**BOT*1200 Plants and Human Use W (3-0) [0.50]**

This course will examine past and present interactions between humans and plants with emphasis on major changes in civilization and cultures as a result of these interactions. The approach will be to consider several case studies of how unique structural and chemical properties of various plant organs have played a role in their use by humans. Not an acceptable course for students in B.SC. Biological Sciences Programs, B.A.S. Program, B.SC. (ENV.) or B.SC. (AGR.) Programs.

**Restriction(s):**

- BIOL*1050

**Department(s):**

- Department of Plant Agriculture

---

**BOT*2000 Plants, Biology and People W (3-0) [0.50]**

The course deals with the biology of plant species of historical and cultural importance. It will focus on plants used as a source of drugs, herbal medicines, industrial raw materials, food products, perfumes and dyes. Examples of plant products that will be looked at include cocaine, chocolate, tea, opium, hemp and ginseng. The relevant morphology, physiology, distribution and ethnobotany of these plant species will be discussed.

**Offering(s):**

- Also offered through Distance Education format.

**Prerequisite(s):**

- BIOL*1050 or BIOL*1070

**Restriction(s):**

- BOT*1200

**Department(s):**

- Department of Plant Agriculture

---

**BOT*2100 Life Strategies of Plants F,W (3-3) [0.50]**

This course introduces the structures and processes used by plants in the greening of our planet, and how and why plants are basic to the functioning of the biosphere. This course includes hands-on experience in examining the cells, tissues and architectures of plants as well as selected processes of plant function.

**Prerequisite(s):**

- 2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090

**Department(s):**

- Department of Molecular and Cellular Biology

---

**BOT*3050 Plant Functional Ecology F (3-3) [0.50]**

This course integrates fundamental and applied aspects of plant ecology, focusing on the roles of functional traits, physiological mechanisms, life history strategies, abiotic constraints, and biotic interactions in influencing plant distribution and abundance. Specific topics include physiological ecology, growth and allocation patterns, influence of biotic and trophic interactions (pollinators, pathogens, herbivores, competitors, mutualists, decomposers) on the structure and function of plant communities, and effects of global environmental change. Labs will include a field component that explores variation in functional aspects of plants. This course is especially valuable for students interested in plant or wildlife biology and environmental management.

**Prerequisite(s):**

- 7.50 credits including BIOL*1070

**Department(s):**

- Department of Integrative Biology

---

**BOT*3310 Plant Growth and Development W (3-3) [0.50]**

In this course the unique function and structure of plants is explored in relation to their growth, survival and adaptation to the environment. The control of growth and development by environmental and hormonal signals is explained through lectures and "hands-on" laboratories.

**Prerequisite(s):**

- BIOL*1090, (BIOL*1070 or BIOL*1080)

**Department(s):**

- Department of Molecular and Cellular Biology

---

**BOT*3410 Plant Anatomy F (3-3) [0.50]**

The intricate internal structure of plants is explored in this course. The development, pattern and significance of cells, tissues and organs will be emphasized as well as the histological and microscopical methods used to study them. The lab emphasizes interpretation of plant structure as it relates to function.

**Prerequisite(s):**

- 2 of BIOL*1070, BIOL*1080, BIOL*1090

**Department(s):**

- Department of Molecular and Cellular Biology

---

**BOT*3710 Plant Diversity and Evolution W (3-3) [0.50]**

This course integrates fundamental and applied aspects of plant evolution, focusing on the evolutionary history of plants, classification and identification, and hypotheses related to the evolution of plant form and life history. Specific topics include evolutionary processes in plants and evolution of physiological, reproductive, behavioural, and morphological traits. Labs will focus on methods and contemporary tools for phylogenetic reconstruction, comparative analyses, classification, and basic morphology/anatomy. This course is especially valuable for students interested in plant or wildlife biology and environmental management.

**Prerequisite(s):**

- 7.50 credits including BIOL*1070

**Department(s):**

- Department of Integrative Biology
### Business

**BUS*4550 Applied Business Project I S,F,W (3-0) [0.50]**

This is a project-based independent study course on a business issue for third or fourth year students in an agreed program of study with the instructor.

**Prerequisite(s):** 10.00 credits

**Restriction(s):** AGEC*4550, FARE*4550 Instructor consent required.

**Department(s):** Department of Management

---

**BUS*4560 Applied Business Project II S,F,W (3-0) [0.50]**

This course provides an opportunity to conduct a second independent study on a business issue for third or fourth year students in an agreed program of study with the instructor.

**Prerequisite(s):** BUS*4550

**Restriction(s):** AGEC*4560, FARE*4560 Instructor consent required.

**Department(s):** Department of Management
### XII. Course Descriptions, Chemistry

**Department of Chemistry**

**CHEM*1040 General Chemistry I F,W (3-3) [0.50]**

This course introduces concepts of chemistry, the central link between the physical and biological sciences. Principles discussed include chemical bonding, simple reactions and stoichiometry, chemical equilibria and solution equilibria (acids, bases, and buffers), and introductory organic chemistry.

**Prerequisite(s):** 4U Chemistry, (or equivalent) or CHEM*1060

**Department(s):** Department of Chemistry

**CHEM*1050 General Chemistry II F,W (3-3) [0.50]**

This course provides an introductory study of the fundamental principles governing chemical transformations: thermodynamics (energy, enthalpy, and entropy); kinetics (the study of rates of reactions); and redox/electrochemistry.

**Prerequisite(s):** CHEM*1040

**Department(s):** Department of Chemistry

**CHEM*1060 Introductory Chemistry F (3-0) [0.50]**

This course stresses fundamental principles of chemistry and is designed for students without Grade 12 or 4U Chemistry or equivalent. Topics include: atomic theory, the periodic table, stoichiometry, properties of gases and liquids, acid-base concepts and chemical equilibria. This course is intended only for students who require the equivalent of Grade 12 or 4U Chemistry in order to proceed to CHEM*1040.

**Offering(s):** Offered through Distance Education format only.

**Restriction(s):** CHEM*1040 Students in the BASC.AHN, BAS, BBRM.EM, BENG, BSAG, BSES and BSC programs cannot take this course for credit.

**Department(s):** Department of Chemistry

**CHEM*1100 Chemistry Today W (3-0) [0.50]**

This chemistry course for non-scientists will outline the involvement of chemistry in our daily lives and will provide an appreciation of chemistry from atoms to important complex molecules. Topics will include energy sources, air and water pollution, natural and synthetic polymers, household chemicals, foods, drugs and biochemicals.

**Offering(s):** Offered through Distance Education format only.

**Restriction(s):** CHEM*1040

**Department(s):** Department of Chemistry

**CHEM*2060 Structure and Bonding F (3-1.5) [0.50]**

This course covers the applications of symmetry, simple crystal structures and principles of bonding. Molecular orbital theory is used to explain the fundamental relationship between electronic and molecular structure. This course provides the elementary quantum background for an understanding of the electronic structures of atoms and molecules.

**Prerequisite(s):** CHEM*1050, IPS*1510 or (MATH*1210, 1 of PHYS*1010, PHYS*1070, PHYS*1300)

**Department(s):** Department of Chemistry

**CHEM*2070 Structure and Spectroscopy S,W (3-1.5) [0.50]**

This course provides an introduction to spectroscopy and its relationship to molecular structure and dynamics. Rotational, vibrational, electronic and magnetic resonance spectroscopies will be studied. Concepts introduced in CHEM*2060 will be applied to chemical and biochemical problems through spectroscopic techniques. Central to this course is the use of spectroscopy for the determination of molecular structures and the investigation of molecular motions.

**Prerequisite(s):** CHEM*2060

**Department(s):** Department of Chemistry

**CHEM*2400 Analytical Chemistry I S,F,W (3-6) [0.75]**

This course provides instruction in quantitative analysis of important inorganic species in solution by volumetric, gravimetric and spectrophotometric techniques. The students will utilize spreadsheet applications to study solution equilibria and data analysis. This course is intended to build the foundations of good analytical laboratory practice.

**Prerequisite(s):** CHEM*1050

**Restriction(s):** CHEM*2480 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department website for more information.

**Department(s):** Department of Chemistry

**CHEM*2480 Analytical Chemistry I S,F,W (3-3) [0.50]**

This course consists of a lecture portion that is the same as CHEM*2400 and a 3 hour laboratory component.

**Prerequisite(s):** CHEM*1050

**Restriction(s):** CHEM*2400 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department website for more information.

**Department(s):** Department of Chemistry

**CHEM*2700 Organic Chemistry I S,W (3-3) [0.50]**

This course provides an introduction to organic chemistry through the discussion of stereochemistry and major reaction mechanisms such as nucleophilic substitution and elimination, electrophilic addition, free radical reactions, electrophilic aromatic substitution, nucleophilic addition and nucleophilic acyl substitution.

**Prerequisite(s):** CHEM*1050

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the department website for more information.

**Department(s):** Department of Chemistry

**CHEM*2820 Thermodynamics and Kinetics F (3-3) [0.50]**

This course examines the laws and applications of chemical thermodynamics and chemical kinetics.

**Prerequisite(s):** CHEM*1050, (1 of IPS*1510, MATH*1210, MATH*2080)

**Restriction(s):** CHEM*2880, PHYS*2240

**Department(s):** Department of Chemistry

**CHEM*2880 Physical Chemistry F (3-3.5) [0.50]**

This survey course is intended for students who are not specializing in chemistry or chemical physics. Topics include basic thermodynamics, chemical equilibrium, macromolecular binding, chemical kinetics, enzyme kinetics, transport processes, colligative properties and spectroscopy. This course describes macroscopic observable properties of matter in terms of molecular concepts.

**Prerequisite(s):** CHEM*1050, (1 of IPS*1500, MATH*1000, MATH*1080, MATH*1200)

**Restriction(s):** CHEM*2820

**Department(s):** Department of Chemistry

**CHEM*3360 Environmental Chemistry and Toxicology S,W (3-0) [0.50]**

This course examines the chemistry of the natural environment and the influence of pollutants upon the environment. Topics will include methods of introduction of pollutants to, and removal of pollutants from, the environment. (Also listed as TOX*3360.)

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** CHEM*1050

**Equate(s):** TOX*3360

**Department(s):** Department of Chemistry

**CHEM*3430 Analytical Chemistry II: Instrumental Analysis S,W (3-3) [0.50]**

This course examines methods for the separation, identification and quantification of substances in the solid, liquid and vapour states. Emphasis will be placed on modern instrumental methods and trace analysis.

**Prerequisite(s):** (CHEM*2400 or CHEM*2480)

**Restriction(s):** TOX*3300

**Department(s):** Department of Chemistry

**CHEM*3440 Analytical Chemistry III: Analytical Instrumentation F (3-3) [0.50]**

Analytical Instrumentation, data acquisition, processing and applications in Chemistry and Biological Chemistry.

**Prerequisite(s):** CHEM*3430

**Department(s):** Department of Chemistry

**CHEM*3640 Chemistry of the Elements I F (3-3) [0.50]**

A comprehensive introduction to concepts used by inorganic chemists to describe the structure, properties, and reactivity of compounds of the main group elements. The most important concepts covered are: Electronic Structure of Atoms, Symmetry, MO theory, Acids and Bases, Structure of Solids, Trends in the Periodic System.

**Prerequisite(s):** CHEM*2070

**Department(s):** Department of Chemistry

**CHEM*3650 Chemistry of the Elements II W (3-3) [0.50]**

The chemistry and structure of transition metal compounds; electronic spectral and structural properties of transition metal complexes; mechanisms of their substitution and redox reactions. Introduction to organometallic chemistry.

**Prerequisite(s):** CHEM*3640

**Department(s):** Department of Chemistry

Last Revision: July 4, 2019
CHEM*3750 Organic Chemistry II S,F (3-3) [0.50]
This course provides a general survey of fundamental aspects of organic chemistry, including the structure and properties of organic compounds. Topics also include an introduction to spectroscopic methods for the identification of organic compounds.

Prerequisite(s): CHEM*2700
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Chemistry

CHEM*3760 Organic Chemistry III W (3-3) [0.50]
This course provides an in-depth treatment of various aspects of organic chemistry. This will include such topics as the chemistry of heterocyclics, polar rearrangements, organic photochemistry, synthetic planning and a detailed discussion of organic spectroscopy.

Prerequisite(s): CHEM*3750
Department(s): Department of Chemistry

CHEM*3860 Quantum Chemistry F (3-1) [0.50]
This course provides an introduction to quantum chemistry and how it applies to the understanding of the electronic structure of atoms and molecules, as well as the geometric structure of molecules. The theoretical background needed to understand molecular spectroscopy is also provided. An integral part of this course is the use of commercial software for the computation of molecular properties.

Prerequisite(s): CHEM*2070, (MATH*2170 or MATH*2270)
Department(s): Department of Chemistry

CHEM*3870 Molecular Spectroscopy W (3-3) [0.50]
This course covers elementary group theory with applications to molecular spectroscopy and provides a continuation of the topics of rotational, vibrational and electronic spectroscopy and their applications in chemistry from CHEM*2070.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): CHEM*3860, (MATH*2150 or MATH*2160)
Department(s): Department of Chemistry

CHEM*4010 Chemistry and Industry W (3-0) [0.50]
This course examines industrial processes for the production of organic and inorganic chemicals. The environmental impact and the challenges of a large-scale operation will be considered alongside the actual chemical processes involved.

Prerequisite(s): CHEM*2700, (CHEM*3430 or TOX*3300), (1 of IPS*1510, MATH*1210, MATH*2080)
Department(s): Department of Chemistry

CHEM*4400 Advanced Topics in Analytical Chemistry W (3-0) [0.50]
Recent developments in instrumental methods of chemical analysis. A typical selection will include topics from the areas of surface analysis and the applications of lasers in chemical analysis.

Prerequisite(s): CHEM*3430
Department(s): Department of Chemistry

CHEM*4620 Advanced Topics in Inorganic Chemistry F (3-0) [0.50]
This course provides a contemporary treatment of a subject of current interest in modern inorganic chemistry. Possible topics include solid state chemistry, main group chemistry and organometallic chemistry.

Prerequisite(s): CHEM*3650
Department(s): Department of Chemistry

CHEM*4630 Bioinorganic Chemistry W (3-0) [0.50]
This course covers the role and importance of transition metal systems in biological processes.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): BIOC*2580, CHEM*3650
Co-requisite(s): CHEM*3650
Department(s): Department of Chemistry

CHEM*4720 Organic Reactivity W (3-0) [0.50]
This course is an introduction to physical organic chemistry, including discussion of reactive intermediates, substituent effects, medium effects, the mechanisms of organic reactions and the theoretical description of the bonding in organic molecules.

Offering(s): Offered in even-numbered years.
Prerequisite(s): CHEM*3760
Co-requisite(s): CHEM*3760
Department(s): Department of Chemistry

CHEM*4730 Synthetic Organic Chemistry F (3-0) [0.50]
This course provides an introduction to synthetic organic chemistry, including discussion of retrosynthetic analysis, modern synthetic methods, organic reaction, and syntheses of natural products. The integration of these topics for the rational design of synthetic schemes will also be discussed.

Prerequisite(s): CHEM*3750
Department(s): Department of Chemistry

CHEM*4740 Topics in Bio-Organic Chemistry F (3-0) [0.50]
This course covers the principles, methods and techniques of current bio-organic chemistry with emphasis on modern synthetic and analysis methods applied to biological molecules, a molecular based approach to structure recognition, and an introduction to molecular modeling and drug design.

Prerequisite(s): BIOC*2580, CHEM*3750
Department(s): Department of Chemistry

CHEM*4880 Topics in Advanced Physical Chemistry W (3-0) [0.50]
This course covers selected topics in advanced physical chemistry. Possible topics include statistical thermodynamics, advanced quantum chemistry, spectroscopy, and magnetic resonance.

Offering(s): Offered in even-numbered years.
Prerequisite(s): CHEM*2820 or PHYS*3240, CHEM*3860
Department(s): Department of Chemistry

CHEM*4900 Chemistry Research Project I S,F,W (0-12) [1.00]
This research project and seminar in chemistry is designed to provide senior undergraduates with an opportunity to conduct research in an area of chemistry. Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration. Students cannot choose a supervisor with whom they already have research experience in another capacity (e.g. a summer research position). The project supervisor must be a faculty member of the Chemistry Department. Students should note that most projects are of two semesters duration, and should plan their studies on the expectation that they will also register in CHEM*4910 in a subsequent semester.

Prerequisite(s): 5.00 credits in chemistry including (1.50 credits from CHEM*3430, CHEM*3640, CHEM*3650, CHEM*3750, CHEM*3760, CHEM*3870)
Restriction(s): Instructor consent required.
Department(s): Department of Chemistry

CHEM*4910 Chemistry Research Project II S,F,W (0-12) [1.00]
This is a research project and seminar in chemistry. Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration.

Prerequisite(s): CHEM*4900
Restriction(s): Instructor consent required.
Department(s): Department of Chemistry

Computing and Information Science

Note: Credit may be obtained for 1 of CIS*1000 or CIS*1200. Students who major or minor in Computing and Information Science may not receive credit for the following courses unless taken to satisfy the requirements of another program: MATH*1050.

CIS*1000 Introduction to Computer Applications S,F,W (3-2) [0.50]
This course provides a survey of computer systems and software, including an introduction to computer programming, data organization and the social impact of computing. The course emphasizes application packages for personal and business use.
Offering(s): Offered through Distance Education format only.
Restriction(s): CIS*1200, Not available to students registered in BASC:AHN, BCOMP degree or a CIS minor.
Department(s): School of Computer Science

CIS*1200 Introduction to Computing F,W (3-2) [0.50]
This course covers an introduction to computer hardware and software, data organization, problem-solving and programming. The course includes exposure to application packages for personal and business use and is intended for students who wish to balance between programming and the use of software packages.
Offering(s): Offered through Distance Education format only.
Restriction(s): CIS*1000 Not available to students registered in a BCOMP degree or a CIS minor.
Department(s): School of Computer Science

CIS*1300 Programming F (3-2) [0.50]
This course examines the applied and conceptual aspects of programming. Topics may include data and control structures, program design, problem solving and algorithm design, operating systems concepts, and fundamental programming skills. This course is intended for students who plan to take later CIS courses. If your degree does not require further CIS courses consider CIS*1500 Introduction to Programming.
Restriction(s): CIS*1500 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): School of Computer Science

CIS*1250 Software Design I F (3-2) [0.50]
This is an introductory course which involves a general overview of design and problem solving as it is practiced in different disciplines. The course will include an examination of the qualities of software as the end product of the design process. It will include a study of the pervasiveness of software, and the platform specific considerations. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.
Restriction(s): Restricted to students in BCOMP:CS and BCOMP:CS:C with 2.50 or fewer credits and to students in BCOMP:SENG and BCOMP:SENG:C.
Department(s): School of Computer Science

CIS*1500 Introduction to Programming F,W (3-1) [0.50]
This course introduces problem-solving, programming and data organization techniques required for applications using a general purpose programming language. Topics include control structures, data representation and manipulation, program logic, development and testing. This course is intended for students who do not intend to enrol in further CIS courses. If your degree requires further CIS courses, CIS*1300, is required.
Offering(s): Also offered through Distance Education format.
Restriction(s): CIS*1300 Not available to students registered in a BCOMP degree, a CIS minor, BEENG:CENG or BEENG:ESC.
Department(s): School of Computer Science

CIS*1910 Discrete Structures in Computing I F (3-2) [0.50]
This course is an introduction to discrete structures and formal methodologies used in computer science, including Boolean, algebra, propositional logic, predicate logic, proof techniques, set theory, equivalence relations, order relations, and functions.
Department(s): School of Computer Science

CIS*2030 Structure and Application of Microcomputers F (3-3) [0.50]
This course examines the components of a computer system, including memories, CPU, buses, and input/output subsystems and interface hardware. Programming of these systems is studied, including instruction sets, addressing modes, assembly/machine language programming, development of algorithms for data acquisition, display, and process control.
Prerequisite(s): CIS*1910, CIS*2500
Department(s): School of Computer Science

CIS*2050 Computers and Society S (3-0) [0.50]
Students in this course will investigate and study the social impacts of computing technology. The course will provide a brief introduction to ethics and the history of computing and the Internet. Additional content will focus on areas in which computers and information technology are having an impact on individuals and society including privacy, safety, freedom of speech, intellectual property, work, distribution of wealth, and the environment. This course is intended for students in any discipline.
Offering(s): Last offering - Summer 2019 Offered through Distance Education format only.
Restriction(s): CIS*3000 This course may not be taken for credit by students in the BCOMP:SENG majors.
Department(s): School of Computer Science

