisite(s): 5.00 credits

Restriction(s): REXT*3040

EDRD*3160 International Communication W (3-0) [0.50]

This course examines the role of communication in global development. Emphasis is on the application of interpersonal, intercultural communications and the mass media in the development process. (Offered through Distance Education only.)

Prerequisite(s): 10.00 credits

Restriction(s): REXT*3060

EDRD*3180 Social Processes in Mediated Communication W (3-0) [0.50]

This course is an introduction to dyadic communication, small-group communication, mediated work groups and online learning in mediated environments. The focus of this course will be on communication style, effectiveness, and online dynamics and processes in asynchronous environments. (Offered through Distance Education only.)

Prerequisite(s): 10.00 credits

EDRD*3400 Sustainable Communities W (2-1) [0.50]

The structure, function and trends affecting agri-food community settings including historical, ecological and social factors, institutions, agencies and change processes are discussed. The agricultural role of the Provincial Government and the contemporary impact of the agro-industrial complex on Ontario communities will be considered mainly from a comparative perspective. Related topics will include physical infrastructure, political conflicts, labour markets, settlement patterns, housing, gender relations, landscape management, quality of life, sustainability and the promotion of community leadership.

Prerequisite(s): AGR*1250 or 10.00 credits

Restriction(s): AGR*3400

EDRD*3450 Watershed Planning Practice S,F,W (3-0) [0.50]

An introduction to the principles and practice of watershed-based planning, with an emphasis on Ontario, but with reference to other parts of Canada, the U.S. and international contexts. History of water resource use and abuse, basic concepts of hydrology, water resource management, ecosystem approaches, and planning theory are also included. (Offered through distance education format only.)

Prerequisite(s): 10.00 credits or instructor consent

Equate(s): UNIV*3400

EDRD*3500 Recreation and Tourism Planning F,W (0-0) [0.50]

Application of planning theory to recreation and tourism in the private and public sectors, approaches to implementing plans, and strategies for involving stakeholders in the planning process. Focus will also be on the impact of various approaches to planning recreation and tourism. (Offered through Distance Education only.)

Prerequisite(s): 10.00 credits

Equate(s): UNIV*3500

EDRD*3550 Economic Development for Rural and Smaller Communities S (0-0) [0.50]

This course addresses the variety of challenges facing rural and smaller communities in Canada relating to livelihood creation and maintenance, employment, investment, business development, tax base maintenance and enhancement and the associated strategies for development planning and management. The roles of various agents (public, private, community, Third Sector) are addressed through the literature and case studies. The course critically examines "local" and "community" economic development, and reviews the rich Canadian experience here. The structure and dynamics of rural economies are examined. The course addresses selected methods of analysis and outlines the process of planning for, and managing, economic development at the local level. Various development organizations (e.g. cooperatives, Community Development Corporations) are examined. (Offered through Distance Education only.)

Equate(s): UNIV*3550

EDRD*4010 Tourism Planning in the Less Developed World F,W (0-0) [0.50]

This course will provide a discussion and investigation of tourism from an interdisciplinary point of view. The subject of tourism development cuts across many disciplines and is fundamental to a variety of scholars and practitioners working in tourism and development generally. While a variety of important theories and planning practices from a variety of disciplines have been selected for study, planning and community development theory will provide the overarching perspective. The features of planning theories and models stress analysis and intervention into human and environmental systems. This perspective begins with the view that tourism is a complicated human construct and as such needs to be structured and guided in order to maximize the benefits to all stakeholders in the system. (Offered through Distance Education only.)

Prerequisite(s): 5 credits

EDRD*4020 Rural Extension in Change and Development F (3-0) [0.50]

The planning and management of development programs with emphasis on the role of non-formal education and counselling in influencing behavioral change and adoption of innovation. Case studies include cross cultural and international considerations.

Prerequisite(s): 10.00 credits

Equate(s): REXT*4020

EDRD*4060 Agricultural Communication II W (3-0) [0.50]

Application of practical and effective writing and communication techniques, mainly through the production of print publications and the further development and application of journalistic writing and editing skills. Special emphasis on issues important to the agri-food industry.

Prerequisite(s): 1 of EDRD*3050, REXT*3050 , equivalent

Equate(s): REXT*4060

Restriction(s): Instructor consent required.

EDRD*4120 Leadership Development in Small Organizations F (3-0) [0.50]

The main theories of leadership will be discussed with exploration of the current literature, practice leadership skills and perform relevant activities in an on-line environment. Emphasis will be placed on the communication challenges facing leaders in small organizations and the importance of developing a culture of shared leadership. (Offered through Distance Education only.)

Prerequisite(s): 10.00 credits

Restriction(s): REXT*4100

EDRD*4180 Social Issues in Organic Agriculture W (2-2) [0.50]

This interdisciplinary course will build on SOIL*3030 and CROP*3130, Tutorials in Organic Agriculture I and II, to examine the major social issues in organic agriculture from both a global and local perspective, with an emphasis on synthesis and integration. Issues will include globalization, sustainability, gender, the commons, the debate between economics and the environment, the organic agri-food system, rural communities, the role of the family farm, land use and certification/regulation.

Prerequisite(s): 1 of AGR*3400 , (CROP*3130, SOIL*3030), SOC*2080

Equate(s): REXT*4180

EDRD*4300 Issues in Landscape Management F (2-3) [0.50]

Through lectures students will be exposed to the historic and contemporary approached used in the planning design of urban open space. Lectures and case studies will present a broad range of solutions which will be evaluated against appropriate criteria. Studio experience will expose the student to the process of planning and design. Projects will allow students to apply their theoretical and technical knowledge to contemporary issues. (First offering - Fall 2009.)

Prerequisite(s): 14.00 credits

Restriction(s): Registration in Urban Landscape Management.

EDRD*4500 Planning Industrial Ecology W (0-0) [0.50]

To create ecologically informed and professionally skilled scientists, engineers, planners, and managers by providing them with: systems-analytic frameworks to critically examine processes, products, infrastructure, management systems and public policies from the perspective of environmental sustainability; and the skill set to guide the design of appropriate responses. Course requires a science background, minimum OAC Chemistry or Physics. (Offered through Distance Education only.)

Prerequisite(s): 10.00 credits

Equate(s): UNIV*4500

Engineering

School of Engineering

Students who are not registered in the B.Eng. degree program may take no more than 3.00 Engineering (ENGG*XXXX) credits.

Some ENGG* courses have priority access restrictions. Enrolment in these courses is restricted to students registered in B.Eng. Degree program. All other students will require a waiver form to be signed by the B.Eng. Program Counsellor.

ENGG*1100 Engineering and Design I F (2-4) [0.75]

Introduction to engineering and design by means of selected problems. Students integrate basic science, mathematics, and complementary studies to develop and communicate engineering solutions to specific needs using graphical, oral, and written means. Application of computer-aided drafting, spreadsheets, and other tools to simple engineering design problems. The practice of professional engineering and the role of ethics in engineering.

Restriction(s): Registration in the Engineering Program

ENGG*1210 Engineering Mechanics I W (3-1) [0.50]

Fundamental principles of Newtonian mechanics; statics of particles in 2-D space; equilibrium of rigid bodies in 2-D; distributed forces; friction, linear and angular momentum of rigid bodies; conservation of energy; principles of impulse and momentum; and, plane motion of rigid bodies.

ENGG*1500 Engineering Analysis W (3-1) [0.50]

Engineering applications of Matrix algebra, vector spaces and computer techniques to solve linear systems. Linear transformations, eigenvalues and eigenvectors, diagonalization and their applications in engineering problems. Complex variable algebra, multi-variables functions, partial derivatives, and maxima and minima.

Co-requisite(s): ENGG*1210, MATH*1210

Restriction(s): MATH*2150

ENGG*2100 Engineering and Design II F (2-4) [0.75]

Progression in engineering design skills with particular emphasis on computer usage in design, oral communication of solutions and team skills. Computer usage in design will include advanced CAD/CAM/CAE tools, structured programming and database management software. An introduction to safety in engineering practice and design. An introduction to the concept of sustainable development.

Prerequisite(s): ENGG*1100, ENGG*1210, ENGG*1500, MATH*1200, PHYS*1130

ENGG*2120 Material Science F (3-2) [0.50]

Study of the mechanical, electrical, magnetic, optical and thermal properties of solids. Atomic order and disorder in solids, single-phase metals, and multiphase materials (their equilibria and micro-structure) are examined as a basis for understanding the causes of material properties. Interwoven throughout the course is an introduction to materials selection and design considerations.

Prerequisite(s): CHEM*1040, PHYS*1130

ENGG*2160 Engineering Mechanics II F (3-1) [0.50]

Fundamental principles of the mechanics of deformable materials; stress and strain; Mohr's circle for transformation of stress and strain; deflection under load; design of beams; shafts; columns and pressure vessels; failure theory and design.

Prerequisite(s): ENGG*1210, ENGG*1500, 0.50 credits in calculus

ENGG*2230 Fluid Mechanics W (3-2) [0.50]

Analysis of steady ideal and viscous fluid flow systems using the Continuity, Bernoulli and Momentum equations. Boundary layer theory is treated in terms of viscous and pressure drag, lift and its importance in heat and mass transfer. Dimensional analysis and dynamic similitude are studied to provide an understanding of flow systems analysis and modeling. Introduction to pipe flow and open channel flow.

Prerequisite(s): ENGG*1210, MATH*1210

ENGG*2400 Engineering Systems Analysis F (3-1) [0.50]

Analytical description and modeling of engineering systems such as mechanical, electrical, thermal, hydraulic biological and environmental systems. Applications of multivariable calculus, linear algebra and differential equations to stimulate and analyse such systems.

Prerequisite(s): ENGG*1210, ENGG*1500, MATH*1200, MATH*1210, PHYS*1130

Co-requisite(s): MATH*2270

ENGG*2410 Digital Systems Design Using Descriptive Languages F (3-3) [0.50]

Review of Boolean algebra, truth tables, Karnaugh maps. Design, synthesis and realization of combinational circuits. Design, synthesis and realization of sequential circuits. VHDL: structural modeling, data flow modeling, synchronous & asynchronous behavior descriptions, algorithmic modeling. Designing with PLDs. Digital design with SM charts. Designing with PGAs and complex programmable logical devices. Hardware testing and design for testability. Hierarchy in large designs. The course will primarily be concerned with the design of multi-input, multi-output digital controllers which provide the central control signals that orchestrate the collection of hardware devices (from SSI to VLSI) found in a digital system. An introduction to FPGA-based, as well as microprocessor-based digital systems design will be given. Design examples will include systems such as UART, microcontroller CPU, ALU and data acquisition system.

Prerequisite(s): (CIS*1650 or CIS*1500), PHYS*1130

ENGG*2450 Electric Circuits W (3-1) [0.50]

Electrical quantities; electrical circuit elements and their characteristics; exponentials, sinusoids and phasors applied to electrical circuits; s-plane representation and pole-zero concepts; steady-state a.c. circuits; general network analysis; magnetic quantities and circuits; demonstration of principles as applied in several engineering fields.

Prerequisite(s): ENGG*2400, PHYS*1130

ENGG*2550 Water Management W (3-0) [0.50]

The influence of fundamental engineering and hydrologic principles on the choices available for management of water on a watershed basis is demonstrated for representative techniques used in management for water supply, irrigation, flood control, drainage and water pollution control. Selected problems are studies to reveal the technical, environmental, legal, jurisdiction, political, economic and social aspects of water management decisions.

Prerequisite(s): (CHEM*1040 or CHEM*1310), GEOG*2000

ENGG*2560 Environmental Engineering Systems W (3-2) [0.50]

Analysis techniques for natural and engineered systems including chemical, physical and biological processes. Mass balance analysis for steady state and unsteady state situations. Analysis under both equilibrium and non-equilibrium conditions. Reactor types including batch, plug-flow, CSTR. Noise pollution, control and prevention.

Prerequisite(s): CHEM*1050, MATH*2270

ENGG*2660 Biological Engineering Systems I W (3-1) [0.50]

Mathematical description and identification of biological systems; through mass and energy balances; reactions in biological systems; biomedical, food, and bio-processing applications.

Prerequisite(s): ENGG*2400, MATH*2270, MICR*1020

Co-requisite(s): BIOC*2580

ENGG*3050 Embedded Reconfigurable Computing Systems W (3-2) [0.50]

This course introduces the students to the analysis, synthesis and design of embedded systems and implementing them using Field Programmable Gate Arrays. Topics include: review of digital design concepts; Programmable Logic Devices; Field Programmable Logic Devices; physical design automation (partitioning, placement and routing); Hardware Descriptive Languages; VHDL; Verilog; High Level Languages; System-C; Handle-C; Fixed Point and Floating Point Arithmetic; Hardware Accelerators; Reconfigurable Instruction Set Computers; Hardware Software Co-design techniques; Application of Field Programmable Logic in Embedded Systems. (First offering - Winter 2010)

Prerequisite(s): ENGG*3380, ENGG*3450

ENGG*3100 Engineering and Design III W (3-2) [0.75]

This course combines the knowledge gained in the advanced engineering and basic science courses with the design skills taught in ENGG*1100 and ENGG*2100 in solving open-ended problems. These problems are related to the student's major. Additional design tools are presented, including model simulation, sensitivity analysis, linear programming, knowledge-based systems and computer programming. Complementing these tools are discussions on writing and public speaking techniques, codes, safety issues, environmental assessment and professional management. These topics are taught with the consideration of available resources and cost.

Prerequisite(s): Registration in the B.Sc.(Eng.) program, ENGG*2100, ENGG*2230, ENGG*2400, ENGG*3260 and, for the specific majors: BIOE, (ENGG*2150 or ENGG*2160), ENGG*2660; ESC, ENGG*3390; ENVE, (ENGG*3180 or ENGG*3360), ENGG*3590, ENGG*3650; WRE, ENGG*3590, ENGG*3650

Restriction(s): Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses.

ENGG*3150 Engineering Biomechanics W (3-2) [0.50]
Basic concepts of biological material structure, properties, adaptation and remodeling; viscoelasticity in biological materials and techniques for modeling viscoelastic material behaviour; 2-dimensional and 3-dimensional joint kinematic analysis techniques; muscle mechanics and optimization techniques; current techniques in laboratory instrumentation and biomedical applications. <i>Prerequisite(s):</i> ENGG*2160 <i>Restriction(s):</i> ENGG*2150
ENGG*3160 Biological Engineering Systems II F (3-2) [0.50]
Mass transfer in biological systems: concepts; gas-liquid mass transfer; membrane transport processes; and heterogeneous reactions. Applications may include fermenter aeration, tissue perfusion, mass transfer limitations in biofilms, microbial flocs and solid tumours, protein recovery and drug delivery. <i>Prerequisite(s):</i> ENGG*2230, ENGG*2660
ENGG*3170 Biomaterials F (3-2) [0.50]
Physical properties of natural and synthetic (e.g. stainless steel, polymers) materials used in biological engineering applications. Topics will include microstructure and mechanical properties of typical biomaterials, quantification of advanced material properties and behaviours, fabrication, compatibility, biodegradation and mechanical failure. Typical applications will include processing of biomaterials as well as equipment and implant design. <i>Prerequisite(s):</i> ENGG*2120
ENGG*3180 Air Quality F (3-2) [0.50]
The study of the transport, transformation and deposition processes associated with air pollutants. The chemical and biological nature, impacts, and sources of air pollutants. The physical aspects of the atmospheric boundary layer. The mathematical treatment of diffusion in a homogeneous field in a boundary layer. Regulatory approaches worldwide and their use of air quality modeling. The use of models for the design of stacks and monitoring networks. <i>Prerequisite(s):</i> ENGG*2230, (ENGG*2560 or ENGG*2660) <i>Co-requisite(s):</i> ENGG*3260 <i>Restriction(s):</i> ENGG*3360
ENGG*3240 Engineering Economics F (3-0) [0.50]
Principles of project evaluation; analysis of capital and operating costs of engineering alternatives, benefit-cost ratio; break-even studies, evaluations recognizing risk, replacement and retirement of assets; tax considerations, influence of sources of funds. <i>Prerequisite(s):</i> ENGG*2400, ENGG*2450, MATH*1210, MATH*2270 <i>Restriction(s):</i> Registration in the Engineering program.
ENGG*3260 Thermodynamics F (3-1) [0.50]
Macroscopic thermodynamics and its applications to engineering analysis and design. First and second laws and applications to closed and flow systems, both with and without reaction; properties of pure substances and solutions; introduction to phase and reaction equilibrium. Applications include gas-vapour systems (psychrometrics and beyond), power and refrigeration cycles, Raoult and Henry law solution behaviours, flame temperature calculations, semiconductor device fabrication. <i>Prerequisite(s):</i> CHEM*1040, ENGG*2230, ENGG*2400, ENGG*2450, MATH*2270
ENGG*3340 Geographic Information Systems in Environmental Engineering F (3-0) [0.50]
Geographical information system structure and functions. Data structuring and application program development. Data input, display and analysis. Applications in environmental engineering and natural resource development/management. Students will be able to use a GIS software package to build geographical information systems. <i>Prerequisite(s):</i> (CIS*1500 or CIS*1600), (1 of MATH*1000, MATH*1080, MATH*1200)
ENGG*3380 Computerized Organization and Design F (3-2) [0.50]
Detailed examination of modern computer organization and techniques for microprocessor architecture design. Topics include - CPU design; instruction set design, addressing modes, operands; data flow design: internal bus structure, data flow signals, registers; control sequence design: hardwired control, decoding, microprogramming; architecture classes: CISC, RISC, and DSP; Memory organization; performance. Students must complete a term project that includes design, implementation, and demonstration of a CPU using a hardware descriptive language like VHDL. <i>Prerequisite(s):</i> ENGG*2410

ENGG*3390 Signal Processing F (3-2) [0.50]
This course will establish the fundamental analysis and design techniques for signal processing systems. Topics covered include: definition and properties of linear time-invariant systems; impulse response and convolution; continuous-time Laplace transform, Fourier series, Fourier transform; discrete-time Fourier transform, discrete-time Fourier series, fast Fourier transform, Z transform; complex frequency response; filter analysis and design for both continuous and discrete time systems. Students will be able to design continuous-time filters and both design and implement discrete-time digital filters using computer-based tools. <i>Prerequisite(s):</i> ENGG*2400
ENGG*3410 Systems and Control Theory W (3-2) [0.50]
Modeling, performance analysis and control with potential application to engineering, physical and biological systems. Topics include modeling in time, Laplace and frequency domains. Performance and stability by methods of Hurwitz, Routh, Bode, and Nyquist. Control by ON/OFF and PID Controllers. <i>Prerequisite(s):</i> ENGG*2400, MATH*2270 <i>Co-requisite(s):</i> ENGG*2450
ENGG*3430 Heat and Mass Transfer W (3-1) [0.50]
Analysis of steady and transient thermal systems involving heat transfer by conduction, convection and radiation and of mass transfer by molecular diffusion and convection. Other topics include the thermal analysis of heat exchangers and heat transfer systems involving a change of state. <i>Prerequisite(s):</i> ENGG*2230, ENGG*3260, MATH*2270
ENGG*3450 Electrical Devices F (3-2) [0.50]
Semiconductors materials, Silicon, Germanium and other semi-conductors' material, Doping and effects of extrinsic material introduction, Conduction in metals and semi-conductors, electrical and thermal characteristics of diodes and transistors; principles of modern electronic devices and their applications in circuits; diodes; bipolar and field effect transistors; circuit integration; operational amplifiers; logic gates. <i>Prerequisite(s):</i> ENGG*2450
ENGG*3470 Mass Transfer Operations W (3-2) [0.50]
Application of mass transfer principles in the natural and engineered systems. Mass transport in the multi-media fate of contaminants in and between air, water and land. Design and analysis of separation processes for emission and pollutant prevention. <i>Prerequisite(s):</i> ENGG*2230, ENGG*3260, MATH*2270 <i>Co-requisite(s):</i> ENGG*3430
ENGG*3490 Introduction to Mechatronic Systems Design W (3-2) [0.75]
This course covers the design of mechatronic systems, which are synergistic, combinations of components and controls drawn from mechanical engineering, electronics, control engineering, and computer science. The course emphasizes the integration of these areas through the design process employing the two skills of (1) modeling, analysis, control design, and computer simulation of dynamic systems, and (2) experimental validation of models, analysis and the understanding of the key issues of hardware implementation. The two skills are developed through assignments emphasizing analytical analysis with complementary laboratory exercises. The material covered includes mechatronic system design; a review of kinematics, electronics, modeling, simulation, signals and control; control architectures; sensors including vision; and actuators. <i>Prerequisite(s):</i> ENGG*3450 <i>Co-requisite(s):</i> ENGG*3410 <i>Restriction(s):</i> ENGG*3400
ENGG*3590 Water Quality F (3-3) [0.50]
This course builds on the student's experience in chemistry, biology, physics and fluid mechanics, and provides an engineering perspective on: (i) standard methods of water quality analysis for physical, chemical and biological characteristics of water; (ii) significance and interpretation of analytical results, (iii) modeling of water quality in natural systems and (iv) introduction to engineered water and wastewater treatment systems. <i>Prerequisite(s):</i> ENGG*2230, ENGG*2560, (BIOL*1040 or MICR*1020), STAT*2120

ENGG*3640 Microcomputer Interfacing F (3-3) [0.50]
Interfacing microcomputers to external equipment. Topics include peripheral devices, hardware interfaces, device driver software and real time programming. Advanced programming: debugging of embedded systems, data structures and subroutine calls, high-level system programming. Interrupts and resets, real time events, signal generation and timing measurements. Synchronous and asynchronous serial communication. Parallel I/O ports and synchronization techniques. I/O interfacing, microcomputer busses, memory interfacing and direct memory access (DMA). Data acquisition topics include signal conditioning analog to digital conversion and digital signal processing.
<i>Prerequisite(s):</i> ENGG*2410
<i>Co-requisite(s):</i> ENGG*3390
<i>Restriction(s):</i> ENGG*4640

ENGG*3650 Hydrology F (3-1) [0.50]
Quantitative study of natural water circulation systems with emphasis on basic physical principles and interrelationships among major processes; characteristics of mass and energy; inputs to and output from watersheds; factors governing precipitation occurrence, evaporation rates, soil-water storage changes, groundwater recharge and discharge, run-off generation; methods of streamflow analysis; mathematical modeling.
<i>Prerequisite(s):</i> (ENGG*2230 or MET*2030), (MATH*1210 or MATH*2080), (STAT*2120 or STAT*2040), and competency in computing

ENGG*3670 Soil Mechanics F (3-2) [0.50]
Relations of soil physical and chemical properties to strength; soil water systems and interactive forces. Visco-elastic property and pressure-volume relationships of soil systems. Stress-strain characteristics of soil under dynamic loads. Application of engineering problems. Laboratory and field investigation methods.
<i>Prerequisite(s):</i> ENGG*2120, ENGG*2230

ENGG*3830 Bio-Process Engineering F (3-1) [0.50]
Application of engineering principles to the processing of biological products in the biological and food industry. Analysis and design of unit processes such as sedimentation, centrifugation, filtration, milling and mixing involving rheology and non-Newtonian fluid dynamics of biological materials. Analysis of heat and mass balances for drying evaporation, distillation and extraction.
<i>Prerequisite(s):</i> ENGG*2230, ENGG*2660
<i>Co-requisite(s):</i> ENGG*3260

ENGG*4080 Analog Integrated Circuits F (3-0.5) [0.50]
The purpose of this course is to describe the operating principles of analog integrated circuits and to teach how to design and use such circuits. These circuits include analog and switched-capacitor filters, analog-to-digital and digital-to-analog converters, amplifiers, oscillators, circuits for radio-frequency and optical communications, readout channels for integrated sensors, and analog integrated circuits for mechatronics and bioengineering. The main emphasis is on device models, circuit operation, and design techniques. (First offering - Fall 2010)
<i>Prerequisite(s):</i> ENGG*3450

ENGG*4110 Biological Engineering Design IV F,W (2-6) [1.00]
Capstone design project in the Biological Engineering program. Teams of 3-4 students apply engineering analysis and design principles to a problem in a biological system or process. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. Teams produce reports and a poster presentation to a professional standard. Ethics and law case studies relevant to professional engineering practice are discussed.
<i>Prerequisite(s):</i> All 1000 and 2000 level core credits, ENGG*3100.
<i>Restriction(s):</i> Registration in semester 8 (last semester) of the B.Sc.(Eng.) program and in a max. of 3.25 credits registration. Student must have a minimum cumulative average above 60% in ALL ENGG courses. Instructor consent required.

ENGG*4120 Engineering Systems and Computing Design IV F,W (2-6) [1.00]
Capstone design project in the Engineering Systems and Computing program. Teams of 3-4 students apply engineering analysis and design principles to a problem involving control system, computer hardware or computer software technology. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. Teams produce reports and a poster presentation to professional standard. Ethics and law case studies relevant to professional engineering practice are discussed.
<i>Prerequisite(s):</i> All 1000 and 2000 level core credits, ENGG*3100.
<i>Restriction(s):</i> Registration in semester 8 (last semester) of the B.Sc.(Eng.) program and in a max. of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Instructor consent required.

ENGG*4130 Environmental Engineering Design IV F,W (2-6) [1.00]
Capstone design project in the Environmental Engineering program. Teams of 3-4 students apply engineering analysis and design principles to a problem involving control system, computer hardware or computer software technology. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. Teams produce reports and a poster presentation to professional standard. Ethics and law case studies relevant to professional engineering practice are discussed.
<i>Prerequisite(s):</i> All 1000 and 2000 level core credits, ENGG*3100.
<i>Restriction(s):</i> Registration in semester 8 (last semester) of the B.Sc.(Eng.) program and in a max. of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Instructor consent required.

ENGG*4150 Water Resources Engineering Design IV F,W (2-6) [1.00]
Capstone design project in the Water Resources Engineering program. Teams of 3-4 students apply engineering analysis and design principles to a problem involving control system, computer hardware or computer software technology. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. Teams produce reports and a poster presentation to professional standard. Ethics and law case studies relevant to professional engineering practice are discussed.
<i>Prerequisite(s):</i> All 1000 and 2000 level core credits, ENGG*3100.
<i>Restriction(s):</i> Registration in semester 8 (last semester) of the B.Sc.(Eng.) program and in a max. of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Instructor consent required.

ENGG*4250 Watershed Systems Design F (3-2) [0.75]
Hydrological analysis of watershed systems including stream flow for design of structures and channels, flood warning, flood plain mapping, low-flow characteristics. Hydraulic analysis applied to design of dams, reservoirs, control structures, energy dissipation structures, bridges and culverts. Analysis of steady flow profiles, flood waves, and sediment transport, for design of natural and constructed channels, and protective works for rivers to achieve environmentally sustainable land use in watershed systems.
<i>Prerequisite(s):</i> ENGG*2230, ENGG*3650

ENGG*4260 Water and Wastewater Treatment Design W (3-2) [0.75]
Application of design principles for a variety of water purification systems, including drinking water, municipal wastewater, industrial wastewater and agricultural wastewater. This involves the design of physical, chemical and biological unit operations, and evaluating the optimum combination to satisfy the given design constraints and criteria. The optimum designs integrate engineering science, basic science, economics, and occupational health and safety for the workers and the public.
<i>Prerequisite(s):</i> ENGG*3100, ENGG*3590

ENGG*4280 Digital Process Control Design W (3-2) [0.75]
Design, analysis synthesis and simulation of process control and automation systems. Automation hardware, process compensation techniques and P.I.D. controllers, design and dynamics of final control elements, computer control and the microprocessor.
<i>Prerequisite(s):</i> ENGG*3410

ENGG*4300 Food Processing Engineering Design F (3-2) [0.75]
Formulation of mathematical models to describe food processing operations and the response of foods to such operations. Process evaluation, development and computer-aided design of operations such as thermal processes and food freezing. The influence of water activity and structure on the enzymatic, cellular, organic and structural systems of foods. The properties of powders and particulate foods and mechanical operations with solid foods.
<i>Prerequisite(s):</i> ENGG*3260, ENGG*3830

ENGG*4330 Air Pollution Control F (3-2) [0.75]
Analysis and design of atmospheric pollution control techniques. Techniques considered include both in-process solutions as well as conventional end-of-pipe treatments. Pollutants covered include gaseous, particulate, metals and trace organics.
<i>Prerequisite(s):</i> ENGG*3180, ENGG*3260

ENGG*4340 Solid and Hazardous Waste Management F (3-2) [0.50]
Solid waste generation rates and waste composition. Integrated waste management: collection, recovery, reuse, recycling, energy-from-waste, and landfilling. Biological treatment of the organic waste fraction - direct land application, composting, anaerobic digestion. Environmental impact of waste management and sustainable development. Cross media issues related to solid waste disposal. An introduction to hazardous waste management and treatment methods.
<i>Prerequisite(s):</i> ENGG*2560 or ENGG*2660

ENGG*4360 Soil-Water Conservation Systems Design F (3-2) [0.75]

Properties of soils and land use governing the occurrence and magnitude of overland flow, soil erosion, infiltration, percolation of soil water, and variations in soil water storage. Design of soil and water management systems and structures to control soil erosion and protect water quality for environmentally and economically sustainable land use planning. Design of surface and subsurface drainage system for rural land. Design of sprinkler and trickle irrigation systems.

Prerequisite(s): ENGG*2230, ENGG*3650, ENGG*3670

ENGG*4370 Urban Water Systems Design F (3-2) [0.75]

Estimation of water quantity and quality needed for urban water supply and drainage. Design of water supply, pumping systems, pipe networks and distributed storage reservoirs from analysis of steady and transient, pressurized and free surface flow. Rates of generation of flows and pollutants to sanitary and storm sewers, design of buried pipe and open channel drainage systems with structures for flow and pollution control. Modeling of water systems for sustainable urban development.

Prerequisite(s): ENGG*2230, ENGG*3650

ENGG*4380 Bioreactor Design F (3-2) [0.75]

Modeling and design of batch and continuous bioreactors based on biological growth kinetics and mass balances. Gas-liquid mass transfer for aeration and agitation instrumentation and control.

Prerequisite(s): ENGG*3160

ENGG*4390 Bio-instrumentation Design F (3-2) [0.75]

Theory and selection criteria of devices used in measurements in biological systems; design of complete measurement systems including transducers, signal conditioning and recording components; error analysis. Differences between measurements in biological and physical systems.

Prerequisite(s): ENGG*3450

ENGG*4400 Biomechanical Engineering Design F (3-2) [0.75]

Concept development, design, modeling, manufacture and testing of medical implants and tools. This course will investigate the biomechanical factors influencing design, regulatory issues, current development trends, and the possible future of medical implant technology.

Prerequisite(s): ENGG*2120,

Co-requisite(s): ENGG*3170

ENGG*4420 Real-time Systems Design F (3-3) [0.75]

Hard versus soft real-time systems. Real-time issues in computer architecture. Clocks and timing issues. Correctness and predictability. Structuring and describing real-time software. Clock Synchronization. Real-time objects and atomicity. Validation of timing constraints. Formal Real-time systems design and analysis techniques: process-based, event-based, and Petri Nets. Resource management and control. Real-time scheduling and task allocation (Uni-processor and Multi-processor). Design for dependability, reliability and fault tolerance. Real-time programming using ADA. Survey of Real-time operating systems. Scenarios of real-time systems.

Prerequisite(s): CIS*3110

ENGG*4430 Neuro-Fuzzy and Soft Computing Systems W (3-0) [0.50]

Introduction to Fuzzy systems; Fuzzy Sets; Fuzzy Rules and Fuzzy Reasoning; Fuzzy Inference Systems; Fuzzy Control; Introduction to Neural and Automata Networks; Neural Network Paradigms; Supervised Learning Neural Networks, Learning from Reinforcement, Unsupervised Learning and Other Neural Networks; Neurocontrol; System Identification; Controller Training, Robust Neurocontrol; Adaptive Neuro-Fuzzy Inference Systems, Coactive Neuro-Fuzzy Modeling; Reinforcement Learning Control, Gradient-Free Optimization, Feedback Linearization and Sliding Control; Applications: Quality Assurance, Decision Aid Systems, Automatic Character Recognition, Inverse Kinematics Problems, Automobile MPG (Miles Per Gallon) Prediction, System Identification, Channel Equalization, Adaptive Noise Cancellation, Process Control.

Prerequisite(s): ENGG*3410

Co-requisite(s): ENGG*4280

ENGG*4450 Large-Scale Software Architecture Engineering F (3-2) [0.50]

This course introduces the students to the analysis, synthesis and design of large-scale software systems at the architectural level. This is in contrast to the algorithmic and data structure viewpoint of most software systems. Large-scale software systems are complex, execute on many processors, under different operating systems, use a particular or many language(s) of implementation, and typically rely on system layers, network connectivity, messaging and data management and hardware interfacing. The material covered includes architectural styles, case studies, architectural design techniques, formal models, specifications and architectural design tools. The laboratory sessions will expose the students to analyzing and redesigning an existing large-scale software system.

Prerequisite(s): (CIS*2420 or CIS*2520), ENGG*2100

ENGG*4460 Robotic Systems F (3-3) [0.50]

This course covers robot technology fundamentals, mathematical representation of kinematics, planning and execution of robot trajectories, introduction to robot languages, programming of robotic systems, different application domains for robots (e.g. assembly, manufacturing, medical, services, etc.), and robot sensors. The goal of this course is to provide students with a comprehensive background, approaches and skills to apply robotics technology to real world engineering applications and problems.

Prerequisite(s): ENGG*1500, ENGG*2400

ENGG*4510 Assessment & Management of Risk W (3-1) [0.50]

This course will develop the bases by which risk to human health and the environment can be assessed. Issues of hazardous waste cleanups, permitting of water and air discharges, food safety, flood protection, as examples, are addressed. The course also examines how decisions are made to manage the risks to acceptable levels.

Prerequisite(s): STAT*2040 or STAT*2120

ENGG*4550 VLSI Digital Design F (3-2) [0.50]

This course introduces the students to the analysis, synthesis and design of Very Large Scale integration (VLSI) digital circuits and implementing them in silicon. The topics of this course are presented at three levels of design abstraction. At device level: MOS diode; MOS (FET) transistor; interconnect wire. At circuit level: CMOS inverter; static CMOS gates (NAND, NOR); dynamic gates (NAND, NOR); static latches and registers; dynamic latches and registers; pipelining principles and circuit styles; BICMOS logic circuits. At system level; implementation strategies for digital ICs; interconnect at system level; timing issues in digital circuits (clock structures); the adder; the multiplier; the shifter; memory design and array structure; low power design circuits and architectures. (First offering - Fall 2010)

Prerequisite(s): ENGG*2410, ENGG*2450, ENGG*3450

ENGG*4560 Embedded System Design W (3-3) [0.75]

This course introduces the basic principles of embedded system design. It utilizes advanced hardware/software abstractions to help design complex systems. Topics include: Design of embedded CUPs; Embedded Architecture Cores; System-On-Chip Designs and Integration Using Processor Cores and Dedicated Core Modules; Embedded Computing Platforms; Embedded Programming Design and Analysis; Processes and Operating Systems; Networks for Embedded Systems; Distributed Embedded Architectures; Design Examples that Target Robotics, Automobile, and Communication Systems. (First offering - Winter 2011)

Prerequisite(s): ENGG*4550

Co-requisite(s): ENGG*3050

ENGG*4660 Medical Image Processing W (3-2) [0.50]

This course covers the fundamentals of medical imaging from both the processing of digital images and the physics of image formation. Image processing topics covered include: fundamentals of resolution and quantization; linear systems as applied to multi-dimensional continuous and discrete systems including the relationship between the point spread functions and modulation transfer function; point operations such as contrast enhancement, histogram equalization, and H and D curves, geometric operations for distortion correction, including interpolation methods; linear filtering in both the spatial and spatial-frequency domains; and image restoration and inverse filtering. The physics of the following imaging modalities with emphasis on the parameters which effect image quality will be covered: x-ray radiology, MRI, ultrasound, and nuclear medicine.

Prerequisite(s): ENGG*3390

English

School of English and Theatre Studies

- ENGL*1080 and ENGL*2080 provide a strong foundation for English studies at the University level and are required courses for students intending to major or minor in English. These linked courses expose students not only to a broad range of texts from different countries and historical periods but also to some of the exciting developments in the discipline.
- Honours major students are required to take the seminar courses ENGL*2120, ENGL*2130, ENGL*3940, ENGL*3960, preferably in their 3rd, 4th, 5th and 6th semesters. ENGL*1080 is a pre-requisite to ENGL*2120 and ENGL*2130; ENGL*2080 is a pre-requisite to ENGL*3940 and ENGL*3960.
- Honours major students are required to take **two** 4000-level seminars, preferably in their 7th and 8th semesters. The prerequisites for the 4000-level seminars are ENGL*2080 plus **one** of ENGL*2120, ENGL*2130 plus **one** of ENGL*3940, ENGL*3960.
- Honours minor students are required to take the seminar course ENGL*2120 and **one** of ENGL*2130, ENGL*3940, ENGL*3960, preferably in their 3rd to 6th semester.
- Many English lecture courses are offered on alternate years only and many English seminars have variable content. For more information, students should consult the School's home page at <http://www.arts.uoguelph.ca/sets/>.
- Many English lecture courses are reading-intensive while seminar courses are writing and presentation-intensive. Honours major students are advised to take **two** lectures and **one** seminar per semester beginning in their 3rd semester.
- WRITING- AND PRESENTATION-INTENSIVE: Seminars emphasize written and oral work to help students develop the critical reading and writing skills essential to their learning throughout the curriculum.
- READING-INTENSIVE: Lectures emphasize breadth of reading, contexts, and comparisons, to help students develop the knowledge base essential to their understanding of the field. In order to allow essay-writing to be concentrated in seminars, assignments in lecture courses will not predominantly take the traditional essay form but a range of other formats.

ENGL*1080 Literatures in English I: Reading the Past F,W (3-0) [0.50]

This course introduces students to a range of historical and national writings in prose, poetry, and drama, and to some of the key terms and concepts in contemporary literary studies. Lectures and discussions address selected works from the middle ages onwards, the periods in which these works were produced, and some of the ways in which these texts have been or could be interpreted. ENGL*1080 and its companion course, ENGL*2080, are required for a major or minor in English. Students are encouraged to enrol in ENGL*2080 in the semester after they have completed ENGL*1080. Reading-and-writing-intensive course.

Equate(s): ENGL*1060

ENGL*1200 Reading the Contemporary World F,W (3-0) [0.50]

This course, which is designed primarily for those not planning a specialization in English, introduces students to literary texts and persuasive forms of writing, bringing to the fore some of the links between language and contemporary social and political issues. Course materials will represent diversity in terms of national origins, gender, race, and class. The course emphasizes the use of figurative language as well as the development of students' critical reading and writing skills. Students planning to major or minor or pursue an area of concentration in English must take ENGL*1080 and ENGL*2080, but may also take ENGL*1200 and count it as an elective lecture. (Also offered in distance education format.)

ENGL*1410 Major English Writers U (3-0) [0.50]

This course offers an introduction to the study of literature through a chronological consideration of works by selected major authors from the Middle Ages to the 20th century, in relation to their social, intellectual and literary backgrounds. Instruction and practice in effective essay writing will be included. (Offered through Distance Education only.)

ENGL*2040 Latina/o Literature and Cultural Production: Intro F (3-0) [0.50]

This survey course introduces students to the terms, methodologies, and debates that form the interdisciplinary critical practice of Latina/o Studies. The course takes a pan-Latina/o approach to the study of English-language and cultural production by various Latina/os primarily in the U.S. Because different Latina/o groups have been concentrated in particular U.S. regions and cities, the approach allows students to study how Latina/o literature and art have shaped the politics and culture of different regions and cities. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1 of DRMA*1000, ENGL*1080, ENGL*1200

ENGL*2080 Literatures in English II: Finding a Critical Voice F,W (3-0) [0.50]

This course revisits the historical, national, and genre sweep of ENGL*1080 by conducting a range of specific, more in-depth studies of particular works (including some of the texts examined in ENGL*1080) in their historical moments. Seminars help students to develop a range of critical approaches through oral presentations and essay-writing. Students are encouraged to enrol in ENGL*2080 in the semester after they have completed ENGL*1080.

Prerequisite(s): ENGL*1080

Equate(s): ENGL*2060

ENGL*2120 Seminar: Critical Practices F,W (3-0) [0.50]

This course guides students through a range of critical approaches and explores their implications for readings of a limited number of literary texts. The seminar's main areas of concentration are: (1) close reading, centering on the way a particular poem, work of fiction, or play works in its details and overall structure; (2) critical approaches and methodologies; (3) critical writing and discussion. (Choices of approaches and texts will be determined by individual instructors.) Writing- and presentation-intensive course.

Prerequisite(s): ENGL*1080

ENGL*2130 Seminar: Literature and Social Change F,W (3-0) [0.50]

This course explores the social and cultural work that literary texts perform. Seminars will illuminate such categories as gender, sexuality, nation, race, ethnicity, and class; particular ways in which they are written into a limited number of literary works; and some of the critical debates surrounding our interpretations of those processes. (Choices of approaches and texts will be determined by individual instructors.) Writing- and presentation-intensive course.

Prerequisite(s): ENGL*1080

ENGL*2190 Representation and Sexuality W (3-0) [0.50]

This variable-content course offers a historically grounded introduction to the critical study of sexuality and representation in literature and related media. The course may engage with a specific time-period or genre, or it may concentrate directly on the problem of theorizing sexual difference in relation to other literary and cultural forces.

Prerequisite(s): 1 of ENGL*1080, ENGL*1200, ENGL*1410, WMST*1000

ENGL*2200 Postcolonial Literatures F (3-0) [0.50]

This course introduces significant issues, perspectives, and voices within the study of the postcolonial literatures in English. The course may include literature from Africa, Australia, Canada, the Caribbean, India and the Pacific. Reading-intensive course.

Prerequisite(s): ENGL*1080 or ENGL*1200

ENGL*2230 Popular Genres F (3-0) [0.50]

This variable-content course introduces students to the focused study of a selected popular genre of literature, film, or other related media. The course explores the emergence and development of the popular genre chosen for that semester's study, such as science fiction, detective fiction, romance, the western, film noir, or the fairy tale; diverse critical approaches to the genre; and some meanings of the term "popular". Reading-intensive course.

Prerequisite(s): 1 of ENGL*1080, ENGL*1200, ENGL*1410

ENGL*2550 North American Native Literatures W (3-0) [0.50]

This course explores selected issues, perspectives, and voices within the study of Native literatures and their contexts in North America. One purpose of the course is to raise questions about the meaning of the U.S. - Canadian border for Native writers. Reading-intensive course.

Prerequisite(s): ENGL*1080 or ENGL*1200

ENGL*2640 Culture, Location, Identity: Minoritized Literatures in Canada and Beyond F (3-0) [0.50]

This course will open up debates around emergent issues, perspectives, and voices in the literatures of minoritized cultures particularly within the North American context. Questions about the meanings of various borders for understanding Canadian negotiations of identity, culture, and location will remain a consistent feature of this variable content course. Reading-intensive course. (Also offered in distance education format.)

Prerequisite(s): ENGL*1080 or ENGL*1200

ENGL*2740 Children's Literature F,W (3-0) [0.50]

This course serves as an introduction to the critical study of children's literature and culture. Focusing on selected genres of, issues in, or theoretical approaches to literature for children, this variable-content course explores shifting (and often conflicting) conceptions of childhood, in general, and of children as readers and cultural consumers. Reading-intensive course.

Prerequisite(s): 1 of ENGL*1080, ENGL*1200, ENGL*1410

ENGL*2880 Women in Literature W (3-0) [0.50]
This variable-content course will involve the study and discussion of poems, stories, novels and plays by or about women. Reading-intensive course. <i>Prerequisite(s):</i> 1 of ENGL*1080, ENGL*1200, ENGL*1410, WMST*1000
ENGL*2920 Creative Writing: Fiction U (3-0) [0.50]
An introduction to creative writing through practical experiment, discussion, and the technical examination of models. Since admission to the course depends on the approval of the instructor, students must submit examples of their work to the instructor prior to registration. This course will be offered annually in either Fall or Winter. Check with the School. <i>Prerequisite(s):</i> ENGL*1080 or ENGL*1200 <i>Restriction(s):</i> Instructor consent required.
ENGL*2940 Creative Writing: Poetry U (3-0) [0.50]
As for ENGL*2920. (Note especially that students must submit examples of their work to the instructor prior to registration.) This course will be offered annually in either Fall or Winter. Check with the School. <i>Prerequisite(s):</i> ENGL*1080 or ENGL*1200 <i>Restriction(s):</i> Instructor consent required.
ENGL*3020 Shakespearean Contexts F (3-0) [0.50]
A study of a selection of Shakespeare's plays and poems in conjunction with a wide range of other texts. These may include, at the instructor's choice, 'source' narratives, subsequent adaptations, and plays and poems by predecessors or contemporaries, as well as other writings that shed light upon discursive contexts, performance practices, authorial and playhouse revision, issues of gender and subjectivity, and the reception of these plays by early modern audiences and readers. Reading-intensive course. (Offered in even-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English or (THST*2010, THST*2120)
ENGL*3040 U.S. Latina/o Literature F (3-0) [0.50]
This course focuses on an English-language literature of a particular Latina/o community (e.g. Chicana/os, Cuban Americans, Puerto Ricans) in the United States. Students will be introduced to theoretical approaches and a wide range of genres, including narrative fiction, autobiography, literary journalism, and poetry. Reading-intensive course. (Offered in even-numbered years.) <i>Prerequisite(s):</i> (1 of DRMA*1000, ENGL*1080, ENGL*1200), ENGL*2040
ENGL*3080 History of the English Language W (3-0) [0.50]
This course introduces the key historical developments of the English language and the primary tools for the study of language. Topics to be discussed may include: the origins of and precursors to the English language; the phonology, lexicon, and grammar of English; the persistence of language change; the historical factors that affect language change; the origins and implications of language variety; the formation of prestige dialects; and the current state of the English language in Canada and the world. Reading-intensive course. (Offered in even numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3120 Shakespearean Receptions F (3-0) [0.50]
The course will examine a selection of Shakespeare's plays and poems in the light of contemporary reassessments of his place in the canon. For purposes of comparison, plays by contemporaries of Shakespeare may also be studied along with adaptations of Shakespeare chosen from a number of different historical contexts. Close readings of these texts will be organized around such topics as Shakespearean adaptations, constructions of gender and subjectivity, Shakespeare and canon-formation, Shakespeare and critical theory, the politics of Shakespearean interpretation, Shakespeare in contemporary media culture, and changing performance practices. Reading-intensive course. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English or (THST*2010, THST*2120)
ENGL*3170 Elizabethan Literary Culture: Chastity and Power W (3-0) [0.50]
This course examines the literary culture associated with Elizabeth I. Issues, including gender and sexuality, power, and religion, will be explored through a wide range of sixteenth- and early-seventeenth century poems (these will be chosen from such writers as Skelton, Wyatt, Surrey, Mary Stuart, the Sidneys, Spenser, Marlowe, Shakespeare, Raleigh, Aemilia Lanyer, Mary Wroth, Elizabeth I, Jonson, Donne, and Herbert). Reading-intensive course. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.

ENGL*3180 Colonial Encounters: Nation and Discovery W (3-0) [0.50]
This course examines writings concerning, or alluding to, English (and other European) encounters with new worlds and different cultures. These will include accounts of travel, conquest, and colonization written or collected by such writers as Bernal Diaz, Luis de Camoës, Columbus, Hakluyt, Raleigh, Harriot, Drake, and Bradford; essays by writers such as Las Casas, Spenser, and Montaigne; and plays, poems, and prose such as Marlowe's Tamburlaine, Shakespeare's The Tempest, Jonson, Chapman, and Marston's Eastward Ho, parts of Spenser's Faerie Queene, Marvell's "Bermudas", and Behn's Oronooko: or the Royal Slave. Key intertexts to these writings will also be studied, along with relevant aspects of postcolonial theory. Reading-intensive course. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3190 Poetics and Politics in Early Modern England F (3-0) [0.50]
This course examines the intimate connections between poetics and politics in Elizabethan and Jacobean literature. The texts to be studied may include plays and poems, as well as essays, political, historical, and theological writings, and works of prose fiction. Close readings of these texts will focus on such issues as kingship, transgression, rhetoric, and the relation between political subjection and literary subjectivity. The course will establish connections between early modern notions of power and its manipulation, and contemporary critical and political discourses in which similar issues are at stake. A wide range of materials chosen from such authors as More, Ascham, Castiglione, Montaigne, Ariosto, Sidney, Puttenham, James I., Nash, Fennor, Bacon, Lyly, Marston, Greene, and Lodge will be examined by way of close readings. Reading-intensive course. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3220 Representing Britain: 18th- & 19th- Century Literature F (3-0) [0.50]
This course explores selected topics in the interrelation of literature and politics from the late seventeenth to the nineteenth century in Britain. Areas of focus may include: the literature of civil war, constitutionalism and revolution; satire and society; writings emerging from suffrage reform and agitation, the colonization of Ireland, the construction of political subjectivity, political paranoia, conspiracy and sedition. Reading-intensive course. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3230 Literary Culture and the English Civil War W (3-0) [0.50]
This course will examine key literary figures and texts in the period leading up to and including the English Civil War (1623-1660). Literary contributions to the political and religious struggles of the period will be studied in the light of a range of different approaches. Primary readings will be selected from among the works of such writers as Milton, Marvell, Charles I, Hobbes, Coppe, Winstanly, Everard, Katherine Philips, Jonson, Webster, Middleton, and Massinger. Reading-intensive course. (Offered in even-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3260 Writing Gender & Family: 18th- and 19th- Century Literature W (3-0) [0.50]
This course will explore texts which engage with such matters as the shifting constructions of the family, changing sexual practices, ideals of femininity and masculinity, and the significance of the separation of spheres in eighteenth- and nineteenth-century writing. Focal points may include: the role of desire in narrative; literary representations of gender and economics, of gender and medicine, and of pivotal figures such as the prostitute, the governess, the rake, or the gentleman. Reading-intensive course. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3280 Old English Literature U (3-0) [0.50]
This course will focus on the language, literature, and culture of Anglo-Saxon England (7th to 11th centuries). In addition to acquiring the basics of Old English and engaging in translation exercises with passages from Anglo-Saxon texts, students will read a selection of texts in modern English translation; these may include Beowulf, the Battle of Maldon, elegies such as the Seafarer, riddling poems and religious poems. (Offered in alternate years.) <i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3300 Restoration to Romanticism: Forging the Nation F (3-0) [0.50]
Drawing upon a range of literary texts from a variety of genres, this course will explore the politics of language and style in a series of cultural debates that shaped British national character from the late seventeenth to the late eighteenth centuries. Selected topics may include: literary representations of religious establishment and dissent; the division of power; the question of minority cultures; revolution and reaction; the problem of economic stability. Reading-intensive course. (Offered in even-numbered years.) <i>Prerequisite(s):</i> 1.00 credits in English.

ENGL*3320 Romanticism to Victorianism: Culture and Conformity F (3-0) [0.50]

This course explores the key texts in various genres of British cultural debates of the late eighteenth to the late nineteenth century. Focal points may include: literary representations of family and society; science and narrative; Britain's "others"; class and conflict; protest and power; the roots of modernism; European influences. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3340 British Imperial Culture F (3-0) [0.50]

This multi-genre course introduces students to the literature of British imperialism in the eighteenth and nineteenth centuries. The course will consider the changing relationship between nation, empire, and colony by examining literary representations of such topics as: orientalism; travel writing; the construction of race; the representation of trade; the popular literature of empire; children's literature; the question of the other. Reading-intensive course. (Offered in even-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3360 Scottish Formations F (3-0) [0.50]

This variable content course explores selected issues, ideas and periods of this national literature, including influences on immigrant and world literature. Topics may include: mythologizing the Celt; Scottish writers and English critics; sovereignty and nationhood; "new wave" writing; Scottish influences on the Canadian canon; witches, devils, and folk tales. Reading-intensive course. (Offered in even-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3370 Narrative Modes: 18th- and 19th-Century Literature W (3-0) [0.50]

This course offers comparative study of narrative structures, which includes selections from such genres as poetry, fiction, biography, autobiography and specialized discourses. Focal points may include romance; the gothic; the novel of sensibility; the realist novel; sensation fiction; the discourses of medicine and science. Reading intensive course. (Offered in even-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3380 Studies in the History of Literary Production W (3-0) [0.50]

This course will examine a range of issues arising from the materiality of book production and circulation. Topics may include serialization; mass production and circulation; patronage; reviewing; circulating libraries; licensing; censorship; children's literature; periodicals; gift books; letters; and other aspects of publishing and the public sphere. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3420 Contemporary Drama W (3-0) [0.50]

This course offers a selective study of recent play-scripts written in English. Students are advised to consult the web-descriptions for the particular focus of the course's offering. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English or (THST*2010, THST*2120)

ENGL*3450 Early Twentieth-Century Drama F (3-0) [0.50]

This course considers contexts for the development of play-scripts written in English during the first part of the twentieth century. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English or (THST*2010, THST*2120)

ENGL*3460 Literature in London U (2-3) [0.50]

A study of British literature in its social and historical context. Reading of particular works will be supplemented by visits to sites of literary interest, the use of special library and museum collections, and attendance at public lectures and performances. For London Semester students only.

Prerequisite(s): Admission to the London Semester.

ENGL*3470 Twentieth-Century British Literature I W (3-0) [0.50]

This multigenre course explores aesthetic and socio-cultural movements (including modernism) in British literature from the turn of the century to mid-century. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3480 Twentieth-Century British Literature II F (3-0) [0.50]

This multigenre course explores aesthetic and socio-cultural movements (including postmodernism) in British literature from mid-century to the present. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3540 Writing the United States: Forging the Nation F (3-0) [0.50]

This multigenre course explores the relationship between literary production and political power from the emergence of American culture in the seventeenth century to the fragmentation of the United States around the time of the Civil War in the mid-nineteenth century. Areas of focus may include national fantasy; the literature of revolution and federation; narratives of slavery, captivity, and native genocide; immigration and travel literature; the literature of reform, abolition, and the cult of domesticity. Reading-intensive course. (Offered in even-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3550 Modern United States Literatures W (3-0) [0.50]

This multigenre course explores powerful examples of twentieth-century United States literatures, from about the First World War to the present. The selection is wide, including both traditional and experimental forms; female and male writers from various ethnic and racial groups; and a range of cultural issues. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3560 Emergent Literary Forms W (3-0) [0.50]

This course will introduce students to a range of medieval writing practices including manuscript culture, oral culture, early drama, literatures in translation, early lyric, and so forth. Its focus will be on the transition from oral to written literatures by way of emergent literary forms in English and other languages. The texts to be studied will be chosen from a corpus that includes the following: Monmouth's History of the Kings of Britain, the Lais of Marie de France, Chretien de Troyes, Layamon's Brut, the Mabinogion, Harald's Saga, the Chanson de Roland, extracts from saints' lives, miracle stories, play cycles, and others. Reading-intensive course. (Offered in even-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3570 Chaucer in Context F (3-0) [0.50]

This course will introduce students to significant aspects of Chaucer's writing read in the context of works by Chaucer's precursors and near contemporaries. Reading-intensive course. (Offered in even-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3630 Writing Canada: Forging the Nation W (3-0) [0.50]

This multigenre course focuses on Canadian literature to World War One, examining cultural contestation in the Canadian settler colony among the Canadian, U.S., British, and indigenous peoples. Topics may include the rise of nationalist discourse, race and nation, landscape and the sublime, gothic, sentimental, and historical fiction, children's literature, slavery and resistance narratives, travel and captivity narratives. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3660 Canadian Poetry W (3-0) [0.50]

This course is an introductory study of Canadian poetry, in a variety of national and international contexts. Reading-intensive course. (Offered in even-number years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3670 Twentieth-Century Canadian Literature and Criticism F (3-0) [0.50]

This multigenre course examines formations of, and resistances to, ideas of national consciousness and cultural identity in Canadian literature and criticism in English from the beginnings of the twentieth century to the 1960s. Reading-intensive course. (Offered in even-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3680 Twentieth-Century Canadian Literature and Criticism F (3-0) [0.50]

This course examines the role of narrative in Canadian literature and criticism in English, since the 1960s, in relation to a variety of social, cultural, and historical contexts. Reading-intensive course. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3690 History of Literary Criticism F (3-0) [0.50]

This course introduces students to the major critics and texts formative in the development of an English critical tradition. The study will begin with Plato and Aristotle, and proceed from the Renaissance through to modernist critical theory. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits in English.

ENGL*3740 United States Imperial Culture F (3-0) [0.50]
This multigenre course will introduce students to a period of intense cultural struggle in the United States, from Civil to First World War (i.e. from the mid-nineteenth to early-twentieth centuries). Topics for consideration may include the literary representation of race, civil war, and empire; machine and mass culture; emergent literatures and changing constituencies of American citizenship. Reading-intensive course. (Offered in odd-numbered years.)
<i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3750 Studies in Postcolonial Literatures W (3-0) [0.50]
Concentrated study in a major sub-area of postcolonial literature. Specific topics will vary each year, but may involve focus on a particular genre or region such as Africa, Australia, Canada, the Caribbean, India, and the Pacific. Reading-intensive course. (Offered in odd-numbered years.)
<i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3760 The Atlantic Diaspora: Colonialism, Resistance, Literatures W (3-0) [0.50]
This course examines literatures in English in the Atlantic colonies (selected from among Canada, the Caribbean, the United States, and Latin America) in the context of movements of peoples and cultures from Africa, Europe, and India across the Atlantic Ocean. Discussion will focus on eighteenth- and nineteenth-century texts addressing such issues as cross-cultural contacts with indigenous peoples, the slave trade and abolition movements, and the kinds of culture developing in these evolving societies. Texts will be selected from among the rich array of poetry, fiction, memoirs, letters, travel accounts, period histories and ethnographies, autobiographies and folkloric records that formed the literary culture of this period. Attention may be paid to diverse forms of oral and written expression, linguistic changes, the Creole continuum, the evolution of national and racial stereotypes, and religious syncretism. Reading-intensive course. (Offered in even-numbered years.)
<i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3820 Study in a Major Author W (3-0) [0.50]
This variable-content course provides an intensive study of works by a single writer. Reading-intensive course. (Offered in even-numbered years.)
<i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3860 Topics in Literary and Cultural Studies U (3-0) [0.50]
These variable-content courses provide opportunities for topics in cross-period studies, inter- and transdisciplinary studies and cultural studies, among others that are not available in regular offerings. Consult the School for specific offerings in a given semester. Reading-intensive course.
<i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3870 Topics in Literary and Cultural Studies U (3-0) [0.50]
These variable-content courses provide opportunities for topics in cross-period studies, inter- and transdisciplinary studies and cultural studies, among others that are not available in regular offerings. Consult the School for specific offerings in a given semester. Reading-intensive course.
<i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3880 Topics in Literary and Cultural Studies U (3-0) [0.50]
These variable-content courses provide opportunities for topics in cross-period studies, inter- and transdisciplinary studies and cultural studies, among others that are not available in regular offerings. Consult the School for specific offerings in a given semester. Reading-intensive course.
<i>Prerequisite(s):</i> 1.00 credits in English.
ENGL*3940 Seminar: Form, Genre, and Literary Value F,W (3-0) [0.50]
This seminar focuses on textual conventions such as form, style, and genre as they inform the interaction between reader and text. The impact of these conventions on the processes of literary production, reception, the production of meaning, and the assessment of literary value will be explored in relation to a limited number of literary works. (Choice of focus and texts to be determined by individual instructors.) Writing- and presentation-intensive course.
<i>Prerequisite(s):</i> ENGL*2080
ENGL*3960 Seminar: Literature in History F,W (3-0) [0.50]
This course explores the processes by which specific texts or genres emerge from particular historical moments and by which we attempt to reconstruct those historically specific connections. Seminars will focus on such topics as the archive surrounding one text, problems of period and canon, or genres and historical change. (Choice of period and texts will be determined by individual instructors.) Writing- and presentation-intensive course.
<i>Prerequisite(s):</i> ENGL*2080

ENGL*4040 Medieval & Early Modern Literatures U (3-0) [0.50]
This seminar provides the opportunity for intensive study of British literature from the beginnings to 1660.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4050 18th- & 19th-Century Literatures U (3-0) [0.50]
This seminar provides the opportunity for intensive study of British literature from 1660 to 1900.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4070 United States Literatures U (3-0) [0.50]
This seminar provides the opportunity for intensive study of American literature.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4080 Canadian Literatures U (3-0) [0.50]
This seminar provides the opportunity for intensive study of Canadian literature.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4100 Special Studies in English U (3-0) [0.50]
A seminar designed to provide students in semesters 7 and 8 with an opportunity to pursue studies in an area or areas of language or literature not available in other courses. The course may be taught by a visiting professor or members of the school.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4110 Special Studies in English U (3-0) [0.50]
A seminar designed to provide students in semesters 7 and 8 with an opportunity to pursue studies in an area or areas of language or literature not available in other courses. The course may be taught by a visiting professor or members of the school.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4200 Postcolonial Literatures U (3-0) [0.50]
This course provides the opportunity for intensive study of a representative selection of literature in English by writers from Africa, India, the Caribbean, Australia, and the Pacific.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4210 Modern and Contemporary Literatures U (3-0) [0.50]
This course provides the opportunity for a study of significant works in fiction, poetry, and drama that demonstrate new approaches in form and content characteristic of 20th-century writings in English.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4220 Special Topics in Women's Writings U (3-0) [0.50]
This course provides for intensive study of issues relating to the aesthetic strategies, such as those associated with structure, imagery, and language, devised by women writers to reflect women's experience and perceptions.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4300 Non-fiction Prose U (3-0) [0.50]
This course offers an intensive study of non-fiction prose. Topics to be explored may include the roles and contexts of public and/or private writing, the role of literary criticism in reading texts sometimes marked as non-literary, the history of non-fictional prose forms, or the formal or ideological uses of the distinctions between fact and fiction.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
ENGL*4680 20th-Century Poetry U (3-0) [0.50]
This seminar provides opportunities to study English-language modern and contemporary poetry.
<i>Prerequisite(s):</i> ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)

ENGL*4690 Contemporary Literary Theory W (3-0) [0.50]

The study of the major branches of contemporary literary theory. Topics covered will include structuralism, reader-oriented theory, feminist theory, new historicist and materialist critique, postcolonialist critique, and deconstruction.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)

ENGL*4720 Creative Writing: Prose/Poetry U (3-0) [0.50]

A development and extension of the creative writing/reading skills and techniques introduced in ENGL*2920 and ENGL*2940. This course will involve the generation and revision of challenging new work, sophisticated critique of the work of other students, and focused discussion of the cultural, social, and political issues in which the practice of creative writing is enmeshed. Admission to the course is normally dependent on the successful completion of ENGL*2920 or ENGL*2940 and, following the submission of a portfolio of new work, the approval of the instructor.

Prerequisite(s): ENGL*2920 or ENGL*2940

Restriction(s): Instructor consent required.

ENGL*4810 Directed Reading S,F,W (3-0) [0.50]

This course is intended particularly as preparation for ENGL*4910. The student will design a course of readings and assignments with the instructor, whose consent must first be obtained. This option is intended only for students who have performed particularly well within the honours program. Exceptional students may take ENGL*4810 in preparation for a ENGL*4910 creative writing project, on the approval of the instructor.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)

Restriction(s): Instructor consent required.

ENGL*4910 Honours English Essay S,F,W (3-0) [0.50]

A major essay (approx. 25 pages) on some subject of special interest to the student is prepared and written under the direction of a faculty member. Consent of the instructor must be obtained and the subject must be approved by the School prior to the semester in which the course is to be taken. This option is intended only for students who have performed particularly well within the honours program. Exceptional students may use ENGL*4910 for creative writing, on the approval of the instructor.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)

Restriction(s): Instructor consent required.

Environmental Biology

Department of Environmental Biology

Additional course listings may be found in the course descriptions for Microbiology, Plant Biology, Toxicology and Zoology.

ENVB*1010 Food Crop Pest Management W (2-2) [0.50]

The biology and control of insects, diseases, nematodes and weeds of field horticultural crops are studied. Pest control concepts including diagnosis and the biology of the pests, problem solving and the impact pest control products have on the environment with consideration to the safe use and storage or pesticides will be thoroughly examined. Non-chemical methods of pest control are also examined.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVB*2010 Food Production and the Environment W (3-0) [0.50]

Systems of food production are described and related to their impact on the environment and food safety. Consumer demands and the effects of food processing and packaging will be discussed. Issues of population pressure and sustainable development will be explored. For non-B.Sc.(Agr.) students.

Prerequisite(s): 2.50 credits

Restriction(s): AGR*1250. Not available to students registered in B.Sc. (Agr.)

ENVB*2030 Current Issues in Forest Science F (3-0) [0.50]

Basic principles of forestry and forest management with emphasis on Canada's forests. Relationship of important tree species to their preferred environments. Aspects of tree growth, forest ecology and soils and silviculture. Utilization of forests and trees in the global context.

Prerequisite(s): BIOL*1040

ENVB*2040 Plant Health and the Environment W (3-0) [0.50]

This is an interdisciplinary course on the nature and importance of diseases, weeds, insects and abiotic stresses on plant productivity and quality. A case history approach will be used to illustrate the biology of plant pests, the principles of pest population management, and related topics.

Prerequisite(s): BIOL*1040

ENVB*2100 Problem-Solving in Environmental Biology F,W (2-2) [0.50]

An introduction to current issues and problems in environmental biology. Methodologies of addressing environmental issues and concerns will be critically examined. Project design, information retrieval and organization, and the interpretation of statistical data will be covered. Oral and written presentations, both individual and group will be emphasized.

Prerequisite(s): BIOL*1040, (CHEM*1050 or CHEM*1310), MATH*1080

ENVB*2210 Introductory Apiculture F,W (3-0) [0.50]

This course is designed to acquaint the student with the broad field of beekeeping. It will include honey bee biology and behaviour, management for honey production, products of the hive, pests and enemies and the value of bees as pollinators of agricultural crops. (Also offered through distance education format.)

ENVB*3000 Nature Interpretation F,W (2-3) [0.50]

An exploration of communication and experiential learning theories and their application to natural history interpretation and environmental education program design. Students will develop and present interpretive materials and a program within the context of the existing nature interpretation program at The Arboretum. (Also offered through distance education format.)

Prerequisite(s): 1 of BIOL*2060, BOT*2050, BIOL*3110

ENVB*3010 Climate Change Biology F (3-0) [0.50]

This course examines the impacts of climate change on living organisms, biological communities and ecosystems. The course focuses on what is known, and what is not known, about the ways in which the suite of changing climate variables influence biological systems.

Prerequisite(s): BIOL*1040, (1 of BIOL*2060, BIOL*3110, BOT*2050), (CHEM*1050 or CHEM*1310)

ENVB*3030 Pesticides and the Environment W (3-2) [0.50]

The role and use of pesticides by various facets of society and the effect of these pesticides on biological activities in the environment. A research proposal is required.

Prerequisite(s): BIOL*1040, (CHEM*1040 or CHEM*2300)

ENVB*3040 Natural Chemicals in the Environment F,W (3-0) [0.50]

The role of naturally occurring chemical substances in the inter-relationships of organisms, population dynamics and the structure of ecosystems, and the role of such chemicals in the biological regulation and control of pests. (Also offered through distance education format.)

Prerequisite(s): BIOL*1040

ENVB*3090 Insect Diversity and Biology W (3-3) [0.50]

This course is an overview of insect diversity and biology emphasizing groups of importance in conservation biology, outdoor recreation and economic entomology. Labs focus on insect identification and the development of a small insect collection.

Prerequisite(s): BIOL*1040

ENVB*3160 Management of Turfgrass Diseases F (3-2) [0.50]

Ecology of turfgrass diseases and cultural methods of management will be emphasized, in addition to field recognition and microscopic diagnosis of diseases. Advances in biological and chemical control measures and their impact on turfgrass ecosystems and surrounding environments will also be discussed. (First offering Fall 2008.)

Prerequisite(s): HORT*2450

Restriction(s): DTM*3200

ENVB*3210 Plant Pathology F (2-3) [0.50]

The nature of disease in plants and a study of the basic principles of control. A collection of 30 plant disease specimens is required.

Prerequisite(s): BIOL*1040

ENVB*3250 Forest Health and Disease F (2-2) [0.50]

The impact of beneficial and pathogenic microorganisms on forest health, and the biology and management of tree diseases in natural and urban ecosystems is covered in this course. Emphasis will be placed on ecological processes, host-pathogen interactions, mutualistic associations, wood decay, and human impacts on tree health.

Prerequisite(s): ENVB*2030 or BOT*2100

ENVB*3280 Waterborne Disease Ecology F (3-2) [0.50]

Emerging and re-emerging waterborne diseases (bacterial, protozoan, and viral) as a function of environmental change (including chemical and biological pollution and climate change) are covered in this course. Waterborne diseases, in freshwater and marine ecosystems, will be examined from historical and contemporary issues as they relate to public and environmental health from regional, national, and international perspectives. Topics presented within the course will include current waterborne diseases of humans and aquatic fauna, detection of waterborne pathogens, microbial evolution, microbial physiology, water regulations and protection of drinking water.

Prerequisite(s): BIOC*2580, MBG*2000

ENVB*3300 Applied Ecology and Environment F (2-2) [0.50]

Environmental issues require scientific analysis. The applications of ecology, the science of diversity, abundance, and activities of living things and their interactions with the physical and biotic environment, are presented as the basis for sustainable agricultural practices, ecosystem rehabilitation, and conservation. Use of ecological principles in planning and policy are debated in local, regional, national, and global contexts.

Prerequisite(s): 1 of BIOL*2060, CROP*2110, (BIOL*3110, BIOL*3120)

ENVB*3330 Ecosystem Processes and Applications W (3-0) [0.50]

An ecosystem approach that treats living organisms and physical elements of the environment as components of a single, integrated system is introduced in this course. The important processes that characterize ecosystems, tracing water, carbon and nutrients from their abiotic sources to their cycles through plants, animals and decomposers will be examined. Human activity is a dominant influence on these cycles and this influence is surveyed in several highly impacted ecosystems.

Prerequisite(s): BIOL*1040, (1 of BIOL*2060, BIOL*3110, BOT*2050), (CHEM*1050 or CHEM*1310)

ENVB*4020 Water Quality and Environmental Management F (3-3) [0.50]

This course will introduce the student to issues pertaining to water quality, how to assess environmental impacts, and strategies for the management of water resources. Examples and case studies will draw from agricultural, industrial and municipal sources. Topics include: historical perspectives, methods to assess water quality, restoration and rehabilitation of impacted aquatic habitats, and risk assessment and management of water resources.

Prerequisite(s): BIOL*2060

ENVB*4040 Behaviour of Insects W (3-0) [0.50]

Investigation of the behaviour of insects within an ecological and evolutionary framework. Topics range from basic behavioral principles to the complex behaviour exhibited by the social insects.

Prerequisite(s): 1 of BIOL*3110, ENVB*3090, ZOO*4380, ZOO*4400

ENVB*4070 Biological and Cultural Control of Plant Diseases W (3-0) [0.50]
Current concepts and approaches to managing plant pathogens and diseases in crops and natural plant communities by measures that have minimal impact on the environment. Topics include naturally-occurring biological control such as suppressive soils and induced host resistance, use of microbial agents and their modes of action, transgenic disease resistance, use of organic soil amendments and mulches to promote microbial diversity and suppress pathogens, and effects of sanitation, crop sequences, tillage, flooding, soil solarization and other cultural practices on microbial communities, including pathogens and on disease epidemics.
<i>Prerequisite(s):</i> 1 of BIOL*3050, ENVB*3210, MICR*3220
ENVB*4100 Applied Entomology W (3-3) [0.50]
A study of the life histories and pest management practices employed against insect pests of various plant and animal hosts. Principles of economic entomology are illustrated using specific insect pests as examples.
<i>Prerequisite(s):</i> 1 of ENVB*3090, 0.50 credits in Crop Production at the 3000 level
ENVB*4130 Chemical Ecology: Principles & Practice W (3-0) [0.50]
Chemicals mediate interactions between individuals of a species and between organisms and their host plants. These interactions can be manipulated and exploited to manage pest populations through the use of pheromones, allelochemicals and host plant resistance. The nature of these interactions (from behavioural to evolutionary), biological and chemical methods used in their investigation, and the application of chemical ecology to insect pest and plant disease management will be covered.
<i>Prerequisite(s):</i> ENVB*3040
ENVB*4220 Biology of Aquatic Insects F (2-3) [0.50]
A study of the adult and immature forms of aquatic insects. Students are required to present a collection of at least 200 insects.
<i>Prerequisite(s):</i> ENVB*3090
ENVB*4240 Biological Activity of Pesticides W (3-0) [0.50]
A study of the fate and mode of action of pesticides, e.g., insecticides, herbicides and fungicides.
<i>Prerequisite(s):</i> 0.50 credits in biochemistry
ENVB*4260 Field Entomology F (1-6) [0.50]
An introduction to insect sampling, observation, and experimentation in field situations. Lectures and discussions on the biology of the insect fauna of the field site. Students conduct two projects (individual or small group): (1) a diversity study involving the observation, collection and identification of selected groups of insects and (2) a behaviour/ecology study utilizing experimental techniques to test hypotheses. Student evaluation based on participation in course activities and written reports. Course fees cover the costs of room, board, equipment, and transportation to the field station. Detailed information is available from the Office of the Chair - Department of Environmental Biology. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly.
<i>Prerequisite(s):</i> 1.00 or more credits in biological sciences, ENVB*3090
ENVB*4270 Insect Biosystematics W (2-3) [0.50]
A study of the lesser known groups of native insects and an introduction to taxonomic procedure and the principles of insect systematics. Students are required to assemble their own insect collections prior to registering in this course. The laboratory portion of the course will focus on identification of student insect collections.
<i>Prerequisite(s):</i> ENVB*3090
ENVB*4290 Applied Insect Physiology F (2-3) [0.50]
This course examines major physiological systems of insects at the molecular, cellular and whole animal levels of organization. Emphasis is placed on identification of potential physiological targets for insecticides, and molecular mechanisms of insecticide resistance. Applications of analytical chemistry, electrophysiology, mathematical modeling and molecular biology to the study of insect physiology are discussed. The course includes tutorial exercises examining the external and internal morphology of representative insect species.
<i>Prerequisite(s):</i> STAT*2040, (1 of ENVB*3030, ENVB*3040, ENVB*3090, TOX*2000, ZOO*3200)
ENVB*4420 Problems in Environmental Biology S,F,W (0-6) [0.50]
Students will select a research problem in an area of special interest. Direction will be given by a faculty member concerned with entomology-apiculture, applied microbiology, weed science and environmental physiology, plant pathology, etc., as represented within the department. For 7th and 8th semester students considering graduate studies.
<i>Prerequisite(s):</i> 1.50 credits at the 3000 level in the agricultural and biological sciences
<i>Restriction(s):</i> Instructor consent required.

ENVB*4550 Ecotoxicological Risk Characterization W (3-0) [0.50]
A biologically based, advanced course that will give students working knowledge of current processes and techniques for ecotoxicological risk characterization. The course material will cover the topics of problem definition, dose response characterization, exposure characterization, risk assessment, and risk management decision making. (Also listed as TOX*4550.)
<i>Prerequisite(s):</i> ENVB*3030, TOX*2000
<i>Equate(s):</i> TOX*4550
ENVB*4780 Forest Ecology F,W (3-3) [0.50]
Principles of forest ecology with emphasis on the ecological principles needed for sound forest management. Biotic and abiotic components of forest ecosystems will be discussed in the context of energy flow, nutrient cycling, forest succession and appropriate silvicultural systems. (Also offered through distance education format.)
<i>Prerequisite(s):</i> 1 of BOT*2050, BIOL*2060, BIOL*3110, ENVB*2030
ENVB*4800 Topics in Applied Biology F (2-2) [0.50]
An integrated overview of those areas of applied biology that are of special interest to environmentalists. The material will be directed toward students majoring in Environmental Biology and Environmental Protection. Lectures and discussions will be presented by faculty and other professionals from research, business, education and technical fields. Students will conduct seminars on selected topics.
<i>Prerequisite(s):</i> 1.50 credits at the 3000 level in the agricultural or biological sciences
<i>Restriction(s):</i> Restricted to B.Sc. (Environmental Biology major) or B.Sc. (Env.) (Environmental Protection major.)

Environmental Management

ENVM*1000 Introductory Environmental Science F (3-2) [0.50]

Students will explore a broad range of environmental issues facing society today with particular focus on Canadian and local agriculture. This course will provide an understanding of the living and non-living factors as well as social and economic constraints involved in correctly identifying and resolving environmental issues. The interdisciplinary approach of environmental science is reinforced with real life case studies designed to challenge students to critically assess alternatives and/or possible solutions.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*1020 Introduction to Environmental Microbiology W (2-3) [0.50]

This course will introduce the students to Environmental Microbiology. Topics of discussion will include water and wastewater systems, soils and sediments; as well as the importance of bacteria in disease, nutrition, food and food processing. Students will be introduced to various methods of environmental monitoring such as sampling and testing of public drinking water, how to monitor for cleanliness in food processing facilities as well as water ways used for recreational purposes. Student immunization records are required. See course instructor.

Restriction(s): Registered in B.B.R.M. Environmental Management. Instructor consent required.

Location(s): Ridgetown

ENVM*1050 Surveying and GIS F (3-2) [0.50]

This course covers the basic principals of surveying, map reading and production. The student will learn how to read maps, take precise measurements, use basic survey instruments and create maps and site plans. The student will learn the basics of Geographic Information System (GIS) and the Global Positioning System (GPS) and use these tools to organize and store spatial data. The students will use Remote Sensing techniques for a range of applications.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*1070 Nutrient Management W (3-2) [0.50]

This course will examine the best management practices associated with nutrient management on farms. Emphasis will be placed on the components and development of a nutrient management plan and the safe utilization of various nutrient sources (fertilizers, manures and biosolids) in agricultural production systems.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*1090 Occupational Health and Safety F (3-2) [0.50]

This course explores issues and legal requirements involved in promoting safe communities and work places. Technical, legislative, political, ethical and personal issues are explored. Students will examine and evaluate topics including the Workplace Hazardous Material Information System, Material Safety Data sheets, and the responsibilities of Joint Health and Safety Committees and confined space entry. Hazards to human health resulting from exposure to a variety of physical and chemical hazards found in the workplace will be examined.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown, Kemptville

ENVM*1100 Ecology F (3-2) [0.50]

This course is an introduction to the science of ecology - the study of interactions between organisms and their environments. Major topics include adaptation, populations, communities, biodiversity, ecosystems and competition. Students will analyze the effects of climate change and human activities on ecological processes. A detailed analysis of case studies of several environmental problems will be carried out, using ecological principles. (First offering - Fall 2007)

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*1120 Environmental Monitoring W (3-2) [0.50]

This course will introduce the Environmental Management students to various methods used to measure environment impact. Students will achieve a summary understanding of the various government and municipal agency threshold limits and guidelines of the studied environmental parameters such as water quality, vegetation, terrestrial and social impact analysis. Student immunization records required for this course. See course instructor.

Restriction(s): Registered in B.B.R.M. Instructor consent required.

Location(s): Ridgetown

ENVM*1150 Water Resource Management W (3-2) [0.50]

This course will focus on the significance of the various elements of the hydrologic cycle (e.g. precipitation, runoff, infiltration, groundwater recharge and discharge, etc.). The student will examine common water quality standards and the most significant quality problems including causes and pathways that contaminants follow to reach surface water and groundwater, with special focus on agricultural impacts. The course will introduce water and wastewater treatment systems. (First offering - Winter 2008)

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*2020 Environmental Law F (3-2) [0.50]

This course will introduce the student to the Canadian legal process. Topics will include how new laws and regulations are developed, drafted, passed and administered in Ontario and across Canada. The course will focus on environmental legislation at both the federal and provincial levels of government. (First offering - Fall 2007)

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*2050 Agriculture and Environmental Stewardship F (3-2) [0.50]

This course examines the impact and role of farming in the agro-ecosystem. Lectures and case studies will be used to explore potential pathways of soil degradation and environmental contamination from agriculture, site assessment of environmental risk associated with specific farm operations and the utilization of best management practices for the conservation of soil, water and other natural resources.

Prerequisite(s): BIOL*1030

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*2060 Sewage and Wastewater Treatment F (2-3) [0.50]

This course provides the student with the basic design concepts and operational techniques of industrial and municipal wastewater treatment systems. Treatment processes, optimization and testing methodologies as well as auditing and analytical/operational calculations, legal requirements and operator responsibilities will be addressed. (First offering - Fall 2007)

Prerequisite(s): ENVM*1120

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*2070 Water Treatment F (2-3) [0.50]

This course provides the student with the basic design concepts and operational techniques of industrial and municipal water treatment systems. Treatment processes for ground and surface water, optimization and testing methodologies as well as auditing and analytical/operational calculations, legal requirements of water taking and operator responsibilities will be addressed. (First offering - Fall 2007)

Prerequisite(s): ENVM*1020 is strongly recommended, ENVM*1120

Restriction(s): Registered in B.B.R.M. Environmental Management

Location(s): Ridgetown

ENVM*2080 Industrial Waste Management W (3-2) [0.50]

The course is designed to give students a thorough understanding of the field of industrial waste management. From a regulatory perspective topics include Ontario non hazardous waste Statutes and Regulations. The course explores the various sub-sets within the field of industrial waste management. Topic areas include municipal and industrial recycling and waste minimization programs with emphasis on the development and design of programs that collect wastes generated in the Industrial, Commercial and Institutional sectors. Waste minimization, ISO 14001 and Environmental Management Systems methodologies are explored. (First offering - Winter 2008)

Prerequisite(s): 3.00 credits.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*2090 Spills Response Planning W (3-2) [0.50]

This course explores both the moral and ethical questions pertaining to the management and abatement of spills reporting, spills remediation and prevention strategies. The course will introduce students to the field of spill response and spill response planning. The current Province of Ontario Spills Legislation will provide the legislative framework for this course. Students will examine the development of industrial contingency and emergency planning. (First offering - Winter 2008)

Prerequisite(s): 3.00 credits

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

ENVM*2500 Integrated Project (Environmental) W (2-3) [0.50]

Students will integrate the skills and knowledge gained in earlier courses in analysing the environmental systems of an industry, municipality, agri-business and/or agricultural enterprise. The students will work in teams to complete a detailed Environmental Management System and create environmental policies and action plans. (First offering - Winter 2008)

Prerequisite(s): Minimum of 5.00 credits in the B.B.R.M. program, AGEC*1100

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

Environmental Sciences

Faculty of Environmental Sciences

The program in Environmental Sciences is interdisciplinary, involving courses from several different departments. See the B.Sc.(Env.) program information in Section X--Undergraduate Degree Programs.

ENVS*1020 Introduction to Environmental Sciences F (3-2) [0.50]

Students will be shown how to recruit their skills as scientists to identify, characterize, and analyze environmental problems. The course will emphasize the history of environmental science by focusing on how problems were first identified and then solved at different stages of human understanding of biology, chemistry, physics, economics, law, and religion. Students will be taught to communicate their understanding of environmental science to specialized audiences and to the public.

Restriction(s): Registration in the B.Sc. (Env.) program.

ENVS*2010 Decision-making and Communication Skills F (1-3) [0.50]

This course will cover basic concepts in creative thinking, research design, and project planning through discussion and application of a problem-solving methodology. A strong emphasis on oral and written presentations is included. (Last offering - Fall 2008)

Prerequisite(s): ENVS*1010 . Registration in semester 3.

ENVS*2150 Terrestrial Systems F (3-2) [0.50]

In this course students will be taught how to apply quantitative methods to the analysis of terrestrial systems of the earth from many simultaneous perspectives. The material will include the physical, chemical and biological components of landforms and how they interact with humans. The economic, social and policy implications of humans interacting with terrestrial systems will also be emphasized. The history of the analysis of terrestrial systems will be systematically included in the material. (First offering - Fall 2008)

Prerequisite(s): ENVS*1020, GEOG*1300

Restriction(s): Registration in the B.Sc. (Env.) program.

ENVS*3100 Internship/Externship in Environmental Sciences S,F,W (0-6) [0.50]

This is a student initiated experiential learning opportunity to be undertaken either on or off campus, and developed in consultation with the Associate Dean's Office (Faculty of Environmental Sciences). Details of the proposed activities will be outlined in a learning contract initiated by the student and agreed by the Associate Dean and an appointed project advisor prior to the commencement of the work experience. The supervisor will also provide a description of the project and/or the work experience. The course is designed to meet the needs of B.Sc. (Env.) students. (This is not available to students in the B.Sc. (Env.) Co-op program.)

Prerequisite(s): 12.50 credits including ENVS*2010

Restriction(s): Instructor consent required.

ENVS*3150 Aquatic Systems W (3-2) [0.50]

In this course students will be taught how to apply quantitative methods to the analysis of aquatic systems of the earth from many simultaneous perspectives. The material will include the physical, chemical and biological components of the various liquid surficial structures and processes and also how they interact with humans. The economic, social and policy implications of humans interacting with aquatic systems will also be emphasized. The history of the analysis of aquatic systems will be systematically included in the material. (First offering - Winter 2010)

Prerequisite(s): 11.00 credits including ENVS*1020, ENVS*2150, CHEM*1050

Restriction(s): Registration in the B.Sc. (Env.) program.

ENVS*3160 Atmospheric Systems W (3-2) [0.50]

In this course students will be taught how to apply quantitative methods to the analysis of atmospheric systems of the earth from many simultaneous perspectives. The material will include the physical, chemical and biological components of atmospheric structures and processes and also how they interact with humans. The economic, social and policy implications of humans interacting with atmospheric systems will also be emphasized. The history of the analysis of atmospheric systems will be systematically included in the material. (First offering - Winter 2010)

Prerequisite(s): 11.00 credits including ENVS*1020, ENVS*2150

Restriction(s): Registration in the B.Sc. (Env.) program.

ENVS*3320 Principles of Landscape Ecology F (3-2) [0.50]

An integrated approach to understanding the functioning of landscapes. The emerging theories, concepts and methodologies of landscape science and their application to landscape and environmental management. (Offered in even-numbered years.)

Prerequisite(s): 1 of BIOL*2010 , BIOL*2060, BIOL*3110, GEOG*2110

ENVS*4011 Project in Environmental Sciences F (0-1) [0.00]

First part of the two-semester course ENVS*4011/2. Refer to ENVS*4011/2 for course description.

Prerequisite(s): Registration in semester 7 or 8 of the B.Sc.(Env.) degree program.

ENVS*4011/2 Project in Environmental Sciences F-W [0.50]

The course permits the student the opportunity to integrate both the skills and knowledge acquired in earlier courses through application to current environmental problems and issues. Group research problems and exposure to critical environmental policy issues will form the core elements of the course. Students must be registered and attend preliminary organizational meetings scheduled in the Fall semester. This is a two-semester course offered over consecutive semesters. When you select it you must select ENVS*4011 in the Fall semester and ENVS*4012 in the Winter semester. A grade will not be assigned to ENVS*4011 until ENVS*4012 is completed.

Prerequisite(s): Registration in semester 7 or 8 of the B.Sc.(Env.) degree program.

ENVS*4012 Project in Environmental Sciences W (0-3) [0.50]

Second part of the two-semester course ENVS*4011/2. Refer to ENVS*4011/2 for course description.

Prerequisite(s): ENVS*4011

ENVS*4220 Environmental Impact Assessment W (3-0) [0.50]

This course examines environmental impact assessment (EIA) from philosophical, methodological and institutional perspectives. The evolution of EIA in Canada will be the focus. Case studies illustrating major issues and applications will be presented at a variety of geographical scales. The preparation and presentation of a research project is an integral component.

Prerequisite(s): 15.00 credits including (1 of GEOG*3210, POLS*3370 or ZOO*4050, where ZOO*4050 may be taken concurrently)

ENVS*4300 Environmental Law & Regulation F (3-2) [0.50]

In this course, students will be asked to recruit their expertise in all of the basic and applied sciences to the task of understanding, participating in, and modifying where necessary the economic and legal systems of the world to deal with human exploitation of the earth. The course will include a discussion of the history of the success and failure of different economic and legal models and their impact on the sustainability of the earth's resources.

Prerequisite(s): 14.00 credits

Restriction(s): Registration in the B.Sc. (Env.) program.

ENVS*4500 International Environmental Field Course F (0-6) [0.50]

This is an interdisciplinary field course to be held overseas. The course will include a common curriculum for all students, dealing with the historical, geographical, cultural and biological aspects of the location. Students will also undertake a project which would normally relate to their own specific interest. Formal instruction on the common core element of the course will be given either by Guelph faculty and/or by faculty from the host country. Each student will submit both a paper developed from the general core of the course and also a project report. This course will run as Interdisciplinary Field Studies in Iceland in odd numbered years and will normally be held for a three-week period in August. Students from all disciplines are encouraged to apply directly to the course coordinator in the appropriate semester as indicated on the Faculty of Environmental Sciences webpage.

Prerequisite(s): 12.50 credits

Restriction(s): Approval of the Faculty of Environmental Sciences.

Equine Management

Ontario Agricultural College

EQN*1020 Horse Care Practicum I F (1-2) [0.00]

This course provides hands-on learning in essential horse care and handling techniques such as grooming, bandaging and clipping. The emphasis is on daily and routine care of the horse. Safety is stressed throughout. Students may expect early morning and some weekend assignments. Depth of study is not meant to be exhaustive but rather to cultivate absolute proficiency in these areas.

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*1030 Horse Care Practicum II W (1-2) [0.00]

This course provides hands-on learning in essential horse care and handling techniques such as feeding, lunging, and trailering. Safety is stressed throughout. Students may expect early morning and some weekend assignments. Depth of study is not meant to be exhaustive but rather to cultivate absolute proficiency in these areas.

Prerequisite(s): EQN*1020

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*1040 Equine Facility Management and Design W (3-0) [0.50]

This course presents aspects of the building, renovating and management of horse facilities including site planning and interior design. Special consideration is given to environmental control, waste management and environmental stewardship.

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*1060 Equine Event Management I F (1-3) [0.50]

This course will introduce skills required to organize equine events, such as horse shows and clinics. Major topics include event planning, and managing event staff and volunteers. Required activities outside of regularly scheduled class hours will be assigned. Students will assist in the planning and staging of Equestrian Centre activities.

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*1070 Equine Event Management II W (1-3) [0.50]

This course will further develop the skills required to organize equine events, such as horse shows and clinics. Major topics include regional impact, marketing and budgeting. Required activities outside of regularly scheduled class hours will be assigned. Students will assist in the planning and staging of Equestrian Centre activities.

Prerequisite(s): EQN*1060

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*1100 Introduction to Equine Industry F (3-0) [0.50]

This course introduces students to selected current global, national and regional issues in the horse industry. A balanced examination of the various commercial uses of horses, including PMU farming and the horsemeat trade, will challenge students to evaluate the current state of the industry.

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*2020 Equine Management F (2-2) [0.50]

This two-faceted course offers students a first-hand opportunity to manage the daily operations of an equine facility and to act in the capacity of a teaching assistant. Students oversee the diploma courses in Stable Management and Stable Duty through supervising barn personnel, dealing with time and financial constraints, managing efficient productivity, teaching horse care skills, and professionalism in the workplace. (First offering - Fall 2008.)

Prerequisite(s): EQN*1030, ENVM*1090, AGR*2100

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*2040 Equine Anatomy and Physiology F (3-3) [0.50]

This course examines the gross anatomy and physiology of the horse. All the major body organs will be studied in relation to their function in the equine. Comparative analysis will be made to other domestic farm animals. (First offering - Fall 2008.)

Prerequisite(s): BIOL*1040

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*2050 Introduction to Equine Nutrition W (3-3) [0.50]

This course introduces fundamental concepts of nutrition from a biochemical perspective. The biological roles of carbohydrates, lipids and proteins are studied, as well as the role of metabolic pathways in maintaining equine health at the cellular, organ, and whole body levels. Diagnosis, management, and prevention of equine nutritional diseases are discussed. (First offering - Winter 2009.)

Prerequisite(s): BIOL*1040

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*2200 Equine Industry Trends and Issues I W (3-0) [0.50]

This course discusses selected current global, national and regional issues in the horse industry. Analysis of strengths, weaknesses, opportunities and threats are applied to controversial issues such as industry certification and transportation legislation and enforcement. (First offering - Winter 2009.)

Prerequisite(s): EQN*1100

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*3050 Equine Exercise Physiology W (3-0) [0.50]

This course considers the conversion of absorbed nutrients into metabolic fuels and the use of these substrates for work and heat production in horses. This knowledge is used as a basis for the understanding of the training and performance of horses used for competitive purposes. (First offering - Winter 2010.)

Prerequisite(s): EQN*2040, EQN*2050

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Guelph

EQN*4020 Feeding the Performance Horse F (3-0) [0.50]

This course focuses on the nutrition of horses at peak levels of performance or endurance. The use of real-world, case-study scenarios allows for the evaluation of practical feeding programs across a range of equine performance situations.. (First offering - Fall 2010.)

Prerequisite(s): EQN*3050

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Kemptville

EQN*4400 Equine Industry Trends and Issues II W (3-0) [0.50]

This seminar course integrates discussion on selected current global, national and regional issues in the equine industry, building upon knowledge gained in earlier courses. Current issues in the equine industry will be examined through debate and discussion. (First offering - Winter 2011.)

Prerequisite(s): 16.00 credits including EQN*2200, EQN*4020

Restriction(s): Registration in B.B.R.M. Equine Management

Location(s): Guelph

European Studies

School of Languages and Literatures

EURO*1050 The Emergence of a United Europe F (3-0) [0.50]

This interdisciplinary course will provide students with an understanding of the events and processes resulting in economic integration in Europe after 1945. Economic, historical and political aspects will be emphasized.

EURO*1200 European Culture from the Mid 18th to the Mid 19th Century F (3-0) [0.50]

This course explores major trends in European Culture in the context of political and social events. Focus will be on major developments in politics (e.g. the French Revolution, the birth of nationalism), philosophy (e.g. enlightenment, idealism), arts and letters (e.g. classicism, romanticism).

Restriction(s): EURO*2000

EURO*2070 European Integration, 1957-1992 W (3-0) [0.50]

This interdisciplinary course aims to provide an in-depth analysis of the development of European integration from the establishment of the EEC to 1992. Major emphasis will be placed on the historical development of the European communities, their economic framework and political institutions. Other attempts at economic integration such as EFTA and Comecon will be considered in less detail.

Prerequisite(s): 1 of EURO*1050, HUMN*1050, permission from one of the instructors or Coordinator of European Studies

EURO*2200 European Culture from the Mid 19th Century to the 1920's W (3-0) [0.50]

This course explores major trends in European culture in the context of political and social events. Topics studied include major political events and their significance for culture (e.g. bourgeois liberalism, revolts in the mid 19th century, World War I and its aftermath), thinkers who have shaped the 20th century (e.g. Nietzsche, Unamuno, Freud), avant-garde movement and innovation in the arts and letters (e.g. impressionism, futurism, expressionism, surrealism).

Prerequisite(s): EURO*1200 is recommended

Restriction(s): EURO*1020

EURO*2300 European Culture since 1920 F (3-0) [0.50]

This course explores major trends in European culture in the context of political and social events. The focus will be on political events and their significance for culture (e.g. fascism, World War II and the Holocaust and their effects in the second half of the 20th century, the political reorganization of Europe, protest movements), new trends in thought (e.g. existentialism, structuralism, post-modernism feminism) and the arts and letters (e.g. neorealism epic theatre, new wave cinema).

Prerequisite(s): EURO*1200 and EURO*2200 are recommended

Restriction(s): EURO*1020

EURO*3150 Topics in European Film W (3-0) [0.50]

This course will examine representative French, German, Italian and Spanish films in a socio-political context. It will focus on the interaction between the films' aesthetics and the political and cultural conditions in Europe. The topics to be discussed in the course will centre on the relationship between the development of major movements in European film, such as Italian Neo-Realism and the French, German and Spanish New Waves, and film makers' ideological projects such as the construction or deconstruction of national, gender and ethnic identity. (Offered in even-number years.)

EURO*4600 Honours Seminar in European Studies W (3-0) [0.50]

A seminar course designed to explore one or more topics of European culture, history and/or business, depending on the expertise of the instructor. Students should consult the Coordinator of European Studies for specific offerings.

Prerequisite(s): EURO*1020, EURO*1050, EURO*2000, EURO*2070

Restriction(s): Approval of the Coordinator for European Studies.

EURO*4740 Research Project in European Studies F,W (3-0) [0.50]

An independent study course that requires a research project on an aspect of European Studies. The topic must be approved by the Coordinator of the European Studies Program. Research is undertaken with the guidance of a faculty advisor, and seminar presentations will be included. A final research paper must be written in the student's chosen core language. Note: In order to demonstrate language proficiency and complete the requirements of EURO*4740, students have another option. They may choose to spend their third year studying at a European university, in the country where their chosen core language is spoken. Those who can demonstrate that they have successfully written a major academic paper or exam in their chosen core language while registered in a course at a European university as part of their approved study year will be waived from EURO*4740. See the Coordinator for the European Studies program for more information.

Prerequisite(s): EURO*1020, EURO*1050, EURO*2000, EURO*2070,

Restriction(s): Approval of the Coordinator for the European Studies Program.

External Courses

All courses labeled XCST*XXXX are Conestoga College Institute of Technology and Advanced Learning Courses. The corresponding Conestoga Course numbers are provided. Detailed course profiles can be accessed through the Conestoga College Institute of Technology and Advanced Learning home page at <http://www.conestogac.on.ca/>. All XCST*XXXX courses are limited to students in the Career Development Practitioner program.

All courses labeled XSEN*XXXX are Seneca College Courses. The corresponding Seneca Course numbers are provided. Detailed course profiles can be accessed through the Seneca College home page at <http://www.senecac.on.ca/>. All XSEN*XXXX courses are limited to students in the B.Sc.(Tech.) program.

All courses labeled XSHR*XXXX are Sheridan College Institute of Technology and Advanced Learning Courses. The course descriptions appear in the Sheridan College Institute of Technology and Advanced Learning academic calendar and can be accessed through the Sheridan College Institute of Technology and Advanced Learning home page at <http://www.sheridanc.on.ca/>. All XSHR*XXXX courses are limited to students in the Sports Injury Management program.

XSEN*2010 Effective Business and Technical Writing F (3-0) [0.50]

This subject introduces the study of technical writing, including specified formats such as memoranda, letters, proposals, and informal reports. The course applies and develops the skills of technical writing in a series of writing assignments placing emphasis on brevity, clarity, conciseness, unity and coherence - all essential to good technical communication. Basic research skills and effective oral communications are also covered. This course is offered at Guelph.

External Course Code(s): Seneca #SES-391

XSEN*2020 Management Studies: EQ and the New Workplace W (3-0) [0.50]

The major competitive advantage in today's new workplace is people. While the traditional set of technical and managerial skills is still essential, more critical are relationship skills and leadership skills. This course positions the key relationship skills essential to personal and organizational excellence and the real leaders initiate and facilitate the many challenges that require emotional resiliency. This course is taught at Seneca College.

External Course Code(s): Seneca #EQQ-501

XSEN*3020 Pharmaceutical Analysis F (2-4) [0.50]

The aim of this course is to simulate the pharmaceutical quality control laboratory. Students are introduced to pharmaceutical terms, definitions and forms, drug legislations, and regulatory agencies (FDA, TPP). Strong emphasis is placed on the navigation and interpretation of pharmacopeial compendia (USP, BP, EP). Practical aspects include physical, wet chemical and instrumental analyses of drug substances, in-process materials and finish products using official pharmacopeial methodologies. This course is taught at Seneca College.

Prerequisite(s): CHEM*2400, BIOC*2580

External Course Code(s): Seneca #PHA-333

XSEN*3030 Pharmacology and Applied Toxicology W (3-3) [0.50]

This subject is an introduction to the general aspects of pharmacology and toxicology. The lecture topics will cover the pharmacological activity of drugs on the autonomic nervous system, central nervous system and the cardiovascular system. The laboratory practicals will focus on testing, drug screening, and clinical trial methodology. This course is taught at Seneca College.

Prerequisite(s): CHEM*2400, BIOC*2580

External Course Code(s): Seneca #PHT-533

XSEN*3040 Occupational Health and Chemistry W (2-3) [0.50]

A general coverage of general aspects of industrial hygiene. Specific topics include Canadian legislation with respect to Occupational Safety, modes of evaluation of chemical exposure, occupational toxicology, and instrumentation associated with the evaluation of the occupational environment. This course is taught at Seneca College.

Prerequisite(s): CHEM*2700

External Course Code(s): Seneca #OCC-433

XSEN*3060 Pharmaceutical Analysis - Advanced W (2-3) [0.50]

This course reinforces the concept of how the pharmaceutical laboratory works by focusing on method validation requirements within the pharmaceutical industry. It introduces students to the regulatory (ICH, FDA) requirements and guidelines for systems validation, including TPP-acceptable methods and GMP regulations. Validation methods that are taught include Related Substances, Assay, Dissolution and Cleaning. Critical validation parameters (e.g., linearity, specificity, limit of quantitation, etc.) are focused on as well as validation protocols including establishing specifications and dealing with exceptions or out-of-specification (OOS) results. Process validation characteristics (i.e., Design Qualification (DQ), Installation Qualification (IQ), Operation Qualification (OQ), Performance Qualification(PQ) or System Suitability) are also emphasized as well as "Best Practices" such as Process Capabilities and Annual Product Review. This course is taught at Seneca College.

Prerequisite(s): XSEN*3020

External Course Code(s): Seneca #PHA-533

XSEN*3100 Analog and Digital Communications F,W (3-2) [0.50]

Students are provided with a good background in the fundamentals of analog communication techniques including modulation schemes (e.g. AM and FM) and associated circuitry. The course also introduces the concepts of digital communications, covering such topics as sampling, PCM, digital multiplexing, and digital modulation. This course is taught at Seneca College.

Prerequisite(s): PHYS*2040

External Course Code(s): Seneca #ADC-455

XSEN*3120 Microprocessors I F,W (3-2) [0.50]

This introductory microcontroller subject deals with both the hardware and software of 8-bit devices. The primary example used is the Motorola MC68HC11. The subject examines two major areas: introductory computer/microcontroller concepts, and assembler language programming. A substantial amount of time is devoted to practical laboratory work. This course is taught at Seneca College.

Prerequisite(s): CIS*2500, PHYS*2040

External Course Code(s): Seneca #MCO-455

XSEN*3130 Object Oriented Programming Using C++ F,W (2-2) [0.50]

The course uses the C++ programming language as a tool to implement Object Oriented Programming (OOP) concepts. The OOP concepts such as Classes, Member and Friend Functions, Constructor and Destructor Functions, Operator Overloading, Inheritance, Composition, Virtual Functions and Polymorphism, Stream I/O, Templates and Exception Handling are covered, as well as the OOP methods. This course is taught at Seneca College.

Prerequisite(s): CIS*2500

External Course Code(s): Seneca #PRG 355

XSEN*3140 Operating Systems F,W (2-2) [0.50]

This subject explores the system concepts, command languages and application of several operating system platforms such as UNIX. This course is taught at Seneca College.

Prerequisite(s): CIS*1500, (CIS*2030 recommended)

External Course Code(s): Seneca #DPR-355

XSEN*4010 Pharmaceutical Calculations W (3-0) [0.50]

This subject deals with computations relevant to pharmaceutical topics. Included are the representation of scientific and technical data, chemical kinetics and drug stability, osmolarity and tonicity, pH and solubility, viscosity, phase rule and numerous pharmaceutical calculations (e.g. manufacturing formulas, dosage formulations, radiochemistry, concentration, alligation, HLB, etc.). This course is taught at Seneca College.

Prerequisite(s): CHEM*2400, BIOC*3570

External Course Code(s): Seneca #PHC-533

XSEN*4020 Pharmaceutical Organic Chemistry F (1-3) [0.50]

The determination of the structure of organic compounds using spectroscopic methods such as N.M.R. and mass spectroscopy are discussed. Correlation of structure and reactivity (i.e. drug activity) of organic compounds is also explored. A multi-step synthesis of an anesthetic (lidocaine) and mass-spectrometric analysis of an unknown organic compound (or mixture) are examples of lab-projects. This course is taught at Seneca College.

Prerequisite(s): CHEM*3750

External Course Code(s): Seneca #PAC-633

XSEN*4030 Pharmaceutical Product Formulations F (2-3) [0.50]
This subject deals with the theoretical and practical aspects of pharmaceutical product formulation with an emphasis on semi-solid and liquid formulations. The students prepare and test ointments, creams, lotions, and syrups in the laboratory. Formulation as it relates to overall product stability and efficacy is also covered in both theoretical and practical terms. This course is taught at Seneca College. <i>Prerequisite(s):</i> CHEM*3750 <i>External Course Code(s):</i> Seneca #PPF-633
XSEN*4040 Pharmaceutical Manufacturing F (2-3) [0.50]
This course is an introduction to the important principles and methods related to the production of pharmaceuticals. Topics include methods of manufacture of important dosage forms, regulations governing various dosage forms, good manufacturing practice as defined by regulatory bodies and an overview of the manufacturing plant during the various stages of production with emphasis on GMP. This course is taught at Seneca College. <i>Prerequisite(s):</i> BIOC*3570, CHEM*3750 <i>External Course Code(s):</i> Seneca #PYM-633
XSEN*4050 Biopharmaceuticals F (3-0) [0.50]
This subject introduces the student to the rapidly developing field of biotechnology and biopharmaceuticals. Techniques used in the development of biopharmaceuticals will be emphasized as well as large-scale production of biologicals manufactured by genetic engineering processes. This course is taught at Seneca College. <i>External Course Code(s):</i> Seneca #BPH-633
XSEN*4100 Event Driven Programming and Visual Basic F,W (2-2) [0.50]
This course covers the essential programming concepts supported by the Visual Basic programming language, including: object-oriented programming, database management, activeX controls, file I/O, user-defined data types. Various objects (forms, modules and controls) provided by Visual Basic will be used. The course will introduce the fundamental concepts of the event-driven and visual programming. Visual Basic Professional Edition will be used as the integrated development environment. The interaction between Visual Basic and various DBMS software packages will be introduced. This course is taught at Seneca College. <i>Prerequisite(s):</i> XSEN*3130 <i>External Course Code(s):</i> Seneca #PRG-455
XSEN*4110 Data Acquisition and Control F,W (3-2) [0.50]
This course covers the real-time acquisition and display of analog signals using a PC, interface card, and A/D converter. 'C' will be used as the programming language. The course will cover the basic architecture of the PC as well as interfacing to the PC bus. Graphical programming techniques will be developed for the purposes of displaying and trending sensor data. The course will introduce the fundamental concepts of feedback control using a PC. The course also reviews analog electronics, the purpose being to develop skills in analog interface design. This course is taught at Seneca College. <i>Prerequisite(s):</i> CIS*2500, MATH*2170 <i>External Course Code(s):</i> Seneca #CST-555
XSEN*4120 Data Communications I F,W (4-2) [0.50]
This course has been designed to provide an in-depth understanding of the underlying principles of the rapidly expanding and changing discipline of Data Communications. The following topics in this subject are discussed: terminology, components, network design and configurations, transmission media including fibre optical design methods, protocols, topologies, architectures, private and public network strategies and LAN vendors. This course is taught at Seneca College. <i>Prerequisite(s):</i> XSEN*3100 <i>External Course Code(s):</i> Seneca #DCM-555
XSEN*4130 Networking Essentials F,W (1-3) [0.50]
The major topics covered in this course include: networking overview and topologies, network cabling, network access methods and technologies, network architectures (OSI model) and standards, network protocols, network connectivity, local area network implementation and configuration, Windows 95/98, Windows NT/2K, and Linux. This course is taught at Seneca College. <i>Prerequisite(s):</i> CIS*2500, XSEN*3140, (CIS*2030 recommended) <i>External Course Code(s):</i> Seneca #NET-555
XSEN*4140 Technical and Personal Communications F,W (4-0) [0.50]
This course combines reading, writing, and basic research skills and applied them to technical materials and situations. Today, technical firms insist on strong communication skills in their employees, not just technical competence. Oral and written presentations of material, as well as project-related research, will be required elements of this course. This course is taught at Seneca College. <i>External Course Code(s):</i> Seneca #TPC-455

XSEN*4150 Microprocessors II F,W (3-3) [0.50]
This is the second microcontroller course based on the ADAPT11 EVB Micro Controller System. The course emphasizes Assembly Language program structure, implementation of subroutines, input/output concepts, interrupt utilization, and analog to digital conversion. Students will use an interface which involves switches, LEDs, four 7 segment displays, light sensor, temperature sensor, speaker, infrared transmitter and receiver, and RAM. This course is taught at Seneca College. <i>Prerequisite(s):</i> XSEN*3120 <i>External Course Code(s):</i> Seneca #MCO-555
XSEN*4160 Computer Peripheral Systems F,W (2-2) [0.50]
This course prepares students for the A+ certification examination, and for small business PC network consulting. Topics include WIN 9x and 2K installation, LINUX installation, SCSI and USB, monitors, printers, notebooks, server set up in a multi-OS network, tape backup systems, and digital cameras. This course is taught at Seneca College. <i>Prerequisite(s):</i> XSEN*4130 <i>External Course Code(s):</i> Seneca #PER-655
XSHR*1710 Sheridan--Emergency Conditions U (0-0) [0.25]
Offered by Sheridan College.
XSHR*1720 Sheridan--Lower Quadrant Composite U (0-0) [0.25]
Offered by Sheridan College.
XSHR*1730 Sheridan--Field Practice I (100 hours) U (0-0) [0.50]
Offered by Sheridan College.
XSHR*1740 Sheridan--Protective Equipment U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2710 Sheridan--Field Practice II (200 hours) U (0-0) [0.50]
Offered by Sheridan College.
XSHR*2720 Sheridan--Upper Quadrant Composite U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2730 Sheridan--Modalities U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2740 Sheridan--Field Practice III (150 hours) U (0-0) [0.50]
Offered by Sheridan College.
XSHR*2750 Sheridan--Field Practice IV (250 hours) U (0-0) [1.00]
Offered by Sheridan College.
XSHR*2760 Sheridan--Clinical Assessment Rehab. I U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2770 Sheridan--Functional Anatomy of Spine/Head U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2780 Sheridan--Sports Injury Clinic I U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2790 Sheridan--Mechanics of Lower Quadrant U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2800 Sheridan--Human Adaptation to Exercise U (0-0) [0.50]
Offered by Sheridan College.
XSHR*2810 Sheridan--Clinical Assessment Rehab. II U (0-0) [0.50]
Offered by Sheridan College.
XSHR*2820 Sheridan--Mechanics of Upper Quadrant U (0-0) [0.50]
Offered by Sheridan College.
XSHR*2830 Sheridan--Clinical Assessment Rehab. III U (0-0) [0.50]
Offered by Sheridan College.
XSHR*2840 Sheridan--Clinical Administration U (0-0) [0.50]
Offered by Sheridan College.
XSHR*2850 Sheridan--Manual Therapy U (0-0) [0.25]
Offered by Sheridan College.
XSHR*2860 Sheridan--Field Practice V (200 hours) U (0-0) [0.75]
Offered by Sheridan College.
XSHR*2870 Sheridan--Field Practice VI U (0-0) [0.75]
Offered by Sheridan College.

XSHR*2880 Sheridan--Clinical Placement U (0-0) [1.50]

Offered by Sheridan College.

XSHR*2890 Sheridan--Sports Injury Clinic II U (0-0) [0.25]

Offered by Sheridan College.

Family Relations and Human Development

Department of Family Relations and Applied Nutrition.

These courses support three majors offered by the Department of Family Relations and Applied Nutrition: Child Studies, Family and Social Relations, and Gerontology.

FRHD*1010 Human Development W (3-0) [0.50]

An introduction to the study of the development of the individual throughout the life cycle. Emphasis will be placed on the interrelationships between physiological, sociological and psychological aspects of normal human development. (Also offered through distance education format.)

FRHD*1020 Couple and Family Relationships W (3-0) [0.50]

A survey of family dynamics throughout the life course, emphasizing themes of power, intimacy and family diversity. Topics may include; gender socialization, sexuality, mate selection, communication, abuse, couple interaction, parent-child relations, divorce, remarriage. (Also offered through distance education format.)

Equate(s): FRHD*2010

FRHD*1100 Life: Health and Well-Being F (3-0) [0.50]

This course integrates the theory, application and research of various aspects of health-related topics across the lifespan, emphasizing relevance to the lives of young adults.

FRHD*2040 Principles of Program Design for Children W (2-2) [0.50]

This course will examine the elements involved in planning and implementing quality play-based programs for young children. Some of the issues include: the role of the teacher, meeting developmental needs, the materials and the organization of the environment, and instructional strategies. The course will involve a workshop component.

Prerequisite(s): FRHD*2260, FRHD*2270

Equate(s): CSTU*2040

Restriction(s): Registration in B.A.Sc. Program (Child Studies or Child, Youth & Family majors).

FRHD*2060 Adult Development and Aging W (3-0) [0.50]

An overview of major theoretical approaches, research issues and methodologies, and significant research findings which relate to adult development and aging.

Prerequisite(s): 1 of FRHD*1010, PSYC*1200, SOC*1100

Equate(s): PSYC*2060

FRHD*2100 Development of Human Sexuality F (3-0) [0.50]

A social scientific analysis of human sexuality. Emphasis will be placed on the development of sexuality within an interpersonal context. (Also offered through distance education format.)

Prerequisite(s): 5.00 credits

FRHD*2110 Exceptional Children and Youth W (3-0) [0.50]

An overview of childhood exceptionalities including intellectual differences, communication disorders, sensory impairments, developmental and behaviour disorders, and health problems. Issues faced by the exceptional child as well as the parents and siblings are discussed. (Also offered through distance education format.)

Prerequisite(s): FRHD*1020, (FRHD*2270 or PSYC*2450)

Equate(s): CSTU*2110

FRHD*2260 Infant Development W (3-0) [0.50]

An examination of developmental principles and milestones characterizing infant development from conception to 24 months. Emphasis will be placed on understanding the nature of the reciprocal family-infant interactions during this period, and on the societal context influencing those interactions. (Also offered through distance education format.)

Prerequisite(s): PSYC*1200, (SOC*1100 or ANTH*1150)

Equate(s): CSTU*2260

FRHD*2270 Development in Early and Middle Childhood F (3-0) [0.50]

Examination of development in the early and middle childhood years, with emphasis on family and societal contexts.

Prerequisite(s): FRHD*1010 or (PSYC*1200 and ANTH*1150) or (PSYC*1200 and SOC*1100)

Equate(s): CSTU*2270

FRHD*2280 Adolescent Development W (3-0) [0.50]

An examination of psychosocial development in adolescence, emphasizing physiological, social and emotional changes. (Also offered through distance education format.)

Prerequisite(s): 1 of FRHD*2260, FRHD*2270, PSYC*2450

Equate(s): FRHD*3080

FRHD*2300 Principles of Program Design for Youth W (3-0) [0.50]

The course is designed to expose students to the issues and program development strategies that lay the foundation for quality experiences for youth. Students will examine the developmental needs of adolescents, models for programming and the role of the youth worker in a variety of contexts.

Prerequisite(s): FRHD*2270

Co-requisite(s): FRHD*2280

Restriction(s): Registration in the Child Studies, or Child Studies Co-op, Child, Youth and Family or Child, Youth and Family Co-op majors.

FRHD*2350 Principles of Program Design in the Human Services W (3-0) [0.50]

This course will examine the elements involved in planning and implementing effective prevention, education, and support programs for various populations in community settings. Programs include health promotion, sexual health, and support programs for new parents, new Canadians, seniors, caregivers, and individuals with disabilities. Major topics covered in this course include: the roles of organizations and human service professionals; empowerment within individuals, families and communities; working with diverse populations; needs assessments; program planning and service delivery; and program evaluation. Case studies of innovative programs are highlighted. (First offering - Winter 2009)

Prerequisite(s): FRHD*1100

Restriction(s): Registration in the Adult Development, Families and Well-Being Major

FRHD*3040 Parenting: Research and Applications F (3-0) [0.50]

A study of research concerning parent-child relationships, primarily in North American society.

Prerequisite(s): FRHD*1020, (1 of FRHD*1100, FRHD*2270, PSYC*2450)

FRHD*3060 Principles of Social Gerontology F (3-0) [0.50]

A study of social and health aspects of individual and population aging, including theories and implications for understanding and working with the elderly.

Prerequisite(s): 10.00 credits including 1 of FRHD*1020, SOAN*3100, SOC*3100

FRHD*3070 Research Methods: Family Studies F (2-2) [0.50]

A critical examination of research methods in family studies.

Prerequisite(s): 10.00 credits

Restriction(s): Registration in B.A.Sc. Program.

FRHD*3090 Child and Family Poverty F (3-0) [0.50]

An examination of the research dealing with children for whom environmental conditions constitute a serious impediment to later development; a consideration of appropriate policies and practices.

Prerequisite(s): FRHD*2110, NUTR*1010

Equate(s): CSTU*3100

FRHD*3120 Families in Canadian Context W (3-0) [0.50]

Canadian families are studied from a structural perspective and are placed in social and historical context. Topics include structural variations in family form, work roles within and outside the family, the structural significance of marriage and parenthood, and social policies affecting families.

Prerequisite(s): FRHD*1020

FRHD*3150 Strategies for Behaviour Change F,W (3-0) [0.50]

This course will review the nature and use of behaviour change strategies commonly used in interventions with children, youth, and their families.

Prerequisite(s): FRHD*2110

FRHD*3180 Observation and Assessment F,W (3-0) [0.50]

Direct observation as a strategy for collecting information on children's behaviour in applied and research settings. Emphasis on theory, recording and interpreting observational data and communicating findings in written reports.

Prerequisite(s): (FRHD*2040 or FRHD*2300), FRHD*2110

Equate(s): FRHD*4300

Restriction(s): Registration in semester 5 or above in the Child Studies or Child Studies Co-op, Child, Youth & Family or Child, Youth & Family Co-op majors.

FRHD*3190 Administration of Programs for Children and Youth W (3-0) [0.50]

A study of the roles and responsibilities of administrators in programs for children and youth with emphasis on the development of appropriate policies and procedures; management of human and financial resources; and internal and external communication within the context of multidisciplinary settings. Attention will be given to quality assurance, professional ethics, and continuing professional development. (Offered through Distance Education only.)

Prerequisite(s): 10.00 credits including one of FRHD*2260, FRHD*2270, PSYC*2450

Equate(s): CSTU*4270, FRHD*4270

FRHD*3200 Practicum - Child F,W (3-8) [1.00]
Seminar and supervised experience with children. The practicum will be designed to demonstrate the application of theory studied earlier in the program. It will also provide opportunities for working directly with young people while examining such topics as the role of the teacher, teacher-child interaction, and program implementation. Students wishing to enrol in this course must consult with the instructor during course selection.
<i>Prerequisite(s):</i> FRHD*1020, (FRHD*2040 or FRHD*2300), NUTR*1010
<i>Equate(s):</i> CSTU*3170, FRHD*3170
<i>Restriction(s):</i> Registration in the Child Studies, or Child Studies Co-op, Child, Youth and Family or Child, Youth and Family Co-op majors. Instructor Consent.

FRHD*3250 Practicum in Youth F,W (3-8) [1.00]
Through seminar and supervised experience with youth, students will demonstrate the application of theory studied earlier in the program. This practicum course will also provide opportunities for working directly with youth in a community setting while examining the role of the professionals involved and the communication with youth and community members. Developing skills in programming planning, implementation, and evaluation is a primary objective. Students wishing to enrol in this course must consult with the instructor during course selection.
<i>Prerequisite(s):</i> FRHD*1020, FRHD*2300, NUTR*1010
<i>Restriction(s):</i> Registration in the Child, Youth and Family or Child, Youth and Family Co-op majors. Instructor consent required.

FRHD*3290 Practicum I: Adult Development and Families W (3-8) [1.00]
This course offers students an opportunity to participate in seminar and supervised field placement in health and social service agencies. The practicum and seminar will develop students' helping roles in agencies and facilitate the integration and application of theoretical knowledge from previous course work with practice. It will also provide opportunities for students to work directly with individuals and/or groups and to participate in on-going programs or services. Students wishing to enrol in this course must consult with the instructor during the course selection period. (First offering - Winter 2010)
<i>Prerequisite(s):</i> FRHD*3400
<i>Restriction(s):</i> Registration in B.A.Sc. program majoring in Adult Development, Families and Well-Being.

FRHD*3400 Communication and Counselling Skills S,F,W (3-0) [0.50]
Examination and analysis of the theories and methods of communication as applied within the processes of family counseling and consultation.
<i>Prerequisite(s):</i> 10.00 credits including (FRHD*1020 or FRHD*1100)
<i>Restriction(s):</i> This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information. Instructor consent required.

FRHD*4020 Family Theory F (3-0) [0.50]
An analysis of theoretical approaches and concepts in the study of the family.
<i>Prerequisite(s):</i> 12.50 credits including FRHD*1020

FRHD*4061 Family and Community: Field Placement F (2-8) [1.00]
First part of the two-semester course FRHD*4061/2. Refer to FRHD*4061/2 for course description. (Last offering - Fall 2008)
<i>Prerequisite(s):</i> FRHD*3400

FRHD*4061/2 Family and Community: Field Placement F-W [2.00]
Seminar and supervised field placement in health and social service agencies. The practicum and seminar will further develop and expand students' helping roles in agencies and the integration and application of theoretical knowledge from previous course work with practice. Students wishing to enrol in this course must consult with the instructor during the course selection period. This is a two-semester course offered over consecutive semesters. When you select it you must select FRHD*4061 in the Fall semester and FRHD*4062 in the Winter semester. A grade will not be assigned to FRHD*4061 until FRHD*4062 is completed. (Last offering - Fall 2008, Winter 2009)
<i>Prerequisite(s):</i> FRHD*3400
<i>Restriction(s):</i> Registration in the Family and Social Relations or Gerontology majors. Instructor consent required.

FRHD*4062 Family and Community: Field Placement W (2-8) [1.00]
Second part of the two-semester course FRHD*4061/2. Refer to FRHD*4061/2 for course description. (Last offering - Winter 2009)
<i>Prerequisite(s):</i> FRHD*4061

FRHD*4070 Topics in Family Relations and Human Development U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in family studies. To be conducted by regular or visiting faculty with expertise in the area. Students should check with the Department of Family Relations and Applied Nutrition to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate.

FRHD*4080 Topics in Family Relations and Human Development U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in family studies. To be conducted by regular or visiting faculty with expertise in the area. Students should check with the Department of Family Relations and Applied Nutrition to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate.

FRHD*4090 Topics in Family Relations and Human Development U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in family studies. To be conducted by regular or visiting faculty with expertise in the area. Students should check with the Department of Family Relations and Applied Nutrition to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate.

FRHD*4100 Dynamics of Group and Family Functioning W (2-2) [0.50]
An exploration of group processes through participation and laboratory groups. Group theory and current techniques used in group and family counselling will also be reviewed in lectures.
<i>Prerequisite(s):</i> FRHD*3040 or FRHD*3400

FRHD*4160 Family Relations in Gerontology F (3-0) [0.50]
A critical examination of selected issues affecting the well-being of the elderly in Canada. Topics will include such issues as the nature and types of community support systems for the aged, and institutionalization and its alternatives.
<i>Prerequisite(s):</i> FRHD*3060

FRHD*4170 Practicum - Child, Youth and Family F,W (3-16) [1.00]
Seminar and experience with children in an appropriate field setting to be assigned by the department. Emphasis will be upon developing, implementing and evaluating program plans for children in educational and community settings. Students will acquire communication and interactive skills with children and adults. Students wishing to enrol in the course must consult with the course instructor during the course selection period.
<i>Prerequisite(s):</i> 1 of FRHD*3170, FRHD*3200, FRHD*3250
<i>Restriction(s):</i> Instructor consent required.

FRHD*4180 Assessment and Intervention F (2-2) [0.50]
Principles and theories of assessment and evaluation as related to the child, the family, and to child oriented intervention, education and social service programs.
<i>Prerequisite(s):</i> FRHD*2110, FRHD*3070, FRHD*3180
<i>Restriction(s):</i> Registration in semester 7 or above in the Child Studies or Child Studies Co-op, Child, Youth & Family or Child, Youth & Family Co-op majors.

FRHD*4190 Assessment in Gerontology F (2-2) [0.50]
This course provides an examination and critique of current methods of assessing older adults. Tools to be considered include those for assessing dementia, depression, and pain. Students will examine diagnostic criteria that form the underpinnings of most tests and then examine each test for its psychometric properties and appropriate use. An understanding of the ethical principles governing assessment will be gained.
<i>Prerequisite(s):</i> FRHD*2060
<i>Restriction(s):</i> Semester 7 and above.

FRHD*4200 Issues in Human Sexuality W (3-0) [0.50]
An advanced analysis of sexual development. Specific attention will be given to sexual problems, and the concepts, methods and issues associated with sex education and counselling.
<i>Prerequisite(s):</i> FRHD*1020, FRHD*2100 and 1.00 credit at the 3000 level in Family and Social Relations, Psychology or Sociology

FRHD*4210 Senior Seminar in Early Education and Care F (3-0) [0.50]
The study of the historical and philosophical basis of programs for young children evaluated from a developmental perspective. Emphasis will be on current approaches and programs and contemporary issues in early childhood programming.
<i>Prerequisite(s):</i> FRHD*3170 or FRHD*3200
<i>Equate(s):</i> CSTU*4210
<i>Restriction(s):</i> Registration in semester 7 or above in the Child Studies or Child Studies Co-op, Child, Youth & Family or Child, Youth & Family Co-op majors.

FRHD*4250 Aging and Health F (3-0) [0.50]

This course offers upper level undergraduates a forum to explore issues related to aging and health across the adult life span. More specifically, the conceptual groundwork necessary for understanding the roles of the life span developmental perspective, individual development, physiological changes in human aging, contextual influences and interactions, and several models/theories of aging and health will be examined. A primary objective of the course is the integration of models and theory to facilitate understanding of aging and health topics. Topics include but are not limited to: age changes and disease processes (both acute and chronic); mental health and illnesses; medication use; disease prevention and health promotion; influence of health on family relationships, caregiving, and placement decisions; systemic and societal influences on health; and ethical issues and controversies surrounding the end-of-life care and decision making, advanced directives, assisted suicide, and death and dying.

Prerequisite(s): 10.00 credits including FRHD*2060

FRHD*4260 Social Policy and Gerontology W (3-0) [0.50]

An examination of aging and adult development in relation to social policy with special reference to families.

Prerequisite(s): FRHD*2060

FRHD*4290 Practicum II: Adult Development and Families F (3-16) [1.00]

This course enables students to extend their knowledge and professional skills in a second supervised placement in a health or social service agency. The practicum and seminar provides students with additional opportunities to integrate theoretical knowledge with practice experiences. Students are expected to assume additional responsibilities related to program design and implementation and in their supervised work with individuals and/or groups. Students wishing to enrol in this course must consult with the instructor during the course selection period. (First offering - Fall 2011)

Prerequisite(s): FRHD*3290

Restriction(s): Registration in the B.A.Sc. program majoring in Adult Development, Family and Well Being. Instructor consent required.

FRHD*4310 Professional Issues F (3-0) [0.50]

This course examines ethical and professional issues in working with children, youth, adults of all ages, and their families. A variety of institutional settings are considered (e.g., school systems, treatment agencies, youth residential programs, senior care facilities). The complexities of professional practice with diverse populations are explored in depth. Legal aspects relevant to work in this area are also addressed.

Prerequisite(s): FRHD*3400

FRHD*4320 Social Policies for Children, Youth and Families W (3-0) [0.50]

This course focuses on current social policies, programs, and services that affect children's development and family well-being. Issues include policies that affect income security, parental effectiveness, social service provision, and community resources.

Prerequisite(s): FRHD*3040

FRHD*4400 Youth, Risk and Resilience W (3-0) [0.50]

This course examines biological, and social-contextual aspects of developmental issues evident in childhood and adolescence. The theoretical perspective of developmental psychopathology will be used to examine literatures relating to risk, resilience, developmental trajectories, classification, assessment, and intervention. Students will have a chance to critically examine many mental health issues commonly found in childhood and adolescence.

Prerequisite(s): 15 credits, FRHD*2110, FRHD*2280

Restriction(s): PSYC*3460

FRHD*4810 Thesis I U (3-0) [0.50]

Planning, developing and writing a research proposal under individual faculty supervision. Topic to be decided by the student in consultation with the supervisory faculty member before she/he may course select or register for the course.

Prerequisite(s): FRHD*3070. Instructor consent required.

Equate(s): CSTU*4810

FRHD*4910 Thesis II U (6-0) [1.00]

The student will conduct and write an undergraduate thesis under the direction of a faculty member.

Prerequisite(s): FRHD*4810

Equate(s): FRHD*4911/2

Food Science

Department of Food Science

FOOD*2010 Principles of Food Science S,W (3-0) [0.50]

Principles involved in the processing, handling and storage of foods. Relationship of science and technology to food processing. (Offered through Distance Education only.)

Restriction(s): AGR*3330 , FOOD*2150, FOOD*3070 , NUTR*2150

FOOD*2100 Communication in Food Science I W (3-0) [0.50]

Students will acquire basic skills in technical and business communication and be prepared to complete a variety of communication assignments in subsequent semesters. Students will learn and apply the principles of effective written and oral communication. Communication achievements made during the undergraduate program will be presented in a communication portfolio in a subsequent course, FOOD*4100.

Restriction(s): Enrolment in the Food Science or Food Science Co-op Majors of the B.Sc. Program.

FOOD*2150 Introduction to Nutritional and Food Science F (3-0) [0.50]

This interdisciplinary course provides an introduction to the Food and Nutritional Sciences from both historical and modern perspectives. Major themes are the nutritional and functional properties of food, nutrient assimilation, food preservation and safety, and the interactions between food processing, diets and health. The course is taught by the Department of Food Science. (Also listed as NUTR*2150.)

Prerequisite(s): BIOL*1040, (CHEM*1040 or CHEM*1300)

Equate(s): NUTR*2150

Restriction(s): AGR*3330 , FOOD*2010, FOOD*3070 . Not available to students registered in Applied Human Nutrition major.

FOOD*2400 Introduction to Food Chemistry S (3-0) [0.50]

An introduction to the chemistry and biochemistry of the major components of foods: lipids, proteins, carbohydrates and water/ice. In addition, an overview of some of the reactions and changes in food components which occur during processing, handling and storage will be presented. This course may not be taken for credit by students in the Food Science Major. (Offered through Distance Education only.)

Prerequisite(s): CHEM*1040

Restriction(s): FOOD*3010, FOOD*3100

FOOD*2410 Introduction to Food Processing W (3-0) [0.50]

An introduction to food processes and the relationships between chemistry, microbiology, and engineering as they apply to food processing are discussed. The following topics are included: high and low temperature processes; moisture control and intermediate moisture foods; concentration and dehydration processes; and novel food processing techniques. This course may not be taken for credit by students in the Food Science Major. (Offered through Distance Education only.)

Prerequisite(s): CHEM*1040, (BIOL*1040 or MICR*1020)

Restriction(s): FOOD*3160, FOOD*3170

FOOD*2420 Introduction to Food Microbiology F (3-0) [0.50]

An introduction to the major groups of microorganisms important in foods including sources of contamination during production, processing and storage of foods, microbial spoilage of food, food-borne illness, and food fermentations. Evaluation of food processing conditions used to control the presence and/or growth of microorganisms in foods. This course may not be taken for credit by students in the Food Science Major. (Offered through Distance Education only.)

Prerequisite(s): BIOL*1040 or MICR*1020

Restriction(s): FOOD*3230

FOOD*2620 Food Engineering Principles W (3-2) [0.50]

Introduction to engineering principles and operations in food processing including heat transfer, fluid flow, material and energy balances, instrumentation and process control concepts.

Prerequisite(s): (BIOC*2580 or CHEM*2880), (MATH*1080 or MATH*1200)

FOOD*3010 Food Chemistry F (3-2) [0.50]

A lecture course covering the fundamental principles of the chemistry of foods. The course will discuss selected topics related to the chemistry (physical, organic and analytical) and physics of food materials such as lipids, proteins, carbohydrates and water.

Prerequisite(s): BIOC*2580

FOOD*3020 Food Chemistry Laboratory W (0-6) [0.50]

An involved laboratory course on various aspects of food chemistry. Emphasis will be placed on the development of strong analytical skills. Laboratory exercises are based on topics covered in FOOD*3010.

Prerequisite(s): FOOD*3010

FOOD*3090 Food Science and Human Nutrition F (3-3) [0.50]

This course will introduce students in the B.Sc.(Agr.) program to the chemistry and microbiology of food and post-production food handling and processing. It will also introduce students to the role of food components in human nutrition and the interactions between diets and health. Food product development will integrate these two disciplines. Lectures will be taken simultaneously with students in FOOD*2150/NUTR*2150. Lectures will be supplemented with a series of laboratory assignments.

Prerequisite(s): AGR*1250, BIOL*1040, CHEM*1050

Restriction(s): AGR*3330 , FOOD*2010, FOOD*2150, FOOD*3070 , NUTR*2150. Registration in the B.Sc.(Agr.) program.

FOOD*3160 Food Processing I F (3-3) [0.75]

This course builds on basic engineering principles to understand the operation of modern food processing plant facilities. The standard equipment used and the underlying principles that control their operation are examined for various high temperature (blanching, pasteurization, sterilization, evaporation, drying, extrusion) and ambient temperature (size reduction, homogenization, emulsification, centrifugation, filtration, extraction, irradiation) unit operations.

Prerequisite(s): (FOOD*2620, MICR*2030) or ENGG*2660

FOOD*3170 Food Processing II W (3-3) [0.50]

This course looks at various low temperature food processing unit operations (e.g., refrigerated storage, freezers, freeze driers), the design and operation of ancillary food plant equipment (e.g., refrigeration, boiler, pumping, control, sanitation, water, and wastewater treatment systems) and integration of the various unit operations into a functioning food process.

Prerequisite(s): FOOD*3160

FOOD*3230 Food Microbiology F (3-3) [0.75]

Important groups of microorganisms associated with food spoilage, food fermentations, food infections and intoxications. Intrinsic and extrinsic factors and their relationship to microbial growth. Control of microorganisms by food processing.

Prerequisite(s): MICR*1020 or MICR*2030

FOOD*3260 Industrial Microbiology F (3-3) [0.50]

The course will present microbiological and technological principles of the industrial application of microorganisms followed by specific examples. These will include different liquid aerobic and anaerobic fermentations, such as the production of organic/amino acids, and ethanol, but excluding the dairy sector. A special focus will be given to winemaking, brewing and antibiotic production. The laboratory component of the course includes several field trips and the production of wine and antibiotics.

Prerequisite(s): MICR*1020 or MICR*2030

FOOD*3430 Introduction to Food Analysis F (3-0) [0.50]

An introduction to quantitative analysis of foods by chemical, physical and instrumental means. Determination of major and minor constituents of foods. (Offered through Distance Education only.)

Prerequisite(s): FOOD*2400

Restriction(s): FOOD*4120

FOOD*3700 Sensory Evaluation of Foods F (2-3) [0.50]

Principles of sensory evaluation of foods and a study of the techniques employed.

Prerequisite(s): (1 of FOOD*2150, HAFA*2700 , HTM*2700), (1 of STAT*2040, STAT*2060, STAT*2080)

FOOD*4010 Food Plant Sanitation and Quality Control W (3-0) [0.50]

Participants will learn and apply principles of hygiene, cleaning chemistry and mechanisms, and will develop and evaluate sanitation programs for specific food processes. Graduates of this course will be able to implement sampling and statistical quality control plans and quality audits. Food Safety programs including both GMP (good manufacturing practices) and HACCP (hazard analysis and critical control point) will be developed for specific cases. A case study approach will be used. Quality management aspects of quality assurance are not included in this course. (Offered through Distance Education only.)

Prerequisite(s): (FOOD*2010 or FOOD*2150), (FOOD*2410 or FOOD*3160), (FOOD*2420 or FOOD*3230)

FOOD*4070 Food Packaging F (3-0) [0.50]

Functions of packaging in food preservation systems will be examined using a review of current packaging materials, their properties, production methods and applications for specific products. Additional topics include regulatory, environmental and marketplace influences on food packaging choices. (Offered through Distance Education only.)

Prerequisite(s): 8.00 credits in science or engineering or (FOOD*2010, FOOD*2410, FOOD*2420)

FOOD*4090 Functional Foods and Nutraceuticals W (3-0) [0.50]

The course examines the relation of functional foods and nutraceuticals (FFN) to food and drugs. The safety and efficacy of individual FFN products, and the regulatory issues that influence the development and commercialization of FFN in global markets are emphasized. The course is co-operatively taught by the Department of Human Health and Nutritional Sciences and the Department of Food Science. (Also listed as NUTR*4090.)

Prerequisite(s): NUTR*3190 or NUTR*3210

Equate(s): NUTR*4090

FOOD*4100 Communication in Food Science II W (2-0) [0.25]

Each student will present a communication portfolio based on their proposal in FOOD*2100. Additional communication assignments and work shops will build skills in discussion leading, meeting, management, crisis management and both peer and self evaluation.

Prerequisite(s): FOOD*2100, 2.50 credits at the 3000 level in Food Science

FOOD*4110 Meat and Poultry Processing W (2-3) [0.50]

The course focuses on the principles and techniques employed by the meat industry (the largest food processing segment in Canada). Topics include a study of muscle structure and its relation to meat quality, the physical properties of meat proteins, lipids and flavour compounds important in meat processing. Practical applications of processing techniques (including producing different products in lab) packaging and merchandizing are emphasized in the laboratory. Eggs and egg processing are also covered. Emphasis is put on learning how various food science principles (e.g. preservation, HACCP, emulsification) are used to optimize meat products' quality and safety. (Offered in odd-numbered years.)

Prerequisite(s): 1 of ANSC*2340, FOOD*3070, FOOD*3160

FOOD*4120 Food Analysis F (3-4) [0.75]

Quantitative analysis of foods by chemical and physical methods. Determination of major and minor constituents of foods.

Prerequisite(s): 1 of CHEM*2400, CHEM*2480, FOOD*3100, FOOD*3010, which may be taken as co-requisite

FOOD*4140 Communication in Food Science III S,F,W (0-2) [0.25]

This course gives the student the opportunity to integrate both communication skills and technical knowledge in Food Science acquired in earlier courses through participation in an independent experiential learning project. The topic of the project may be in any area of Food Science, but an emphasis on communication to a non-scientific audience is required. The project may be conducted in teams of up to four students. Students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and course co-ordinator in a prior course selection period.

Prerequisite(s): FOOD*2100, 2.50 credits at the 3000 level in Food Science

Restriction(s): Instructor consent required.

FOOD*4220 Topics in Food Science S,F,W (0-2) [0.25]

Independent study of a selected topic in Food Science, involving a review and critical evaluation of the current literature. The course comprises independent library research and students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and the course co-ordinator in a prior course selection period.

Prerequisite(s): 2.50 credits at the 3000 level in Food Science

Restriction(s): Instructor consent required.

FOOD*4230 Research in Food Science I S,F,W (0-2) [0.25]

Independent laboratory research of a selected topic in Food Science, under the supervision of an individual faculty. The laboratory research is based on the literature review conducted in FOOD*4220. In addition, a review and critical appraisal of experimental principles will guide the design of laboratory experiments. Students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and the course co-ordinator in a prior course selection period.

Prerequisite(s): FOOD*4220

FOOD*4240 Research in Food Science II S,F,W (0-2) [0.25]

Independent laboratory research of a selected topic in Food Science, under the supervision of an individual faculty. The laboratory research conducted in FOOD*4230 will be continued and expanded. Students are expected to demonstrate increasing independence in designing, conduction and evaluating experiments. Students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and the course co-ordinator in a prior course selection period.

Prerequisite(s): FOOD*4230

FOOD*4400 Dairy Processing W (3-3) [0.50]

Production, processing, chemistry, microbiology and marketing of fluid milk, frozen dairy products, cheese, fermented dairy foods and butter. Public health aspects of pasteurization, composition and formulation and discussion of the various unit operations involved in processing dairy products.

Prerequisite(s): BIOC*2580, FOOD*2150, MICR*2030

FOOD*4520 Cereal Technology W (3-3) [0.50]

The technology and chemistry of the principal cereals; kernel structure and its chemistry with respect to the technological characteristics and nutritive value. Processing of wheat, corn, sorghum, rice, oats and barley; utilization of products and by-products. Bread-making process, dough rheology and technology; breakfast cereals and protein-enriched cereal products. (Offered in even-numbered years.)

Prerequisite(s): BIOC*2580

FOOD*4700 Food Product Development W (3-3) [0.50]

Research, management processes and technological developments relevant to effective food product development are examined. Students work in teams to plan and execute a major food development project and communicate its results.

Prerequisite(s): FOOD*3010 or FOOD*3100

French Studies

School of Languages and Literatures

The School reserves the right to determine the appropriate level to be taken by students enrolling in language courses. With the exception of FREN*1000, literary texts are, at all levels, studied in French. Students registering in these courses will be expected to have the appropriate language proficiency.

Francophone students and Graduates of Highschool French Immersion will not normally be admitted into FREN*1200 and FREN*2030. It is recommended they start their program with FREN*2020, FREN*2060, FREN*2500, or FREN*2520 with the approval of the Faculty Advisor.

FREN*1000 Understanding the French Speaking World F (3-0) [0.50]

A course taught in English which introduces students to French culture as it manifests itself in France, Quebec, the rest of North America, Africa, and the West Indies. Historical, linguistic and socio-political issues will be examined within the broader context of culture.

FREN*1090 Basic French: Reading S,F (3-0) [0.50]

This is a basic course in French grammar and reading for students who have up to Ontario Grade 9 French (or equivalent) but not above. FREN*1090 cannot be counted toward a specialization in French. (Offered through Distance Education only.)

Restriction(s): Students with native or near-native ability in French, including Francophones and French immersion students will not be admitted to this course. Instructor consent required to verify student's level.

FREN*1100 Basic French: Listening F,W (3-0) [0.50]

This basic course in French grammar will emphasize listening skills for students who have up to grade 10 French (or equivalent) but not above. FREN*1100 cannot be counted toward a specialization in French. (Offered through Distance Education only.)

Restriction(s): Students with native or near-native ability in French, including Francophones and French immersion students will not be admitted to this course. Instructor consent required to verify student's level.

FREN*1120 Basic French: Writing S,W (3-0) [0.50]

This basic course in French grammar will emphasize writing skills for students who have up to Grade 11 French (or equivalent) but not above. FREN*1120 cannot be counted toward a specialization in French. (Offered through Distance Education only.)

Restriction(s): Students with native or near-native ability in French, including Francophones and French immersion students will not be admitted to this course. Instructor consent required to verify student's level.

FREN*1150 Elementary French F (3-0) [0.50]

This is a review course in French grammar, oral and written skills for students who have Ontario Grade 11 French or equivalent but not above. FREN*1150 cannot be counted toward a specialization in French.

Equate(s): FREN*1110

Restriction(s): Students with native or near-native ability in French, including Francophones and French immersion students will not be admitted to this course. Instructor consent required to verify student's level.

FREN*1200 French Language I F,W (3-1) [0.50]

A first year, university-level course for students graduating with a high-school background in core French. Students will practise written and oral French.