CIS*2170 User Interface Design W (3-2) [0.75]
This course is a practical introduction to the area of user interface construction. Topics include user interface components and their application, best practices for user interface design, approaches to prototyping, and techniques for assessing interface suitability.
Prerequisite(s): 1 of CIS*1200, CIS*1300, CIS*1500
Department(s): School of Computer Science

CIS*2250 Software Design II W (3-2) [0.50]
This course focuses on the process of software design. Best practices for code development and review will be examined. The software development process and tools to support this will be studied along with methods for project management. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.
Prerequisite(s): CIS*1250, CIS*1300
Restriction(s): Restricted to BCOMP:SENG majors.
Department(s): School of Computer Science

CIS*2430 Object Oriented Programming F (3-2) [0.50]
This course introduces the Object Oriented (OO) approach to programming and algorithm design. Topics will include the creation and use of objects from class libraries, user defined objects, inheritance, modularity, generic code, components, collections and containers, and an introduction to OO design methodologies.
Prerequisite(s): CIS*2500
Department(s): School of Computer Science

CIS*2460 Modelling of Computer Systems F (3-2) [0.50]
This course examines discrete simulation based on event queues and random number generation. Methods for generating input data, measuring and evaluating results using standard statistical tests are studied. Topics covered will include model calibration and validation, and algebraic, probabilistic and simple queueing models of software and hardware operation.
Prerequisite(s): CIS*2500, STAT*2040
Department(s): School of Computer Science

CIS*2500 Intermediate Programming W (3-2) [0.50]
In this course students learn to interpret a program specification and implement it as reliable code, as they gain experience with pointers, complex data types, important algorithms, intermediate tools and techniques in problem solving, programming, and program testing.
Prerequisite(s): CIS*1300
Department(s): School of Computer Science

CIS*2520 Data Structures F (3-2) [0.50]
This course is a study of basic data structures, such as lists, stacks, queues, trees, and tables. Topics which will be examined include abstract data types, sequential and linked representations, and an introduction to algorithm analysis; various traversal, search, insertion, removal, and sorting algorithms.
Prerequisite(s): CIS*2500, (1 of CIS*1910, ENGG*1500, MATH*2000)
Department(s): School of Computer Science

<tbody>
<tr>
<td><strong>CIS*2750 Software Systems Development and Integration W (3-2) [0.75]</strong></td>
<td>This course introduces techniques and tools used in the development of large software systems. Students learn methods for organizing and constructing modular systems, manipulating files, introductory interface design, and use of databases. Software tools for managing projects, database connectivity, configuration management, and system application programmer interfaces are also covered.</td>
<td>School of Computer Science</td>
<td>CIS<em>2430, CIS</em>2520</td>
</tr>
<tr>
<td><strong>CIS*2910 Discrete Structures in Computing II W (3-2) [0.50]</strong></td>
<td>This course is a further introduction to discrete structures and formal methodologies used in computer science, including sequences, summations, recursion, combinatorics, discrete probability, and graph theory.</td>
<td>School of Computer Science</td>
<td>CIS<em>1300, (CIS</em>1910 or ENGG*1500)</td>
</tr>
<tr>
<td><strong>CIS*3050 Systems Programming F (3-1) [0.50]</strong></td>
<td>This course will familiarize students with system level interface tools and their common applications. The purpose, function, design and use of these tools will be explored, allowing students to determine where and when these tools are useful in software development projects. Tools examined in the course include loadable libraries, file system locking, signals, pipes, asynchronous reading/writing to files and memory, file system sockets, shared memory models, and hardware device properties and control.</td>
<td>School of Computer Science</td>
<td>CIS*3110</td>
</tr>
<tr>
<td><strong>CIS*3090 Parallel Programming F (3-1) [0.50]</strong></td>
<td>This course examines the current techniques for design and development of parallel programs targeted for platforms ranging from multicore computers to high-performance clusters, with and without shared memory. It includes theoretical models for, and hardware effects on, parallel computation, the definitions of speedup, scalability, and data- versus task-parallel approaches. The course will also examine strategies for achieving speedup based on controlling granularity, resource contention, idle time, threading overhead, work allocation, and data localization.</td>
<td>School of Computer Science</td>
<td>(CIS<em>2030 or ENGG</em>3640), CIS*3110</td>
</tr>
<tr>
<td><strong>CIS*3110 Operating Systems I W (3-1) [0.50]</strong></td>
<td>This course covers operating systems in theory and practice by focusing on the components in a system: scheduling, resource allocation, process management, multi-programming, multi-tasking, I/O control, file systems, and mechanisms for client-server computing using examples from contemporary operating systems.</td>
<td>School of Computer Science</td>
<td>CIS<em>2520, (CIS</em>2030 or ENGG*2410)</td>
</tr>
<tr>
<td><strong>CIS*3120 Digital Systems I W (3-2) [0.50]</strong></td>
<td>This course examines Boolean algebra, minimization of Boolean expressions, design of combinational and sequential logic circuits, memory design, control, ALU, bus design, microprogramming and CPU design.</td>
<td>School of Computer Science</td>
<td>CIS<em>1910, CIS</em>2500</td>
</tr>
<tr>
<td><strong>CIS*3150 Theory of Computation F (3-0) [0.50]</strong></td>
<td>This course explores the theory of computation including automata theory, Turing machines and their variants, formal languages, parsing, the Halting problem, undecidability, and NP-completeness.</td>
<td>School of Computer Science</td>
<td>CIS<em>2750, CIS</em>3490</td>
</tr>
<tr>
<td><strong>CIS*3190 Software for Legacy Systems W (0-0) [0.50]</strong></td>
<td>This course is an introduction to legacy software systems used in business, manufacturing, and engineering. Topics include COBOL programming, mainframe systems, and integration of legacy systems with contemporary computing systems.</td>
<td>School of Computer Science</td>
<td></td>
</tr>
<tr>
<td><strong>CIS*3210 Computer Networks F (3-1) [0.50]</strong></td>
<td>This course covers the high-level (protocol) oriented aspects of computer networks, specifically: application, session, transport and network layers. It includes the Internet, socket-level programming, multimedia and quality of service issues. The hardware aspects (switches, LANs, modems, transmission paths) are only covered at a functional level.</td>
<td>School of Computer Science</td>
<td>CIS*3110</td>
</tr>
<tr>
<td><strong>CIS*3250 Software Design III F (3-3) [0.50]</strong></td>
<td>This course will examine the historical development of design methodologies and working with legacy systems. It will include an examination of programming paradigms and trends in software design from the past and present. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.</td>
<td>School of Computer Science</td>
<td>CIS<em>2250, CIS</em>2500</td>
</tr>
<tr>
<td><strong>CIS*3260 Software Design IV F (3-3) [0.50]</strong></td>
<td>This course is a study of software architectures and system design methodologies. This will include advanced techniques for project management and experience evaluating software tools. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.</td>
<td>School of Computer Science</td>
<td></td>
</tr>
<tr>
<td><strong>CIS*3490 The Analysis and Design of Computer Algorithms W (3-2) [0.50]</strong></td>
<td>The design and analysis of efficient computer algorithms are studied. Topics which will be studied include: standard methodologies, asymptotic behaviour, optimality, lower bounds, implementation considerations, graph algorithms, matrix computations (e.g. Strassen's method), NP-completeness.</td>
<td>School of Computer Science</td>
<td>(CIS<em>1910 or (CIS</em>2910 and ENGG<em>1500)), CIS</em>2520</td>
</tr>
<tr>
<td><strong>CIS*3550 Data Base Systems and Concepts F (3-1) [0.50]</strong></td>
<td>This course is a study of data organization and data management principles with the perspective of analyzing applications suitable for implementation using a DBMS. This will include an analysis of several data base models, query specification methods, and query processing techniques. Overview of several related issues including concurrency control, security, integrity and recovery. Students will demonstrate concepts through project assignments.</td>
<td>School of Computer Science</td>
<td>CIS*2520</td>
</tr>
<tr>
<td><strong>CIS*3700 Introduction to Intelligent Systems W (3-1) [0.50]</strong></td>
<td>This course covers the core topics of Artificial Intelligence, namely: agents and environment, search, knowledge representation, reasoning, and learning. The last three topics are covered using logic as the common formalism for coherence. The course introduces a broad range of basic concepts, terminology, and applications, in addition to providing some specific, widely applicable methodologies.</td>
<td>School of Computer Science</td>
<td>(CIS<em>3750 or CIS</em>3760), (CIS<em>2460 or STAT</em>2040)</td>
</tr>
<tr>
<td><strong>CIS*3750 System Analysis and Design in Applications F,W (3-2) [0.75]</strong></td>
<td>This course is an introduction to the issues and techniques encountered in the design and construction of software systems, focusing on the theory and models of software evolution. Topics include requirements and specifications, prototyping, design principles, object-oriented analysis and design, standards, integration, risk analysis, testing and debugging.</td>
<td>School of Computer Science</td>
<td>CIS*2750</td>
</tr>
<tr>
<td><strong>CIS*3760 Software Engineering F,W (3-2) [0.75]</strong></td>
<td>This course is an examination of the software engineering process, the production of reliable systems and techniques for the design and development of complex software. Topics include object-oriented analysis, design modeling, software architectures, software reviews, software quality, software engineering, ethics, maintenance and formal specifications.</td>
<td>School of Computer Science</td>
<td>CIS*3750</td>
</tr>
<tr>
<td><strong>CIS*4010 Cloud Computing W (3-0) [0.50]</strong></td>
<td>This course introduces students to fundamentals of cloud computing and software development for cloud platforms. It covers topics such as virtualization, architecture of cloud systems, programming for the cloud, resource management, as well as privacy and security issues.</td>
<td>School of Computer Science</td>
<td>CIS*3110</td>

Last Revision: July 4, 2019

2019-2020 Undergraduate Calendar
### Crop Science

#### CROP*3300 Grain Crops W (3-0) [0.50]
Management strategies and world production of the major temperate grain crops are studied relative to their botanical and physiological characteristics and to available environmental resources. The utilization of grain crops for human food, livestock feed, and various industrial products are examined.

**Prerequisite(s):** AGR*2050 or AGR*2470  
**Department(s):** Department of Plant Agriculture

#### CROP*3310 Protein and Oilseed Crops F (3-0) [0.50]
Management strategies and world production of the major temperate protein and oilseed crops are studied relative to their botanical and physiological characteristics and to available environmental resources. The utilization of protein and oilseed crops for human food, livestock feed and various industrial products are examined.

**Prerequisite(s):** AGR*2050 or AGR*2470  
**Department(s):** Department of Plant Agriculture

#### CROP*3340 Managed Grasslands F (3-2) [0.50]
Managed forage grasses and legumes provide grazing, cover crops, conserved feed, and a wider range of services to the environment and society at large. Agro-ecological, genetic, and managerial considerations will be integrated toward addressing questions of ruminant and equine production and environmental management. Forage species will be distinguished morphologically and physiologically, focusing on adaptation to climatic, edaphic, and managerial constraints and applications for horses, including weed and poisonous plant risks. Topics will include: sward lifespan, establishment and maintenance practices, forage quality indices, integration of harvest management for pastures and stored feed, and environmental implications for plant and animal biodiversity and water quality.

**Prerequisite(s):** 1 of AGR*2050, AGR*2320, AGR*2470, ENVS*2060  
**Department(s):** Department of Plant Agriculture

#### CROP*4220 Cropping Systems W (3-0) [0.50]
This course will cover the design of cropping systems for specific livestock, poultry and cash crop enterprises; integration of all factors affecting crop yields, quality and economy of production such as choice and interchangeability of crops, crop sequence, tillage, pest control, seasonal work programming, harvesting, drying and storage.

**Prerequisite(s):** (1 of CROP*3300, CROP*3310, CROP*3340), (1 of AGR*2320, ENVS*3080, ENVS*4090, ENVS*4160)  
**Department(s):** Department of Plant Agriculture

#### CROP*4240 Weed Science F (3-3) [0.50]
Weeds will be studied in relation to agricultural practices. Principles of chemical, mechanical and biological control will be outlined. Laboratories will include weed identification, weed control methods, and demonstrations of the effects of various herbicides.

**Prerequisite(s):** AGR*2470  
**Department(s):** Department of Plant Agriculture

#### CROP*4260 Crop Science Field Trip F (0-4) [0.50]
This field study course is designed to increase the student's knowledge of agricultural production, agricultural policy and agri-business. Students will tour the midwestern United States just prior to the start of the fall semester, visiting cash crop, horticultural and livestock farms, and supporting industries such as processing, manufacturing, elevators and stockyards. A student fee will be assessed to cover transportation and lodging.

**Prerequisite(s):** 12.50 credits including AGR*2470  
**Restriction(s):** A cumulative average of 65%. Instructor consent required.  
**Department(s):** Department of Plant Agriculture
Economics

Department of Economics and Finance

For courses without semester designations, please check with the department. Advance schedules are available in the department.

ECON*1050 Introductory Microeconomics S,F,W (3-0) [0.50]

An introduction to the Canadian economy: price determination, market structure and resource allocation; the behaviour of consumers and firms; market intervention by government. Some of the economic issues addressed may include agricultural price supports, rent control, the NAFTA, environmental regulation, price discrimination, pay equity, and taxation.

Offering(s): Also offered through Distance Education format.
Equate(s): ECON*1200
Department(s): Department of Economics and Finance

ECON*1100 Introductory Macroeconomics S,F,W (3-0) [0.50]

This course looks at the Canadian Economy in terms of aggregate performance and policy: analysis of the determinants of national income, employment and the price level, and the role of government monetary and fiscal policies in improving the rate of economic growth.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Economics and Finance

ECON*2100 Economic Growth and Environmental Quality F (3-0) [0.50]

This course examines the implications of economic growth on the quality of the environment, employing the basic principles of economic analysis.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): ECON*1050 or FARE*1040
Department(s): Department of Economics and Finance

ECON*2310 Intermediate Microeconomics S,F,W (3-0) [0.50]

This course is an analysis of the behaviour of households and firms under alternative assumptions and market conditions.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): (ECON*1050 or FARE*1040), (1 of IPS*1500, MATH*1030, MATH*1080, MATH*1200)
Department(s): Department of Economics and Finance

ECON*2410 Intermediate Macroeconomics S,F,W (3-0) [0.50]

This course is an analysis of open as well as closed economy models of aggregate spending, output, employment, prices and interest rates under alternative assumptions about the nature of labour, product and financial markets. This includes theories of consumption, investment and money demand.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): ECON*1100, (1 of IPS*1500, MATH*1030, MATH*1080, MATH*1200)
Department(s): Department of Economics and Finance

ECON*2420 Canadian Economic History W (3-0) [0.50]

This course surveys the development of the Canadian economy from the aboriginal economy to the early fur and fish trades, agricultural settlement, industrialization, the Great Depression, growth of the public sector and fast economic growth after World War Two. Particular attention is paid to international economic relations and to regional differences within Canada.

Prerequisite(s): ECON*1050, (ECON*1100 or HIST*2450)
Department(s): Department of Economics and Finance

ECON*2560 Introduction to Finance F,W (3-0) [0.50]

This course introduces students to the economic experience of developing countries, the ways in which economists try to understand it, and the implications for policy. The basic tools of economic analysis as taught in the introductory courses are used to analyze topics that may include theories of growth, trade, education, foreign investment, exchange rates, labour markets, the role of government, environmental sustainability and strategies related to agriculture, population, industry and investment.

Prerequisite(s): ECON*1050, ECON*1100
Department(s): Department of Economics and Finance

ECON*2720 Business History W (3-0) [0.50]

This course surveys the evolution of economic activity and organization from before the industrial revolution to the present. Particular attention is given to the changing relationship between technology and business organization, the shift from proprietorship to corporations and the rise of multinational enterprise. Other topics may include the relationship between business and government, the role of the entrepreneur in the process of technical change and the evolution of work patterns and standards of living.

Prerequisite(s): ECON*1050, (ECON*1100 or any 1.50 credits in history)
Department(s): Department of Economics and Finance

ECON*2740 Economic Statistics F,W (3-1) [0.50]

This course is designed to prepare students conceptually and mathematically for ECON*2560, Theory of Finance and ECON*3740, Introduction to Econometrics. Topics include the summation operator, descriptive statistics, frequency distributions, probability and statistical independence, the binomial distribution, algebra of the expectation operator, discrete bivariate distributions, covariance, variance, a linear function of random variables, the normal and t distributions, sampling distributions, point and interval estimation, hypothesis testing and an introduction to ordinary least squares. Additional topics may be included at the instructor's discretion. Examples and assignment questions are drawn from economics and finance.

Prerequisite(s): ECON*1100, (ECON*1050, or FARE*1040), (1 of MATH*1000, MATH*1030, MATH*1080, MATH*1200)
Department(s): Department of Economics and Finance

ECON*2770 Introductory Mathematical Economics F,W (3-0) [0.50]

This course applies the elements of calculus and matrix algebra to simple microeconomic and macroeconomic problems.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): ECON*1100, (ECON*1050, or FARE*1040), (1 of MATH*1030, MATH*1080, MATH*1200)
Department(s): Department of Economics and Finance

ECON*3100 Game Theory W (4-0) [0.50]

The course introduces students to non-cooperative game theory, which is an important method of analysis for economics situations involving small numbers of interacting economic agents. The course is centered on the concept of Nash equilibrium, and applies this equilibrium concept to static and dynamic games with full as well as incomplete information. The purpose of the course is to enable students to take any economic situation, find an economic model (game) that depicts the incentives facing the participants, and analyze the game to predict the behaviour of the economic agents.

Prerequisite(s): ECON*2310, ECON*2410, (ECON*2770 or MATH*1210)
Restriction(s): ECON*3770
Department(s): Department of Economics and Finance

ECON*3300 Economics of Health and the Workplace U (3-0) [0.50]

This course will introduce students to concepts of health economics with particular relevance to workplace issues. Topics to be covered include the determinants of health, the demand for and supply of health care, the market for health care providers, health insurance, public and private, the role of health insurance in the labour market, whether not having to provide comprehensive health insurance to their workers gives Canadian firms an edge over their American competitors, workplace health risks and their effects on working conditions and salaries, workplace wellness programs and their evaluation, and the analysis of the cost effectiveness of health interventions.