Prerequisite(s): 1 of FREN*1150, Grade 12U French or permission of the School

Restriction(s): Students with native or near-native ability in French, including Francophones and French immersion students will not be admitted to this course. Instructor consent required to verify student's level.

FREN*2020 France: Literature and Society F,W (3-1) [0.50]

An historical introduction to French life and thought as seen through literature and art. Lectures and small seminars are integrated into a multi-media presentation including videotapes, slides and audio tapes.

Prerequisite(s): FREN*1200 or FREN*2030

FREN*2030 French Language II F,W (3-1) [0.50]

This is a continuation of French Language I with further practice in written and oral French, grammar, vocabulary acquisition, translation, laboratory exercises and discussion groups.

Prerequisite(s): FREN*1200 or equivalent

Restriction(s): Students with native or near-native ability in French, including Francophones and French immersion students will not be admitted to this course. Instructor consent required to verify student's level.

FREN*2060 Quebec: Literature and Society F,W (3-1) [0.50]

An historical introduction to Quebec life and thought from New France to the present as seen through literature and art. Lectures and small seminars are integrated into a multi-media presentation including videotapes, slides and audio tapes.

Prerequisite(s): FREN*1200 or FREN*2030

FREN*2500 French Translation I S,W (3-0) [0.50]

An introduction to the art and techniques of French-English translation. (Also offered through distance education format.)

Prerequisite(s): FREN*2030

FREN*2520 French Composition I F (3-0) [0.50]

Essay writing and textual analysis.

Prerequisite(s): FREN*2030

FREN*2540 Spoken French: Theory and Practice W (3-0) [0.50]

This course focuses on the differences between written and spoken French and is designed to help students function efficiently in an oral French context (comprehension and expression).

Prerequisite(s): FREN*2030

Restriction(s): Students with native or near-native ability in French, including Francophones and French immersion students will not be admitted to this course. Instructor consent required to verify student's level.

FREN*3000 Romanticism and Realism in France F (3-0) [0.50]

A seminar on the 19th-century novel emphasizing themes and ideas which have contributed to contemporary literature and thought.

Prerequisite(s): FREN*2020, FREN*2030

FREN*3010 Twentieth-Century French Novel W (3-0) [0.50]

A changing world as perceived by 20th-century writers in France. From Gide to post-modernism, the impact of renewed scientific perspectives on literature, and the questioning of modes of representation, signs and society. (Offered in even-numbered years.)

Prerequisite(s): FREN*2020, FREN*2030

FREN*3020 Twentieth-Century French Theatre F (3-0) [0.50]

Twentieth-century drama: Sartre, Beckett, Ionesco and more recent dramatists. (Offered in odd-numbered years.)

Prerequisite(s): FREN*2020, FREN*2030

FREN*3070 Enlightenment and Crisis F (3-0) [0.50]

Prose literature in the 18th century; the questioning of traditional values. The road to revolution.

Prerequisite(s): FREN*2020, FREN*2030

FREN*3150 Children's Literature in French F (3-0) [0.50]

A study of children's literature in the francophone world from the 17th century to the present.

Prerequisite(s): FREN*2020, FREN*2030

FREN*3200 Quebec Novel F (3-0) [0.50]

A survey of representative Quebec novels from World War II to the Quiet Revolution. A seminar and lecture course.

Prerequisite(s): FREN*2030, FREN*2060

FREN*3210 Quebec Theatre W (3-0) [0.50]

A survey of recent trends in Quebec drama and readings from representative works by Quebecois playwrights. A seminar and lecture course. (Offered in odd-numbered years.)

Prerequisite(s): FREN*2030, FREN*2060

FREN*3220 Recent Quebec Writing W (3-0) [0.50]

An analysis of representative contemporary Quebec novels, short stories and poems from aesthetic, thematic and ideological points of view. (Offered in even-numbered years.)

Prerequisite(s): FREN*2030, FREN*2060

FREN*3230 The Structure of French F (3-0) [0.50]

Elements of the sound system, grammar and vocabulary of contemporary French.

Prerequisite(s): FREN*2030

FREN*3240 French Classicism W (3-0) [0.50]

Human destiny in 17th-century drama.

Prerequisite(s): FREN*2020, FREN*2030

FREN*3290 Post-colonial Francophone Fiction W (3-0) [0.50]
An introduction to 20th century Francophone writers from Maghreb, Black Africa and the Caribbean, through the study of selected works. (Offered in even-numbered years.) <i>Prerequisite(s):</i> FREN*2020, FREN*2030
FREN*3500 French Translation II F (3-0) [0.50]
Contrastive grammar (French and English). Analysis of various styles and their application to written translation. Small discussion groups. <i>Prerequisite(s):</i> FREN*2030, FREN*2500
FREN*3520 French Composition II W (3-0) [0.50]
A continuation of FREN*2520 with special emphasis on stylistics. <i>Prerequisite(s):</i> FREN*2030, FREN*2520
FREN*3530 Business French F (3-0) [0.50]
This course is a detailed study of the French language as it is currently used in administration and business, both in France and Quebec. It will cover areas such as advertising, administrative reports, employment, communication and levels of language. <i>Prerequisite(s):</i> FREN*2030
FREN*3560 Contemporary French Women's Writings W (3-0) [0.50]
A study of the main trends in women's writings and feminist criticism in contemporary France. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> FREN*2020, FREN*2030
FREN*3610 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*3620 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*3630 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*3640 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*3650 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*3660 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*3670 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.

FREN*3680 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*3690 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only. <i>Prerequisite(s):</i> 1 of FREN*2020, FREN*2030, FREN*2060 <i>Restriction(s):</i> Admission to Nice Program.
FREN*4050 Early Modern French Culture W (3-0) [0.50]
A study of the literature and culture of Medieval and Renaissance France (1200-1600), from the chivalric and religious writings to humanist thought and early French feminism. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> FREN*2020, FREN*2030, FREN*3520
FREN*4300 Symbolist and Surrealist Poetry W (3-0) [0.50]
The French Symbolists of the 19th century. The 20th century Surrealist poets' vision of the world. (Offered in even-numbered years.) <i>Prerequisite(s):</i> FREN*2020, FREN*2030, FREN*3520
FREN*4500 The French Language in Canada W (3-0) [0.50]
A descriptive, historical and socio-linguistic study of the varieties of French spoken in Canada, with particular emphasis on Quebec. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> FREN*2030, FREN*3230
FREN*4520 French Translation III F (3-0) [0.50]
A contrastive analysis of French and English stylistic resources, with application to English-French translation. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> FREN*2030, FREN*2500, FREN*3500
FREN*4600 Honours Seminar in French and Quebecois Studies F (3-0) [0.50]
Seminar on literary genres, movements and themes, or on the French language. (Offered in even-numbered years.) <i>Prerequisite(s):</i> FREN*2020, FREN*2030, FREN*2060, FREN*3520
FREN*4610 Honours Seminar in French and Quebecois Studies F (3-0) [0.50]
Seminar on literary genres, movements and themes. (Offered in even-numbered years.) <i>Prerequisite(s):</i> FREN*2020, FREN*2030, FREN*2060, FREN*3520
FREN*4740 Research Paper in French Studies I S,F,W (3-0) [0.50]
A research paper in French on an approved topic in French literature or language will be required. Individual attention will be given on methods of research and techniques of writing. This course is intended to serve as an introduction to future research at the M.A. and Ph.D. levels. <i>Prerequisite(s):</i> FREN*2020, FREN*2030, FREN*2060, FREN*3520. 70% average in all French Studies course attempts is required, although at least 75% is recommended. <i>Restriction(s):</i> Instructor consent required.
FREN*4750 Creative Writing in French S,F,W (3-0) [0.50]
The development and revision of a major work of creative writing in French (fiction, poetry, or drama), under the supervision of a faculty member will be required. <i>Prerequisite(s):</i> (FREN*2020 or FREN*2060), FREN*2030, FREN*3520, FREN*4740. 70% average in all French Studies course attempts is required, although at least 75% is recommended. <i>Restriction(s):</i> Instructor consent required.
FREN*4770 Research Paper in French Studies II S,F,W (3-0) [0.50]
A research paper in French on an approved topic in French literature or language will be required. Individual attention will be given on methods of research and techniques of writing. This course is intended to serve as an introduction to future research at the M.A. and Ph.D. levels. <i>Prerequisite(s):</i> FREN*2020, FREN*2030, FREN*2060, FREN*3520, FREN*4740. 70% average in all French Studies course attempts is required, although at least 75% is recommended. <i>Restriction(s):</i> Instructor consent required.

FREN*4900 Applied Linguistics: French Studies W (3-0) [0.50]

This course is specially designed for future teachers of French, in which the principles of linguistics are applied to the teaching of French. (Offered in even-numbered years.)

Prerequisite(s): FREN*2030, (1 of FREN*3230, LING*1000 or permission of the department)

Geography

Department of Geography

Students majoring in other departments may take a number of Geography courses without the prerequisites listed below if they obtain the permission of the instructor.

Note: Several courses in Geography are listed as acceptable for the Natural and Mathematical Science B.A. Distribution Requirements or as Non-Science Electives for B.Sc. students.

For courses without a semester designation, or with an alternate year designation, please check with the department.

GEOG*1200 Society and Space F,W (3-0) [0.50]

This course introduces key concepts in contemporary Human Geography. The course applies a spatial perspective in exploring a wide ranging series of processes and issues in society. Topics include population growth and migration, models and challenges of urban and rural development, interpretation of cultural landscapes and selected issues relating to social welfare. (Also offered through distance education format.)

GEOG*1220 Human Impact on the Environment F,W (3-0) [0.50]

A global overview of the changing relationships among society, technology and the environment. This course emphasizes the major stages of human use of resources and the environmental consequences of global changes in production systems. It contrasts Third and First World experiences, focusing on core-periphery relationships. (Also offered through distance education format.)

GEOG*1300 Introduction to the Biophysical Environment F,W (3-2) [0.50]

An introduction to Physical Geography. The principles and processes governing climate-landform-soil-vegetation systems and interrelationships. Natural and human-induced changes to environmental systems. Laboratories will address techniques of measurement, representation and analysis of environmental systems through maps, air photographs, remote sensing and field observations. (Also offered through distance education format.)

Restriction(s): GEOG*1350

GEOG*1350 Earth: Hazards and Global Change F,W (3-0) [0.50]

An introduction to the principles and processes governing climate-landform-soil-vegetation systems. Emphasis is placed on the interrelationships between human and environmental systems through the examination of natural hazards and global climate change.

Restriction(s): GEOG*1300

GEOG*2000 Geomorphology F (3-2) [0.50]

This is an introduction to geomorphology emphasizing weathering, slope and fluvial processes within drainage basins, and glacial and periglacial processes. Field and laboratory techniques will be applied.

Prerequisite(s): 1 of GEOG*1300, GEOG*1350, GEOL*1050, GEOL*1100

GEOG*2030 Political Ecology & Geography F (3-0) [0.50]

This course examines the changing world political map and relations between society and ecology from the perspective of intra- and inter-state structures and processes. Territorial restructuring, international law, environmental movements, localization and globalization are considered. Particular attention is paid to ecological and development processes and strategies in various parts of the world.

Prerequisite(s): 5.00 credits, GEOG*1220 is recommended

GEOG*2110 Climate and the Biophysical Environment W (3-1) [0.50]

The interrelationships between the atmosphere, lithosphere, hydrosphere, and biosphere to produce distinct physical landscapes (climates, soils, vegetation). Emphasis on the role of climate and the flows of energy, water, and biogeochemicals.

Prerequisite(s): GEOG*1300 or GEOG*1350

GEOG*2210 Environment and Resources W (3-0) [0.50]

This course examines the interrelationships between people and biophysical processes. The main themes are: 1) characteristics of natural resources and processes through which they are developed and used and 2) human response to environmental conditions, including natural hazards and global change. Contemporary Canadian case studies will be presented at the regional and national scales. (Also offered through distance education format.)

Prerequisite(s): GEOG*1220 is recommended

GEOG*2230 Economic Geography F (3-0) [0.50]

An introduction to the spatial distribution of economic activity. The course examines patterns, processes and problems in extractive activities, manufacturing, marketing and the service sector, including the transportation of commodities and people. The principles of economic location are applied to regional economic analysis and development.

Prerequisite(s): GEOG*1200

GEOG*2260 Applied Human Geography W (3-2) [0.50]

This course introduces students to the geographical research process, guiding them through key methodological issues and techniques in human geography. The lab component of the course focuses on data collection using secondary documents, surveys, interviews, and participant observation, as well as both quantitative and qualitative analysis techniques. Lab assignments and class illustrations draw on a range of topics in human geography.

Prerequisite(s): GEOG*1200 or (ANTH*1150 and GEOG*1220)

GEOG*2420 Aerial-photo Interpretation F (2-3) [0.50]

An introduction to the principles and techniques of air photo interpretation and elementary photogrammetry. Topics include stereoscopic viewing, parallax, flightline planning, and mapping from air photos. Lab exercises focus on specific applications in natural habitats and in rural and urban settings.

Prerequisite(s): 0.50 credits in geography and/or earth science

GEOG*2460 Analysis in Geography F (3-2) [0.50]

The application of modern techniques to geographic study. The interpretation of geographic phenomena by objective methods. Major honours students in Geography must complete this course by the end of semester 4.

Prerequisite(s): 0.50 credits at the 1000 level in Geography

GEOG*2480 Mapping and GIS W (3-2) [0.50]

An introduction to the theory and techniques of manipulating and displaying spatial data in a GIS (Geographic Information System). Mapping concepts such as scale, co-ordinate systems, map projections, symbolization and vector data encoding are introduced. Major honours students in Geography must complete this course by the end of semester 4.

Prerequisite(s): 5.00 credits

GEOG*2510 Canada: A Regional Synthesis W (3-0) [0.50]

This course is designed to provide a better understanding of the nature and basis of Canadian regionalism. The first section of the course stresses the biophysical base and the inequality of the natural resource endowment. The historical geographic approach and the systematic overviews of contemporary Canada stress respectively the development and nature of the Canadian space-economy. The final section on regions, regionalism and nationalism provides an overview of the heartland-hinterland dichotomy and centrifugal and centripetal forces operative in the nation.

GEOG*3000 Fluvial Processes F (3-2) [0.50]

This course examines processes and landforms associated with rivers. Particular emphasis is placed on the interaction between water and sediment movement and channel morphology. Case studies of human impact on river systems are presented.

Prerequisite(s): GEOG*2000, (GEOG*2460 or STAT*2040)

GEOG*3020 Global Environmental Change F (3-1) [0.50]

Major global environmental issues examined include climate change, deforestation, desertification and global fisheries. This course is interdisciplinary, exploring the interactions of bio-physical processes with human socio-economic dynamics, including policy initiatives. Particular attention is given to global climate change, its causes, its nature and extent, its implications for ecosystems and societies, and its governance implications. (Also offered through distance education format.)

Prerequisite(s): 7.50 credits, (GEOG*2210 recommended)

GEOG*3050 Development and the City W (3-0) [0.50]

This course examines different theoretical and policy perspectives of urbanization and urban development, as well as social, economic and environmental living conditions in cities of the global "south". It refers to concrete examples of cities in their national and international context, paying due attention to diversity and the fluidity of urban-rural boundaries. Specific urban development issues, including migration, housing, employment, health and environment are also addressed.

Prerequisite(s): 7.50 credits, (GEOG*2030 and GEOG*2260 recommended)

GEOG*3090 Gender and Environment F (3-0) [0.50]

This course introduces feminist scholarship and perspectives to explore men and women's experiences with both the natural and built environment. The course draws on case studies from developing and developed countries to demonstrate the importance of gender difference in understanding human interactions with the environment. Students will observe gendered use, access, knowledge, responsibility and control in rural and urban landscapes.

Prerequisite(s): 7.50 credits, (GEOG*2210 and GEOG*2260 recommended)

GEOG*3110 Biotic and Natural Resources F (2-2) [0.50]

This course focuses on the ecological basis for resource management, evaluates a number of current ecological theories and addresses their implications for resource management.

Prerequisite(s): (GEOG*2460 or STAT*2040), (1 of BIOL*2060, BOT*2050, ENVB*2030, GEOG*2110)

GEOG*3210 Management of the Biophysical Environment F (3-0) [0.50]
An examination of resource management, focusing on public and private decision-making processes. Consideration of techniques for evaluating resources, including EIA and risk analysis. Emphasis is on the economic, social and environmental implications of resource development and use. Contemporary Canadian case studies will be presented at appropriate scales. (Also offered through distance education format.) <i>Prerequisite(s):</i> 7.50 credits including (ENVS*2010 or GEOG*2210)
GEOG*3320 Agriculture and Society F (3-0) [0.50]
This course adopts a geographical perspective in exploring the structure and functioning of agriculture and food systems in contemporary society. Particular attention is paid to the interaction of farms with the social, economic, institutional and environmental forces that combine to shape local types and regional patterns of agricultural activity. The concept of sustainability is used as an integrating theme for the consideration of selected issues. <i>Prerequisite(s):</i> 7.50 credits
GEOG*3420 Remote Sensing of the Environment W (2-3) [0.50]
This course explores the nature and acquisition of remotely sensed imagery, and provides students with the technical expertise required to process and interpret this type of digital data. The application of digital image processing techniques to analyzing geographic problems is stressed, and its integration in a Geographic Information Systems (GIS) environmental is demonstrated. <i>Prerequisite(s):</i> 10.00 credits including GEOG*1300
GEOG*3480 GIS and Spatial Analysis F,W (3-3) [0.50]
This course focuses on the use of raster and vector-based geographic information systems to analyze spatial data. Topics include map digitizing, data query and overlay, spatial interpolation, multi-criteria evaluation, least cost pathway determination and digital elevation models. This course requires some familiarity with numerical methods and computer operations. <i>Prerequisite(s):</i> 10.00 credits, including GEOG*2480
GEOG*3490 Tourism and Environment W (3-0) [0.50]
An integrative perspective on tourism, addressing diverse interactions between people and tourist resources. Emphasis is on experiences derived from the use of resources, the environmental, economic and cultural impacts of tourism, and approaches to managing these impacts. (Also offered through distance education format.) <i>Prerequisite(s):</i> 7.50 credits
GEOG*3600 Geography of a Selected Region U (3-0) [0.50]
The study of an area which will include topics in physical, economic, social and historical aspects of geography. <i>Prerequisite(s):</i> 7.50 credits
GEOG*3610 Environmental Hydrology W (3-1) [0.50]
An introductory course in hydrology, the study of water in the environment. Emphasis is placed on understanding and modeling the hydrologic cycle. Topics include hydrologic processes, water resources, and case studies of freshwater systems. <i>Prerequisite(s):</i> 7.50 credits, (GEOG*2460 or STAT*2040), (1 of GEOG*2000, GEOG*2110, or another 2000 level earth science or engineering science course is recommended)
GEOG*3620 Desert Environments F (2-2) [0.50]
This course investigates the interrelationships among various biophysical processes that control weathering rates, sediment transport and landform/landscape development in arid environments. Topics will include: the concept of desertification, use and misuse of surface and ground water, salinization and the effect of human disturbance on landscape development. (Offered in even numbered years.) <i>Prerequisite(s):</i> 7.50 credits, (GEOG*2460 or STAT*2040), (1 of GEOG*2000, GEOG*2110, or another 2000 level earth science or engineering science course is recommended)
GEOG*4110 Environmental Systems Analysis F (3-1) [0.50]
An integrated systems approach to solving issues of environmental evaluation, impact and development. Focus will be on the biophysical components of the environment. <i>Prerequisite(s):</i> GEOG*3110 or GEOG*3610
GEOG*4150 Sedimentary Processes W (3-2) [0.50]
This course examines the basic properties and flow characteristics of fluids that control the entrainment and transport of sediment by air and water. Bedform development in fluvial, coastal and aeolian environments are also discussed in relation to fluid flow mechanics. Lectures are complemented by weekly labs using the wind tunnel, flume and wave tank. <i>Prerequisite(s):</i> GEOG*3000

GEOG*4200 Seminar in Urban Geography W (3-0) [0.50]
Many of the traditional features of cities are changing in light of powerful forces of globalization. The course examines spatial patterns and processes of economic restructuring, social dynamics and political change in Canadian and non-Canadian cities. Students discuss and interpret evolving urban forms from a geographical perspective. <i>Prerequisite(s):</i> GEOG*2260, (GEOG*3050 recommended) <i>Restriction(s):</i> GEOG*3400
GEOG*4210 Environmental Governance F (3-1) [0.50]
This course provides an opportunity for advanced studies in resource and environmental governance. A central aim is developing an understanding of principles, practices and emerging issues relating to environmental governance. <i>Prerequisite(s):</i> GEOG*3210
GEOG*4220 Local Environmental Management W (3-0) [0.50]
This course explores local environmental management from two perspectives: state-driven (where local government agencies or forums created by governments are used) and non-state driven (where local actors come together in new governance arrangements to undertake environmental management). Through comparing and contrasting these broad perspectives in an experiential learning setting, the course builds understanding of a key trend in environmental governance. <i>Prerequisite(s):</i> GEOG*3210
GEOG*4250 Coastal Processes F (3-1) [0.50]
This course examines the geomorphic processes and associated landforms found in the coastal zone. Initially the focus is on developing an understanding of the major controls on coastal erosion and sediment transport, including waves, nearshore currents and water level fluctuations. This is followed by the study of features and processes in selected coastal environments such as beaches, barrier islands and spits, coastal sand dunes and bluff coasts. In each case applications to problems of coastal management are introduced. <i>Prerequisite(s):</i> 1 of GEOG*3000, GEOG*3610, GEOG*3620
GEOG*4390 Seminar in Rural Geography F (3-0) [0.50]
This course surveys themes and issues in contemporary rural geography. Specific attention is given to the processes of restructuring and change in rural systems in Canada and other developed economies. Themes include transformations in the use of rural land, the new rural economy, restructuring in service delivery, and the sustainability of rural communities and systems. <i>Prerequisite(s):</i> GEOG*2260, GEOG*3320
GEOG*4480 Applied Geographic Information Systems W (3-2) [0.50]
This course adopts a project-oriented approach to the application of Geographic Information Systems (GIS) in spatial analysis. Students will have the opportunity to design and implement a research project using GIS techniques to investigate a problem in any area of Geography. <i>Prerequisite(s):</i> GEOG*3480
GEOG*4690 Geography Field Research F (3-6) [1.00]
This course provides an opportunity for senior students to develop skills in the design, implementation and presentation of a field research project. The course involves a field trip of about 10-14 days, either in Canada or abroad. This component of the course takes place between the end of the summer session and the start of classes in the fall semester. Classes during the fall semester focus on the analysis and interpretation of data and incorporate student research seminars. Information on the location and cost of the field research course is available from the department in the winter semester prior to each fall offering. <i>Prerequisite(s):</i> 12.50 credits <i>Restriction(s):</i> Restricted to majors in Geography B.A. and B.Sc.(Env.) and in Earth Surface Science (B.Sc.) with an overall average of at least 70% at the time of registration.
GEOG*4880 Contemporary Geographic Thought W (3-0) [0.50]
A critical overview of the evolution and current status of Geography. Particular emphasis will be given to the variety of approaches and convergence and divergence within the discipline. The interaction between human and physical geographers and their approaches to issues and the subject will be analyzed. <i>Restriction(s):</i> Restricted to major honours students in Geography at semester 6 or above.

GEOG*4990 Independent Study in Geography U (3-0) [0.50]

The independent study option is designed to provide senior undergraduate students with an opportunity to pursue library or field research under faculty supervision and to prepare a research report. Formal agreement between the student and the faculty supervisor is required, as is approval of the department chair.

Restriction(s): Restricted to majors in Geography B.A. and B.Sc.(Env.) and in Earth Surface Science (B.Sc.) with an overall average of at least 70% at the time of registration.

Geology

Department of Land Resource Science

GEOL*1050 Geology and the Environment F (2-3) [0.50]

Geological materials, their origin, recognition and economic potential, use and location; oil and gas, coal, mineral deposits, aggregate resources, groundwater, Geological basis for environmental evaluation and land use. Emphasis on local and North American examples.

GEOL*1100 Principles of Geology F,W (3-0) [0.50]

Introduction to geological principles, their historical development and application to interpreting Earth materials and processes. Suitable for those wishing a general knowledge of earth sciences. (Also offered through distance education format.)

Restriction(s): GEOL*1040 , UNIV*1030 . May not be taken for credit by students in B.Sc.(Env.) Earth and Atmospheric Science Major, or B.Sc. Degree program.

GEOL*2020 Stratigraphy F (3-0) [0.50]

Principles of recognizing and interpreting earth surface environments using examples from geology, geomorphology and archeology. Brief summary of sediment identification, recognition of processes and environments. Section description and interpretation followed by principles of physical correlation and facies interpretation. Concepts of physical, biological and radiometric dating. Controls on stratigraphic sequence development - isostasy, eustasy and tectonics. Sedimentary basin development, interpretation and history including changes in atmosphere, hydrosphere and biosphere. (Offered in even-numbered years.)

Prerequisite(s): 1 of GEOL*1050, GEOL*1100, GEOG*1300, GEOG*1350 or equivalent

GEOL*2110 Earth Material Science F (3-3) [0.50]

Minerals are the building blocks of rocks, and rocks are the basis of the earth's crust. The nature , classification and recognition of the common rocks and minerals and their chemical and physical transformations is dealt with. Emphasis is on the role that minerals and rocks play in determining the abiotic character of earth-surface environments.

Prerequisite(s): GEOL*1050 or SOIL*2200

GEOL*2160 Glacial Geology W (3-0) [0.50]

Identical to GEOL*2200 but without laboratory. Lectures taken with GEOL*2200.

Prerequisite(s): 1 of GEOG*1300, GEOL*1050, GEOL*1100, SOIL*2010

Restriction(s): GEOL*2150 , GEOL*2200

GEOL*2200 Glacial Geology W (3-3) [0.50]

This course is designed to give students an introduction to the processes, landforms and deposits of glacial environments. This includes basic principles of glaciology, the landforms and deposits found in various glacial and periglacial environments, and the nature of past glaciations in Earth history. Ancient to recent glacial deposits from the Great Lakes region and other international locations will be examined. A field trip will be scheduled.

Prerequisite(s): 1 of GEOG*1300, GEOL*1050, GEOL*1100, SOIL*2010, AGR*2301 , SOIL*2200

Restriction(s): GEOL*2160, GEOL*2150

GEOL*2250 Geology of Natural Disasters S (3-0) [0.50]

This course will offer insight into the mechanisms of natural geological disasters and their effects on Planet Earth, human civilization and life in general. Events before, during and after geological disasters such as earthquakes, volcanic eruptions, meteorite impact and climate change will be the focus of this course. This course will not count as a science credit for B.Sc. students. (Offered through distance education format only.)

Prerequisite(s): 1 of GEOG*1300, GEOG*1350, GEOL*1050, GEOL*1100

GEOL*3060 Groundwater W (3-0) [0.50]

This course provides a general understanding of the physical and chemical processes that operate in the groundwater zone under natural and human-induced conditions. The interrelations between the groundwater regime and the other components of the hydrological cycle are studied. Considerable emphasis is placed on the applied aspects of topics such as exploration, testing and development of aquifers for water supply, the chemical quality of groundwater, and the hydrogeological aspects of waste disposal.

Prerequisite(s): 1 of IPS*1110 , MATH*1000, MATH*1080, MATH*1200

GEOL*3090 Applied Structural Geology W (3-0) [0.50]

Systematic study of structural elements of the earth crust. Introduces concepts on the distribution, origin and structural development of the major landforms in North America and other continents (plate tectonics). The course provides examples of structural geology applied to engineering, environmental geology, and ore geology. Hands-on experience on deformation analysis, slope stability and interpretation of structures during the field trip and in classroom simulations.(Offered in odd-numbered years.)

Prerequisite(s): GEOL*1050, suitable geomorphology credit

GEOL*3100 Non-Renewable Earth Resources W (3-0) [0.50]

An analysis of processes leading to formation and accumulation of principal non-renewable metallic and non-metallic mineral and fuel resources. Methods of extraction and processing, economic assessment, environment problems associated with resource development. Field trips may be scheduled. (Offered in even-numbered years.)

Prerequisite(s): GEOL*1050, 0.50 credits at the 2000 level in geology or geomorphology

GEOL*3120 Paleontology W (3-0) [0.50]

Basic principles of analysis of fossil communities (mostly marine). Students should already know the basic biology of common marine invertebrates. Sediment analysis and process interpretation to determine paleoenvironments. Analysis of fossil preservation, autecology and population structures of species; community paleoecology of selected fossil assemblages. Simple paleobiogeography and basics of community evolution through time. Stages in the evolution of marine and continental ecosystems possible causes including physical (sea-levels, meteorite impacts) and biological (predation, evolution) components. This is not a 'history of life' course. (Offered in even-numbered years.)

Prerequisite(s): ZOO*2070

GEOL*3130 Agrogeology W (3-0) [0.50]

Inter-disciplinary course: geology; soil, crop and horticultural sciences; international development. The geological basis of farming, application of agrominerals, such as phosphates, limestones, gypsums, as well as fertilizers in agriculture and horticulture. Evaluating the environmental effects of mining/processing of agrominerals and the use of fertilizers. Case studies and experiences from around the world.

Prerequisite(s): 1 of AGR*2301/2 , GEOL*1050, SOIL*2010, SOIL*2200

GEOL*3190 Environmental Water Chemistry F (3-0) [0.50]

An examination of the chemical composition of both natural and contaminated waters at the earth's surface and the interaction of these waters with soils and sediments. The significance of these interactions will be studied with respect to the mobility of organic and metallic constituents in geochemical cycles and as contaminants in the environment.

Prerequisite(s): 1 of CHEM*1010 , CHEM*1050, CHEM*1310

GEOL*3250 Field Methods in Geosciences F (2-2) [0.50]

This course is designed to provide experience in field methods and applied aspects of Earth surface science. The field camp portion will focus on geological mapping skills, while the rest of the term will be spent on developing a consulting proposal for a field-based project. Other topics covered will be project design, proposal writing, oral communication skills and ethics of field-based research. Students are required to notify the designated departmental instructor of their intention to participate in this course during the previous Winter semester. There will be a fee to cover partial costs in this course; students in financial need should approach the Chair of the department.

Prerequisite(s): GEOL*1050, GEOG*2000, (GEOL*2150 or GEOL*2200)

Restriction(s): Restricted to Earth Surface Science Majors. Instructor consent required.

GEOL*4090 Sedimentology F (3-3) [0.50]

Origin, transport, deposition of sediments, and formation of sedimentary rocks. Emphasis will be on the interpretation of recent and ancient environments of deposition, and on the uses of sedimentary materials. Six laboratories will be scheduled as field trips. One Saturday field trip may be scheduled. (Offered in even-numbered years.)

Prerequisite(s): (1 of GEOL*2020, GEOL*2150 , GEOL*2200, equivalent), (0.50 credit at the 3000 level in the GEOG*XXXX or GEOL*XXXX grouping or equivalent)

GEOL*4110 Topics in Earth Science F,W (3-0) [0.50]

Lecture-discussion or seminar on selected topics in Earth Science to be conducted by faculty with expertise in the area. Students should check with the department to determine what topic, if any, will be offered during specific semesters. Field trips will be scheduled as required.

Prerequisite(s): (GEOG*1300 or GEOL*1050), 0.50 credits at the 3000 level in a science appropriate to chosen topic

Restriction(s): Instructor consent required.

GEOL*4120 Topics in Earth Science F,W (3-0) [0.50]

Lecture-discussion or seminar on selected topics in Earth Science to be conducted by faculty with expertise in the area. Students should check with the department to determine what topic, if any, will be offered during specific semesters. Field trips will be scheduled as required.

Prerequisite(s): (GEOG*1300 or GEOL*1050), 0.50 credits at the 3000 level in a science appropriate to chosen topic

Restriction(s): Instructor consent required.

GEOL*4130 Clay and Humic Chemistry W (3-2) [0.50]

This course is a study of the fundamental chemistry of clay minerals and humic substances in the environment, with particular reference to soils, sediments and waters. Emphasis will be placed on their structures and charge characteristics in the context of surface complexation modeling of proton binding and cation and anion adsorption. (Offered in even-numbered years.)

Prerequisite(s): SOIL*3060 or GEOL*3190

German Studies

School of Languages and Literatures

NOTE: The School reserves the right to determine the appropriate level to be taken by students enrolling in language courses.

GERM*1100 Introductory German I F,W (3-1) [0.50]

A beginning course in German. Students will attain a basic knowledge of the language and practice all four language skills (listening, speaking, reading and writing). They will also learn about aspects of German culture. This course may not normally be taken by anyone who has Grade 12U or OAC German.

GERM*1110 Introductory German II F,W (3-1) [0.50]

An intensification of the four language skills introduced in GERM*1100. Students will attain a grasp of essential grammatical concepts and the ability to converse comfortably in everyday situations. This course may not normally be taken by anyone who has Grade 12U or OAC German.

Prerequisite(s): GERM*1100 or equivalent

GERM*2240 Germany Through the Ages W (3-0) [0.50]

A survey of German history, society and culture illustrated by art, music, film and literature. This course is taught in English.

GERM*2400 Contemporary Germany W (3-0) [0.50]

A multimedia approach to contemporary German culture, 20th-century history and recent political events. Emphasis on oral work in German.

Prerequisite(s): GERM*1110 or equivalent

GERM*2490 Intermediate German I F (3-1) [0.50]

This course will include systematic oral and written practice, discussion of contemporary texts, and comprehensive grammar review.

Prerequisite(s): Grade 12U German or GERM*1110

GERM*2500 Intermediate German II W (3-1) [0.50]

Further development of conversational and writing skills; introduction to more complex grammar.

Prerequisite(s): GERM*2490 or equivalent

GERM*2560 Themes in German Literature/Culture W (3-0) [0.50]

This course aims to provide students with basic skills for interpreting literary texts through an exploration of themes that have shaped German literature and culture. Note: Students intending to take both GERM*2560 and GERM*2590 should take GERM*2560 before GERM*2590.

Prerequisite(s): GERM*2490 or permission of the instructor

GERM*2590 Classics of German Literature F (3-0) [0.50]

This course is designed to introduce students to German literary texts which could be considered classics. Note: Students intending to take both GERM*2560 and GERM*2590 should take GERM*2560 before GERM*2590.

GERM*3020 Myth and Fairy Tales in Germany F (3-1) [0.50]

The course explores the role of mythology, fairy tales and legends in late 18th- and 19th-century German literature and culture in the context of socio-political developments. Topics may include the formation of a national identity, the allegorical fairy tale and its role in Romanticism, women and the fairy tale, the fairy tale and the socialization of children (incl. Disney), romantic mythology in music, art and literature. Authors may include Goethe, Brothers Grimm, ETA Hoffman, Wagner. Lectures and texts are English. Students registered in GERM*3020 will meet a fourth hour per week to discuss texts in German. This course is offered in conjunction with HUMN*3020. (Offered in even-numbered years.)

Prerequisite(s): GERM*2560, GERM*2590

Equate(s): HUMN*3020

Restriction(s): GERM*3440, HUMN*3440

GERM*3450 20th-Century German Literature and Film F (3-1) [0.50]

Trends and cultural movements that have shaped the 20th-century as reflected in works of major writers (e.g. Mann, Kafka, Grass, Wolf) and film directors (e.g. Fassbinder). This course is offered in conjunction with HUMN*3450. Lectures are in English. Students registered in GERM*3450 will meet a fourth hour per week to discuss texts in German. (Offered in even-numbered years.)

Prerequisite(s): GERM*2560, GERM*2590

Restriction(s): HUMN*3450

GERM*3460 Women in 18th & 19th Century German Lit. W (3-1) [0.50]

This course is a study of changing images and social roles of women as represented in literary texts by and about women. It will consider the contribution of women to the literary life and cultures of German speaking countries and explore myths and misconceptions regarding women by addressing questions of image and reality. Lectures and texts are in English. Students registered in GERM*3460 will meet a fourth hour per week to discuss texts in German. This course is offered in conjunction with HUMN*3460 (Offered in even-numbered years)

Prerequisite(s): GERM*2560, GERM*2590

Restriction(s): HUMN*3460

GERM*3470 Holocaust & WWII in German Lit. & Film W (3-1) [0.50]

This course focuses on texts and films pertaining to World War II and the Holocaust, the development of the thoughts and the language of genocide, and the representation of the Holocaust in literature and films. The objective is to gain an understanding of the ideas and emotions underlying ethnocentrism and anti-Semitism, and to consider artistic responses to the experience of persecution and mass-murder. Lectures and discussions are in English. Lectures and discussions are in English. Students registered in GERM*3470 will meet a fourth hour per week to discuss texts in German. This course is offered in conjunction with HUMN*3470 (Offered in odd-numbered years) (First offering - Winter 2009)

Prerequisite(s): GERM*2560, GERM*2590

Restriction(s): HUMN*3470

GERM*3500 Advanced German F (3-0) [0.50]

A study of advanced German grammar as well as aspects of structure and style of the German language. Oral presentations and discussions with a special emphasis on essay writing. Translation into idiomatic German and English.

Prerequisite(s): GERM*2500

GERM*3530 German in the Workplace W (3-0) [0.50]

This course is designed to enable students to communicate and interact appropriately in professional and business situations.

Prerequisite(s): GERM*2500 or equivalent

GERM*3600 Directed Readings in German Studies U (3-0) [0.50]

A reading course in German literature designed according to the program and interest of the individual student.

Restriction(s): Instructor consent required.

GERM*4940 Research Paper in German Studies U (3-0) [0.50]

A reading course on some approved topic in German language or literature, leading to an end-of-term research paper.

Restriction(s): Instructor consent required.

Greek

School of Languages and Literatures

NOTES: Literary texts are, at all levels, studied in the original language. Students registering in these courses will be expected to have the appropriate knowledge. Higher level courses in Greek are available as language modules attached to selected Classical Studies courses. (See Classical Studies course descriptions.)

GREK*1100 Preliminary Greek I F (3-0) [0.50]

A beginning course in Greek, providing the fundamentals of structure and idiom. (This course may not be taken by anyone who has OAC Greek).

GREK*1110 Preliminary Greek II W (3-0) [0.50]

A continuation of GREK*1100.

Prerequisite(s): GREK*1100 or high school year 4 (Grade 12) Greek

GREK*2020 Greek Language and Culture F (3-0) [0.50]

Consolidation of fundamental morphology and syntax acquired in GREK*1100 and GREK*1110. Intensive reading in texts that also illuminate aspects of Greek culture.

Prerequisite(s): GREK*1100, GREK*1110

History

Department of History

Students wishing to take a 3000 level course must have pass standing in at least 4.50 university credits.

Students wishing to take a 4000 level course must have pass standing in at least 10.00 credits. Access to all 4000 level courses is restricted to students in the B.A. Honours program with a minimum 70% average in all history course attempts.

Students should note the prerequisite requirements for upper level courses in planning their individual programs.

Content of individual courses may vary depending on the instructor; students therefore should check course outlines at the time of course selection.

Courses marked (C) are core courses required of all History program students.

Courses marked (H) are honours courses. Students in a general program wishing to take these must obtain the permission of instructors concerned.

HIST*1010 Europe and the Early Modern World F,W (3-0) [0.50]

This course will deal with the evolution and expansion of European society during the pre-industrial era. Commencing with the upheavals of Renaissance and Reformation it will survey such themes as the voyages of exploration, the impact of western culture on indigenous societies, the development of commercial capitalism, the transformation of science and technology and the conflict between imperial powers in Europe and overseas. (C)

HIST*1150 20th-Century Global History F,W (3-0) [0.50]

Twentieth-century world history with particular emphasis on Asia, Africa, and Latin America.

HIST*1250 Science and Society Since 1500 F,W (3-0) [0.50]

This course is intended as an introduction to the history of science and its interrelationships with society in the western world since 1500, including its influence on the environment, religion, economics and political developments, warfare, etc. Particular emphasis will be laid upon scientific developments in the 19th or 20th centuries.

Restriction(s): ASCI*1000

HIST*2000 The British Isles, 1066-1603 S,F (3-0) [0.50]

A comparative survey of the histories of England, Scotland, Ireland and Wales during the Medieval and Early Modern eras. Stress will be placed upon common themes such as institutional development, warfare and the often violent interaction between the English and the Celtic peoples.

HIST*2020 Film as History W (2-1) [0.50]

This course will consider film both as a source and as a comment on the past. Topics will vary depending on instructor expertise, and may include film as propaganda, the city in film, film as myth, women and gender in film, and war.

HIST*2040 War and Society W (3-0) [0.50]

Concentrating on developments following the introduction of gunpowder, the course will consider the evolution of military strategy and tactics, the impact of technology on warfare, and the relationship between war and civilian populations.

HIST*2070 World Religions in Historical Perspective W (3-0) [0.50]

This course introduces students to the comparative study of religion in history and the interaction of religion with general social and cultural traits over time. A focus on the cultural roots of specific traditions and religion as a metaphor will account for the spread of these diverse traditions across social and national boundaries. This course will consider eastern religions, primal religions, 'People of the Book' (Judaism, Christianity and Islam considered together), and the 'New Religious Movements' (a category considering religions and para-religions produced by modernity). (Offered through distance education format only).

HIST*2100 Pre-Confederation Canada F (3-0) [0.50]

A study of selected events and issues in pre-Confederation Canadian history including political, economic, social, and cultural developments (C).

Restriction(s): HIST*2601/2

HIST*2110 The Atlantic World 1500-1850 F (3-0) [0.50]

A study of the comparative histories of colonial societies of England, France, Spain and Portugal in a transatlantic context. This course will compare for regional interconnections as well as the uniqueness of each society.

HIST*2150 U.S.A.: Revolution to Reconstruction F (3-0) [0.50]

History of the United States from 1760 to 1877. The course will consider themes such as the creation of a national identity, sectionalism and Civil War, immigration, and the growth of modern American society.

HIST*2200 The Medieval World W (3-0) [0.50]

The major events and developments in Europe, north Africa and Western Asia from the fall of the Roman Empire to 1500 a.d. Emphasis will be placed on the evolution of western Christianity, the rise and expansion of Islam, the emergence of the University, and the growth of literacy and print culture culminating in the humanist movement of the late Middle Ages.

HIST*2250 Environment and History F,W (3-0) [0.50]

An introduction to the field of environmental history - its nature and uses. This course provides a historical perspective to environmental issues. It examines the causes and impact of human-induced modification of the natural world in selected areas of the globe, the evolution of attitudes and ideas about the natural world over time and the growth of conservation/environmental issues and movements. (Also offered through distance education format.)

HIST*2260 Religion and Society W (3-0) [0.50]

This course surveys the major trends in religious beliefs and practices and their social impact since the Reformation. The focus of the course is on the British Isles and North America with some discussion of developments in Continental Europe.

HIST*2390 Imperial and Soviet Russia Since 1800 W (3-0) [0.50]

An introductory survey of Russian History from the death of Catherine the Great to the onset of World War II. This course will focus on efforts by Russian rulers to modernize the Empire's social and economic institutions in response to Western influence. (Offered in odd-numbered years.)

HIST*2450 The Practicing Historian F,W (3-0) [0.50]

A course designed to acquaint students with the development of historical writing, the interpretive problems surrounding the study of history, and the methods employed by historians. (C) (Also offered in distance education format.)

Prerequisite(s): 1.00 credits in history at the 1000 or 2000 level

HIST*2500 Britain and the World Since 1600 U (3-0) [0.50]

This course will survey the history of England and the Celtic Regions of the British Isles from the close of the Tudor period up to the mid-20th century. Emphasis will be placed on social and economic development before and after the Industrial Revolution as well as on those political and military challenges which have characterized Britain's status as a global power in the modern era.

HIST*2510 The Emergence of Modern European Society 1789-1945 F (3-0) [0.50]

This course will deal with the emergence of modern European society as the result of socio-economic and consequent political changes from the French Revolution to the end of World War II.

HIST*2600 Post-Confederation Canada W (3-0) [0.50]

This course is a study of selected events and issues in post-Confederation Canadian history including political, economic, social, and cultural developments (C).

Prerequisite(s): HIST*2100

Restriction(s): HIST*2601/2

HIST*2610 Contemporary Canadian Issues S (3-0) [0.50]

A study of selected issues in modern Canadian history. The subjects investigated such as natives, the environment, the state, the family, will vary with the expertise of the instructor.

HIST*2650 America Since 1877 W (3-0) [0.50]

A survey of the history of the United States since Reconstruction. Political, social and intellectual developments will be covered, as will the rise of America to world power.

HIST*2800 The History of the Modern Family W (3-0) [0.50]

An examination of the family since 1500 with particular emphasis on the English speaking world, though comparisons will be made with other societies. Topics considered will include: change in the legal structure of marriage; power relations and sex roles within the family; the role of kin in the family; changing attitudes to sexuality; the attitude of state to the family and its functions.

HIST*2820 Modern France, 1750-1992: From Louis XV to Mitterand U (3-0) [0.50]

This course is a survey of French history from the beginning of modernization in the 18th century to the challenges of the late 20th century. Topics will include the Revolution, the Napoleonic period, social and political transformation in the 19th century, the Great War, the defeat of 1940 and Vichy, and the remarkable changes in French life since the Second World War.

HIST*2830 The Emergence of Modern Germany 1871-1990 U (3-0) [0.50]

This course will be devoted to a study of major themes in modern German history, and to an analysis of Germany's role in post-war Europe. Topics include the unification of Germany, the role of nationalism in modern German history, the significance of the Bismarck era, the rise of Hitler and the development of the two Germanies until their unification in 1990.

HIST*2850 History of Greece and Rome W (3-0) [0.50]
The history of the Mediterranean World from prehistoric Greece through Classical Greece and Rome to the legalization of Christianity in the Roman Empire in the 4th century.
HIST*2890 History of the Islamic World F (3-0) [0.50]
An introduction to the history of Islam. The course will consider the founding of Islam, its global diffusion, and its role in the transformation of modern societies in the developing world.
HIST*2910 History of Modern Asia W (3-0) [0.50]
An introduction to the histories and cultures of South, Southeast and East Asia since 1750. The course will consider the evolution of Asian religions, cultural identities, concepts of state and of society in the modern era.
HIST*2920 Republican Latin America W (3-0) [0.50]
This course will study selected themes in the history of Latin American republics from the independence period to the modern era.
HIST*2930 Women and Cultural Change F (3-0) [0.50]
Using gender and ethnicity as the main categories of analysis, this course examines the history of women within one global geographical region such as Asia, South America and the Caribbean or North America. The roles women have played in political, economic and private life will be emphasized.
HIST*2960 Topics in the History of Slavery U (3-0) [0.50]
This course introduces students to slavery and the slave trades of the societies of the Atlantic Rim during the era of the Atlantic slave trade. The African experience of the trade constitutes a major focus, but the course also examines aspects of the Atlantic and the trans-Saharan slave trades as they affected societies on the other side of the Atlantic and in the Islamic Middle East. The course also examines the disputed links between the Atlantic slave trade and the rise of capitalism on the one hand and underdevelopment on the other.
HIST*3010 Political Culture in Britain, 1455-1689 U (3-0) [0.50]
An assessment of the transformation of British ideals of monarchy from the Wars of the Roses to the Glorious Revolution. The course will examine the changes in political thought in early modern Britain that emerged as a result of the Renaissance, Reformations, and Scientific Revolution.
<i>Prerequisite(s):</i> 4.50 credits including HIST*1010 or HIST*2000
HIST*3020 Sexuality and Gender in History U (3-0) [0.50]
This course provides an introduction to the issues of sexuality and gender within history. The course will enable students to develop an understanding of how issues of masculinity, femininity, and sexuality were developed and defined across cultures. The chronological and geographic focus of the course may vary according to the interests and expertise of the instructor. (Also offered through distance education format.)
<i>Prerequisite(s):</i> 4.50 credits
HIST*3030 Celtic Britain and Ireland to 1066 U (3-0) [0.50]
The social, political and cultural history of the Celtic peoples of the British Isles from Prehistory to the advent of the Normans. Special consideration will be given to the development of Celtic institutions as well as to comparative study of successive waves of invaders-Romans, Anglo-Saxons, Vikings and Normans.
<i>Prerequisite(s):</i> 4.50 credits including HIST*2000
HIST*3060 American Society U (3-0) [0.50]
A study of selected aspects of American society focusing on the 19th and 20th Centuries. Specific topics, which will vary according to the expertise of the instructor, may include such themes as War and American society, the Jacksonian Era, Civil War America, or American popular culture.
<i>Prerequisite(s):</i> 4.50 credits including HIST*2150 or HIST*2650
HIST*3070 Modern South Asia U (3-0) [0.50]
This course studies the history of modern South Asia from 1757 to the present day. Possible topics include: ideologies of British power in South Asia, Indian reactions to imperialism, socio-religious movements, the birth of nationalism and the nation-state in South Asia, civil society and social issues in a developing nation, regionalism, foreign policy and South Asia's place in the 21 st century.
<i>Prerequisite(s):</i> 4.50 credits including HIST*2910 or HIST*3590
HIST*3080 United States in the World U (3-0) [0.50]
This course is a study of the United States as a global phenomenon. Thematic topics will go beyond foreign policy and military history to include imperialism, immigration, globalization, 'race', gender, ethnicity, consumption tourism, and international cultural industries.
<i>Prerequisite(s):</i> 4.50 credits including HIST*2650

HIST*3090 Nationalism and Internationalism in Europe 1914-1957 U (3-0) [0.50]
This course will be concerned with two main themes of 20th-century European history: the impact of nationalism and the gradual emergence of international ideas and institutions. Major topics to be discussed include nationalism during the two world wars, the strengths and weaknesses of the League of Nations, and the creation of the European Economic Community.
<i>Prerequisite(s):</i> 4.50 credits including HIST*2510
HIST*3130 Popular Culture and Punishment, 1700-1900 U (3-0) [0.50]
The course will survey the social, political and intellectual influences upon the leisure activities of Europeans and Americans in the period with special reference to institutions such as the prison, the asylum, the reformatory and the regulation of popular culture and leisure activities. Witchcraft and the witch-hunt will be discussed.
<i>Prerequisite(s):</i> 4.50 credits including HIST*1010 or SOC*1500
HIST*3140 Witch-hunts and Popular Culture S (0-0) [0.50]
This course will explore the phenomenon of the 'witch-hunts' in early modern Europe through a focus on Scotland in the period 1560-1700. In doing so it will provide students with a background on the history of Scotland during the early modern period and introduce them to the considerable body of historical writing on the subject of the witch-hunts. In addition, students will explore notions of both elite culture and the 'popular culture' of those elements of society frequently neglected by historians. Due to the fact that the overwhelming majority of the accused witches were women, the course will include examinations of gender history and its contributions to our understandings of the period. (Offered through distance education format only.)
<i>Prerequisite(s):</i> 4.50 credits including HIST*1010 or instructor consent required.
HIST*3150 History and Culture of Mexico U (3-0) [0.50]
This course will cover the history and culture of Mexico from its Precolumbian civilizations to the present. Topics may include: Aztec and Maya civilizations, European discovery and conquest, inquisition, convents, independence, the Mexican Revolution, indigenismo, NAFTA and Zapatista insurgency in Chiapas.
<i>Prerequisite(s):</i> 4.50 credits including 1 of HIST*2110, HIST*2920, HIST*2930
HIST*3160 Canadian Political History Since 1867 U (3-0) [0.50]
This course consists of a detailed study of the background and development of the Canadian political process and culture. It devotes special attention to the changing role and character of the state.
<i>Prerequisite(s):</i> 4.50 credits including 1 of HIST*2100, HIST*2600, HIST*2601/2
HIST*3270 Revolution in the Modern World W (3-0) [0.50]
This course offers a comparative analysis of revolutionary movements in the modern world. It focuses on the French Revolution, the development of a revolutionary tradition in the 19th century, the Russian Revolution, and the Communist Revolution in China. Comparative themes include the relative importance of ideology and class conflict, the emergence of professional revolutionaries, and the relationship between revolutions and international relations.
<i>Prerequisite(s):</i> 4.50 credits
HIST*3310 Disease and History U (3-0) [0.50]
This interdisciplinary course provides an introduction to the historical interactions between disease and human society from the Middle Ages to the present. Major themes may include the co-construction of disease and society; disease and urbanization; disease and colonialism; disease and globalization; disease and gender. (Offered in even-numbered years.)
<i>Prerequisite(s):</i> 4.50 credits
HIST*3380 British Imperialism in Asia and Africa U (3-0) [0.50]
This course examines the British Empire from the 18 th through the 20 th centuries. It focuses on: the empire in Asia and Africa; ideologies of empire; and European and non-European approaches and reactions to empire.
<i>Prerequisite(s):</i> 4.50 credits including HIST*2500 or HIST*2510
HIST*3410 The History of Pre-Colonial Africa U (3-0) [0.50]
This course will include studies on the Ibo, Yoruba and Edo societies, and on the Dahomey, Hausa, Western Congo and Angola states; the effect of the Atlantic slave trade on African societies. Emphasis will be given to the householding system, lineage group organization, subsistence agriculture, and the sources of African History.
<i>Prerequisite(s):</i> 4.50 credits including HIST*1150 or HIST*2960

HIST*3420 Colonial Latin America F (3-0) [0.50]
This course covers the history of Latin America from the pre-Columbian period to age of independence in the early nineteenth century. Topics include pre-Columbian civilizations; the European conquest; the development of colonial societies and politics; the growth of slavery; eighteenth-century imperial reform, and the rise of independence movements. (Offered in even-numbered years.) <i>Prerequisite(s):</i> 4.50 credits
HIST*3430 Topics in Environment and Society U (3-0) [0.50]
This is a topical course, which builds on themes introduced in HIST*2250, Environment and History. Topics may include global deforestation; the origins of the global environmental movement; agriculture and the environment; the environmental impact of cultural encounters. <i>Prerequisite(s):</i> 4.50 credits including HIST*2250
HIST*3450 The Public Face of History U (2-1) [0.50]
Critical analysis of public history and memory through the activities of governments and voluntary associations. History as presented in films, television, schools, museums, archives, commemorations, historical fiction, or popular non-fiction is examined. <i>Prerequisite(s):</i> 4.50 credits including HIST*2450
HIST*3470 Independent Reading U (3-0) [0.50]
A course of independent study, based on a comprehensive reading list provided by the department. Evaluation will be based on two written examinations. <i>Prerequisite(s):</i> 7.50 credits <i>Restriction(s):</i> Instructor consent required.
HIST*3480 Workplace Learning U (0-0) [0.50]
An independent study course based on either History related voluntary or paid workplace experience. Evaluation will be based on assignments relating to work duties. These will usually be in the form of a weekly journal, and a major project relating to some specific aspect of the work experience. Students interested in this option must have their project approved by the department prior to the semester in which they plan to engage in their work experience. Students will then be assigned to a faculty supervisor who will oversee the project. <i>Prerequisite(s):</i> 7.50 credits including 1.50 History or equivalent credits <i>Restriction(s):</i> Instructor consent required.
HIST*3530 Celtic Britain and Ireland Since 1603 U (3-0) [0.50]
This course will deal with the Celtic peoples in the British Isles and their effort to maintain their cultural, economic and political independence. <i>Prerequisite(s):</i> 4.50 credits including 1 of HIST*2000, HIST*2500, HIST*3030
HIST*3540 World War Two U (3-0) [0.50]
An in-depth analysis of the immediate causes and impact of the Second World War focusing on the influence of military events, on the social, political and economic developments of the major participating nations. <i>Prerequisite(s):</i> 4.50 credits including 2 of HIST*1150, HIST*2040, HIST*2100, HIST*2500, HIST*2510, HIST*2601/2, HIST*2600, HIST*2650, HIST*2830,
HIST*3570 Women in Modern Europe U (3-0) [0.50]
This course will examine selected topics in modern European women's history. Attention will be given to action in the public sphere, women's personal and family lives and occupations. <i>Prerequisite(s):</i> 4.50 credits including 1 of HIST*2500, HIST*2510, HIST*2800, HIST*2930
HIST*3580 Women's History in Asia U (3-0) [0.50]
This course examines the roles of women in one or more countries of Asia through the prisms offered by ideas of 'race', class, gender, social status, material culture, intellectual life, and ideology. <i>Prerequisite(s):</i> 4.50 credits including 1 of HIST*1150, HIST*2800, HIST*2890, HIST*2910, HIST*2930
HIST*3590 Ancient & Medieval South Asia F (3-0) [0.50]
This course examines South Asian history from the beginnings of civilization on the Indian subcontinent to the end of the Great Mughals in the 18th century. It provides an overview and analysis of the cultural, social, religious, political and economic development of South Asian civilization, including development from tribe to state to civil society, political organization, socio-religious movements, cultural contact and exchange, and the development of a composite culture. <i>Prerequisite(s):</i> 4.50 credits

HIST*3600 Quebec History U (3-0) [0.50]
Examines selected themes in the social, economic, political and cultural evolution of Quebec and its relations with the rest of Canada. <i>Prerequisite(s):</i> 4.50 credits including 1 of HIST*2100, HIST*2600, HIST*2601/2
HIST*3650 Twentieth-Century America U (3-0) [0.50]
This course examines political and social changes in the United States during the latter decades of the 20 th century and into the 21 st . America's international role will be considered, as well as conflicts over such issues as 'race', ethnicity, gender, and culture. <i>Prerequisite(s):</i> 4.50 credits including HIST*2650
HIST*3660 Canadian Social History U (3-0) [0.50]
An examination of selected themes in the development of Canadian society such as the role of class, the social consequences of industrialization and urbanization, immigration, ethnicity and religion, education and culture. <i>Prerequisite(s):</i> 4.50 credits including 1 of HIST*2100, HIST*2600, HIST*2601/2
HIST*3750 The Reformation U (3-0) [0.50]
The changes in religious, social and cultural life in 16th century Europe. This course will examine the impact of humanism, the developments in urban culture known as the Renaissance, the reform movements, in central and western Europe, the Catholic response, and the resulting disintegration of the medieval social order. <i>Prerequisite(s):</i> 4.50 credits including HIST*1010
HIST*3820 Early Modern France U (3-0) [0.50]
This course surveys French History from the renaissance to the French Revolution. Students will examine the emergence of the powerful monarchy, 16th-century religious conflict and civil war, and the social, political and intellectual developments of the 17th and 18th centuries, which culminated in the 1789 Revolution. <i>Prerequisite(s):</i> 4.50 credits
HIST*3910 Africa Since 1800 U (3-0) [0.50]
This course will trace the suppression of the slave trade and the opening of Africa to European imperialism. Emphasis will be given to resistance movements and rising nationalism between the two World Wars. An endeavour will be made to relate the national liberation movement to the achievement of independence. <i>Prerequisite(s):</i> 4.50 credits including HIST*1150 or HIST*2960
HIST*4030 Historical Biography U (3-0) [0.50]
This advanced research seminar asks students to consider the role of the individual in history by reading theoretical works and examples drawn from the major schools of thought on this issue. Students will undertake to write a biography that will utilize primary sources and will include a detailed historiographical discussion of the works available on their chosen subject. (H) <i>Prerequisite(s):</i> 10.00 credits including 1.50 credits in History at the 3000-level <i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
HIST*4040 Topics in Scottish History U (3-0) [0.50]
A seminar course dealing with selected aspects of Scottish social, economic and political history. The seminars will be based upon an examination of primary sources from the University library's extensive Scottish Collections, as well as secondary literature. Students should consult with the department for specific offerings. (H) <i>Prerequisite(s):</i> 10.00 credits including HIST*3530 <i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
HIST*4050 Topics in Scottish History U (3-0) [0.50]
A seminar course dealing with selected aspects of Scottish social, economic and political history. The seminars will be based upon an examination of primary sources from the University library's extensive Scottish Collections, as well as secondary literature. Students should consult with the department for specific offerings. (H) <i>Prerequisite(s):</i> 10.00 credits including HIST*3530 <i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
HIST*4090 Modern European History U (3-0) [0.50]
This course is an in-depth examination of a theme or themes from European history in the nineteenth and/or twentieth centuries. Topics chosen will vary with expertise of the instructor. (H) <i>Prerequisite(s):</i> 10.00 credits including 1 of HIST*1150, HIST*2510, HIST*3090 <i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4100 Africa and the Slave Trades U (3-0) [0.50]
This course will discuss the origins, character, and operation of slavery and the export slave trades in Africa. It will examine the interaction between domestic slavery and the export slave trades, on the one hand, and demographic, political, economic, social and cultural impact on African states and societies, on the other. Other themes to be examined include slave resistance in Africa, and abolition and the introduction of legitimate commerce and their impact on Africa. (H)
<i>Prerequisite(s):</i> 10.00 credits including 1 of HIST*2960, HIST*3410, HIST*3910
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4120 Topics in Global History U (3-0) [0.50]
This course focuses on issues that emphasize the history of connections between different parts of the world. Topics may include the growth of the world economy; transformations of the global environment; trade and exchange; diasporas and migration. (H)
<i>Prerequisite(s):</i> 10.00 credits including 1.50 credits in History at the 3000-level
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4160 Seminar in Canadian Political History U (3-0) [0.50]
Political events, key personalities, the political process, and state instruments and institutions will be analyzed with a view to understanding historical aspects of the political system and culture in Canada. (H)
<i>Prerequisite(s):</i> 10.00 credits including 1 of HIST*2100, HIST*2600, HIST*2601/2
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4180 American Identities U (3-0) [0.50]
This course analyzes how Americans have constructed and enacted identities in the U.S. as citizens and consumers through investigating concepts such as 'race', ethnicity, gender, sexuality, class, regional distinctions, and nationalism. (H)
<i>Prerequisite(s):</i> 10.00 credits including HIST*2650
<i>Restriction(s):</i> HIST*4210, restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4190 The American South U (3-0) [0.50]
A study of the slave south from colonial times to the Civil War, this course will concentrate on the evolution of the plantation system and slave society, the growth of a distinctive south civilization, and the immediate causes of the Civil War. (H)
<i>Prerequisite(s):</i> 10.00 credits including HIST*2150 or HIST*2650
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4220 Canadian Cultural Identity U (3-0) [0.50]
This seminar examines the origins, major themes, and historical development of Canadians' cultural identities. Possible topics include anti-Americanism, loyalism, multiculturalism, official bilingualism, mass culture, tourism, folklore, and state cultural policies. (H)
<i>Prerequisite(s):</i> 10.00 credits including 1 of HIST*2100, HIST*2600, HIST*2601/2
<i>Restriction(s):</i> HIST*3220, restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4280 Poverty and Policy in the Victorian Age U (3-0) [0.50]
Starting with the debates over the New Poor Law of 1834, this course will examine the changing content of the notion of poverty, and changing methods adopted to treat it. It will also look at the lives of the poor, in so far as these can be reconstructed from contemporary sources. (H)
<i>Prerequisite(s):</i> 10.00 credits including HIST*2500
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4450 History with Numbers F (3-0) [0.50]
This course surveys the use of quantitative methods, the historical evolution of data generation and recording, and the use of quantitative sources in historical analysis and evidence in historical research. The principal objective is to build numeracy among senior History students. Case studies and example will be drawn from studies of inequality, family structure and migration from a variety of regions in Europe, Asia, Africa and the Americans. (H)
<i>Prerequisite(s):</i> 10.00 credits including HIST*2450, and at least 1.00 credits in History at the 3000 level or above.
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4470 Special History Project Seminar I U (3-0) [0.50]
This course is designed to train honours students in the techniques of research, interpretation and writing of history. The student will choose a topic for intensive study from a list approved by the department. (H)
<i>Prerequisite(s):</i> 10.00 credits
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.

HIST*4560 Topics in Revolution U (3-0) [0.50]
A seminar course designed to explore one or more social or political or intellectual revolutions in the early modern or modern era depending on the expertise of the instructor. Students should consult the department for specific offerings. (H)
<i>Prerequisite(s):</i> 10.00 credits
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.

HIST*4570 Topics in Revolution U (3-0) [0.50]
A seminar course designed to explore one or more social or political or intellectual revolutions in the early modern or modern era depending on the expertise of the instructor. Students should consult the department for specific offerings. (H)
<i>Prerequisite(s):</i> 10.00 credits
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.

HIST*4580 Topics in Revolution U (3-0) [0.50]
A seminar course designed to explore one or more social or political or intellectual revolutions in the early modern or modern era depending on the expertise of the instructor. Students should consult the department for specific offerings. (H)
<i>Prerequisite(s):</i> 10.00 credits
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.

HIST*4620 Seminar in Canadian Rural History U (3-0) [0.50]
This course will examine selected topics in the social and economic transformation of rural Canada with relevant comparisons to the rest of North America and elsewhere. (H)
<i>Prerequisite(s):</i> 10.00 credits including 1 of HIST*2100, HIST*2600, HIST*2601/2
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4670 Seminar in Science and Society W (3-0) [0.50]
This course will discuss the way science is rooted in society and culture. It will explore the broad field of the history of science, the social role of the scientist, the impact of scientific methods, technology, machines and networks. Students will emerge with the ability to grapple with many of the challenges involved in rethinking the history of science in social and cultural terms. (H)
<i>Prerequisite(s):</i> 10.00 credits including either HIST*1250 or ASCI*1000
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4680 The U.S. in the Era of Urbanization, 1870-1920 U (1-2) [0.50]
This course will examine social and intellectual developments in the United States with emphasis placed on the period between the Civil War and World War I. An important area of study will be the nature and consequences of urban development. Stress is laid on the reading of primary sources. (H)
<i>Prerequisite(s):</i> 10.00 credits including HIST*2150 or HIST*2650
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4700 Topics in Medieval History U (3-0) [0.50]
A detailed analysis of selected aspects of the Middle Ages from c. 1000. Students should consult the department for specific offerings. (H)
<i>Prerequisite(s):</i> 10.00 credits including HIST*2000 or HIST*2200
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4710 Topics in Medieval History U (3-0) [0.50]
A detailed analysis of selected aspects of the Middle Ages from c. 1000. Students should consult the department for specific offerings. (H)
<i>Prerequisite(s):</i> 10.00 credits including HIST*2000 or HIST*2200
<i>Restriction(s):</i> Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4900 Imperialism and Nationalism in South Asia U (3-0) [0.50]

This course will examine India's experience of and reaction to colonial rule from the advent of the British Raj in 1757 through to decolonization in 1947. Emphasis will be placed not only on mainstream political movements, but also on the role played by subaltern groups such as women, peasants and workers. (H)

Prerequisite(s): 10.00 credits including 1 of HIST*2890, HIST*2910, HIST*3070, HIST*3380

Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

HIST*4970 Special History Project Seminar II U (3-0) [0.50]

A continuation of HIST*4470. (H)

Prerequisite(s): 10.00 credits

Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.

Horticultural Science

Department of Plant Agriculture

HORT*1050 Introduction to Horticultural Management F (2-3) [0.50]

This course is an overview of the various sectors of the horticulture industry and an investigation into specific sectors, that will include field trips, practical hands-on experience with tools and equipment, and safety legislation and practices. Industry sectors such as food and ornamental crop production, greenhouse and nursery production, landscape management, design/build and maintenance contracting, and gardening, will be examined and discussed. The variety breadth and importance of the horticulture industry in Ontario's economy will be outlined and discussed.

Restriction(s): Registration in B.B.R.M., Horticulture Major

Location(s): Ridgetown

HORT*1060 Plant Identification: Woody Plants F (3-2) [0.50]

In this course, students will learn the identification, naming, selection and landscape adaptation of cultivated woody plants. Elements of classification and nomenclature will provide a basis for learning common names, botanic names and morphological terms. Plant habit will be related to landscape function. Discussion will include the diversity of human interactions with woody plants both historically and in modern times. (Also offered through distance education format.)

Restriction(s): Registration in B.B.R.M., Horticulture Major, HORT*3260

Location(s): Ridgetown

HORT*1070 Fruit Production F (2-3) [0.50]

This course covers the commercial production and management of major small and tree fruit crops grown in Ontario, with the exception of grapes. Discussion topics include site and location selection, cultural management, and economics of fruit crop production in a temperate climate.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*1080 Vegetable Production I F (2-3) [0.50]

This course includes commercial production and management of field-grown fresh market and processing vegetable crops, with emphasis placed on the major botanical families of vegetable crops grown in Ontario. Topics discussed include cropping systems of the major vegetable crop families, production trends, site selection, seed propagation, transplant production, use of mulches and rowcovers, irrigation techniques, harvesting and post-harvest handling of major vegetable crops including quality parameters, health benefits of vegetables, processing techniques, and marketing.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*1100 Plant Propagation Techniques W (3-2) [0.50]

This course covers the principles and practices of propagation for horticultural plants. Sexual propagation discussions include dormancy issues, collection, viability tests, storage and seed germination. Vegetative propagation discussions include cuttings, division, layering, budding, grafting and tissue culture.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*1200 Vegetable Production II W (2-3) [0.50]

This course includes commercial production and management of field-grown fresh market and processing vegetable crops not covered in Vegetable Production I, with some emphasis placed on production practices and quality characteristics specific to minor vegetable crops. Topics include cropping systems for minor vegetable crops, physiological bases for cultural practices, grading of vegetable crops, nutrient requirements and legislation, major costs associated with vegetable production, harvesting and post-harvest handling of minor vegetable crops including quality parameters, organic production, and marketing challenges for vegetables.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*2010 Greenhouse Management F (3-2) [0.50]

This course covers management of the greenhouse environment including temperature, relative humidity, CO₂ and light. Computer controls, pest management, crop culture, containers, mixes, greenhouse heat loss calculations, construction, fertility, diagnostics, post-harvest, etc. are also examined. Students will be required to have a detailed understanding of the theoretical aspects of greenhouse management including physiological, morphological, anatomical, and bio-chemical aspects of greenhouse crops.

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*2060 Plant Identification: Herbaceous Plants F (3-2) [0.50]

This course covers the identification, naming, selection and landscape accommodation of families and groups of herbaceous plants with ornamental importance. The course will explore further the nomenclature of ornamental plants through the horticulturally significant taxonomic categories cultivar-group and cultivar-series.

Prerequisite(s): HORT*1060

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*2080 Horticultural Weed Science F (3-2) [0.50]

This course will provide the students with hands-on training of the basic anatomical elements and biology of weeds commonly found in ornamental horticulture, as well as applied knowledge methods of weed control, herbicide mode of action, and basis of selectivity.

Prerequisite(s): BIOL*1030

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*2200 Integrated Project W (2-3) [0.50]

A comprehensive study of the technical and economic aspects of a business operation will be undertaken. This will include the development of a general business plan in a sector of interest to the student, incorporating basic product information and a detailed definition of the business or aspect of the discipline.

Prerequisite(s): AGEC*1100, (AGEC*2220 or BUS*2220)

Co-requisite(s): AGEC*2230 or BUS*2230

Restriction(s): Registered in B.B.R.M.

Location(s): Ridgetown

HORT*2450 Introduction to Turfgrass Science F (3-2) [0.50]

The biology, ecology, adaptation, and uses of cool-season and warm-season turfgrass species and cultivars will be introduced. Topics will include the identification and life strategies of different turfgrass species, principles of reproduction and techniques for establishment of turfgrass by seeding, sprigging and sodding. The ecology of management including mowing, irrigation, cultivation, mineral nutrition, repair and renovation, and management of stresses (thatch, weeds, insects, disease). The turfgrass industry will be introduced, including application of ecological principles to athletic field management, sod production, golf course management, and professional lawn care.

Prerequisite(s): BIOL*1040

Restriction(s): HORT*3220

HORT*3010 Annual, Perennial and Indoor Plants - Identification and Use F (2-2) [0.50]

This course focuses on the identification and adaptation of annual, biennial, perennial herbaceous and indoor plants. Lectures will be integrated with outdoor laboratory activities to emphasize utilization of plant groups in park, perennial border, general landscape botanic garden and interiorscape settings. (Offered in odd-numbered years.)

Prerequisite(s): 0.50 credits in botany

HORT*3050 Management of Turfgrass Insect Pests and Weeds F (3-2) [0.50]

Biology, behavior and impact of insect pests of turfgrass and recognition of symptoms will be emphasized. Identification and management of weed species commonly found in turfgrass will be discussed. Environmental impacts of cultural and chemical control techniques will be discussed for each group of pests and advances in chemical and biological control methods will be developed.

Prerequisite(s): HORT*2450

Restriction(s): DTM*3300

HORT*3230 Plant Propagation F (2-2) [0.50]

Principles and practices of propagation for horticultural plants. Sexual (seed) propagation to include seed maturation, dormancy and seed germination; vegetative (asexual) propagation, including division, layering, budding, grafting and tissue culture.

Prerequisite(s): BIOL*1040

HORT*3260 Woody Plants F (1-3) [0.50]

Identification and cultural adaptation of native and introduced woody plants useful in cultivated landscapes and natural areas.

Prerequisite(s): BIOL*1030

HORT*3280 Greenhouse Production W (3-3) [0.50]

Principles and practices of production, culture and marketing of greenhouse flower and vegetable crops.

Prerequisite(s): BOT*3310 or PBIO*3110

HORT*3350 Woody Plant Production and Culture W (3-3) [0.50]
Techniques of producing field and container-grown woody landscape nursery stock are integrated with techniques of planting and maintaining individual trees in the cultivated landscape. This emphasis encompasses nursery stock production and arboriculture. <i>Prerequisite(s):</i> BIOL*1030 or equivalent <i>Equate(s):</i> HORT*3340 , HORT*4250
HORT*3430 Wine-Grape Culture W (3-0) [0.50]
The history and impact of grape-growing in the New World will be presented and studied. Grape (<i>Vitis</i>) taxonomy (ampelography) and physiology will be studied as it relates to the Old World/New World wine growing. The physiology of fruiting and vegetative balance for managing wine quality in the vineyard will be integrated with basic wine-making practices and general oenological techniques. (Offered through Distance Education only.) <i>Prerequisite(s):</i> AGR*2470 or BOT*2100
HORT*3510 Vegetable Production F (3-3) [0.50]
The vegetable industry and the characteristics, culture, storage and marketing of field-grown vegetable crops will be studied. Organic vegetable production will also be considered. <i>Prerequisite(s):</i> BOT*2100
HORT*4200 Turf, the Environment and Society W (3-0) [0.50]
The course will explore the environmental impact of turfgrass management in urban and rural landscapes and society's perception of the how those areas should be used. Emphasis will be placed on the ecology of turfgrass systems and issues surrounding society's perception of management practices. The impact of public perception about the management and environmental impact of turfgrass areas in urban and rural landscapes will be discussed, including the issues surrounding the use and maintenance of turfgrass ecosystems. (First offering - Winter 2010) <i>Prerequisite(s):</i> HORT*2450, HORT*4450, (1 of BIOL*2060, BOT*2050, CROP*2110)
HORT*4300 Postharvest Physiology W (3-3) [0.50]
An examination and discussion of physiological and biochemical processes unique to postharvest development and deterioration. Principles and practices of storing fruits, vegetables, and florists' and nursery stocks as well as marketing pathways for horticultural crops will be considered. <i>Prerequisite(s):</i> BOT*3300 or PBIO*3110
HORT*4380 Tropical and Sub-Tropical Horticultural Crops F (3-0) [0.50]
Principles involved in the production and utilization of tropical and sub-tropical horticultural crops and agroforestry. School of Environmental Design and Rural Development. <i>Prerequisite(s):</i> AGR*1250
HORT*4420 Fruit Crops F (3-3) [0.50]
Growth patterns, fruiting characteristics and adaptation to environmental conditions of fruit crops in temperate regions. Classification, cultural practices including propagation and the physiological principles underlying these practices will be emphasized. <i>Prerequisite(s):</i> BOT*2100
HORT*4450 Advanced Turfgrass Science F (3-2) [0.50]
Topics include integrated turfgrass and pest management, water quality, and developing technologies in turfgrass science and management. Challenges facing turfgrass managers will be considered including turf quality, environmental impact, scheduling and financial implications. (First offering - Fall 2009) <i>Prerequisite(s):</i> ENVB*3160, HORT*2450, HORT*3050
HORT*4900 Plant Agriculture Special Project I S,F,W (1-5) [0.50]
The student, in consultation with a faculty member, will select and define a research problem. Supervisory arrangements should be made at least one semester prior to commencing the course. The course will include preparation of a detailed literature review, project proposal and progress report. This course may be followed by HORT*4910 to provide two semesters for completion of the project. <i>Prerequisite(s):</i> 15.00 credits <i>Restriction(s):</i> Registration in B.Sc. or B.Sc.(Agr.) program.
HORT*4910 Plant Agriculture Special Project II S,F,W (1-5) [0.50]
A continuation of HORT*4900 in which the student will complete the research, write up the research findings in a scholarly scientific style and present a seminar. <i>Prerequisite(s):</i> HORT*4900

Hospitality and Tourism Management

School of Hospitality and Tourism Management

HTM*1000 Introduction to Hospitality and Tourism Management F (3-0) [0.50]

A survey of the hospitality and tourism industry, with reference to its historical development, growth, organization; the management process, and the scope of the industry today.

Equate(s): HAFA*1000

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2000 Hospitality Purchasing Management W (3-0) [0.50]

This course introduces the management of the purchasing function in hospitality businesses as it applies to food, beverages, supplies, equipment, furnishings and services. The focus is on the process of managing the supply channel as well as on developing appropriate policies and procedures.

Prerequisite(s): 1 of HAFA*1000 , HTM*1000, (ECON*1050, HAFA*2700), (ECON*1050, HTM*2700)

Equate(s): HAFA*2000

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2010 Hospitality and Tourism Business Communications F,W (3-0) [0.50]

Designed to enhance students' professionalism in the hospitality and tourism fields by improving their communication skills. The focus is primarily on writing (business letters, memos, and reports), but also includes effective speaking/presentation skills. The assignments are based on hospitality and tourism issues.

Prerequisite(s): 1 of HAFA*1000 , HAFA*2700 , HTM*1000, HTM*2700

Equate(s): HAFA*2010

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2030 Control Systems in the Hospitality Industry F,W (3-0) [0.50]

This is a study of the policies and procedures required to control food, beverage and other products, payroll and other operating costs. Areas examined include such topics as cost behaviour and analysis, menu analysis, budget preparation and the interpretation of data. The course will also stress the application of analytical techniques. Examples from all industry segments will be used. (Also offered through distance education format.)

Prerequisite(s): 1 of HAFA*2000 , HAFA*2700 , HTM*2000, HTM*2700

Equate(s): HAFA*2030

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management, B.A.Sc. Applied Human Nutrition.

HTM*2050 Dimensions of Tourism F (3-0) [0.50]

This course examines tourism as an amalgam of industries - transportation, accommodation, travel, trade and other facilitating services; follows a multidisciplinary approach in its analysis, organization, planning and control.

Prerequisite(s): HTM*2120

Equate(s): HAFA*3100 and HTM*3100

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2070 Meetings and Convention Management F (3-0) [0.50]

This course examines the sales, servicing and management of the meetings, events, conventions, exhibitions, and trade show industries. Emphasis is placed on both the supply (product and service providers) and demand (meeting and event managers) elements of the industry. The course focuses on the unique operational and managerial functions of this multifaceted component of the tourism and hospitality industry.

Prerequisite(s): HAFA*1000 or HTM*1000

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2100 Lodging Operations W (3-0) [0.50]

A study of the nature of unit operations in the various sectors of the lodging industry and of the functions and systems of lodging operations. Topics will include organization structure and responsibilities, sociotechnical systems and legal and security aspects.

Prerequisite(s): HAFA*1000 or HTM*1000

Equate(s): HAFA*2100

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2120 Hospitality and Tourism Marketing I W (3-0) [0.50]

This course discusses the hospitality and tourism marketing environment in Canada and all elements of the marketing planning process through the use of numerous up-to-date examples from all geographic areas and sectors of the tourism and hospitality industries. Students will gain a comprehensive understanding of the private and public sector stakeholders as well as the contemporary marketing challenges they face.

Prerequisite(s): HTM*1000

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2150 Introduction to Canadian Business Management U (3-0) [0.50]

An introductory course in the fundamentals of business management in Canada. Students will be exposed to the basic functions of business and management. This course will also cover small business and entrepreneurship, forms of business ownership, competing in the global business environment and the economic and political realities of business in Canada today. This course may not be taken for credit by Bachelor of Commerce students. (Offered through distance education format only.)

Equate(s): HAFA*2150

Restriction(s): B.Comm. students cannot take this course for credit.

HTM*2170 Canadian Tourism Policy, Planning and Development W (3-0) [0.50]

This course focuses on the various aspects of tourism planning, policy, and development in Canada. Topics covered include: reasons for development; tourism development as a strategy for urban revitalization; tourism's links to heritage conservation and regional development; sustainability and the adverse impacts of development; cultural considerations and community participation; and the importance of context for individual tourism projects.

Prerequisite(s): GEOG*1220, HTM*1000, HTM*2050

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management.

HTM*2200 Organizational Behaviour I F,W (3-0) [0.50]

This course introduces organizational behaviour. It focuses on individual perception, learning, communication, motivation and decision-making as well as group effectiveness, problem-solving and decision-making. (Also offered through distance education format.)

Prerequisite(s): 5.00 credits

Equate(s): HAFA*2200

Restriction(s): ISS*2500, PSYC*3080. Priority Access course. Enrolment restricted to particular programs or specializations. See department for more information.

HTM*2700 Introductory Foods F,W (3-2) [0.50]

Scientific principles and their application to food preparation and food consumption. An integrated lecture and laboratory approach is used to study the chemical and physical properties of foods.

Prerequisite(s): 1 of Grade 12U Chemistry, OAC Chemistry, CHEM*1000 , CHEM*1040, CHEM*1060, CHEM*1100

Equate(s): HAFA*2700

Restriction(s): Registration in B.Comm. HAFA, HAFA Co-op or Tourism Management, B.A.Sc. Applied Human Nutrition.

HTM*2740 Cultural Aspects of Food F (3-0) [0.50]

A survey of cultural influences on individual and group food habits and patterns. The course studies the selection and use of food; the development of food beliefs, attitudes and related behaviours within the context of cultural systems.

Equate(s): HAFA*2740

HTM*3000 Human Resources Management F,W (3-0) [0.50]

This course examines the essential human resource function of planning, staffing, employee training and development, employee assistance programs, the legal environment and employee maintenance in a variety of organizational settings. (Also offered through distance education format.)

Prerequisite(s): 1 of AGE*2220 , BUS*2220, FRHD*3060, HAFA*2030 , HAFA*2200 , HTM*2030, HTM*2200

Equate(s): HAFA*3000

Restriction(s): PSYC*3070. Priority Access course. Enrolment restricted to particular programs or specializations. See department for more information.

HTM*3030 Beverage Management F (2-2) [0.50]
This course provides students with knowledge of the beer, spirit, wine, coffee and soft drink industries and their importance in the hospitality environment. Course topics will include product characteristics, purchasing, pricing, control, marketing and promotion, trends and the responsible service of alcoholic beverages.
<i>Prerequisite(s):</i> 9.00 credits
<i>Restriction(s):</i> Hafa*4180 , HTM*4180 . Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management. Students must be of legal drinking age in Ontario.

HTM*3060 Lodging Management U (3-0) [0.50]
To explore and analyze the principles and practices of lodging management and related sales activities. The management of and interaction among various divisions of lodging operations are addressed, including general management, front office/housekeeping/engineering divisions, food and beverage operations, sales and marketing, accounting and finance. Focus of the course is on communication both within and among departments, divisions, and most importantly, with the consumer.
<i>Prerequisite(s):</i> Hafa*2100 or HTM*2100
<i>Equate(s):</i> Hafa*3060
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management.

HTM*3070 Hospitality and Tourism Management Accounting F,W (3-0) [0.50]
This course involves application of accounting principles to hospitality and tourism accounting systems. It emphasizes the use of the uniform system of accounts for hospitality and tourism operations, principles of internal control, payroll control, budgeting, responsibility accounting and analysis of financial data. It is designed to assist the student in relating accounting information to management decisions. Examples from all industry segments will be used. (Also offered through distance education format.)
<i>Prerequisite(s):</i> AGE*2220 or BUS*2220
<i>Equate(s):</i> Hafa*3070
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management.

HTM*3080 Hospitality and Tourism Marketing II F,W (3-0) [0.50]
This course focuses on major marketing decisions that hospitality managers face in generating and sustaining demand for their products and services. Course content includes marketing strategies and practices, segmentation and target marketing, positioning and branding, pricing, promotions, personal selling, and distribution system decisions for all hospitality and tourism related businesses.
<i>Prerequisite(s):</i> HTM*2120
<i>Equate(s):</i> Hafa*3080
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management.

HTM*3090 Foodservice Operations Management F,W (4-6) [1.00]
The application of managerial functions to foodservice operations with the emphasis on the principles of food production and service in a commercial setting.
<i>Prerequisite(s):</i> (Hafa*2030 or HTM*2030), (Hafa*2700 or HTM*2700)
<i>Equate(s):</i> Hafa*3010 , Hafa*3090 , Hafa*3091/2
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management, B.A.Sc. Applied Human Nutrition.

HTM*3120 Operations Analysis in the Hospitality and Tourism Industry W (3-0) [0.50]
The analysis of operations in the hospitality and tourism industry with the aim of improving productivity of resources will be covered. Specific areas to be studied include the nature of productivity, the use of work study methods, the significance of statistical concepts and the application of operations research techniques.
<i>Prerequisite(s):</i> STAT*2060
<i>Equate(s):</i> Hafa*3120
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management.

HTM*3150 Experiential Learning in the Hospitality Industry U (3-0) [0.50]
An independent program of study formally integrating the student's academic study with a concentrated work experience. The study is to be decided by the student in consultation with the supervisory faculty (normally the department's Co-op Co-ordinator) prior to registration in the course.
<i>Equate(s):</i> Hafa*3150
<i>Restriction(s):</i> Registration in B.Comm. Hafa Co-op. Instructor consent required.

HTM*3160 Destination Management and Marketing F (3-0) [0.50]
This course examines the attractiveness of communities (urban and rural; domestic and international) for visitors and the implications that result from the development of a tourism industry. Methods to encourage visitation are explored as are the attempts to create and manage the development of the community and the tourism industry in a sustainable manner.
<i>Prerequisite(s):</i> 1 of Hafa*3100 , HTM*2050, HTM*3100
<i>Equate(s):</i> Hafa*3160
<i>Restriction(s):</i> Registration in B.Comm. Tourism Management.

HTM*3180 Casino Operations Management W (0-0) [0.50]
The application of business principles, techniques and procedures within the casino management environment. Major topics include: the global and Canadian casino industries, regulation and control, casino accounting and statistics, casino marketing, security and surveillance, human resources, customer service, and specific casino operational management components. Students must be legal age of 19 or over.
<i>Prerequisite(s):</i> (Hafa*2200 or HTM*2200) and (1 of AGE*2230 , BUS*2230, Hafa*3070 , HTM*3070)
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management.

HTM*3200 Club Management Operations U (3-0) [0.50]
This course examines the effective operation and management of private clubs including city clubs, country clubs and athletic clubs. Major topics include: the unique niche that clubs represent in the hospitality industry, the general manager/COO concept, organizational structure of clubs, role of the board of directors, membership requirements, differences between tax-exempt clubs, duties and responsibilities of department heads in private clubs, governmental regulations, preparing for a career in the club field, trends in club management and the future of clubs.
<i>Prerequisite(s):</i> 10.00 credits
<i>Equate(s):</i> Hafa*3200
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management.

HTM*3780 Economics of Food Usage F (3-0) [0.50]
This is an overview of food supply chain management in the food and foodservice industries. The changing patterns in food production, distribution, legislation and consumption habits affecting the economics and use of food in Canada and globally are investigated. (Offered through Distance Education only.)
<i>Prerequisite(s):</i> 1 of FOOD*2010, Hafa*2700 , HTM*2700, MCS*1000
<i>Equate(s):</i> COST*3780 , Hafa*3780

HTM*4050 Wine and Oenology F (2-2) [0.50]
This course provides students with knowledge about the wine industry and will emphasize knowledge about product, purchasing, pricing, and service.
<i>Prerequisite(s):</i> 9.00 credits
<i>Equate(s):</i> Hafa*4050
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management. Students must be of legal drinking age in Ontario.

HTM*4070 Wine, Food and Tourism U (2-2) [0.50]
This course introduces students to the sensory relationship of wine and food and the important role this process has on gastronomic tourism. Course topics will include developing and marketing the wine/food tourism product, wine and food pairing as a hierarchical process, gastronomic identity, Old and New World traditions, and traditional and non-traditional gastronomic marriages.
<i>Prerequisite(s):</i> HTM*3030
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management. Students must be of legal drinking age in Ontario.

HTM*4090 Hospitality and Tourism Facilities Management and Design F,W (3-0) [0.50]
This course will equip an individual to work as a knowledgeable member of a hospitality or tourism organization's design or re-design team. Efficient and effective space utilization for both front-and-back-of-the-house areas, plus a knowledge of how to read professional drawings ("blueprints") will be covered. This course also will provide an understanding of the operation of a physical plant including such elements as systems maintenance, appropriate use of various materials, energy management, life cycle costing, and safety and security issues.
<i>Prerequisite(s):</i> 1 of Hafa*3090 , HTM*3090, Hafa*3091/2
<i>Equate(s):</i> Hafa*4090
<i>Restriction(s):</i> Registration in B.Comm. Hafa, Hafa Co-op or Tourism Management.

HTM*4100 Organizational Behaviour II F,W (3-0) [0.50]

This course is concerned with the structure and dynamics of organizational open systems. It focuses on the external environment, technology, structure (and their interrelationships), organizational culture and change management. It addresses the actions that managers must take to insure that behaviour within the organization aids rather than impedes the achievement of overall organizational goals.

Prerequisite(s): 14.00 credits, (HAF A*2200 or HTM*2200), (HAF A*3000 or HTM*3000)

Equate(s): HAF A*4100

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op, Human Resource Management or Tourism Management.

HTM*4110 Restaurant Operations U (1-7) [0.50]

The management and operation of fine dining restaurants, and the study of major cuisines and classical cookery. Analysis of qualitative aspects of the restaurant business (ambience, total service package, and the dynamic relationship between service and the product of food and wine). Emphasis is placed upon creativity and authenticity in menu formulation, operational performance and guest satisfaction.

Prerequisite(s): 1 of HAF A*3090 , HTM*3090, HAF A*3091/2

Equate(s): HAF A*4110

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management.

HTM*4120 Entrepreneurship in Hospitality and Tourism U (3-0) [0.50]

This course investigates the development of entrepreneurial and intrapreneurial activities in the context of small business development and ownership in the hospitality and food service industries. Major topics include: entrepreneurship, intrapreneurship, business ownership models, business plan development and specific operating factors that influence success as a small business.

Prerequisite(s): 1 of AGE C*2230 , BUS*2230, HAF A*3070 , HTM*3070

Equate(s): HAF A*4120

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management.

HTM*4130 Current Management Topics U (3-0) [0.50]

Principal operating problems in the hospitality and tourism industry are analyzed and discussed using actual case studies. Students should check with the School of Hospitality and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.

Equate(s): HAF A*4130

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management.

HTM*4140 Current Management Topics U (3-0) [0.50]

Principal operating problems in the hospitality and tourism industry are analyzed and discussed using actual case studies. Students should check with the School of Hospitality and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.

Equate(s): HAF A*4140

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management.

HTM*4150 Current Management Topics U (3-0) [0.50]

Principal operating problems in the hospitality and tourism industry are analyzed and discussed using actual case studies. Students should check with the School of Hospitality and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.

Equate(s): HAF A*4150

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management.

HTM*4160 Human Resources Planning W (3-0) [0.50]

Introduces the strategic planning role that human resources professionals play in organizations. Students will confront the challenges and demands of rightsizing, technological change, corporate repositioning, cost containment, productivity improvements, and the consequences of relocation, outplacement and retraining of staff. An understanding of the essential elements of the human resource planning process in organizations will be provided. Students will acquire knowledge in analyzing, assessing and programming for the human resource requirements of organizational, business and strategic plans.

Prerequisite(s): (HAF A*2200 or HTM*2200), (HAF A*3000 or HTM*3000)

Equate(s): HAF A*4160

Restriction(s): Registration in B.Comm. Human Resources Management.

HTM*4170 International Tourism Development and Management W (3-0) [0.50]

This course encourages students to develop a cross-cultural awareness of the objectives and issues regarding the development of tourism as well as the trends that shape the various sectors of the hospitality and tourism industry in every region of the world. Students will be introduced to a variety of multinational tourism policies as well as strategic and structural approaches to the development of the industry through readings, case studies and presentations.

Prerequisite(s): 1 of HAF A*3100 , HTM*2050, HTM*3100

Equate(s): HAF A*4170

Restriction(s): Registration in B.Comm. Tourism Management.

HTM*4190 Hospitality and Tourism Operations Planning F,W (3-0) [0.50]

The course examines management and organization practices as they are applied to typical hospitality and tourism operational issues. Significant decision points and sub-system interrelationships are emphasized.

Prerequisite(s): (HAF A*3070 or HTM*3070), (HAF A*3080 or HTM*3080)

Co-requisite(s): AGE C*3320 or BUS*3320

Equate(s): HAF A*4190

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management.

HTM*4200 Policy Issues in Hospitality and Tourism Management F,W (3-0) [0.50]

An integrative course intended to draw together the several disciplines in which hospitality and tourism management is based. Conceptual, analytical and decision-making skills will be developed through an extensive exposure to case studies.

Prerequisite(s): (AGE C*3320 or BUS*3320), (HAF A*3070 or HTM*3070), (HAF A*3080 or HTM*3080)

Equate(s): HAF A*4200

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management.

HTM*4300 Co-operative Education Seminar F (3-0) [0.50]

An integration of the students' academic studies with their work semester experiences provided by the co-operative program. Emphasis will be placed on students critically evaluating the application of theoretical concepts in different working environments.

Prerequisite(s): Registration in semester 7 of B.Comm. HAF A Co-op.

Equate(s): HAF A*4300

HTM*4390 Individuals and Groups in Organizations F,W (3-0) [0.50]

The course serves as an overview to organizational behaviour. It examines the individual, the group, the organization and how the three interrelate in order to enhance performance and productivity.

Prerequisite(s): 10.00 credits

Equate(s): HAF A*4390

Restriction(s): Not available to students registered in B.Comm. HAF A, HAF A Co-op, Human Resources Management or Tourism Management. Priority Access course. Enrolment is restricted to particular programs or specializations. See department for more information.

HTM*4500 Special Study in Hospitality and Tourism U (3-0) [0.50]

The special study option is designed to provide senior undergraduate students with an opportunity to pursue an independent course of study. The topic selected will be determined by agreement between the student and the faculty member with expertise in the area.

Equate(s): HAF A*4500

Restriction(s): Registration in B.Comm. HAF A, HAF A Co-op or Tourism Management and instructor consent.

Human Kinetics

Department of Human Health and Nutritional Sciences

HK*2100 Anatomy for Artists W (3-3) [0.50]

The structure of the human body will be considered in this course. The limitations imposed by bones, joints and muscle will be explored in relation to capacity of the human figure to move and to express emotion. This course has been designed for students registered in the Studio Arts program. This course can fulfill one of the natural and mathematical sciences requirements for students in SART, but it cannot be used towards the SART major.

Prerequisite(s): SART*2090

Restriction(s): Restricted to Studio Arts majors.

HK*2270 Principles of Human Biomechanics W (3-1) [0.50]

Application of mechanical principles to the study of human movement. Topics include: motion analysis techniques, anthropometrics, biological tissue tolerance, muscle force generation, static and dynamic equilibrium, work/energy and impulse/momentum as they apply to the description of motion, injury of musculoskeletal tissues and optimization of human performance.

Prerequisite(s): PHYS*1000 or PHYS*1080

HK*3100 Neuromuscular Physiology W (3-0) [0.50]

Normal muscle movement is controlled by the motor cortex or by reflexes within the context of the sensory environment. This course will introduce key concepts in motor control of mammalian, human movement, coordination of movement, motor program selection, motor program execution, motor unit recruitment, skeletal muscle excitation-contraction coupling. This course is required for students wishing to gain certification by the Ontario Kinesiology Association.

Prerequisite(s): 1 of BIOM*3100, HK*3940, ZOO*3200

Restriction(s): Restricted to B.Sc., Major in Human Kinetics or Neuroscience Minor.

HK*3401 Human Anatomy F (3-3) [0.75]

First part of the two-semester course HK*3401/2. Refer to HK*3401/2 for course description.

Co-requisite(s): HK*3940 or instructor consent

Restriction(s): Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science. Instructor consent required.

HK*3401/2 Human Anatomy F-W [1.50]

A two-semester lecture and laboratory course in human anatomy which includes a detailed study of the skeleton, upper and lower limbs, thorax, abdomen, pelvis, perineum, head, neck and central nervous system. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*3401 in the Fall semester and HK*3402 in the Winter semester. A grade will not be assigned to HK*3401 until HK*3402 has been completed.

Co-requisite(s): HK*3940 or instructor consent

Restriction(s): Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science. Instructor consent required

HK*3402 Human Anatomy W (3-3) [0.75]

Second part of the two-semester course HK*3401/2. Refer to HK*3401/2 for course description.

Prerequisite(s): HK*3401

HK*3600 Applied Human Biology F (2-3) [0.75]

Laboratory techniques which are central to human biology are covered, together with their underlying concepts. Human performance and function are evaluated through cellular, organic, systemic and whole person studies. The student's technical competence and conceptual understanding are emphasized.

Prerequisite(s): HK*2270

Co-requisite(s): HK*3940 or permission of instructor

Restriction(s): Registration in the Human Kinetics major.

HK*3940 Human Physiology F (6-0) [1.25]

This course consists of a series of lectures, demonstrations and tutorials designed for students desiring a knowledge of physiological concepts as they apply to human beings. The course discusses cellular physiology, neurophysiology, endocrinology, and the physiology of the following systems: cardiovascular, renal, gastrointestinal and respiratory with an emphasis on the regulation of function.

Prerequisite(s): BIOL*2210

HK*4070 Clinical Biomechanics F (2-2) [0.50]

This course covers functional anatomy, neurophysiology and mechanical characteristics of humans at the tissues and whole-body levels. Pathomechanics of human movement resultant from disease, abuse or trauma will be examined. Special emphasis will be placed on etiology, testing and correction of functional disorders with special reference to balance, gait and orthopaedic biomechanics.

Prerequisite(s): ENGG*2660 or (HK*2270, HK*3600)

HK*4230 Advanced Study in Human Biology and Nutritional Sciences S,F,W (3-0) [0.50]

The student will conduct independent literature research of an approved topic to be decided by the student in consultation with a faculty advisor. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): 12.00 credits

Restriction(s): Course coordinator consent required.

HK*4240 Occupational Biomechanics and Ergonomics W (3-2) [0.75]

This course introduces the methods available for reducing musculoskeletal injuries in the workplace. Topics include: biomechanical, psychophysical, physiological, and integrated approaches to performing physical demands analyses, anatomy and etiology of low back injuries and upper limb disorders, principles of redesigning tasks to reduce the risk of injury, pre-employment screening and legislated guidelines. Students apply the course material to ergonomic assessments performed in industrial environments.

Prerequisite(s): 1 of ENGG*1210, HK*3270, (HK*2270, HK*3600)

HK*4320 Work Physiology W (3-3) [0.75]

The adjustments made by the physiological regulatory systems in response to common human activities will be identified and discussed. This will include an examination of limiting factors within each system.

Prerequisite(s): HK*3940 or instructor consent

HK*4360 Research in Human Biology and Nutritional Sciences S,F,W (0-12) [1.00]

The student will select a research topic and design and complete a project in an area of interest, in consultation with a faculty advisor. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): 12.00 credits

Restriction(s): Course coordinator consent required.

HK*4371 Research in Human Biology and Nutritional Sciences II S,F,W (0-6) [0.50]

First part of the two-semester course HK*4371/2. The student will select a research topic and design and complete a project in an area of interest, in consultation with a faculty advisor. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*4371 in the first semester and HK*4372 in the second semester. A grade will not be assigned to HK*4371 until HK*4372 has been completed. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): 12.00 credits

Restriction(s): Course coordinator consent required.

HK*4371/2 Research in Human Biology and Nutritional Sciences II S-F,F-W,W-S [1.00]

The student will select a research topic and design and complete a project in an area of interest, in consultation with a faculty advisor. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*4371 in the first semester and HK*4372 in the second semester. A grade will not be assigned to HK*4371 until HK*4372 has been completed. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): 12.00 credits

Restriction(s): Course coordinator consent required.

HK*4372 Research in Human Biology and Nutritional Sciences II F,W,S (0-6) [0.50]

Second part of the two-semester course HK*4371/2. The student will select a research topic and design and complete a project in an area of interest, in consultation with a faculty advisor. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*4371 in the first semester and HK*4372 in the second semester. A grade will not be assigned to HK*4371 until HK*4372 has been completed. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): HK*4371

Restriction(s): Course coordinator consent required.

HK*4410 Research Concepts F (3-0) [0.50]

An introduction to the research process in modern integrative biology and biomedical sciences. The course explores, through lectures, tutorials and practica, the theory and practice of scientific experimentation and communication.

Prerequisite(s): 12.00 credits

HK*4460 Regulation of Human Metabolism W (3-0) [0.50]

The course focuses on the underlying metabolic events that occur in association with exercise. Skeletal muscle metabolism and substrate delivery are discussed with respect to the intracellular biochemical events integrated with both the endocrine and the chemical aspects of neural mechanisms.

Prerequisite(s): HK*3940, (HK*4320 or NUTR*4210) or instructor consent

HK*4540 Cardio-respiratory Laboratory W (1-2) [0.25]

This lab-based course will provide the student with a knowledge of classical and recent techniques for cardio-respiratory data collection. Cardio-respiratory responses to increased metabolic demand are a major focus. The lab is comprised of regular lab exercises and small group projects.

Prerequisite(s): HK*3940

HK*4550 Human Cardio-respiratory Physiology W (4-0) [0.75]

The central focus is a comprehensive examination of the effects of a variety of work parameters on normal cardio-respiratory adjustments required to meet metabolic demands. Immediate adjustments to increase metabolic rate as well as long term cardio-respiratory adaptability will be discussed.

Prerequisite(s): HK*3940, instructor consent

HK*4610 Health and Injury Biomechanics W (3-2) [0.50]

This course presents an overview of bone and joint function from a biomechanics perspective, within the framework of health and injury. Particular emphasis is placed on the influence of biomechanical signals on the regulation of bone and joint structure and function. Individual diseases, such as osteoarthritis, will be considered as they impact the various tissues of the joint (cartilage, ligament and bone) and the neuromuscular system. The laboratory will provide supplementary material illustrating particular aspects of musculoskeletal function including in vivo and in vitro biomechanical testing. (Offered in odd-numbered years.)

Prerequisite(s): ENGG*3150 or HK*2270

Humanities

College of Arts

HUMN*2100 Renaissance Lovers and Fools W (3-0) [0.50]

In this course, students will read Italian Renaissance plays such as Machiavelli's "The Mandrake" and Bibbiena's "Calandria" with special attention to the portrayals of lovers and fools. The course will place particular emphasis on representations of class and gender relations. Additional readings will provide background and context for the plays. Lectures and texts are in English. This course is offered in conjunction with ITAL*2100. (Offered in odd-numbered years.)

Restriction(s): ITAL*2100, ITAL*3280

HUMN*3020 Myth and Fairy Tales in Germany F (3-0) [0.50]

The course explores the role of mythology, fairy tales and legends in late 18th- and 19th-century German literature and culture in the context of socio-political developments. Topics may include the formation of a national identity, the allegorical fairy tale and its role in Romanticism, women and the fairy tale, the fairy tale and the socialization of children (incl. Disney), romantic mythology in music, art and literature. Authors may include Goethe, Brothers Grimm, ETA Hoffmann, Wagner. Lectures and texts are English. Students registered in GERM*3020 will meet a fourth hour per week to discuss texts in German. This course is offered in conjunction with GERM*3020. (Offered in even-numbered years.)

Prerequisite(s): 5.00 credits

Equate(s): GERM*3020

Restriction(s): GERM*3440, HUMN*3440

HUMN*3100 London Studies in the Humanities W (2-3) [0.50]

An integrated course of studies in the Humanities (including 2 or more of theatre, visual arts, history, music, literature and philosophy) as they relate to London cultural resources. For London Semester students only.

Prerequisite(s): Admission to London Semester.

HUMN*3150 Paris Studies in the Humanities W (2-3) [0.50]

An integrated course of study in the Humanities (including 2 or more of theatre, visual arts, history, music, literature and philosophy) as they relate to Paris cultural resources. For Paris Semester students only.

Prerequisite(s): Admission to Paris Semester.

HUMN*3160 Contemporary Latin American Fiction W (3-0) [0.50]

This course will examine, in English, why and how the leading figures, such as Borges, Cortazar, Garcia Marquez, Carpentier, Isabel Allende, and Luisa Valenzuela have "made" history, not only in the way they have recreated the Latin American historical reality, but also in the way they have reformed the Hispanic literature. Two lectures per week in English and one seminar per week in Spanish. Final essay and examination will be in English, short presentations and compositions will be in Spanish. Students who select the course under the listing of HUMN*3160 will attend the first two hours. They will write a research essay. (Offered in odd-numbered years.)

Equate(s): SPAN*3160

HUMN*3170 Women, Virtue and Honour in Spanish Drama F (3-0) [0.50]

This is a topic-oriented course which will study, in English, major Spanish dramas: seventeenth-century works such as Lope de Vega's Fuenteovejuna, Calderon's Life is a Dream, Tirso de Molina's Don Juan, and twentieth-century plays such as Garcia Forca's The House of Bernarda Alba and Blood Wedding. In addition to the thematic focus, these texts will be studied for their artistic merit and for the specificity of the Spanish "comedia". Where appropriate, this course will also discuss the influence of Spanish themes on the European culture. Students who select the course under the listing of SPAN*3170 will do selected readings and assignments in Spanish.

Equate(s): SPAN*3170

HUMN*3210 Introduction to Polish History and Culture F (6-4) [1.00]

The core course for the Krakow Semester consisting of three major components: 1) Polish language training, 2) a general introduction to Polish geography, politics and contemporary life and, 3) Polish history and the arts. For Krakow Semester students only.

Prerequisite(s): Admission to Krakow Semester.

HUMN*3220 Krakow Studies in the Humanities I F (3-2) [0.50]

An integrated course of studies in the humanities as they relate to the resources of Krakow, Poland. For Krakow Semester students only.

Prerequisite(s): Admission to the Krakow Semester.

HUMN*3230 Krakow Studies in the Humanities II F (3-2) [0.50]

An integrated course of studies in the humanities as they relate to the resources of Krakow, Poland. For Krakow Semester students only.

Prerequisite(s): Admission to the Krakow Semester.

HUMN*3240 India Studies in the Humanities W (3-0) [0.50]

An integrated course of studies in the humanities as they relate to India. This course looks at selected aspects of one or more areas in the humanities, including Indian religions, philosophy, literature (in English), history, language (Hindi), art and music. For India Semester students only.

Prerequisite(s): Admission to the India Semester.

HUMN*3300 Latin American Studies in the Humanities W (1-2) [0.50]

An integrated course of studies in the humanities as they relate to the resources of Latin America.

Prerequisite(s): Admission to the Latin America semester, consent of the instructor and satisfactory participation in a bi-weekly preparation seminar during the fall semester.

HUMN*3450 20th Century German Literature and Film F (3-0) [0.50]

This course considers significant social, political, and artistic events and movements of the 20th century in German-speaking countries as reflected in film and literature. Topics may include fin de siècle, expressionism, decadence, gender relations, National Socialism, holocaust, GDR, war, post-war society. Filmmakers may include R. W. Fassbinder, S. Kubrik, F. Lang, L. Visconti, V. Schlöndorff. Authors may include T. Mann, F. Kafka, C. Wolff, H. Hesse. Lectures and texts are in English. Students who wish for a German credit must register for GERM*3450. (Offered in odd-numbered years.)

Prerequisite(s): 5.00 credits

Equate(s): GERM*3450

HUMN*3460 Women in 18th & 19th Century German Lit. W (3-0) [0.50]

This course is a study of changing images and social roles of women as represented in literary texts by and about women. It will consider the contribution of women to the literary life and cultures of German speaking countries and explore myths and misconceptions regarding women by addressing questions of image and reality. Lectures and texts are in English. Students who want a German credit must be registered in GERM*3460. (Offered in even-numbered years)

Prerequisite(s): 5.00 credits

Restriction(s): GERM*3460

HUMN*3470 Holocaust & WWII in German Lit. & Film W (3-0) [0.50]

This course focuses on texts and films pertaining to World War II and the Holocaust, the development of the thoughts and the language of genocide, and the representation of the Holocaust in literature and films. The objective is to gain an understanding of the ideas and emotions underlying ethnocentrism and anti-Semitism, and to consider artistic responses to the experience of persecution and mass-murder. Lectures and discussions are in English. Lectures and discussions are in English. Students who wish for a German credit must register for GERM*3470. (Offered in odd-numbered years.) (First offering - Winter 2009)

Prerequisite(s): 5.00 credits

Restriction(s): GERM*3470

HUMN*3501 Independent Interdisciplinary Research Project F (3-0) [0.50]

First part of the two-semester course HUMN*3501/2. Refer to HUMN*3501/2 for course description.

Restriction(s): Instructor consent required.

HUMN*3501/2 Independent Interdisciplinary Research Project F-W [1.00]

A two-semester course designed for students enrolled in the B.A. program in 1 of the College of Arts disciplines. Students in a general program with no major must seek the approval of the B.A. program counsellor. Students will prepare proposals for independent research projects spanning 2 or more disciplines, at least 1 of which must be from the College of Arts, and arrange for faculty members representing at least 2 of these disciplines to provide supervision. Projects are subject to the approval of the department(s) or school(s) concerned and must be submitted to the appropriate chair(s) or director(s) by the end of the course selection period prior to beginning the course. Subject to approval, this course may be accepted as credit towards an honours major in Art History, Drama, English, Studio Art, French, History, German, Italian, Spanish, Classical Languages, Classical Studies, Music and Philosophy. This is a two-semester course offered over consecutive semesters. When you select it you must select HUMN*3501 in the Fall semester and HUMN*3502 in the Winter semester. A grade will not be assigned to HUMN*3501 until HUMN*3502 has been completed.

HUMN*3502 Independent Interdisciplinary Research Project W (3-0) [0.50]

Second part of the two-semester course HUMN*3501/2. Refer to HUMN*3501/2 for course description.

HUMN*4170 Don Quixote and the Picaresque Novel F (3-0) [0.50]

This course will study, in English, the importance of this Spanish masterpiece in the development of the modern European novel, and it will examine the first European picaresque work, *Lazarillo de Tormes*, in the light of the picaresque tradition which followed in Europe and the Americas. The course will also concentrate on the notion of play and laughter (Bakhtin) as means of survival. Students who select the course under the listing of SPAN*4170 will do selected readings and assignments in Spanish.

Equate(s): SPAN*4170

Interdisciplinary Physical Science

IPS*4001 Chemical Physics Research Project F (0-9) [0.75]

First part of the two-semester course IPS*4001/2. Refer to IPS*4001/2 for course description.

Prerequisite(s): (CHEM*3870 or CHEM*4880), PHYS*3100 (of which CHEM*3870 may be taken concurrently)

Restriction(s): Instructor consent required.

IPS*4001/2 Chemical Physics Research Project F-W [1.50]

A two-semester research project supervised by a faculty member from Physics or from Chemistry and Biochemistry, or by a pair of faculty members spanning the 2 departments in order to expand cross disciplinary opportunities. Students will participate in the seminar and reporting activities of either CHEM*4900, CHEM*4910 or PHYS*4500, PHYS*4510, and may utilize modules from PHYS*4500 as preparation if necessary. This is a two-semester course offered over consecutive semesters. When you select it you must select IPS*4001 in the Fall and IPS*4002 in the Winter semester. A grade will not be assigned to IPS*4001 until IPS*4002 has been completed.

Prerequisite(s): (CHEM*3870 or CHEM*4880), PHYS*3100 (of which CHEM*3870 may be taken concurrently)

Restriction(s): Instructor consent required.

IPS*4002 Chemical Physics Research Project W (0-9) [0.75]

Second part of the two-semester course IPS*4001/2. Refer to IPS*4001/2 for course description.

Prerequisite(s): IPS*4001

Interdisciplinary Social Science

College of Social and Applied Human Sciences

ISS*2000 Asia U (3-0) [0.50]

This course will survey China and/or India, noting the major historical trends, cultural factors, economic systems, and political institutions and political processes. Department of Political Science.

ISS*2500 Management in Organizations W (3-0) [0.50]

A first course in management designed to consider the management of any organization whether profit-motivated or non-profit, private or public, from the perspective of the social sciences. School of Hospitality and Tourism Management.

Restriction(s): HTM*2200

ISS*2990 Introduction to Marx W (3-0) [0.50]

An interdisciplinary course designed to acquaint students with the thought of Karl Marx. Departments of History, Philosophy, Political Science and Sociology and Anthropology.

ISS*3100 London Studies in the Social Sciences W (2-3) [0.50]

An integrated course of studies in the social sciences as they relate to the resources of London. For London Semester students only.

Restriction(s): Admission to the London Semester.

ISS*3150 Paris Studies in the Social Sciences W (2-0) [0.50]

An integrated course of studies in the social sciences as they relate to the resources of Paris. For Paris Semester students only.

Restriction(s): Admission to the Paris Semester.

ISS*3250 Krakow Studies in the Social Sciences I F (3-2) [0.50]

An integrated course of studies in the social sciences as they relate to the resources in Krakow, Poland. For Krakow students only.

Restriction(s): Admission to the Krakow Semester.

ISS*3260 Krakow Studies in the Social Sciences II F (3-2) [0.50]

An integrated course of studies in the social sciences as they relate to the resources in Krakow, Poland. For Krakow students only.

Restriction(s): Admission to Krakow Semester.

ISS*3270 India Studies in the Social Sciences W (3-0) [0.50]

An integrated course of studies in the social sciences as they relate to India. This course looks at selected aspects of one or more areas in the social, geographic, economic and political aspects of Indian society. For India Semester students only.

Restriction(s): Admission to the India Semester.

ISS*3300 Latin American Studies in the Social Sciences W (1-2) [0.50]

An integrated course of studies in the social sciences as they relate to the resources of Latin America.

Restriction(s): Admission to the Latin America semester, consent of the instructor and satisfactory participation in a bi-weekly preparation seminar during the fall semester.

ISS*3420 Women Social and Political Theorists W (3-0) [0.50]

The writings of seventeenth and nineteenth century women social and political theorists will be explored as contributing to the development of classical and contemporary social and political theory. These women wrote on status of women and gender role issues as well as dealing with such fundamental matters as the nature and origin of society/social contract, political rights and obligations, government, constitutional change, revolution, slavery, socialism, the welfare state, imperialism and racism. An important feature of the course would be to show women theorists' contributions on central political interests and the integration of gender issues with those of class and race. Department of Sociology and Anthropology and Department of Political Science.

Prerequisite(s): SOAN*2111/2 or POLS*2000

Restriction(s): Not available to students in Anthropology, Criminal Justice & Public Policy or Sociology areas of study.

ISS*4000 Research Project in Environmental Studies F,W (3-0) [0.50]

This course is required of all senior students in the Environmental Studies Minor. It provides an opportunity to formulate and investigate an issue of environmental concern from an integrative human and biophysical perspective. Students must consult with the Environmental Studies co-ordinator before course selection. Department of Geography.

Restriction(s): Registration in the Environmental Studies minor and 4.00 credits in the minor.

Interdisciplinary University

UNIV*3500 , UNIV*3550 and UNIV*4500 are re-numbered and now appear under Environmental Design and Rural Development (EDRD)

UNIV*1200 First Year Seminar W (3-0) [0.50]

First Year Seminars are interdisciplinary courses designed especially for first year students. The goal of the First Year Seminar course is to provide opportunities for students to participate in small enrolment, discussion-oriented classes in their first year. Different seminar topics are offered each year in each separate course section, reflecting the particular research or professional interest of the course instructor. The seminar course counts as a free elective in the student's Schedule of Studies. For information about how the seminar courses may in some cases fulfil particular program distribution requirements, students should contact their program counsellor. A list of current and archived offerings is available by following the links on the First Year Seminars web page.

Restriction(s): Fewer than 5.00 credits.

UNIV*1250 Experiential Learning Opportunity I: Peer Helper U (0-0) [0.00]

Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will not be assigned to UNIV*1250 until UNIV*1260 has been completed. Students who wish to enroll in this course should see Student Life and Career Services for more information.

Restriction(s): Instructor consent required and acceptance in the Peer Helper program.

UNIV*1260 Experiential Learning Opportunity II: Peer Helper U (0-0) [0.00]

Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will be assigned at the end of the completion of both UNIV*1250 and UNIV*1260. Student who wish to enroll in this course should see Student Life and Career Services for more information.

Prerequisite(s): UNIV*1250

UNIV*2000 Foundations of Leadership W (3-0) [0.50]

Using an integrated approach to studying leadership, this foundation course covers history, evolving theories, models, and research both from a theoretical point of view and practical application. This course will use a seminar style with applied workshops, class discussions, guest speakers, and student participation. Students will prepare elements of a skills portfolio and a research paper. This is a required course for the Certificate in Leadership. (Offered through distance education format only.)

Restriction(s): Instructor consent required.

UNIV*2050 Environmental Perspectives and Human Choices I F (3-0) [0.50]

An interdisciplinary approach to environmental issues which offers opportunities to investigate social processes and philosophical considerations with respect to the position and influence of humankind, and the development of social conditions, values and economic activities that have led to our present situation. These investigations are carried out within the context of physical environmental considerations, such as the state of the earth, forests, air water and our use of energy, and will lead the student to a detailed consideration of the future. (Offered through distance education format only.)

UNIV*2250 Experiential Learning Opportunity III: Peer Helper U (0-0) [0.00]

Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will not be assigned to UNIV*2250 until UNIV*2260 has been completed. Students who wish to enroll in this course should see Student Life and Career Services for more information.

Prerequisite(s): UNIV*1250, UNIV*1260

UNIV*2260 Experiential Learning Opportunity IV: Peer Helper U (0-0) [0.00]

Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail will be assigned at the end of the completion of both UNIV*2250 and UNIV*2260. Students who wish to enroll in this course should see Student Life and Career Services for more information.

Prerequisite(s): UNIV*2250

UNIV*3010 University Studies in London I S (3-0) [0.50]

An intensive and integrated course of study in the arts, social sciences and/or sciences as they relate to the resources of London. For London Summer Session students only.

Prerequisite(s): Admission to the London Summer Session.

UNIV*3020 University Studies in London II S (3-0) [0.50]

An intensive and integrated course of study in the arts, social sciences and/or sciences as they relate to the resources of London. For London Summer Session students only.

Prerequisite(s): Admission to the London Summer Session.

UNIV*3150 University Studies in Paris I W (2-3) [0.50]

An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.

Prerequisite(s): Admission to the Paris Semester.

UNIV*3160 University Studies in Paris II W (2-3) [0.50]

An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.

Prerequisite(s): Admission to the Paris Semester.

UNIV*3170 University Studies in Paris III W (2-3) [0.50]

An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.

Prerequisite(s): Admission to the Paris Semester.

UNIV*3250 Environmental Perspectives and Human Choices II W (3-0) [0.50]

The complexity and dimensions of key environmental issues introduced in UNIV*2050 are explored in greater detail. This will facilitate the student's ability to critically evaluate socio-economic-environmental linkages between contemporary challenges such as sustainable resources, energy, human population, education and communication, and environmental ethics. Supplementary voluntary workshop. (Offered through distance education format only.)

Prerequisite(s): UNIV*2050

UNIV*4000 Leadership Capstone W (3-0) [0.50]

Changes taking place in organizations and work, and the advanced level, general skills needed by university graduates in the workplace will be explored. In addition, transition issues, such as the change from the role of 'student' to 'employee' or 'entrepreneur', will be examined. Based on experience in their leadership placements, students will examine the relationships between leadership theory and practice. Students will be encouraged to study leadership issues that relate to professions in the disciplines. They will work on an action project that will involve researching creative approaches to leadership issues. This is a required course for the Certification Leadership. (Offered through distance education format only.)

Prerequisite(s): UNIV*2000 plus 120 hours of placement experience.

Restriction(s): Instructor consent required.

Integrative Biology

IBIO*4010 Adaptational Physiology W (3-0) [0.50]

This course examines adaptations of organisms to various aquatic and terrestrial environments. A mechanistic approach will be used to establish the strategies (anatomical, physiological, biochemical) of environmental adaptation. Examples will include adaptations of deep-sea and polar organisms, adaptations to salinity and desiccation challenges, oxygen availability, sensory adaptations and symbiotic adaptations.

Prerequisite(s): ZOO*3210

Restriction(s): ZOO*4390 , ZOO*4560

IBIO*4500 Research in Integrative Biology I F,W (1-5) [0.75]

The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

Equate(s): ZOO*4490 , ZOO*4500 , BOT*4820

Restriction(s): Normally a minimum cumulative average of 70% in the biology courses during the first 6 semesters of a major in the College of Biological Science. Instructor consent required.

IBIO*4510 Research in Integrative Biology II F,W (1-5) [0.75]

The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

Prerequisite(s): IBIO*4500

Equate(s): ZOO*4510 , BOT*4830

Restriction(s): Normally a minimum cumulative average of 70% in the biology courses during the first 6 semesters of a major in the College of Biological Science. Instructor consent required.

International Development

IDEV*2010 International Development Studies W (3-0) [0.50]

An introduction to a broad range of topics in international development as studied by various researchers and from perspectives of different social-science disciplines. Special emphasis will be placed on research arising from the seven areas of emphasis in the undergraduate CIDS program, the integration of diverse disciplines and paradigms, and the implications for public policy. Students in the International Development major should complete this course before semester five. Students who do not have the stated prerequisites may seek approval from the faculty advisor for International Development to enroll.

Prerequisite(s): (ANTH*1150 or ECON*1050), (POLS*2080 or ENVS*2010)

Restriction(s): Registration in the International Development major, minor or area of concentration or in the Development & Stewardship area of concentration for B.Sc.(Env.) or in the International Trade and Development area of emphasis for B.A.APEC.

IDEV*3010 Case Studies in International Development W (3-0) [0.50]

An in-depth examination of select case studies in international development.

Prerequisite(s): 10.00 credits including IDEV*2010

Restriction(s): Registration in B.A. International Development major. 68% average in all course attempts in the International Development core.

IDEV*3200 Individual Work/Study in International Development S,F,W (3-0) [0.50]

This course is intended for students who seek to combine work and study in development with their academic course work. It may be used in connection with internships or work at international development agencies or other appropriate businesses and organizations (in Canada and abroad), for research and/or experience in a developing country, or for other practica or programs. Any faculty member at the University of Guelph with appropriate expertise may supervise the work/study project. In each case, the student and faculty member will agree on an outline of the work/study project and evaluation criteria. In all cases the project will involve a writing component.

Prerequisite(s): 10.00 credits

Restriction(s): Written approval of the faculty advisor for International Development.

IDEV*4190 Regional Context S,F,W (1.5-0) [0.25]

In this course students will learn about a region that they intend to study further in an advanced work/study project (IDEV*4200) or in a structured semester abroad. It may be offered as a reading course or as a seminar.

Prerequisite(s): 10.00 credits including IDEV*2010

Restriction(s): Written approval of the faculty advisor for International Development.

IDEV*4200 Advanced Work/Study in International Development S,F,W (3-0) [0.75]

Individual work/study option at an advanced level. See IDEV*3200 for course description.

Prerequisite(s): IDEV*4190

Restriction(s): Written approval of the faculty advisor for International Development.

IDEV*4500 International Development Seminar F,W (3-0) [0.75]

This course brings together students in international development in their final year of study to examine key debates and to integrate knowledge from different areas of emphasis in the specialization. Students draw from a variety of disciplinary and inter-disciplinary perspectives in lectures, text-based seminars and in reaction to guest speakers. In addition, students develop and present research projects which focus theoretical insight on practical concerns.

Prerequisite(s): 15.00 credits

Restriction(s): Registration in B.A. International Development major. 68% average in all course attempts in the International Development core. Written approval of the faculty advisor for International Development.

Italian Studies

School of Languages and Literatures

Note: Literary texts are, at all levels, studied in the original language. Students registering in these courses will be expected to have the appropriate knowledge.

ITAL*1060 Introductory Italian I F (3-1) [0.50]

A beginning course in Italian providing the fundamentals of grammar, structure and idiom. Introduction to aspects of Italian life and culture through audio-visual aids. (This course may not be taken by students who have credit for OAC Italian or equivalent.)

ITAL*1070 Introductory Italian II W (3-1) [0.50]

This course is a continuation of ITAL*1060. In addition to basic grammar and composition, texts from contemporary culture are introduced. (This course may not be taken by students who have OAC Italian or equivalent.)

Prerequisite(s): ITAL*1060

ITAL*2060 Intermediate Italian I F (3-0) [0.50]

Italian grammar and syntax, composition and translation.

Prerequisite(s): ITAL*1070 or OAC Italian

ITAL*2070 Intermediate Italian II W (3-0) [0.50]

Continuation of ITAL*2060. Increased emphasis on composition and translation.

ITAL*2100 Renaissance Lovers and Fools W (3-1) [0.50]

In this course, students will read Italian Renaissance plays such as Machiavelli's "The Mandrake" and Bibbiena's "Calandria" with special attention to the portrayals of lovers and fools. The course will place particular emphasis on representations of class and gender relations. Additional readings will provide background and context for the plays. Lectures and texts are in English. Students registered in ITAL*2100 will meet a fourth hour per week to discuss texts in Italian. This course is offered in conjunction with HUMN*2100. (Offered in odd-numbered years.)

Prerequisite(s): ITAL*1070 or permission of instructor

Restriction(s): ITAL*3280, HUMN*2100

ITAL*3060 Advanced Italian F (3-0) [0.50]

A seminar course in Italian grammar and syntax, composition and translation. (Offered in odd-numbered years.)

Prerequisite(s): ITAL*2070

ITAL*3150 Medieval Italian Literature F (3-0) [0.50]

A study of Dante, Petrarch, and Boccaccio. (Offered in even-numbered years.)

Prerequisite(s): ITAL*2070

ITAL*3200 Novels of Resistance W (3-0) [0.50]

In this course, students will read Italian novels such as Alberto Moravia's "Gli indifferenti", Italo Calvino's "Il sentiero dei nidi di ragno", and Dacia Maraini's "Donna in guerra" with particular attention to the theme of resistance. The course will consider representations of fascism, patriarchy, and the bourgeois ethos and the ways in which writers envision the possibility of resistance to them. (Offered in even-numbered years.) (First offering is Winter 2008.)

Prerequisite(s): ITAL*2070 or permission of instructor

Restriction(s): ITAL*2350

ITAL*3950 Topics in Italian Literature F,W (3-0) [0.50]

Aspects of Italian literature. Each offering will treat a particular topic such as early texts in the Vernacular, Commedia dell'Arte, Eighteenth-Century Drama, realism in Italian Literature, the poetry of Montale, Ungaretti, and Saba. (Offered in even-numbered years.)

ITAL*3960 Topics in Italian Literature F,W (3-0) [0.50]

Aspects of Italian literature. Each offering will treat a particular topic such as early texts in the Vernacular, Commedia dell'Arte, Eighteenth-Century Drama, realism in Italian Literature, the poetry of Montale, Ungaretti, and Saba. (Offered in even-numbered years.)

ITAL*3970 Topics in Italian Literature F,W (3-0) [0.50]

Aspects of Italian literature. Each offering will treat a particular topic such as early texts in the Vernacular, Commedia dell'Arte, Eighteenth-Century Drama, realism in Italian Literature, the poetry of Montale, Ungaretti, and Saba. (Offered in even-numbered years.)

ITAL*4900 Research Paper in Italian Studies F,W (3-0) [0.50]

This is the equivalent of a semester course. A research project on some aspect of Italian language, literature, or thought. The topic must be approved by the section; the paper will be written under the regular guidance of a faculty advisor.

Prerequisite(s): Restricted to the 6th semester in the Italian honours program.

Landscape Architecture

School of Environmental Design and Rural Development

LARC*1100 Design and Communications Studio F (3-3) [0.75]

An introduction to the physical design professions with emphasis on the role of landscape architects. Emphasis on development of design awareness, process, communication skills and creativity.

Prerequisite(s): Registration in the B.L.A. program.

Restriction(s): Instructor consent required.

LARC*1210 Graphic Communication W (2-4) [0.50]

The communication process and its application to landscape architectural design are introduced. This course includes skills and techniques of graphic communication, from study sketches to final presentation drawings and media ranging from pencil graphics to multi-media presentations.

Restriction(s): Registration in the B.L.A. program.

LARC*1950 History of Cultural Form I F (4-0) [0.50]

This course explores the cultural form expressed in landscapes from ancient times to the 18th century Romantic movements. (Offered through distance education format only.)

LARC*2020 Design Studio W (2-4) [0.75]

An examination of the theory, process and vocabulary of spacial design. An exploration of the social, psychological, and behavioural forces a designer must respond to. An introduction to landscape analysis.

Prerequisite(s): LARC*1100

Restriction(s): Registration in the B.L.A. program.

LARC*2100 Landscape Analysis F (2-2) [0.50]

A study of biophysical factors and their influence on design. Including soils, climate, vegetation, hydrology, and fauna. Natural and cultural systems interpretation, site assessment methods, and data presentation techniques will be outlined. Students will formulate and conduct site assessments that include resource inventories and the analysis for land use suitability.

Prerequisite(s): BIOL*1030, LARC*2020

Co-requisite(s): LARC*3040 or registration in the U.L.M. B.Sc. (Agr.) program and 5.00 credits

LARC*2330 Planting Design I W (1-2) [0.25]

Visual and physical characteristics of plants and their use. Design theory and its application at a site specific scale. Study of the use of plants in a wide range of applications.

Co-requisite(s): LARC*2020

LARC*2340 Planting Design II F (1-2) [0.25]

Visual and physical characteristics of plants and their use. Design theory and its application at a site specific scale. Study of the use of plants in a wide range of applications.

Prerequisite(s): LARC*2330

LARC*2410 Site Engineering F (3-1) [0.50]

A focus on contour grading to facilitate circulation, stormwater runoff, and design intent. Aspects of surveying, plotting, as well as runoff and cut and fill calculations.

Prerequisite(s): LARC*2020, LARC*2420

LARC*2420 Materials and Techniques W (3-0) [0.50]

The study of materials commonly used for landscape construction. Specification of procedures and materials for contractual purposes. Detail drafting.

Prerequisite(s): LARC*1100

LARC*2820 Urban and Regional Planning W (3-0) [0.50]

Introduction to the evolution and history of planning and its conceptual base. A study of the theoretical foundations of planning. Emphasis on the Canadian scene and on Canadian planning literature.

LARC*2950 History of Cultural Form II W (4-0) [0.50]

This course follows History of Cultural Form I (LARC*1950) and explores the cultural form of 19th century reform period through to contemporary design developments. (Offered through distance education format only.)

LARC*3040 Site Planning and Design Studio F (2-4) [0.75]

Application of the site planning process, including programming, site analysis, functional analysis and diagramming. Application of design theory and landscape analysis to site design.

Prerequisite(s): LARC*2020

Co-requisite(s): HORT*3260, LARC*2100

LARC*3050 Landscape Architecture I W (2-4) [0.75]

Lectures and projects emphasizing the integration of design theory, skills and knowledge using site scale and urban design projects. Highlighting the use of contemporary history.

Prerequisite(s): LARC*3040

LARC*3060 Landscape Architecture II F (2-4) [0.75]

Application of the landscape architectural design process to conservation, development and rehabilitation of landscapes. Projects at an intermediate scale focusing on biophysical, cultural and visual resources as primary design determinants. Emphasis on secondary research, analysis, program development, alternative concepts and design master planning.

Prerequisite(s): LARC*3050

LARC*3070 Landscape Architecture III F (2-6) [1.00]

Exercises in regional scale design and master planning to provide an understanding of the integrative design process that considers ecological, technological, socio-economic, human and aesthetic factors in the land development process. Projects focus on land planning, community design, urban design, and public involvement and communication.

Prerequisite(s): LARC*3060

LARC*3430 Landscape Construction I W (2-4) [0.50]

Lectures and studio exercises that integrate construction documentation with design. The technical procedures needed to direct design implementation including layout, grading, utility design, and planting plans.

Prerequisite(s): LARC*2410

LARC*3440 Landscape Construction II F (2-4) [0.75]

Production of construction drawings, documents and cost estimates using computer and manual techniques.

Prerequisite(s): LARC*3430

Co-requisite(s): LARC*3060

LARC*3500 Independent Study S,F,W (0-6) [0.50]

Each student establishes, in consultation with the faculty member chosen, the content of special study within the area of expertise of that instructor.

Prerequisite(s): LARC*3040

LARC*4090 Seminar W (3-0) [0.50]

An integrated overview of professional issues involving practice, ethics, environmental concerns, government policy, research needs and professional responsibilities to society. Emphasis on writing and oral presentations.

Prerequisite(s): LARC*3060

LARC*4101 Design Thesis F (1-2) [0.50]

First part of the two-semester course LARC*4101/2. Refer to LARC*4101/2 for course description.

Prerequisite(s): LARC*3050, LARC*3440

LARC*4101/2 Design Thesis F-W [1.50]

The fall semester consists of the study of research methods, research, writing and presentations on individually selected topics. The student uses this work to complete an individual landscape design or planning project in the winter. Each student is to integrate the knowledge and demonstrate the skills acquired in preceding courses in a professional manner. This is a two-semester course offered over consecutive semesters. When you select it you must select LARC*4101 in the first semester and LARC*4102 in the second semester. A grade will not be assigned to LARC*4101 until LARC*4102 has been completed.

Prerequisite(s): LARC*3050, LARC*3440

LARC*4102 Design Thesis W (2-6) [1.00]

Second part of the two-semester course LARC*4101/2. Refer to LARC*4101/2 for course description.

Prerequisite(s): LARC*4101

LARC*4520 Park and Recreation Administration W (3-0) [0.50]

A study of the major objectives, policies and administrative practices of the principal park and recreation agencies at various levels of government, with an emphasis on trends and implications for future roles and administrative policies of these agencies. (Offered in odd-numbered years.)

Prerequisite(s): 1.00 credits at the 2000 level in social sciences or three semesters of the B.L.A. program

LARC*4610 Professional Practice F (3-0) [0.50]

Lectures and assignments dealing with professional ethics, organizations, contract law and procedures, relationships with clients, contractors and professional practitioners, office procedure and professional promotion practices and trends.

Prerequisite(s): LARC*3050

LARC*4620 Internship in Landscape Architecture S,F,W (0-10) [1.00]

An experiential learning opportunity requiring professional office experience and faculty supervision under program regulations. Actual work experience for academic credit. Students are required to submit a project or paper as part of the course requirements.

Prerequisite(s): LARC*3060, LARC*3440

LARC*4730 Special Study in Landscape Architecture F (0-4) [0.50]

Supervised independent study involving competitions, special projects, modules, and other formats.

Prerequisite(s): LARC*3050

LARC*4740 Case Studies S,F,W (0-6) [0.50]

Travel and field studies of selected projects as approved by a faculty member. Students are required to submit a project or paper.

Prerequisite(s): LARC*3040

Latin

School of Languages and Literatures

Note: Literary texts are, at all levels, studied in the original language. Students registering in these courses will be expected to have the appropriate knowledge. Higher level courses in Latin are available as language modules attached to selected Classical Studies courses which are taken as double-weighted courses. (See Classical Studies course descriptions.)

LAT*1100 Preliminary Latin I F (3-0) [0.50]

A beginning course in Latin providing the fundamentals of structure and grammar. (This course may not be taken by anyone who has OAC Latin).

LAT*1110 Preliminary Latin II W (3-0) [0.50]

A continuation of LAT*1100.

Prerequisite(s): LAT*1100 or Year 4 (Grade 12) Latin

LAT*2000 Latin Literature F (3-0) [0.50]

A course in Latin literature based on relevant texts.

Prerequisite(s): OAC Latin or LAT*1100

LAT*4100 Directed Readings in Latin Literature F (3-0) [0.50]

A reading course in Latin Literature designed according to the needs and the interests of the individual student.

Prerequisite(s): CLAS*3060 or CLAS*3120

LAT*4150 Research Paper: Latin F,W (3-0) [0.50]

A major essay on an area of study to be determined in consultation with the Classics Faculty in the School.

Prerequisite(s): CLAS*3060 or CLAS*3120

Linguistics

School of Languages and Literatures

LING*1000 Introduction to Linguistics W (3-0) [0.50]

The nature of language. An elementary survey of linguistic disciplines. Phonetics, morphology, syntax, semantics, language, and society.
--

Marketing and Consumer Studies

Department of Marketing and Consumer Studies

For courses without semester designations, please check with the department. Advance schedules are available in the department.

MCS*1000 Introductory Marketing S,F,W (3-0) [0.50]

An examination of the process of analyzing, planning, implementing, coordinating, and controlling programs involved in the conception, pricing, promotion, and distribution of products, services, and ideas designed to create and maintain beneficial exchanges with target markets for the purpose of achieving public and private organizational objectives. (Also offered through distance education format.)

Equate(s): COST*1000

Restriction(s): This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information. This course may not be taken for credit subsequent to receiving credit in AGE*4370 or HTM*3080.

MCS*1400 Introduction to Design W (3-0) [0.50]

Designed to increase visual awareness and recognition of natural and planned design elements in the environment. Investigation of the roles of designers and an understanding of design as an applied process that responds to human needs.

Equate(s): COST*1400

Restriction(s): This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information.

MCS*1820 Real Estate and Housing F (3-0) [0.50]

This survey course acquaints students with the theories, practices and principles of real estate and housing. Topics include how real estate assets and markets differ from other assets, government involvement in the housing and real estate sectors, non-market housing in Canada, financing real estate, and development.

Equate(s): COST*1820

Restriction(s): COST*1800

MCS*2000 Business in a Changing World F (3-0) [0.50]

This course provides marketing students with an overview of business today by reviewing and discussing key issues (such as business ethics and globalization), key business functions (such as finance, human resources, operations management and marketing), and the components of a business plan. Weekly lectures are supplemented by discussions of business cases and hand-in assignments designed to introduce students to basic business skills (such as business math and decision-making). (First offering - Fall 2008)

Prerequisite(s): 2.50 credits

Restriction(s): Registration in the B.Comm. Marketing Management major.

MCS*2020 Information Management S,F,W (3-0) [0.50]

Introduces the concepts and principles of information acquisition, manipulation and management as relevant to organizational decision-making. Provides experience in the evaluation of information technology applications used in organizations. Students with credit for this course may not proceed to CIS*1000, CIS*1200.

Prerequisite(s): 5.00 credits

Equate(s): COST*2020

Restriction(s): This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information. Not available to students registered in B.Comp program or CIS majors and minors.

MCS*2100 Personal Financial Management S (3-0) [0.50]

An introductory course designed to meet the professional needs of those in teaching, counselling and community service, as well as personal goals in financial management.

Prerequisite(s): 5.00 credits

Equate(s): COST*2100

MCS*2600 Fundamentals of Consumer Behaviour F,W (3-0) [0.50]

In the long run organizations survive and achieve their goals by satisfying the needs and wants of consumers as well as or better than their competitors. This course examines consumer behaviours, the economic, social, cultural and psychological factors related to consumer behaviours, the evolution and change in behaviours and relationships, and the ways in which consumers respond to stimuli employed in the marketing of products, services and ideas.

Prerequisite(s): (1 of MCS*1000, HAFA*1000, HTM*1000), (1 of PSYC*1100, PSYC*1200, SOC*1100)

Equate(s): COST*2600

Restriction(s): This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information.

MCS*2820 Real Estate Finance W (3-0) [0.50]

This course examines the financing of both residential and commercial investment real estate. A mathematical approach is used to examine the impact of various lender and borrower decisions about loan terms (amortization periods, pre-payment options, etc.). The evolution of the Canadian housing finance system is contrasted with that in the United States. New methods of financing real estate other than traditional mortgages are discussed.

Prerequisite(s): 5.00 credits

Equate(s): COST*2820

MCS*2850 Service Learning in Housing F (3-0) [0.50]

The intent of this course is to provide an introduction to ethics and social capital as they apply to the housing and real estate industries. Students will be required to participate in a 10-15 hour service learning exercise where they volunteer for a frontline housing agency/provider. They will then share their experiences with their classmates during the final week of classes.

Prerequisite(s): 5.00 credits

Equate(s): COST*2850

Restriction(s): MCS*2810

MCS*3010 Quality Management W (3-0) [0.50]

Lectures will include general concepts and expectations of quality assurance from consumer, government, managerial and technological points of view and discuss the relationship of national and international groups concerned with quality assurance. Seminars apply concepts to selected products and services.

Prerequisite(s): 10.00 credits including 0.50 credits in statistics

Equate(s): COST*3010

Restriction(s): This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information.

MCS*3020 Services Marketing F,W (3-0) [0.50]

Global economies today are largely dominated by the service industry. This course examines the problems facing leaders of service organizations. The course concentrates on areas such as developing service strategy, value creation, service performance measurement, and the impact of globalization and e-business.

Prerequisite(s): 10.00 credits including 1 of AGE*4370, MCS*1000, HAFA*3080, HTM*3080

Equate(s): COST*3020

Restriction(s): This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information.

MCS*3030 Research Methods F,W (3-0) [0.50]

This course examines the concepts, principles and practices for consumer, market and product development research processes. Topics include research problem definition, research objectives, research design, measurement, sampling methods, execution and research management, analysis and interpretation, and report writing. (Also offered through distance education format.)

Prerequisite(s): STAT*2060 or STAT*2090

Equate(s): COST*3030

Restriction(s): Registration in the B.Comm. Marketing Management Major, regular or co-op, Housing and Real Estate Management Major, regular and co-op, or the B.A. Marketing Management Minor.

MCS*3040 Business and Consumer Law F,W (3-0) [0.50]

This course introduces students to statutory and common law concerning business and consumer transactions. An overview of the laws of contracts and torts forms the basis of business and producer/consumer relationships. Discussion topics include sale of goods and consumer protection legislation; debtor-creditor relations; competition law; intellectual property rights and manufacturers' product liability.

Prerequisite(s): 5.00 credits

Equate(s): COST*3040

Restriction(s): This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information.

MCS*3500 Market Analysis and Planning F,W (3-0) [0.50]

This course teaches students decision making theory and the methods of analysis that support decision making in the marketing discipline. Topics include customer, competitor and market analysis and methods such as forecasting and decision modeling.

Prerequisite(s): 9.00 credits including MATH*1000, ECON*1050, STAT*2060

Equate(s): MCS*3610

Restriction(s): Registration in the B.Comm. Marketing Management major.