Prerequisite(s): ECON*2310, (1 of ECON*2740, PSYC*2010, STAT*2040, STAT*2060, STAT*2080, STAT*2120)
Department(s): Department of Economics and Finance
ECON*3360 The Strategy of Mergers and Acquisitions F (3-0) [0.50]
As changes occur in product markets, public policy, and technology, the scope and scale required for companies to be competitive often changes as well. This course examines the role of mergers and acquisitions (M&A) in repositioning companies to remain competitive, to grow, or to exit. The course also examines how M&A can create value across a range of company types and situations. A means of assessment of M&A success or failure is provided and the course outlines the processes and skills required for successful M&A strategies, relevant to executives and supporting professional services in most industries today.
Prerequisite(s): ECON*2310, ECON*2410, ECON*2560
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*3400 The Economics of Personnel Management U (3-0) [0.50]
In this course, we examine the economics of personnel management in organizations. Using mainstream microeconomic and behavioural economic theory, we will consider such issues as recruitment, promotion, financial and non-financial incentives, compensation, job performance, performance evaluation, and investment in personnel. The interplay between theoretical models and empirical evidence will be emphasized in considering different approaches to the management of personnel.
Prerequisite(s): ECON*2310 or ECON*2200
Department(s): Department of Economics and Finance

ECON*3500 Urban Economics W (3-0) [0.50]
Land is a scarce resource and is an input into production and consumption. Transportation costs are important and the structure of a city has real effects on the economic and social activities that occur in it. This course discusses how the price of a good varies by location, how the market price of a property varies over time, and how the structure of cities responds to market forces. The course discusses some public policy and managerial implications of the location dimension.
Prerequisite(s): ECON*2310
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*3520 Labour Economics F (3-0) [0.50]
A study of the labour market, wage determination and the relationship between wages, employment, and prices.
Prerequisite(s): ECON*2310, (1 of ECON*2740, PSYC*2010 , STAT*2040, STAT*2050, STAT*2060, STAT*2080, STAT*2090, STAT*2100 , STAT*2120)
Department(s): Department of Economics and Finance

ECON*3530 Industrial Organization F (3-0) [0.50]
This course examines industries in which firms have the potential to exercise market power. Topics include how the competitive environment affects the behaviour of firms, measuring the extent of market power on welfare. The performance of markets under monopolies, dominant firms, cartels and oligopolies is examined and related aspects of Canadian competition policy and regulations are discussed.
Prerequisite(s): ECON*2310, (ECON*2770 or MATH*1210)
Department(s): Department of Economics and Finance

ECON*3580 Economics of Regulation U (3-0) [0.50]
A study of the economic reasons for government intervention in the marketplace. Emphasis will be placed on the role of crown corporations, regulatory agencies, regulation rules and public sector price-setting in the Canadian economy.
Prerequisite(s): ECON*2310
Department(s): Department of Economics and Finance

ECON*3610 Public Economics W (3-0) [0.50]
This course examines the interventionist role of government in the economy. It examines several sources of market failure which are used to justify government intervention. These include public goods, externalities and redistribution. The course also evaluates alternative sources of government revenue from the perspectives of both equity and efficiency. These include the personal and corporate income taxes, sales taxes and wealth taxes.
Prerequisite(s): ECON*2310
Department(s): Department of Economics and Finance

ECON*3620 International Trade U (3-0) [0.50]
An introduction to the general equilibrium analysis of international trade, international factor movements and commercial policy. Special emphasis is given to Canada's international trade relationships.
Prerequisite(s): ECON*2310
Department(s): Department of Economics and Finance

ECON*3660 Investments F,W (3-0) [0.50]
This course provides an in-depth analysis of the theory, application and evidence of financial investments with particular emphasis on the stock market. The course reviews issues relating to the valuation of financial assets, and then focuses on two main themes: building optimal domestic and international portfolios through dynamic asset allocation, and assessing the risk-return relation in the cross-section of stocks.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): ECON*2310, ECON*2560
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*3710 Advanced Microeconomics F,W (4-0) [0.50]
This course provides an in-depth treatment of consumer and producer theory leading to the general equilibrium model of the economy and the study of welfare economics.
Prerequisite(s): ECON*2310, (ECON*2770 or MATH*1210). A grade average of 70% or more in these courses is recommended.
Department(s): Department of Economics and Finance

ECON*3730 The Origins of International Inequality W (3-0) [0.50]
This course surveys the world economy with a particular focus on the industrial revolution, demographic change, the rise to prominence of ‘settler colonies’, globalization and the origins of international inequality.
Prerequisite(s): 9.00 credits including ECON*1050, ECON*1100
Department(s): Department of Economics and Finance

ECON*3740 Introduction to Econometrics F,W (3-1) [0.50]
This computer-based course involves the specification and estimation of economic models and the testing of economic hypotheses using appropriate test statistics. Topics include the summation operator, expectation operator, ordinary least squares estimation, dummy variables, seasonality, multicollinearity, heteroskedasticity, autocorrelation, data sources (including uses of the Data Resource Centre). Additional topics may be included at the instructor's discretion. Heavy emphasis will be placed on applications and writing up results. Some use of spreadsheet software (e.g. QuattroPro, Excel) and statistical software (e.g. TSP, SHAZAM) will be required.
Prerequisite(s): ECON*2310, ECON*2410, ( 1 of ECON*2740, STAT*2040, STAT*2060, STAT*2080, (ECON*2770 or MATH*1210)
Department(s): Department of Economics and Finance

ECON*3760 Fundamentals of Derivatives W (3-0) [0.50]
This course provides an introduction to the theory, application and evidence of financial derivatives. It covers the theory and application of forward contract, futures, options, and swaps, and explains how these instruments can be used for purposes such as investment, hedging risk, arbitrage and speculation.
Prerequisite(s): ECON*2310, ECON*2560
Restriction(s): AGEC*4240 , FARE*4240 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*3810 Advanced Macroeconomics W (4-0) [0.50]
This course provides an advanced study of a wide range of issues in intertemporal macroeconomics. When constructing macroeconomic models in this course we will explicitly take into account microeconomic foundations. The models constructed will be used to study short-run fluctuations (or business cycles) and long term growth, and to explain cross country income disparities. Topics also include open economy macroeconomic issues.
Prerequisite(s): ECON*2410, (ECON*2740 or STAT*2040), (ECON*2770 or MATH*1210)
Department(s): Department of Economics and Finance
ECON*3960 Money, Credit and the Financial System W (3-0) [0.50]
This course explores the economics of banking, other financial institutions and credit markets.
Prerequisite(s): ECON*2410, ECON*2560
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*3960 Money, Credit and the Financial System W (3-0) [0.50]
This course explores the economics of banking, other financial institutions and credit markets.
Prerequisite(s): ECON*2410, ECON*2560
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*4400 Managerial Economics W (3-0) [0.50]
This course introduces students to the latest developments in the economic analysis of the inside workings of firms. The course is centered on the concept of organizational structure, which is made up of three variables: allocation of decision rights, performance evaluation and performance incentives. The course tries to explain the diversity of economic organizations, and more generally, why economic activity is sometimes carried out through firms and sometimes through markets.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): ECON*2310 Students must have completed a minimum of 12 credits.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*4550 Topics in Urban Economics U (3-0) [0.50]
This course will investigate selected theoretical and applied topics in urban economics in depth. Among topics which might be treated are location theory, the theory of spatial structure, transportation economics, the economics of housing, the economics of land use regulation, urban public finance.
Prerequisite(s): ECON*3740, (ECON*3710 or ECON*3500)
Department(s): Department of Economics and Finance

ECON*4560 Advanced Topics in Finance W (3-0) [0.50]
This course will examine selected advanced topics in finance, such as optimal capital structure under asymmetric information; theoretical and empirical analysis of mergers and acquisitions; asset pricing theory; pricing derivative securities; and financial econometrics.
Prerequisite(s): ECON*2560, ECON*3710, (1 of ECON*3100, ECON*3810, ECON*4700, ECON*3740, (2 of ECON*3660, ECON*3660, ECON*3760, FARE*4240, ECON*3860, ECON*3960)
Department(s): Department of Economics and Finance

ECON*4640 Advanced Econometrics F (3-0) [0.50]
This course discusses the classical linear regression model and its extensions including generalized least squares and the theory and application of F tests. The maximum likelihood principle is introduced, as are alternative approaches to testing, e.g. LM, LR and Wald tests. Additional topics may be included at the instructor's discretion. Matrix algebra is used and proof of the Gauss-Markov theorem is included, but discussion of proofs is in general limited in order to allow substantial applications to data using statistical software such as TSP, SHAZAM, SAS, STATA.
Prerequisite(s): ECON*3740
Department(s): Department of Economics and Finance

ECON*4660 Risk Management in Finance and Insurance U (3-0) [0.50]
This course covers the advanced theory and applications of derivatives (for underlying assets such as equity and debt instruments, real assets and exchange rate instruments) and insurance in managing risk.
Prerequisite(s): ECON*3710, (1 of ECON*3650, ECON*3660, ECON*3760, ECON*3860, ECON*3960, FARE*4240)
Department(s): Department of Economics and Finance

ECON*4700 Advanced Mathematical Economics F (3-1) [0.50]
This course provides students with the necessary mathematical skills required to build rigorous models in economics, including differential and integral calculus, optimization and comparative statics analysis and advanced topics in linear algebra. It continues in the second half with application to modelling in a particular area of economics. The specific area will vary from year to year, and can include such topics as general equilibrium modelling, mathematical finance models, or economics of the environment.
Prerequisite(s): ECON*3710, ECON*3740
Department(s): Department of Economics and Finance

ECON*4710 Advanced Topics in Microeconomics F (3-0) [0.50]
An intensive study of the scope, methodology, and content of contemporary microeconomics; selected topics in partial and general equilibrium analysis.
Prerequisite(s): ECON*3710
Department(s): Department of Economics and Finance

ECON*4720 Topics in Economic History U (3-0) [0.50]
This course uses economic theory to analyse the process of historical economic change.
Prerequisite(s): 12.50 credits including (1 of ECON*2310, ECON*2720, ECON*3720 , ECON*3730)
Department(s): Department of Economics and Finance

ECON*4750 Topics in Public Economics U (3-0) [0.50]
This course examines selected topics related to the expenditure and taxation functions of government. Topics may include issues in public good theory such as the free rider problem, the problem of eliciting truthful revelation of preferences and the use of taxes as a corrective device for externalities. The course may also address optimal taxation as well as tax evasion. Throughout this course the trade-off between efficiency and equity is emphasized.
Prerequisite(s): ECON*3710
Department(s): Department of Economics and Finance

ECON*4760 Topics in Monetary Economics U (3-0) [0.50]
Selected topics in monetary economics such as theories of the demand for and supply of money, the nature and role of private banks and central banks, the transmission processes of monetary policy are examined.
Prerequisite(s): ( ECON*3600 or ECON*3810), ECON*3740, (1 of ECON*3510 , ECON*3710, ECON*3960)
Department(s): Department of Economics and Finance

ECON*4780 Topics in Industrial Organization U (3-0) [0.50]
Selected topics in the theoretical and empirical study of the organization and performance of firms and markets are covered in this course. Topics may include: strategic behaviour of firms such as actions to deter entry of rivals, pre-emptive choice of location and product quality, and research and development; the regulation of firms under uncertainty; econometric analysis of the use of market power; and modern advances in the theory of the firm.
Prerequisite(s): ECON*3530, ECON*3740
Department(s): Department of Economics and Finance

ECON*4790 Topics in Labour Market Theory U (3-0) [0.50]
Selected topics in advanced labour market theory with emphasis on empirical evidence for the Canadian labour market are covered in this course.
Prerequisite(s): ECON*3740, (ECON*3710 or ECON*3520)
Department(s): Department of Economics and Finance

ECON*4800 Competitiveness and Strategic Advantage U (3-0) [0.50]
This course is about the creation and maintenance of long-term vision for the corporation from the perspective of the general manager. It is concerned with both the determination of strategic direction and the management of the strategic process.
Prerequisite(s): 14.50 credits including ( BUS*3320 or MGMT*3320), ECON*2310, ECON*2560
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

Environmental Design and Rural Development

School of Environmental Design and Rural Development

EDRD*1400 Introduction to Design W (3-0) [0.50]
This course is designed to increase visual awareness and recognition of natural and planned design elements in the environment. Students will investigate the roles of designers and seek to develop an understanding of design as an applied process that responds to human needs.
Department(s): School of Environmental Design and Rural Development

EDRD*2020 Interpersonal Communication F (3-0) [0.50]
This course introduces to dyadic and small-group communication. The focus is on communication style and effectiveness with attention to verbal and nonverbal communication, listening, behaviour, and conflict.
Offering(s): Offered through Distance Education format only.
Department(s): School of Environmental Design and Rural Development

EDRD*2250 Planning Theory and Practice F (3-0) [0.50]
The course links the body of planning theory to the Canadian experience of local planning practice. It provides an introduction to the issues of planning in the public realm and its role in implementation of the development of municipalities through both growth as well as decline. This is achieved by examining planning theory and reflecting on the context and process of planning in practice in Canada. The student in the course will come to understand both the role of theory in guiding practice as well as the role of practice in evolution of theory. This understanding is critical to the role of the professional planner in facilitating local development and managing change in the public interest.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 2.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*2650 Introduction to Planning and Environmental Law F,W (3-0) [0.50]
The goal of the course is to introduce the students to the principles and processes that govern the management of land use and the protection of the environment. This will be done through an examination of the key legislation and regulations applied to land use and the environment.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*3050 Agricultural Communication I F (3-0) [0.50]
Practical and effective ways of communicating information to a broad audience via the media, focusing mainly on print media (newspapers and magazines) and agricultural media. Strong emphasis on writing and preparing ready-to-use material and strategies for getting it published. (Students will develop an understanding of the news/communications business and find where they can fit into it or use it to their advantage to get a job. Contact with professionals will be a major part of the course).
Prerequisite(s): 10.00 credits
Equates(s): REXT*3050, REXT*4050
Department(s): School of Environmental Design and Rural Development

EDRD*3120 Educational Communication F (3-0) [0.50]
This course addresses the communication concepts and practices within the formal and non-formal educational contexts. Communication is central to teaching and learning because communication mediates a conscious effort either on the part of the learners to learn, or on the part of the teachers to provide and transfer knowledge, attitudes and skills.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Restriction(s): REXT*3100
Department(s): School of Environmental Design and Rural Development

EDRD*3140 Organizational Communication W (3-0) [0.50]
This course explores the application of communication process theory to organizations with special emphasis on internal organizational processes experienced at individual, group and organizational levels. Students examine communication in different organizational contexts including civil society, government, business and transnational corporations.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Restriction(s): REXT*3040
Department(s): School of Environmental Design and Rural Development

EDRD*3160 International Communication W (3-0) [0.50]
This course examines the role of communication in global development. Emphasis is on the application of interpersonal, intercultural communications and the mass media in the development process.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Restriction(s): REXT*3060
Department(s): School of Environmental Design and Rural Development

EDRD*3400 Sustainable Communities W (2-1) [0.50]
The structure, function and trends affecting agri-food community settings including historical, ecological and social factors, institutions, agencies and change processes are discussed. The agricultural role of the Provincial Government and the contemporary impact of the agro-industrial complex on Ontario communities will be considered mainly from a comparative perspective. Related topics will include physical infrastructure, political conflicts, labour markets, settlement patterns, housing, gender relations, landscape management, quality of life, sustainability and the promotion of community leadership.
Prerequisite(s): 10.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*3450 Watershed Planning Practice F,W (3-0) [0.50]
An introduction to the principles and practice of watershed-based planning, with an emphasis on Ontario, but with reference to other parts of Canada, the U.S. and international contexts. History of water resource use and abuse, basic concepts of hydrology, water resource management, ecosystem approaches, and planning theory are also included.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Equates(s): UNIV*3400
Department(s): School of Environmental Design and Rural Development

EDRD*3500 Recreation and Tourism Planning F,W (3-0) [0.50]
Application of planning theory to recreation and tourism in the private and public sectors, approaches to implementing plans, and strategies for involving stakeholders in the planning process. Focus will also be on the impact of various approaches to planning recreation and tourism.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*4010 Tourism Planning in the Less Developed World W (3-0) [0.50]
This course will provide a discussion and investigation of tourism from an interdisciplinary point of view. The subject of tourism development cuts across many disciplines and is fundamental to a variety of scholars and practitioners working in tourism and development generally. While a variety of important theories and planning practices from a variety of disciplines have been selected for study, planning and community development theory will provide the overarching perspective. The features of planning theories and models stress analysis and intervention into human and environmental systems. This perspective begins with the view that tourism is a complicated human construct and as such needs to be structured and guided in order to maximize the benefits to all stakeholders in the system.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5 credits
Department(s): School of Environmental Design and Rural Development

EDRD*4020 Rural Extension in Change and Development F (3-0) [0.50]
The planning and management of development programs with emphasis on the role of non-formal education and counselling in influencing behavioral change and adoption of innovation. Case studies include cross cultural and international considerations.
Prerequisite(s): 10.00 credits
Equates(s): REXT*4020
Department(s): School of Environmental Design and Rural Development

EDRD*4600 Agricultural Communication II W (3-0) [0.50]
Application of practical and effective writing and communication techniques, mainly through the production of print publications and the further development and application of journalistic writing and editing skills. Special emphasis on issues important to the agri-food industry.
Prerequisite(s): 1 of EDRD*3050, REXT*3050, equivalent
Equates(s): REXT*4060
Department(s): School of Environmental Design and Rural Development

Department(s):

Restriction(s):

EDRD*4120 Leadership Development in Small Organizations F (3-0) [0.50]

The main theories of leadership will be discussed with exploration of the current literature, practice leadership skills and perform relevant activities in an on-line environment. Emphasis will be placed on the communication challenges facing leaders in small organizations and the importance of developing a culture of shared leadership.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Restriction(s): REXT*4100.
Department(s): School of Environmental Design and Rural Development
Engineering

School of Engineering

Students who are not registered in the B.Eng. degree program may take no more than 3.00 Engineering (ENGG*XXXX) credits.

Some ENGG* courses have priority access restrictions. Enrolment in these courses is restricted to students registered in BENG Degree program. All other students will require a waiver form to be signed by the BENG Program Counsellor.

ENGG*1070 Occupational Health and Safety F (2-0) [0.25]
This course presents the legal implications of occupational health and safety as expressed in the Environmental and Occupational Health and Safety Act, and exposes students to methodologies designed to ensure compliance with the Act. The course stresses safety initiatives and deals with specific safety issues such as noise levels, biosafety, hazardous waste management, safety in the workplace, radiation safety and industrial safety.

Restriction(s): Registration in the BENG Program

Department(s): School of Engineering

ENGG*1100 Engineering and Design I F (2-4) [0.75]
This course provides an introduction to engineering and design. An overview of design processes is covered and students experience a defined, open-ended design project. Physical design development is emphasized, supplemented by elements of analysis. Engineering communications emphasize the visual form and span engineering drawings across a spectrum of engineering disciplines (2D and 3D, realistic and symbolic). Sketching and computer aided tools are both developed. Written communications (individual and team) focus on design. The practice of professional engineering, ethical principles and the engineer’s role and obligations in society are all introduced. The coursework is team based to reflect the practice of engineering and the character of the School of Engineering.

Restriction(s): Registration in the BENG Program

Department(s): School of Engineering

ENGG*1210 Engineering Mechanics I W (3-2) [0.50]
This course presents the fundamental principles of Newtonian mechanics; distributed loading; free body diagrams; rigid body equilibrium; structural analysis; internal loading of structural members; friction; dynamics of particles; linear and angular momentum of rigid bodies; conservation of energy; principles of impulse and momentum, and plane motion of rigid bodies.

Prerequisite(s): MATH*1200, PHYS*1130

Department(s): School of Engineering

ENGG*1500 Engineering Analysis F,W (3-1) [0.50]
This course deals with engineering applications of matrix algebra, vector spaces and computer techniques to solve linear systems. Topics include theory and applications of linear transformations, eigenvalues and eigenvectors, diagonalization, complex-variable algebra, and multi-variable functions.

Restriction(s): MATH*1160, MATH*2150, MATH*2160

Department(s): School of Engineering

ENGG*2100 Engineering and Design II F,W (2-4) [0.75]
This course is a progression in engineering design skills with particular emphasis on computer usage in design, oral communication of solutions and team skills. Computer usage in design will include advanced CAD/CAM/CAE tools; and database management software. An introduction to safety in engineering practice and design, the practice of professional engineering, ethical principles and the engineer’s role and obligations in society are all introduced. The coursework is team based to reflect the practice of engineering and the character of the School of Engineering.

Prerequisite(s): Completion of 4.0 credits including ENGG*1100

Department(s): School of Engineering

ENGG*2120 Material Science F,W (3-2) [0.50]
Study of the mechanical, electrical, magnetic, optical and thermal properties of solids. Atomic order and disorder in solids, single-phase metals, and multiphase materials (their equilibria and micro-structure) are examined as a basis for understanding the causes of material properties. Interwoven throughout the course is an introduction to materials selection and design considerations.

Prerequisite(s): CHEM*1040, PHYS*1130

Department(s): School of Engineering

ENGG*2130 Introduction to Environmental Engineering F (1.5-3) [0.50]
This course introduces the field of environmental engineering, including minimizing the negative effects of human activities, responsible resource use and recovery, and remediation of soil, water and air pollution. Students will explore relevant ethical issues and as well as regulations and policies in diverse areas of environmental engineering. Skills development integrated throughout the course elements will emphasize writing, teamwork, the collaborative nature of the field, engineering tools used in environmental engineering, and data management and analysis.

Offering(s): First offering - Fall 2020

Prerequisite(s): ENGG*1210, ENGG*1500, 0.50 credits in calculus

Restriction(s): Registration in BENG.ENVE or BENG.ENVE:C.

Department(s): School of Engineering

ENGG*2160 Engineering Mechanics II F (3-1) [0.50]
Fundamental principles of the mechanics of deformable materials; stress and strain; Mohr's circle for transformation of stress and strain; deflection under load; design of beams, shafts, columns and pressure vessels; failure theory and design.

Prerequisite(s): ENGG*1210, ENGG*1500, 0.50 credits in calculus

Department(s): School of Engineering

ENGG*2180 Introduction to Manufacturing Processes W (3-2) [0.50]
This course is designed to provide students with an overview of a wide variety of manufacturing processes involved in industrial activities. While most of the manufacturing processes are to be introduced during the course, more emphasis will be given on those processes which are more common in industry, namely material removal processes, casting, and forming. In addition to introducing the various manufacturing process, mathematical models and several empirical data and equations describing the various manufacturing processes will be covered in order to provide the students with a better understanding of the relations between the parameters involved.

Prerequisite(s): ENGG*2160

Co-requisite(s): ENGG*2120

Department(s): School of Engineering

ENGG*2230 Fluid Mechanics F (3-2) [0.50]
Analysis of steady ideal and viscous fluid flow systems using the Continuity, Bernoulli and Momentum equations. Boundary layer theory is treated in terms of viscous and pressure drag, lift and its importance in heat and mass transfer. Dimensional analysis and dynamic similitude are studied to provide an understanding of flow systems analysis and modeling. Introduction to pipe flow and open channel flow.