MCS*3600 Consumer Information Processes F,W (3-0) [0.50]
This course provides an in-depth treatment of information processing research and theories as they relate to consumer judgement and choice. Components of theory addressed include: attention and perception, motivation, processing capacity, encoding and memory storage, retrieval and decision processes. Applications to marketplace policy and strategy are discussed. <i>Prerequisite(s):</i> MCS*2600, MCS*3030 <i>Equate(s):</i> COST*3600
MCS*3620 Marketing Communications F,W (3-0) [0.50]
Concepts of communication management as practiced by organizations in all economic sectors. Communication management principles are applied to the design and evaluation of communication programs. <i>Prerequisite(s):</i> 10.00 credits including MCS*1000, MCS*2600 <i>Equate(s):</i> COST*3620 <i>Restriction(s):</i> Registration in the B.Comm. Program. This is a Priority Access Course and some restrictions may apply during some time periods. Please contact the department for more information.
MCS*3810 Real Estate Market Analysis F (3-0) [0.50]
In this course students examine the processes used to analyze supply and demand in the real estate market. The course focuses on using research methodologies to define the scope of analysis; identify data needs; collect information from various sources, including on-line resources; and interpret the results. Applications to different property types are discussed. Current market trends are also examined. As well, the course deals with marketing real estate: listing procedures, advertising, negotiating. (First offering is Fall 2008.) <i>Prerequisite(s):</i> MCS*1820, STAT*2060 <i>Equate(s):</i> COST*3810
MCS*3820 Real Estate Development W (3-0) [0.50]
This course introduces the student to the real estate development process, providing an overview from the project idea to the cursory feasibility stage. The steps in development planning that will be investigated are analysis, design, and evaluation. Topics include evaluating development potential, land acquisition, site planning, economic feasibility studies, approval processes, construction, project management, and marketing phases. The construction of both single family housing and larger buildings is examined. (First offering is Winter 2009.) <i>Prerequisite(s):</i> MCS*1820 <i>Equate(s):</i> COST*3820 <i>Restriction(s):</i> MCS*4860
MCS*3870 Topics in Housing U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic or area of specialization related to housing to be conducted by faculty with special interests or expertise in the area. Students should confirm with the department prior to course selection what topic(s), if any, will be offered during specific semesters. <i>Prerequisite(s):</i> Will be indicated by the department when the course is offered. <i>Equate(s):</i> COST*3870 <i>Restriction(s):</i> Instructor consent required.
MCS*3880 Topics in Housing U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic or area of specialization related to housing to be conducted by faculty with special interests or expertise in the area. Students should confirm with the department prior to course selection what topic(s), if any, will be offered during specific semesters. <i>Prerequisite(s):</i> Will be indicated by the department when the course is offered. <i>Equate(s):</i> COST*3880 <i>Restriction(s):</i> Instructor consent required.
MCS*3890 Property Management W (3-0) [0.50]
Financial theory is used to examine the diversification benefits of including real estate with financial assets in an investment portfolio. Diversification strategies within a real estate portfolio are also covered. The marketing and leasing of real estate space culminates in a leasing negotiation exercise between pairs of students. Differing property management issues faced by managers of residential, office, retail, industrial and mixed use properties are covered. <i>Prerequisite(s):</i> (COST*1800 or MCS*1820), and (1 of MCS*2820, ECON*3560, HTM*3070) <i>Equate(s):</i> COST*3890
MCS*4020 Research in Consumer Studies U (3-0) [0.50]
An independent investigation of a pertinent topic in consumer studies. Registration requires departmental approval. <i>Prerequisite(s):</i> MCS*3030 <i>Equate(s):</i> COST*4020

MCS*4040 Management in Product Development F (3-0) [0.50]
Major course components include: new product strategy formulation, the role of technical and market research, the analysis of opportunities, management of development processes, product launches, government and regulatory controls. <i>Prerequisite(s):</i> Registration in the B.Comm. program (Marketing Management major) and 12.50 credits including MCS*2600. <i>Equate(s):</i> COST*4040
MCS*4050 The Evolution of Capitalism: A Canadian Perspective F,W (3-0) [0.50]
A Canadian perspective on capitalism as an evolving process of creative destruction; implications for Canadian culture and the allocation of economic, political, and social power; effects on education, the capacity of governments to govern, and societal notions of what constitutes the public good. <i>Prerequisite(s):</i> 12.50 credits including MCS*2600, ECON*1050, ECON*1100 <i>Equate(s):</i> COST*4050
MCS*4100 Entrepreneurship F (3-0) [0.50]
This course examines the role and effect of small business in Canada, and, in doing so, helps marketing students appreciate the challenges involved in having full responsibility for a business and/or for creatively moving a business forward. The course focuses on the analysis of entrepreneurial skills and, through the development of the business plan, the steps involved in starting a new venture or increasing the size of a business. (First offering - Fall 2010) <i>Prerequisite(s):</i> 14.00 credits including MCS*3500 and a cumulative GPA of 70%. <i>Restriction(s):</i> Registration in the B.Comm. program (Marketing Management major).
MCS*4300 Marketing and Society W (3-0) [0.50]
This course focuses on how the dissemination of marketing knowledge can influence society through the decisions made by public policy makers, corporate decision makers and non-profit marketers. It also covers how the marketing decisions made and actions taken by corporate, non-profit and public sector decision makers can affect society. As the theme of 'reciprocal influence' is developed, both direct and indirect influences of marketing knowledge and marketing decisions are pursued. (First offering -- Winter 2011) <i>Prerequisite(s):</i> 14.00 credits including MCS*1000 and MCS*2600 <i>Restriction(s):</i> Registration in the B.Comm. program (Marketing Management Major).
MCS*4370 Marketing Strategy F,W (3-0) [0.50]
This course focuses on the decision-making role of the marketing manager who is responsible for formulating the strategic marketing plan. The theory of selecting market target(s) for the firm's product and/or services and the development of the marketing mix (product, price, promotion, distribution) with the aid of market research and computerized information systems is covered. <i>Prerequisite(s):</i> 10.00 credits <i>Equate(s):</i> AGE*4370, COST*4370 <i>Restriction(s):</i> Registration in the B.Comm. program (Marketing Management Major).
MCS*4400 Pricing Management F,W (3-0) [0.50]
The objective of this course is to provide a useful conceptual framework as well as analytical techniques that can be applied in managing pricing functions. Topics to be covered include pricing strategies, tactical issues related to pricing, pricing methods, treatment of costs for pricing, consideration of competition, legal limitations and role of price in customer buying decisions for both consumer and industrial goods and services. <i>Prerequisite(s):</i> 9.00 credits including ECON*2310 <i>Restriction(s):</i> MCS*3100 and registration in the B.Comm. program (Marketing Management Major).
MCS*4600 International Marketing F,W (3-0) [0.50]
The study of marketing in a global context with specific emphasis on the strategic implications of marketing in different country cultures. Included are the global marketing environment and the competitive challenges and opportunities confronting today's international marketers, the cultural environment of global marketing, the assessment of global market opportunities and the development of global marketing strategies. <i>Prerequisite(s):</i> MCS*1000, MCS*2600, MCS*3030 <i>Equate(s):</i> COST*4600 <i>Restriction(s):</i> Registration in the B.Comm program (Marketing Management major).

MCS*4810 Real Estate and Housing Project W (3-0) [0.50]
This course is a capstone course meant to bring together concepts from all other Real Estate and Housing courses. It deals with the development, redevelopment and renewal of housing and real estate services. Students will complete a project that addresses an issue in the real estate or housing sector, applying knowledge of development, market analysis, affordability, financing and government regulation.
<i>Prerequisite(s):</i> 15.00 credits
<i>Equate(s):</i> COST*4810
<i>Restriction(s):</i> Registration in the B. Comm program (Real Estate and Housing major) or permission of the instructor.
MCS*4820 Real Estate Appraisal F (3-0) [0.50]
This course deals with the basic principles involved in valuing real estate. The market comparison, cost and income approaches of appraisal are covered. The major emphasis in the course is on using discounted cash flow projections to value income-producing real estate. The term project involves the use of a spreadsheet program to estimate property value for a property chosen by the student. While valuation of single family homes is covered, the main emphasis is on investment real estate.
<i>Prerequisite(s):</i> (CIS*1000 or MCS*2020), (I of MCS*2820, ECON*3560, HTM*3070)
<i>Equate(s):</i> COST*4820
MCS*4840 Housing and Real Estate Law F (3-0) [0.50]
Lays out the legal principles which guide the expanding and changing body of law dealing with housing and real estate development and forms of occupancy; statutory and regulatory matters are explored.
<i>Prerequisite(s):</i> 10.00 credits including MCS*1000, COST*1800 , MCS*2820
<i>Equate(s):</i> COST*4840
MCS*4850 Housing Policies F (3-0) [0.50]
Examines both substantive and jurisdictional policy and program development at the federal, provincial and local levels. The policy making process will be reviewed as well as policy and program evaluation techniques. The emphasis is on Canada although comparisons with other countries will be discussed. (Last Offering is Fall 2007.)
<i>Prerequisite(s):</i> 10.00 credits including COST*1800 , MCS*2820
<i>Equate(s):</i> COST*4850
MCS*4860 Housing Industry Structure and Process W (3-0) [0.50]
The development and construction sectors of the housing industry will be examined from both the structural and process perspectives in order to develop an understanding of how the industry adapts and how organizations operate. The course will focus on Canadian residential housing industry organizations and related agencies. (Last Offering is Winter 2008)
<i>Prerequisite(s):</i> 10.00 credits including COST*1800 , MCS*2820
<i>Equate(s):</i> COST*4860
MCS*4910 Topics in Consumer Studies U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in consumer studies to be conducted by faculty with expertise in the area. Students should check with the department to determine what topic, if any, will be offered during a semester.
<i>Prerequisite(s):</i> Will be indicated by the department when the course is offered.
<i>Equate(s):</i> COST*4910
<i>Restriction(s):</i> Instructor consent required.
MCS*4920 Topics in Consumer Studies U (3-0) [0.50]
Same description as MCS*4910.
<i>Equate(s):</i> COST*4920
MCS*4950 Consumer Studies Practicum U (3-0) [0.50]
The practicum provides supervised experience in applying the concepts and principles of consumer studies to contemporary issues in areas such as consumer finance, consumer policy, housing, product standards and quality assurance.
<i>Prerequisite(s):</i> 15.00 credits
<i>Equate(s):</i> COST*4950
<i>Restriction(s):</i> Instructor and Department Chair consent required.

Mathematics

Department of Mathematics and Statistics

Suggested initial course sequence:

1. For students with 4U or OAC Calculus and expecting to pursue further studies in mathematics or the physical sciences: MATH*1200, MATH*1210.
2. For students interested in applications to the biological sciences: MATH*1080, MATH*2080.
3. For students not expecting to pursue further studies in mathematics: MATH*1000, one STAT*XXXX course

MATH*1000 Introductory Calculus F,W (3-0) [0.50]

A brief introduction to analytical geometry. The differential and integral calculus for algebraic, logarithmic, exponential and trigonometric functions, with applications. (Also offered through distance education format.)

Prerequisite(s): 1 4U credit in mathematics or 1 OAC credit in mathematics

Restriction(s): MATH*1080 or MATH*1200. Not available to students registered in the B.Sc. and B.Sc. (Agr.) programs.

MATH*1080 Elements of Calculus I F,W (3-1) [0.50]

The elements of the calculus of one variable with illustration and emphasis on its application in the biological sciences. The elementary functions, sequences and series, difference equations, differential and integral calculus.

Prerequisite(s): 4U Advanced Functions and Calculus or OAC Calculus

Restriction(s): MATH*1000, MATH*1200, IPS*1110

MATH*1200 Calculus I F (3-1) [0.50]

This is a theoretical course intended primarily for students who expect to pursue further studies in mathematics and its applications. Topics include inequalities and absolute value; compound angle formulas for trigonometric functions; limits and continuity using rigorous definitions; the derivative and derivative formulas (including derivatives of trigonometric, exponential and logarithmic functions); Fermat's theorem; Rolle's theorem; the mean-value theorem; applications of the derivative; Riemann sums; the definite integral; the fundamental theorem of calculus; applications of the definite integral; the mean value theorem for integrals.

Prerequisite(s): 4U Advanced Functions and Calculus or OAC Calculus

Restriction(s): MATH*1000, MATH*1080, IPS*1110

MATH*1210 Calculus II W (3-1) [0.50]

Topics include inverse functions, inverse trigonometric functions, hyperbolic and inverse hyperbolic functions, indeterminate forms and l'Hopital's rule; techniques of integration; parametric equations; polar coordinates; introduction to MacLaurin and Taylor series; functions of several variables; and partial derivatives. (Last offering Summer 2008)

Prerequisite(s): 1 of MATH*1000, MATH*1080, MATH*1200

Restriction(s): MATH*2080

MATH*2000 Set Theory F (3-1) [0.50]

The algebra of sets. Equivalence relations, mappings and inverse mappings. Review of the real number system. Countable and uncountable sets. Partially and totally ordered sets. Complex numbers and their arithmetic. Geometry and topology of the line and the plane. Emphasis is placed on developing skills in constructing mathematical proofs.

Prerequisite(s): 0.50 credits in calculus at the university level

MATH*2080 Elements of Calculus II F,W (3-1) [0.50]

Techniques of integration, introduction to differential equations and the elements of multivariate calculus. Illustrations and emphasis will be on biological applications. An introduction to vectors, multivariable and vector functions, difference equations, partial differentiation and multiple integration.

Prerequisite(s): 1 of MATH*1000, MATH*1080, MATH*1200

Restriction(s): MATH*1210

MATH*2130 Numerical Methods S,W (3-2) [0.50]

This course provides an overview of and practical experience in utilizing algorithms for solving numerical problems arising in applied sciences. Topics covered will include solution of a single nonlinear equation, interpolation, numerical differentiation and integration, solution of differential equations and systems of linear algebraic equations. Students will utilize computers in solving problem assignments.

Prerequisite(s): MATH*1210 or MATH*2080

MATH*2150 Applied Matrix Algebra S,F,W (3-1) [0.50]

Matrices and matrix operations, matrix inverse and determinant, linear equations. N-dimensional vectors: dot product, linear independence, basis and dimension. Rank of a matrix. Eigenvalues, eigenvectors and diagonalization. Applications, including least squares. (Also offered through distance education format.)

Prerequisite(s): 1 of a 4U mathematics credit, an OAC mathematics credit, first year university mathematics credit

Restriction(s): MATH*2160

MATH*2160 Linear Algebra I F (3-0) [0.50]

Matrix notation, matrix arithmetic, matrix inverse and determinant, linear systems of equations, and Gaussian elimination. The basic theory of vector spaces and linear transformations. Matrix representations of linear transformations, change of basis, diagonalization. Inner product spaces, quadratic forms, orthogonalization and projections.

Prerequisite(s): (IPS*1110 or MATH*1200), (1 of MATH*2150, 4U Geometry and Discrete Mathematics, OAC Algebra and Geometry)

MATH*2170 Differential Equations I W,S (3-1) [0.50]

First order equations, linear equations of second and higher orders, phase plane, difference equations, introduction to power series methods, Laplace transforms, formulation, solution and interpretation of differential equations of interest in science.

Prerequisite(s): MATH*1210 or MATH*2080

Restriction(s): MATH*2270

MATH*2200 Advanced Calculus I F (3-0) [0.50]

Infinite sequences and series of numbers, power series, tests for convergence; Taylor's theorem and Taylor series for functions of one variable; planes and quadratic surfaces; limits, continuity, and differentiability; partial differentiation, directional derivatives and gradients; tangent planes, linear approximation, and Taylor's theorem for functions of two variables; critical points, extreme value problems; implicit function theorem; Jacobians; double integrals, iterated integrals and change of variables.

Prerequisite(s): 1 of IPS*1210, MATH*1210, MATH*2080

MATH*2210 Advanced Calculus II W (3-0) [0.50]

Spherical and cylindrical polar coordinate transformations; multiple integrals; line integrals; vector and scalar fields including the gradient, divergence, curl and directional derivative, and their physical interpretation; theorems of Green and Stokes; uniform convergence.

Prerequisite(s): MATH*2200, (MATH*1200 is strongly recommended)

MATH*2270 Applied Differential Equations F (3-1) [0.50]

Solution of differential equations which arise from problems in engineering. Linear equations of first and higher order; systems of linear equations; Laplace transforms; series solutions of second-order equations; introduction to partial differential equations.

Prerequisite(s): ENGG*1500, MATH*1210

Restriction(s): MATH*2170

MATH*3100 Differential Equations II F (3-1) [0.50]

First order linear systems and their general solution by matrix methods. Introduction to nonlinear systems, stability, limit cycles and chaos using numerical examples. Solution in power series of second order equations including Bessel's equation. Introduction to partial differential equations and applications.

Prerequisite(s): (MATH*2150 or MATH*2160), MATH*2170

MATH*3130 Abstract Algebra F (3-0) [0.50]

Symmetric groups; introduction to group theory; groups, subgroups, normal subgroups, factor groups, fundamental homomorphism theorem. Introduction to ring theory; rings, subrings, ideals, quotient rings, polynomial rings, fundamental ring homomorphism theorem.

Prerequisite(s): MATH*2000, (MATH*2150 or MATH*2160)

MATH*3160 Linear Algebra II W (3-0) [0.50]

Complex vector spaces. Direct sum decompositions, Cayley-Hamilton theorem, spectral theorem for normal operators, Jordan canonical form of a matrix.

Prerequisite(s): MATH*2160

MATH*3170 Partial Differential Equations and Special Functions W (3-0) [0.50]

Wave equation, heat equation, Laplace equation, linearity and separation of variables; solution by Fourier series; Bessel and Legendre functions; Fourier transforms; introduction to the method of characteristics.

Prerequisite(s): MATH*2000, MATH*3100

MATH*3200 Real Analysis F (3-0) [0.50]

Metric spaces and normed linear spaces. Fixed point theorems with applications to fractals. Uniform continuity. Riemann-Stieltjes integration.

Prerequisite(s): MATH*2000, MATH*2160, MATH*2210

MATH*3240 Operations Research F (3-0) [0.50]

Mathematical models. Linear programming and sensitivity analysis. Network analysis: shortest path, maximum flow and minimal spanning tree problems. Introduction to non-linear programming. Constrained optimization: the Frank-Wolfe method. Deterministic and probabilistic dynamic programming.

Prerequisite(s): (MATH*2150 or MATH*2160), 0.50 credits in statistics

Co-requisite(s): MATH*2200

MATH*3260 Complex Analysis W (3-0) [0.50]

The complex derivative and planar mappings. Analytic and harmonic functions. Conformal mappings. Elementary functions. Cauchy-Goursat theorem. The Taylor and Laurent series. Calculus of residues with emphasis on applications.

Prerequisite(s): MATH*2000, MATH*2200

MATH*3510 Biomathematics W (3-0) [0.50]

Development, analysis, and interpretation of mathematical models of biological phenomena. Emphasis will be on deterministic discrete and continuous models.

Prerequisite(s): (MATH*2150 or MATH*2160), (MATH*2170 or MATH*2270), at least 0.50 credits in statistics at the 2000 level or above

MATH*4000 Advanced Differential Equations W (3-0) [0.50]

A rigorous treatment of the qualitative theory of ordinary differential equations and an introduction to the modern theory of dynamical systems, existence, uniqueness, and continuity theorems. Definition and properties of dynamical systems. Linearization and local behaviour of nonlinear systems. Stable Manifold theorem. Liapunov stability. Limit cycles and Poincaré-Bendixson Theorem. Introduction to bifurcations and chaotic dynamics. (Offered in even-numbered years.)

Prerequisite(s): MATH*3100, (MATH*3160 or MATH*3200)

MATH*4050 Topics in Mathematics I W (3-0) [0.50]

Discussion of selected topics at an advanced level. Intended mainly for mathematics students in the 6th to 8th semester. Content will vary from year to year. Sample topics: probability theory, Fourier analysis, mathematical logic, operator algebras, number theory combinatorics, philosophy of mathematics, fractal geometry, chaos, stochastic differential equations. (Offered in odd-numbered years.)

Prerequisite(s): MATH*2160, MATH*3200

MATH*4060 Topics in Mathematics II W (3-0) [0.50]

Discussion of selected topics at an advanced level as in MATH*4050, but with different choice of topic. (Offered in even-numbered years.)

Prerequisite(s): MATH*2160, MATH*3200

MATH*4070 Case Studies in Modeling F (2-2) [0.50]

Study of selected topics in applied mathematics at an advanced level, intended mainly for mathematical science students in the 7th or 8th semester. Sample topics are optimal control theory and nonlinear programming. The course will include case studies of real-world problems arising from various areas and the contribution of mathematical models to their solution. Part of the course requirement will involve the completion of a mathematical modeling project in conjunction with the departmental Mathematics and Statistics Clinic. For further information concerning the Clinic, consult the department. (Offered in even-numbered years.)

Prerequisite(s): 3.50 credits in mathematical science including MATH*2130

MATH*4140 Applied Algebra W (3-0) [0.50]

Finite symmetric groups, dihedral and cyclic groups with applications to the group of symmetries of a geometric figure in the plane. Polya-Burnside method of enumeration with applications. Galois fields with applications to combinatorial design constructions. Error correcting binary codes. (Offered in even-numbered years.)

Prerequisite(s): MATH*3130

MATH*4200 Advanced Analysis F (3-0) [0.50]

Sequences and series of functions. Stone-Weierstrass approximation theorem. Compactness in function spaces. Introduction to complex dynamics and the Mandelbrot set. Multivariate differential calculus. (Offered in even-numbered years.)

Prerequisite(s): MATH*3160, MATH*3200, MATH*3260

MATH*4220 Applied Functional Analysis W (3-0) [0.50]

Hilbert and Banach spaces: applications to Fourier series and numerical analysis. Hahn-Banach theorem; weak topologies. Generalized functions; application to differential equations. Completeness; uniform boundedness principle. Lebesgue measure and integral; applications to probability and dynamics. Spectral theory. (Offered in even-numbered years.)

Prerequisite(s): MATH*2160, MATH*3200

MATH*4240 Advanced Topics in Modeling W (3-0) [0.50]

A study of selected advanced topics in mathematical modeling, to include model formulation, techniques of model analysis and interpretation of results. Topics usually include transportation and assignment problems, minimum cost flow problems and network simplex methods, Markov chains, queuing theory. Student participation in researching a project and in the preparation of a report. (Offered in odd-numbered years.)

Prerequisite(s): MATH*3240

MATH*4270 Advanced Partial Differential Equations F (3-0) [0.50]

Theory of 1st and 2nd order partial differential equations with examples. Classification of linear second order PDE. Theory and examples of associated boundary value problems. Maximum principles. Green's functions. Introduction to nonlinear PDE. Applications.

Prerequisite(s): MATH*3170, MATH*3200, MATH*3260

MATH*4290 Geometry and Topology W (3-0) [0.50]

Classical geometry of the plane and 3-space. Non-Euclidean geometries. Elementary topology of graphs and surfaces. Topics to be selected from: algebraic geometry; analysis on manifolds; Riemannian geometry; tensor analysis; homotopy and homology groups. (Offered in odd-numbered years.)

Prerequisite(s): MATH*3130, MATH*3200

MATH*4430 Advanced Numerical Methods F (3-0) [0.50]

Numerical solution of linear systems, differential equations; the algebraic eigenvalue problem, interpolation and approximation of functions, numerical quadrature. (Offered in odd-numbered years.)

Prerequisite(s): MATH*2130, (MATH*2150 or MATH*2160), MATH*2200, (MATH*2170 or MATH*2270)

MATH*4510 Environmental Transport and Dynamics F (3-0) [0.50]

Mathematical modeling of environmental transport systems. Linear and nonlinear compartmental models. Convective and diffusive transport. Specific models selected from hydrology; ground-water and aquifer transport, dispersion of marine pollution, effluents in river systems; atmospheric pollen dispersion, plume models, dry matter suspension and deposition; Global circulation: tritium distribution. (Offered in odd-numbered years.)

Prerequisite(s): MATH*3510 or MATH*3100, 0.50 credits in statistics

Molecular and Cellular Biology

MCB*4010 Advanced Cell Biology W (3-0) [0.50]

This course examines the cellular and molecular biology of signal transduction. The major theme is an understanding of how eukaryotic cells receive, transmit and respond to environmental signals. Topics will include cellular regulation of cell cycle progression and cell death as well as the consequences of deregulated signal transduction in terms of disease, primarily cancer.

Prerequisite(s): BIOL*2210, MBG*2020

Equate(s): MBG*4620

MCB*4050 Protein and Nucleic Acid Structure F (3-0) [0.50]

This course explores the physical conformation and atomic structures of proteins and nucleic acids and the techniques and tools for the determination, comparison, and prediction of macromolecular structures. Students will design their own protein structures as part of experiencing the process of scientific writing, peer-review and publishing.

Prerequisite(s): BIOC*3560

Equate(s): BIOC*4550 , MBG*4350

MCB*4080 Applied Microbiology and Biochemistry F (3-0) [0.50]

This course is a study of how microorganisms, their enzymes and biochemical pathways can be manipulated to produce goods and services in industry, medicine and scientific research. The means by which the yields of secondary metabolites, enzymes, and genetically selected products can be maximized are considered and examples of specific processes are examined. Department of Molecular and Cellular Biology and Department of Environmental Biology.

Prerequisite(s): BIOC*2580, (1 of BIOC*3560, BIOC*3570, MICR*2020, MICR*2030)

Equate(s): BIOC*4570 , MICR*4260

Meteorology

Department of Land Resource Science

MET*1000 The Atmospheric Environment S (3-0) [0.50]

An introduction to the atmospheric environment which covers global to local scales. Topics covered are: understanding weather maps and forecasts, weather indices for plants and people, local-scale microclimates of natural surfaces and cities, intentional modification of microclimates, diffusion of pollutants in the atmosphere and their impact on air quality and climate change, policy issues associated with air quality and climate change. (Offered through distance education format only.)

Restriction(s): Not available to students with previous MET credit. Not available to students registered in B.Sc. or B.Sc.(Env.) programs.

MET*2020 Agrometeorology W (3-0) [0.50]

Weather and climate effects on agricultural production. Relation of water balance and other climate factors to growth and yield of crops, introduction to crop-weather modeling, climate hazards and their control, weather aspects of pest and disease management.

Prerequisite(s): BIOL*1020 or BIOL*1030

MET*2030 Meteorology and Climatology F (3-2) [0.50]

Solar and terrestrial radiation; pressure systems and winds; atmospheric stability and vertical motions; air masses and fronts; clouds and precipitation; selected topics in applied meteorology including air pollution. The laboratory emphasizes the analysis and use of atmospheric data for solving environmental problems.

Prerequisite(s): 1 of MET*2020, PHYS*1000, PHYS*1070, PHYS*1080, PHYS*1110, PHYS*1130

MET*3050 Microclimatology W (3-0) [0.50]

Natural and intentionally-modified microclimates near the earth's surface; energy budgets; transport of mass and heat. Familiarization with some instruments for microclimatic measurements.

Prerequisite(s): 1 of MET*2020, MET*2030, GEOG*2110

MET*4100 Physical Meteorology W (3-0) [0.50]

This course introduces the principles of physical meteorology, including structure and composition of the atmosphere, radiative transfer, atmospheric energetics and cloud formation. All topics will be discussed in terms of global climate change. (Offered in odd-numbered years.)

Prerequisite(s): MET*3050

MET*4210 Atmospheric Experimentation and Instrumentation W (3-0) [0.50]

This course covers the design and implementation of field experiments for atmospheric and environmental studies. Principles of operation and practical consideration of various meteorological and soil sensors will be discussed along with overall design and implementation procedures for environmental monitoring. Students will prepare a proposal detailing an experimental design of their own.

Prerequisite(s): MET*2030 or MET*3050

Restriction(s): MET*4230

MET*4300 Atmospheric Transport and Chemistry W (3-0) [0.50]

Behaviour of synoptic scale weather systems and the transport of substances in the atmosphere. Chemical and photochemical transformations during transport; scavenging and removal from the atmosphere. (Offered in even-numbered years.)

Prerequisite(s): (1 of CHEM*1310, CHEM*3360, ENGG*3360, TOX*3360, ENVS*3360), MET*2030

Restriction(s): MET*4310

Microbiology

Department of Environmental Biology

Department of Molecular and Cellular Biology

Department of Pathobiology

MICR*1020 Fundamentals of Applied Microbiology F (2-3) [0.50]

This course is designed for students in engineering and applied human nutrition. The importance of microbes from an environmental point of view, including water systems and soils as well as their importance in disease, nutrition, food and food processing will be emphasized. The theoretical basis of microbial analysis and control measures will be included. The laboratory component of the course will deal with microbial growth and practical aspects of microbial analysis of environmental and food samples including identification and enumeration of specific microorganisms and approaches for their control. B.Sc. students cannot take this course for credit. Department of Molecular and Cellular Biology.

Restriction(s): BIOL*1030, BIOL*1040. Registration in B.A.Sc. Program (Applied Human Nutrition major) or B.Sc. (Eng.) program.

MICR*2020 Microbial Interactions and Associations F,W (3-0) [0.50]

The interactions and associations of microorganisms with each other and with components of both the biotic and abiotic worlds have an enormous impact on daily life and their influence is felt on a global basis. The diversity of microorganisms including viruses, bacteria, fungi and protozoa will be presented in the context of such interactions and impact. The interactions of microbes with host organisms in symbioses and pathogenesis, and their survival strategies in extreme environments will be examined. The host-pathogen interactions in disease will be emphasized, but balanced with consideration of the beneficial aspects of microorganisms such as their role in biogeochemical cycles and their application in biotechnology. Assignments will evaluate contemporary microbiological issues in the context of the corresponding scientific literature. Department of Molecular and Cellular Biology.

Prerequisite(s): BIOL*1040 or equivalent

MICR*2030 Microbial Growth S,F,W (2-3) [0.50]

The environmental factors and physiological processes of microbial growth. The transport of nutrients, the metabolic availability of energy, metabolic patterns, and versatility in diverse microorganisms. Microscopy, isolation and enumeration, measurement of growth. Department of Molecular and Cellular Biology.

Prerequisite(s): BIOL*1040

MICR*3120 Systematic Bacteriology F (2-3) [0.50]

Classification, nomenclature, and identification of bacteria. Methods and approaches for the isolation and identification of bacteria are considered in the laboratory. The characteristics of some groups of common bacteria and the contributions of molecular systematics to bacterial classification are discussed. Department of Molecular and Cellular Biology.

Prerequisite(s): MICR*2030

MICR*3220 Plant Microbiology F (3-0) [0.50]

Interaction between plants and microorganisms. Topics include molecular plant-microbe interactions, plant defenses, bacterial ice nucleation, interaction among plant microbes, root nodulation, mycorrhizae, wood decay, and decomposition of plant litter. Department of Environmental Biology.

Prerequisite(s): BIOL*1040

MICR*3230 Immunology I F (3-0) [0.50]

An introduction to the immune response of the vertebrate host, the cells and tissues of the lymphoid system, humoral and cell-mediated immunity, the concept of immunity to diseases and current techniques in immunology. Department of Molecular and Cellular Biology and Department of Pathobiology.

Prerequisite(s): BIOL*1040, BIOC*2580

MICR*3260 Microbial Adaptation and Development W (3-1) [0.50]

Adaptation, development, and modulation of microbial physiology in response to environmental stimuli (tutorials included). Department of Molecular and Cellular Biology.

Prerequisite(s): BIOC*3560, (MBG*3070 or MBG*3080)

MICR*3270 Microbial Cell Biology W (3-0) [0.50]

This course describes the diversity in form and function in microorganisms. The structures of critical cellular components will be considered from the perspective of the cellular requirements for survival in different environments. The underlying macromolecular assembly systems will be considered in the context of their integration into cell division and the bacterial cell cycle, as well as their exploitation as targets for antibiotics and other therapeutic approaches. Department of Molecular and Cellular Biology.

Prerequisite(s): BIOL*2210, MBG*2020, MICR*2030

Co-requisite(s): BIOC*3560

Restriction(s): MICR*4270

MICR*3330 World of Viruses F (3-0) [0.50]

Viruses infecting many organisms will be covered in the context of their global impact on disease and history, beneficial uses of viruses and their role in advances of molecular theory. The diversity of viruses, their replication strategies and interactions with the host in disease at the individual, to societal levels provides a fundamental virology background. Discussions of protection from viral diseases, including human interventions, and highlighting their pervasiveness through historical accounts and contemporary news articles on viruses will serve to demonstrate their relevance to today's society. Department of Molecular and Cellular Biology.

Prerequisite(s): BIOL*2210, MBG*2020

Restriction(s): MICR*4120

MICR*4010 Pathogenic Bacteriology W (3-0) [0.50]

Interactions between bacterial pathogens and host animals, including immune and inflammatory responses of the host's defense mechanisms. The structural and physiological characteristics of a number of important bacteria causing human and animal diseases are considered. Department of Molecular and Cellular Biology.

Prerequisite(s): MICR*3120, MICR*3230, (MBG*3070 or MBG*3080)

MICR*4140 Soil Microbiology and Biotechnology F (3-0) [0.50]

The biology of soil microorganisms with an emphasis on their integrated ecology, physiology, genetics and biotechnological uses in the soil environment. The response of soil microorganisms to soil physical-chemical factors and aspects of nutrient cycling in soil. Current topics also include soil as an environment for microorganisms, microbial evolution, soil microbial biodiversity, gene flow and microbial nucleic acids in soil, microbial survival and activity in soil, metabolism of soil pollutants and metal-microbe interactions. The use of molecular-based methods to study microorganisms in soil. Regulations and guidelines on the biotechnological applications of microorganisms in the soil environment will be discussed. Department of Environmental Biology.

Prerequisite(s): BIOC*2580, BIOL*1040

MICR*4180 Microbial Processes in Environmental Management F (3-0) [0.50]

The metabolic basis of microbial processes fundamentally important in the management of agricultural, industrial or municipal wastes are examined. Topics covered include relevant considerations in using microorganisms for pollution control, factors that affect efficient microbial degradation in the environment, and major microbial enzyme systems/pathways for biodegradation of persistent pollutants. Emphasis will be placed on the biochemistry, physiology, genetics and biotechnological applications of pollutant-degrading microorganisms. Department of Environmental Biology.

Prerequisite(s): BIOC*2580, BIOL*1040

MICR*4230 Immunology II W (3-3) [0.50]

Concepts and current knowledge of the diversity of immune response, experimental systems used in studying immunology, antigen-antibody reaction methods, monoclonal antibodies, antibody engineering, hypersensitivity reactions, autoimmunity, and adhesion molecules and homing of cells of the immune system. Department of Molecular and Cellular Biology.

Prerequisite(s): MICR*3230

MICR*4240 Topics in Microbiology S,F,W (1-3) [0.50]

Independent study of a selected topic in microbiology, involving a review and critical appraisal of the current literature. Written and oral presentations are required. Department of Molecular and Cellular Biology.

Restriction(s): Students are required to discuss a topic with a potential supervisor before registering for the course. Open to students in semesters 6, 7 and 8. Instructor consent required.

MICR*4280 Microbial Ecology W (3-0) [0.50]

This course focuses on analysis of natural microbial communities, factors affecting structure and function of these communities and the interrelationships among microorganisms within community. There is a strong emphasis on understanding the role of microorganisms in carbon, nitrogen and phosphorus transformations within both aerobic and anaerobic environments. This will include the major chemical and biochemical transformation by microorganisms in a vertical slice through a pond, from the core of the earth through the air water interface and up through the stratosphere. Terrestrial and fresh water aquatic environments will be emphasized, but a consideration of aspects relevant to the marine environment will be included. The interrelationship of nutrient cycling and global warming will also be discussed. Aspects of environmental biotechnology will be included as appropriate.

Prerequisite(s): MBG*2020, MICR*2030

Restriction(s): MICR*4290

MICR*4310 Research Project I S,F,W (0-12) [1.00]

Independent research projects involving experimental or practical work, conducted under the supervision of a faculty member. Results are presented in written and oral form. Department of Molecular and Cellular Biology.

Restriction(s): Students must have a research advisor and permission from the course coordinator before registering. Instructor consent required.

MICR*4320 Research Project II S,F,W (0-12) [1.00]

Independent research projects involving experimental or practical work, conducted under the supervision of a faculty member. Results are presented in written and oral form. Department of Molecular and Cellular Biology.

Prerequisite(s): MICR*4310

Restriction(s): Students must have a research advisor and permission from the course coordinator before registering. Instructor consent required.

MICR*4330 Molecular Virology W (2-3) [0.50]

This course will focus on molecular aspects of virus replication cycles and the diverse strategies used for replication of select RNA and DNA viruses. Virus-host interactions including tumor virology and host antiviral responses such as interferon and apoptosis and viral anti host-defence responses as well as recent advances in molecular virology and evolution will be also be covered. Department of Molecular and Cellular Biology. (Offered in even numbered years.)

Prerequisite(s): MICR*2030, MICR*3330

Restriction(s): MICR*4120 . Restricted to student majoring in MICR and MBG.

MICR*4430 Medical Virology W (3-0) [0.50]

A study of the interactions of animal viruses and their hosts and of important diseases of humans caused by viruses in different taxonomic groups. The emphasis is on aspects of pathogenesis, epidemiology, immune responses and control. Recent advances in the application of molecular biology to the development of diagnostic tests and vaccines will be included. Department of Pathobiology.

Prerequisite(s): MICR*3330

Molecular Biology and Genetics

Department of Animal and Poultry Science

Department of Molecular and Cellular Biology

Department of Plant Agriculture

Department of Integrative Biology

MBG*1000 Genetics and Society F,W (3-1) [0.50]

Basic principles of genetics at work in human society. The roles of genes and inheritance in the biology of humans and the organisms with which we interact. Introduction to some of the social and ethical consequences of genetic knowledge and practice. This is a science course designed primarily for students in the Arts or Social and Applied Human Sciences. Department of Molecular and Cellular Biology.

Restriction(s): Not available to students registered in B.Sc. programs.

MBG*2000 Introductory Genetics S,F,W (3-1) [0.50]

Fundamental aspects of genetics including the chromosomal basis of inheritance, cytogenetics, genes in populations and quantitative traits will be introduced. Additional topics include extranuclear inheritance, human genetics and bacterial genetics. The molecular nature of the gene and general mechanisms of gene and general mechanisms of gene expression will be introduced but not covered in detail. Department of Molecular and Cellular Biology.

Prerequisite(s): 4 credits including BIOL*1040

MBG*2020 Introductory Molecular Biology F,W (3-1) [0.50]

This course provides an introduction to the structure of the gene and the relationship between genes and proteins with an in depth discussion of the processes of replication, transcription, translation, regulation of gene expression, mutation and DNA repair and recombination. The experimental techniques used in molecular cloning and their applications to the biotechnology industry and the study of diseases will be discussed. Department of Molecular and Cellular Biology.

Prerequisite(s): BIOC*2580, MBG*2000

MBG*3000 Population Genetics F (3-2) [0.50]

This course is designed to explore the concepts of random mating, inbreeding, random drift, assortative mating and selection as they relate to natural populations. The dynamic genetic structure of populations and its relationship to the process of speciation is examined. The role and significance of molecular genetics as it relates to population genetics, evolution, systematics and phylogeny is also considered. Department of Integrative Biology.

Prerequisite(s): MBG*2000

MBG*3050 Human Genetics W (3-3) [0.50]

A course designed to introduce the student to the study of biological inheritance in humans. The course includes discussion of the genetic basis of human individual differences, gene frequencies in human populations, human behavioral genetics, human cytogenetics, biochemical genetics and developmental genetics, medical genetics and other aspects of human heredity. Department of Molecular and Cellular Biology.

Prerequisite(s): MBG*2020

MBG*3060 Quantitative Genetics W (3-2) [0.50]

The nature of Mendelian inheritance when extended to quantitative traits that are jointly influenced by the environment and the simultaneous segregation of many genes. Prediction of response to natural and artificial selection in populations. Department of Animal and Poultry Science.

Prerequisite(s): MBG*2000, 0.50 credits in statistics

MBG*3080 Bacterial Genetics S,F (3-0) [0.50]

This course focuses on the genetics of prokaryotic microorganisms and their viruses. Some major topics covered are: regulation of gene expression, analysis of bacterial and phage genomes, plasmids, transposable elements, and mutation studies. Department of Molecular and Cellular Biology.

Prerequisite(s): MBG*2020, (MICR*2020 or MICR*2030)

Restriction(s): MBG*3070

MBG*3090 Applied Animal Genetics F (3-2) [0.50]

The basis of, and methods for, effective use of modern animal breeding tools for practical improvement of livestock species. The course involves an examination and comparison of the structure of genetic improvement programs across species. International aspects and challenges to animal breeding programs are considered. Department of Animal and Poultry Science.

Prerequisite(s): MBG*2000, 0.50 credits in statistics

MBG*3100 Plant Genetics F (3-2) [0.50]

Reproduction in plants, genetic and cytogenetic structure of plants, nature of phenotypic variability in plants, patterns of response to selection in plant populations, measurement of continuous and discontinuous genetic variability in plant populations. Department of Plant Agriculture.

Prerequisite(s): (MBG*2000 or AGR*2451/2 for B.Sc.(Agr.) students only), STAT*2040

MBG*3200 Genetics: Our Uncertain Heritage F (3-0) [0.50]

An examination of the ethical, social, and political issues arising from genetic manipulation, reproductive intervention and biotechnology through the joint application of principles of modern genetics and moral philosophy. Topics include eugenics, cloning, surrogate parenting, abortion, gene therapy, DNA fingerprinting and genetic diagnosis. Related issues such as scientific freedom, access to genetic information and public policy are also considered. Department of Molecular and Cellular Biology.

Prerequisite(s): MBG*2000

MBG*3350 Laboratory Methods in Molecular Biology I F,W (0-8) [0.75]

Laboratory based instruction in the basic methodologies of Molecular Biology. Students will have the opportunity to develop technical skills and practical knowledge sufficient to perform basic procedures independently, and to diagnose and analyze experimental results obtained with these techniques. Department of Molecular and Cellular Biology.

Prerequisite(s): BIOC*2580, MBG*2020

Restriction(s): Registration in the B.Sc. Major in Molecular Biology and Genetics, Biochemistry, Biochemistry (Co-op), Biomedical Toxicology, Biomedical Toxicology (Co-op) or instructor consent.

MBG*3360 Laboratory Methods in Molecular Biology II W (0-8) [0.75]

Laboratory based instruction in the basic methodologies of Molecular Biology. Students will have the opportunity to develop technical skills and practical knowledge sufficient to perform advanced agendas independently, and to diagnose and analyze experimental results obtained with these techniques. Department of Molecular and Cellular Biology.

Prerequisite(s): 70% in MBG*2020 and 75% in MBG*3350

MBG*3600 Introduction to Genomics S,F (1.5-0) [0.25]

Genomics is the analysis of the structures and functions of entire genomes, whose nucleotide sequences are now known in part or in entirety for many different organisms. This computer-based course will provide an introduction to the methodology and applicability of this new discipline. Department of Molecular and Cellular Biology. (Offered through distance education format only.)

Prerequisite(s): MBG*2020

MBG*4030 Animal Breeding Methods F (3-2) [0.50]

Theoretical and scientific aspects of practical animal breeding programs which lead to genetic improvement of efficiency and profitability of animal production. Integrates quantitative genetics with concepts of statistics, economics, biology and biotechnology and expands into development of practical breeding plans. Department of Animal and Poultry Science.

Prerequisite(s): MBG*3060

MBG*4040 Genetics and Molecular Biology of Development F (3-2) [0.50]

An examination of the genetic mechanisms which specify organismic development. Molecular biology of determination and cell differentiation, homeotic genes, oncogenes, genetic control of morphogenesis and pattern formation. Application of embryo manipulation techniques in basic science and medicine. Department of Molecular and Cellular Biology. (Offered in odd-numbered years.)

Prerequisite(s): MBG*2020

Restriction(s): MBG*4070

MBG*4070 Genetics and Molecular Biology of Development F (3-0) [0.50]

Lecture portion only of MBG*4040. (Offered in odd-numbered years.)

Prerequisite(s): MBG*2020

Restriction(s): MBG*4040

MBG*4080 Molecular Genetics F (3-0) [0.50]

The chemical nature of genetic material, transcription and the control of gene expression. DNA cloning and the use of recombinant DNA molecules in modifying gene expression. Department of Molecular and Cellular Biology.

Prerequisite(s): MBG*2020

MBG*4110 Advanced Concepts in Genetics F (3-0) [0.50]

This course presents classical non-Mendelian phenomena, including analysis of chromosome breakage, transposition, imprinting and paramutation. Modern advances in gene regulation via epigenetic phenomena will be a central theme, focusing on chromatin remodeling, gene silencing and RNA interference as they pertain to organism development, with an emphasis on plants. Department of Molecular and Cellular Biology. (Offered in even-numbered years.)

Prerequisite(s): MBG*2020

Equate(s): MBG*4200

MBG*4160 Plant Breeding W (3-2) [0.50]

Application of genetic principles to plant improvement. Topics include breeding objectives, mating systems, selection, testing and germplasm maintenance of horticultural and crop plants. Department of Plant Agriculture.

Prerequisite(s): [MBG*2000 or (MBG*3100, AGR*2451/2 (for B.Sc.(Agr.) students only)], STAT*2040

MBG*4240 Applied Molecular Genetics W (3-0) [0.50]

Molecular and cellular aspects of biotechnology. In vitro manipulations of animal and plant cells. Genetic engineering in eukaryotes and development of transgenic organisms. Methods of gene therapy and molecular biology of cancer and its treatment. Department of Molecular and Cellular Biology.

Prerequisite(s): MBG*2020

MBG*4270 DNA Replication, Recombination and Repair W (3-0) [0.50]

This course will examine the DNA transactions that determine the structure of the function of the genome, with an emphasis on natural and synthetic mutagens and their mode of action, replication and recombination of genetic material, recognition and repair of DNA damage, developmentally-regulated changes in gene structure, inherited and somatic genetic diseases arising from abnormal DNA metabolism, and DNA sequence changes and chromosome alterations in evolution. Department of Molecular and Cellular Biology. (Offered in odd-numbered years.)

Prerequisite(s): MBG*2020

MBG*4300 Plant Molecular Genetics W (3-0) [0.50]

Molecular genetics of plants. Topics include: plant genome diversity and synteny; Arabidopsis thaliana genome, hormonal, environmental and developmental regulation of gene expression; chloroplast and mitochondrial genomes; and gene expression and silencing in transgenics. The course will be delivered using a lecture and paper discussion format. Students will learn and use a variety of computer techniques to search and analyze plant genome databases.

Prerequisite(s): MBG*2020

MBG*4500 Research Project in Molecular Biology and Genetics I S,F,W (0-12) [1.00]

Independent theoretical and laboratory research on a topic in the discipline under the supervision of individual faculty. Students must make arrangements with both a faculty supervisor and the course coordinator prior to preregistration.

Prerequisite(s): MBG*3350

Restriction(s): Registration in semester 7 or 8 of the B.Sc. program, Molecular Biology and Genetics major. Instructor consent required.

MBG*4510 Research Project in Molecular Biology and Genetics II S,F,W (0-12) [1.00]

Independent theoretical and laboratory research on a topic in the discipline under the supervision of individual faculty. Students must make arrangements with both a faculty supervisor and the course coordinator prior to preregistration.

Prerequisite(s): MBG*4500

Restriction(s): Registration in semester 7 or 8 of the B.Sc. program, Molecular Biology and Genetics major. Instructor consent required.

MBG*4600 Topics in Molecular Biology and Genetics S,F,W (1-3) [0.50]

Independent study of a current topic in Molecular Biology and Genetics, selected from the recent research literature and involving a review and critical appraisal of underlying experimental principles. The course comprises independent library research, participation in weekly meetings, and written and oral presentations. Students must make arrangements with both faculty supervisor and the course coordinator in a prior course selection period. Open to students in semesters 6, 7, and 8 of the B.Sc. Major in Molecular Biology and Genetics. Department of Molecular and Cellular Biology.

Prerequisite(s): MBG*3350

Restriction(s): MBG*4500, MBG*4510, MICR*4240. Instructor consent required.

Music

School of Fine Art and Music

Ensembles

Chamber Ensembles

Choir (Symphonic Choir, Chamber Choir, Siren-Women's Choir)

Concert Winds

Contemporary Music Ensemble

Early Music Ensemble

Jazz Band

Note: All ensembles are not necessarily offered every semester.

Solo Performance (Applied Music): Private instruction is offered in piano, voice, orchestral instruments, and various jazz and early instruments. In order to register in Applied Music (MUSC*1500), students must arrange an audition with the School of Fine Art and Music at the time of course selection. Auditions are held prior to the first day of classes each semester. In order to continue to the 2000 level of Applied Music, students must be in a Music Program (Honours major or minor, or General).

Applied Music courses are designed to be taken in successive semesters. Registration in this sequence following an interruption of more than one semester requires permission of the Director of the School. Students may be required to re-apply before registering to continue in Applied Music. Students must achieve a minimum grade of 70% in Applied Music courses in order to proceed to the next level.

Applied Composition: Private instruction is offered in music composition. In order to register in Applied Composition (MUSC*2410), students must submit a portfolio of compositions (scores and recordings) with the School of Fine Art and Music at the time of course selection. Interviews are held prior to the first day of classes each semester (see School of Fine Art and Music for interview schedule.) In order to enroll in Applied Composition, students must be registered in a Music program (Honours major or minor, or General, Area of Concentration).

Applied Composition courses are designed to be taken during successive Fall and Winter terms. If this sequence is interrupted for more than one semester, students may be required to re-apply (an interview and submission of a portfolio) before registering to continue in Applied Composition. Students must achieve a minimum grade of 70% in Applied Composition courses in order to proceed to the next level.

Topics Courses: The School will normally offer a Topics course each Fall and Winter. See courses MUSC*3800 to MUSC*3870. Please consult the School of Fine Art and Music for specific titles of courses to be offered.

MUSC*1060 Introduction to Music F,W (3-0) [0.50]

An introductory course intended for students with NO previous experience in music. The main concepts and terminology of music from the Medieval period through the 20th-century will be explored in connection with the study of selected musical works. (Also offered through distance education format.)

Restriction(s): MUSC*2280, MUSC*2600, MUSC*2610, MUSC*2620, MUSC*3630

MUSC*1090 Physics of Music W (3-0) [0.50]

A course designed for arts and social science students with an interest or background in music. The fundamentals of vibrations and waves will be introduced and applied to a study of archetypal instruments. The psychoacoustic basis of pitch and loudness will be discussed. (Also listed as PHYS*1810.) (Offered in even-numbered years.)

Restriction(s): PHYS*1810; students who have standing in any other 1000 level Physics course (except PHYS*1020 or PHYS*1600) may enrol in this only if they are completing an honours or general program in Music, in which case permission of the instructor is required.

MUSC*1130 Introduction to Musicianship S,F,W (0-8) [0.50]

Fundamentals of ear training, sight-singing, keyboard, and written skills (rudiments such as scales, intervals and basic chord identification) are introduced. Proficiency on an instrument is not required, but previous experience with note-reading is expected. MUSC*1130 cannot be counted toward a specialization in music. (Offered through distance education format only.)

Equate(s): MUSC*1120

Restriction(s): MUSC*1180

MUSC*1180 Musicianship I F,W (3-0) [0.50]

Ear training through dictation and sight-singing exercises; C clefs; elementary improvisation and harmonization.

MUSC*1250 Melody and Counterpoint W (3-0) [0.50]

An introduction to the linear aspects of music through the study of melody, species counterpoint, and figured bass.

Prerequisite(s): 1 of MUSC*1120, MUSC*1130, MUSC*1180, MUSC*2180

MUSC*1500 Applied Music I F,W (1-6) [0.50]

Individual instruction in the technical and stylistic aspects of artistic solo instrumental or vocal performance. In order to register for this course, students must arrange an audition with the School of Fine Art and Music at the time of course selection.

Restriction(s): Successful completion of an audition. Registration in semesters 1 to 4.

MUSC*1510 Applied Music II S,F,W (1-6) [0.50]

A continuation of MUSC*1500.

Prerequisite(s): A minimum grade of 70% in MUSC*1500.

MUSC*2010 The Musical Avant-Garde F (3-0) [0.50]

An introduction to the avant-garde musical life of the 20th century including the works of Debussy, Stravinsky, Satie, Schoenberg, Cage, Cowell, and others. (Offered in even-numbered years.)

Restriction(s): MUSC*3630

MUSC*2030 Music in Canada F (3-0) [0.50]

The background and development of musical life in Canada. Cultivation of understanding of Canadian music using recorded examples with emphasis on 20th-century compositions. (Offered in odd-numbered years.)

MUSC*2100 Creating Music on the Computer F,W (3-0) [0.50]

An introduction to computer technologies as they apply to the creation and manipulation of music. Topics will be drawn from the areas of sound synthesis and processing, recording, encoding, and transcription. The course will include a classroom and an applied component.

Prerequisite(s): MUSC*1180 or MUSC*2180. Some computer experience is recommended.

MUSC*2110 Music of the Circum-Atlantic and the Americas F (3-0) [0.50]

This course offers an ethnomusicological examination of the musical life of West and Central Africa, the Caribbean, and the Americas. (Offered in even-numbered years.)

Restriction(s): MUSC*2350

MUSC*2140 History of Jazz F (3-0) [0.50]

A survey of the major styles, personalities, and performances of the jazz tradition in terms of its social and cultural contexts through the examination of jazz texts and commentary, autobiographies of musicians, and recorded examples of important performances. (Also offered through distance education format.)

MUSC*2150 Music and Popular Culture F,W (3-0) [0.50]

A survey of the major genres, styles, personalities and performance of popular music primarily in the 20th-century through lectures, listening, discussion and reading. Issues such as the relationships between popular music and race, class, technology, and art will be examined. Technical knowledge of music is not required.

MUSC*2180 Musicianship II F,W (3-0) [0.50]

A continuation of MUSC*1180.

Prerequisite(s): MUSC*1180

MUSC*2200 Music of the Near and Far East W (3-0) [0.50]

An ethnomusicological examination of the musical life of the Islamic world, South Asia, Indonesia, and the Far East. (Offered in even-numbered years.)

Equate(s): MUSC*2350

MUSC*2220 Electronica: Music in the Digital Age W (3-0) [0.50]

This course will provide an introduction to digital music, from the initial "cybernetic" experiments of the 1950s to the evolution of software tools for synthesizing, processing, and analyzing sound to the development of music/audio-related hardware such as digital synthesizers, samplers, recorders, mixers, and workstations. An overview of musical genres utilizing digital technology will be presented (experimental, techno, dance, rap, ambient, etc.). Digital technology, including the revolutionary MIDI protocol, will be set into historical context, looking at musical and social developments and milestones, as well as related non-digital technology such as analog synthesizers and multi-track recorders.

MUSC*2280 Masterworks of Music F,W (0-10) [0.50]

Selected musical works from 1600 to the present will be studied with reference to the historical, literary, and artistic milieu in which they were written and performed. Previous familiarity with basic musical terminology and note reading is required. This is a web-based course. (Offered through distance education format only.)

MUSC*2360 Tonal Harmony I F (3-0) [0.50]
The study of diatonic harmony: triads, progression, secondary dominants, harmonization of melodies and basses; dissonance treatment; diatonic modulation. <i>Prerequisite(s):</i> MUSC*1250 <i>Equate(s):</i> MUSC*2250
MUSC*2370 Tonal Harmony II W (3-0) [0.50]
A continuation of MUSC*2360 which introduces chromatic harmonies (augmented and Neapolitan sixth chords), suspension chords, linear structures, and non-diatonic modulation. <i>Prerequisite(s):</i> MUSC*2360 <i>Equate(s):</i> MUSC*2250
MUSC*2410 Applied Composition I F,W (1-6) [0.50]
This course offers individual instruction in the technical and aesthetic aspects of music composition. In order to register for this course, students must submit a portfolio and arrange for an interview with the School of Fine Arts and Music at the time of course selection. <i>Prerequisite(s):</i> (MUSC*1180 or MUSC*2180), MUSC*1250. <i>Restriction(s):</i> Instructor consent and registration in a Music Program (Honours major or minor, General).
MUSC*2420 Applied Composition II F,W (1-6) [0.50]
This course is a continuation of MUSC*2410. <i>Prerequisite(s):</i> A minimum grade of 70% in MUSC*2410. <i>Restriction(s):</i> Registration in a Music Program (Honours major or minor, General).
MUSC*2500 Applied Music III S,F,W (1-6) [0.50]
A continuation of MUSC*1510. <i>Prerequisite(s):</i> (MUSC*1180 or MUSC*2180), a minimum grade of 70% in MUSC*1510. (MUSC*1180 or MUSC*2180 may be taken as corequisite) <i>Restriction(s):</i> Registration in a Music specialization.
MUSC*2510 Applied Music IV S,F,W (1-6) [0.50]
A continuation of MUSC*2500. <i>Prerequisite(s):</i> A minimum grade of 70% in MUSC*2500, (1 of MUSC*2600, MUSC*2610, MUSC*2620). <i>Restriction(s):</i> Registration in a Music specialization.
MUSC*2530 Instrumental Ensembles I F,W (0-2) [0.25]
The study and performance of selected instrumental music through participation in one of the School's ensembles: Chamber Ensemble, Concert Winds, Contemporary Music Ensemble, Jazz Band, or the Early Music Ensemble. In order to register for an ensemble, the student must arrange for an audition with the School of Fine Art and Music. Auditions will be held prior to the first day of classes each Fall and Winter semester. Students must check with the School of Fine Art and Music office for audition dates. Students are encouraged to audition for an ensemble in the Fall semester and to participate in it for both Fall and Winter semesters. Not all ensembles will be able to accept new members in Winter. Consult the School of Fine Art and Music for further information. <i>Restriction(s):</i> Successful completion of an audition. Instructor consent required.
MUSC*2540 Instrumental Ensembles II F,W (0-2) [0.25]
A continuation of MUSC*2530. <i>Prerequisite(s):</i> MUSC*2530 <i>Restriction(s):</i> Instructor consent required.
MUSC*2550 Choral Ensembles I F,W (0-2) [0.25]
The study and performance of selected choral literature through participation in one of the School's ensembles; the University of Guelph Symphonic Choir, the Chamber Choir, or Siren. In order to register for an ensemble, the student must arrange for an audition with the School of Fine Art and Music. Auditions will be held prior to the first day of classes each Fall and Winter semester. Students must check with the School of Fine Art and Music office for audition dates. Students are encouraged to audition for an ensemble in the Fall semester and to participate in it for both Fall and Winter semesters. Not all ensembles will be able to accept new members in Winter. Consult the School of Fine Art and Music for further information. <i>Equate(s):</i> MUSC*2520 <i>Restriction(s):</i> Successful completion of an audition. Instructor consent required.
MUSC*2560 Choral Ensembles II F,W (0-2) [0.25]
A continuation of MUSC*2550. <i>Prerequisite(s):</i> MUSC*2550 <i>Equate(s):</i> MUSC*2520 <i>Restriction(s):</i> Instructor consent required.

MUSC*2570 Keyboard Accompaniment I F,W (0-2) [0.25]
Development of sight-reading and accompaniment skills for pianists in close coordination with vocal and instrumental applied music students. <i>Prerequisite(s):</i> MUSC*2510 <i>Restriction(s):</i> Instructor consent required.
MUSC*2580 Keyboard Accompaniment II F,W (0-2) [0.25]
A continuation of MUSC*2570. <i>Prerequisite(s):</i> MUSC*2570
MUSC*2600 Music History: Chant to Josquin F (3-0) [0.50]
A survey of the history of music from chant to the mid-Renaissance. Principal genres and composers from the pre-Christian era to Josquin will be studied. <i>Prerequisite(s):</i> 1 of MUSC*1120, MUSC*1130, MUSC*1180, MUSC*2180 <i>Equate(s):</i> MUSC*2160
MUSC*2610 Music History: The Reformation to J.S. Bach W (3-0) [0.50]
A survey of the history of music from the mid-16th century to the end of the Baroque era. Principal genres and composers from the beginning of the Italian madrigal to J.S. Bach will be studied. <i>Prerequisite(s):</i> 1 of MUSC*1120, MUSC*1130, MUSC*1180, MUSC*2180 <i>Equate(s):</i> MUSC*2160
MUSC*2620 Music History: Classical and Romantic Eras F (3-0) [0.50]
A survey of the history of music from the classical era to the late 19th century. Principal genres and composers from C.P.E. Bach to Brahms and Wagner will be studied. <i>Prerequisite(s):</i> 1 of MUSC*1120, MUSC*1130, MUSC*1180, MUSC*2180 <i>Equate(s):</i> MUSC*2170
MUSC*3040 Analytical Method F (3-0) [0.50]
This course offers instruction in an established analytical method appropriate to a pre-tonal, tonal, post-tonal, or twelve-tone repertoire, through exercises in analysis and relevant readings. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> MUSC*2370
MUSC*3150 Music in London F (3-0) [0.50]
A lecture/seminar course that will examine in depth choral and instrumental music of major composers from representative periods and media, performed at London, England. Compositions will be analyzed in relation to their stylistic technique, formal structure, and historical place in the repertoire of music. A professor of music will present weekly seminars, arrange assignments, and give personal supervision in London. <i>Restriction(s):</i> Admission to the London Semester.
MUSC*3290 Musicianship III F (3-0) [0.50]
A study of the fundamentals of conducting techniques. Emphasis on practical application to choral and instrumental organizations; score reading and analysis and interpretation of literature. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> (MUSC*2180, MUSC*2360) or permission of the instructor <i>Equate(s):</i> MUSC*2290
MUSC*3410 Applied Composition III F,W (1-6) [0.50]
This course is a continuation of MUSC*2420. (First offering - Fall 2008) <i>Prerequisite(s):</i> A minimum grade of 70% in MUSC*2420 and (2 of MUSC*2530, MUSC*2540, MUSC*2550, MUSC*2560). <i>Restriction(s):</i> Registration in a Music Program (Honours major or minor, General).
MUSC*3420 Applied Composition IV F,W (1-6) [0.50]
This course is a continuation of MUSC*3410. (First offering - Winter 2009) <i>Prerequisite(s):</i> A minimum grade of 70% in MUSC*3410. <i>Restriction(s):</i> Registration in a Music Program (Honours major or minor, General).
MUSC*3500 Applied Music V S,F,W (1-6) [0.50]
A continuation of MUSC*2510; restricted to students in a Music program (Honours major or minor or General, area of concentration). <i>Prerequisite(s):</i> 3.00 credits in music courses including a minimum grade of 70% in MUSC*2510 and (2 of MUSC*2530, MUSC*2540, MUSC*2550, MUSC*2560). <i>Restriction(s):</i> Registration in a Music Program (Honours major or minor, General, Area of Concentration).

MUSC*3510 Applied Music VI S,F,W (1-6) [0.50]
A continuation of MUSC*3500 including preparation and performance of a juried recital; restricted to students in a Music program (honours major or minor or general, area of concentration).
<i>Prerequisite(s):</i> 4.00 credits in music courses including a minimum grade of 70% in MUSC*3500
<i>Restriction(s):</i> Registration in a Music Program (Honours major or minor, General, Area of Concentration).
MUSC*3550 Advanced Music Ensemble I F,W (0-3) [0.25]
The study and performance of selected instrumental or vocal chamber music through participation in a small ensemble under the guidance of a supervising instructor. Students will organize the ensemble, which normally consists of two to six vocalists and/or instrumentalists, design a project with the instructor, and submit the proposal to the Director of the School of Fine Art and Music for approval by the last day of course selection in Fall (for Winter) or Winter (for the following Fall). A form is available from the School office for this purpose.
<i>Prerequisite(s):</i> MUSC*2500, (2 of MUSC*2530, MUSC*2540, MUSC*2550, MUSC*2560)
<i>Restriction(s):</i> Registration in a Music Program (Honours major or minor, General, Area of Concentration). Instructor consent required.
MUSC*3560 Advanced Music Ensemble II F,W (0-3) [0.25]
A continuation of MUSC*3550.
<i>Prerequisite(s):</i> MUSC*3550
<i>Restriction(s):</i> Instructor consent required.
MUSC*3630 20th Century Music F (3-0) [0.50]
This course examines music from the late 19th century (Debussy and post-romantic composers) to the present from both historical and theoretical perspectives.
<i>Prerequisite(s):</i> MUSC*2370 , MUSC*2620
MUSC*3740 Issues in Popular Music Studies W (3-0) [0.50]
This course examines the rise and impact of the cultural industries on production and consumption of music, the development of transnational popular music, and the role popular music plays in the politics of social identity.
<i>Prerequisite(s):</i> 1 of MUSC*1120 , MUSC*1130, MUSC*1180, MUSC*2180
MUSC*3750 Popular Musics of the World W (3-0) [0.50]
The major styles and genres of popular musics around the world, with an emphasis on musical style and its relationship to social processes.
<i>Prerequisite(s):</i> (MUSC*1180 or MUSC*2180), MUSC*2150
The following topics courses normally focus on current areas of faculty research, such as recent developments in jazz research, the reception of the music of Beethoven, the music of Gabriel Faure, improvisational studies, Lied and Art Song, Russian music and literature, and black music of the circum-Atlantic and digital music. It is expected that students will have completed at least 10.00 credits before taking these upper-level courses.
MUSC*3800 Topics in Music U (3-0) [0.50]
A course which examines selected topics in music history, performance practice, analysis, and music within its cultural context.
<i>Restriction(s):</i> Instructor consent required.
MUSC*3810 Topics in Music U (3-0) [0.50]
A course which examines selected topics in music history, performance practice, analysis, and music within its cultural context.
<i>Restriction(s):</i> Instructor consent required.
MUSC*3820 Topics in Ethnomusicology U (3-0) [0.50]
Topics for this course will normally include some combination of the following: a specific world music tradition, ethnomusicological issues, theories, or methods. Subject matter will vary according to the instructor.
<i>Prerequisite(s):</i> MUSC*2110 or MUSC*2200
<i>Restriction(s):</i> Instructor consent required.
MUSC*3830 Topics in Ethnomusicology U (3-0) [0.50]
Topics for this course will normally include some combination of the following: a specific world music tradition, ethnomusicological issues, theories, or methods. Subject matter will vary according to the instructor.
<i>Prerequisite(s):</i> MUSC*2110 or MUSC*2200
<i>Restriction(s):</i> Instructor consent required.

MUSC*3840 Topics in Music Theory U (3-0) [0.50]
An analytical investigation of a selected topic in music. Topics will rotate on an annual basis and may include advanced theoretical study of Western art music as well as jazz theory.
<i>Restriction(s):</i> Instructor consent required.
MUSC*3850 Topics in Music Theory U (3-0) [0.50]
An analytical investigation of a selected topic in music. Topics will rotate on an annual basis and may include advanced theoretical study of Western art music as well as jazz theory.
<i>Restriction(s):</i> Instructor consent required.
MUSC*3860 Topics in Digital Music U (3-0) [0.50]
This is a course which focuses on a specific area of digital music production. Topics may include advanced audio production, advanced MIDI sequencing, advanced music notation/instrumentation, synthesis and signal processing, music-oriented computer programming, or interactive computer music. Normally, a major creative project will be completed and presented as an outcome of the course.
<i>Prerequisite(s):</i> MUSC*2100, (MUSC*2010 or MUSC*2220)
<i>Restriction(s):</i> Instructor consent required.
MUSC*3870 Topics in Digital Music U (3-0) [0.50]
This is a course which focuses on a specific area of digital music production. Topics may include advanced audio production, advanced MIDI sequencing, advanced music notation/instrumentation, synthesis and signal processing, music-oriented computer programming, or interactive computer music. Normally, a major creative project will be completed and presented as an outcome of the course.
<i>Prerequisite(s):</i> MUSC*2100, (MUSC*2010 or MUSC*2220)
<i>Restriction(s):</i> Instructor consent required.
MUSC*4040 Analytical Method W (3-0) [0.50]
This seminar in advanced analysis examines complex applications of the theoretical method studied in the prerequisite course. (Offered in even-numbered years.)
<i>Prerequisite(s):</i> MUSC*3040
<i>Restriction(s):</i> Instructor consent required.
MUSC*4200 Directed Readings I S,F,W (3-0) [0.50]
A reading course designed to enable the student to investigate a topic in music not otherwise available in the curriculum. The student will design a course of readings and assignments with the instructor and submit the proposal to the Director of the School of Fine Art and Music for approval by the last day of course selection in the previous semester.
<i>Prerequisite(s):</i> Completion of the music core.
<i>Restriction(s):</i> Instructor consent required.
MUSC*4210 Directed Readings II S,F,W (3-0) [0.50]
A reading course designed to enable the student to investigate a topic in music not otherwise available in the curriculum. The student will design a course of readings and assignments with the instructor and submit the proposal to the Director of the School of Fine Art and Music for approval by the last day of course selection in the previous semester.
<i>Prerequisite(s):</i> Completion of the music core.
<i>Restriction(s):</i> Instructor consent required.
MUSC*4240 Experiential Learning in Music S,F,W (3-0) [0.50]
This experiential learning option provides qualified undergraduate students with an opportunity to design an independent program that integrates academic study, such as readings or assignments, with off-campus work or performance (paid or volunteer). Written proposals, signed by the instructor, must be submitted to the Director of the School for approval by the last day of course selection in the previous semester.
<i>Prerequisite(s):</i> 3.00 credits in Music
<i>Restriction(s):</i> Instructor consent required.
MUSC*4401 Honours Music Project S,F,W (3-0) [0.50]
First part of the two-semester course MUSC*4401/2. Refer to MUSC*4401/2 for course description.
<i>Prerequisite(s):</i> Completion of the music core.
<i>Restriction(s):</i> Permission of the School and registration in an honours major in music (students who wish to propose a recital must also have completed MUSC*3510 with a minimum grade of 80%).

MUSC*4401/2 Honours Music Project S-F,W,W-S [1.00]

Preparation of a major theoretical or historical paper or presentation of a full-length recital. Projects are subject to approval of the School, and must be submitted to the Director, on school forms, by the last day of course selection in the previous semester. This is a two-semester course offered over consecutive semesters. When you select it you must select MUSC*4401 in the first semester and MUSC*4402 in the second semester. A grade will not be assigned to MUSC*4401 until MUSC*4402 has been completed.

Prerequisite(s): Completion of the music core.

Restriction(s): Permission of the School and registration in an honours major in music (students who wish to propose a recital must also have completed MUSC*3510 with a minimum grade of 80%).

MUSC*4402 Honours Music Project S,F,W (3-0) [0.50]

Second part of the two-semester course MUSC*4401/2. Refer to MUSC*4401/2 for course description.

Prerequisite(s): MUSC*4401

Nutrition

Department of Animal and Poultry Science

Department of Family Relations and Applied Nutrition

Department of Human Health and Nutritional Sciences

NUTR*1010 Nutrition and Society F,W (3-0) [0.50]

The significance of nutrition in terms of individuals and societies throughout the world. Factors involved in the application of knowledge of nutritional needs and food selection. Department of Family Relations and Applied Nutrition. (Also offered through distance education format.)

NUTR*2050 Family and Community Nutrition F (3-0) [0.50]

Nutritional needs through the life cycle and their significance in family and community health. Department of Family Relations and Applied Nutrition.(Also offered through distance education format.)

Prerequisite(s): NUTR*1010

Restriction(s): NUTR*3010

NUTR*2150 Introduction to Nutritional and Food Sciences F (3-0) [0.50]

This interdisciplinary course provides an introduction to the Food and Nutritional Sciences from both historical and modern perspectives. Major themes are the nutritional and functional properties of food, nutrient assimilation, food preservation and safety, and the interactions between food processing, diets and health. The course is taught by the Department of Food Science. (Also listed as FOOD*2150.)

Prerequisite(s): BIOL*1040, (CHEM*1040 or CHEM*1300)

Equate(s): FOOD*2150

Restriction(s): AGR*3330 , FOOD*2010, FOOD*3070 . Not available to students registered in Applied Human Nutrition major.

NUTR*3040 Clinical Nutrition I W (3-0) [0.50]

Epidemiology, pathophysiology, and role of nutrition in the prevention and management of several major chronic conditions including cardiovascular diseases, disorders of energy balance and diabetes mellitus, with emphasis on high risk individual management approaches. Department of Family Relations and Applied Nutrition.

Prerequisite(s): BIOM*3100, BIOC*3560, FRHD*3070, NUTR*2050, (NUTR*3190 or NUTR*3210), STAT*2090

Restriction(s): Registration is limited to students registered in the Applied Human Nutrition Major.

NUTR*3110 Food Security W (3-0) [0.50]

The prevalence of food insecurity in Canada and selected industrialized and non-industrialized countries is examined. The course will review environmental, social, and other factors associated with food insecurity and take critical look at the effectiveness of programs and policies designed to improve food security.

Prerequisite(s): NUTR*2050

Restriction(s): Registration is limited to students registered in the Applied Human Nutrition Major.

NUTR*3210 Fundamentals of Nutrition F,W (3-0) [0.50]

This is the foundation course for the study of nutrition. The occurrence, uptake and metabolic role of nutrients will be discussed in relation to growth, reproduction and longevity in human subjects, domestic animals and other species. Department of Human Health and Nutritional Sciences.

Prerequisite(s): BIOC*2580

Restriction(s): NUTR*3190

NUTR*3330 Micronutrients, Phytochemicals and Health F (3-0) [0.50]

The course emphasizes the biochemical basis for the dietary essentiality of vitamins and minerals. The course extends the fundamentals of nutrition to include conditional essentiality of micronutrients, biochemical individuality and the use of micronutrient supplementation to promote human and animal health. Both plant and animal sources of nutrients are discussed. Department of Human Health and Nutritional Sciences.

Prerequisite(s): NUTR*3190 or NUTR*3210

NUTR*3390 Applied Nutritional and Nutraceutical Sciences I F (2-3) [0.50]

This course will introduce and develop key concepts of the applied aspects of the Nutritional and Nutraceutical Sciences. Enrichment of foods with health protectant chemicals, establishing biomarkers and risk indicators of disease, testing of bioavailability/efficacy to support basic health claims, health assessment and nutrigenomic analysis as adjuvants in the effective use of functional foods and nutraceuticals, and regulatory and marketing/consumer issues are topics that will be addressed.

Prerequisite(s): NUTR*3190 or NUTR*3210

Restriction(s): Registration in the Nutritional and Nutraceutical Sciences Major and the Nutritional Sciences and the Functional Food and Nutraceuticals Minors.

NUTR*4010 Nutritional Assessment F (3-3) [0.75]

Principles and methods used in nutritional assessment of individuals and populations in health and disease states. Dietary, anthropometric and biochemical techniques will be primary components. Nutritional screening, advanced techniques for body composition assessment, physical exam and clinical indicators will also be addressed. Laboratories will provide the students with hands-on training of diet and anthropometric methods. Cases will be used to develop the understanding of the concepts discussed in lectures and expand on the ethical treatment of individual and group data. Significant independent learning will be required. Department of Family Relations and Applied Nutrition.

Prerequisite(s): NUTR*2050, (NUTR*3190 or NUTR*3210)

Restriction(s): Registration in the 4th year of the Applied Human Nutrition Major.

NUTR*4040 Clinical Nutrition II F (3-3) [0.75]

A continuation of NUTR*3040. This lecture and laboratory based course is concerned with the application of nutrition to clinical problems. Methods and content of medical nutrition therapy in prevention and treatment of gastrointestinal, renal, hepatic diseases and catabolic states will be emphasized. Ethical issues in nutrition management of disease and health professional practice will be addressed. A case study based course. Department of Family Relations and Applied Nutrition.

Prerequisite(s): NUTR*3040, BIOM*3110

Restriction(s): Registration in the 4th year of the Applied Human Nutrition Major.

NUTR*4070 Nutrition Education F (3-0) [0.50]

Methods and approaches in nutrition education. Community programs in nutrition for different age groups; dietary counselling; nutrition education in the preschool, in prenatal and other specialized programs. Department of Family Relations and Applied Nutrition.

Prerequisite(s): FRHD*3400, NUTR*2050

Restriction(s): Registration in B.A.Sc. Program.

NUTR*4090 Functional Foods and Nutraceuticals W (3-0) [0.50]

The course examines the relation of functional foods and nutraceuticals (FFN) to foods and drugs. The safety and efficacy of individual FFN products, and the regulatory issues that influence the development and commercialization of FFN in global markets are emphasized. The course is co-operatively taught by the Department of Human Health and Nutritional Sciences and the Department of Food Science. (Also listed as FOOD*4090.)

Prerequisite(s): NUTR*3190 or NUTR*3210

Equate(s): FOOD*4090

NUTR*4200 Nutrition and Immune Function W (3-0) [0.50]

This course integrates existing knowledge in several areas - nutrition, metabolism and immunology. Of particular interest are the underlying mechanisms of nutritional immunomodulation with particular reference to the human problem of protein-energy malnutrition. Food sensitivities and the immunological functions of milk will also be considered. Department of Human Health and Nutritional Sciences. (Offered in odd-numbered years.)

Prerequisite(s): NUTR*3190 or NUTR*3210

NUTR*4210 Nutrition, Exercise and Energy Metabolism F (3-0) [0.50]

Energy metabolism will be considered under the headings: thermodynamic principles, energy deposition and hormonal control of metabolism; nutrition, exercise and environmental influences on energy balance and enzyme adaptation; nutrition and exercise in the control of body composition. Department of Human Health and Nutritional Sciences.

Prerequisite(s): (NUTR*3190 or NUTR*3210), (BIOM*3110 or HK*3940)

NUTR*4320 Nutrition and Metabolic Control of Disease W (3-0) [0.50]

A discussion of disorders of metabolism, either inherited or acquired, in which nutrition plays a major role in the etiology, pathogenesis, or treatment. The nutritional control of the affected metabolic pathways and the interaction of nutrition with exercise, drugs and gene therapy will be presented. Department of Human Health and Nutritional Sciences.

Prerequisite(s): (NUTR*3190 or NUTR*3210), (1 of BIOM*3110, HK*3940, ZOO*3210)

NUTR*4330 Applied Nutritional and Nutraceutical Sciences II W (2-3) [0.50]

Laboratory and other investigational techniques are covered, together with their underlying concepts. The course is designed to enhance understanding of the design and use of nutraceuticals for human and animal health. Limited to students in Nutritional and Nutraceutical Sciences Major. Department of Human Health and Nutritional Sciences.

Prerequisite(s): (NUTR*3190 or NUTR*3210), NUTR*3330, NUTR*3390, HK*3940

Restriction(s): Registration in B.Sc. Program (Nutritional & Nutraceutical Sciences major).

NUTR*4350 Current Issues F (3-0) [0.50]

This course discusses controversial and/or emerging topics in Human Biology and Nutritional and Nutraceutical Sciences. Topics of current interest will be announced during the course selection period. Department of Human Health and Nutritional Sciences.

Prerequisite(s): (NUTR*3190 or NUTR*3210), HK*3940

Restriction(s): Instructor consent required.

NUTR*4360 Current Issues in Nutrigenomics W (3-0) [0.50]

This course discusses controversial and/or emerging topics in Human Biology and Nutritional and Nutraceutical Sciences as it relates to nutrigenomics. Department of Human Health and Nutritional Sciences.

Prerequisite(s): (NUTR*3190 or NUTR*3210), HK*3940

NUTR*4510 Toxicology, Nutrition and Food F (3-0) [0.50]

The role of foods, herbals and nutraceuticals as sources of antinutrients, natural toxins and environmental contaminants. The impact of toxic exposures on nutritional status. The impact of nutritional status on safe metabolism of toxins, and the use of this knowledge in the design of functional foods. Assessing the risk of genetically modified foods and radioactive contamination of a food supply. Department of Human Health and Nutritional Sciences.

Prerequisite(s): NUTR*3190 or NUTR*3210

NUTR*4810 Applied Human Nutrition Thesis I U (3-0) [0.50]

Planning, developing and writing a research proposal under individual faculty supervision. Topic to be decided by the student in consultation with the supervisory faculty member before course selection or registration period. Department of Family Relations and Applied Nutrition.

Prerequisite(s): FRHD*3070, NUTR*2050, NUTR*3040

Restriction(s): Instructor consent required.

NUTR*4850 Field Experience in Nutrition Education W (2-4) [0.50]

Supervised experience in nutrition education and seminar. Students will apply principles of program planning, nutrition education theory and professional behaviour in a community setting. Placements may be arranged in institutional or community health settings, educational facilities, social services, or food industry. Seminar topics include professional ethics, exploring values, and issues management. Department of Family Relations and Applied Nutrition.

Prerequisite(s): FRHD*3400, NUTR*4040, NUTR*4070

Restriction(s): Instructor consent required.

NUTR*4900 Selected Topics in Human Nutrition W (3-0) [0.50]

Reading and discussion on selected areas in human nutrition and its application; formal class reports and term papers. Primarily for Applied Human Nutrition majors. Department of Family Relations and Applied Nutrition.

Prerequisite(s): FRHD*3070, NUTR*3040, NUTR*4010

Restriction(s): Registration in the 4th year of the Applied Human Nutrition Major.

NUTR*4910 Applied Human Nutrition Thesis II U (6-0) [1.00]

The student will conduct and write an undergraduate thesis under the direction of a faculty member.

Prerequisite(s): NUTR*4810

Pathology

Department of Pathobiology

Additional course listings may be found in the course descriptions for Veterinary Medicine.

PATH*3040 Principles of Parasitology W (3-3) [0.50]

Parasitism is the most common biological association on the planet; virtually all organisms are parasitized by numerous parasites and many, such as the protists that cause malaria, are responsible for serious medical and/or veterinary diseases. This course will provide an in depth introduction to parasites and parasitism by exploring common protists, helminths and arthropods that infect animals and humans globally. The nature of parasitism will be explored by examining the development and transmission of many common parasitic agents, including their pathogenesis, zoonotic potential, diagnosis and treatment options.

Prerequisite(s): 10.00 credits including at least 1.50 credits in biology.

PATH*3610 Principles of Disease W (3-0) [0.50]

A course designed for students with particular interests in nutrition and biology. The course presents basic concepts of disease in the cells, tissues, organs and fluids of the body. Emphasis will be on disease processes resulting from physical, toxic and microbiological and other causes. (Also offered through distance education format.)

Prerequisite(s): 1.50 credits in biology

Restriction(s): PATH*3600

PATH*4100 Diseases of Aquatic Animals F (2-2) [0.50]

A course designed to familiarize the fisheries manager, researcher or veterinarian with the basic principles of diagnosis, prevention, and control of disease of free living and captive aquatic animals, with emphasis on fish.

Prerequisite(s): 1.50 credits in biology

Pharmacology

Department of Biomedical Sciences.

For course listings and descriptions see Biomedical Sciences.

Additional course listings may be found in the course descriptions for Veterinary Medicine and Toxicology.

Philosophy

Department of Philosophy

Note: Specific descriptions of all courses to be offered in a given semester will be available from the Department of Philosophy in each preceding semester. Students are advised to consult these descriptions. Different sections of a course often emphasize different aspects of that course.

- All 2000 level philosophy courses are open to students who have completed 5.00 credits or who have completed one of PHIL*1000, PHIL*1010, PHIL*1050.
- Unless otherwise noted, 3000 level philosophy courses are open to students who have completed at least 1.50 credits in philosophy or 7.50 credits.
- For most 4000 level courses, students are expected to have completed at least 1.00 credits in philosophy at the 3000 level. Some 4000 level credits have specific prerequisites, e.g. PHIL*4320, PHIL*4360 (see course descriptions in the following pages). If a student is taking several credits with such prerequisites, then the number of other philosophy credits which need to be completed may exceed the general requirement of 1.00 credits at the 3000 level. PHIL*4310 is designed to be open to seventh and eighth semester students who have no previous philosophy credit. If in doubt about being well prepared for a particular course, the student should consult with either the instructor or the chair of the department.
- Students may receive credit for PHIL*1000, PHIL*1010 and PHIL*1050, but only one may be counted towards the minimum number of philosophy credits required for a degree in philosophy. Students intending to proceed in the discipline at the 2000 level are advised to take only 0.50 credits at the 1000 level.

PHIL*1000 Introductory Philosophy: Major Texts F,W (3-0) [0.50]

An introduction to philosophy through primary texts in the history of philosophy, with emphasis upon traditional topics such as the nature of knowledge and the different types of knowledge, the relationship between the mind and the body, the nature of good and evil, and the nature of sound argument.

PHIL*1010 Introductory Philosophy: Social and Political Issues F,W (3-0) [0.50]

An introduction to philosophy, with particular emphasis upon important problems facing society today, such as punishment, animal rights, discrimination, war and violence, equality and property and the market as a value system. Some consideration of the elements of argumentation will also occur.

PHIL*1050 Introductory Philosophy: Basic Problems F,W (3-0) [0.50]

An introduction to philosophy through the exploration of basic perennial philosophical problems and questions, such as whether there is free will, a God, objective right and wrong, genuine knowledge of the world, and other topics. The readings for the course will consist primarily of 20th century philosophical writing. Some consideration of the elements of argumentation will also occur.

PHIL*2030 Philosophy of Medicine F,W (3-0) [0.50]

An examination of philosophical and ethical issues that arise in human and veterinary medicine, including such topics as the definitions of disease and health, the status of medicine as a science, the role of values in medical research and medical practice, the doctor-patient relationship, psychiatry and the control of human behaviour, and the ethics of genetic counselling.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2060 Philosophy of Feminism I W (3-0) [0.50]

An examination of metaphysical, epistemological and ethical issues in feminist philosophy, including such topics as the nature and consequences of patriarchy, human nature, sexual divisions of labour, women's studies, rationalizations of inequalities and explorations into a contemporary feminist agenda for social, political and economic changes.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2070 Philosophy of the Environment W (3-0) [0.50]

A critical examination of a variety of current ways of thinking about the environment, aimed at developing a satisfactory philosophical approach, especially from an ethical perspective. (Also offered through distance education format.)

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2100 Critical Thinking F,W (3-0) [0.50]

A course designed to develop clarity of thought and method in the analysis and construction of arguments. By contrast to PHIL*2110, the emphasis here is upon informal principles of critical thinking and arguments stated in terms of ordinary language. Topics include the nature and methods of arguing, classification, definition and fallacies.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2110 Elementary Symbolic Logic W (3-0) [0.50]

A study of the basic principles and techniques of formal logic. The analysis of the logical structure of sentences and arguments is explored, together with the fundamental principles of elementary sentential logic and quantification.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2120 Ethics F,W (3-0) [0.50]

An examination of competing ethical theories (subjectivism, intuitionism, relativism, utilitarianism, egoism, deontology) with a view to assessing their theoretical value as well as their ability to provide practical guidance and to resolve moral dilemmas. (Also offered through distance education format.)

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2130 Philosophy of Religion F (3-0) [0.50]

A consideration of various philosophical questions concerning religion, such as arguments for the existence of God, the problem of evil, the meaning of religious language, the significance of mystical experience, human immortality. (Offered in odd-numbered years.)

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2140 History of Greek and Roman Philosophy F (3-0) [0.50]

A survey of Western philosophy from the Pre-Socratics (6th-century, B.C.) to Plotinus (3rd century, A.D.).

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2160 Modern European Philosophy to Hume W (3-0) [0.50]

A survey of European philosophy from the Renaissance (15th-century) to David Hume (mid-18th century).

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2170 Existentialism W (3-0) [0.50]

Existentialism is a philosophy built around the experience of human freedom. This course focuses on the character of the subject who makes choices, and on the personal and political responsibilities that attach to the making of decisions. The course will examine this and other themes associated with Existentialism through nineteenth and twentieth century representatives, which may include Kierkegaard, Sartre, de Beauvoir, Camus and others.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2180 Philosophy of Science F (3-0) [0.50]

An examination of competing theories concerning the nature of science and its modes of inquiry, and the relationship between theories and data and between scientific knowledge and reality. The central problem of the course is the rational basis of scientific knowledge.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2220 Philosophy and Literary Art F (3-0) [0.50]

The course will engage with literary art forms (fiction, drama, poetry, and film) for philosophical goals. Possible emphases include the use of literary works to express philosophical topics; philosophical investigations of the nature of literary art forms; and philosophies of interpretation of such art forms (e.g., classical poetics, hermeneutics, deconstruction, analytical aesthetics).

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2350 Selected Topics in Philosophy I U (3-0) [0.50]

The topics for this course will vary from one offering to the next, and will deal with material not available in regular courses. Students are encouraged to consult the departmental website for course content. Students are advised to consult a faculty advisor before registering.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2370 Introduction to Metaphysics W (3-0) [0.50]

A study of major theories of the nature of reality, and of issues and problems that arise in the investigation of fundamental features of the world. Texts read may be either historical or contemporary. Among possible topics explored in the course are materialism, free will, and determinism, the nature of time, and the position of consciousness in the world.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*2600 Business and Professional Ethics W (3-0) [0.50]

An examination of ethical and evaluative issues relating to business and professional practices. Topics to be explored include the nature of values and ethical systems, duties and rights, private and public goods, the consumer movement, social marketing, corporate social accounting, private right and professional responsibility. Intended for students registered in a science or professional program, but without a background in philosophy.

Prerequisite(s): 5.00 credits or 1 of PHIL*1000, PHIL*1010, PHIL*1050

PHIL*3040 Philosophy of Law F (3-0) [0.50]

An examination of philosophical theories concerning the nature of law and morality. The course may also include an examination of the way in which controversial ethical and social issues are treated under the Canadian Charter of Rights and Freedoms.

Prerequisite(s): 1.50 credits in philosophy or 7.50 credits or PHIL*2120

PHIL*3050 Philosophy of Art W (3-0) [0.50]
A consideration of various philosophical questions concerning art such as the nature of a work of art, the nature of beauty, the relationship between the artist and the audience, the task of the art critic, the social function of art.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
PHIL*3060 Medieval Philosophy W (3-0) [0.50]
A study of philosophy from the Patristic period (3rd century A.D.) to the early Renaissance (14th-century). The ideas of the central figures will be examined through original sources.
<i>Prerequisite(s):</i> 1.50 credits in philosophy
PHIL*3080 History of Modern European Philosophy from Kant F (3-0) [0.50]
A survey of European philosophy from Immanuel Kant (mid-18th century) to the late 19th century.
<i>Prerequisite(s):</i> 1.50 credits in philosophy
PHIL*3090 Philosophy of Kant W (3-0) [0.50]
Kant revolutionized the philosophical tradition of investigating objectivity (asking what the nature of reality is, in itself) by investigating subjectivity (asking how knowledge is possible for us). This course will typically examine one of Kant's Critiques and/or a central philosophical theme that appears in Kant's works.
<i>Prerequisite(s):</i> 1.50 credits in philosophy
PHIL*3130 Contemporary British and American Philosophy F (3-0) [0.50]
A survey of philosophical movements mainly centred in Britain and America from the late 19th-century to the present.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
PHIL*3170 Intermediate Philosophy of Science W (3-0) [0.50]
A study of more specialized questions posed by the nature of science and its investigation. Topics may include realism and antirealism, naturalized explanations, and other contemporary problems in the philosophy of science.
<i>Prerequisite(s):</i> PHIL*2180
PHIL*3180 Philosophy of Mind W (3-0) [0.50]
A philosophical examination of fundamental theories and problems concerned with mind, thought, and consciousness.
<i>Prerequisite(s):</i> 1.50 credits in philosophy
PHIL*3190 Theory of Knowledge I F (3-0) [0.50]
A survey of traditional discussion of the problems of knowledge.
<i>Prerequisite(s):</i> 1.50 credits in philosophy
PHIL*3200 Contemporary European Philosophy W (3-0) [0.50]
A survey of philosophical movements mainly centred in continental Europe from the late 19th-century to the present.
<i>Prerequisite(s):</i> 1.50 credits in philosophy
PHIL*3210 Women in the History of Philosophy F (3-0) [0.50]
This course will examine selected works of women philosophers and their contributions to the major philosophical debates of their day.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
PHIL*3230 Issues in Social and Political Philosophy W (3-0) [0.50]
A detailed examination of one or more historical or contemporary treatments of specific issues in social or political philosophy, such as: war and peace, justice, rights, social science, culture, education.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
PHIL*3240 Philosophy of Technology F (3-0) [0.50]
This course examines the philosophical problems associated with technology. Topics may include the nature of technology, the relation between technology and science, and the various critiques of technology - religious, political, ethical and existentialist - in contemporary society.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits.
PHIL*3250 Philosophy of Language F (3-0) [0.50]
This course will explore the relationship between human beings and language, and between language and the world. In particular, it may address such fundamental questions as: What is it about the way in which we use words that gives them the meanings they have? And what is the relationship between words and objects to which they refer? Authors studied may include representatives from the analytic and/or continental traditions in philosophy.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits

PHIL*3350 Selected Topics in Philosophy II U (3-0) [0.50]
The topics for this course will vary from one offering to the next, and will deal with material, such as Philosophy of History, Philosophy of Social Science and advanced Philosophy of Religion. Students are encouraged to consult the departmental website for course content. Students are advised to consult a faculty advisor before registering.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
PHIL*3410 Major Texts in the History of Philosophy W (3-0) [0.50]
A study of central primary sources in ancient, medieval, early modern or nineteenth-century philosophy. The readings and periods stressed will vary from year to year. Students should consult with the department as to topics to be dealt with in each offering. Specific topics offered will be announced prior to the course selection period.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
PHIL*3420 Philosophical Problems of Religion F (3-0) [0.50]
A detailed examination of major problems and writings in the philosophy of religion. (Offered in even-numbered years.)
<i>Prerequisite(s):</i> 1.50 credits in philosophy, including one of PHIL*2130, PHIL*3910, PHIL*3920
PHIL*3910 Indian Philosophy F (3-0) [0.50]
An analysis of selected primary sources of Indian philosophy in translation, from the Vedic Upanishads to the "integral yoga" of Sri Aurobindo. Emphasis will be on the basic inspirational works of Hinduism and Buddhism, and their respective views on the ultimate nature of reality, the self, suffering, freedom, ignorance and enlightenment.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
<i>Restriction(s):</i> PHIL*2910
PHIL*3920 Chinese Philosophy W (3-0) [0.50]
An analysis of selected primary sources of Chinese philosophy, in translation, from the I Ching to Mao Tse-tung. Emphasis will be on the foundational works of Confucianism, Taoism, Ch'an (or Zen) Buddhism, and Neo-Confucianism, concerning such issues as the ultimate nature of being, non-being and human destiny, proper government of the self, the family and society, and the principles and practice of enlightenment.
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
<i>Restriction(s):</i> PHIL*2920
PHIL*3930 African Philosophy F (3-0) [0.50]
An introduction to the philosophical traditions of Africa, part historical and part contemporary. The shorter historical section will cover some themes from the thought of ancient Egypt, early Christian and Islamic philosophy in North Africa and precolonial traditions from West Africa. The greater section of the course will deal with philosophical movements in Africa since the 1960's, as well as their implications for African American thought and philosophy generally. (Offered in even-numbered years.)
<i>Prerequisite(s):</i> 1.50 credits in philosophy or 7.50 credits
PHIL*4060 Philosophy of Feminism II U (3-0) [0.50]
This course is an advanced study of problems in feminist philosophy. The course may cover specific topics or the work of one or more feminist philosophers. Topics may be drawn from feminist ethics, epistemology, and/or postmodernism.
<i>Prerequisite(s):</i> 1.00 credits in philosophy at the 3000 level or PHIL*2060
PHIL*4110 Symbolic Logic U (3-0) [0.50]
A study of issues and techniques beyond the level of elementary sentential logic and quantification. A consideration of some topics in logical theory. An extension of material explored in PHIL*2110, with special focus on philosophical aspects or implications of formal logic.
<i>Prerequisite(s):</i> PHIL*2110, 1.00 credits in philosophy at the 3000 level
PHIL*4230 Social and Political Philosophy U (3-0) [0.50]
This is an advanced level course that examines in detail selected historical or contemporary treatments of specific issues in social and political philosophy.
<i>Prerequisite(s):</i> PHIL*2120 or PHIL*3230, 1.00 credits in philosophy at the 3000 level
PHIL*4270 Current Philosophical Issues U (3-0) [0.50]
A study of primary philosophical texts since 1965. The focus of the course will alternate between analytic texts and issues and continental texts and issues.
<i>Prerequisite(s):</i> 2.00 credits in philosophy including 1.00 at the 3000 level
PHIL*4310 Applied Ethics U (3-0) [0.50]
An advanced study of specific problems in applied ethics. This is an intensive course designed for philosophy majors as well as for seventh and eighth semester students who have had no previous philosophy course.
PHIL*4340 Ethics U (3-0) [0.50]
An advanced study of problems in contemporary ethics.
<i>Prerequisite(s):</i> PHIL*2120, 1.00 credits in Philosophy at the 3000 level

PHIL*4360 Theory of Knowledge II U (3-0) [0.50]
An examination of central problems concerning the nature of knowledge. In some offerings the selection will emphasize problems in the Philosophy of Language. <i>Prerequisite(s):</i> 2.50 credits in philosophy or PHIL*3190
PHIL*4370 Metaphysics U (3-0) [0.50]
An advanced study of problems concerning the nature of reality. <i>Prerequisite(s):</i> 1.00 credits in philosophy at the 3000 level
PHIL*4390 Selected Topics in Philosophy III U (3-0) [0.50]
Open to honours philosophy students in their 7th and 8th semesters. <i>Prerequisite(s):</i> 1.00 credits in philosophy at the 3000 level
PHIL*4400 Major Texts in Philosophy U (3-0) [0.50]
Advanced study of a major text in philosophy not treated in either PHIL*4410 or PHIL*4420. <i>Prerequisite(s):</i> 1.00 credits in philosophy at the 3000 level
PHIL*4410 Major Texts in Philosophy U (3-0) [0.50]
Advanced study of a major text in philosophy not treated in either PHIL*4400 or PHIL*4420. <i>Prerequisite(s):</i> 1.00 credits in philosophy at the 3000 level
PHIL*4420 Major Texts in Philosophy U (3-0) [0.50]
Advanced study of a major text in philosophy not treated in either PHIL*4400 or PHIL*4410. <i>Prerequisite(s):</i> 1.00 credits in philosophy at the 3000 level
PHIL*4800 Honours Philosophy Research Paper I U (3-0) [0.50]
The preparation of a major research paper under the supervision of a faculty member. Normally open only to 7th semester honours philosophy students. <i>Prerequisite(s):</i> 1.00 credits in philosophy at the 3000 level <i>Restriction(s):</i> Instructor consent required.

Physics

Department of Physics

PHYS*1000 An Introduction to Mechanics F (3-3) [0.50]

A course for physical science students which develops the concepts of mechanics as applied to translational and rotational kinematics and dynamics, equilibrium of rigid bodies, oscillations, gravitation, special relativity, and fluid statics and dynamics. Normally this is part of the two-course unit PHYS*1000 and PHYS*1010.

Prerequisite(s): [1 of 4U Physics, OAC (or equivalent) Physics, PHYS*1020], 4U or OAC (or equivalent) Calculus

Restriction(s): PHYS*1080, PHYS*1110

PHYS*1010 Introductory Electricity and Magnetism W (3-3) [0.50]

This is a course for physical science students on the phenomena of electromagnetism, waves and introductory quantum physics. Topics include electric charges and fields, electric potential, capacitance, magnetic fields, electric circuits, waves, electromagnetic waves, quantization of light and other aspects of introductory quantum physics. Normally this is part of the two-course unit PHYS*1000 and PHYS*1010.

Prerequisite(s): (MATH*1080 or MATH*1200), (1 of 4U Physics, OAC Physics, PHYS*1020)

PHYS*1020 Introductory Physics F,W (3-2) [0.50]

A course stressing the fundamental properties of particles and waves, designed for students without OAC Physics or equivalent. Topics include: the motion of particles, force, field, momentum, energy and associated conservation laws; basic interactions between particles; properties of waves. It is expected that students will have completed Grade 12 or 3U Physics and at least 1 OAC or 4U mathematics credit. This course is intended only for students who require the equivalent of 4U or OAC Physics in order to proceed to PHYS*1000, PHYS*1010, PHYS*1070, PHYS*1080, PHYS*1110, PHYS*1130, PHYS*2040. Students may not take this course for credit if they have passed 4U or OAC Physics (or equivalent). (Also offered through distance education format.)

PHYS*1070 Introductory Physics for Life Sciences F,W (3-3) [0.50]

Physics of matter and energy at the macroscopic and microscopic levels, with special emphasis on topics of importance to the biological sciences. Topics include properties of waves, acoustics and hearing, optical systems and vision, quantum nature of radiation and its interaction with biomolecules, electricity, high energy radiation and radioactivity.

Prerequisite(s): (1 of 4U Physics, OAC Physics, PHYS*1020), one 4U or OAC Mathematics course

Restriction(s): PHYS*1130

PHYS*1080 Physics for Life Sciences F,W (3-3) [0.50]

A course complementary to PHYS*1070 or PHYS*1130 with emphasis on some aspects of classical physics important in the biological and environmental sciences. Topics include mechanics and applications to anatomical problems, fluid statics and dynamics, molecular motion, diffusion, osmosis, and heat.

Prerequisite(s): (1 of 4U Physics, OAC Physics, PHYS*1020), one 4U or OAC Mathematics course

Restriction(s): PHYS*1000, PHYS*1110

PHYS*1130 Physics with Applications W (3-3) [0.50]

This course is for engineering and environmental science students, and uses some calculus in analytic problem-solving. Topics include simple harmonic motion, waves, acoustics, optics, properties and absorption of electromagnetic radiation, blackbody radiation, solar spectrum and flux, electric field and potential, DC circuits, power transmission, nuclear processes, and radioactivity.

Prerequisite(s): (MATH*1080 or MATH*1200), [1 of 4U Physics, OAC Physics (or equivalent), PHYS*1020]

Restriction(s): PHYS*1070

PHYS*1600 Contemporary Astronomy S,F (3-0) [0.50]

A course designed for arts and social science students. Emphasis will be on the interdisciplinary and contemporary aspects of astronomy with the object of providing a perspective of our place in the physical universe. Topics will include the solar system, stars and stellar evolution, pulsars, black holes, quasars and cosmology. Students are encouraged to suggest and participate in discussion on items of special interest. Students with a credit in any Physics course except PHYS*1020, PHYS*1810 may not take this course. (Also offered through distance education format.)

Restriction(s): Students with standing in any other 1000 level course credit in physics (except PHYS*1020, PHYS*1810) may not use this course for credit.

PHYS*1810 Physics of Music W (3-0) [0.50]

A course designed for arts and social science students with an interest or background in music. The fundamentals of vibrations and waves will be introduced and applied to a study of archetypal instruments. The psychoacoustic basis of pitch and loudness will be discussed. Students who have standing in any other 1000 level physics course, except PHYS*1020 or PHYS*1600, may enrol in this course only if they are completing an honours or general B.A. program in Music. In this case, permission of the instructor is required. (Also listed as MUSC*1090.) (Offered in even-numbered years.)

Equate(s): MUSC*1090

PHYS*2030 Biophysics of Excitable Cells W (3-1) [0.50]

An intermediate biophysics course with special emphasis on the physical properties of nerve cells and of biological transducers such as the ear and the eye.

Prerequisite(s): IPS*1220 or 1.00 credits in physics (excluding PHYS*1020, PHYS*1600, PHYS*1810)

PHYS*2040 Fundamental Electronics and Sensors W (3-3) [0.50]

An introduction to modern electronics. Topics covered include DC and AC circuit analysis, digital circuits, analog circuits with emphasis on operational amplifiers and analog-to-digital and digital-to-analog conversion. Applications include the interfacing of various sensors to measure physical parameters.

Prerequisite(s): 0.50 credits in university level calculus, (1 of 4U Physics, OAC Physics, PHYS*1020)

PHYS*2260 Quantum Physics S,W (3-0) [0.50]

The course investigates and describes the properties of atoms, molecules and nuclei in terms of phenomena of quantum physics. Topics include wave properties of matter, particle properties of electromagnetic radiation, uncertainty principle, operators and eigenvalue equations, elementary angular momentum, spin and elementary quantum mechanics.

Prerequisite(s): (1 of MATH*1000, MATH*1080, MATH*1200, IPS*1110), (1 of IPS*1220, PHYS*1010, PHYS*2460), (MATH*2150 or MATH*2160)

PHYS*2440 Mechanics I F (3-3) [0.75]

This course and the following one, PHYS*2450, continue building the foundation in mechanics begun in the first year. These courses are intended for students proceeding to advanced studies in the physical sciences. Topics include analysis of experimental uncertainties (errors), one, two and three dimensional motion, damped and forced harmonic oscillator, gravitation and orbital motion. The laboratory work requires a formal treatment of error analysis, as well as computer programming for data analysis.

Prerequisite(s): (1 of MATH*1210+, MATH*2080, IPS*1210+), (1 of IPS*1220+, PHYS*1000+, PHYS*1080, PHYS*1110+) (+preferred)

PHYS*2450 Mechanics II W (3-3) [0.75]

This course is a continuation of PHYS*2440. Topics include special relativity, noninertial reference frames, dynamics of systems of particles, and rigid body dynamics.

Prerequisite(s): PHYS*2440

PHYS*2460 Electricity and Magnetism I F (3-3) [0.75]

This course and the following one, PHYS*2470, continue building the foundation in electricity and magnetism begun in the first year. These two courses are intended for students proceeding to advanced studies in the physical sciences. Topics include vector calculus, electric fields, potential, electric work and energy, Gauss's Law, Poisson's and Laplace's equations, capacitors, D.C. circuits, transients and dielectric materials. The laboratory work requires a formal treatment of error analysis, as well as computer programming for data analysis.

Prerequisite(s): (1 of IPS*1220+, PHYS*1010+, PHYS*1070, PHYS*1130), (1 of MATH*1210+, MATH*2080, IPS*1210+) (+preferred)

Co-requisite(s): PHYS*2440

PHYS*2470 Electricity and Magnetism II W (3-3) [0.75]

This course is a continuation of PHYS*2460. Topics include magnetic forces and fields, the Biot-Savart equation, Ampere's Law, magnetic induction, LRC transients, A.C. circuits and magnetic materials.

Prerequisite(s): PHYS*2460

PHYS*2550 Radiation and the Environment F (3-0) [0.50]

This course reviews radiations which occur in the environment and their effects on materials and living systems. These include x-radiation, ultraviolet, visible, infrared, microwave and radio-frequency emissions; acoustical and ultrasonic radiation; and alpha, beta, and gamma radiation from radioactive material. (Offered in even-numbered years.)

Prerequisite(s): (1 of IPS*1220, PHYS*1010, PHYS*1070, PHYS*1130), 0.50 credits in mathematics at the 1000 level (excluding MATH*1050)

PHYS*2600 General Astronomy S,F (3-2) [0.50]
An introduction to astronomy: the solar system, the sun, stellar and galactic structure. (Offered in the Fall semester in odd-numbered years.) <i>Prerequisite(s):</i> 0.50 credits in physics at the 1000 level (excluding PHYS*1600, PHYS*1810), 0.50 credit in mathematics at the 1000 level
PHYS*3080 Energy W (3-0) [0.50]
Energy resources and the production, transmission, interconversion, consumption and waste of energy in the industrial society. Emphasis is placed on environmental impact and human safety. Topics include fossil fuels, nuclear fission and fusion, wind and solar power, the hydrogen economy, and conservation strategies. <i>Prerequisite(s):</i> 0.50 credits in physics at the 1000 level (excluding PHYS*1020, PHYS*1600, PHYS*1810), 0.50 credits in mathematics at the 1000 level (excluding MATH*1050)
PHYS*3100 Electronics F (3-3) [0.75]
Topics include: amplifier properties; signal processing using operational amplifiers; introduction to digital electronics, including counters and registers; circuits to convert analog signals to digital and vice-versa; introduction to the physics of semiconductor devices. The laboratory illustrates lecture topics, and a major component consists of techniques to interface a computer to integrated circuits for data acquisition. <i>Prerequisite(s):</i> PHYS*2470
PHYS*3220 Waves and Optics W (3-0) [0.50]
Standing and travelling waves; normal modes; Fourier series; optics including polarization, interference and diffraction. <i>Prerequisite(s):</i> PHYS*2440
PHYS*3230 Quantum Mechanics I F (3-0) [0.50]
A formal treatment of quantum mechanics. Topics include wave packets and free particle motion, the Schrodinger equation, harmonic oscillator, piecewise constant potentials, central forces and angular momentum, hydrogen atom. <i>Prerequisite(s):</i> (CHEM*2070 or PHYS*2260), MATH*2160, (MATH*2170 or MATH*2270), PHYS*2470
PHYS*3240 Statistical Physics I S,F (3-0) [0.50]
Introduction to statistical physics including thermodynamics and statistical mechanics of equilibrium phenomena. <i>Prerequisite(s):</i> MATH*2200, (PHYS*2260 or PHYS*2440)
PHYS*3400 Advanced Mechanics W (3-0) [0.50]
This course covers Lagrangian mechanics and Hamiltonian mechanics. Topics include least action principles, Poisson brackets, Liouville's theorem, Hamilton- Jacobi theory, the transition to quantum mechanics and introduction to non-linear dynamics. <i>Prerequisite(s):</i> (MATH*2170 or MATH*2270), PHYS*2450
PHYS*3510 Intermediate Laboratory W (0-6) [0.50]
A modular course for physics students including modern and classical physics experiments. Modules include laboratory instrumentation employing computers, modern physics, waves and optics, molecular physics, biophysics, and solid state physics. <i>Prerequisite(s):</i> PHYS*2450, PHYS*3100
PHYS*4040 Quantum Mechanics II W (3-0) [0.50]
A second course in quantum mechanics. Topics include spin, linear vector spaces, two-level systems, quantum dynamics, rotations and angular momentum, time dependent perturbation theory, Born approximation. <i>Prerequisite(s):</i> PHYS*3230
PHYS*4120 Atomic and Molecular Physics F (3-0) [0.50]
The application of quantum theory to atomic and molecular structure, and the interaction between electromagnetic radiation and atoms and simple molecules. <i>Prerequisite(s):</i> PHYS*3240, PHYS*4040
PHYS*4130 Subatomic Physics W (3-0) [0.50]
This course surveys the field of subatomic physics from radioactive emanations to conjectured subunits of nucleons. Topics include quark models; strong, electromagnetic and weak interactions; isospin, strangeness, conservation laws and symmetry principles; systematics of nuclear properties, nuclear radioactivity, nuclear models and reactions. <i>Prerequisite(s):</i> PHYS*3230
PHYS*4150 Solid State Physics W (3-0) [0.50]
Bonding in solids, thermal and electrical properties of solids, energy bands, imperfections in solids, properties of semiconductors and insulators. <i>Prerequisite(s):</i> PHYS*3220, PHYS*3230, PHYS*3240 Recommended: PHYS*4240 <i>Co-requisite(s):</i> PHYS*4040 (if not taken as a pre-requisite)

PHYS*4180 Advanced Electromagnetic Theory F (3-0) [0.50]
This course covers Maxwell's equation, Lorentz-force law, conservation of charge, and conservation of energy (Poynting's theorem); potentials, gauge transformations, wave equations, and multipole expansions; Green's functions for the Poisson and wave equations; electrostatics and magnetostatics (including boundary-value problems); motion of charged particles in electromagnetic fields; and propagation and generation of electromagnetic waves. <i>Prerequisite(s):</i> PHYS*2470, PHYS*3400
PHYS*4240 Statistical Physics II F (3-0) [0.50]
A continuation of PHYS*3240 including a discussion of the grand canonical distribution, quantum statistics, and transport theory. <i>Prerequisite(s):</i> PHYS*3230, PHYS*3240
PHYS*4500 Advanced Physics Laboratory F (0-6) [0.50]
A modular course for students in any physics-related major who will study techniques of nuclear, solid state and molecular physics. <i>Prerequisite(s):</i> PHYS*2450, (1 of PHYS*3100, XSEN*4110)
PHYS*4510 Advanced Physics Project W (0-6) [0.50]
Students will be assigned projects related to their individual interests. These projects may be part of the ongoing research within the Physics Department. Selection of a faculty supervisor and approval of course coordinator must be obtained before course selection. <i>Prerequisite(s):</i> PHYS*3510
PHYS*4540 Molecular Biophysics W (3-0) [0.50]
Physical methods of determining macromolecular structure: energetics, intramolecular and intermolecular forces, with applications to lamellar structures, information storage, DNA and RNA, recognition and rejection of foreign molecules. <i>Prerequisite(s):</i> 0.50 credits in biochemistry, (CHEM*3860 or PHYS*3230)
PHYS*4560 Biophysical Methods F (3-0) [0.50]
An introduction to physical techniques to determine the structure of macromolecules and macromolecular structures of biological interest. The techniques include: differential calorimetry, X-ray and neutron scattering, electron microscopy, Raman and infrared spectroscopy, nuclear magnetic resonance, and electron spin resonance. Applications of these techniques in the study of biological membranes will be emphasized. Students taking this course should already have taken PHYS*4240 or be taking this course concurrently. <i>Prerequisite(s):</i> PHYS*3220, PHYS*4040 <i>Co-requisite(s):</i> PHYS*4240 (if not taken as a prerequisite)
PHYS*4910 Advanced Topics in Physics I U (3-0) [0.50]
The content of this course is determined by the interests of the students. Possible topics include fluid mechanics, theory of elastic solids, general relativity, astrophysics, and chaos. This course is not offered every year. <i>Prerequisite(s):</i> (MATH*2150 or MATH*2160), (MATH*2170 or MATH*2270), PHYS*2450, PHYS*2470
PHYS*4920 Advanced Topics in Physics II U (3-0) [0.50]
The content of this course is determined by the interests of the students. Possible topics include fluid mechanics, theory of elastic solids, general relativity, astrophysics, and chaos. This course is not offered every year. <i>Prerequisite(s):</i> (MATH*2150 or MATH*2160), (MATH*2170 or MATH*2270), PHYS*2450, PHYS*2470
PHYS*4930 Advanced Topics in Physics III U (3-0) [0.50]
The content of this course is determined by the interests of the students. Possible topics include fluid mechanics, theory of elastic solids, general relativity, astrophysics, and chaos. This course is not offered every year. <i>Prerequisite(s):</i> (MATH*2150 or MATH*2160), (MATH*2170 or MATH*2270), PHYS*2450, PHYS*2470

Physiology

Department of Biomedical Sciences

For course listings and descriptions see Biomedical Sciences.

Additional course listings may be found in the course descriptions for Veterinary Medicine and Human Kinetics.

*Students wishing to study Physiology can complete a 3000 level course or course sequence in: ZOO*3200; or ZOO*3210; or HK*3940; or BIOM*3100; and either BIOM*3110 or BIOM*3120. In addition, students can select specialized courses at the 4000 level (preferably at least 2 with labs) offered by the:*

Department of Biomedical Sciences:

BIOM*4020	[0.50]	Physiology of Digestion
BIOM*4030	[0.50]	Endocrine Physiology
BIOM*4041/2	[1.00]	Mammalian Reproductive Biology
BIOM*4050	[0.50]	Biomedical Aspects of Aging

School of Human Biology:

HK*4320	[0.75]	Work Physiology
HK*4460	[0.50]	Regulation of Human Metabolism
HK*4530	[0.50]	Human Cardiovascular Physiology

Department of Integrative Biology

ZOO*4170	[0.50]	Experimental Comparative Animal Physiology
ZOO*4390	[0.50]	Environmental Physiology
ZOO*4470	[0.50]	Comparative Endocrinology

Plant Biology

Department of Molecular and Cellular Biology

Department of Environmental Biology

Department of Land Resource Science

Department of Plant Agriculture

PBIO*3110 Crop Physiology F (3-3) [0.50]

Physiological and biochemical principles related to production by crop canopies. Carbon fixation, leaf area, light interception, assimilate distribution, water relations and nutrient utilization are used to develop solutions to problems of crop yield and quality. Growth and development in response to cultural innovations including the use of growth regulators are also considered. Department of Plant Agriculture.

Prerequisite(s): BIOL*1040

PBIO*3750 Plant Tissue Culture F (2-3) [0.50]

An examination and discussion of the principles, protocols and utilization of plant cell tissue culture systems. In vitro propagation and regeneration, mutagenesis and selection, secondary metabolite elicitation and cell transformation techniques including protoplast fusion, direct DNA uptake and plant bacterial co-cultivation will be emphasized. Department of Plant Agriculture.

Prerequisite(s): AGR*2451/2 or BOT*2100

PBIO*4000 Molecular and Cellular Aspects of Plant-Microbe Interactions F (3-0) [0.50]

Examination of molecular and cellular aspects of the interaction between plants and microorganisms such as mycorrhizae, pathogenic fungi, Agrobacterium, pathogenic bacteria, and plant viruses. Topics include microbial virulence, signaling, gene expression, and disease resistance in plants. Departments of Molecular and Cellular Biology and Environmental Biology.

Prerequisite(s): BOT*2100, (MBG*2020 and MICR*2020 are recommended)

PBIO*4100 Soil Plant Relationships W (3-0) [0.50]

Root growth as affected by soil properties; soil plant water relations; soil aeration; absorption, translocation and function of nutrients in plants; ion transport to roots; rhizosphere effects; application of concepts to crop production. Department of Land Resource Science.

Prerequisite(s): 1 of AGR*2301/2, BOT*2100, BOT*2300, SOIL*2010, SOIL*2320

PBIO*4150 Molecular and Cellular Aspects of Plant Development W (3-0) [0.50]

An examination of the molecular and cellular processes that underlie cellular differentiation and organ formation in plants. The roles of homeotic genes, gene regulation, cell polarity, morphogens and environmental effects in development will be discussed. Subjects will be introduced by a lecture and examined in detail in discussions of pertinent research papers. Department of Plant Agriculture. (Offered in even-numbered years.)

Prerequisite(s): BOT*2100

PBIO*4530 Environmental Pollution Stresses on Plants W (3-0) [0.50]

The study of environmental pollution effects on physiological and ecological processes of plants, in both managed and unmanaged ecosystems. Pollutants under study include contaminants of air (such as ozone, sulphur dioxide and UV-B radiation) and soil (such as metals and organic xenobiotics). The format includes both lecture and presentation/discussion of current and historical peer-reviewed literature. Department of Land Resource Science.

Prerequisite(s): BIOL*2060, BOT*2100

PBIO*4750 Genetic Engineering of Plants W (3-3) [0.50]

An examination and discussion of the principles, protocols and applications of molecular biology and transformation technology to the genetic improvements of plants. Department of Plant Agriculture.

Prerequisite(s): MBG*2020

Political Science

Department of Political Science

For courses without semester designations, please check with the department. Advance schedules are available in the department.

The department works in cooperation with the department of Political Science at the University of Waterloo to offer courses via the video link classroom. These courses are identified by the designation LINK in their course description. Further information can be obtained from the department.

POLS*1150 Understanding Politics F,W (3-1) [0.50]

This is the recommended introductory course for students intending to pursue a specialization in Political Science. An introduction to the basic concepts of politics, such as liberty, equality, social justice, constitutionalism, sovereignty, federalism, parliamentary versus presidential government. The course will emphasize the meaning and use of these terms within Canada in the context of other political systems.

Restriction(s): POLS*1000, POLS*1300

POLS*1400 Issues in Canadian Politics F (3-1) [0.50]

Through the lens of contemporary political issues, this course will examine the pillars of the Canadian political system - Parliamentary government, federalism and the Charter of Rights and Freedoms - and how they reflect and affect the distinctly Canadian societal cleavages: linguistic, regional, ethnic, national, and sexual. Students will develop an awareness and understanding of these concepts, institutions and processes, which will enhance their ability to interpret current political events and provide a foundation upon which to explore Canadian politics, identity, public policy and governance in upper level political science courses. (Also offered through distance education format.)

POLS*1500 World Politics F (3-0) [0.50]

An examination of the fundamental patterns of international politics, focusing especially on the major issues and contemporary events at the root of international conflict. As well, the reality of globalization and interdependence is assessed in terms of the alternative patterns of international cooperation in the contemporary world. (Also offered through distance education format.)

POLS*2000 Political Theory F (3-0) [0.50]

A study of the philosophic and ideological developments which have led to the emergence of the modern state and contemporary politics.

POLS*2080 Development and Underdevelopment F (3-0) [0.50]

An examination of the politics of development, distribution and conflict in Africa, Asia, the Middle East and the Americas from a comparative and international perspective.

POLS*2100 The State in Comparative Perspective W (3-0) [0.50]

An examination of the evolution, purposes, structures and functions of the state in relation to the economy and civil society.

POLS*2150 Gender and Politics W (3-0) [0.50]

This course introduces students to competing approaches to gender and politics. Students will examine the interrelationship of gender, politics and the state, focusing on its implications for political mobilization, representation and participation, public policy, global gender issues in international relations, and cultural and regional differences in gender politics. The course provides the student with the conceptual and analytical tools for upper-year courses on politics in general and on gender, sexuality and politics in particular.

POLS*2200 International Relations F (3-0) [0.50]

An introduction to basic theories and concepts in the study of international relations, including an analysis of power, national interest, security, survival, nationalism, sovereignty, decision-making, interdependence, integration, and transnationalism.

POLS*2250 Public Administration W (3-0) [0.50]

This course examines a variety of theoretical approaches to the study of organizations. It then applies these theories to the structure and operation of the government of Canada. It examines the changing role of bureaucracy in government and critically evaluates issues such as financial and administrative responsibility and accountability. (Also offered through distance education format.)

Prerequisite(s): POLS*1150 or POLS*1400

POLS*2300 Canadian Government F,W (3-0) [0.50]

Parliamentary government and federal-provincial relations lie at the heart of the Canadian government system. This course provides a detailed examination of the structure, functions, and performance of these central institutions of Canadian government in a comparative context. (Also available through distance education format.)

POLS*3000 Politics of Africa U (3-0) [0.50]

Africa in the 20th Century has been the scene of rapid political and economic change. This course analyzes African politics in the light of contemporary problems of development and modernization.

Prerequisite(s): POLS*2080 or POLS*2100

POLS*3050 Canadian Political Parties, Elections and Pressure Groups W (3-0) [0.50]

The course emphasizes political process rather than governmental structures. Topics to be explored include the role of political parties, pressure groups, the electoral system and voting and their impact on the nature of Canada as a democratic state.

Prerequisite(s): POLS*1400 or POLS*2300

POLS*3060 Politics of the Middle East and North Africa U (3-0) [0.50]

Students will examine the political dynamics of selected states and societies (e.g. Egypt, Syria, Saudi Arabia, Iran, Israel, Jordan and Algeria) in the Middle East and North Africa (MENA). Issues to be covered: the impact of early Middle Eastern/North African history upon today's politics; class structures in the MENA countries and their impact on politics; the rise of Arab nationalism; Zionism; the politics of oil; the status of women; the political impact of economic restructuring; Islamic movements; state-building; and political liberalization and democratization in the Middle East and North Africa.

Prerequisite(s): POLS*2080 or POLS*2100

POLS*3070 The Politics of Asian Development F (3-0) [0.50]

This course explores the political dynamics that have led to the immense variation of wealth, inequality, deprivation and poverty found in Asia. The focus is comparative, and will emphasize three geographically distinct regions: Northeast Asia, Southeast Asia and South Asia.

Prerequisite(s): POLS*2080 or POLS*2100

POLS*3080 Politics of Latin America U (3-0) [0.50]

An exploration of Latin American politics from a multidimensional perspective. It analyzes the interaction among contemporary political structures, ideologies and processes in the context of socio-economic change.

Prerequisite(s): POLS*2080 or POLS*2100

POLS*3110 Politics of Ontario U (3-0) [0.50]

This course provides an overview of the political history of Ontario, the character and development of the political parties and institutions, as well as an intensive examination of selected policy issues in contemporary Ontario politics.

Prerequisite(s): 7.50 credits

POLS*3130 Law, Politics and Judicial Process U (3-0) [0.50]

This course emphasizes the study of the judicial system as a branch of government and highlights the interaction between the judiciary, law, the political process and public policy. Issues such as judicial selection and Charter of Rights decisions by courts will be explored. Comparisons with the judicial process in other countries will supplement the focus on the Canadian judicial process.

Prerequisite(s): 1 of POLS*1400, POLS*2250, POLS*2300

POLS*3160 Women and Politics in the Third World U (3-0) [0.50]

The purpose of this course is twofold: 1) to examine Western analyses and assumptions concerning women and politics in the Third World; and 2) to examine how women's activities in the Third World challenge our definitions and understanding of power, political participation, and empowerment.

Prerequisite(s): POLS*2080 or POLS*2100

POLS*3180 Research Methods I: Political Inquiry and Methods F (2-1) [0.50]

Students will be introduced to some of the major paradigms of political science research that shape inquiry into political and social phenomena. Students will learn how to: define research problems and construct questions for political inquiry; develop theory to explain, predict or interpret the political world; and formulate research designs. A variety of quantitative and qualitative methods will be explored.

Prerequisite(s): 5.00 credits including (2 of POLS*2080, POLS*2100, POLS*2200, POLS*2250)

POLS*3210 The Constitution and Canadian Federalism W (3-0) [0.50]

Canada's constitution and its federal system lie at the heart of the ongoing crisis facing the Canadian Confederation. This course examines the major features of our constitutional development, how the current system of intergovernmental relations has evolved, and the challenges posed by Canada's cultural diversity, pressures for decentralisation, and the maintenance of national sovereignty.

Prerequisite(s): POLS*2300

POLS*3220 Classical Political Thought F (3-0) [0.50]
This course is an exploration of the concepts of justice and reason in the ancient and medieval worlds. The theme will be explored in the writings of philosophers such as Plato, Aristotle, Cicero, St. Augustine, St. Thomas Aquinas and Sir Thomas More. The exact selection of thinkers will vary from year to year and students are advised to check the course outline. <i>Prerequisite(s):</i> POLS*2000 or POLS*3280 <i>Restriction(s):</i> POLS*3021
POLS*3230 Modern Political Thought W (3-0) [0.50]
This course explores the impact of modern science and technology, and its impact on the western tradition of justice from the seventeenth century to the twentieth century. It will explore this theme in writers such as Thomas Hobbes, Jonathan Swift, J-J Rousseau, Edmund Burke, Friedrich Nietzsche and George Grant. The exact selection of thinkers will vary from year to year and students are advised to check the course outline. <i>Prerequisite(s):</i> POLS*2000 or POLS*3280 <i>Restriction(s):</i> POLS*3021
POLS*3250 Public Policy: Challenges and Prospects F (3-0) [0.50]
This course covers the dominant theories that explain the origins and character of public policy in Canada, and other countries. The focus will be on both governmental and nongovernmental actors. <i>Prerequisite(s):</i> POLS*1400 or POLS*2250
POLS*3270 Local Government in Ontario U (3-0) [0.50]
Municipal governments are major spenders of public funds in Canada, and are also the level of government closest to the people. In this course, students will examine the major problems confronting urban government in Ontario. <i>Prerequisite(s):</i> 7.50 credits
POLS*3280 Modern Political Ideologies F (3-0) [0.50]
An examination of contemporary political ideologies-liberalism and conservatism and imperialism; socialism, communism and fascism - in terms of their evolution and current political significance. <i>Prerequisite(s):</i> 5.00 credits
POLS*3300 Governing Criminal Justice U (3-0) [0.50]
The course provides an overview of the policy process and outcomes of the Canadian criminal justice system. Particular emphasis is placed on examining, using various public policy and public management perspectives, the practices and interactions of governmental agencies within the system, such as police agencies and boards, departments of Justice, Solicitor-General, corrections and parole agencies, courts and the legal profession. <i>Prerequisite(s):</i> POLS*2250 or POLS*2300
POLS*3320 Politics of Aid & Development F (3-0) [0.50]
This course examines the motivations and mechanisms by which industrialized states have designed and implemented foreign aid programs and policy, primarily since the end of the Second World War. Particular emphasis will be placed on the role of multilateral, bilateral and nongovernmental organizations in the delivery of development assistance and humanitarian relief. <i>Prerequisite(s):</i> POLS*2080
POLS*3330 Politics and Trade Liberalization in the Americas U (3-0) [0.50]
This course examines the politics of trade in the three NAFTA countries - Canada, the US and Mexico. It examines how trade policy is made in each country and how the NAFTA has influenced domestic politics. Topics covered include trade in goods and services, investment and intellectual property. <i>Prerequisite(s):</i> 1 of POLS*2100, POLS*2250, POLS*2300
POLS*3370 Environmental Policy Formation and Administration S,F (3-0) [0.50]
This course surveys both the federal and provincial governmental policies and programs relating to the management of natural resources and the control of pollution by examining the political, legal and administrative mechanisms, monitoring surveillances, and enforcement problems. (Also offered through distance education format.) <i>Prerequisite(s):</i> 7.50 credits
POLS*3390 Comparative Democratic Institutions U (3-0) [0.50]
This course will analyse power in democratic political institutions. It will include an examination of executive and legislative powers and the role of political parties and elections in the exercise of these powers. Presidential and parliamentary systems are examined as well as models of majoritarian and consensual democracy. <i>Prerequisite(s):</i> POLS*2100 or POLS*2300

POLS*3410 U.S. Politics and Government U (3-0) [0.50]
This course involves a treatment of the basic principles and institutions of national government and politics in the United States as well as the making and execution of public policy at the national and state levels. <i>Prerequisite(s):</i> POLS*2100 or POLS*2300
POLS*3440 Corruption, Scandal and Political Ethics U (3-0) [0.50]
This course will introduce students to the phenomenon of political corruption and the study of its incidence. Attention will be paid to historical examples, contemporary scandals, and analytical articles, dealing with the nature, causes and effects, and proposed cures of political corruption, and the ethical dilemmas inherent in political life. <i>Prerequisite(s):</i> 5.00 credits
POLS*3450 European Governments and Politics U (3-0) [0.50]
Europe has forged a new form of political organization, the European Union, in addition to its variety of national democratic forms. This course offers a comparative examination of selected national governments, as well as an exploration of this new supra-national organization. <i>Prerequisite(s):</i> 1 of POLS*2100, POLS*2200, EURO*2070
POLS*3460 Communism and Post-Communism U (3-0) [0.50]
This course focuses on selected issues in the transition from Communism to Post-Communism, viewed in a country, regional or theoretical context. Topics include the rise and demise of the Soviet Union, the new political economic and social structures which are emerging among successor states and in Central and East Europe, as well as their relation with the world at large. LINK <i>Prerequisite(s):</i> 1 of HIST*2390, POLS*2100, POLS*2200
POLS*3470 Business-Government Relations in Canada U (3-0) [0.50]
The public and private sectors in Canada have become more and more interrelated in recent years as evidenced by tax and expenditure policies, the role of regulation and public enterprise, and the increasing emphasis on consultation and co-ordination. This course examines the evolving relationship between governments and the private sector in Canada, including business (both large and small), organized labour, specific sectors such as agriculture and consumer affairs and voluntary organizations. <i>Prerequisite(s):</i> POLS*1400 or POLS*2250
POLS*3490 Conflict and Conflict Resolution F (3-0) [0.50]
This course will examine the growing body of literature which considers violent conflict and its management. Materials are organized to reflect the trajectory of many contemporary conflicts: from explanations for violence, to identifying conditions and means to resolve conflict and, finally, to post-conflict governance. <i>Prerequisite(s):</i> POLS*1500 or POLS*2200
POLS*3650 Research Methods II: Quantitative Methods W (2-1) [0.50]
This course examines quantitative research methods used in political science, primarily sampling and surveying techniques, in combination with elementary statistical analysis. Students learn how to apply basic descriptive and inferential statistical procedures to research political problems and test hypotheses. In lab, students will acquire the skills to perform data analysis <i>Prerequisite(s):</i> POLS*3180 <i>Restriction(s):</i> Registration in Criminal Justice & Public Policy or Political Science (major, minor or area of concentration) or International Development (major only).
POLS*3670 Comparative Public Policy and Administration W (3-0) [0.50]
This course examines the role of the bureaucracy in national development in various economic, social and political environments. The focus of the course is the interplay between bureaucracy, democracy and development in a comparative perspective. <i>Prerequisite(s):</i> 1 of ISS*2010, POLS*2080, POLS*2100, POLS*2250
POLS*3710 Politics and Sexuality U (3-0) [0.50]
Sexuality is treated as a subject for political theory from a number of critical and interdisciplinary perspectives. The course examines the relationship between sexuality and politics by analyzing the dynamics of power in the context of sexuality. <i>Prerequisite(s):</i> POLS*2000 or PHIL*2060
POLS*3730 The Americas U (3-0) [0.50]
Despite varying political systems and different historical experiences, the Americas are cohering more and more as a political, economic and social unit. This course will examine evolving political systems and processes in Canada, the United States, Latin America and the Caribbean from a comparative and theoretical perspective. Special emphasis will be placed on hemispheric and regional issues. <i>Prerequisite(s):</i> POLS*2080 or POLS*2100

POLS*3790 The Political Economy of International Relations W (3-0) [0.50]

This course examines major features of the contemporary international political economy, treating major theories and concepts within this approach to international relations (hegemony, globalization, interdependence, world systems theory, etc.) and focusing on the operation of key international institutions and regimes (i.e. communications, trade and transport policy).

Prerequisite(s): 1 of ISS*2010, POLS*2080, POLS*2100, POLS*2200

POLS*3890 Government and Politics of India W (3-0) [0.50]

The course is designed to provide a survey of the history, society, culture, politics, government, bureaucracy and foreign relations of India.

Prerequisite(s): 1 of POLS*2080, POLS*2100, POLS*2200

POLS*3920 Modern China F (3-0) [0.50]

This course is a detailed study of the political history of modern China and its current politics. The main objective is to assess the extent to which the Chinese Communist Party has fulfilled its mandate, which is to build a sovereign and united China as well as to modernize the country within a socialist framework.

Prerequisite(s): 1 of POLS*2080, POLS*2100, POLS*2200

POLS*3930 Politics of the Agri-Food System U (3-0) [0.50]

Although the production and distribution of food is usually not primarily a function of government, in the 20th century government has been significantly involved in these areas. Questions about the proper role and scope of government involvement have been subject to constant debate, and the extent of this involvement has varied greatly depending on time and place. This course looks at how the state deals with the agricultural sector in different countries. (Also offered through distance education format.)

Prerequisite(s): POLS*1400, (POLS*2250 or a comparable background in a related discipline)

POLS*3940 Accountability and Canadian Government U (3-0) [0.50]

This course examines the role of accountability within the Canadian government. With an emphasis on fiscal policy at the federal level, the course uses an investigative framework to trace the linkages from policies and decisions to outcomes, and explores the factors that inhibit or facilitate the assignment of responsibility in a complex modern democracy. The roles of various actors (corporations, citizens, lobbyists, bureaucrats, politicians) within Canadian politics are explored, as are such issues as fiscal accountability, government spending, social programming, and economic dependency. (This is a multi-media course requiring on-line access to Netscape 4.0 or equivalent, as well as a video cassette recorder and television.) (Offered through distance education format only.)

Prerequisite(s): 5.00 credits

POLS*3960 Selected Topics in Political Science S,F,W (3-0) [0.50]

Readings and research in selected areas of the discipline not covered by regular course offerings. Students present a proposal and seek approval from a member of the department in the semester previous to enrolment in this course. The method of course presentation, emphasis, and evaluation are at the discretion of the instructor.

Prerequisite(s): 1.50 credits at the 3000 level in Political Science or equivalent

Restriction(s): Instructor consent required.

POLS*4030 Contemporary Political Theory U (3-0) [0.50]

An analysis of selected theories and political issues discussed by prominent 20th-Century thinkers. These contemporary works will be examined as part of the long tradition of political discourse dating back to the classical period.

Prerequisite(s): POLS*2000 and at least 1.00 credits at the 3000 level in Political Theory and Analysis

POLS*4100 Women, Justice and Public Policy U (3-0) [0.50]

This course will use gender-based analysis in examining a series of justice and public policy issues affecting the lives of women, including equality rights, pay and employment equity, domestic violence, sexual assault, family policy, health care policy, and pornography. How do current policies that developed out of neoliberalism influence the lives of women in different ways than men? How can/should they be changed to recognize the different life experiences of women as distinguished from men? The primary focus of the topics covered in this course will be Canadian, although the experiences in other countries will be covered, particularly as it relates to "best practices," where appropriate.

Prerequisite(s): 2 of POLS*2250, POLS*2300, POLS*3250 and 1.00 credits in Public Policy and Administration or Canada and the Americas

POLS*4120 Civil Rights and Civil Liberties in Canada and the U.S. F (3-0) [0.50]

The course examines changing conceptions of civil liberties and rights over time in Canada and the U.S., mechanisms for their protection and promotion, and what happens when civil liberties and rights clash with one another. In particular, the course will focus on civil rights and civil liberties decisions by the Supreme Courts in both countries. This focus will include seeking explanations for why and how the decisions were made by the Courts and what impact the decisions have had on public policy and society.

Prerequisite(s): POLS*3130 or POLS*3210 and at least 1.00 credits at the 3000 level in Public Policy and Administration

POLS*4140 Conceptions of Canada W (3-0) [0.50]

This course will explore evolving conceptions of Canadian identity and nationalism through consideration of political culture, institutions and constitutional arrangements. Possible topics include: multiculturalism, Aboriginal identity and community, Quebec nationalism, social citizenship, rights and representation, as well as Canada's global role and significance.

Prerequisite(s): POLS*2300 and 1.00 credits at the 3000 level in Canada and the Americas

POLS*4160 Multi-Level Governance in Canada U (3-0) [0.50]

This course considers the evolving relationship among levels of government in Canada. The growth of cities, the growth of policy responsibilities of provinces, the influence of international organizations, and the development of First Nations government in Canada all challenge the conventional study of federal-provincial relations in Canada. From year to year, this course examines one or several of these contemporary dynamics.

Prerequisite(s): POLS*2300 and 1.00 credits at the 3000 level in the Canada and the Americas stream.

POLS*4200 International Political Economy U (3-0) [0.50]

The course relies on theoretical approaches in IPE to examine relationships between politics and economics across national and regional levels. The evolution of the global political economy and its governance structures is explored, as well as contemporary debates about globalization and state and non-state actors' responses. Issue-areas may include: money and power, technology, trade, development and the environment.

Prerequisite(s): (1 of POLS*2080, POLS*2100, POLS*2200); and at least 1.00 credits at the 3000 level in Comparative/International Development

POLS*4250 Topics in Public Management W (3-0) [0.50]

This course will examine various topics related to governance, such as public management reform, public sector leadership, third sector organizations or budgeting and human resources.

Prerequisite(s): POLS*2250 and 1.00 credits at the 3000 level in Public Policy and Administration or Canada and the Americas

POLS*4260 Topics in Public Policy U (3-0) [0.50]

This course will examine various public policy issues such as social policy or health care policy in a Canadian or comparative context.

Prerequisite(s): (2 of POLS*2250, POLS*2300, POLS*3250), (1.00 credits in Public Policy and Administration or Canada and the Americas)

POLS*4300 Human Rights, Ethics, and Development W (3-0) [0.50]

This course is intended to address the ethical issues that arise from development processes and studies by focusing on human rights. The subject is explored from a range of philosophical, religious, and cultural perspectives, including both Western and non-Western. Related themes include global and social justice; nationalism, cosmopolitanism, and multiculturalism.

Prerequisite(s): POLS*2000 and 1.00 credits in Political Theory or Comparative/International Development

Restriction(s): POLS*3120

POLS*4710 Topics in Comparative Politics U (3-0) [0.50]

This course considers theories and problems in comparative politics and government in developing and industrialized countries. The geographical and theoretical focus of the course will reflect the interests of the instructor.

Prerequisite(s): (POLS*2080 or POLS*2100), 1.00 credits at the 3000 level in the Comparative/International Development stream.

POLS*4720 Topics in International Relations U (3-0) [0.50]

This course considers theories and problems in the field of International Relations. The theoretical and/or geographical focus of the course will reflect the interests of the instructor.

Prerequisite(s): POLS*2200 and 1.00 credits at the 3000 level in the Comparative/International Development stream.

POLS*4930 Selected Topics in Political Science II S,F,W (3-0) [0.50]

Readings and research in selected areas of the discipline not covered by regular course offerings. Students present a proposal and seek approval from a member of the department in the semester previous to enrolment in this course. The method of course presentation, emphasis, and evaluation are at the discretion of the instructor.

Prerequisite(s): 1.50 credits at the 3000 level in Political Science or equivalent

Restriction(s): Instructor consent required.

POLS*4970 Honours Political Science Research I S,F,W (3-0) [0.50]

This is Part I of the Honours Essay. Students complete the necessary reading and research for their Honours Essay under the supervision of a department advisor. A research proposal is expected by the end of the semester. Political science majors who wish to pursue an honours thesis must register in this course in their 7th semester. Student selection of an approved subject area and instructor must be completed in the semester previous to enrolment in this course.

Prerequisite(s): 70% average in all POLS courses. Recommendation: Students with less than a 75% average are advised not to take this course.

Restriction(s): Instructor consent required.

POLS*4980 Honours Political Science Research II S,F,W (3-0) [0.50]

This is Part II of the Honours Essay. Students organize and write their essays under the supervision of their advisor. Major honours political science students must register in this course in their 8th semester.

Prerequisite(s): POLS*4970

Restriction(s): Instructor consent required.

Population Medicine

Department of Population Medicine

POP*3240 Epidemiology F (3-0) [0.50]

The course examines the basic concepts of health and disease in populations. Methods used in descriptive and analytic epidemiological studies, including the design, analysis and interpretation of results for observational studies and field trials are presented.

Prerequisite(s): BIOL*1040, STAT*2040

POP*4040 Epidemiology of Food-borne Diseases F (3-0) [0.50]

This course examines the epidemiology and prevention of foodborne infections and intoxications, including those of both microbiological and chemical origin. Drawing on outbreak investigations, surveys, risk assessments, government surveillance systems and basic research, the biological, ecological, socio-economic and public health context of these diseases will be discussed.

Prerequisite(s): 1 of FOOD*3230, POPM*3240, instructor consent required.

Restriction(s): FOOD*4210

POP*4230 Animal Health F (3-0) [0.50]

This course examines the causes and effects of important diseases of food animals in Canada, with a focus on dairy cattle. Elements of physiology, epidemiology, microbiology, nutrition, and production management are integrated into a health management approach emphasizing disease prevention. The course is directed at senior undergraduate students with interest in and knowledge of, food animal production agriculture.

Prerequisite(s): ANSC*2340 or ANSC*3080

Psychology

Department of Psychology

Students wishing to take a 2000, 3000 or 4000 level course without having completed the appropriate prerequisites must receive permission of the instructor who will determine whether the student has the required background for the course. Students in all psychology courses will be encouraged to participate in the on-going research of the department.

Honours Courses: courses marked (H) are designed for students in a psychology honours program, the Information Systems and Human Behaviour program, the Developmental Psychology Minor program, the Educational Psychology Minor program, the Organizational Behaviour Minor program, the Social Psychology program, the Cognitive Neuropsychology Minor program, or Human Resources Management major of the Bachelor of Commerce program. Students in other programs wishing to take these courses must obtain the permission of the instructors concerned. Unless otherwise specified, all other courses may be taken by general, honours, and students from other programs, providing the prerequisites are met. **Courses designated with (H) are Honours level courses requiring for registration a cumulative average of at least 70% in all course attempts in Psychology, or registration in either the HRM Major or ISHB Major.**

Psychology Core: courses marked (C) are Psychology core courses. Students registered in psychology programs are advised to complete at least 2.00 credits of the psychology core at the 2000 level prior to attempting any 3000 level psychology credit other than PSYC*3320, PSYC*3370, and PSYC*3380.

For courses without semester designations, please check with the department. The remaining courses will normally be offered as indicated. Advance schedules are available in the department.

PSYC*1100 Principles of Behaviour S,F,W (3-0) [0.50]

This is an introduction to the study of biopsychology, sensory processes, perception, learning, memory, thought, language, consciousness and motivation. (Also offered through distance education format.)

PSYC*1200 Dynamics of Behaviour S,F,W (3-0) [0.50]

This is an introduction to the study of human development, intelligence, personality, psychopathology and its treatment and social psychology. (Also offered through distance education format.)

PSYC*2010 Quantification in Psychology S,F,W (3-0) [0.50]

An introduction to psychological measurement and to statistical principles in psychological research. The course emphasizes descriptive statistics and introduces concepts and techniques of hypothesis testing. Cannot be taken for credit by students with credit in a 2000 level or above course in statistics. (Also offered through distance education format.)