Prerequisite(s): ENGG*1210, MATH*1210

Department(s): School of Engineering

ENGG*2340 Kinematics and Dynamics W (3-2) [0.50]
The course will cover kinematic and dynamic analysis including graphical and analytical methods for kinematic analysis of space, mechanisms and elementary body motion in space, static and dynamic force analyses of mechanisms, gyroscopic forces, dynamics of reciprocating and rotating machinery, cam and gear mechanisms and specifications.

Prerequisite(s): ENGG*1210

Department(s): School of Engineering

ENGG*2400 Engineering Systems Analysis F (3-1) [0.50]
Analytical description and modeling of engineering systems such as mechanical, electrical, thermal, hydraulic, biological and environmental systems. Applications of multivariable calculus, linear algebra and differential equations to simulate and analyse such systems.

Prerequisite(s): ENGG*1210, ENGG*1500, MATH*1210, MATH*1210, PHYS*1130

Department(s): School of Engineering

ENGG*2410 Digital Systems Design Using Descriptive Languages F (3-3) [0.50]
Review of Boolean algebra and truth tables, Karnaugh maps. Design, synthesis and realization of combinational circuits. Design, synthesis and realization of sequential circuits. VHDL: structural modeling, data flow modeling, synchronous & asynchronous behavior descriptions, algorithmic modeling. Designing with PLDs. Digital design with SM charts. Designing with PGAs and complex programmable logical devices. Hardware testing and design for testability. Hierarchy in large designs. The course will primarily be concerned with the design of multi-input, multi-output digital controllers which provide the central control signals that orchestrate the collection of hardware devices (from SSI to VLSI) found in a digital system. An introduction to FPGA-based, as well as microprocessor-based digital systems design will be given. Design examples will include systems such as UART, microcontroller CPU, ALU and data acquisition system.

Prerequisite(s): (CIS*1650 or CIS*1500), PHYS*1130

Department(s): School of Engineering
ENGG*2450 Electric Circuits W (3-2) [0.50]
This course explores the fundamentals of electric circuit analysis. Course topics include: lumped circuit abstraction; circuit elements and their characteristics; nodal and mesh analysis; linearity and superposition principles; fundamental circuit theorems; Thévenin and Norton equivalent circuits; introduction to the ideal operational amplifier and operational-amplifier circuits; dynamics of first and second order circuits including switched circuits; coupled inductors and transformers; alternate-current circuits and sinusoidal steady-state analysis with phasor methods.
Prerequisite(s): ENGG*2400, PHYS*1010
Department(s): School of Engineering

ENGG*2550 Water Management W (3-0) [0.50]
The influence of fundamental engineering and hydrologic principles on the choices available for management of water on a watershed basis is demonstrated for representative techniques used in management for water supply, irrigation, flood control, drainage and water pollution control. Selected problems are studies to reveal the technical, environmental, legal, jurisdiction, political, economic and social aspects of water management decisions.
Prerequisite(s): 5.00 credits including CHEM*1040
Department(s): School of Engineering

ENGG*2560 Environmental Engineering Systems W (3-2) [0.50]
Analysis techniques for natural and engineered systems including chemical, physical and biological processes. Mass balance analysis for steady state and unsteady state situations. Analysis under both equilibrium and non-equilibrium conditions. Reactor types including batch, plug-flow, CSTR. Noise pollution, control and prevention.
Prerequisite(s): CHEM*1050, MATH*2270
Department(s): School of Engineering

ENGG*2660 Biological Engineering Systems I W (3-1) [0.50]
This course deals with the mathematical description and identification of biological systems through: mass and energy balances; reactions in biological systems; and applications in biomedicine, food and bioprocessing.
Prerequisite(s): ENGG*2400, MATH*2270, (1 of BIOL*1070, BIOL*1080, BIOL*1090)
Department(s): School of Engineering

ENGG*3050 Embedded Reconfigurable Computing Systems F (3-2) [0.50]
This course introduces the students to the analysis, synthesis and design of embedded systems and the implementation of embedded systems using Field Programmable Gate Arrays. Topics include: review of digital design concepts; Programmable Logic Devices; Field Programmable Logic Devices; physical design automation (partitioning, placement and routing); Hardware Descriptive Languages: VHDL; Verilog; High Level Languages; Systems-C; Handle-C; Fixed Point and Floating Point Arithmetic; Hardware Accelerators; Reconfigurable Instruction Set Computers; Hardware Software Co-design techniques; Application of Field Programmable Logic in Embedded Systems.
Prerequisite(s): ENGG*2410, ENGG*3380
Department(s): School of Engineering

ENGG*3070 Integrated Manufacturing Systems F (3-2) [0.50]
Common production machines and manufacturing systems are dealt with, particularly automated systems, robotics, computer control and integration techniques, materials handling, inspection processes and process control. The course addresses societal and environmental issues related to manufacturing.
Prerequisite(s): ENGG*2120
Department(s): School of Engineering

ENGG*3080 Energy Resources & Technologies F (3-2) [0.50]
The challenges of changing the global energy system to reduce dependence on finite fossil energy sources, and transition to environmentally sustainable energy sources, are examined. The reserves, consumption, applications and environmental and human impacts of oil, coal and natural gas usage are examined. The fundamental principles, applications and status of a range of renewable energy sources and technologies will be covered to provide a solid background for further study of sustainable energy.
Co-requisite(s): ENGG*3260
Restriction(s): ENGG*2030
Department(s): School of Engineering

ENGG*3100 Engineering and Design III W (3-2) [0.75]
This course combines the knowledge gained in the advanced engineering and basic science courses with the design skills taught in ENGG*1100 and ENGG*2100 in solving open-ended problems. These problems are related to the student's major. Additional design tools are presented, including model simulation, sensitivity analysis, linear programming, knowledge-based systems and computer programming. Complementing these tools are discussions on writing and public speaking techniques, codes, safety issues, environmental assessment and professional management. These topics are taught with the consideration of available resources and cost.
Prerequisite(s): Registration in the BENG program and completion of 6.00 credits of ENGG courses including ENGG*2100
Restriction(s): Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*3120 Computer Aided Design and Manufacturing W (3-2) [0.75]
The course presents the elements of solid modelling, creation of parts of increasing complexity and the assembly of parts to form a final design, along with mechanism simulation. The operation and programming of CNC machines is covered.
Prerequisite(s): ENGG*2100, ENGG*3280
Department(s): School of Engineering

ENGG*3130 Modelling Complex Systems W (3-2) [0.50]
This course explores the application of systems thinking to complex global issues. Key topics will include: systems theory, complex adaptive systems, systems tools, and systems approaches. The course will emphasize the role of computational modelling and simulation as a central tool for applying systems thinking to real-world settings.
Prerequisite(s): CIS*1500, ENGG*2400, STAT*2120
Department(s): School of Engineering

ENGG*3140 Mechanical Vibration F (3-3) [0.50]
This course will provide students with an introduction to the fundamental concepts of vibration engineering using both single and multiple degrees of freedom concepts. The free and forced response of these systems will be covered. Emphasis will be placed on the design of vibration suppression and isolation of mechanical systems. Concepts of natural frequencies and mode shapes and their significance in the solution of multiple degrees of freedom problems will be covered. Vibration of rotating machinery, balancing, condition monitoring, and predictive vs. preventative maintenance philosophies will be introduced.
Prerequisite(s): ENGG*2340, MATH*2270
Department(s): School of Engineering

ENGG*3150 Engineering Biomechanics F (3-2) [0.50]
The following topics related to biomechanics are covered in this course: kinematic and kinetic analysis techniques; electromyography; current techniques in laboratory instrumentation and biomedical applications.
Prerequisite(s): 4.00 ENGG credits, including ENGG*1210
Department(s): School of Engineering

ENGG*3160 Biological Engineering Systems II F (3-2) [0.50]
Mass transfer in biological systems: concepts; gas-liquid mass transfer; membrane transport processes; and heterogeneous reactions. Applications may include fermenter aeration, tissue perfusion, mass transfer limitations in biofilms, microbial flocs and solid tumours, protein recovery and drug delivery.
Prerequisite(s): ENGG*2230, ENGG*2660
Department(s): School of Engineering

ENGG*3170 Biomaterials W (3-2) [0.50]
Physical properties of natural and synthetic (e.g. stainless steel, polymers) materials used in biological engineering applications are presented in this course. Topics will include microstructure and mechanical properties of typical biomaterials, quantification of advanced material properties and behaviours, fabrication, compatibility, biodegradation and mechanical failure. Typical applications will include processing of biomaterials as well as equipment and implant design.
Prerequisite(s): ENGG*2120
Department(s): School of Engineering
ENGG*3180 Air Quality F (3-2) [0.50]

Prerequisite(s): ENGG*2230, (ENGG*2560 or ENGG*2660)
Co-requisite(s): ENGG*3260
Department(s): School of Engineering

ENGG*3190 Logic Synthesis W (3-2) [0.50]

This course presents automatic logic synthesis techniques for computer-aided design (CAD) of very large scale integrated (VLSI) circuits and systems. Topics covered are: two-level Boolean network optimization, multi-level Boolean network optimization, technology mapping for library-based designs and field-programmable gate-array (FPGA) designs, and state-assignment and re-timing for sequential circuits. The course will also cover various representations of Boolean functions such as binary decision diagrams (BDDs) and discuss their applications to logic synthesis.

Prerequisite(s): ENGG*2410
Department(s): School of Engineering

ENGG*3210 Communication Systems W (3-2) [0.50]

This course is an introduction to the fundamentals of data communication and computer networking. The data communication basics will cover signal transmission and signal encoding techniques such as: multiplexing techniques, signaling, encoding and decoding, error detection and recovery, switching window techniques. Computer networking basics will cover: communication network components and topologies, multiple access design issues and performance analysis, switching, routing, services and applications, and security. The course will also cover the mathematical tools (Fourier transform, etc.) used in signal analysis.

Prerequisite(s): MATH*2130, STAT*2120
Department(s): School of Engineering

ENGG*3220 Groundwater Engineering W (3-2) [0.50]

This is an introductory course in groundwater engineering, an important area of practice for water resource and environmental engineers. The main goals of the course are: (1) to teach engineering students fundamental concepts in applied quantitative hydrogeology; and (2) to provide understanding of practical engineering tools and approaches for analysis including field and lab work.

Prerequisite(s): ENGG*2230
Department(s): School of Engineering

ENGG*3240 Engineering Economics F (3-0) [0.50]

This course covers the principles of project evaluation; analysis of capital and operating costs of engineering alternatives, benefit-cost ratio; break-even studies, evaluations recognizing risk, replacement and retirement of assets; tax considerations, influence of sources of funds.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): MATH*1210
Restriction(s): Registration in the Engineering program.
Department(s): School of Engineering

ENGG*3250 Energy Management & Utilization W (3-2) [0.50]

This course introduces notions of energy conservation and efficiency, an integrated approach to energy auditing and examples of typical applications (examples include: steam generation and distribution, process or comfort cooling, pumping and compressed air, human needs for modern living, energy consumption in buildings and industry). It also covers pinch technology and its application for energy recovery in industry, and methods to achieve low energy buildings.

Co-requisite(s): ENGG*3430
Restriction(s): ENGG*3030
Department(s): School of Engineering

ENGG*3260 Thermodynamics F (3-2) [0.50]

This course covers macroscopic thermodynamics and its applications to engineering practice. Topics include properties of pure substances and equilibrium, the First Law of thermodynamics (energy transfer and energy balance in closed and flow systems), the Second Law of thermodynamics and its applications (entropy analysis of closed and flow systems, quantification of irreversibilities and inefficiencies, quality of energy, etc.), thermodynamic cycles and exergy.

Prerequisite(s): CHEM*1040, ENGG*2230, ENGG*2400, MATH*2270
Department(s): School of Engineering

ENGG*3270 Electromagnetics in Biomedical Engineering F (3-2) [0.50]

This course explores the fundamentals of electromagnetics in biomedical engineering. Course topics include the following: vectors and spatial geometry, partial derivatives, multiple integrals, vector calculus, electrostatics, steady-state electric circuits, magnetostatics, Ampere's Law, Faraday's Law, and propagation of electromagnetic waves.

Applications within biomedical engineering will be covered, e.g., computerized tomography, electromagnetic radiation safety and physiological effects, magnetic sensitivity of brain and heart tissue, tissue electrical resistances, ophthalmology, and light-tissue interaction.

Prerequisite(s): ENGG*2450
Department(s): School of Engineering

ENGG*3280 Machine Design F (3-3) [0.75]

This course provides the concepts, procedures, and analysis techniques necessary to design various mechanical elements commonly found in machines. Failure analysis such as yield criteria and fatigue are covered. Component design includes screws, fasteners, shafts, bearings and lubrication, and gears. The emphasis is on the use of readily available materials, standard component, and appropriate design approaches to achieve safe and efficient system design.

Prerequisite(s): ENGG*2120, ENGG*2160, ENGG*2230, ENGG*2340, ENGG*2450
Department(s): School of Engineering

ENGG*3340 Geographic Information Systems in Environmental Engineering F (3-0) [0.50]

Geographical information system structure and functions. Data structuring and application program development. Data input, display and analysis. Applications in environmental engineering and natural resource development/management. Students will be able to use a GIS software package to build geographical information systems.

Prerequisite(s): (CIS*1500 or CIS*1600), (1 of MATH*1000, MATH*1080, MATH*1200)
Department(s): School of Engineering

ENGG*3370 Applied Fluids and Thermodynamics W (3-2) [0.50]

This course builds on the fundamentals of fluid dynamics and thermodynamics introduced in previous courses by looking at relevant applications. Topics to be covered include: heating, ventilation and air conditioning (HVAC); heat engine systems such as the Carnot cycle for refrigeration and heat pumps and the Rankine cycle for vapour power systems; compressible flow, turbomachinery such as pumps, turbines, and propellers; and an introduction to combustion.

Prerequisite(s): ENGG*2230, ENGG*2360
Co-requisite(s): ENGG*3430
Department(s): School of Engineering

ENGG*3380 Computer Organization and Design W (3-2) [0.50]

This course contains a detailed examination of modern computer organization and techniques for microprocessor architecture design. Topics include - CPU design; instruction set design, addressing modes, operands; data flow design; internal bus structure, data flow signals, registers; control sequence design: hardwired control, decoding, microprogramming; architecture classes: CISC, RISC, and DSP. Memory organization; performance. Students must complete a term project that includes design, implementation, and demonstration of a CPU using a hardware descriptive language like VHDL.

Prerequisite(s): ENGG*2410
Department(s): School of Engineering

ENGG*3390 Signal Processing F (3-2) [0.50]

This course will establish the fundamental analysis and design techniques for signal processing systems. Topics covered include: definition and properties of linear time-invariant systems; impulse response and convolution; continuous-time Laplace transform, Fourier series, Fourier transform; discrete-time Fourier transform, discrete-time Fourier series, fast Fourier transform, Z transform; complex frequency response; filter analysis and design for both continuous and discrete time systems. Students will be able to design continuous-time filters and both design and implement discrete-time digital filters using computer-based tools.

Prerequisite(s): ENGG*2400
Department(s): School of Engineering

ENGG*3410 Systems and Control Theory W (3-2) [0.50]

This course explores the fundamentals of electromagnetics in biomedical engineering. Course topics include the following: vectors and spatial geometry, partial derivatives, multiple integrals, vector calculus, electrostatics, steady-state electric circuits, magnetostatics, Ampere's Law, Faraday's Law, and propagation of electromagnetic waves.

Applications within biomedical engineering will be covered, e.g., computerized tomography, electromagnetic radiation safety and physiological effects, magnetic sensitivity of brain and heart tissue, tissue electrical resistances, ophthalmology, and light-tissue interaction.

Prerequisite(s): ENGG*2450
Department(s): School of Engineering

ENGG*3430 System and Control Theory W (3-2) [0.50]

This course explores the fundamentals of electromagnetics in biomedical engineering. Course topics include the following: vectors and spatial geometry, partial derivatives, multiple integrals, vector calculus, electrostatics, steady-state electric circuits, magnetostatics, Ampere's Law, Faraday's Law, and propagation of electromagnetic waves.

Applications within biomedical engineering will be covered, e.g., computerized tomography, electromagnetic radiation safety and physiological effects, magnetic sensitivity of brain and heart tissue, tissue electrical resistances, ophthalmology, and light-tissue interaction.

Prerequisite(s): ENGG*2450
Department(s): School of Engineering

ENGG*3440 Computer Organization and Design W (3-2) [0.50]

This course contains a detailed examination of modern computer organization and techniques for microprocessor architecture design. Topics include - CPU design; instruction set design, addressing modes, operands; data flow design; internal bus structure, data flow signals, registers; control sequence design: hardwired control, decoding, microprogramming; architecture classes: CISC, RISC, and DSP. Memory organization; performance. Students must complete a term project that includes design, implementation, and demonstration of a CPU using a hardware descriptive language like VHDL.

Prerequisite(s): ENGG*2410
Department(s): School of Engineering

ENGG*3440 Computer Organization and Design W (3-2) [0.50]

This course contains a detailed examination of modern computer organization and techniques for microprocessor architecture design. Topics include - CPU design; instruction set design, addressing modes, operands; data flow design; internal bus structure, data flow signals, registers; control sequence design: hardwired control, decoding, microprogramming; architecture classes: CISC, RISC, and DSP. Memory organization; performance. Students must complete a term project that includes design, implementation, and demonstration of a CPU using a hardware descriptive language like VHDL.

Prerequisite(s): ENGG*2410
Department(s): School of Engineering
ENGG*3430 Heat and Mass Transfer W (3-1) [0.50]
Analysis of steady and transient thermal systems involving heat transfer by conduction, convection and radiation and of mass transfer by molecular diffusion and convection. Other topics include the thermal analysis of heat exchangers and heat transfer systems involving a change of state.
Prerequisite(s): ENGG*2230, ENGG*3260, MATH*2270
Department(s): School of Engineering

ENGG*3450 Electronic Devices F (3-2) [0.50]
This course explores the theory and principles of modern electronic devices and their applications in circuits. Course topics include: intrinsic and doped semiconductors; drift and diffusion currents; metal-semiconductor contacts and MOS capacitors; pn junctions and breakdown phenomena; solid-state diodes; bipolar and MOS field-effect transistors; current-voltage characteristics and biasing; small-signal models and operation; circuit integration; analysis and design of application circuits, operational transconductance amplifiers, and logic gates.
Prerequisite(s): ENGG*2450
Department(s): School of Engineering

ENGG*3470 Mass Transfer Operations W (3-2) [0.50]
Prerequisite(s): ENGG*2230, ENGG*3260, MATH*2270
Co-requisite(s): ENGG*3430
Department(s): School of Engineering

ENGG*3490 Introduction to Mechatronic Systems Design W (3-2) [0.75]
This course covers the design of mechatronic systems, which are synergistic, combinations of components and controls drawn from mechanical engineering, electronics, and computer engineering. The course covers the following areas: (1) modeling of mechatronic systems (mechanical, electrical/electronic systems) and understanding their behaviour, (2) sensing and measurement including a variety of mechatronics sensors (fundamentals and applications), (3) actuators specific to mechatronics including motors and drivers (fundamentals and applications), (4) basic microcontroller programming as well as sensor/actuator integrations, and (5) control and its applications in mechatronics.
Prerequisite(s): ENGG*2340, ENGG*2450
Co-requisite(s): ENGG*3410
Department(s): School of Engineering

ENGG*3510 Electromechanical Devices F (3-3) [0.50]
The aim of this course is to develop an understanding of the electrical and electromechanical principles and their applications as devices used in engineering. The course covers magnetic fields of currents and coils; magnetic materials; magnetic circuits; induced, electric and magnetic fields (EMF); inductance, transformers magnetic forces, permanent magnets and electromagnets. The course examines the principles of variable-reluctance devices, stepper motors, moving-coil devices, direct current (DC) and alternating current (AC) motors. Semiconductors materials and devices, diodes, and transistors; principles of modern electronic devices and their applications in circuits; as well as operational amplifiers and digital logics are also studied.
Prerequisite(s): ENGG*2450, PHYS*1010
Department(s): School of Engineering

ENGG*3570 MEMS and Microfabrication F (3-2) [0.50]
This course presents a broad survey of micro-electro-mechanical systems (MEMS) and microfabrication technologies. It covers silicon and non-silicon microfabrication techniques for micromsors, microactuators, and nanotechnology. It introduces CAD tools and mechanical and electrical issues in designing devices such as micromotors, grippers, accelerometers, and pressure sensors. It discusses limitations and challenges in design and fabrication of MEMS and enables the application of general micromachining principles to developing novel devices.
Prerequisite(s): ENGG*2450, PHYS*1010
Department(s): School of Engineering