Prerequisite(s): PSYC*1100 or PSYC*1200

PSYC*2310 Introduction to Social Psychology S,F,W (3-0) [0.50]

The content and research methods of social psychology will be explored in lectures and seminars. Content includes social perception, attraction, group dynamics, leadership, conflict and cooperation, attitude change, aggression and conformity. (Also offered through distance education format.) (C)

Prerequisite(s): PSYC*1200

PSYC*2330 Principles of Learning F,W (3-1) [0.50]

An introduction to the basic principles and concepts of classical and instrumental conditioning paradigms of learning, via lectures, demonstrations and student projects. Some student projects may involve laboratory practice on animal conditioning. (C)

Prerequisite(s): PSYC*1100, PSYC*1200

PSYC*2360 Introductory Research Methods S,F,W (3-0) [0.50]

The application of scientific method in psychological experiments with laboratory demonstration. (Also offered through distance education format.)

Prerequisite(s): PSYC*1100, PSYC*1200, (PSYC*2010 or STAT*2040)

PSYC*2390 Principles of Sensation and Perception F,W (2-2) [0.50]

The course objective is to consider the processes of sensory inputs and perception. Approaches ranging from psychophysiology and cognitive psychology to physiology and anatomy will be used. In considering the psychology of sensation and perception, some of the anatomical and physiological aspects of selected senses will be covered in detail and the roles of experience, organization of inputs, and theories of perception are discussed. Topics to be emphasized will vary with the instructor, but may include ontogenetic development, learning, and modification of inputs and their perception. Students will participate in laboratory demonstrations and experiments. (Also offered through distance education format.) (C)

Prerequisite(s): PSYC*1100

PSYC*2410 Behavioural Neuroscience I F,W (3-2) [0.50]

A general introduction to the structure and function of the nervous system. The physiological basis of sensory (input) systems and the motor (output) system are examined as are central physiological bases of processes such as arousal and emotion. Laboratory demonstrations and exercises may be included. (C)

Prerequisite(s): PSYC*1100

PSYC*2450 Introduction to Developmental Psychology F,W (3-0) [0.50]

An introduction to and an analysis of the major theories of developmental psychology. Emphasis will be placed on the processes of development in the child including physical growth, perception, cognition, personality and interactions with the social environment. The application of developmental psychology to educational and social issues will be discussed. (Also offered through distance education format.) (C)

Prerequisite(s): PSYC*1100, PSYC*1200

PSYC*2650 Cognitive Psychology F,W (2-2) [0.50]

An introduction to cognitive processes, including topics in the areas of attention, memory, language and reasoning. Students will be exposed to and participate in laboratory demonstrations and experiments. (Also offered through distance education format.) (C)

Prerequisite(s): PSYC*1100

PSYC*2740 Personality S,F,W (3-0) [0.50]

A review of the theory, assessment procedures and research findings pertinent to major personality constructs. Personality research, methodology and design will also be covered. (Also offered through distance education format.) (C)

Prerequisite(s): PSYC*1100, PSYC*1200

PSYC*3010 Compensation Systems W (3-0) [0.50]

This course focuses on how organizations attract, retain, and motivate employees through formal and informal reward mechanisms. Topics include: developing pay structures, job analysis, job evaluation, pay systems, pay system administration, equity issues, and benefits. (Offered through distance education format only.) (H)

Prerequisite(s): PSYC*2310

Restriction(s): Students must have 70% average in Psychology courses to register or be enrolled in the B.Comm-HRM Major.

PSYC*3020 Psychology of Law U (3-0) [0.50]

An examination of psychological methods, findings and theories in the study of law. Topics will include the fallibility of the eyewitness; juror decisional processes; credibility of witnesses and attorneys; socialization into legal systems, police behaviour, etc. (Also offered through distance education format.)

Prerequisite(s): PSYC*2310 (also see psychology core statement)

PSYC*3030 Neurochemical Basis of Behaviour U (3-0) [0.50]

An analysis of how drugs act on various neurochemical systems to regulate motivation and behaviour. Topics of discussion may include psychopathology and its treatment.

Prerequisite(s): PSYC*1100, (BIOM*3090 or PSYC*2410) (also see psychology core statement)

PSYC*3040 Current Issues in Neuropsychology U (3-0) [0.50]

Major areas of applied brain research and clinical aspects of brain function will be covered. Emphasis will be given to the analysis of psychological deficits following brain damage and to selected aspects of intellectual disabilities.

Prerequisite(s): PSYC*1100, PSYC*2410 (also see psychology core statement)

PSYC*3060 Occupational Health Psychology F (3-0) [0.50]

The relationship between work, employment and both psychological and physical well-being. The promotion of workplace health through public policy and workplace intervention. (Also offered through distance education format.)

Prerequisite(s): PSYC*2310 (also see psychology core statement).

PSYC*3070 Psychology in Human Resource Management F (3-0) [0.50]

This course explores the application of psychological theory and measurement in human resources management. A dual perspective is taken: that of the worker impacted by these practices and that of the manager responsible for implementing them. Specific topics include recruitment, personnel selection, performance management, training, and executive assessment, development, and succession. (Also offered through distance education format.)

Prerequisite(s): PSYC*1200, PSYC*2310 (also see psychology core statement).

Restriction(s): HTM*3000

PSYC*3080 Organizational Psychology F,W (3-0) [0.50]
An examination of current theories and practices in organizational psychology. Selected topics may include motivation, turnover, absenteeism, leadership, job design, work attitudes, organizational justice, and organizational development and change. (Also offered through distance education format.)
<i>Prerequisite(s):</i> PSYC*2310 (also see psychology core statement).
<i>Restriction(s):</i> HTM*2200
PSYC*3090 Training and Development F (3-0) [0.50]
This course focuses on how organizations develop employee skills through training and development programs. Topics will include: adult learning principles, training needs assessments, training program design, instructional methodologies, coaching and mentoring, individualized development and program evaluation. (Offered through distance education only.) (H)
<i>Prerequisite(s):</i> PSYC*2310
<i>Restriction(s):</i> Students must have 70% average in Psychology courses to register or be enrolled in the BCOMM-HRM Major.
PSYC*3100 Evolutionary Psychology U (3-0) [0.50]
Evolutionary Psychology (EP) offers a Darwinian frame of reference for studying questions about human nature. After reviewing basic material on genetics and natural selection, we will examine and criticize the contribution of EP to the understanding of the various aspects of individual and social behaviour, such as altruism, logic, mate selection, health, morality, aesthetics, and the role of culture.
<i>Prerequisite(s):</i> PSYC*2360 (also see psychology core statement)
PSYC*3110 Topics in Health Psychology U (3-0) [0.50]
This course covers research in health psychology. Possible topics include the interplay of psychosocial factors, behaviour, and physical health; pediatric health psychology; health interventions at the individual, family, group or community levels.
<i>Prerequisite(s):</i> PSYC*2310, PSYC*2450 (also see psychology core statement)
PSYC*3220 Ergonomics: the Scientific Study of People-System Relationships U (3-0) [0.50]
This course provides a broad survey of the field of ergonomics from the perspective of psychology. Topics to be covered include: human-system concepts and models, safety, accidents, and human error, human perceptual capabilities, human-machine interfaces, engineering anthropometry, workplace design and evaluation methods, measuring the environment. The course will draw widely on web-based materials and require students to complete a number of interactive demonstrations and lab exercises. Students will be expected to draw upon their own workplace experiences and to actively apply the course material to practical workplace situations. (Offered through distance education only.)
<i>Prerequisite(s):</i> PSYC*2650, PSYC*2390
PSYC*3250 Psychological Measurement U (3-0) [0.50]
An introduction to the theory of psychological measurement and measurement procedures presently used in psychology. Coverage will include such topics as reliability, validity, test construction; and the measurement of ability, personality, attitudes, interest and achievement. (Also offered through distance education format.) (H)
<i>Prerequisite(s):</i> PSYC*2010 (also see psychology core statement)
PSYC*3280 Minds, Brains & Machines F (3-0) [0.50]
This course will introduce the student to basic issues in cognitive science from philosophical and psychological perspectives. Connectionism, Turing Machines, artificial intelligence, and alternative naturalistic models of the mind will be among the topics explored.
<i>Prerequisite(s):</i> 1.50 credits in Psychology or 1.50 credits in Philosophy
PSYC*3300 The Psychology of Gender U (3-0) [0.50]
This course will examine the theories and psychological research that deals with the impact of gender upon people's lives and behaviour. Topics will include gender-role socialization and stereotypes; gender-related status and power differentials; and gender differences and dynamics in the physiological, intrapsychic, interpersonal, and socio-cultural domains.
<i>Prerequisite(s):</i> PSYC*1200 and at least 1.00 credits of the psychology core (also see psychology core statement)
PSYC*3310 Applied Social Psychology U (3-0) [0.50]
A number of applied issues will be examined from a social psychological perspective. These may include aggression, prejudice, helping, mental illness, crime and addiction. The format will consist of reading, discussion and research/field projects.
<i>Prerequisite(s):</i> PSYC*2310 (also see psychology core statement)

PSYC*3320 Statistical Principles in Psychological Research F,W (3-2) [0.50]
The course emphasizes inferential tests applied to psychological research. Topics will include: t-tests, analysis of variance, multiple correlation and regression and selected topics in non-parametric statistics. Laboratory sessions will cover statistical application exercises in psychological research. (H)
<i>Prerequisite(s):</i> PSYC*2010 or STAT*2040
PSYC*3330 Memory U (3-1) [0.50]
An examination of theoretical and empirical studies of the psychological nature of the acquisition, storage and retrieval of information. Students will be exposed to and participate in laboratory demonstrations and experiments.
<i>Prerequisite(s):</i> PSYC*2650 (also see psychology core statement)
PSYC*3340 Psycholinguistics U (3-1) [0.50]
An introduction to the conceptions of the structure of language as they relate to processes underlying the acquisition, production, perception and understanding of speech, and to empirical studies that bear on these conceptions. Students will be exposed to and participate in laboratory demonstrations and experiments. (Also offered through distance education format.)
<i>Prerequisite(s):</i> LING*1000 or PSYC*2650 (also see psychology core statement)
PSYC*3370 Experimental Design and Analysis F (3-1) [0.50]
This course is intended for students planning to complete PSYC*4870 and PSYC*4880 in preparation for graduate studies in Psychology. This course emphasizes (1) the model comparison approach to analysis of variance and (2) effective scientific communication. Issues related to design choice, power, multiple-comparisons and categorical data analysis will be reviewed. Laboratory exercises will include SPSS applications and research projects. (H)
<i>Prerequisite(s):</i> PSYC*2360, (PSYC*3320 or STAT*2050)
<i>Restriction(s):</i> PSYC*3371/2. A minimum grade point average of 75% in Psychology courses or instructor consent.
PSYC*3380 Non-experimental Research Methods W (3-0) [0.50]
This course is intended for students planning to complete PSYC*4870 and PSYC*4880 in preparation for graduate studies in Psychology. This course addresses issues related to the internal and external validity of quasi-experimental, correlation and other non-experimental research methods, survey sampling and the development and refinement of survey questions. Course work includes SPSS applications, research projects and style of effective scientific communication. (H)
<i>Prerequisite(s):</i> PSYC*2360, (PSYC*3320 or STAT*2050)
<i>Restriction(s):</i> PSYC*3371/2. A minimum grade point average of 75% in Psychology courses or instructor consent.
PSYC*3390 Abnormal Psychology U (3-0) [0.50]
Current theory and research in the field of abnormal psychology will be examined in terms of various models (biological, behavioral, social and psychodynamic). Selected topics may include: stress and anxiety, affective disorders, schizophrenia, psychophysiological and personality disorders, and mental health. (Also offered through distance education format.)
<i>Prerequisite(s):</i> PSYC*2740 (also see psychology core statement)
PSYC*3410 Behavioural Neuroscience II U (2-2) [0.50]
This course will focus on contemporary research and theory related to such selected topics as physiological correlates of memory, learning, motivation, emotion, stress, sensory and motor functions. Both the central and peripheral components of the nervous system will be examined in relation to the above. Laboratory demonstrations, exercises and projects may be included.
<i>Prerequisite(s):</i> PSYC*2410 (also see psychology core statement)
PSYC*3430 Topics in Animal Learning and Cognition U (3-0) [0.50]
The study of current research in animal cognition, emphasizing such topics as numerical, spatial and logical competence, conceptual abilities, and memory. Seminar presentation and discussion will assume a basic knowledge of operant and Pavlovian conditioning as taught in PSYC*2330.
<i>Prerequisite(s):</i> PSYC*2330 (also see psychology core statement)
PSYC*3440 Cognitive Development U (3-0) [0.50]
An examination of theory and research pertaining to children's intellectual development. Topics include children's learning and the development of perception, memory, thinking and language.
<i>Prerequisite(s):</i> FRHD*2270 or PSYC*2450 (also see psychology core statement)

PSYC*3450 Social and Personality Development U (3-0) [0.50]
An examination of research, methodological issues and theories concerning personality-social development. Topics may include temperament, imitation, parent-child interaction, and the development of attachments, sex-roles, morality, aggression and pro-social behaviour.
<i>Prerequisite(s):</i> FRHD*2270 or PSYC*2450 (also see psychology core statement)
PSYC*3460 Abnormal Development U (3-0) [0.50]
Theory, research and aspects of current practice concerning abnormal psychological development in childhood and adolescence.
<i>Prerequisite(s):</i> PSYC*3440 or PSYC*3450 (also see psychology core statement)
PSYC*3480 Psychology of Sport U (3-0) [0.50]
An examination of individual and group behaviour in physical activities and sports. Emphasis will be placed on understanding psychological concepts which are pertinent to sports, e.g., motivation, social and personality development, cognition, leadership and group dynamics.
<i>Prerequisite(s):</i> PSYC*1100, PSYC*1200, (PSYC*2310 or PSYC*2740) (also see psychology core statement)
PSYC*3500 Social Interactions U (3-0) [0.50]
The course concentrates on social interactions in dyads and small groups. Selected topics will be examined through reading, discussion and student projects. Topics may include: the structure and sequence of conversation, self-disclosure, miscommunication, and nonverbal communication. (H)
<i>Prerequisite(s):</i> PSYC*2310 (also see psychology core statement)
PSYC*3520 Political Psychology U (3-0) [0.50]
A social psychological examination of collective behaviours, social movements and social (policy) change, emphasizing the development and impact of mass media and relationships with individual, collective and political violence.
<i>Prerequisite(s):</i> PSYC*2310 (also see psychology core statement)
PSYC*3570 The Psychology of Death and Dying U (3-0) [0.50]
An examination of theory, research, and issues in the psychology of death and dying. Emphasis is upon the cognitive operations used to process information about death and the influence of death constructs in daily life. Topics include the development of death concepts throughout the life-span, death anxiety in society, the needs of the dying person, the psychology of grieving, and unexpected losses such as deaths by suicide or miscarriage. (Offered through distance education format only.)
<i>Prerequisite(s):</i> 1 of PSYC*2310, PSYC*2740, PSYC*2450, work experience in related fields, instructor consent (also see psychology core statement)
PSYC*3660 Contemporary Psychology U (3-0) [0.50]
Some current developments in psychology. Topics will vary with the interests of faculty members assigned to the course and will be announced prior to the course selection period.
<i>Prerequisite(s):</i> previous study related to the topic area (also see psychology core statement)
PSYC*3680 Selected Topics in Psychology U (3-0) [0.50]
This course will highlight current and topical issues in psychology. Topics will vary with the interests of faculty members assigned to the course and will be announced prior to the course selection period.
<i>Prerequisite(s):</i> previous study related to the topic area (also see psychology core statement)
<i>Restriction(s):</i> Instructor consent required.
PSYC*3690 Community Mental Health U (3-0) [0.50]
An introduction to the principles and practices of community mental health and community psychology. The course deals with the application of public health concepts to the field of mental health, the epidemiology of mental disorder in the community, the design and evaluation of preventive programs for populations at risk of illness, and the creation of alternatives to institutional treatment of the mentally ill. Several field visits to community mental health programs will be arranged. This course should be of special interest to students who are planning to pursue careers in such human service fields as social work and occupational therapy.
<i>Prerequisite(s):</i> PSYC*2310 (also see psychology core statement)
PSYC*3710 Psychology of Learning Difficulties and Disabilities I F (3-0) [0.50]
An examination of current theories regarding learning difficulties and disabilities in educational settings. Emphasis will be placed on cognitive, social and motivational factors associated with learning problems and on behavioral and educational remedial approaches.
<i>Prerequisite(s):</i> 1 of FRHD*2270, PSYC*2450, PSYC*2650 (also see psychology core statement)

PSYC*3720 Psychology of Learning Difficulties and Disabilities II W (3-0) [0.50]
Continuation of PSYC*3710. Students will develop and report on a systematic remedial project involving an underachieving school-age child.
<i>Prerequisite(s):</i> PSYC*3710 (also see psychology core statement)
PSYC*3800 Psychology and Education U (3-0) [0.50]
The application of psychological principles and techniques to the study of the educational process. (Also offered through distance education format.)
<i>Prerequisite(s):</i> PSYC*1100, (PSYC*1200 or FRHD*2270) (also see psychology core statement)
PSYC*3850 Intellectual Disabilities U (3-0) [0.50]
This course covers applied and theoretical aspects of intellectual disabilities, and lays a foundation for work in the area of intellectual disabilities. (Also offered through distance education format.)
<i>Prerequisite(s):</i> FRHD*2270 or PSYC*2450 (also see psychology core statement)
PSYC*3900 Psychology Research Internship F,W,S (0-6) [0.50]
This course provides an experiential learning opportunity through the active participation of the student in a faculty member's ongoing research program. It is expected that students will develop a broader appreciation of the relationship between knowledge, theory and research while acquiring basic skills in research methodologies and modes of inquiry. The course will require involvement in both the practice and reporting of research. The student must consult the supervisory faculty member before selecting or registering for the course.
<i>Prerequisite(s):</i> PSYC*1100, PSYC*1200, PSYC*2010 and at least 1.00 credits at the 2000 level of the psychology core
<i>Restriction(s):</i> Instructor consent required.
PSYC*3910 Psychology Externship F,W,S (0-6) [0.50]
An independent program of study formally integrating the student's academic study with one or more work experiences, to be decided by the student in consultation with the supervisory faculty (normally the department's co-op coordinator) prior to registration in the course. In order to qualify for this course, the student must be employed in a work setting at the time of registration to help ensure that a suitable project is feasible in the context of a work placement or employment. The department is not responsible for obtaining employment. The course project is aimed at making a significant contribution to the work setting. The student must consult with the supervisory faculty before selecting or registering for the course. (Enrolment is limited. Not open to co-op students.)
<i>Prerequisite(s):</i> (PSYC*1100, PSYC*1200, PSYC*2010 and at least 1.00 credits at the 2000 level of the psychology core) or enrolment in the B.Comm Program, Human Resources Management Major
<i>Restriction(s):</i> Instructor consent required.
PSYC*4100 Applied Research in Human Resources Management F (3-0) [0.50]
This course provides students with the opportunity to conduct hands-on research in an organization on issues that relate to Human Resource Management. Students will work in groups and be expected to find organizations for their research project. Although students will be primarily accountable for finding their organizations to work with, instructor support will be provided to assist students if difficulties arise. The instructor will also serve as a resource throughout the project. Lecture topics include: understanding organizational issues, understanding the consulting process (e.g. engagement, communication, ethics), project planning, data collection methods in an applied context (e.g. sampling, confidentiality, practical constraints), and report writing. (H)
<i>Prerequisite(s):</i> PHIL*2600, PSYC*2360, (HTM*3000 or PSYC*3070), (HTM*2200 or PSYC*3080)
PSYC*4310 Advanced Topics in Social Psychology U (3-0) [0.50]
An in-depth examination of specific advances in social psychological research, theory, and/or applications. Specific topics, to be announced prior to course selection, will vary according to the interests of the instructor of the course. (H)
<i>Prerequisite(s):</i> PSYC*3310 or PSYC*3500 (also see psychology core statement)
PSYC*4320 Advanced Applied Social Psychology F (3-0) [0.50]
A seminar course dealing with topics of an applied social nature. This course may focus on a single or a variety of topics such as: health, forensics, conflict (inter-group and interpersonal), social justice and cultural issues. This course addresses both research and practice issues and covers a variety of theories and methodologies. (H)
<i>Prerequisite(s):</i> PSYC*3310 or PSYC*3500

PSYC*4330 Advanced Topics in I/O Psychology (H) U (3-0) [0.50]
Students will examine theoretical and methodological issues in selected topic areas of industrial/organizational psychology. The focal area of the course, or range of industrial/organizational topics covered by the course, will vary depending on instructor. Selected topic areas may include leadership issues, gender issues, human rights issues, recruitment methods and outcomes, functional job analysis and validation methods, job performance criteria and appraisal tools, selection processes and tools, organizational justice, work attitudes, and prejudice and discrimination in the workplace. Specific topic areas will be announced prior to the course selection period. (H)
<i>Prerequisite(s):</i> (HTM*3000 or PSYC*3070), (HTM*2200 or PSYC*3080)
PSYC*4370 History of Psychology U (3-0) [0.50]
The historical roots of modern psychology. Students electing to major by completing the Honours Thesis Courses I and II should note that they are expected to also take either PSYC*4900, or this course, prior to, or concurrent with, either PSYC*4870 or PSYC*4880 (see Graduate Advisory Note under Major). (H)
<i>Prerequisite(s):</i> 4.00 credits in psychology, with at least 1.00 credits at the 3000 level or above
PSYC*4440 Contemporary Issues in Child Development U (3-0) [0.50]
This course is primarily designed for students in the Psychology program whose special interests are developmental. Students will examine theoretical and methodological issues in a specific area of developmental psychology. The course will involve detailed evaluation of selected studies and when appropriate, student research projects. (H)
<i>Prerequisite(s):</i> PSYC*2360, (PSYC*3440 or PSYC*3450)
PSYC*4500 Current Theoretical Issues in Psychology S,F,W (3-0) [0.50]
An independent program of study in topics of current theoretical import in psychology, to be decided by the student in consultation with the supervisory faculty member before the student may select or register for the course. (H)
<i>Prerequisite(s):</i> 4.00 credits in psychology, with at least 1.00 credits at the 3000 level or above
<i>Restriction(s):</i> Instructor consent required.
PSYC*4510 Current Issues in Psychology S,F,W (0-6) [0.50]
The study of issues of current interests in psychology. Topics will vary with the interests of faculty members assigned to the course and will be announced prior to the course selection period. The course is available either as a senior lecture/seminar course with regularly scheduled class times, or as an independent study course with the topic and schedule decided in advance by the student in conjunction with a supervisory faculty member. (H)
<i>Prerequisite(s):</i> 4.00 credits in psychology, with at least 1.00 credits at the 3000 level or above and previous study related to the topic area (also see psychology core statement)
<i>Restriction(s):</i> Instructor consent required.
PSYC*4600 Cognitive Neuroscience U (3-0) [0.50]
This course will focus on methods used in contemporary cognitive neuroscience (including but not limited to: PET, functional MRI, EEG, intracranial stimulation and recording) as they aid in the elucidation of neural basis of behaviour. (H)
<i>Prerequisite(s):</i> PSYC*2360, (1 of PSYC*2390, PSYC*2410, PSYC*2650), (also see psychology core statement)
<i>Restriction(s):</i> PSYC*4400
PSYC*4750 Motivation U (3-0) [0.50]
This course examines the topics of motivation and emotion from various disciplinary perspectives, adopting a senior seminar format and problem-centred approach. (H)
<i>Prerequisite(s):</i> 15.0 credits
PSYC*4760 Seminar in Personality and Individual Differences U (3-0) [0.50]
A course in personality and individual differences intended primarily for honours students in psychology. Emphasis will be placed on a critical analysis of current controversies in the area as well as an in-depth examination of specific advances in the field. Specific topics, to be announced prior to course selection, will vary according to the interests of the instructor of the course. (H)
<i>Prerequisite(s):</i> PSYC*2740, PSYC*3250

PSYC*4870 Honours Thesis I S,F,W (3-0) [0.50]
Under individual faculty supervision, students plan, develop, and write a research proposal and prepare an extensive review paper on their area of research. Group sessions are held on research ethics, subject protocols and computer data handling techniques. This course will be graded on a Pass/Fail basis. Note that enrolment in this course is limited and academic records are used for student selection. Course registration requires the signature of the Chair of the department's Undergraduate Affairs and Curriculum Committee (UACC). This UACC signature is contingent upon the student demonstrating they have obtained a Thesis Supervisor's signature on the department's Thesis Registration Form and have an academic standing appropriate for application to graduate programs (see Graduate Advisory under Major). As well, registration for Honours Thesis I will require that either PSYC*4370 or PSYC*4900 is taken prior to, or concurrent with, either PSYC*4870 or PSYC*4880. (H)
<i>Prerequisite(s):</i> [(PSYC*3370, PSYC*3380), or PSYC*3371/2], [70% average across (PSYC*2010 or STAT*2040), (PSYC*3320 or STAT*2050)]
<i>Restriction(s):</i> Instructor consent required.
PSYC*4880 Honours Thesis II S,F,W (2-10) [1.00]
A continuation of PSYC*4870. Students conduct research and write an undergraduate thesis under the direction of a faculty member. This course is intended for students in the honours program. Note that registration in this course will require that either PSYC*4370 or PSYC*4900 is taken prior to, or concurrent with, either PSYC*4870 or PSYC*4880. (H)
<i>Prerequisite(s):</i> PSYC*4870, [70% average across (PSYC*2010 or STAT*2040), (PSYC*3320 or STAT*2050), [(PSYC*3370, PSYC*3380) or PSYC*3371/2]
<i>Restriction(s):</i> PSYC*4881/2
PSYC*4900 Psychology Seminar U (3-0) [0.50]
Student seminars and discussions will be organized around theoretical and substantive issues in the discipline of psychology. A major objective is to assist advanced undergraduate students to achieve a degree of synthesis of materials studied in their previous psychology courses (also see psychology core statement). Students electing to Major by completing the Honours Thesis I and II should note that they are expected to also take either PSYC*4370, or this course, prior to, or concurrent with, either PSYC*4870 or PSYC*4880 (see Graduate Advisory under Major). (H)
<i>Prerequisite(s):</i> 14.00 credits (including 4.00 credits in psychology, with at least 1.00 credits at the 3000 level or above)
<i>Restriction(s):</i> Registration in a Psychology Major of an Honours program.
PSYC*4910 Co-operative Education Project I S,F,W (0-6) [0.50]
An independent program of study formally integrating the student's academic study with 1 or more work experiences provided by the co-operative education program, to be decided by the student in consultation with the supervisory faculty. The course is normally to be taken concurrently with a co-operative education work term, with the project preferably aimed at making a significant contribution to the work setting. (H)
<i>Prerequisite(s):</i> 2 co-operative education work terms
<i>Restriction(s):</i> Instructor consent required.

Sociology

Department of Sociology and Anthropology

The Department of Sociology and Anthropology offers three types of courses: sociology courses with the prefix SOC*; anthropology courses with the prefix ANTH*; and departmental courses with the prefix SOAN*.

Courses will normally be offered in the semesters designated. For information on other semesters these courses will be offered and the semesters those courses without designations will be offered, please check with the department. In addition to regularly scheduled courses, students may elect to do independent study. A student who wishes to do a reading course should first consult the professor with whom he/she wishes to work. Please note: a student is allowed a total of 1.00 credits only for reading courses.

SOAN courses will be used towards the Sociology specializations.

Please note: The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

SOC*1100 Sociology S,F,W (3-0) [0.50]

An introductory course dealing with the basic concepts and methods of sociology applied to societies, groups and individuals. Students will gain an understanding of basic social processes such as socialization, social exchange, deviance and conformity, social change and basic social institutions such as the economy, the polity, the family, religion, education. (Also offered through distance education format.)

SOC*1500 Crime and Criminal Justice F,W (3-0) [0.50]

This course will introduce students to the study of crime and criminal justice. It will examine the various criminological theories, types of criminal behaviour, and the criminal justice system.

SOC*2010 Canadian Society U (3-0) [0.50]

A description of the structure of Canadian society with its social, political and economic tensions.

Prerequisite(s): SOC*1100

SOC*2070 Social Deviance S,F,W (3-0) [0.50]

An introduction to some of the basic theories of deviance and social control and their application to selected social problems. (In spring semester offered through distance education format only.)

Prerequisite(s): SOC*1100 or SOC*1500

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website.

SOC*2080 Rural Sociology W (3-0) [0.50]

An introduction to the structure and processes of rural society. This course deals with diverse topics such as agrarian movements, the rise of the agro-industrial complex, the role of the state in agriculture, the question of community, and rural environmental issues. A comparative perspective is cultivated, although the primary emphasis is on Canadian society.

Prerequisite(s): 1 of ANTH*1150, GEOG*1220, SOC*1100

SOC*2280 Society and Environment U (3-0) [0.50]

An introduction to the nature and dimensions of the environmental crisis. The values, interests and social institutions (including government and industry) that promote pollution or environmentalism will be considered. Issues to be examined may include global warming, nuclear energy, environmental toxins, species extinction and population growth pressures.

Prerequisite(s): 1 of ANTH*1150, GEOG*1220, SOC*1100

SOC*2390 Class and Stratification U (3-0) [0.50]

An examination of the persistent bases of social inequalities such as wealth, income, power and prestige including class formation, class consciousness, political activity and social mobility.

Prerequisite(s): SOC*1100

SOC*2660 Contemporary Native Peoples of Canada U (3-0) [0.50]

An analysis of the impact of Euro-Canadian society on native culture. Particular emphasis will be given to contemporary issues relating to Canadian native peoples (Indians, Inuit and Metis) such as education, treaties and reserves, land claims, government administration and economic development. (Offered in odd-numbered years.)

Prerequisite(s): ANTH*1150 or SOC*1100

Restriction(s): ANTH*2660

SOC*2700 Criminological Theory W (3-0) [0.50]

This course will examine the development of criminological theory from the late 1700s to contemporary times.

Prerequisite(s): SOC*1500

SOC*2750 Serial Murder S,F,W (3-0) [0.50]

This course examines the theoretical and empirical literature on serial murder. It reviews the popular image of serial murder and compares this image with that derived from scholarly investigation. Specific topics include the definition of serial murder, the methods used to detect serial murder, including profiling, and the creation of serial murder typologies. The course does not discuss individual serialists. The course examines how to understand and study serial murder in modern societies. (Offered through distance education format only.)

Prerequisite(s): 1 of ANTH*1150, FRHD*1010, PHIL*1010, POLS*1400, PSYC*1100, PSYC*1200, SOC*1100, SOC*1500

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website.

SOC*3040 Sociology of Social Welfare W (3-0) [0.50]

This course examines the major factors that shape the welfare state and considers what impact welfare policies have on people. Central to the discussion is welfare in Canada and what changes are desirable and feasible. (Offered in odd-numbered years.)

Prerequisite(s): SOAN*2111/2, SOAN*2120

SOC*3110 Comparative Religious Systems W (3-0) [0.50]

An analysis of stability and change in patterns of religious beliefs, behaviour and institutions. (Offered in odd-numbered years.)

Prerequisite(s): SOAN*2111/2, SOAN*2120

SOC*3130 Politics and Society U (3-0) [0.50]

An interpretation of the political process and its relationship to other aspects of the social structure, including such topics as political parties, movements, factions, citizen participation, power structures and the process of political exchange.

Prerequisite(s): SOAN*2111/2, SOAN*2120

SOC*3310 Contemporary Theory F (3-0) [0.50]

This course outlines and evaluates the major theories in use today. A central aspect of the course is instruction in the application of these theories.

Prerequisite(s): SOAN*2111/2, SOAN*2120

SOC*3340 Education, Change and Resistance U (3-0) [0.50]

An examination of educational institutions and their relationships to other sectors of society, in particular political and economic. Topics include the nature and objectives of education, equality of opportunity, measures of educational achievement and attainment, manifest and hidden curricula, and public policy.

Prerequisite(s): SOAN*2111/2, SOAN*2120

SOC*3380 Society and Nature U (3-0) [0.50]

Classical to contemporary theories of the relations between society and the environment will be examined. These include Cartesian, Puritan, Utilitarian, laissez-faire liberal, Marxist, "deep ecologist" and eco-feminist approaches. Concepts to be explored are ecology, wilderness, growth, sustainability, species, domination, animal rights and stewardship.

Prerequisite(s): 1 of ANTH*1150, PHIL*2070, SOC*1100, SOC*2280

SOC*3410 Individual and Society U (3-0) [0.50]

Examining social-psychology from the sociological perspective, this course deals with the relation between social and cultural structure, on the one hand, and self or personality on the other. Employing symbolic interactionism and affect control theory, the course shows how social interaction mediated by language is the well-spring of both social cognitions and emotions.

Prerequisite(s): SOAN*2111/2, SOAN*2120

SOC*3490 Law and Society S,W (3-0) [0.50]

This course examines the social basis of law. Specific topics include the law as an instrument of stability or change, and the role of law makers, law enforcers and interpreters, including the legal profession, the police, judges and courts. (Also offered through distance education format.)

Prerequisite(s): (SOAN*2111/2 or SOC*2700), SOAN*2120

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website.

SOC*3710 Young Offenders W (3-0) [0.50]

This course examines concerns about youth crime in Canada and elsewhere. It examines the history of legislation to control youth crime, criminal justice processing and practices, public reactions and concerns about youth crime and theoretical models used to explain youth crime.

Prerequisite(s): (SOAN*2111/2 or SOC*2700), SOAN*2120

Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).

SOC*3730 Courts and Society W (3-0) [0.50]
This course is an introduction to the social processes involved in the court, particularly the criminal court. Typical concerns will be the place of courts in society, public opinion and confidence in courts, purposes and principles of sentencing, sentencing reforms and disparities (e.g., across gender and race), the role of criminal records, juries, the roles of judges, and alternatives to criminal courts. <i>Prerequisite(s):</i> (SOAN*2111/2 or SOC*2700), SOAN*2120 <i>Restriction(s):</i> Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).
SOC*3740 Corrections and Penology F (3-0) [0.50]
This course will examine the current state of knowledge regarding the role of corrections and penology. It will examine such specific issues as public perception and reaction to the criminal justice system's methods of punishment and treatment of criminal offenders, the effectiveness of sentencing options and policies, including fines, probation, prison sentences and parole. It will also examine the various theoretical and methodological approaches to the study of courts, corrections and penology. <i>Prerequisite(s):</i> (SOAN*2111/2 or SOC*2700), SOAN*2120 <i>Restriction(s):</i> Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).
SOC*3750 Police in Society F (3-0) [0.50]
This course will examine the role of police in society. It will examine theories of policing, the history of policing and such issues as police citizen interaction, relations with visible minorities, methods for controlling police behaviour, and the effectiveness of the police in carrying out specific policy directives. <i>Prerequisite(s):</i> (SOAN*2111/2 or SOC*2700), SOAN*2120 <i>Restriction(s):</i> Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).
SOC*3840 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available. <i>Prerequisite(s):</i> 10.00 credits including (1 of SOAN*2111/2, SOC*2080, SOC*2700), SOAN*2120
SOC*3850 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available. <i>Prerequisite(s):</i> 10.00 credits including (1 of SOAN*2111/2, SOC*2080, SOC*2700), SOAN*2120
SOC*3950 Special Projects in Sociology S,F,W (3-0) [0.50]
This special study option/reading course is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the study is required. <i>Prerequisite(s):</i> 10.00 credits <i>Restriction(s):</i> Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.
SOC*4010 Violence and Society W (3-0) [0.50]
This course will focus on the changing nature of violence in our society by critically evaluating theory, research and public policy on the causes and control of violence. The links among structural, institutional and interpersonal violence will be examined as well as the social construction of violence, particularly why some forms of violence are considered to be more serious social problems than others. <i>Prerequisite(s):</i> 15.00 credits including (SOC*2700 or SOC*3310), (SOAN*3120 or POLS*3650) <i>Restriction(s):</i> Registration in Anthropology, Criminal Justice & Public Policy or Sociology majors.
SOC*4030 Advanced Topics in Criminology F (3-0) [0.50]
An in-depth study of selected issues in criminology. <i>Prerequisite(s):</i> (2 of SOC*3490, SOC*3710, SOC*3730, SOC*3740, SOC*3750), (1 of ANTH*3690, SOC*2700, SOC*3310), (SOAN*3120 or POLS*3650) <i>Restriction(s):</i> Registration in Criminal Justice & Public Policy (major, minor or area of concentration).

SOC*4200 Advanced Topics in Criminal Justice W (3-0) [0.50]
An in-depth study of issues in criminal justice. <i>Prerequisite(s):</i> (2 of SOC*3490, SOC*3710, SOC*3730, SOC*3740, SOC*3750), (1 of ANTH*3690, SOC*2700, SOC*3310), (SOAN*3120 or POLS*3650) <i>Restriction(s):</i> Registration in Criminal Justice & Public Policy (major, minor or area of concentration).
SOC*4210 Advanced Topics in Rural Sociology U (3-0) [0.50]
A critical examination of the research literature in rural sociology, both in industrial and industrializing societies. <i>Prerequisite(s):</i> 12.50 credits including (SOAN*2120 or GEOG*2210), SOC*2080
SOC*4230 Comparative Sociology W (3-0) [0.50]
Societies and social institutions in cross-cultural perspectives. The focus of this course will vary but in every instance will explicitly involve cross-cultural comparisons. (Offered in even-numbered years.) <i>Prerequisite(s):</i> 12.50 credits including SOAN*2120, SOC*2080
SOC*4300 Theoretical and Methodological Issues W (3-0) [0.50]
This course will provide an opportunity for sociology majors to consider in detail the integration of theoretical and methodological issues at an advanced level. It is meant to engage students in the latest developments in a particular area of the discipline. Course topics will be announced and course outlines will be available at course selection time. This course is highly recommended to students who are considering graduate work in sociology. <i>Prerequisite(s):</i> 15.00 credits including SOAN*3070, SOAN*3120, SOC*3310
SOC*4310 Advanced Topics in Canadian Society U (3-0) [0.50]
A detailed examination of selected topics in Canadian society such as regional tensions, aboriginal issues, implications of free trade, constitutional reform, social programs. <i>Prerequisite(s):</i> 12.50 credits including (ANTH*3690 or SOC*3310), SOAN*3070, SOC*2010
SOC*4440 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available. <i>Prerequisite(s):</i> 12.50 credits including SOC*3310, SOAN*3070, SOAN*3120
SOC*4540 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available. <i>Prerequisite(s):</i> 12.50 credits including SOC*3310, SOAN*3070, SOAN*3120
SOC*4640 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available. <i>Prerequisite(s):</i> 12.50 credits including SOC*3310, SOAN*3070, SOAN*3120
SOC*4700 Seminar: Theoretical Issues in Sociology U (3-0) [0.50]
An examination of selected theoretical issues. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available. <i>Prerequisite(s):</i> 12.50 credits including SOC*3310, SOAN*3070, SOAN*3120
SOC*4740 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available. <i>Prerequisite(s):</i> 12.50 credits including SOC*3310, SOAN*3070, SOAN*3120

SOC*4840 Seminar in Sociology F,W (3-0) [0.50]

This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

Prerequisite(s): 12.50 credits including SOC*3310, SOAN*3070, SOAN*3120

SOC*4880 Special Projects in Sociology S,F,W (3-0) [0.50]

This special study/reading course option is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the project is required.

Prerequisite(s): 12.50 credits

Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.

SOC*4890 Special Projects in Sociology S,F,W (3-0) [0.50]

This special study/reading course option is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the project is required.

Prerequisite(s): 12.50 credits

Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.

SOC*4900 Honours Sociology Thesis I S,F,W (3-0) [0.50]

Development and design of an honours thesis proposal conducted under the supervision of a faculty member. Recommended to Honours students.

Prerequisite(s): 15.00 credits including SOC*3310, SOAN*3070, SOAN*3120. CJPP students must have 15.00 credits including SOC*2700, SOAN*3120, or POLS*3650

Restriction(s): A cumulative average of 70% in all Sociology and Anthropology courses. Instructor consent required

SOC*4910 Honours Sociology Thesis II S,F,W (3-0) [0.50]

Completion and presentation of honours thesis.

Prerequisite(s): SOC*4900

Restriction(s): Instructor consent required.

Sociology and Anthropology

Department of Sociology and Anthropology

The Department of Sociology and Anthropology offers three types of courses: sociology courses with the prefix SOC*; anthropology courses with the prefix ANTH*; and departmental courses with the prefix SOAN*.

SOAN*2040 Globalization of Work and Organizations F,W (3-0) [0.50]

This course examines the sociological dimensions of work and occupations. Specific topics may include: the organizational context of work, occupational and labour market structures, job satisfaction, industrial relations, technological change, and the effects of gender, age, race/ethnicity on how work and employment are experienced.

Prerequisite(s): ANTH*1150 or SOC*1100

SOAN*2111 Classical Theory F (3-0) [0.50]

First part of the two-semester course SOAN*2111/2. Refer to SOAN*2111/2 for course description.

Prerequisite(s): 1 of ANTH*1150, SOC*1100, SOC*1500

SOAN*2111/2 Classical Theory F-W [1.00]

This course explores the origins and early development of sociological theory in its classical and early contemporary traditions. When you select it you must select SOAN*2111 in the Fall semester and SOAN*2112 in the Winter semester. A grade will not be assigned to SOAN*2111 until SOAN*2112 has been completed.

Prerequisite(s): 1 of ANTH*1150, SOC*1100, SOC*1500

SOAN*2112 Classical Theory W (3-0) [0.50]

Second part of the two-semester course SOAN*2111/2. Refer to SOAN*2111/2 for course description.

Prerequisite(s): SOAN*2111

SOAN*2120 Introductory Methods F,W (3-0) [0.50]

A general introduction to the process of social research emphasizing research design, techniques of data collection, analysis and interpretation of research results.

Prerequisite(s): 1 of ANTH*1150, SOC*1100, SOC*1500

SOAN*2290 Identities and Cultural Diversity U (3-0) [0.50]

An examination of the interrelationships among Canadian ethnic, racial and linguistic groups including their locations in the Canadian mosaic.

Prerequisite(s): ANTH*1150 or SOC*1100

SOAN*2400 Introduction to Gender Systems S,F (3-0) [0.50]

An introduction to the examination of the characteristics of gender relationships both historically and cross-culturally. Amongst the emphases are theoretical approaches to gender analysis, methodologies, case studies and attention to themes such as class and stratification, race and ethnicity, identities and global restructuring as these shape gender dynamics. (In spring semester offered through distance education format only.)

Prerequisite(s): ANTH*1150 or SOC*1100

SOAN*3070 Qualitative and Observational Methods W (3-0) [0.50]

Non-quantitative techniques in social research including participant observation, unobtrusive methods, case studies and interviewing.

Prerequisite(s): SOAN*2120

SOAN*3100 Gender Perspectives on Families and Households U (3-0) [0.50]

This course explores families and households from a gender perspective, using insights from sociology and anthropology.

Prerequisite(s): (1 of ANTH*2160, SOAN*2111/2, SOAN*2400), (SOAN*2120 or WMST*3000)

Restriction(s): FRHD*3120

SOAN*3120 Quantitative Methods F (3-0) [0.50]

This course introduces basic descriptive and inferential techniques used in quantitative social research. Students will acquire the skills needed to perform basic analyses and to read the research literature. They will also acquire skills in using a standard computer package to perform data analyses. Topics include: data organization, sample description, hypothesis testing and measures of association. Note: Students who have completed any other statistics course(s) should consult with the instructor. In some instances, SOC*3120 may be waived as a departmental requirement.

Prerequisite(s): SOAN*2120

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

SOAN*3250 Social Change in Latin America F (3-0) [0.50]

This course provides a critical, comparative examination of the social-structural and cultural transformations occurring in Latin America in a context of deepening integration with the global north. Topics to feature prominently may include land reform, depeasantization, out-migration, maquiladoras, informal employment, race and ethnic relations, religiosity and religious identification, and social movements. The particular sub-regional focus may vary.

Prerequisite(s): 1 of ANTH*2160, IDEV*2010, SOC*2080

SOAN*3460 Ethnicity and Aging W (3-0) [0.50]

An examination of ethnic social structure, ethnicity, and aging. Variations in age related behaviour associated with ethnic groups in Canada will be viewed from a sociological and gerontological perspective. (Offered in odd-numbered years.)

Prerequisite(s): SOAN*2111/2, SOAN*2120, SOAN*2290

SOAN*3680 Perspectives on Development F (3-0) [0.50]

This course examines theories and processes relating to international development and the responses to these by anthropologists and/or sociologists.

Prerequisite(s): 1 of ANTH*2160, IDEV*2010, SOC*2080

Restriction(s): ANTH*3680 . Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

SOAN*4220 Gender and Change in Rural Canada F (3-0) [0.50]

This course examines socio-cultural structures affecting historically gendered positions and roles in rural Canada. (Offered in odd-numbered years.)

Prerequisite(s): 12.50 credits including (ANTH*2160 or SOC*2080), (SOAN*2120 or WMST*3000)

SOAN*4240 Women and the Development Process U (3-0) [0.50]

To increase students' understanding of the relation of socio-economic, political and cultural changes on the roles of women in "developing areas" and how women, in turn, affect socio-economic changes.

Prerequisite(s): 12.50 credits including (1 of ANTH*3400, IDEV*2010, SOAN*3680), (1 of SOAN*3070, SOAN*3120, WMST*3000)

SOAN*4320 Transition from School to Work W (3-0) [0.50]

This applied course examines the evolving research and models in the transitions from school to work area. There is an evolving literature in this area based, in part, on the successful application of research in the transition from high school to postsecondary education. This 'capstone' course also considers the practical issues involved in making such a move, considering the knowledge, skills, and values needed by university students to succeed in the modern workplace (public, private, and not-for-profit sectors) in Canada. Students will complete an "Action Sociology/Anthropology Project," as well as a "Skills Portfolio," and other work related to their own transition.

Restriction(s): Registration in Sociology, Anthropology or Criminal Justice & Public Policy majors in semester 7 or 8.

SOAN*4500 Community Development U (3-0) [0.50]

An analysis of approaches to community development defined as planned, change-directed action undertaken by individuals, groups and organizations. The course will include the examination of actual community development practices.

Prerequisite(s): (1 of ANTH*2160, IDEV*2010, SOC*2080), (GEOG*2210 or SOAN*2120)

Restriction(s): SOAN*3300

Soil Science

Department of Land Resource Science

SOIL*2010 Soil Science W (3-2) [0.50]

An introduction to the principles of soil science - the origin of soils, their classification and interpretation in natural and modified environments. Soil will be studied as a product of the natural environment, with a focus on formation processes and changes which occur when it is modified through use. A variety of uses including agriculture, forestry, recreation, and urban development will be considered. This course is not for B.Sc.(Agr.) students. (Also offered through distance education format.)

SOIL*2120 Introduction to Environmental Stewardship F (3-2) [0.50]

An introduction to the concepts of resources management, environmental planning and assessment, land stewardship and sustainable development. Case studies of specific issues such as parks and natural heritage conservation, agricultural land loss, and integrated rural resources management will provide insight on approaches to decision making. Discussion of the concept of stewardship as an environmental ethic. (Also offered through distance education format.)

SOIL*3000 Environmental Issues in Agriculture and Landscape Management W (3-2) [0.50]

This course provides an introduction to a range of specific environmental and resource issues in agriculture and landscape management. Issues to be covered include geological resources, climate change, nutrient management, groundwater contamination, source water protection, land use planning, and natural resources management.

Prerequisite(s): AGR*2320 or SOIL*2010

Equate(s): AGR*2301, SOIL*2200

SOIL*3030 Tutorials in Organic Agriculture 1 F (3-2) [0.50]

Building on the introductory exposure offered in CROP*2050, this course will rely on lectures and small group mentoring to stimulate independent, learner-centered analysis of selected topics in organic agriculture. Students will participate in an interdisciplinary analysis of case-study topics offered in the form of two, 6 week modules on biophysical and social issues, including composting and crop rotations as well as socio-political and marketing forces bearing on organics. The goal is to encourage holistic, systematic thinking in students learning to become self-directed analysts and decision-makers. Seminar periods will support both guest speakers and student presentations.

Prerequisite(s): CROP*2050

SOIL*3050 Land Utilization F (3-1) [0.50]

Principles of land utilization and planning at the global, national, regional and local levels. Land characterization and classification using photo-interpretive techniques and computerized soil survey interpretive programs. Land capability/suitability for agriculture, forestry and engineering purposes. Emphasis on specific land use issues in Canada.

Prerequisite(s): 1 of AGR*2301/2, AGR*2320, GEOG*1300, GEOL*1000, SOIL*2010

SOIL*3060 Environmental Soil Chemistry F (3-2) [0.50]

The formation and properties of clay minerals and organic matter; ionic exchange, soil acidity, and alkalinity, oxidation and reduction potential, and dissolution and precipitation. Laboratory sessions will illustrate principles of soil chemistry.

Prerequisite(s): 1 of AGR*2301/2, AGR*2320, SOIL*2010

SOIL*3070 Environmental Soil Physics F (3-3) [0.50]

Practical aspects of water movement and contaminant transport in soils. Hands-on experience with standard laboratory and field methods of measuring soil physical properties. Applications of soil physics in characterizing pathogen and nutrient transport to groundwater, landfill cap and linear design, turf management.

Prerequisite(s): 1 of MATH*1080, AGR*2301/2, SOIL*2010

SOIL*3080 Soil and Water Conservation F (2-3) [0.50]

A lecture-demonstration course on the processes leading to deterioration of soil and water quality, the impact of deterioration on use, and preventative or corrective measures. Soil erosion by water and wind, soil compaction and salinization. Drainage channel maintenance, sedimentation and nutrient enrichment of water. Conservation programs and policies. Reclamation of severely disturbed soils and saline-sodic soils. Emphasis will be on concepts and solutions to problems in a systems approach. (Also offered through distance education format.)

Prerequisite(s): 1 of AGR*2301/2, AGR*2320, SOIL*2010

SOIL*3100 Resource Planning Techniques W (2-2) [0.50]

An intermediate techniques course directed at the application of a systematic approach to problem-solving in natural resource management. Major topics include procedures of ecological land classification, computer-assisted resource analysis and environmental impact assessment.

Prerequisite(s): SOIL*3050

SOIL*3200 Environmental Soil Biology W (3-3) [0.50]

Soil biological processes involving both microflora and fauna with emphasis on waste management, soil fertility and structure, plant residue decomposition and xenobiotic compound biodegradation. Students will apply this knowledge in a project involving biodegradation of an organic waste.

Prerequisite(s): 10.00 credits including AGR*2301/2 or SOIL*2010

SOIL*3300 Land Resource Stewardship S (3-0) [0.50]

This course will examine 'stewardship' programs as an approach to environmental conservation in both the agricultural and natural resource conservation sectors in Canada. It will focus on the central role of private landowners, with emphasis on the voluntary policy perspective of stewardship programs in comparison to regulatory perspectives. As well, it will examine the non-government organizations such as land trusts and farm organizations that often run stewardship programs. Programs addressing environmental conservation issues in agriculture, forestry, fisheries, wildlife, habitat conservation, and species at risk will be considered. (Offered through distance education format only.)

Prerequisite(s): SOIL*2120 or SOIL*2200

SOIL*3600 Remote Sensing W (3-3) [0.50]

An introduction to remote sensing, as applied to the study and monitoring of the biophysical environment (atmosphere, vegetation, soil, hydrology, geology). Relevant conventional photographic techniques are examined, but current analog and digital imaging technologies are emphasized. Attention is given to both airborne and earth-orbiting imaging platforms. Key aspects of computerized image analysis are covered. Practical experience is gained through the interpretation of high-resolution digital imagery, using industry-standard commercial software.

Prerequisite(s): 10.00 credits (recommend: 1 of GEOG*2420, AGR*2301/2, AGR*2320, SOIL*2010)

Restriction(s): Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

SOIL*4070 Problems in Land Resource Science S,F,W (0-6) [0.50]

Students will carry out a research project in an area of special interest. Individualized supervision will be provided by a faculty member. The preparation of an oral and/or written report will be required. Approval to take this course must be obtained from the Department Chair during the previous semester.

Prerequisite(s): AGR*2320 or ENV5*2010 and 1.00 credits at the 3000 or higher level in soil science, geology or meteorology

Restriction(s): Department chair consent required.

SOIL*4090 Soil Management F (3-1) [0.50]

A lecture-tutorial course on the practical aspects of soil management for crop production as they relate to the physical, chemical and biological properties of soils; major emphasis is placed on soil fertility as related to field soil properties and fertilizer, lime and manure use, soil and plant testing for mineral nutrients. The beneficial aspects of drainage, irrigation, erosion control and related tillage practices on soil fertility are also presented. Due regard is given to both economic and environmental aspects of soil management practices.

Prerequisite(s): 1 of AGR*2301/2, AGR*2320, SOIL*2010

SOIL*4110 Natural Resources Management Field Camp F (0-6) [0.50]

A course directed toward investigating methods of collecting and processing land resource field data. Practice in mapping information from air photographs and ground surveys, construction of inventory maps and integration of information. The course will consist of a one week field camp prior to the fall semester, following which the students, working in groups, will prepare and present a comprehensive report in consultation with faculty. Students will be responsible for their living and transportation expenses for the field session, in addition to regular tuition fees. The course may be offered with different emphasis in content depending on student demand. Students are required to notify the designated departmental instructor of their intention to participate in the Field Camp during the previous Winter semester (or earlier if going on exchange programs).

Prerequisite(s): SOIL*3100

Restriction(s): Registration in B.Sc.Env.NRM and B.Sc.Agr.AGMN students.

SOIL*4160 Design of Organic Production Systems F (2-3) [0.50]

This interdisciplinary course calls upon students to use the analytical framework developed in Tutorials in Organic Agriculture I and II to apply organic principles to managed agroecosystems. The course covers the interactions of soils, plants, microbes, and animals with management and environmental factors related to annual and perennial crops and livestock. The core principle of problem avoidance rather than problem solving is illustrated with practical examples from such dimensions as integration of crop and livestock agriculture, farm-scale nutrient budgeting, permaculture, and herd health in the production of organic field crops (grains and oilseeds), horticultural crops (fruit and vegetables), and livestock (beef, sheep, dairy, pigs, chickens).

Prerequisite(s): (1 of AGR*2350, CROP*4220, SOIL*3170) or (CROP*3130, SOIL*3030)

SOIL*4250 Soils in the Landscape F (3-3) [0.50]

This course has field, laboratory and classroom components. It focuses on soil spatial and temporal variability, evaluating soil properties in relation to controlling factors and processes, on local to global scales. Students are exposed to standard procedures for collecting soil data in the field and laboratory, highlighting sampling design and data extrapolation, as well as relevant applications of digital imaging of soil (micropedology) and landscapes. Principles of soil classification are discussed and several systems are introduced, emphasizing the Canadian System of Soil Classification; key concepts associated with the production of soil maps and reports, as well as the role of geographic information systems in archiving and interpreting soil information, are also examined. Students are required to notify the designated departmental instructor, of their intention to participate in this course, during the previous winter semester (or earlier, if going on exchange programs). This course has field camps which run during the week preceding the Fall semester. A fee is charged to cover some costs of field activities.

Prerequisite(s): 12.50 credits including (1 of AGR*2320, GEOL*1050, GEOL*1100, SOIL*2010)

Restriction(s): SOIL*3170 , SOIL*4170 Restricted to B.Sc.(Agr.) Agroecosystem Management or B.Sc.(Env.) Earth and Atmospheric Science majors or B.B.R.M. Instructor consent required.

Spanish Studies

School of Languages and Literatures

All courses are conducted in Spanish (reading, writing and speaking), and literary texts are, at all levels, studied in the original language.

SPAN*1100 Introductory Spanish F,W (3-1) [0.50]

This course provides the basics of spoken and written Spanish for students with no previous studies in the language. (Also offered through distance education format).

SPAN*1110 Intermediate Spanish F,W (3-1) [0.50]

This is a continuation of SPAN*1100 with emphasis on oral work. (Also offered through distance education format).

Prerequisite(s): SPAN*1100

SPAN*2000 Spanish Language I F,W (3-1) [0.50]

This is a course designed to develop proficiency in reading, writing, understanding and speaking Spanish including conversation, grammar and language laboratory practice.

Prerequisite(s): Grade 12 (4U) Spanish or SPAN*1110 (or equivalent)

SPAN*2010 Spanish Language II F,W (3-1) [0.50]

This is a continuation of SPAN*2000.

Prerequisite(s): SPAN*2000

SPAN*2040 Spanish Civilization F (3-0) [0.50]

An examination of the historical and cultural events that provided the background for the development of modern Spain, as well as a visual survey of Spanish culture.

Prerequisite(s): SPAN*1110 or 4U Spanish

Restriction(s): Instructor consent required.

SPAN*2990 Hispanic Literary Studies W (3-0) [0.50]

An introduction to literary studies in Spanish. The course focuses on critical terminology and methods through a selection of prose, poetry and drama from Spain and Spanish America.

Prerequisite(s): SPAN*1110 or 4U Spanish

Restriction(s): Instructor consent required.

SPAN*3080 Spanish American Culture W (3-0) [0.50]

A survey through selected readings, class discussion and audio-visual materials of the Spanish American countries, their histories, society, institutions and culture.

Prerequisite(s): SPAN*1110 or 4U Spanish

Restriction(s): Instructor consent required.

SPAN*3110 Spanish Literature F (3-0) [0.50]

This course will study the works of prominent 20th-century poets in the context of the artistic environment of Europe as reflected in the theatre, art and film of the first two decades of the 20th century. Focus will be on poets including: Garcia Lorca, Vicente Aleixandre, Gerardo Diego; painters Salvador Dali and Pablo Picasso, and film director Luis Buñuel. (Offered in even-numbered years.)

Prerequisite(s): SPAN*2990

Restriction(s): Instructor consent required.

SPAN*3120 Post-Civil War Literature and Film W (3-0) [0.50]

This course examines contemporary Spanish Literature and film from a socio-political perspective. It will focus on the following topics: the impact on narrative and theatre of socio-cultural upheavals in the aftermath of the civil war; the role in the aesthetics of both film and literature of the Franco dictatorship and censorship in particular; the importance of post-Franco liberalization on women's creative work. (Offered in odd-numbered years.)

Prerequisite(s): SPAN*2990

Restriction(s): Instructor consent required.

SPAN*3130 Women in Modern Spanish Fiction W (3-0) [0.50]

A study of the representation of women in Spanish literature through the analysis and interpretation of Spanish 19th-century novels. (Offered in even-numbered years.)

Prerequisite(s): SPAN*2990

Restriction(s): Instructor consent required.

SPAN*3160 Contemporary Latin American Fiction W (3-0) [0.50]

This course will examine why and how the leading figures, such as Borges, Cortazar, Garcia Marquez, Carpentier and Isabel Allende, have "made" history, not only in the way they have recreated the Latin American historical reality, but also in the way they have reformed the Hispanic literature. (Offered in odd-numbered years.)

Prerequisite(s): SPAN*2990

Restriction(s): HUMN*3160

SPAN*3170 Spanish Drama: Women, Virtue, Honour F (3-0) [0.50]

This topic-oriented course will study the code of Honour in major Golden Age dramas and twentieth-century plays. Playwrights and plays to be studied may include: Lope de Vega's Fuenteovejuna, Calderon's Life is a Dream, Tirso de Molina's Don Juan, The House of Bernardo Alba, Jerma, and Blood Wedding by Garcia Lorca. These texts will also be studied for their influence on world literature. (Offered in even-numbered years.)

Prerequisite(s): SPAN*2990

Restriction(s): HUMN*3170

SPAN*3180 Cuento/Journalism Spanish American W (3-0) [0.50]

Most Latin American writers started their careers as journalists, and short stories by Jorge Luis Borges, Julio Cortázar, Gabriel Garcia Márquez, Elena Poniatowska, Luisa Valenzuela, and Isabel Allende were published in daily newspapers. One of the results of the close link between journalism and fiction is a deep sense of social responsibility in modern non-representational literature. This course will study twentieth-century Latin American short stories for their artistic merits, and for their other links to journalistic discourse. (Offered in even-numbered years.)

Prerequisite(s): SPAN*2990

Restriction(s): Instructor consent required.

SPAN*3300 Modern Spanish American Prose F (3-0) [0.50]

A study, through selected texts, of the most important aspects of Spanish American Prose up to 1940. Authors studied may include Maria Luisa Bombal, Horacio Quiroga, Jorge Icaza, Romulo Gallegos and Ricardo Güiraldes. The course will emphasize themes such as rural life, the role of native peoples, and changing attitudes to concepts such as national identity, urbanization and literary technique. (Offered in odd-numbered years.)

Prerequisite(s): SPAN*2990

Restriction(s): Instructor consent required.

SPAN*3320 Spanish American Fiction Since 1990 W (3-0) [0.50]

This course provides a detailed study of fiction to emerge from Spanish America since 1990, concentrating on themes such as immigration, the breakdown of traditional cultural identities, responses to neo-liberal ideology and the influence of globalization and popular culture on literary production. (Offered in even-numbered years.)

Prerequisite(s): SPAN*2990

SPAN*3500 Spanish Grammar and Composition I F (3-0) [0.50]

An advanced language course that focuses on the refinement of students' written and verbal communication skills in Spanish.

Prerequisite(s): SPAN*2010

SPAN*3530 Business Spanish W (3-0) [0.50]

A detailed study of the Spanish language as it is currently used in administration and business. It will cover areas such as administrative correspondence, reports, employment, business communication and advertising.

Prerequisite(s): SPAN*3500

SPAN*3800 Directed Readings in Spanish Studies U (3-0) [0.50]

A reading course in Spanish or Spanish American literature designed according to the previous studies and the interests of the individual student. Normally, students will not be permitted to take more than two courses in the Directed Readings sequence.

Prerequisite(s): 1.00 credits in Spanish literature at the 3000 level

Restriction(s): Instructor consent required.

SPAN*3810 Directed Readings in Spanish Studies U (3-0) [0.50]

A reading course in Spanish or Spanish American literature designed according to the previous studies and the interests of the individual student. Normally, students will not be permitted to take more than two courses in the Directed Readings sequence.

Prerequisite(s): 1.00 credits in Spanish literature at the 3000 level

Restriction(s): Instructor consent required.

SPAN*3820 Directed Readings in Spanish Studies U (3-0) [0.50]

A reading course in Spanish or Spanish American literature designed according to the previous studies and the interests of the individual student. Normally, students will not be permitted to take more than two courses in the Directed Readings sequence.

Prerequisite(s): 1.00 credits in Spanish literature at the 3000 level

Restriction(s): Instructor consent required.

SPAN*3850 Revolutionary Poetry and Poetic Revolution in Spanish America F (3-0) [0.50]

This course studies the poetry that has emerged from revolutionary movements in Cuba, Nicaragua, Chile and elsewhere, situating this poetry in the context of the search for new poetic forms. (Offered in even-numbered years.)

Prerequisite(s): SPAN*2990 or instructor consent required.

SPAN*4170 Don Quixote and the Picaresque Novel F (3-0) [0.50]
This course will study the birth of the modern novel. This Spanish masterpiece and first European picaresque work will be examined from the point of view of play, laughter and narrative structure and composition. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> SPAN*2990 <i>Restriction(s):</i> HUMN*4170
SPAN*4200 Spanish American Sociolinguistics F (3-0) [0.50]
This course will study language variation in Latin American Spanish in its social context. Major topics include theoretical and practical concepts of linguistic variation, linguistic change, standard, prescriptive versus non-prestigious varieties, bilingualism, diglossia, language attitude, code-switching, language planning, conversation analysis and language shift. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> SPAN*2010, LING*1000
SPAN*4500 Spanish Translation and Composition I F (3-0) [0.50]
An advanced composition course, with intensive written and oral practice with an emphasis on translation. <i>Prerequisite(s):</i> SPAN*3530
SPAN*4520 Spanish Translation and Composition II W (3-0) [0.50]
A continuation of the work done in SPAN*4500, developing creative oral and written expression with an emphasis on translation. <i>Prerequisite(s):</i> SPAN*4500
SPAN*4840 Research Paper in Spanish Studies U (3-0) [0.50]
A research paper in Spanish on any language or literature subject approved by the department. This paper will be the equivalent of a semester course.

Statistics

Department of Mathematics and Statistics

Suggested initial course sequences:

- For students interested in applied statistics a minimal course sequence is: (STAT*2040 or STAT*2100), STAT*2050, STAT*3210, STAT*3240, STAT*3320.
- Credit may be obtained in only 1 of STAT*2050 or STAT*2090 and only 1 of STAT*2040, STAT*2060, STAT*2080, STAT*2100 , STAT*2120.
- Graduate students may be admitted to later parts of a sequence by permission of the department.
- Students who major or minor in Statistics may not receive credit for the following courses unless taken to satisfy the requirements of another program: ECON*2740, PSYC*2010, PSYC*3320, .

STAT*2040 Statistics I S,F,W (3-2) [0.50]

A course stressing the practical methods of Statistics. Topics include: descriptive statistics; univariate models such as binomial, Poisson, uniform and normal; central limit theorem; expected value; the t, F and chi-square models; point and interval estimation; hypothesis testing methods up to two-sample data; simple regression and correlation; ANOVA for CRD and RCBD. Assignments will deal with real data from the natural sciences. Laboratory sessions involve statistical computing and visualization using appropriate statistical software.

Prerequisite(s): 1 of 4U Advanced Functions and Calculus, OAC calculus, equivalent

Restriction(s): STAT*1000 , STAT*2060, STAT*2080, STAT*2100 , STAT*2120

STAT*2050 Statistics II S,F,W (3-2) [0.50]

The methods of STAT*2040 are extended to the multi-sample cases. Methods include: simple and multiple regression analysis including ANOVA and lack-of-fit; experimental design including analysis for CRD, RCBD, LSD, SPD and factorial experiments with interaction; ANCOVA; Bioassay. Assignments employing data from the natural sciences will be processed in the microcomputer laboratory.

Prerequisite(s): STAT*2040 or STAT*2100 (or equivalent)

Restriction(s): STAT*2090, STAT*2250

STAT*2060 Statistics for Business Decisions W (3-2) [0.50]

A course designed for students interested in the application of statistics in a business setting. Topics covered will include the role of statistics in business decisions, organization of data, frequency distributions, probability, normal and sampling distributions, hypothesis tests, linear regression and an introduction to time series, quality control and operations research. (Also offered through distance education format.)

Prerequisite(s): (1 of 4U mathematics, OAC mathematics, equivalent) or 0.50 credit in mathematics

Restriction(s): STAT*1000 , STAT*2040, STAT*2080, STAT*2100 , STAT*2120

STAT*2080 Introductory Applied Statistics I F (3-2) [0.50]

Frequency distributions, graphing and tabulation of data. Measures of central tendency, variability and association. Elementary probability. Hypothesis testing and confidence intervals. Basic concepts of experimental design; treatment designs. Simple linear regression and correlation. Illustrated with examples from a variety of disciplines, including family studies, education, marketing, medicine, psychology and sociology.

Prerequisite(s): (1 of 4U mathematics, OAC mathematics, equivalent) or 0.50 credit in mathematics

Restriction(s): STAT*1000 , STAT*2040, STAT*2060, STAT*2100 , STAT*2120

STAT*2090 Introductory Applied Statistics II W (3-2) [0.50]

Design of sample surveys. Analysis of qualitative data. Analysis of variance for designed experiments. Multiple regression and analysis of covariance. Some non-parametric methods. Survey of special topics such as factor analysis and cluster analysis.

Prerequisite(s): STAT*2080

Restriction(s): STAT*2050

STAT*2120 Probability and Statistics for Engineers W (3-1) [0.50]

Sample spaces. Probability, conditional probability, independence. Bayes' theorem. Probability distributions. Probability densities. Algebra of expected values. Descriptive statistics. Inferences concerning means, variances, and proportions. Curve fitting, the method of least squares, correlation. Introduction to quality control and reliability. Recommended especially for students in the B.Sc.(Eng.) program.

Prerequisite(s): 1 of MATH*1010 , MATH*1210, MATH*2080, IPS*1210

Restriction(s): STAT*1000 , STAT*2040, STAT*2060, STAT*2080, STAT*2100

STAT*2250 Biostatistics and the Life Sciences W (3-2) [0.50]

This course in biostatistical methods will emphasize the design of research projects, data gathering, analysis and the interpretation of results. Statistical concepts underlying practical aspects of biological research will be acquired while working through the process of scientific enquiry. Weekly computer laboratory sessions will focus on practical data visualization and statistical analysis using computer statistical packages. Simple parametric and nonparametric methods are reviewed, followed by more advanced topics that will include some or all of the following: two factor ANOVA and multiple regression, and introductions to discriminant analysis, cluster analysis, principal components analysis, logistic regression, and resampling methods. (Also listed as BIOL*2250.) Departments of Mathematics and Statistics and Zoology.

Prerequisite(s): STAT*2040 or STAT*2100

Equate(s): BIOL*2250

Restriction(s): STAT*2050

STAT*3100 Introductory Mathematical Statistics I F (3-0) [0.50]

Probability spaces; discrete and continuous random variables; multivariate distributions; expectations; moments, Chebyshev's inequality, product moments; sums of random variables, generating functions; Gamma, Beta, t and F distributions; central limit theorem; sampling distributions.

Prerequisite(s): (IPS*1210 or MATH*1210), (STAT*2040 or STAT*2100)

STAT*3110 Introductory Mathematical Statistics II W (3-0) [0.50]

Estimation, unbiasedness, Cramer-Rao inequality, consistency, sufficiency, method of moments, maximum likelihood estimation; hypothesis testing, Neyman-Pearson lemma, likelihood ratio test, uniformly most powerful test; linear regression and correlation; non-parametric methods.

Prerequisite(s): STAT*3100

STAT*3210 Experimental Design W (3-0) [0.50]

Basic principles of design: randomization, replication, and local control (blocking); RCBD, Latin square and crossover designs, incomplete block designs, factorial and split-plot experiments, confounding and fractional factorial designs, response surface methodology; linear mixed model computer analysis of the designs; nonparametric methods; Taguchi philosophy.

Prerequisite(s): STAT*2050, STAT*3240

Restriction(s): STAT*4220

STAT*3240 Applied Regression Analysis F (3-2) [0.50]

Theory and applications of regression techniques; linear, non-linear and multiple regression and correlation; analysis of residuals; other statistical techniques including: response surfaces and covariance analysis, prediction and time-series analysis. The computer lab involves interactive data analysis and investigation of the methodology using SAS and/or S-PLUS statistical software.

Prerequisite(s): (IPS*1210 or MATH*1210), (MATH*2150 or MATH*2160, may be taken concurrently or with instructor consent), (STAT*2050 or STAT*2100)

STAT*3320 Sampling Theory with Applications F (3-0) [0.50]

Non-probability and probability sampling. Simple random sampling, stratified sampling, cluster sampling, systematic sampling, double sampling, two-phase sampling, multi-stage cluster sampling. Expectation and variance estimation procedures and applications of above techniques.

Prerequisite(s): (IPS*1210 or MATH*1210), (1 of STAT*2050, STAT*3240, STAT*3100)

STAT*3510 Environmental Risk Assessment W (3-0) [0.50]

Contemporary statistical methods for assessing risk, including dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk, trend analysis, survey of models for assessing risk. Case studies illustrate the methods.

Prerequisite(s): (1 of IPS*1110 , MATH*1000, MATH*1080, MATH*1200), (STAT*2050 or STAT*2250)

STAT*4050 Topics in Applied Statistics I W (3-0) [0.50]

Topics such as statistical computing procedures, quality control, bioassay, survival analysis and introductory stochastic processes. Intended for statistics students and interested students in other disciplines with appropriate previous courses in statistics. Information on particular offerings will be available at the beginning of each academic year. (Offered in odd-numbered years.)

Prerequisite(s): STAT*3110, STAT*3240

STAT*4060 Topics in Applied Statistics II W (3-0) [0.50]

Same as for STAT*4050. (Offered in even-numbered years.)