ENGG*3590 Water Quality F (3-3) [0.50]
This course builds on the student's experience in chemistry, biology, physics and fluid mechanics, and provides an engineering perspective on: (i) standard methods of water quality analysis for physical, chemical and biological characteristics of water; (ii) significance and interpretation of analytical results, (iii) modeling of water quality in natural systems and (iv) introduction to engineered water and wastewater treatment systems.
Prerequisite(s): ENGG*2230, ENGG*2560, (1 of BIOL*1040, BIOL*1090, MIRC*1020, MIRC*2420), STAT*2120
Department(s): School of Engineering

ENGG*3640 Microcomputer Interfacing F (3-3) [0.50]
This course focuses on the subject of interfacing microcomputers to external equipment. Topics include peripheral devices, hardware interfaces, device driver software and real time programming. Advanced programming: debugging of embedded systems, data structures and subroutine calls, high-level system programming. Interrupts and resets, real time events, signal generation and timing measurements. Synchronous and asynchronous serial communication. Parallel I/O ports and synchronization techniques. I/O interfacing, microcomputer busses, memory interfacing and direct memory access (DMA). Data acquisition topics include signal conditioning analog to digital conversion and digital signal processing.
Prerequisite(s): ENGG*2410, ENGG*2450
Restriction(s): ENGG*4640
Department(s): School of Engineering

ENGG*3650 Hydrology F (3-1) [0.50]
Quantitative study of natural water circulation systems with emphasis on basic physical principles and interrelationships among major processes; characteristics of mass and energy; inputs to and output from watersheds; factors governing precipitation occurrence, evaporation rates, soil-water storage changes, groundwater recharge and discharge, run-off generation; methods of streamflow analysis; mathematical modeling.
Prerequisite(s): (ENGG*2230 or MET*2030), (MATH*1210 or MATH*2080), (STAT*2120 or STAT*2040), and competency in computing.
Department(s): School of Engineering

ENGG*3670 Soil Mechanics F (3-2) [0.50]
Relations of soil physical and chemical properties to strength; soil water systems and interactive forces. Visco-elastic property and pressure-volume relationships of soil systems. Stress-strain characteristics of soil under dynamic loads. Application of engineering problems. Laboratory and field investigation methods.
Prerequisite(s): ENGG*2120, ENGG*2230
Department(s): School of Engineering

ENGG*3700 Optimization for Engineers F (3-2) [0.50]
This course serves as an introduction to optimization. Topics to be covered include but are not limited to: linear programming, sensitivity analysis, linear integer programming technique, dynamic programming, Markov chains, transportation method, decision analysis, and queuing theory.
Prerequisite(s): CIS*1500, MATH*2130, MATH*2270
Department(s): School of Engineering

ENGG*3830 Bio-Process Engineering F (3-1) [0.50]
Application of engineering principles to the processing of biological products in the biological and food industry. Analysis and design of unit processes such as sedimentation, centrifugation, filtration, milling and mixing involving rheology and non-Newtonian fluid dynamics of biological materials. Analysis of heat and mass balances for drying, evaporation, distillation and extraction.
Prerequisite(s): ENGG*2230, ENGG*2660
Co-requisite(s): ENGG*3260
Department(s): School of Engineering

ENGG*4000 Proposal for Engineering Design IV S,F (0-0) [0.00]
In this course students will prepare a proposal for the design project that will be completed in the Engineering Design IV course in their program of study. Teams normally of 3 to 4 students (single student groups not allowed) will prepare the proposal, providing details on the proposed project, identify the group members and identify the faculty advisor, who has a P.Eng.. Students are responsible for creating their own design group and securing a faculty advisor.
Prerequisite(s): ENGG*3100
Restriction(s): Registration in the semester preceding the last semester of the BENG Program. Instructor consent required. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*4030 Manufacturing System Design W (3-3) [0.75]
Students work in groups to design a manufacturing system to produce a specific product. Choices must be made about the materials to be used, the methods to manufacture each part of the product and the final assembly and/or packaging process. Attention is paid to economics and efficiency of the overall manufacturing system.
Prerequisite(s): ENGG*2180, ENGG*3070
Department(s): School of Engineering
### XII. Course Descriptions, Engineering

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGG*4040</td>
<td>Medical Imaging Modalities F (3-2) [0.50]</td>
<td>The course will cover the basic knowledge of medical imaging systems, how they operate and to what uses they can be applied. Systems covered will include x-ray radiography, computed tomography, magnetic resonance imaging, positron emission tomography, gamma cameras, and ultrasound imaging. Emphasis will be on the underlying physics and computation, highlighting factors affecting image quality, patient safety, and clinical use. <strong>Prerequisite(s):</strong> MATH<em>1210, PHYS</em>1130 <strong>Restriction(s):</strong> Restricted to students in BENG, BSCH,BMPH <strong>Department(s):</strong> School of Engineering</td>
</tr>
<tr>
<td>ENGG*4050</td>
<td>Quality Control W (3-2) [0.50]</td>
<td>The basic techniques and regulations surrounding quality control in a generic manufacturing environment are covered. The topics covered include: total quality management including relevant ISO regulations, six sigma, reliability, statistical process control, acceptance sampling and 2k factorial design of experiments. <strong>Prerequisite(s):</strong> STAT*2120 <strong>Department(s):</strong> School of Engineering</td>
</tr>
<tr>
<td>ENGG*4060</td>
<td>Biomedical Signals Processing W (3-2) [0.50]</td>
<td>This course will cover the generation of biomedical signals, detection and measurement, and processing. The physiology of electrical signal generation will cover ionic transport in cellular membranes and propagation of electrical signals in cells and tissues. The range of biomedical signals covered includes such common signals as the electromyogram (EMG), the electrocardiogram (ECG), the electroencephalogram (EEG). Detection and measurement will cover electrode technology, instrumentation amplifiers and safety concerns. Processing includes filtering, frequency content analysis, removal of artifacts, signal correlation, and event detection. <strong>Prerequisite(s):</strong> ENGG*3390 <strong>Department(s):</strong> School of Engineering</td>
</tr>
<tr>
<td>ENGG*4070</td>
<td>Life Cycle Assessment for Sustainable Design W (3-2) [0.50]</td>
<td>This course will introduce students to the fundamental concepts related to interaction of industrial and environmental/ecological systems, sustainability challenges facing the current generation, and systems-based approaches required to create sustainable solutions for society. Students will understand the concepts and the scientific method as it applies to a systems-based, transdisciplinary approach to sustainability, and will be prepared to identify problems in sustainability and formulate appropriate solutions based on scientific research, applied science, social and economic issues. The basic concepts of life cycle assessment (LCA) will be discussed, along with life cycle inventory (LCI) and life cycle impact assessment (LCIA) including the social and economic dimensions. The application of life cycle assessment methodology using appropriate case studies will be presented. <strong>Prerequisite(s):</strong> ENGG<em>2100, ENGG</em>3240 <strong>Department(s):</strong> School of Engineering</td>
</tr>
<tr>
<td>ENGG*4080</td>
<td>Micro and Nano-Scale Electronics F (3-2) [0.50]</td>
<td>The purpose of this course is to describe the operating principles of analog integrated micro and nano electronic circuits and to teach how to design and use such circuits systems. Course topics include: device and circuit fabrication in silicon and non-silicon based technologies; operation and layout of active and passive elements; analog and switched-capacitor filters; analog-to-digital and digital-to-analog converters; amplifiers; oscillators and circuits for radio-frequency and optical communications; readout channels for integrated sensors, and analog integrated circuits for mechatronics and bioengineering. The main emphasis is on device models, circuit operation, and design techniques. <strong>Prerequisite(s):</strong> ENGG*3450 <strong>Department(s):</strong> School of Engineering</td>
</tr>
<tr>
<td>ENGG*4090</td>
<td>Food and Beverage Engineering W (3-3) [0.75]</td>
<td>Students work in groups to design a system for manufacturing a specific food or beverage product. Choices are made about the specific processes to be used, the final packaging and marketing of the product. Attention is paid to the economics and efficiency of the overall production process. <strong>Prerequisite(s):</strong> ENGG<em>3070, ENGG</em>3510, MICR<em>1020 <strong>Co-requisite(s):</strong> ENGG</em>2660, ENGG<em>4050, ENGG</em>4280 <strong>Department(s):</strong> School of Engineering</td>
</tr>
<tr>
<td>ENGG*4110</td>
<td>Biological Engineering Design IV F,W (2-6) [1.00]</td>
<td>This is the capstone design course for the Biological Engineering program. Teams normally of 3-4 students apply engineering analysis and design principles to a problem in a biological system or process. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG<em>4000 will be permitted to select this course. <strong>Prerequisite(s):</strong> All 1000 and 2000 level core courses and ENGG</em>4000 <strong>Restriction(s):</strong> Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate. <strong>Department(s):</strong> School of Engineering</td>

ENGG*4160 Mechanical Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Mechanical Engineering program. Teams of 3-4 students apply engineering analysis and design principles to a mechanical engineering problem. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact.

This is a small group design that requires reports and a poster presentation to a professional standard. ETHICS and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.

Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses.
Restriction waiver requests are handled by the Director, School of Engineering, or designate.

Department(s): School of Engineering

ENGG*4170 Computer Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Computer Engineering program. Teams of normally 3-4 students apply engineering analysis and design principles to a computer engineering problem. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact.

This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.

Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses.
Restriction waiver requests are handled by the Director, School of Engineering, or designate.

Department(s): School of Engineering

ENGG*4180 Biomedical Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Biomedical Engineering program. Teams of normally 3-4 students apply engineering analysis and design principles to a biomedical engineering problem. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact.

This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.

Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses.
Restriction waiver requests are handled by the Director, School of Engineering, or designate.

Department(s): School of Engineering

ENGG*4230 Energy Conversion F (3-3) [0.75]
This course introduces the technical criteria for the design of efficient energy conversion processes and systems. It covers review of boilers and cycles, fuel and combustion calculations, and fundamentals of both traditional and emerging energy conversion processes and systems for production of thermal, mechanical, and electrical energy. Topics include fossil, biomass, nuclear fuels, wind, solar, geothermal and fuel cells. Mechanisms for storing energy generated from each of these systems are also studied.

The course also discusses conversion of automobile, renovation of old fossil fuel fired plant, co-firing of opportunity fuel, waste to energy technology, emission, and economics of energy projects.

Prerequisite(s): ENGG*3080, ENGG*3260
Restriction(s): ENGG*2050
Department(s): School of Engineering

ENGG*4240 Site Remediation F (3-1) [0.50]
Remediation of contaminated sites is done to mitigate impacts to the environment and public health. The course will: review the applicable legislation; identify the important soil, water, air and chemical interactions; review the steps of an environmental risk assessment so that contaminated sites can be identified and evaluated to see if remediation is required; and evaluate and appraise various remediation technologies to complete the soil and groundwater remediation.

Co-requisite(s): ENGG*3590, ENGG*3670
Department(s): School of Engineering

ENGG*4250 Watershed Systems Design W (3-2) [0.75]
This course is a hydrological analysis of watershed systems including stream flow for design of structures and channels, flood warning, flood plain mapping and low-flow characteristics. Hydraulic analysis is applied to the design of dams, reservoirs, control structures, energy dissipation structures, bridges and culverts. An analysis of steady flow profiles, flood waves, and sediment transport is applied in the design of natural and constructed channels and protective works for rivers to achieve environmentally sustainable land use in watershed systems.

Prerequisite(s): ENGG*2230, ENGG*3650
Department(s): School of Engineering

ENGG*4280 Digital Process Control Design W (3-2) [0.75]
Design, analysis synthesis and simulation of process control and automation systems. Automation hardware, process compensation techniques and P.I.D. controllers, design and dynamics of final control elements, computer control and the microprocessor.

Prerequisite(s): ENGG*3410
Department(s): School of Engineering

ENGG*4300 Food Processing Engineering Design W (3-2) [0.75]
This course covers the design of various food processing operations and the physico-chemical and mechano-biological response of foods to such operations. Topics include: process evaluation; optimization of operations such as thermal and chemical processes; and rheological properties of various food forms.

Prerequisite(s): ENGG*3430 or FOOD*3170
Department(s): School of Engineering

ENGG*4340 Solid and Hazardous Waste Management F (3-2) [0.50]

Prerequisite(s): ENGG*2560 or ENGG*2660
Department(s): School of Engineering

ENGG*4360 Soil-Water Conservation Systems Design F (3-2) [0.75]
Properties of soils and land use governing the occurrence and magnitude of overland flow, soil erosion, infiltration, percolation of soil water, and variations in soil water storage. Design of soil and water management systems and structures to control soil erosion and protect water quality for environmentally and economically sustainable land use planning. Design of surface and subsurface drainage systems for rural land. Design of sprinkler and trickle irrigation systems.

Prerequisite(s): ENGG*2230, ENGG*3650, ENGG*3670
Department(s): School of Engineering
ENGG*4370 Urban Water Systems Design F (3-2) [0.75]
Estimation of water quantity and quality needed for urban water supply and drainage.
Design of water supply, pumping systems, pipe networks and distributed storage reservoirs from analysis of steady and transient, pressurized and free surface flow. Rates of generation of flows and pollutants to sanitary and storm sewers, design of buried pipes and open channel drainage systems with structures for flow and pollution control. Modeling of water systems for sustainable urban development.
Prerequisite(s): ENGG*2230, ENGG*3650
Department(s): School of Engineering

ENGG*4380 Bioreactor Design F (3-2) [0.75]
Topics in this course include: modeling and design of batch and continuous bioreactors based on biological growth kinetics and mass balances; gas-liquid mass transfer for aeration and agitation; instrumentation; and control.
Prerequisite(s): ENGG*3160
Department(s): School of Engineering

ENGG*4390 Bio-instrumentation Design F (3-2) [0.75]
Theory and selection criteria of devices used in measurements in biological systems; design of complete measurement systems including transducers, signal conditioning and recording components; error analysis. Differences between measurements in biological and physical systems.
Prerequisite(s): ENGG*3450
Department(s): School of Engineering

ENGG*4400 Biomechanical Engineering Design W (3-2) [0.75]
This course covers concept development, design, manufacture and testing of biomechanical devices including athletic equipment, assistive devices, medical implants and tools. Other topics include the biomechanical factors influencing design, regulatory issues, current development trends, and the possible future direction of design and technology.
Prerequisite(s): 6.00 ENGG credits including ENGG*3150, ENGG*3170
Department(s): School of Engineering

ENGG*4420 Real-time Systems Design W (3-3) [0.75]
This course teaches real-time concepts from a system and computing perspective covering topics related to four major areas. Real-time computer control and system modeling area teaches basic real-time design and system modeling concepts for hard and soft real-time computer control applications. Real-time Operating Systems (RTOS) area introduces common kernel objects and inter-task communication and synchronization using examples from current commercial RTOS. Topics in the area of scheduling present theoretical results related to uniprocessor and multiprocessor scheduling algorithms and topics in the area of fault tolerance and reliability present current techniques at software and hardware level.
Prerequisite(s): ENGG*2400, ENGG*3640
Department(s): School of Engineering

ENGG*4430 Neuro-Fuzzy and Soft Computing Systems W (3-0) [0.50]
This course covers the basics of fuzzy systems, neural networks and neuro-fuzzy systems. The main focus is the concepts and algorithms of fuzzy sets, rules, and reasoning, as well as neural network structures, supervised learning and unsupervised learning of neural networks, and hybrid neuro-fuzzy systems. The applications of neural networks and fuzzy systems to control systems, signal processing, systems modeling and systems identification will be presented through examples.
Prerequisite(s): ENGG*3410
Department(s): School of Engineering

ENGG*4440 Computational Fluid Dynamics W (3-2) [0.50]
Computational methods for fluid mechanics form the core of this course. The concepts of modelling are covered including numerical analysis, the governing equations for fluid problems and finite discretization methods. Mathematical models for turbulence are presented and the student is exposed to the use of commercial software for the solution of complex problems in fluid dynamics.
Prerequisite(s): ENGG*2230, ENGG*3370
Department(s): School of Engineering

ENGG*44450 Large-Scale Software Architecture Engineering F (3-2) [0.50]
This course introduces the students to the analysis, synthesis and design of large-scale software systems at the architectural level. This is in contrast to the algorithmic and data structure viewpoint of most software systems. Large-scale software systems are complex, execute on many processors, under different operating systems, use a particular or many language(s) of implementation, and typically rely on system layers, network connectivity, messaging and data management and hardware interfacing. The material covered includes architectural styles, case studies, architectural design techniques, formal models, specifications and architectural design tools. The laboratory sessions will expose the students to analyzing and redesigning an existing large-scale software system.
Prerequisite(s): CIS*2420 or CIS*2520, ENGG*2100
Department(s): School of Engineering

ENGG*4460 Robotic Systems Design F (3-3) [0.50]
This course covers robot technology fundamentals, mathematical representation of kinematics, planning and execution of robot trajectories, introduction to robot languages, programming of robotic systems, different application domains for robots (e.g. assembly, manufacturing, medical, services, etc.), and robot sensors. The goal of this course is to provide students with a comprehensive background, approaches and skills to apply robotics technology to real world engineering applications and problems.
Prerequisite(s): ENGG*1500, ENGG*2400
Department(s): School of Engineering

ENGG*4470 Finite Element Analysis F (3-2) [0.50]
The theory of finite element analysis is presented including element derivation and solution procedures. Students use a finite element package to solve problems based on static and dynamic applications in mechanical systems. Examples are chosen from classical machines as well as biological systems.
Prerequisite(s): ENGG*2160, MATH*2130, MATH*2270
Department(s): School of Engineering

ENGG*4480 Advanced Mechatronics Systems Design W (3-3) [0.75]
The course is a follow up to the introductory mechatronics course and aims at covering advanced topics that are necessary in developing mechatronic systems. Topics include: signal conditioning and filtering for mechatronics system including advanced filters such as Kalman filters; important/advanced electronic circuits for mechatronics systems; microcontroller interfacing and programming; design and development of motion control for mechatronics systems including PLC; introduction of integrated complex mechatronics systems: concept, structure, and applications. Through a design project, students will use and apply these concepts in building a complex mechatronics system with advanced features.
Prerequisite(s): ENGG*3490
Department(s): School of Engineering

ENGG*4510 Assessment & Management of Risk W (3-1) [0.50]
This course will develop the bases by which risk to human health and the environment can be assessed. Issues of hazardous waste cleanups, permitting of water and air discharges, food safety, flood protection, as examples, are addressed. The course also examines how decisions are made to manage the risks to acceptable levels.
Prerequisite(s): STAT*2040 or STAT*2120
Department(s): School of Engineering

ENGG*4540 Advanced Computer Architecture F (3-2) [0.50]
This course covers topics such as: basics of pipeline structure, advanced pipelining and instruction level parallelism, multiprocessor and thread-level parallelism, memory-hierarchy design (main memory, virtual memory, caches), storage systems, interconnection networks, multiprocessor architectures (centralized and distributed). Advanced topics related to new emerging computer architectures will also be presented. The emphasis in each topic is on fundamental limitations and the trade-offs involved in designing computer systems, including memory and processing bandwidth, network bandwidth and latency, synchronization, and storage system bandwidth and latency.
Prerequisite(s): ENGG*3380
Department(s): School of Engineering

ENGG*4550 VLSI Digital Design W (3-2) [0.50]
This course introduces the students to the analysis, synthesis and design of Very Large Scale integration (VLSI) digital circuits and implementing them in silicon. The topics of this course are presented at three levels of design abstraction. At device level: MOS diode; MOS (FET) transistor; interconnect wire. At circuit level: CMOS inverter; static CMOS gates (NAND, NOR); dynamic gates (NAND, NOR); static latches and registers; dynamic latches and registers; pipelining principles and circuit styles; BICMOS logic circuits. At system level; implementation strategies for digital IC’s; interconnect at system level; timing issues in digital circuits (clock structures); the adder; the multiplier; the shifter; memory design and array structure; low power design circuits and architectures.
Prerequisite(s): ENGG*2410, ENGG*2450, ENGG*3450
Department(s): School of Engineering
### ENGG*4560 Embedded System Design W (3-3) [0.75]
This course introduces the basic principles of embedded system design. It utilizes advanced hardware/software abstractions to help design complex systems. Topics include: design of embedded CPUs; embedded architecture cores; system-on-chip designs and integration using processor cores and dedicated core modules; embedded computing platforms; embedded programming design and analysis; processes and operating systems; networks for embedded systems; distributed embedded architectures; design examples that target robotics, automobile, and communication systems.

*Prerequisite(s): ENGG*3380 or ENGG*3640
*Department(s): School of Engineering

### ENGG*4580 Sustainable Energy Systems Design W (3-3) [0.75]
The analysis and design of sustainable energy systems are presented in this course. Techniques considered include generation of alternative designs to satisfy a problem definition; evaluation of alternative designs; application of modeling simulations and cost analyses.

*Prerequisite(s): ENGG*3080, ENGG*3370, ENGG*3430
*Department(s): School of Engineering

### ENGG*4660 Medical Image Processing W (3-2) [0.50]
This course covers the fundamentals of medical imaging from both the processing of digital images and the physics of image formation. Image processing topics covered include: fundamentals of resolution and quantization; linear systems as applied to multi-dimensional continuous and discrete systems including the relationship between the point spread functions and modulation transfer function; point operations such as contrast enhancement, histogram equalization, and H and D curves, geometric operations for distortion correction, including interpolation methods; linear filtering in both the spatial and spatial-frequency domains; and image restoration and inverse filtering. The physics of the following imaging modalities with emphasis on the parameters which effect image quality will be covered: x-ray radiology, MRI, ultrasound, and nuclear medicine.

*Prerequisite(s): ENGG*3390
*Department(s): School of Engineering

### ENGG*4680 Multidisciplinary Engineering Design W (2-4) [0.75]
This is a general design course for students registered in the B. Eng. major in Biomedical Engineering and who do not wish to develop a strong specialization in one of the specific areas of the program. Students work in groups to develop a general Biomedical engineering design. Special attention is paid to the sustainability of the design, its economic feasibility and overall efficiency.

*Prerequisite(s): ENGG*3100
*Department(s): School of Engineering

### ENGG*4720 Physical Design Automation W (3-2) [0.50]
This course presents the applications of a number of important optimization techniques (such as linear programming, integer programming, simulated annealing, and genetic algorithms) to various design-automation problems, including: logic partitioning, floorplanning, placement, global routing, detailed routing, compaction, and performance-driven layout.

*Prerequisite(s): CIS*2500, CIS*3490, ENGG*3700
*Department(s): School of Engineering

### ENGG*4760 Biological Wastewater Treatment Design W (3-2) [0.50]
The course applies design principles for a variety of biological treatment systems for both municipal and industrial wastewater. This involves the design of suspended growth and attached growth processes, anaerobic digestion, sludge processing and utilization, water reuse and resource recovery facilities.

*Prerequisite(s): ENGG*3590
*Restriction(s): ENGG*4260
*Department(s): School of Engineering

### ENGG*4870 Physical & Chemical Water and Wastewater Treatment Design F (3-2) [0.50]
This course focuses on the theory, application, and design principles of physical and chemical operations and processes for the treatment of water and wastewater. This involves the design of physical and chemical unit operations, and evaluating the optimum combination to satisfy the given design constraints and criteria. The optimum designs integrate engineering science, basic science, economics, and health and safety for workers and the public.

*Prerequisite(s): ENGG*3590
*Restriction(s): ENGG*4260
*Department(s): School of Engineering

### ENGG*4810 Control of Atmospheric Particulates F (3-2) [0.50]
The focus of this course is understanding, analyzing and designing conventional and innovative atmospheric particulate control systems. The properties and transport of atmospheric particulates, and the principles of cyclones, filtration and electrostatic precipitation will be taught through theory, simulations, experiments and a design project.

*Prerequisite(s): 6.00 credits of ENGG courses, ENGG*2230, ENGG*2450, MATH*2130
*Restriction(s): ENGG*4330
*Department(s): School of Engineering

### ENGG*4820 Atmospheric Emission Control: Combustion Systems W (3-2) [0.50]
Combustion systems are an essential part of our society, however, they are also the dominant source of atmospheric pollutants. This course will focus on investigation of combustion systems for the purpose of reducing atmospheric emissions.

*Prerequisite(s): ENGG*2560, ENGG*3260
*Co-requisite(s): ENGG*3430
*Restriction(s): ENGG*4330
*Department(s): School of Engineering
ENGL*1080 and ENGL*2080 provide a strong foundation for English studies at the University level and are required courses for students intending to major or minor in English. These linked courses expose students not only to a broad range of texts from different countries and historical periods but also to some of the exciting developments in the discipline.

2. Honours major students are required to take the seminar courses ENGL*2120, ENGL*2130, ENGL*3940, ENGL*3960, preferably in their 3rd, 4th, 5th and 6th semesters. ENGL*1080 is a pre-requisite to ENGL*2120 and ENGL*2130; ENGL*2080 is a pre-requisite to ENGL*3940 and ENGL*3960.

3. Honours major students are required to take one 4000-level seminar, preferably in their 7th and 8th semesters. The prerequisites for the 4000-level seminars are ENGL*2080 plus one of ENGL*2120, ENGL*2130 plus one of ENGL*3940, ENGL*3960.

4. Honours minor students are required to take the seminar course ENGL*2120 and one of ENGL*2130, ENGL*3940, ENGL*3960, preferably in their 3rd to 6th semester.

5. Many English lecture courses are offered on alternate years only and many English seminars have variable content. For more information, students should consult the School's home page at http://www.arts.uoguelph.ca/sets/.

6. Many English lecture courses are reading-intensive while seminar courses are writing and presentation-intensive. Honours major students are advised to take two lectures and one seminar per semester beginning in their 3rd semester.

7. WRITING- AND PRESENTATION-INTENSIVE: Seminars emphasize written and oral work to help students develop the critical reading and writing skills essential to their learning throughout the curriculum.

8. READING-INTENSIVE: Lectures emphasize breadth of reading, contexts, and comparisons, to help students develop the knowledge base essential to their understanding of the field. In order to allow essay-writing to be concentrated in seminars, assignments in lecture courses will not predominantly take the traditional essay form but a range of other formats.

ENGL*1030 Effective Writing S,F,W (3-0) [0.50]
This course is designed primarily for those not pursuing a specialization in English and focuses on the development of the skills for effective writing. Topics will include sentence and paragraph structure, essay organization, and the implementation of convincing written arguments. Students will apply these skills to the completion of several written assignments, culminating in a short work of non-fiction prose.
Offering(s): Also offered through Distance Education format.
Department(s): School of English and Theatre Studies

ENGL*1080 Literatures in English I: Reading the Past F,W (3-0) [0.50]
This course is focused on the disciplinary skill of close reading and is intended for students planning to specialize in the study of English Literature. Through a series of case studies, the course introduces students to a range of historical and national writings in prose, poetry, and drama, and to some of the key terms and concepts in contemporary literary studies. Lectures and discussions address selected works from the Middle Ages onwards, the periods in which these works were produced, and some of the ways in which these texts have been or could be interpreted. ENGL*1080 and its companion course, ENGL*2080, are required for a major or minor in English. Students are encouraged to enrol in ENGL*2080 in the semester after they have completed ENGL*1080. Reading- and writing-intensive course.
Restriction(s): This is a priority access course. Enrolment in the fall semester may be restricted to students registered in the English major, minor, area of concentration, Concentrating Writing minor, or in semesters one or two of the BA or BAS program.
Department(s): School of English and Theatre Studies

ENGL*1200 Reading the Contemporary World F,W (3-0) [0.50]
This course, which is designed primarily for those not planning a specialization in English, introduces students to literary texts and persuasive forms of writing, bringing to the fore some of the links between language and contemporary social and political issues. Course materials will represent diversity in terms of national origins, gender, race, and class. The course emphasizes the use of figurative language as well as the development of students' critical reading and writing skills. Students planning to major or minor or pursue an area of concentration in English must take ENGL*1080 and ENGL*2080, but may also take ENGL*1200 and count it as an elective lecture.
Offering(s): Also offered through Distance Education format.
Department(s): School of English and Theatre Studies

ENGL*1410 Major Writers U (3-0) [0.50]
This course, which is designed primarily for those not planning a specialization in English, offers an introduction to the study of literature through a chronological consideration of works by selected major authors from the Middle Ages to the present century, in relation to their social, intellectual and literary backgrounds. The course emphasizes the use of figurative language as well as the development of students' critical reading and writing skills. Students planning to major or minor or pursue an area of concentration in English must take ENGL*1080 and ENGL*2080, but may also take ENGL*1410.
Department(s): School of English and Theatre Studies

ENGL*1500 Medicine and Literature W (3-0) [0.50]
This course explores the representational and cultural practices concerning health care and the body. Students will examine how literary texts represent, interpret, and critique the cultures of biomedical science, the clinic, and the hospital. Areas of interest include disease, illness, health, disability, and psychological and physiological trauma.
Department(s): School of English and Theatre Studies

ENGL*2040 Latina/o Literature and Cultural Production: Intro F (3-0) [0.50]
This survey course introduces students to the terms, methodologies, and debates that form the interdisciplinary critical practice of Latina/o Studies. The course takes a pan-Latina/o approach to the study of English-language and cultural production by various Latina/os primarily in the U.S. Because different Latina/o groups have been concentrated in particular U.S. regions and cities, the approach allows students to study how Latina/o literature and art have shaped the politics and culture of different regions and cities.
Reading-intensive course.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2080 Literatures in English II: Finding a Critical Voice F (3-0) [0.50]
This course revisits the historical, national, and genre sweep of ENGL*1080 by conducting a range of specific, more in-depth studies of particular works (including some of the texts examined in ENGL*1080) in their historical moments. Seminars help students to develop a range of critical approaches through oral presentations and essay-writing. Students are encouraged to enrol in ENGL*2080 in the semester after they have completed ENGL*1080.
Prerequisite(s): ENGL*1080
Equates to: ENGL*2060
Department(s): School of English and Theatre Studies

ENGL*2090 Studies in Shakespeare W (3-0) [0.50]
This course focuses on Shakespeare as both a writer and an enduring cultural presence. It may, at the instructor's choice, focus on works by Shakespeare as well as works by others in response to Shakespeare, in Shakespeare's original historical context or in more contemporary contexts. The course may address, among others, genre, performance, adaptation, the politics of Shakespearean interpretation, including issues such as gender, subjectivity, empire, and nation. Reading-intensive course.
Prerequisite(s): 2.00 credits
Restriction(s): ENGL*3020, ENGL*3120
Department(s): School of English and Theatre Studies

ENGL*2120 Seminar: Critical Practices F,W (3-0) [0.50]
This course guides students through a range of critical approaches and explores their implications for readings of a limited number of literary texts. The seminar's main areas of concentration are: (1) close reading, centering on the way a particular poem, work of fiction, or play works in its details and overall structure; (2) critical approaches and methodologies; (3) critical writing and discussion. (Choices of approaches and texts will be determined by individual instructors.) Writing- and presentation-intensive course.
Prerequisite(s): ENGL*1080
Restriction(s): Registration in the English major, minor or area of concentration, or minor in Creative Writing.
Department(s): School of English and Theatre Studies

ENGL*2130 Seminar: Literature and Social Change F,W (3-0) [0.50]
This course explores the social and cultural work that literary texts perform. Seminars will illuminate such categories as gender, sexuality, nation, race, ethnicity, and class; particular ways in which they are written into a limited number of literary works; and some of the critical debates surrounding our interpretations of those processes. (Choices of approaches and texts will be determined by individual instructors.) Writing- and presentation-intensive course.
Prerequisite(s): ENGL*1080
Restriction(s): Registration in the English major, minor or area of concentration, or minor in Creative Writing.
Department(s): School of English and Theatre Studies

Last Revision: July 4, 2019  2019-2020 Undergraduate Calendar

<tr>
<td>ENGL*2190</td>
<td>Queer Literatures and Cultures W (3-0) [0.50]</td>
<td>This course examines the ways in which gender, sexuality, and identity politics are addressed, critiqued, and shaped by queer literature, performance, and media. This course will consider the meanings of “queer” itself and explore how queerness intersects with race, class, gender, sex, and other forms of social difference.</td>
<td>Offering(s): Offered in odd-numbered years.</td>
<td>2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*2200 Postcolonial Literatures, Film, and Other Media F (3-0) [0.50]</td>
<td>This course introduces students to contemporary literatures, film, and other media that engage with the impact of European colonization on eighty-five percent of the globe. The course may include material from Africa, Australia, the Americas, the Caribbean, the Indian Subcontinent, and the Pacific. Reading-intensive course</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL*2270 Fairy, Trickster, and Mythical Hero F (3-0) [0.50]</td>
<td>This course focuses on the everyday emergence of the fantastic, the otherworldly, and the extraordinary in commonly told cultural narratives such as the fairy tale, trickster tale and myth. The course may focus on tales of specific regions (e.g. Europe, North America, the South Pacific), and may cross a range of genres (oral tale, pantomime, short story, film, graphic novel) as well as historical periods. The course may also address continuities and discontinuities in versions of traditional narratives created by tellers, writers, and other artists.</td>
<td>Offering(s): Offered in even-numbered years.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
</tr>
<tr>
<td>ENGL*2280 Sporting Bodies W (3-0) [0.50]</td>
<td>This course examines various aspects of sports and play as they are manifested in a range of literary texts and other cultural forms. Because the emergence of sport as a social practice has been so intertwined with notions of regulation, performance, and fandom, sporting culture offers a valuable site for looking at questions of identity and social relations more broadly.</td>
<td>Offering(s): Offered in even-numbered years.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
</tr>
<tr>
<td>ENGL*2290 Outlaws W (3-0) [0.50]</td>
<td>Literary narratives about crime and the criminal have both glamorized the outlaw and idealized the restoration of law and order. Students will examine how literary narratives frame the figure of the outlaw in order to: contemplate the relationship between the individual and law, as well as between outlaw communities and the law; shape popular understandings of the law and the consequences of breaking the law; interrogate the law’s absolute claim to justice; examine the cost of policing to maintain law and order; and/or critique state power by giving voice to the marginalized.</td>
<td>Offering(s): Offered in odd-numbered years.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
</tr>
<tr>
<td>ENGL*2310 Vampires, Ghosts, and Mummies: Literature and the Supernatural F (3-0) [0.50]</td>
<td>While we often dismiss the occult or the supernatural in literature as simple entertainment, this course encourages students to examine how literary works engage the occult and the supernatural in order to address issues of power, race, gender, imperialism and modernity from the nineteenth century to the present.</td>
<td>Offering(s): Offered in odd-numbered years.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
</tr>
<tr>
<td>ENGL*2330 Print Culture and Cinema F (3-0) [0.50]</td>
<td>This course moves between writing and cinema, in different periods and with different emphases according to the instructor’s expertise. Topics may include: adaptation from page to screen and adaptation theory; the relationship between print forms and early motion picture and between fiction and film; the construction of celebrity and spectatorship in print and movie cultures; questions of “fidelity,” technology, silence and sound, literary prestige and film publicity. Reading-intensive course.</td>
<td>Offering(s): Offered in even-numbered years.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
</tr>
<tr>
<td>ENGL*2360 Medieval Literature W (3-0) [0.50]</td>
<td>This course introduces students to the literature of the English Middle Ages. Students will read both Old English texts (such as Beowulf and The Wanderer) and Middle English texts (such as Sir Gawain and the Green Knight and selections from The Canterbury Tales) alongside non-literary medieval texts—histories, guides to religious living, and philosophical tracts—that together work to reveal the cultural context in which medieval writers worked. The class will also include representative medieval drama (mystery plays and/or morality plays) and works by and about women (such as the works of Marie de France and Margery Kempe).</td>
<td>Offering(s): Offered in even-numbered years.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Restriction(s): ENGL*3560</td>
<td>Department(s): School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*2560 North American Native Literatures W (3-0) [0.50]</td>
<td>This course explores selected issues, perspectives, and voices within the study of Native literatures and their contexts in North America. One purpose of the course is to raise questions about the meaning of the U.S. - Canadian border for Native writers. Reading-intensive course.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ENGL*2660 Culture, Location, Identity: Minoritized Literatures in Canada and Beyond F (3-0) [0.50]</td>
<td>This course will open up debates around emergent issues, perspectives, and voices in the literatures of minoritized cultures particularly within the North American context. Questions about the meanings of various borders for understanding Canadian negotiations of identity, culture, and location will remain a consistent feature of this variable content course. Reading-intensive course.</td>
<td>Offering(s): Also offered through Distance Education format.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
</tr>
<tr>
<td>ENGL*2740 Children's Literature F,W (3-0) [0.50]</td>
<td>This course serves as an introduction to the critical study of children's literature and culture. Focusing on selected genres of, issues in, or theoretical approaches to literature for children, this variable-content course explores shifting (and often conflicting) conceptions of childhood, in general, and of children as readers and cultural consumers. Reading-intensive course.</td>
<td>Offering(s): Also offered through Distance Education format.</td>
<td>Prerequisite(s): 2.00 credits</td>
<td>Department(s): School of English and Theatre Studies</td>
<td></td>
</tr>
<tr>
<td>ENGL*2880 Women in Literature W (3-0) [0.50]</td>
<td>This variable-content course will involve the study and discussion of poems, stories, novels and plays by or about women. Reading-intensive course.</td>

</table>
ENGL*3540 Writing the United States W (3-0) [0.50]
This course explores the relationship between literary production and political power from the emergence of U.S. culture through the long nineteenth century. Areas of focus may include national fantasy, the literatures of war, imperial expansion, captivity, and genocide; narratives of race and immigration; the cult of domesticity; and the rise of mass culture. Reading-intensive course.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3550 Modern United States Literatures W (3-0) [0.50]
This course explores powerful examples of modern United States literatures, from about the First World War to the present. The selection is wide, including both traditional and experimental forms; female and male writers from various ethnic and racial groups; and a range of cultural issues. Reading-intensive course.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3570 Chaucer in Context F (3-0) [0.50]
This course will introduce students to significant aspects of Chaucer's writing read in the context of works by Chaucer's precursors and near contemporaries. Reading-intensive course.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3630 Writing Canada: Forging the Nation W (3-0) [0.50]
This course focuses on Canadian literature to World War One, examining cultural contestation in the Canadian settler colony among the Canadian, U.S., British, and indigenous peoples. Topics may include the rise of nationalist discourse, race and nation, landscape and the sublime, gothic, sentimental, and historical fiction, children's literature, slavery and resistance narratives, travel and captivity narratives. Reading-intensive course.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3680 20th- & 21st-Century Canadian Literature and Criticism F (3-0) [0.50]
This course examines Canadian literature and criticism in English from the beginnings of the twentieth century to the present in relation to a variety of social, cultural, and historical contexts. Reading-intensive course.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3690 History of Literary Criticism F (3-0) [0.50]
This course introduces students to the major critics and texts formative in the development of an English critical tradition. The study will begin with Plato and Aristotle, and proceed from the Renaissance through to modernist critical theory.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3750 Studies in Postcolonial Literatures W (3-0) [0.50]
This course is a concentrated study in a major sub-area of postcolonial literature. Specific topics will vary each year, but may involve a focus on a particular genre or region such as Africa, Australia, Canada, the Caribbean, India, and the Pacific. Reading-intensive course.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3760 The Atlantic World W (3-0) [0.50]
This course is a variable-content course designed to consider the intercultural effects which emerge from transnational, colonial, imperial, and/or diasporic relations, through literatures in English addressing the Atlantic and contiguous lands. Texts will be selected from among the rich array of poetry, fiction, memoirs, letters, travel accounts, period histories and ethnographies, autobiographies and folkloric records that formed the literary culture of this period. Attention may be paid to diverse forms of oral and written expression, linguistic changes, the Creole continuum, representations of oceanic space, the erasure and fluidity at work in the metaphoricities of the sea, the evolution of national and racial stereotypes, and religious syncretism. Reading-intensive course.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits including 0.50 credits in English (excluding ENGL*1030)
Department(s): School of English and Theatre Studies

ENGL*3870 Topics in Literary and Cultural Studies U (3-0) [0.50]
These variable-content courses provide opportunities for topics in cross-period studies, inter- and transdisciplinary studies and cultural studies, among others that are not available in regular offerings. Consult the School for specific offerings in a given semester. Reading-intensive course.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits including 0.50 credits in English.
Department(s): School of English and Theatre Studies

ENGL*3880 Topics in Literary and Cultural Studies U (3-0) [0.50]
These variable-content courses provide opportunities for topics in cross-period studies, inter- and transdisciplinary studies and cultural studies, among others that are not available in regular offerings. Consult the School for specific offerings in a given semester. Reading-intensive course.
Prerequisite(s): 1.00 credits in English.
Department(s): School of English and Theatre Studies