Prerequisite(s): STAT*3110, STAT*3240

STAT*4080 Data Analysis F (3-2) [0.50]

Principles of statistical modelling; the likelihood function; model fitting; model choice; analysis of non-normal data; generalized linear models; binomial regression models; regression models for counts; Poisson and multinomial data; overdispersion. Statistical modelling and analysis using appropriate software (eg. Splus and/or SAS) in the computing lab.

Prerequisite(s): (MATH*2150 or MATH*2160), STAT*3110, STAT*3240

STAT*4100 Survival Analysis W (3-1) [0.50]

Theory and methodology of survival analysis. A set of techniques for modelling the time of a well-defined event (typically failure or death), and for dealing with censored data. The emphasis will be on regression, including parametric, proportional hazards and accelerated life regression models. Areas of application include environmental sciences, medicine, industrial reliability, and economics, where the events of interest may be respectively early death, organ failure, component failure, or strikes. Students will learn specialized techniques for modelling censored data and understand why they are necessary. The interpretation of real data will be emphasized throughout the course. Statistical computing packages (S-Plus or SAS) will be used extensively.

Prerequisite(s): STAT*3110 and STAT*3240

STAT*4340 Statistical Inference W (3-0) [0.50]

This course on methods of statistical inference reviews and extends the theory of estimation introduced in STAT*3110: interval estimation tests for simple and composite hypotheses, likelihood ratio tests. Recent likelihood concepts as well as classical large sample theory, asymptotics and approximations and their applications are covered. This material is directly relevant to current research and applications in areas as diverse as survival analysis, nonparametric regression and environmetrics.

Prerequisite(s): STAT*3110, STAT*3240

STAT*4350 Applied Multivariate Statistical Methods F (3-0) [0.50]

Samplings from the multivariate normal distribution, Wishart and Hotelling's T^2 distribution statistical inference on the mean vector, canonical correlations, multivariate analysis of variance and covariance, multivariate regression, principal components analysis, factor analysis. Topics will be illustrated using examples from various disciplines.

Prerequisite(s): (MATH*2150 or MATH*2160), STAT*3110, STAT*3240

STAT*4360 Applied Time Series Analysis W (3-2) [0.50]

This course will investigate the nature of stationary stochastic processes from the spectral and time domain points of view. Aspects of parameter estimation and prediction in a computationally intensive environment will be the presentation style. The methods developed in this course will have applicability in many sciences such as engineering, environmental sciences, geography, soil sciences, and life sciences.

Prerequisite(s): STAT*3240 or instructor consent

Studio Art

School of Fine Art and Music

Admission to all Studio Art courses is based on the university's policy with regard to Priority Access Courses. Admission to ALL Studio Courses at the 3000-level and above is restricted to students who:

1. are currently registered in the Art History or Studio Art Specializations of the Bachelor of Arts Program;
2. have an average of 70% in all ARTH and SART course attempts;
3. have completed both SART*1050 and SART*1060.

Studio supplies: The majority of the cost of supplies must be borne by the student. In order to permit the University to subsidize this cost and to allow for savings through discount buying, some materials are obtained through the School of Fine Art and Music by payment of a lab fee. The amount of the fee is established for each semester prior to registration.

Note: Due to limited faculty resources and facilities, enrolment in these courses may be restricted to Studio Art majors or minors.

SART*1050 Integrated 2-D Media F,W (0-6) [0.50]

A studio-based investigation into the fundamental concepts, principles and elements of two-dimensional visual structure and expression. Assigned projects, in-class exercises, slides, lectures and critiques will introduce the student to aspects of both traditional and contemporary practice.

Restriction(s): Registration in semesters one, two, three or four. May not register in SART*1060 in same term.

SART*1060 Media Convergence F,W (0-6) [0.50]

An introduction to the basic aspects of three-dimensional and time-based art production. Various topics, materials, and diverse approaches will be investigated through assigned problems, lectures, and critiques.

Equate(s): SART*2040

Restriction(s): Registration in semesters one, two, three or four. May not register in SART*1050 in same term.

SART*2090 Drawing I F,W (0-6) [0.50]

An introduction to the basic concepts, techniques and media of drawing, through disciplined observational and imaginative study.

Prerequisite(s): SART*1050 or SART*1060

SART*2200 Painting I F,W (0-6) [0.50]

Introduces various technical and aesthetic issues of painting, with an emphasis placed on representational strategies. Diverse approaches will be investigated through specific studio assignments in acrylic and oil-based media on various painting supports. Prior or concurrent Drawing classes are recommended.

Prerequisite(s): SART*1050

SART*2300 Sculpture I F,W (0-6) [0.50]

An introduction to contemporary sculptural concerns through projects and readings. Students will be actively engaged in exploring a variety of materials and ideas including modular construction, casting, and scale exercises.

Prerequisite(s): SART*1060

SART*2460 Introductory Printmaking I F (0-6) [0.50]

An introduction to the traditional printmaking media of intaglio and relief printing.

Prerequisite(s): SART*1050

SART*2470 Introductory Printmaking II W (0-6) [0.50]

An introduction to the techniques of the traditional printmaking media of lithography and silkscreen.

Prerequisite(s): SART*1050

SART*2610 Photography I F,W (0-6) [0.50]

An introduction to the creative application of photography in art; and, the basic principles of dark-room and camera skills.

Prerequisite(s): SART*1050 or SART*1060

Restriction(s): Registration in semesters two to five.

SART*2700 Introduction to Computer Graphics F (0-6) [0.50]

This course extends the conceptual, technical, and aesthetic issues of studio art into the field of computer arts. Some computer experience is recommended.

Prerequisite(s): SART*1050

SART*2710 Drawing Graphics on the Computer W (0-6) [0.50]

This course introduces digital drawing on the computer, translating traditional media into complex vector graphics. Some computer experience is recommended.

Prerequisite(s): SART*1050

SART*2800 Extended Practices I F,W (0-6) [0.50]

This course introduces contemporary studio concerns with emphasis on an interdisciplinary approach to art production. Students will be actively engaged in exploring a variety of skills, materials and ideas including video, audio, artist multiples, site work and concept art. These skill sets provide a solid base for upper level courses, where thematic projects encourage students to choose the most appropriate medium for their approach beyond a singular discipline or particular medium.

Prerequisite(s): SART*1050 or SART*1060

Restriction(s): Registration in semesters two to five.

SART*3090 Drawing II F,W (0-6) [0.50]

An extension of SART*2090 which attempts to foster understanding of the basic skills and technical issues necessary to the making of drawings while introducing the philosophical and critical issues related to the discipline.

Prerequisite(s): SART*1050, SART*1060, SART*2090

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3200 Painting II F,W (0-6) [0.50]

An extension of the work begun in SART*2200. The various technical and aesthetic issues of representational painting will be further investigated as will the diverse approaches to pictorial organization derived from observation. However, the issues of abstraction and other forms of non-representational approaches will be introduced and developed in a deeper and fuller attempt to explore the possibilities available to the painter in the late 20th century.

Prerequisite(s): SART*1050, SART*1060, SART*2200

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3300 Sculpture II F,W (0-6) [0.50]

A technical course in which specific tools of the wood and metal shops will be studied in depth through assignments. Conceptual issues will be examined in relation to the creation of objects.

Prerequisite(s): SART*1050, SART*1060, SART*2300

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3410 Intaglio W (0-6) [0.50]

In-depth investigation into aspects of intaglio printmaking.

Prerequisite(s): SART*1050, SART*1060, (SART*2460 or SART*2470)

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3450 Lithography F (0-6) [0.50]

In-depth exploration of the art of lithography.

Prerequisite(s): SART*1050, SART*1060, (SART*2460 or SART*2470)

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3470 Photo-Printmaking W (0-6) [0.50]

This course investigates the uses of photographic resources in image making to produce photo etchings, silk-screens, and lithographs, as well as the use of computer graphics to augment the design process. (Offered in odd-numbered years.)

Prerequisite(s): SART*1050, SART*1060, (SART*2460 or SART*2470)

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3480 Web Development and Design F (0-6) [0.50]

An in-depth study of website design using professional web authoring software. Students will design and create a website which explores a contemporary issue in their art practice.

Prerequisite(s): SART*1050, SART*1060, (SART*2700 or SART*2710)

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3600 Digital & Non-Silver Photography F (0-6) [0.50]

This course is an initiation to non-silver and digital processes as an expansion of photographic concepts introduced in SART*2610. These techniques will serve as the basis for aesthetic investigation into the formal, conceptual, technical and theoretical issues related to historic and new technologies in photographic practice.

Prerequisite(s): SART*1050, SART*1060, SART*2610

SART*3750 Photography II F,W (0-6) [0.50]

A further exploration of expressive, formal and technical aspects of photography. Students without the stated prerequisite but with equivalent experience should consult the instructor.

Prerequisite(s): SART*1050, SART*1060, SART*2610

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3770 Extended Practices II F,W (3-0) [0.50]

Thematically based projects encourage students to choose the most appropriate medium or combination of media for each assignment. Students may pursue and perfect one medium or take a more interdisciplinary approach (artists multiples, installation, performance, video, alternative venues, relational art or a combination of approaches).

Prerequisite(s): SART*1050, SART*1060, SART*2800

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*3800 Experiential Learning F,W (0-0) [0.50]

An independent study course based on either Studio Art related voluntary or paid practical experience. Evaluation will be based on assignments related to work duties. Written proposals, signed by the instructor, must be submitted to the Director for the School for approval by the last day of course selection in the Fall (for Winter) or Winter (for the following Fall).

Prerequisite(s): 3.00 credits in Studio Art

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts. Instructor consent required.

SART*4090 Drawing III F (0-6) [0.50]

Continuation of the various skills and technical issues necessary to the making of drawings. Observational drawing from the model, still life, natural forms, and interiors will be studied with a view to understanding the language and philosophical implications inherent within drawings of different styles.

Prerequisite(s): SART*3090

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4100 Drawing IV W (0-6) [0.50]

An advanced drawing course which explores a wider range of graphic experience including abstract, imaginary and other non-representational approaches to graphic discipline in our own time.

Prerequisite(s): SART*4090

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4200 Painting III F (0-6) [0.50]

A further extension of the work begun in SART*2200 and SART*3200. While the various technical and aesthetic issues will continue to be investigated through the discipline of observational painting there will be more emphasis on the critical issues relevant to contemporary painting and allowance for personal expression through both abstract and representational modes.

Prerequisite(s): SART*3200, SART*3210

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4210 Painting IV W (0-6) [0.50]

Advanced investigations into the role of observational study and strong emphasis on critical issues of contemporary painting whether representational, abstract, mixed-media, or other.

Prerequisite(s): SART*4200 or SART*4230

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4230 Special Topics in Painting W (0-6) [0.50]

An advanced course which focuses on a specific theme, subject, or technique in painting. Topics may include the figure and narrative in painting, the landscape in contemporary painting, or New Abstraction.

Prerequisite(s): SART*3200

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4300 Sculpture III F,W (0-6) [0.50]

Contemporary issues in sculpture will be addressed through at least 2 studio projects including 1 site-response installation, and an independent work in close consultation with the instructor. Interdisciplinary projects based on the students' own research are strongly encouraged.

Prerequisite(s): SART*3300

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4310 Sculpture IV F,W (0-6) [0.50]

In close consultation with the instructor, the student will produce a body of independent sculpture with attention to clarity of personal statement, originality, and professionalism. Interdisciplinary projects based on the students' own research are strongly encouraged.

Prerequisite(s): SART*4300

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4410 Experimental Printmaking F,W (0-6) [0.50]

Further investigations into traditional and photo based printing media. Use of computer graphics to augment the design process.

Prerequisite(s): 3 of SART*2460, SART*2470, SART*3410, SART*3450, SART*3470

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4450 Advanced Printmaking F,W (0-6) [0.50]

Continuing in-depth investigation into various printmaking media, including the use of computer graphics and advanced manipulation of photo based images to create a thematically coherent portfolio of prints.

Prerequisite(s): SART*4410

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4660 Topics in Extended Practices F (0-6) [0.50]

For this advanced course, the specific theme, subject, or technique in extended practices will vary according to the instructor or instructors and will consist of topics not otherwise available in the curriculum. Topics may include Performance Art, Installation, Interactive Art, Relational Art, Alternative Venues and Artists Multiples.

Prerequisite(s): SART*3770

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4670 Topics in Extended Practices F (0-6) [0.50]

For this advanced course, the specific theme, subject, or technique in extended practices will vary according to the instructor or instructors and will consist of topics not otherwise available in the curriculum. Topics may include Performance Art, Installation, Interactive Art, Relational Art, Alternative Venues and Artists Multiples.

Prerequisite(s): SART*3770

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4700 Photography III F,W (0-6) [0.50]

This course investigates colour photography and continues investigation of the formal, technical and theoretical issues of contemporary photography.

Prerequisite(s): SART*3600 or SART*3750

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4710 Photography IV F,W (0-6) [0.50]

A continuing investigation of colour photography and advance investigation into contemporary issues, with opportunities for interdisciplinary approaches to photographic practice.

Prerequisite(s): SART*4700

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4800 Special Topics in Sculpture F,W (0-6) [0.50]

An advanced course which focuses on a specific theme, subject, or technique in sculpture. Subject matter will vary according to the instructor or instructors and will consist of topics not otherwise available in the curriculum. Topics may include, for example, Kinetic Media, Public Art, Mold Making, or Figuration and Installation. Normally, two different topics will be offered each year (see SART*4870).

Prerequisite(s): SART*3300

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4810 Extended Practices III W (0-6) [0.50]

Contemporary issues in interdisciplinary art production will be addressed through at least two thematic projects and one self-directed work based on the students' own research in close consultation with the instructor. Students may choose to pursue and perfect one medium, or take a more interdisciplinary approach to art production.

Prerequisite(s): 1 of SART*3770, SART*4660, SART*4670

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4820 Extended Practices IV W (0-6) [0.50]

In close consultation with the instructor, students produce two self-directed projects based on their own research. Presentations, grant writing and composing artist statements will provide students the opportunity to develop personal conviction and a professional approach in preparation to graduate.

Prerequisite(s): 1 of SART*4660, SART*4670, SART*4810

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4830 Interactive Multimedia W (0-6) [0.50]

An in-depth study of two-dimensional interactive multimedia using professional authoring software. Students will design and create multimedia presentations which explore a contemporary issue in their art practice.

Prerequisite(s): SART*3480

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

SART*4850 Specialized Studio Practice I F (0-6) [0.50]

An advanced and specialized workshop in individually selected studio practices which affords opportunities for interdisciplinary approaches and oversees the development of independent study strategies. Students will research and complete a major self-directed project. Not intended for all Honours students. Recommended to assist in the preparation of application to graduate school.

Prerequisite(s): A minimum of 2 courses at the 4000-level in Studio Arts, a minimum cumulative average of at least 80% in Studio Arts (SART) courses and Art History (ARTH) courses.

Restriction(s): Permission of the Instructor or Director of the School.

SART*4860 Specialized Studio Practice II W (0-6) [0.50]

Continuation of SART*4850.

Prerequisite(s): A minimum of 2 courses at the 4000-level in Studio Arts, a minimum cumulative average of at least 80% in Studio Arts (SART) courses and Art History (ARTH) courses.

Restriction(s): Permission of the Instructor or Director of the School.

SART*4870 Special Topics in Sculpture F,W (0-6) [0.50]

An advanced course which focuses on a specific theme, subject, or technique in sculpture. Subject matter will vary according to the instructor or instructors and will consist of topics not otherwise available in the curriculum. Topics may include, for example, Kinetic Media, Public Art, Mold Making, or Figuration and Installation. Normally, two different topics will be offered each year (see SART*4800).

Prerequisite(s): SART*3300

Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations of the Bachelor of Arts program with an average of 70% in all ARTH and SART course attempts.

Theatre Studies

School of English and Theatre Studies

NOTES: Admission to the following courses is not guaranteed, and is by audition, submission of a portfolio and/or interview only:

THST*3110	[0.50]	Acting II
THST*3120	[0.50]	Acting III
THST*3410	[0.50]	Special Studies in Production I
THST*3420	[0.50]	Special Studies in Production II
THST*3600	[0.50]	Directed Readings and Special Independent Studies
THST*3620	[0.50]	Special Studies Seminar
THST*3630	[0.50]	Special Studies in Studio Practice
THST*4090	[0.50]	Directing
THST*4250	[0.50]	Honours Project in Theatrical Production
THST*4280	[1.50]	Ensemble Project
THST*4340	[0.50]	Playwriting
THST*4650	[0.50]	Honours Essay

For times and dates of auditions and interviews, students should consult the School. All students applying for entry to these courses must obtain the signature of the Theatre Studies Program advisor or the Director, who will admit students only after consultation with the instructor.

The Theatre Studies program has a particular interest in the drama and theatre of Canada. Course offerings will reflect this concentration where appropriate.

THST*1040 Introduction to Theatre Studies F,W (3-0) [0.50]

This course introduces students to the disciplines and subject areas that constitute Theatre Studies at the university level, including the work of playwrights, directors, designers, actors and technicians in creating productions, and the scholarly study of theatrical history, theory and dramatic literature. Attendance at a number of performances is required, since these performances are among the "texts" for the course.

Equate(s): DRMA*1000

THST*1150 Seminar in Theatre Studies W (3-0) [0.50]

A focused study of a selected topic in a small-group learning experience. Students will be introduced to research methodologies and offered opportunities to strengthen their writing and speaking skills. Variable course content. Consult the School's website for current topics.

Restriction(s): Restricted to students who are declared majors in Theatre Studies.

THST*1200 The Languages of Media F (3-2) [0.50]

This introductory course examines film, radio, television, and digital media, focusing on the codes and conventions used by different media to create relationships between structure and content, to make meaning.

THST*2010 Theatre Historical Studies F (3-0) [0.50]

This course will introduce students to the historical study of theatre by surveying developments in Western theatre from the classical period to twentieth-century modernism. Building on the historicity of Western theatre, the course also considers the historical conditions that have produced contemporary theatre practice in Canada.

Prerequisite(s): THST*1040

Equate(s): DRMA*3180

Restriction(s): DRMA*2300

THST*2080 Acting I F,W (2-3) [0.50]

A studio course for drama students applying classroom theory to acting problems. The course is required of, but not restricted to, students in a drama specialization.

Prerequisite(s): THST*1040

Equate(s): DRMA*2080

THST*2120 Dramaturgy and Playwriting W (3-0) [0.50]

Students will study how plays are made. The course includes analysis of theatrical texts and exercises in scripting.

Prerequisite(s): THST*1040

Equate(s): DRMA*1050

THST*2230 Intro to Technical Theatre F,W (2-3) [0.50]

An introduction to the theory and practice of theatrical production, including sets, costumes, lighting, sound, props and technical drawing. Students are expected to serve on technical crews on some evenings and weekends during School productions.

Prerequisite(s): DRMA*1000 or THST*1040

Equate(s): DRMA*2220

THST*2240 Introduction to Theatre Design W (2-3) [0.50]

Students will be introduced to theories, techniques and materials in five areas of theatrical design: sets, props, lighting, sound, and costume. The course also considers the history of design for the theatre, attending to the relationship between design and other forms of cultural expression.

Prerequisite(s): DRMA*1000 or THST*1040

THST*2450 Approaches to Media Studies W (3-0) [0.50]

This course examines major approaches to the study of communication, including cybernetic, anthropological, semiotic and other perspectives, focusing on how people transmit information and construct meaning.

Prerequisite(s): THST*1200

THST*2500 Contemporary Cinema W (2-3) [0.50]

The course is designed to give the student knowledge and understanding of contemporary cinematic expression.

Equate(s): DRMA*2500

THST*2650 History of Communication F (3-0) [0.50]

This course is organized around several revolutions in communication and technology: the evolution of human language; the development of writing systems and literacy; the invention and spread of printing and typography; and the beginnings of electronic communication and the digital revolution.

Prerequisite(s): THST*1200

THST*3030 Theatre for Young Audiences U (2-2) [0.50]

This is a studio course addressing selected topics dealing with theatrical practice for children and/or adolescents such as: creating theatre for young audiences; theatre as an instructional tool; teaching theatre to children; theatre games and play.

Prerequisite(s): 10 credits

Equate(s): DRMA*2400

Restriction(s): Students must be enrolled as a Major or Minor or area of concentration in Theatre Studies or B.A.Sc. Child, Youth and Family.

THST*3080 Acting Studio F,W (2-3) [0.50]

A studio course in acting that will address particular issues and techniques, and may conclude with a small-scale production.

Prerequisite(s): THST*2080

Equate(s): DRMA*3080

THST*3110 Acting II F,W (2-3) [0.50]

A continuation of THST*2080. Students will perform in a public production. Admission is by audition only.

Prerequisite(s): THST*2080

Equate(s): DRMA*3110

Restriction(s): Instructor consent required.

THST*3120 Acting III F,W (2-3) [0.50]

A continuation of THST*3110. Students will perform in a public production. Admission is by audition only.

Prerequisite(s): THST*3110

Equate(s): DRMA*3120

Restriction(s): Instructor consent required.

THST*3220 Technical Production I F,W (2-3) [0.50]

This course offers students advanced engagement with the theory and application of theatrical crafts, and includes work in a technical capacity on a School production.

Prerequisite(s): DRMA*2220 or THST*2230

Equate(s): DRMA*3220

THST*3230 Technical Production II F,W (2-3) [0.50]

A continuation of THST*3220, focusing on the theory and application of theatrical crafts, and including work in a technical capacity on a School production. Students will normally work in different capacities in THST*3220 and THST*3230.

Prerequisite(s): THST*3220

Equate(s): DRMA*3230

THST*3240 Theatrical Organization F (3-0) [0.50]

A study of various models of theatrical organization such as theatrical funding, board and management structures, production management, technical direction, and stage management, together with their implications for theatrical production and interpretation.

Prerequisite(s): THST*2010, THST*2080, THST*2120

Equate(s): DRMA*3240

THST*3280 Theatrical Space W (3-0) [0.50]
This course is a study of theatrical space as it shapes performance, reception, social value and cultural meanings. It explores the nature of performance spaces and the relationship between performer and audience, and considers theoretical approaches to the problem of theatrical space, including analyses of cultural location, aesthetic spatiality, public space and kinaesthetic space. The course offers an historical overview of various theatre and non-theatre venues for performance from the perspectives of actors, directors, designers, technicians and audiences. (Offered in even-numbered years.) <i>Prerequisite(s):</i> THST*2240
THST*3300 Sexuality and The Stage F (3-0) [0.50]
This course focuses on issues relating to the staging of sexuality. The course will theorize and historicize the representation of sexual diversity. Variable content course. Topics may include, for example, the theatrical staging of gays, lesbians, bisexuals, and transgendered people; queer theatre; and the privileging of heterosexuality on the stage. (Offered in even-numbered years.) <i>Prerequisite(s):</i> (THST*2010 or THST*2120) or 1.50 credits in English <i>Equate(s):</i> DRMA*3300
THST*3320 Applied Criticism of Drama and Theatre F (3-0) [0.50]
This course is designed to engage students in critical practice as applied to theatrical production. <i>Prerequisite(s):</i> (DRMA*1050 or THST*2120), (1 of THST*2080, THST*2010, THST*2300) <i>Equate(s):</i> DRMA*3320
THST*3360 Political Intervention Theatre W (3-0) [0.50]
This course examines major theories, practices and textualities of radical theatre interventions in politics in the twentieth- and twenty-first centuries. It traces the historical development and genealogies of interventionist processes, with particular attention to the transnational circulation of practices and methods. (Offered in even-numbered years.) (First offering is Winter 2008.) <i>Prerequisite(s):</i> (THST*2010, THST*2120) or 1.50 credits in English
THST*3410 Special Studies in Production I F,W (2-3) [0.50]
Students will serve in such capacities as stage managers, assistant stage managers, assistant directors, assistant designers, dramaturges, producers, or publicists on School productions, and will study the functions of these roles in theatrical production. Admission is by application to the School. <i>Prerequisite(s):</i> THST*3220, (1 of THST*2120, THST*3240, THST*3430, THST*3460, THST*3480, THST*3700) <i>Equate(s):</i> DRMA*3410 <i>Restriction(s):</i> Instructor consent required.
THST*3420 Special Studies in Production II F,W (2-3) [0.50]
A continuation of THST*3410. Students will normally work in different capacities in THST*3410 and THST*3420. Admission is by application to the School. <i>Prerequisite(s):</i> THST*3410 <i>Equate(s):</i> DRMA*3420 <i>Restriction(s):</i> Instructor consent required.
THST*3430 Theatrical Design: Sets and Props F (2-3) [0.50]
A study of the history, theory, and practice of theatrical design, with focus on the principles of set and prop design. <i>Prerequisite(s):</i> DRMA*2220 or (THST*2230, THST*2240) <i>Equate(s):</i> DRMA*3430
THST*3460 Costume W (2-3) [0.50]
This course studies the art of costume design for the theatre, placing the discipline in historical and theoretical contexts while exploring the practice and art of costume design. The course covers the techniques, materials and language necessary to the costume designer's craft and role in the production of a work of theatre. At the instructor's discretion, the course may include the design of mask, makeup, wigs and accessories. (Offered in odd-numbered years.) <i>Prerequisite(s):</i> THST*2230, THST*2240 <i>Restriction(s):</i> DRMA*3440
THST*3480 Lighting, Sound, Theatre Media F (2-3) [0.50]
The course studies theatrical lighting, sound, and media from the perspective of the designer. Through a combination of class instruction, demonstration and practical lab projects, the student will follow the process for the design of light, sound and media (theory and practice), from the first reading of a script through all of the stages that lead to the creation of a design. Special attention is given to analyzing scripts for visual and aural images. (Offered in even-numbered years.) <i>Prerequisite(s):</i> THST*2230, THST*2240 <i>Restriction(s):</i> DRMA*3440

THST*3530 Canadian Film W (2-3) [0.50]
This course is designed to give the student knowledge and understanding of Canadian film and film makers. <i>Prerequisite(s):</i> THST*1200 or DRMA*1500 <i>Equate(s):</i> DRMA*3530
THST*3540 World Theatre Cultures U (3-0) [0.50]
This course presents a focused study of theatrical traditions and dramatic practices (largely) outside European traditions. Variable content course. Consult the School's website for current topics. <i>Prerequisite(s):</i> (THST*2010, THST*2120) or 1.50 credits in English
THST*3550 Theories of Drama and Theatre W (3-0) [0.50]
A study of selected theoretical approaches to the study of drama and theatre. <i>Prerequisite(s):</i> (THST*2010 or DRMA*2300), THST*2120 <i>Equate(s):</i> DRMA*3550
THST*3600 Directed Readings and Special Independent Studies U (3-0) [0.50]
Independent study based upon bibliographies established in consultation with the instructor. An essay will normally constitute the written requirement for the course. Tutoring and/or consultation will be arranged, depending on the topic or materials for study. Special studies may also be arranged in the practical aspects of the theatre, with appropriate assignments, not leading to a production. Projects for this course are subject to the approval of the School, and must be submitted to the Director, on forms provided by the School, no later than the last day of classes in the semester prior to enrolment in the course. <i>Prerequisite(s):</i> 3.00 credits in Theatre Studies including (DRMA*1050 or THST*2120), (DRMA*2300 or THST*2010) <i>Equate(s):</i> DRMA*3600 <i>Restriction(s):</i> Instructor consent required.
THST*3620 Special Studies Seminar F (3-0) [0.50]
A seminar course that provides for intensive study of a specific aspect of drama and/or theatre. <i>Prerequisite(s):</i> 3.00 credits in Theatre Studies. <i>Equate(s):</i> DRMA*3620 <i>Restriction(s):</i> Instructor consent required.
THST*3630 Special Studies in Studio Practice U (3-0) [0.50]
The course provides an intensive exploration of one aspect of studio practice: playwriting, acting, design or technical theatre. <i>Prerequisite(s):</i> 3.00 credits in Theatre Studies including one of the following, as appropriate to the topic of the course: THST*2080, THST*2120, THST*2230, THST*2240. <i>Equate(s):</i> DRMA*3630 <i>Restriction(s):</i> Instructor consent required.
THST*3650 Theatre Historical Studies Seminar F (3-0) [0.50]
This seminar course investigates a topic in theatre history. The course will further develop students' research skills and expertise in writing and speaking about scholarly materials in the discipline. Variable content course. Consult the School's website for current topics. <i>Prerequisite(s):</i> (THST*2010, THST*2120) or DRMA*2300 <i>Equate(s):</i> DRMA*4300
THST*3660 Dramatic Literature and Theory Seminar W (3-0) [0.50]
This seminar course investigates an area of dramatic literature. The course will develop students' research skills and writing and speaking about scholarly materials in the discipline. Variable course content. Consult the School's website for current topics. <i>Prerequisite(s):</i> (THST*2010, THST*2120) or DRMA*2300
THST*3700 Fundamentals of Directing W (2-3) [0.50]
A study of the basic theories of directing, complemented by practical in-class directing exercises. <i>Prerequisite(s):</i> (DRMA*1050 or THST*2120), THST*2080, THST*2240 <i>Equate(s):</i> DRMA*3700
THST*3850 Canadian Drama and Theatre F (3-0) [0.50]
A study of Canadian plays in their historical, cultural, and theatrical contexts. <i>Prerequisite(s):</i> DRMA*2300 or any 2000 level literature course <i>Equate(s):</i> DRMA*3850 <i>Restriction(s):</i> DRMA*3331/2

THST*3950 Drama in London U (2-4) [0.50]
A course designed for students taking the London Semester consisting of a study of theatre events in London, through attending performances, reading texts and meeting for weekly seminars. <i>Equate(s):</i> DRMA*3950 <i>Restriction(s):</i> Permission of the Co-ordinator of the London Semester.
THST*4050 Voice and Movement F (2-3) [0.50]
This acting course engages students in an integrated approach to the art of vocal and physical presence, with a particular focus on voice and whole body gesture as means of self-expression in performance. (Offered in even-numbered years.) <i>Prerequisite(s):</i> THST*2010, THST*2120, THST*3080 <i>Equate(s):</i> DRMA*4050
THST*4090 Directing F (3-2) [0.50]
The application of the fundamentals of directing through a specific directorial assignment. Admission is by application to the School. <i>Prerequisite(s):</i> THST*3700 <i>Equate(s):</i> DRMA*4090 <i>Restriction(s):</i> Instructor consent required.
THST*4250 Honours Project in Theatrical Production F,W (0-6) [0.50]
The completion, under direction, of a project in acting, directing, dramaturgy, design or technical theatre. <i>Prerequisite(s):</i> THST*2010, THST*2120, (1 of THST*3110, THST*3220, THST*3430, DRMA*3440, THST*3480, THST*3700). Admission is by application to the School; see the Policy on the course posted on the School's website. <i>Equate(s):</i> DRMA*4250 <i>Restriction(s):</i> Consent of both the instructor and the School are required.
THST*4280 Ensemble Project W (6-9) [1.50]
Students will engage throughout the semester with the processes of forming a theatre company, theorizing its organizational structure, and the particular project being undertaken, exploring fundraising and publicity exercises, casting, designing, dramaturging, directing, and mounting a production, and engaging in post-production analysis that assesses the social and theatrical impact of the decisions taken and procedures employed. <i>Prerequisite(s):</i> (DRMA*1000 or THST*1040), THST*2080, [DRMA*2220 or (THST*2230, THST*2240)], THST*3550, THST*3850, (THST*3650 or THST*3660) <i>Equate(s):</i> DRMA*4280 <i>Restriction(s):</i> Restricted to majors in the Theatre Studies Program who have completed a minimum of 14.00 credits.
THST*4320 Seminar in Dramatic Literature and Theory F (3-0) [0.50]
An in depth study of one aspect of dramatic literature before 1900. <i>Prerequisite(s):</i> (THST*3650 or THST*3660), THST*3850 <i>Equate(s):</i> DRMA*4320
THST*4330 Seminar in Canadian Drama and Theatre W (3-0) [0.50]
An in depth study of one aspect of Canadian drama and theatre. <i>Prerequisite(s):</i> (THST*3650 or THST*3660), THST*3550, THST*3850 <i>Equate(s):</i> DRMA*4330
THST*4340 Playwriting F (3-0) [0.50]
A study of the theory and practice of playwriting. Admission is by application to the instructor. <i>Prerequisite(s):</i> (THST*3650 or THST*3660), THST*3850 <i>Equate(s):</i> DRMA*4340 <i>Restriction(s):</i> Instructor consent required.
THST*4650 Honours Essay U (3-0) [0.50]
The completion, under direction, of a scholarly essay in the study of drama and/or theatre. Admission is by application to the instructor. <i>Prerequisite(s):</i> (THST*3650 or THST*3660), THST*3550, THST*3850 <i>Equate(s):</i> DRMA*4650 <i>Restriction(s):</i> Instructor consent required.

Toxicology

Department of Biomedical Sciences

Department of Chemistry

Department of Environmental Biology

Department of Mathematics and Statistics

Department of Molecular and Cellular Biology

Department of Pathobiology

TOX*2000 Principles of Toxicology F (3-0) [0.50]

This course will establish the scientific principles underlying the toxic actions of various substances and will introduce the various challenges within the field of toxicology. The chemical nature of injurious substances, their uptake and metabolism by non-target organisms, and their mode of toxic action will be studied in addition to the methods used in safety evaluations and risk assessment. Department of Biomedical Sciences.

Prerequisite(s): (CHEM*1050 or CHEM*2300), (MATH*1080 or equivalent), (BIOL*1040 or equivalent) (CHEM*2300 may be taken concurrently)

TOX*3300 Analytical Toxicology F (3-3) [0.50]

A course in trace analysis designed for students in toxicology and related programs. Analytical techniques of value in analyzing samples of toxicological importance will be presented with emphasis also on sample collection and preparation prior to analysis. Department of Chemistry.

Prerequisite(s): CHEM*2480, BIOC*2580, TOX*2000 (TOX*2000 may be taken concurrently)

Restriction(s): CHEM*3430, CHEM*3450 Priority Access course. Enrolment may be restricted to particular programs or specializations. See department for more information.

TOX*3360 Environmental Chemistry and Toxicology S,W (3-0) [0.50]

The chemistry of the natural environment; the influence of pollutants upon the environment, including methods of introduction of pollutants to, and removal of pollutants from, the environment. Department of Chemistry and Biochemistry. (Also listed as CHEM*3360.)

Prerequisite(s): CHEM*1050

Equate(s): CHEM*3360

Restriction(s): CHEM*1310

TOX*4000 Medical Toxicology F (3-3) [0.50]

The toxicology of mammalian body systems: dose-response, mechanisms and systemic sites of action of major groups of chemical toxicants. The course is designed for students majoring in biomedical toxicology. Department of Biomedical Sciences.

Prerequisite(s): BIOM*3090, TOX*3300

TOX*4100 Toxicological Pathology W (2-2) [0.50]

Evaluation of the pathologic responses of cells and tissues to toxic compounds. The course is designed for students majoring in toxicology. Department of Pathobiology.

Prerequisite(s): PATH*3610 (or equivalent)

TOX*4200 Topics in Toxicology W (0-4) [0.50]

Topics in toxicology will consist of oral and written presentations by students, faculty members, and guest lecturers. The emphasis will be on the broad integrative aspects of toxicology with particular reference to the whole organism and higher levels of natural systems; risk assessment and regulatory toxicology.

Prerequisite(s): TOX*2000, TOX*3300

Restriction(s): Registration in B.Sc. Honours Toxicology students in their 7th or 8th semester. Departments of Biomedical Sciences and Environmental Biology.

TOX*4550 Ecotoxicological Risk Characterization W (3-0) [0.50]

A biologically based, advanced course that will give students working knowledge of current processes and techniques for ecotoxicological risk characterization. The course material will cover the topics of problem definition, dose response characterization, exposure characterization, risk assessment, and risk management decision making. (Also listed as ENVB*4550.)

Prerequisite(s): TOX*2000, ENVB*3030

Equate(s): ENVB*4550

TOX*4590 Biochemical Toxicology F (3-0) [0.50]

The biotransformation of drugs, carcinogens, and other toxicants, including consideration of human health implications of these metabolic processes. The enzymes catalyzing these reactions will be discussed in detail. Designed for students specializing in Toxicology or Biochemistry. Department of Chemistry.

Prerequisite(s): (1 of CHEM*3430, CHEM*3450, TOX*3300), BIOC*3560, MBG*2020

Veterinary Medicine

Department of Biomedical Sciences

Department of Clinical Studies

Department of Pathobiology

Department of Population Medicine

Students entering the D.V.M. Program prior to Fall 2000 should refer to the undergraduate calendar for their year of program entry for appropriate course listings.

The hours in courses below indicate the approximate equivalent number of semester course hours.

These courses will be available only to students registered in the D.V.M. program.

VETM*3000 Veterinary Biochemistry P1 (2-1) [0.50]

This course integrates the biochemistry of the healthy animal with a study of some abnormalities in metabolic pathways. The emphasis is on understanding the physiological and biochemical mechanisms and regulatory processes within cells, tissues and organs, as a basis for later courses on diseases. Department of Biomedical Sciences.

Co-requisite(s): All Phase 1 courses.

VETM*3070 Veterinary Anatomy P1 (2-6) [2.00]

An introduction to comparative, topographical anatomy, primarily of 4 domestic mammals: cat, dog, horse and cow. Full dissections of these species are related to the living animal and to imaging, to form the basis for future studies in clinical morphology. Students are first introduced to the major anatomical systems and then to the regions in detail: thorax, abdomen, pelvis and perineum, limbs, and head and neck. Active learning, problem solving, communication skills and the integration of material across concurrent courses are fostered. Department of Biomedical Sciences.

Co-requisite(s): All Phase 1 courses.

VETM*3080 Veterinary Physiology P1 (3-3) [1.50]

The course describes the physiological processes carried out by the major tissues and organ systems, and the regulatory mechanisms that affect tissue and organ function. Topics dealt with in the course include the following: the cellular and chemical constituents of blood, blood coagulation and haemostasis, the function of the immune system, resistance to infectious agents and the principles of immunoprophylaxis, cardiac function, cardiovascular haemodynamics, blood pressure, peripheral and regional circulation of blood, the lymph circulation, the structure and function of the mammalian nervous system and organs associated with special senses, the functions of the digestive tract, lungs and kidney thermoregulation and water, electrolyte and acid-base balance. The homeostatic features and species variation of the tissue organ systems will be emphasized. Departments of Biomedical Sciences and Pathobiology.

Co-requisite(s): All Phase 1 courses.

VETM*3120 Veterinary Histology P1 (3-3) [0.75]

A lecture and laboratory course emphasizing the microscopic organization of the tissues and organs of domestic animals in various physiological states. Correlations between morphology and function of various cells and tissues comprising the organ systems will be discussed. Department of Biomedical Sciences.

Co-requisite(s): All Phase 1 courses.

VETM*3210 Art of Veterinary Medicine I P1 (V-V) [0.50]

In a series of integrated modules, this course will assist students in increasing their self-awareness and comprehension of a range of legal, professional and ethical values and behaviours that are essential and normal components of veterinary medicine. Emphasis will be placed on understanding, evaluating and improving interpersonal relations and oral and written communication skills. The ethical principles that underlie veterinary medicine will be explored in depth. The course will also assist students in understanding their position in the developing history of veterinary medicine and inform them of emerging trends. Issues related to professional development, how other species interact with humans, and the client/patient/veterinarian triad will be introduced. The application of these learned skills in the resolution of problems will be introduced. OVC Dean's Office, Department of Population Medicine and the Veterinary Teaching Hospital.

Co-requisite(s): All Phase 1 courses.

VETM*3220 Art of Veterinary Medicine II P2 (2-0) [0.50]

Using modules, this course will build on, and enhance, the knowledge base and skill set acquired in Phase I in the area of communications, human-animal interactions, professional development, and the client/patient/veterinarian triad. The focus in these areas will now move towards recognising difficulties that may arise and how to differentiate abnormal situations from normal ones. Problem-solving, conflict resolution and stress management through application of innate and acquired knowledge and skills will be developed. In addition, the course will introduce concepts of business and entrepreneurial skills which are required for successful veterinary practice. OVC Dean's Office, Department of Population Medicine and the Veterinary Teaching Hospital.

Prerequisite(s): VETM*3210

Co-requisite(s): All Phase 2 courses.

VETM*3390 Veterinary Medical Genetics P1 (1-1) [0.50]

The course deals with the genetic basis of disease and birth defects in general and the salient features and inheritance patterns of the common birth defects, metabolic errors and reproductive problems in domestic animals. Department of Biomedical Sciences.

Co-requisite(s): All Phase 1 courses.

VETM*3400 Health Management I P1 (3-1) [0.75]

The course is the first of two comprehensive and integrated courses that will span the first two phases of the DVM program. Both courses are intended to establish the foundation for, and contribute to the students' achievement of selected DVM 2000 elements of competency in the context of the principles of health management. The primary emphasis of this component is to establish the historical perspective and basic tools required for health promotion and disease prevention. Department of Population Medicine.

Co-requisite(s): All Phase 1 courses.

VETM*3410 Health Management II P2 (3-0) [0.75]

This course is a continuation of the Phase 1 course Health Management I. Previously presented concepts will be explored in greater depth and complexity. Additional emphasis will be placed on relevant epidemiological tools for monitoring, outbreak investigation, critical appraisal and the applications of principles from the previous course in the series to measure performance, including relevant production genetics, and animal behaviour in a species/industry context. Department of Population Medicine.

Prerequisite(s): All Phase 1 courses.

Co-requisite(s): All Phase 2 courses.

VETM*3430 Clinical Medicine I P1 (V-V) [0.25]

The course will contribute to students' achievement of selected DVM 2000 elements of competency in the areas of animal handling and the clinical examination of various species. Students will become familiar with the expected variation in common clinical parameters and how this variation is impacted by aging, changes in health status, and external environmental influences and other sources of stress. Students will be introduced to clinical problem solving using case material from the Veterinary Teaching Hospital. They will develop their verbal and written communication skills through case simulations and analyses. The course will be presented using lectures, laboratory classes and independent study. The graduating competencies can be found on the OVC website (<http://www.ovcnet.uoguelph.ca/homepage/html>). Department of Clinical Studies.

Co-requisite(s): All Phase 1 courses.

VETM*3440 Clinical Medicine II P2 (0-2) [0.50]

The course is a continuation of Clinical Medicine I. It will contribute to students' achievement of selected elements of graduating competency in the areas of clinical examination of specific organ systems of various species. Students will enhance and refine their clinical problem solving skills using case material from the Veterinary Teaching Hospital. They will continue to develop their verbal and written communication skills through case simulations and analyses. The course will be presented using lectures, laboratory classes and independent study. The graduating competencies can be found on the OVC website (<http://www.ovcnet.uoguelph.ca/homepage/html>). Department of Clinical Studies.

Prerequisite(s): All Phase 1 courses.

Co-requisite(s): All Phase 2 courses.

VETM*3450 Principles of Disease in Veterinary Medicine P2 (V-V) [2.75]

This course addresses several major topics, including principles of disease induction and transmission, host response to threat and injury, pathogenetic mechanisms of infectious and toxic agents, and manipulation of disturbances in health. The interaction among host, environmental, and etiologic factors in the development of disease will be highlighted. Students will learn to recognize, describe, and evaluate disturbances of health and homeostasis at the level of the population, individual animal, organ system, tissue and cell using a variety of diagnostic modalities. Departments of Biomedical Sciences and Pathobiology.

Prerequisite(s): All Phase 1 courses.

Co-requisite(s): All Phase 2 courses.

VETM*3460 Theriogenology P2 (V-V) [0.75]

A lecture and laboratory course covering the normal and abnormal reproductive systems of domestic animals. The course will include mammalian reproductive physiology and histology, diagnosis and treatment of reproductive disorders, including infertility, and management of breeding programs of the common domestic species. An introduction to the new reproductive technologies used in theriogenology will also be provided. Departments of Biomedical Sciences, Pathobiology and Population Medicine.

Prerequisite(s): All Phase 1 courses.

Co-requisite(s): All Phase 2 courses.

VETM*3470 Anaesthesiology and Pharmacology P2 (V-V) [0.75]

This course provides the general principles, pharmacologic basis, and practical applications of general and local anaesthesia in small and large animals. Other topics covered include fluid and acid-base imbalance and the prevention and treatment of surgical shock. Departments of Biomedical Sciences and Clinical Studies.

Prerequisite(s): All Phase 1 courses.

Co-requisite(s): All Phase 2 courses.

VETM*3480 Phase 2: Special Topics P2 (V-V) [0.50]

This course provides opportunities for students to enrich their educational experience, in depth and/or in breadth, beyond the core competency requirements of DVM 2000. This course is constructed of a series of topic-based modules related to the core teaching in Phase 2. Students will be required to take at least two of these modules. Departments of Biomedical Sciences, Clinical Studies, Pathobiology and Population Medicine.

Prerequisite(s): All Phase 1 courses.

Co-requisite(s): All Phase 2 courses.

VETM*3510 Principles of Surgery P2 (2-0) [0.25]

The principles of surgery in various animal species are given. The lecture topics include patient and surgeon preparation, tissue handling instrumentation, suturing and surgical principles and approaches to various organ systems and anatomical regions. Department of Clinical Studies.

Prerequisite(s): All Phase 1 courses.

Co-requisite(s): All Phase 2 courses.

VETM*4220 Art of Veterinary Medicine III P3 (2-0) [0.50]

This modular course will require students to apply the knowledge and skills acquired in Phases 1 and 2 to problems that incorporate aspects of one or more of the following areas: communications and conflict resolution, ethics, professional behaviour, human-animal interactions, analysis and planning, and business issues. This course will focus on methods to resolve difficulties in the above areas that are interfering with intrapersonal and interpersonal relationships and with how to return abnormal situations to normal ones. Problem-solving, conflict resolution and stress management through application of innate and acquired knowledge and skills will be expected. The course will be taught primarily through case analysis. OVC Dean's Office, Department of Population Medicine, Veterinary Teaching Hospital.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4420 Clinical Pharmacology P3 (V-V) [0.25]

This course stresses rational drug therapy through an understanding of drug factors, host factors and disease factors, with emphasis on clinically relevant properties of selected major drug classes and used for therapy (prevention and treatment) in small animals, food animals, and horses.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

Restriction(s): Registration in the D.V.M. Program

VETM*4450 Equine Medicine and Surgery P3 (3-0) [0.50]

The course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the horse. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses. Department of Clinical Studies.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4460 Food Animal Medicine and Surgery P3 (V-V) [1.00]

The course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the common ruminant species and swine. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses. The graduating competencies can be found on the OVC website (<http://www.ovcnet.uoguelph.ca/homepage/html>). Departments of Clinical Studies and Population Medicine.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4470 Medicine and Surgery of Dog and Cat P3 (V-V) [1.00]

The course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the dog and cat. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses. The graduating competencies can be found on the OVC website (<http://www.ovcnet.uoguelph.ca/homepage/html>). Department of Clinical Studies.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4480 Comparative Medicine P3 (V-V) [0.75]

The course will contribute to students' achievement of selected elements of graduating competency in the context of pet birds, commercial poultry and non-traditional species (fish, amphibians, reptiles, rabbits, rodents, ferrets, non-domestic carnivores and non-domestic ungulates). The primary emphasis is directed towards enhancing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses. The graduating competencies can be found on the OVC website (<http://www.ovcnet.uoguelph.ca/homepage/html>). Department of Pathobiology.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4490 Systems Pathology P3 (V-V) [1.00]

The course will contribute to students' achievement of selected elements of graduating competency in the context of pathobiology across the range of species. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to carry out the post-mortem examinations, select and perform relevant ancillary diagnostic tests and procedures, interpret findings, and initiate and interpret results of further investigations. The graduating competencies can be found on the OVC website (<http://www.ovcnet.uoguelph.ca/homepage/html>). Department of Pathobiology.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4530 Health Management III P3 (V-V) [0.50]

The course will contribute to students' achievement of greater depth in selected elements of graduating competency in the context of health management in species of their choice. The primary emphasis is directed towards developing species-specific skills, knowledge and attitudes that will permit the entry-level veterinarian to assess and advise on animal production and performance and evaluate the necessity for, and implementation of, health management programs. The course is constructed of a series of species-based modules. Students will be required to take two of the modules. The graduating competencies can be found on the OVC website (<http://www.ovcnet.uoguelph.ca/homepage/html>). Department of Population Medicine.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4540 Surgical Exercises P3 (V-V) [1.75]

Veterinary students receive training in preoperative planning, anaesthesia and surgical techniques, operative room decision making and post-operative care in this laboratory course. Students begin by practicing technical skills on inanimate models. They progress to performing a series of supervised operations designed to parallel the most commonly performed surgeries in private practice. A once weekly rounds period allows discussion of issues arising from the previous anaesthesia and surgery, and planning for the upcoming laboratory. Though some didactic material is presented, the course is mainly experiential. The evaluation outcome of the course is outstanding, pass or fail. Department of Clinical Studies

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

Restriction(s): Registration in the D.V.M. Program

VETM*4610 Small Animal Clinics - Small Animal Stream P4 (V-V) [3.25]

This course is for students who have selected the Small Animal Stream in Phase 4 or DVM Program. The goal of the small animal clinics course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will rotate through various service areas, and actively participate in the diagnosis and treatment of client-owned animals in the teaching hospital. Regularly scheduled small group discussions allow the exploration of issues during diagnosis and management of the individual cases.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4620, VETM*4880, VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4620 Health Management - Small Animal Stream P4 (V-V) [1.00]

This course is for students who have selected the Small Animal Stream in Phase 4 or DVM Program. The goal of the health management course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will participate in a series of rotations that emphasize the implementation of veterinary directed management programs, which affect the health of animals and ultimately humans.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4610, VETM*4880, VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4660 Small Animal Clinics - Mixed Stream P4 (V-V) [2.00]

This course is for students who have selected the Mixed Stream in Phase 4 or DVM Program. The goal of the small animal clinics course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will rotate through various service areas, and actively participate in the diagnosis and treatment of client-owned animals in the teaching hospital. Regularly scheduled small group discussions allow the exploration of issues during diagnosis and management of the individual cases.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4670, VETM*4680, VETM*4890, VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4670 Large Animal Clinics - Mixed Stream P4 (V-V) [1.50]

This course is for students who have selected the Mixed Stream in Phase 4 or DVM Program. The goal of the large animal clinics course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will rotate through various service areas, and actively participate in the diagnosis and treatment of client-owned animals in the teaching hospital. Regularly scheduled small group discussions allow the exploration of issues during diagnosis and management of the individual cases.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4660, VETM*4680, VETM*4890, VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4680 Health Management - Mixed Stream P4 (V-V) [2.00]

This course is for students who have selected the Mixed Stream in Phase 4 of the DVM Program. The goal of the health management course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will participate in a series of rotations that emphasize the implementation of veterinary directed management programs, which affect the health of animals and ultimately humans.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4660, VETM*4670, VETM*4890, VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4710 Large Animal Clinics - Food Animal Stream P4 (V-V) [1.00]

This course is for students who have selected the Food Animal Stream in Phase 4 or DVM Program. The goal of the large animal clinics course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will rotate through various service areas, and actively participate in the diagnosis and treatment of client-owned animals in the teaching hospital. Regularly scheduled small group discussions allow the exploration of issues during diagnosis and management of the individual cases.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4720, VETM*4880, VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4720 Health Management - Food Animal Stream P4 (V-V) [3.25]

This course is for students who have selected the Food Animal Stream in Phase 4 of the DVM Program. The goal of the health management course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will participate in a series of rotations that emphasize the implementation of veterinary directed management programs, which affect the health of animals and ultimately humans.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4710, VETM*4880, VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4870 Clinical Medicine III P3 (0-2) [0.25]

This course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the hospital environment. This is an integrated course in which students will enhance a variety of clinical skills, including physical examination, history taking, problem solving, and ancillary diagnostic tests and procedures. This course is primarily carried out in the Veterinary Teaching Hospital where students will be exposed to case material from the Large and Small Animal Clinics. The emphasis is directed towards enhancing the skills, knowledge and attitudes that will permit the student to maximize the benefit to be derived from senior year courses. Department of Clinical Studies.

Prerequisite(s): All Phase 2 courses.

Co-requisite(s): All Phase 3 courses.

VETM*4880 Electives in Veterinary Medicine I P4 (V-V) [3.25]

This course is for students who have selected the Small Animal or Food Animal Stream in Phase 4 of the DVM Program. The goal of this course is to provide students the opportunity to pursue greater breadth and depth in their program according to their interests. The course is largely experiential in structure and process. Students will select a series of approved internal and external rotations that will allow them to pursue areas of interest in veterinary medicine.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): (VETM*4610 or VETM*4710), (VETM*4620 or VETM*4720), VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4890 Electives in Veterinary Medicine II P4 (V-V) [2.00]

This course is for students who have selected the Mixed or Equine Stream in Phase 4 of the DVM Program. The goal of this course is to provide students the opportunity to pursue greater breadth and depth in their program according to their interests. The course is largely experiential in structure and process. Students will select a series of approved internal and external rotations that will allow them to pursue areas of interest in veterinary medicine.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): (VETM*4660 or VETM*4920), (VETM*4670 or VETM*4930), (VETM*4680 or VETM*4940) VETM*4900

Restriction(s): Registration in the DVM program.

VETM*4900 Veterinary Externship P4 (0-0) [2.50]

This is an eight-week experiential learning opportunity that junior students in the DVM Program must organize by the mid-way through Phase 3. The externship must be in approved private, primary care, veterinary practice. Senior students in the DVM Program, under the supervision of a designated host veterinarian, will experience being part of a team providing health care services to the public. This course will provide students with the opportunity to integrate and apply their knowledge and experience from previous courses, and further refine their problem-solving and communication skills, and enhance their ability to work as part of a team. The evaluation outcome of this course is outstanding, pass or fail. Coordinated by the Department of Clinical Studies.

Prerequisite(s): All Phase 1, Phase 2 and Phase 3 courses.

VETM*4920 Small Animal Clinics - Equine Stream P4 (V-V) [1.50]

This course is for students who have selected the Equine Stream in Phase 4 or DVM Program. The goal of the small animal clinics course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will rotate through various service areas, and actively participate in the diagnosis and treatment of client-owned animals in the teaching hospital. Regularly scheduled small group discussions allow the exploration of issues during diagnosis and management of the individual cases.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4890, VETM*4900, VETM*4930, VETM*4940

Restriction(s): Registration in the DVM program.

VETM*4930 Large Animal Clinics - Equine Stream P4 (V-V) [2.50]

This course is for students who have selected the Equine Stream in Phase 4 or DVM Program. The goal of the large animal clinics course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will rotate through various service areas, and actively participate in the diagnosis and treatment of client-owned animals in the teaching hospital. Regularly scheduled small group discussions allow the exploration of issues during diagnosis and management of the individual cases.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4890, VETM*4900, VETM*4920, VETM*4940

Restriction(s): Registration in the DVM program.

VETM*4940 Health Management - Equine Stream P4 (V-V) [1.50]

This course is for students who have selected the Equine Stream in Phase 4 of the DVM Program. The goal of the health management course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process. Small groups of students will participate in a series of rotations that emphasize the implementation of veterinary directed management programs, which affect the health of animals and ultimately humans.

Prerequisite(s): All Phase 3 courses.

Co-requisite(s): VETM*4670, VETM*4890, VETM*4900, VETM*4920

Restriction(s): Registration in the DVM program.

Women's Studies

College of Arts

WMST*1000 Introduction to Women's Studies F (3-0) [0.50]
An introduction to the methods and analyses of Women's Studies. An interdisciplinary feminist and multicultural examination of research about women and the gendered nature of societies and cultures. Areas of inquiry may include psychology, law, science, culture, work, family, violence, health, and sexuality.
<i>Equate(s):</i> ISS*2200 , WMST*2200
WMST*2000 Women and Representation W (3-0) [0.50]
An interdisciplinary analysis of the role gender plays in representation, drawing on areas such as television, film, music, literature, visual arts, ethnography, medicine and law. International and cross-cultural perspectives included.
WMST*3000 Feminist Theory and Methods F (3-0) [0.50]
A comparative and critical examination of feminist theories and their methodological implications, including contributions of and tensions between various feminisms. Special attention to contemporary developments in the field.
<i>Prerequisite(s):</i> 10.00 credits including (1 of ISS*2200 , WMST*1000, WMST*2200), (0.50 additional credits from Women's Studies List A), (1 of ARTH*2480, DRMA*2300 , ENGL*2120, PHIL*2060, POLS*2000, SOAN*2400)
WMST*3010 Gender and Diversity W (3-0) [0.50]
An examination of studies of the interaction of gender with race, class, ethnicity, sexual orientation, ability/disability, and other axes of difference as they position women within systems of power. Students will compare and assess contemporary theories, approaches, and research that address together gender and diversity issues and problems.
<i>Prerequisite(s):</i> 10.00 credits including WMST*1000, WMST*2000, 0.50 additional credits from Women's Studies List A
WMST*3510 Directed Readings in Women's Studies S,F,W (3-0) [0.50]
An opportunity for advanced Women's Studies undergraduates to pursue an independent course of readings and assignments in Women's Studies. The student will design a course of readings and assignments with the instructor and submit the proposal to the Coordinator of Women's Studies for approval by the last day of the Add Period of that semester.
<i>Prerequisite(s):</i> 10.00 credits including (1 of ISS*2200 , WMST*1000, WMST*2200), 1.00 additional credits from Women's Studies List A
<i>Restriction(s):</i> Instructor consent required.
WMST*3520 Independent Workplace Learning in Women's Studies S,F,W (3-0) [0.50]
An opportunity for advanced Women's Studies undergraduates to combine workplace experience (in women-focused agencies or organizations) with Women's Studies research and assignments relevant to that work. The student will design a project with the instructor and submit a proposal to the Coordinator of Women's Studies for approval by the last day of the Add Period of that semester.
<i>Prerequisite(s):</i> 10.00 credits including (1 of ISS*2200 , WMST*1000, WMST*2200), 1.00 additional credits from Women's Studies List A
<i>Restriction(s):</i> Instructor consent required.
WMST*4010 Seminar in Women's Studies W (3-0) [0.50]
The framework of the course will be provided by a series of unresolved issues or challenging questions regarding women which will call upon the students' critical, evaluative, and integrative abilities. The content will largely depend upon the students' backgrounds within the program and their other major areas of study.
<i>Prerequisite(s):</i> 15.00 credits including WMST*1000, WMST*2000 and 1.00 additional credits from Women's Studies List A at the 3000 level or above.
WMST*4510 Advanced Topics in Women's Studies S,F,W (3-0) [0.50]
An opportunity for advanced Women's Studies undergraduates to pursue an advanced research project in Women's Studies. The student will design a project with the instructor and submit for approval to the Coordinator of Women's Studies by the last day of the Add Period in that semester.
<i>Prerequisite(s):</i> 15.00 credits including (1 of ISS*2200 , WMST*1000, WMST*2200), 1.00 additional credits from Women's Studies List A
<i>Restriction(s):</i> Instructor consent required.
WMST*4520 Advanced Topics in Women's Studies S,F,W (3-0) [0.50]
An opportunity for advanced Women's Studies undergraduates to pursue an advanced research project in Women's Studies. The student will design a project with the instructor and submit for approval to the Coordinator of Women's Studies by the last day of the Add Period in that semester.
<i>Prerequisite(s):</i> 15.00 credits including (1 of ISS*2200 , WMST*1000, WMST*2200), 1.00 additional credits from Women's Studies List A
<i>Restriction(s):</i> Instructor consent required.

Zoology

Department of Integrative Biology

ZOO*1500 Humans in the Natural World - a Zoological Perspective S,F,W (3-0) [0.50]

This course will examine past and present human interactions with Nature from an ecological perspective. It investigates current global issues that require multi-disciplinary environmental analysis. (Also offered through distance education format.)

Restriction(s): This course is designed for non-science students. B.Sc. students cannot take this course for credit.

ZOO*2050 Natural History of Ontario S,F (0-0) [0.50]

This course provides an introduction to the natural history of Ontario. The course begins with a review of geological, ecological and evolutionary factors that have influenced species diversity in the province. Distributions and abundances of biota, primarily animals, are discussed within the context of the four major ecozones. Human impacts on the biotic diversity of Ontario are examined and the conservation of habitats and species is discussed. Students are required to do three reports, one of which involves field work. (Offered through distance education format only.)

Prerequisite(s): BIOL*1040

ZOO*2070 Invertebrate Zoology I F (2-3) [0.50]

To provide a general knowledge of the biology, functional morphology and ecology of the invertebrates from protists to molluscs.

Prerequisite(s): BIOL*1040

ZOO*2080 Invertebrate Zoology II W (2-3) [0.50]

To provide a general knowledge of the biology, functional morphology and ecology of the invertebrates from annelids to the urochordates.

Prerequisite(s): ZOO*2070

ZOO*2090 Vertebrate Structure and Function F,W (2-3) [0.50]

A comparative survey of the structure and functioning of the chordates with emphasis on the vertebrates. Course includes laboratory study of the anatomy of selected vertebrates.

Prerequisite(s): BIOL*1040

ZOO*2100 Developmental Biology F,W (3-3) [0.50]

An introduction to animal development through the study of reproduction, early embryology, histogenesis, organogenesis, and morphogenesis. The roles of determination, differentiation, growth, morphogenesis, and pattern formation will be emphasized.

Prerequisite(s): BIOL*1040

ZOO*3000 Comparative Histology F (3-3) [0.50]

An introduction to the microscopic structure of the major organ systems of the vertebrate body. The study of epithelial, connective, muscular, and nervous tissues precedes examination of the comparative histology of the circulatory, nervous, digestive, integumentary, respiratory, excretory, reproductive, endocrine, and sensory systems of vertebrates.

Prerequisite(s): 1 of BIOM*3010, BIOM*3100, HK*3940, HK*3401/2, ZOO*2090, ZOO*3200

ZOO*3010 Wild Life Parasitology F (2-3) [0.50]

To provide an introduction to parasitology citing examples from the protozoans, helminths, and arthropods with particular reference to those in wild life, including fishes.

Prerequisite(s): ZOO*2070

ZOO*3200 Comparative Animal Physiology I F (3-3) [0.50]

The course will examine the underlying molecular and cellular events which mediate physiological processes and contribute to whole animal homeostasis. Particular emphasis will be placed on comparing the strategies and adaptations used by different animals and the influence of varying environmental conditions. The course will focus on the nervous, muscular, respiratory and circulatory systems. This course involves exercises that use animals. BIOM*3100, BIOM*3110 and HK*3940 are available to cover similar material without labs.

Prerequisite(s): BIOC*2580

ZOO*3210 Comparative Animal Physiology II W (3-3) [0.50]

This is the second course that provides an introduction to the physiological mechanisms used by vertebrates and invertebrates. The course will examine the underlying molecular and cellular events which mediate physiological processes and contribute to whole animal homeostasis. Particular emphasis will be placed on comparing the strategies and adaptations used by different animals and the influence of varying environmental conditions. The course will include an examination of digestive physiology, excretion, endocrinology and osmoregulation. This course involves exercises that use animals. BIOM*3100, BIOM*3110 and HK*3940 are available to cover similar material without labs.

Prerequisite(s): BIOC*2580

ZOO*3300 Evolution F,W (3-0) [0.50]

A comprehensive introduction to evolutionary biology, the historical development of the discipline, the extent and nature of genetic diversity, and the mechanisms of evolutionary change. Examination of adaptation and speciation, and the origins and patterns of biotic diversity through evolutionary time. Designed to integrate evolutionary theory with other fields of biology such as development, ecology and systematics.

Prerequisite(s): MBG*2000, (BIOL*2060 or BIOL*3110, which may be taken concurrently)

ZOO*4020 Ichthyology F (2-3) [0.50]

An introduction to the interrelationship of fossil and living taxa, and the fishes of the world with a special emphasis on the main Canadian and commercial forms, including detailed phyletic classification and evolution of fish-like vertebrates, their anatomical, morphological and selected ecological features.

Prerequisite(s): BIOL*3450, ZOO*2090

ZOO*4050 Natural Resources Policy W (3-0) [0.50]

An analysis of how political, economic, social and scientific factors interact to determine the policy underlying management of renewable and non-renewable natural resources provincially, nationally and internationally. The course will analyze current policies pertaining to fisheries, wild life, forestry, energy, water, minerals, international treaties and accords.

Prerequisite(s): 15.00 credits

Restriction(s): Registration in semester 7 or 8.

ZOO*4070 Animal Behaviour F (3-0) [0.50]

An introduction to the theories and principles of the behaviour of animals. The course will be a comparative study of learning, socialization, social interaction, and other components of animal behaviour.

Prerequisite(s): 1 of PSYC*2410, PSYC*3410, ZOO*3200

ZOO*4090 Ornithology F (2-3) [0.50]

An introduction to the biology of birds. Structure and function will be discussed in relation to various aspects of avian biology including evolution, flight, migration, reproduction, behaviour, and distribution.

Prerequisite(s): ZOO*2090

ZOO*4110 Principles of Fish and Wild Life Management F (3-0) [0.50]

Presents ecological aspects of managing populations of fish, birds and mammals, evaluates techniques and rationale for current fisheries and wild life programs. The course is not available to students in the Wild Life or Marine and Freshwater Biology majors.

Restriction(s): BIOL*4150, ZOO*4570

ZOO*4170 Experimental Comparative Animal Physiology W (3-3) [0.50]

An experimental approach to the study of physiological mechanisms and adaptive responses to changes in the environment will be stressed. The focus of the course will be on laboratory exercises.

Prerequisite(s): 1 of BIOM*3110, HK*3940, ZOO*3210

ZOO*4280 Mammalogy W (2-3) [0.50]

An introduction to the orders of mammals on a world-wide basis, with detailed examination of Canadian species.

Prerequisite(s): ZOO*2090

ZOO*4300 Marine Biology and Oceanography F (3-3) [0.75]
An intensive two-week course held in late August or early September before classes commence for the Fall semester. The course is held at the Huntsman Marine Science Centre, St. Andrews, New Brunswick. The ecology, behaviour, physiology, biochemistry, biomechanics of marine plants and animals will be studied as well as basic oceanographic techniques. Students will be able to familiarize themselves with the techniques and equipment involved in various branches of marine biology and oceanography. In addition to regular tuition fees, students are responsible for the cost of transportation to St. Andrews, and for charges levied by the Huntsman Marine Science Centre for room and board. These fees are paid to Student Finance and Awards of the University of Guelph. A department application form must be submitted for approval before course selection. The signature of the course coordinator is required to select the course. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology.
<i>Prerequisite(s):</i> BIOL*3450, ZOO*2080
ZOO*4330 Environmental Biology of Fishes W (2-3) [0.50]
A comparative examination of selected freshwater and marine fishes to illustrate the significance of environmental influences on life styles, behavioral patterns, physiological responses, population biology and community structure. The use of niche, habitat and ecotope concepts in defining the role of fishes in representative types of aquatic ecosystems. It is recommended that students take ZOO*4020 before taking ZOO*4330, even though ZOO*4020 is not required as a prerequisite.
ZOO*4350 Biology of Polluted Waters F (3-3) [0.50]
A practical course in biology of disturbed waters, and toxicity of pollutants to aquatic life. Designed to familiarize students with the characteristics of polluted ecosystems, best methods of field survey, and procedures for toxicity tests.
<i>Prerequisite(s):</i> BIOL*3450
ZOO*4410 Field Ecology F (3-3) [0.75]
A 12-day field course held in Algonquin Park, Ontario, during August. Students independently conduct and write reports about 2 research projects of their choice and design (in consultation with faculty members), on any of: vertebrate, invertebrate, or plant ecology, and/or behaviour, in terrestrial or aquatic habitats. Emphasis is placed upon students asking ecological questions, designing experiments, and then collecting data from intensive field work. There are no formal lectures, but an organizational meeting is held in the winter semester prior to the field course. The charge by the field station for room and board will be passed on to the student. Students are also responsible for their own transportation to and from the field station. A departmental application form must be submitted for approval at least 4 weeks prior to the last day of course selection for the Summer semester, and the signature of the course coordinator will be required to select the course. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology.
<i>Prerequisite(s):</i> 0.50 credits in ecology
<i>Restriction(s):</i> Instructor consent required.
ZOO*4430 Herpetology F (2-3) [0.50]
This course will serve as an introduction to the biology of amphibians and reptilians on a world-wide basis with emphasis on the evolutionary significance of these groups.
<i>Prerequisite(s):</i> ZOO*2090
ZOO*4470 Comparative Endocrinology F (3-0) [0.50]
A study of the structure, function and evolution of endocrine glands and hormones, and the role of endocrines in integrating physiological functions in animals. The course is designed to familiarize biology students with current endocrine investigational methodology. (Offered in odd-numbered years.)
<i>Prerequisite(s):</i> 1 of BIOM*3110, HK*3940, ZOO*3210
ZOO*4540 Marine and Freshwater Research F,W (0-6) [0.50]
In this course, students will design, execute and communicate the results of a research project involving aquatic organisms. This will involve an examination of the primary scientific literature, the formulation of hypotheses, the design of experiments, the development of analytical skills and familiarity with the operation of analytical equipment and data analysis. Faculty guidance will be provided.
<i>Prerequisite(s):</i> BIOL*3450, BIOC*2580, PHYS*1080, STAT*2040
<i>Restriction(s):</i> Registration in semester 7 or 8 of the Marine and Freshwater Biology Major of the B.Sc. Program.

ZOO*4570 Marine Ecological Processes F (3-1) [0.50]
Advanced consideration of physical and biogeochemical processes in the world's oceans. Examination of the critical dependence of biological processes on physical and chemical processes from micro- to macro-scales. The processes involved in: production and energy transfer within pelagic food webs; export of energy to the benthos; the structure and dynamics of marine communities.
<i>Prerequisite(s):</i> BIOL*3450, PHYS*1080
ZOO*4600 Tropical Ecology F (1-6) [0.75]
This three-week field course provides an opportunity to study the flora and fauna of marine, freshwater and terrestrial environments of the tropics. Based at field stations in Australia, the course includes lectures, field exercises and a student project. An information session is held in late November. Signature of course coordinator is required for course selection. Students are responsible for costs of food, lodging and transportation. Detailed information is available from the Department of Integrative Biology. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology. (Offered in odd-numbered years.)
<i>Prerequisite(s):</i> BIOL*1040, (BIOL*2060 or BIOL*3110)
<i>Restriction(s):</i> Instructor consent required.
ZOO*4610 Arctic Ecology F (1-6) [0.75]
This three-week field course provides an opportunity to study the flora and fauna of marine, freshwater and terrestrial environments of the high Arctic. Based in the high Arctic, the course includes lectures, field exercises and student projects. An information session is held in January; students are required to register before March. Signature of course coordinator is required for course selection. Students are responsible for cost of food and transportation. Detailed information is available from the Department of Integrative Biology. (Offered in even-numbered years.) This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology.
<i>Prerequisite(s):</i> BIOL*1040, (BIOL*2060 or BIOL*3110)
<i>Restriction(s):</i> Instructor consent required.
ZOO*4700 Field Biology S,F,W (1-6) [0.50]
Students may apply for 2-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.
<i>Prerequisite(s):</i> BIOL*1040, (BIOL*2060 or BIOL*3110)
<i>Restriction(s):</i> Permission of the course coordinator.
ZOO*4710 Field Biology S,F,W (1-6) [0.25]
Students may apply for 1-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.
<i>Prerequisite(s):</i> BIOL*1040, (BIOL*2060 or BIOL*3110)
<i>Restriction(s):</i> Permission of the course coordinator.
ZOO*4800 Field Biology S,F,W (1-6) [0.50]
Students may apply for 2-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.
<i>Prerequisite(s):</i> BIOL*1040, (BIOL*2060 or BIOL*3110)
<i>Restriction(s):</i> Permission of the course coordinator.
ZOO*4810 Field Biology S,F,W (1-6) [0.25]
Students may apply for 1-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.
<i>Prerequisite(s):</i> BIOL*1040, (BIOL*2060 or BIOL*3110)
<i>Restriction(s):</i> Permission of the course coordinator.