ENGL*3940 Seminar: Form, Genre, and Literary Value F, W (3-0) [0.50]
This course focuses on textual conventions as form, style, and genre as they inform the interaction between reader and text. The impact of these conventions on the processes of literary production, reception, the production of meaning, and the assessment of literary value will be explored in relation to a limited number of literary works. (Choice of focus and texts to be determined by individual instructors.) Writing- and presentation-intensive course.
Prerequisite(s): ENGL*2080
Restriction(s): Registration in the English major, minor or area of concentration.
Department(s): School of English and Theatre Studies

ENGL*3960 Seminar: Literature in History F, W (3-0) [0.50]
This course explores the processes by which specific texts or genres emerge from particular historical moments and by which we attempt to reconstruct those historically specific connections. Seminars will focus on such topics as the archive surrounding one text, problems of period and canon, or genres and historical change. (Choice of period and texts will be determined by individual instructors.) Writing- and presentation-intensive course.
Prerequisite(s): ENGL*2080
Restriction(s): Registration in the English major, minor or area of concentration.
Department(s): School of English and Theatre Studies

ENGL*4140 Old English Language and Literature F (3-0) [1.00]
This course provides a rigorous introduction to Old English language and literature. Significantly different from modern English, Old English (or Anglo-Saxon), was spoken in England c. 700-1100 CE. Students will learn to read and translate Old English prose and poetry and will discuss Old English literary texts, some read in the original and some in translation, from a variety of thematic and critical perspectives. The course will culminate in an independent research project that leads to a final critical essay.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*3280 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.
Department(s): School of English and Theatre Studies

ENGL*4240 Medieval & Early Modern Literatures U (3-0) [1.00]
This course provides the opportunity for intensive study of British literature from the beginnings to 1660. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4040 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.
Department(s): School of English and Theatre Studies
ENGL*4250 18th- & 19th-C Literatures U (3-0) [1.00]
This seminar provides the opportunity for intensive study of British literature from 1660 to 1900. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4050 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4270 United States Literatures U (3-0) [1.00]
This seminar provides the opportunity for intensive study of United States literatures. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4070 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4280 Canadian Literatures U (3-0) [1.00]
This seminar provides the opportunity for intensive study of Canadian literatures. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4080 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4310 Special Studies in English U (3-0) [1.00]
A seminar designed to provide students in semesters 7 and 8 with an opportunity to pursue studies in an area or areas of language or literature not available in other courses. The course may be taught by a visiting professor or members of the school.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4100, ENGL*4110 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4400 Postcolonial Literatures U (3-0) [1.00]
This course provides the opportunity for intensive study of a representative selection of literature in English by writers from Africa, India, the Caribbean, Australia, and the Pacific. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4200 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4410 Modern & Contemporary Literatures U (3-0) [1.00]
This course provides the opportunity for a study of significant works in fiction, poetry, and drama that demonstrate new approaches in form and content characteristic of 20th- and 21st-century writings in English. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4210 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4420 Women's Writings U (3-0) [1.00]
This course provides for intensive study of issues relating to the aesthetic strategies, such as those associated with structure, imagery, and language, devised by women writers to reflect women's experience and perceptions. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4220 Restricted to students in the English majors, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4450 Non-fiction Prose U (3-0) [1.00]
This course offers an intensive study of non-fiction prose. Topics to be explored may include the roles and contexts of public and/or private writing, the role of literary criticism in reading texts sometimes marked as non-literary, the history of non-fictional prose forms, or the formal or ideological uses of the distinctions between fact and fiction.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4300 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4720 Creative Writing: Prose/Poetry F,W (3-0) [1.00]
A development and extension of the creative writing/reading skills and techniques introduced in the creative writing workshops. This course will involve the generation and revision of challenging new work, sophisticated critique of the work of other students, and focused discussion of the cultural, social, and political issues in which the practice of creative writing is enmeshed.

Prerequisite(s): 1 of ENGL*2920, ENGL*2940, ENGL*3050, ENGL*3060, ENGL*3070, ENGL*3090
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.

Department(s): School of English and Theatre Studies

ENGL*4810 Directed Reading S,F,W (3-0) [0.50]
This course is intended particularly as preparation for ENGL*4910. The student will design a course of readings and assignments with the instructor, whose consent must first be obtained. This option is intended only for students who have performed particularly well within the honours program. Exceptional students may take ENGL*4810 in preparation for a ENGL*4910 creative writing project, on the approval of the instructor.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): Instructor consent required.

Department(s): School of English and Theatre Studies

ENGL*4880 20th- & 21st-Century Poetry U (3-0) [1.00]
This seminar provides opportunities to study English-language modern and contemporary poetry. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4680 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

Department(s): School of English and Theatre Studies

ENGL*4890 Contemporary Literary Theory U (3-0) [1.00]
This course will study the major branches of contemporary literary theory. Topics covered will include structuralism, reader-oriented theory, feminist theory, new historicist and materialist critique, postcolonialist critique, and deconstruction.

Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4690 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Restricted to students with fewer than 2.00 credits of 4000-level English courses.

## Environmental Sciences

### School of Environmental Sciences

Department of Food, Agricultural and Resource Economics

The program in Environmental Sciences is interdisciplinary, involving courses from several different departments. See the B.Sc.(Env.) program information in Section X—Undergraduate Degree Programs.

### ENVS*1030 Introduction to Environmental Sciences F (6-0) [1.00]

This course introduces students to what it means to think critically from an environmental sciences perspective. It covers an introduction to: philosophy of science, philosophy of the environment, the evaluation of scientific evidence, and scientific arguments. The course focuses on how we understand and recognize environmental problems, how we decide what to do about them, and what role science can and should play in these discussions.

**Restriction(s):** ENVS*1100 Registration in the BSC(Env) program or BBRM.EM

**Department(s):** School of Environmental Sciences

### ENVS*1040 Principles of Geology S,F,W (3-0) [0.50]

This course provides an introduction to geological principles, their historical development and application to interpreting Earth materials and processes. This course is suitable for those wishing a general knowledge of Earth sciences.

**Offering(s):** Offered through Distance Education format only.

**Equate(s):** GEOL*1100

**Restriction(s):** May not be taken for credit by students in BBRM, BSC or BSC(Env).

**Department(s):** School of Environmental Sciences

### ENVS*1100 Fundamentals of Environmental Sciences F (3-0) [0.50]

This course introduces students to what it means to think critically from an environmental sciences perspective. It covers an introduction to: philosophy of science, philosophy of the environment, the evaluation of scientific evidence, and scientific arguments. The course focuses on how we understand and recognize environmental problems, how we decide what to do about them, and what role science can and should play in these discussions.

**Restriction(s):** ENVS*1030 Not available to students registered in BSC(Env) program and BBRM.EM

**Department(s):** School of Environmental Sciences

### ENVS*2030 Meteorology and Climatology F (3-2) [0.50]

This course examines solar and terrestrial radiation; pressure systems and winds; atmospheric stability and vertical motions; air masses and fronts; clouds and precipitation; selected topics in applied meteorology including air pollution. The laboratory emphasizes the analysis and use of atmospheric data for solving environmental problems.

**Prerequisite(s):** 1 of IPS*1500, MATH*1080, MATH*1200, PHYS*1070, PHYS*1080, PHYS*1130, PHYS*1300

**Department(s):** School of Environmental Sciences

### ENVS*2040 Plant Health and the Environment W (3-0) [0.50]

This is an interdisciplinary course on the nature and importance of diseases, insects and abiotic stresses on plant productivity and quality. A case history approach will be used to illustrate the biology of plant pests, the principles of pest population management, and related topics.

**Prerequisite(s):** BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090)

**Equate(s):** ENVB*2040

**Department(s):** School of Environmental Sciences

### ENVS*2060 Soil Science S,F (3-2) [0.50]

This course is an introduction to the principles of soil science - the origin of soils, their classification and interpretation in natural and modified environments. Soil will be studied as a product of the natural environment, with a focus on formation processes and changes which occur when it is modified through use. A variety of uses including agriculture, forestry, recreation, and urban development will be considered.

**Offering(s):** Also offered through Distance Education format.

**Equate(s):** SOIL*2010

**Restriction(s):** AGR*2320.

**Department(s):** School of Environmental Sciences

### ENVS*2070 Environmental Perspectives and Choice F (3-0) [0.50]

This is an interdisciplinary approach to environmental issues which offers opportunities to investigate social processes and philosophical considerations with respect to the position and influence of humankind, and the development of social conditions, values and economic activities that have led to our present situation. These investigations are carried out within the context of physical environmental considerations, such as the state of the earth, forests, air water and our use of energy, and will lead the student to a detailed consideration of the future.

**Offering(s):** Offered through Distance Education format only.

**Department(s):** School of Environmental Sciences

### ENVS*2080 Introduction to Environmental Microbiology W (2-3) [0.50]

This course will introduce students to environmental microbiology, with a focus on the important roles of microorganisms in various environments such as soil, water and sediments. Discussion will emphasize the physiology, biochemistry, molecular biology and ecology of microorganisms, and how a good understanding of these microbial processes can enable beneficial applications of microorganisms in biotechnology and bioremediation.

**Prerequisite(s):** BIOL*1070, BIOL*1090

**Restriction(s):** ENVM*1020, ENVS*2320

**Department(s):** School of Environmental Sciences

### ENVS*2090 Problem Solving in Environmental Biology W (2-2) [0.50]

This course provides an introduction to current issues and problems in environmental biology. Approaches to characterizing and addressing problems through the systematic application of the scientific method will be critically examined. Students will have the opportunity to practice both oral and written presentation skills.

**Offering(s):** First offering - W21

**Prerequisite(s):** BIOL*1070, BIOL*1090, CHEM*1050, MATH*1080

**Department(s):** School of Environmental Sciences

### ENVS*2120 Introduction to Environmental Stewardship F (3-0) [0.50]

This course provides an introduction to the concepts of resource management, environmental planning and assessment, land stewardship and sustainable development. Case studies of specific issues such as parks and natural heritage conservation, agricultural land loss, and integrated rural resources management will provide insight on approaches to decision making. Included will be discussion of the concept of stewardship as an environmental ethics.

**Offering(s):** Offered through Distance Education format only.

**Department(s):** School of Environmental Sciences

### ENVS*2130 Eating Sustainably in Ontario F,W (3-0) [0.50]

This course is intended to introduce students to the science behind food related issues within the context of Ontario agriculture and food systems. The course will provide students with an overview of the history of agriculture in Ontario and an opportunity to discuss both sides of current debates over food production and associated environmental and human health issues.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 4.00 credits

**Restriction(s):** May not be taken by students in the BAS, BBRM, BSC, BSC(Agr) or BSC(Env) programs

**Department(s):** School of Environmental Sciences

### ENVS*2210 Apiiculture and Honey Bee Biology F,W (3-0) [0.50]

This course is designed to acquaint the student with the broad field of beekeeping. It will include honey bee biology and behaviour, management for honey production, products of the hive, pests and enemies and the value of bees as pollinators of agricultural crops.

**Offering(s):** Also offered through Distance Education format.

**Department(s):** School of Environmental Sciences

### ENVS*2220 Communications in Environmental Science F,W (4-0) [0.50]

This course provides students with direct training in the academic skills used in researching and communicating environmental science. Within the context of current problems in environmental science, students will develop skills in library research, statistical interpretation, oral and poster presentation and written communication to diverse audiences. Students will research and report on scientific issues within environmental issues being reported in the media.

**Prerequisite(s):** 1 of ENVM*1000 , ENVM*1200 , ENVS*1030

**Restriction(s):** Registration in BBRM, BSC(Env) or BSC(Agr) programs.

**Department(s):** School of Environmental Sciences
**ENVS*2240 Fundamentals of Environmental Geology F (2-3) [0.50]**

This course introduces the concepts and real-world examples of environmental issues related to plate tectonics, natural resources and igneous, metamorphic and sedimentary processes and rocks, groundwater and structural geology. Students will develop laboratory skills in rock and mineral identification, geological map interpretation and site characterization.

**Prerequisite(s):** GEOG*1300

**Restriction(s):** ENVS*1050

**Department(s):** School of Environmental Sciences

**ENVS*2250 Geology of Natural Disasters S/W (3-0) [0.50]**

This course will offer insight into the mechanisms of natural geological disasters and their effects on Planet Earth, human civilization and life in general. Events before, during and after geological disasters such as earthquakes, volcanic eruptions, meteorite impact and climate change will be the focus of this course. This course will not count as a science credit for B.Sc. students.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** 1 of ENVS*1050 , ENVS*1060, GEOL*1050 , GEOL*1100 , GEOG*1300, GEOG*1350

**Equate(s):** GEOL*2250

**Department(s):** School of Environmental Sciences

**ENVS*2270 Impacts of Climate Change F,W (3-0) [0.50]**

This course will provide students with an overview of recent research into what climate change means for Canada and Canadians. Students will learn about evidence for significant changes to the Boreal forests and about the potential impacts of climate change on human health through increasing heat waves and the heat stress on individuals. The course is intended to bridge the gap between abstract discussion of the climate and understanding what these changes mean at both personal and societal levels.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** Minimum of 4.00 credits

**Restriction(s):** May not be taken by students in the BAS, BBRM, BSC, BSC(Agr) or BSC(Env) programs

**Department(s):** School of Environmental Sciences

**ENVS*2310 Introduction to Biogeochemistry W (4-0) [0.50]**

This course introduces aspects of Earth science that are critical to understanding environmental issues with societal impacts. Students will gain a basic understanding of biogeochemical cycling by exploring how biological processes control element fluxes between water, air, and earth materials. Topics of current interest, such as resource extraction, climate change and geoenvironmenting will be discussed in terms of their contributions to major element cycles. Seminars include quantitative exercises, hands-on exercises, and discussions to complement topics covered in the lectures.

**Prerequisite(s):** CHEM*1040, ENVS*1030

**Department(s):** School of Environmental Sciences

**ENVS*2330 Current Issues in Ecosystem Science and Biodiversity F (4-0) [0.50]**

This course provides an introduction to a range of specific environmental and scientific issues relating to ecological sciences. Issues to be covered include the biology of climate change, forest science and management of terrestrial ecosystems. Three examples of current problems of societal concern will be used as starting points to examine the role of science in addressing them, while developing students' knowledge of the underlying science and its relation to policy and economics.

**Prerequisite(s):** 1 of BIOL*1050, BIOL*1070, ENVM*1000 , ENVM*1200 , ENVS*1030

**Equate(s):** ENVB*2030

**Restriction(s):** ENVB*3330, ENVS*2150

**Department(s):** School of Environmental Sciences

**ENVS*3000 Nature Interpretation F,W (2-3) [0.50]**

This course explores communication and experiential learning theories and their application to natural history interpretation and environmental education program design and delivery. Students will develop interpretive materials, plan an interpretive walk and deliver the interpretive walk to a community group.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** BIOL*2060

**Equate(s):** ENVB*3000

**Department(s):** School of Environmental Sciences

**ENVS*3010 Climate Change Biology S,F (3-0) [0.50]**

This course examines the impacts of climate change on living organisms, biological communities and ecosystems. The course focuses on what is known, and what is not known, about the ways in which the suite of changing climate variables influence biological systems.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** BIOL*2060

**Equate(s):** ENVB*3010

**Department(s):** School of Environmental Sciences

**ENVS*3020 Pesticides and the Environment F,W (3-0) [0.50]**

This course examines the role and use of pesticides by various facets of society and the effect of these pesticides on biological activities in the environment. Preparation of a research proposal is required for the course.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 1 of BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090), CHEM*1040

**Equate(s):** ENVB*3030

**Department(s):** School of Environmental Sciences

**ENVS*3030 Conservation Field Course F (0-6) [0.50]**

This course provides an opportunity for students to practice field skills in natural resource sciences. Topics will include forestry, ecological restoration, stream and wetland conservation, park and trail management, and nature conservation. Use of air photography and related data together with field guides will be emphasized. Guest professionals will assist with instruction on some topics, providing an opportunity for exposure to careers in this field. This course requires participation in a two week field experience held in early May, followed by field work during the summer, and a reflective evaluation in the Fall semester. This course must be recorded as part of your Fall course section and tuition and compulsory fees will be calculated accordingly. There is an extra fee to partially cover field costs.

**Prerequisite(s):** 9.00 credits

**Equate(s):** NRS*3030

**Restriction(s):** Instructor consent required.

**Department(s):** School of Environmental Sciences

**ENVS*3040 Natural Chemicals in the Environment F (3-0) [0.50]**

This course explores the roles of naturally occurring chemicals in the inter-relationships of organisms, and the historical and current uses of natural chemicals by humans for agricultural and medicinal purposes.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090)

**Equate(s):** ENBV*3040

**Department(s):** School of Environmental Sciences

**ENVS*3050 Microclimatology W (3-0) [0.50]**

This course examines natural and intentionally-modified microclimates near the earth's surface; energy budgets; transport of mass and heat. Familiarization with some instruments for micrometeorological measurements will be required.

**Prerequisite(s):** ENVS*2030

**Department(s):** School of Environmental Sciences

**ENVS*3060 Groundwater W (3-0) [0.50]**

This course provides an overview of the physical and chemical processes that operate in the groundwater zone under natural and human-induced conditions. The interrelations between the groundwater regime and the other components of the hydrological cycle are studied. Considerable emphasis is placed on the applied aspects of topics such as exploration, testing and development of aquifers for water supply, the chemical quality of groundwater, and the hydrogeological aspects of waste disposal.

**Prerequisite(s):** ENVS*2030

**Department(s):** School of Environmental Sciences

**ENVS*3080 Soil and Water Conservation F (3-0) [0.50]**

This course examines the processes leading to deterioration of soil and water quality, the impact of deterioration on use, and preventative or corrective measures: soil erosion by water and wind, soil compaction and salinization, drainage channel maintenance, sedimentation and nutrient enrichment of water, conservation programs and policies, and reclamation of severely disturbed soils and saline-sodic soils. Emphasis will be on concepts and solutions to problems in a systems approach.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** 1 of AGR*2320, ENVS*2060, SOIL*2010

**Equate(s):** BIOL*2060

**Department(s):** School of Environmental Sciences
ENVS*3090 Insect Diversity and Biology W (3-3) [0.50]
This course is an overview of insect diversity and biology emphasizing groups of importance in conservation biology, outdoor recreation and economic entomology. Labs focus on insect identification and the development of a small insect collection.
Prerequisite(s): BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090)
Equate(s): ENVB*3090
Department(s): School of Environmental Sciences

ENVS*3100 Internship/Externship in Environmental Sciences S,F,W (0-6) [0.50]
This is a student initiated experiential learning opportunity to be undertaken either on or off campus, and developed in consultation with the Director of the School of Environmental Sciences. Details of the proposed activities will be outlined in a learning contract initiated by the student and agreed by the Director and an appointed project advisor prior to the commencement of the work experience. The supervisor will also provide a description of the project and/or the work experience. This course is intended for experiential learning which does not fit under an academic independent study and which is not part of the co-op work term.
Offering(s): Last offering - Summer 2019
Prerequisite(s): 12.00 credits including (1 of ENVM*1000, ENVM*1200, ENVS*1020, ENVS*1030)
Restriction(s): Director consent required.
Department(s): School of Environmental Sciences

ENVS*3140 Management of Turfgrass Diseases F (2-2) [0.50]
In this course ecology of turfgrass diseases and cultural methods of management will be emphasized, in addition to field recognition and microscopic diagnosis of diseases. Advances in biological and chemical control measures and their impact on turfgrass ecosystems and surrounding environments will also be discussed.
Prerequisite(s): HORT*2450
Equate(s): ENVB*3160
Restriction(s): DTM*3200
Department(s): School of Environmental Sciences

ENVS*3150 Aquatic Systems W (3-2) [0.50]
In this course students will be taught how to apply quantitative methods to the analysis of aquatic systems of the earth from many simultaneous perspectives. The material will include the physical, chemical and biological components of the various liquid surficial structures and processes and also how they interact with humans. The economic, social and policy implications of humans interacting with aquatic systems will also be emphasized. The history of the analysis of aquatic systems will be systematically included in the material.
Prerequisite(s): 10.00 credits including (1 of BIOL*1030, BIOL*1040) or (1 of BIOL*1070, BIOL*1090), CHEM*1040
Restriction(s): BIOL*3450
Department(s): School of Environmental Sciences

ENVS*3180 Sedimentary Environments F (3-3) [0.50]
This course examines the principles of sedimentology and stratigraphy as applied to various ancient and modern sedimentary systems. Students will learn to describe and interpret sedimentary deposits in terrestrial and marine systems as well as the larger forces that control the preservation and evolution of these sedimentary systems over geological time. The course includes several field trips.
Prerequisite(s): ENVS*1050 or ENVS*2240
Restriction(s): ENVS*2400
Department(s): School of Environmental Sciences

ENVS*3210 Plant Pathology F (2-3) [0.50]
This course examines the nature of disease in plants, including their causal agents, etiology, biology, epidemiology, and management. Emphasis is placed on the historical and social importance of plant diseases, and on current issues in plant health. Each student is required to make a collection of 20 plant disease specimens. Students must contact the course instructor before starting their collection.
Prerequisite(s): 1 of BIOL*1040, BIOL*1050, BIOL*1070
Equate(s): ENVB*3210
Department(s): School of Environmental Sciences

ENVS*3220 Terrestrial Chemistry F (4-0) [0.50]
This course surveys the behaviour of elements in the Earth's surface environments, encompassing soils and saturated (wetland, lake, river) sediments. The course is focused on understanding the factors that control the chemical processes governing soils and freshwater sediments through the reactions of the elements and molecules that they contain. Students will extend their fundamental understanding of chemistry to the material of the Earth's upper crust.
Prerequisite(s): CHEM*1050, (1 of ENVS*1050, ENVS*2060, ENVS*2240)
Department(s): School of Environmental Sciences

ENVS*3230 Agroforestry Systems F (2-2) [0.50]
The planned and systematic integration of trees into the agricultural landscape can potentially result in sustainable environmental, ecological, economic and social benefits. The key aspects of deriving these benefits, associated science and management considerations, application potentials at the landscape level and adoption challenges will be discussed. Common temperate and tropical agroforestry systems (e.g. intercropping of trees and crops) will be discussed. Emphasis will be given to successful research and development case studies.
Prerequisite(s): 5.00 credits, (1 of BIOL*1040, BIOL*1050, BIOL*1070)
Equate(s): ENVB*3230
Department(s): School of Environmental Sciences

ENVS*3250 Forest Health and Disease F (2-2) [0.50]
The impact of beneficial and pathogenic microorganisms on forest health, and the biology and management of tree diseases in natural and urban ecosystems is covered in this course. Emphasis will be placed on ecological processes, host-pathogen interactions, mutualistic associations, wood decay, and human impacts on tree health.
Prerequisite(s): 1 of BOT*2100, ENVB*2300, ENVS*2040, ENVS*2330
Equate(s): ENVB*3250
Department(s): School of Environmental Sciences

ENVS*3270 Forest Biodiversity W (4-0) [0.50]
This course examines biodiversity in forest ecosystems at a variety of scales from genes to landscapes. Relationships between biodiversity and forest ecosystem structure, function, and stability are explored. Approaches to conserving biodiversity in managed forests are discussed and evaluated. Analysis of the relevant scientific literature and practical experience with methods of quantifying biodiversity are emphasized in the weekly seminar.
Prerequisite(s): 1 of BIOL*2060, BOT*3050, ENVS*2330
Equate(s): ENVB*3270
Department(s): School of Environmental Sciences

ENVS*3290 Waterborne Disease Ecology F (3-2) [0.50]
This course examines emerging and re-emerging waterborne diseases (bacterial, protozoan, and viral) as a function of environmental change (including chemical and biological pollution and climate change). Waterborne diseases, in freshwater and marine ecosystems, will be examined from historical and contemporary issues as they relate to public and environmental health from regional, national, and international perspectives. Topics presented within the course will include current waterborne diseases of humans and aquatic fauna, detection of waterborne pathogens, microbial evolution, microbial physiology, water regulations and protection of drinking water.
Prerequisite(s): (ENVS*2080 or ENVS*2320 or [MBG*2040, (BIOL*2060 or MICR*2420)])
Department(s): School of Environmental Sciences

ENVS*3300 Introduction to Controlled Environment Systems W (3-0) [0.50]
Canada is among the world's leading providers of research and technology development devoted to "biological life support" for humans on long duration space exploration missions. Students will be exposed to the broad scope of research activities and infrastructure at the UoG's Controlled Environment Systems Research Facility which represents Canada's main contribution to this field internationally. Discussions will focus on the technical challenges faced by space explorers and how the solutions relate to knowledge and technology transfer to Earth-based problems in issues from the environment to the economy. Students will prepare papers and discussions on relevant topics.
Prerequisite(s): BIOL*1070
Department(s): School of Environmental Sciences

ENVS*3310 Soil Biodiversity and Ecosystem Function W (4-0) [0.50]
Soils are the site of complex interactions between minerals, water, air, organic matter and living organisms. This course will focus on the organisms that live in the soil and their activities in soil ecosystems, soil as a habitat for organisms, the key role of microorganisms in nutrient cycles and plant-microbe relationships and will review basic soil microbial and ecological principles.
Prerequisite(s): 10.00 credits including (1 of AGR*2320, ENVS*2060, SOIL*2100)
Equate(s): ENVS*3310, SOIL*3300
Department(s): School of Environmental Sciences
ENVS*3340 Use and Management of Environmental Data F (2-3) [0.50]
This course is focused on finding, collecting and interpreting data of the physical environment. Students will access various online databases, such as meteorological and hydrological time series, and perform and interpret statistical analysis with the data. Issues around calibration and data collection will be explored by performing calibrations and experiments. Students will make a numerical simulation of a dynamic environmental phenomenon. Students will learn to build and query a relational database with both qualitative and quantitative data.
Prerequisite(s): 1 of GEOG*2460, STAT*2040, STAT*2060
Restriction(s): ENVS*4110
Department(s): School of Environmental Sciences

ENVS*3370 Terrestrial Ecosystem Ecology W (3-0) [0.50]
In this course, the ecosystem is the biological level of organization of interest. Living organisms and their physical environment are considered as components of an integrated system. Key ecosystem processes such as energy flow, carbon and nutrient cycling, and succession, and the controls on these processes, are examined. The impacts of human activity and global change on ecosystem structure and function are investigated.
Prerequisite(s): BIOL*2600 or ENVS*2330
Department(s): School of Environmental Sciences

ENVS*3410 Independent Research I S,F,W (0-6) [0.50]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course introduces third year students to independent research. Projects may be designed to be completed in a single semester, or they may be designed to be completed over two semesters, in conjunction with ENVS*3420. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A School registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offering(s): Last offering - Summer 2019
Prerequisite(s): Minimum of 10.00 credits. Minimum cumulative average of 70%. 
Restriction(s): Envs*3430 Instructor consent required. Restricted to students in BBRM.EM, BSC(Env), BSC(Agr) or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*3420 Independent Research II S,F,W (0-6) [0.50]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course introduces third year students to independent research. Projects may be a continuation of research conducted in ENVS*3410, or they may be on a separate research topic. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A School registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offering(s): Last offering - Summer 2019
Prerequisite(s): Envs*3410. Minimum of 10.00 credits. Minimum cumulative average of 70%.
Restriction(s): Envs*3430 Instructor consent required. Registration in BBRM.EM, BSC(Env), BSC(Agr) or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*3430 Independent Research I S,F,W (0-12) [1.00]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course introduces third year students to independent research. Projects may be a continuation of research conducted in ENVS*3410, or they may be on a separate research topic. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offering(s): Last offering - Summer 2019
Prerequisite(s): Envs*3410. Minimum of 10.00 credits. Minimum cumulative average of 70%.
Restriction(s): Envs*3430 Instructor consent required. Registration in BBRM.EM, BSC(Env), BSC(Agr) or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*3430 Independent Research II S,F,W (0-12) [1.00]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course introduces third year students to independent research. Projects may be a continuation of research conducted in ENVS*3410, or they may be on a separate research topic. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A School registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offering(s): Last offering - Summer 2019
Prerequisite(s): Envs*3410. Minimum of 10.00 credits. Minimum cumulative average of 70%.
Restriction(s): Envs*3430 Instructor consent required. Registration in BBRM.EM, BSC(Env), BSC(Agr) or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*3510 Independent Study I S,F,W (0-6) [0.50]
This course introduces students to independent research and study. Students will undertake a project based on research in the literature that relates to environmental sciences. Projects may be a continuation of research conducted in ENVS*3510, or they may be on a separate research topic. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A School registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offering(s): Last offering - Summer 2019
Prerequisite(s): Envs*3510. Minimum cumulative average of 70%.
Restriction(s): Envs*3530 Instructor consent required. Restricted to students in BBRM.EM, BSC(Env), BSC(Agr) or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*3520 Independent Study II S,F,W (0-6) [0.50]
This course introduces students to independent research and study. Students will undertake a project based on research in the literature that relates to environmental sciences. Projects may be a continuation of research conducted in ENVS*3510, or they may be on a separate research topic. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A School registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offering(s): Last offering - Summer 2019
Prerequisite(s): Envs*3510. Minimum cumulative average of 70%.
Restriction(s): Envs*3530 Instructor consent required. Restricted to students in BBRM.EM, BSC(Env), BSC(Agr) or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*4011/2 Project in Environmental Sciences F,W (3-0) [0.50]
This course introduces students to independent research and study. Students will undertake a project based on research in the literature that relates to environmental sciences. Projects may be a continuation of research conducted in ENVS*3510, or they may be on a separate research topic. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A School registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offering(s): Last offering - Summer 2019
Prerequisite(s): Envs*3510. Minimum cumulative average of 70%.
Restriction(s): Envs*3530 Instructor consent required. Restricted to students in BBRM.EM, BSC(Env), BSC(Agr) or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*4000 Toxicological Risk Assessment W (3-0) [0.50]
This advanced course will give students a working knowledge of current processes and techniques for toxicological risk characterization. The course material will cover problem definition, effect characterization, exposure characterization, risk assessment and risk management decision making.
Prerequisite(s): TOX*2000
Department(s): School of Environmental Sciences

ENVS*4001 Project in Environmental Sciences F (3-0) [0.50]
First part of the two-semester course ENVS*4001/2. Refer to ENVS*4001/2 for course description.
Equate(s): ENVS*4001
Restriction(s): 12.00 credits, Registration in the BSC(Env) program.
Department(s): School of Environmental Sciences

ENVS*4002 Project in Environmental Sciences W (3-0) [0.50]
This is the second part of the two-semester course ENVS*4001/2. Refer to ENVS*4001/2 for course description.
Prerequisite(s): ENVS*4001
Equate(s): ENVS*4002
Department(s): School of Environmental Sciences

ENVS*4004/1 Project in Environmental Sciences F-W (3-0) [1.00]
The course permits the student the opportunity to integrate both the skills and knowledge acquired in earlier courses through application to current environmental problems and issues. Group research problems and exposure to critical environmental policy issues will form the core elements of the course. This is a two-semester course offered over consecutive semesters. When you select it you must select ENVS*4001 in the Fall semester and ENVS*4002 in the Winter semester. A grade will not be assigned to ENVS*4001 until ENVS*4002 is completed.
Equate(s): ENVS*4001/2
Restriction(s): 12.00 credits, Registration in the BSC(Env) program.
Department(s): School of Environmental Sciences

ENVS*4005 Project in Environmental Sciences W (3-0) [0.50]
ENVS*4030 Ecological Hydrology W (3-0) [0.50]
This course introduces the emerging discipline of ecological hydrology, which focuses on interactions and feedbacks between the elements of the water cycle, ecosystems and organisms. The emphasis will be on how hydrological processes regulate ecological ones but also on the mechanisms of ecological regulation of hydrological processes – which are often ignored in traditional hydrological investigations. Students will learn about complex dynamics prevailing in ecological hydrological systems using a blend of theory, quantitative tools and case studies. Students will also learn to synthesize recent literature, collect and analyze relevant data from open-access databases, and perform holistic ecological hydrological system analysis through a term project.
Prerequisite(s): (BIOL*3130 or GEOG*3610), (1 of GEOG*2460, STAT*2040, STAT*2060, STAT*2120, STAT*2230)
Department(s): School of Environmental Sciences

ENVS*4070 Pollinator Conservation W (3-0) [0.50]
This course will explore the ecology of pollination with an emphasis on the roles animals play in pollen movement. Students will critically examine hypothesized drivers of regional, national and global pollinator declines, and the range of potential strategies suggested to mitigate or reverse these declines. Students will examine the efficacy of a wide range of pollinator conservation strategies in different geographical, ecological and economic contexts to help them build an understanding of the available toolbox for conservation.
Prerequisite(s): BIOL*3130
Department(s): School of Environmental Sciences

ENVS*4090 Soil Management F (3-1) [0.50]
A lecture-tutorial course on the practical aspects of soil management for crop production as they relate to the physical, chemical and biological properties of soils; major emphasis is placed on soil fertility as related to field soil properties and fertilizer, lime and manure use, soil and plant testing for mineral nutrients. The beneficial aspects of drainage, irrigation, erosion control and related tillage practices on soil fertility are also presented. Due regard is given to both economic and environmental aspects of soil management practices.
Prerequisite(s): 1 of AGR*2301/2, AGR*2320, ENVS*2060, SOIL*2010
Equate(s): SOIL*4090
Department(s): School of Environmental Sciences

ENVS*4100 Integrated Management of Invasive Insect Pests W (3-3) [0.50]
This course explores the concept of integrated pest management as it applies to the mitigation of invasive pest insects associated with agricultural and forest ecosystems.
Prerequisite(s): 1 of CROP*3300, CROP*3310, ENVB*2040, ENVB*2060, HORT*3280, HORT*3350, HORT*3350
Equate(s): ENVB*4100
Department(s): School of Environmental Sciences

ENVS*4160 Soil and Nutrient Management F (4-3) [0.50]
This course consists of the same lectures and seminars as (ENVS*4090 or SOIL*4090), but with an additional laboratory. The laboratory portion will focus on the regulatory requirements as stated under the Nutrient Management Act, 2001. Students will discuss nutrient management issues and gain practical experience using the NMAN software program.
Prerequisite(s): 1 of AGR*2301/2, AGR*2320, ENVS*2060, SOIL*2010
Equate(s): SOIL*4130
Restriction(s): ENVY*1070, ENVY*4090 or SOIL*4090
Department(s): School of Environmental Sciences

ENVS*4180 Insecticide Biological Activity and Resistance W (4-0) [0.50]
This course explores the diverse modes of action of botanical, microbial and synthetic insecticides. Detoxification mechanisms, selectivity, resistance management and the process of pesticide discovery and development are also considered. The course includes a review of insect physiological systems and discussion of the stability and distribution of pesticides in the environment.
Offering(s): Offered in even-numbered years.
Prerequisite(s): Minimum of 12.00 credits
Restriction(s): ENVB*4240, Registration in the BAS, BBRM, BSC, BSC(Agr) or BSC(Env) program
Department(s): School of Environmental Sciences

ENVS*4190 Biological Activity of Herbicides W (3-0) [0.50]
This course explores the diverse modes of action of botanical, microbial and synthetic herbicides. Detoxification mechanisms, selectivity, resistance management and the process of herbicide discovery and development are also considered. The course includes a review of plant physiological systems and discussion of the stability and distribution of herbicides in the environment.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): Minimum of 12.00 credits
Restriction(s): ENVB*4240, Registration in the BAS, BBRM, BSC, BSC(Agr) or BSC(Env) program
Department(s): Department of Plant Agriculture

ENVS*4210 Meteorological and Environmental Instrumentation W (3-0) [0.50]
This course covers the design and implementation of measurement systems for atmospheric and environmental studies. Principles of operation and practical consideration of various meteorological and soil sensors will be discussed along with overall design and implementation procedures for environmental monitoring. Students will propose and perform a small independent experiment or field measurement of their own design.
Prerequisite(s): 1 of ENVS*3050, ENVS*3130, ENVS*3340, PHYS*3100
Equate(s): MET*4210
Department(s): School of Environmental Sciences

ENVS*4230 Biology of Aquatic Insects F (2-3) [0.50]
This course is a study of the adult and immature forms of aquatic insects. Students are required to present a collection of at least 200 insect specimens identified to genus.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): ENVB*3090 or ENVS*3090
Equate(s): ENVB*4220
Department(s): School of Environmental Sciences

ENVS*4260 Field Entomology FW (1-6) [0.50]
This course is taught in late April or May. Students may enroll in either the preceding Winter semester or following Fall semester. The course provides an introduction to insect sampling, observation, identification, and experimentation in field settings. Student activities are divided equally between observing, collecting and identifying specimens from more than 20 families and an experimental component involving one or more studies to test hypotheses about the ecology or behaviour of insects. There are occasional lectures and discussions to highlight particularly interesting observations of insects. Student evaluation is based on the student's insect collection and associated labbook, a written paper describing their experiment, contributions to class discussions and activities, and peer evaluation. The field site is generally in the USA or South America. Course fees cover costs of room, board, supplies, and transportation to the field site(s). This course must be recorded as part of the student's Fall or Winter course selection and tuition and compulsory fees will be calculated accordingly. Detailed information is available from the Office of the Director - School of Environmental Sciences.
Prerequisite(s): (ENVB*3090 or ENVS*3090) or (ENVB*4040 or ENVS*4040)
Equate(s): ENVB*4260
Restriction(s): Instructor consent required.
Department(s): School of Environmental Sciences

ENVS*4320 Laboratory and Field Methods in Soil Biodiversity W (1-3) [1.00]
This course will use a hands-on approach to investigate concepts and develop skills needed for understanding key soil functions. Emphasis will be on the transformation of nutrients and contaminants in soils and groundwater by microorganisms. Approaches for analyzing microbial populations and activities in the environment, including molecular techniques will be covered.
Prerequisite(s): ENVS*3200 or ENVS*3310
Department(s): School of Environmental Sciences

ENVS*4350 Forest Ecology F (3-3) [0.50]
This course will explore aspects of forest ecology with an emphasis on the ecological principles needed for sound forest management. Biotic and abiotic components of forest ecosystems will be discussed in the context of energy flow, nutrient cycling, forest succession and appropriate silvicultural systems.
Prerequisite(s): (BIOL*2060 or ENVS*2330
Equate(s): ENVB*4780
Department(s): School of Environmental Sciences
ENVS*4360 Glacial Environments W (4-0) [0.50]
This course will explore modern to ancient glacial environments, focusing on the sedimentary record they leave behind and applications of glacial geology including reconstructing past environments, examining how glacial deposits affect the distribution of resources or groundwater contaminants, and discovering the response of glaciers to recent and past climate change. Students will develop skills in critically evaluating literature and geological data, description and identification of glacial deposits.
Prerequisite(s): ENVS*2400 or ENVS*3180
Department(s): School of Environmental Sciences

ENVS*4370 Environmental Organic Chemistry W (3-0) [0.50]
This course discusses the chemical processes that influence organic compounds in the environment, including both anthropogenic organic compounds, such as pollutants and pesticides, and natural organic matter, such as humic materials and biomolecules. Topics include: the occurrence of organic contamination in the environment, emerging classes of organic contaminants, the relationship between molecular structure and environmental fate, persistent organic pollutants, the transformation of organic molecules in the environment, and the origins and functionality of natural organic matter in terrestrial and aquatic environments.
Prerequisite(s): ENVS*3220
Department(s): School of Environmental Sciences

ENVS*4390 Soil Variability and Land Evaluation F (3-2) [1.00]
This course integrates formal in-field (including a two-day camp & excursions during orientation week) and laboratory training, with classroom discussions of concepts, to guide independent group projects on the gathering and interpreting of soilscape information. The principal focus is on soil, as a spatially- and temporally-variable product and component of ecosystems; special consideration is given to the factors controlling soil processes, from local to global scales. An examination of methods, for describing and quantifying the distribution of soils, includes survey and sensor-based techniques, in conjunction with data trend analysis and modelling. Students are required to notify the instructor in the preceding Winter semester of their intention to participate.
Prerequisite(s): 15.00 credits including (1 of AGR*2320, ENVS*2060, ENVS*2310, ENVS*2340, SOIL*2010)
Restriction(s): ENVS*3120, ENVS*4150, ENVS*4250, SOIL*4250
Department(s): School of Environmental Sciences

ENVS*4410 Introduction to Advanced Independent Research S,F,W (1-0) [0.50]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to provide senior undergraduate students with an introduction to independent research work. The course includes work with a faculty advisor to develop a research project, formulate hypotheses/objectives, design and conduct preliminary experiments to test the hypotheses. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Prerequisite(s): Minimum of 10.00 credits. Minimum cumulative average of 70%.
Restriction(s): Registration in BSC(Env), BSC(Agr), BSCH or BBRM. Instructor consent required.
Department(s): School of Environmental Sciences

ENVS*4420 Advanced Independent Research S,F,W (1-0) [0.50]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to provide a research intensive experience. This course is designed to be the completion of the research proposal developed in ENVS*4410. In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to provide a research intensive experience. This course is designed to be the completion of the research proposal developed in which the course is taken.
Prerequisite(s): ENVS*4410. Minimum cumulative average of 70%.
Restriction(s): ENVS*4430. Registration in BSC(Env), BSC(Agr), BSCH or BBRM. Instructor consent required.
Department(s): School of Environmental Sciences

ENVS*4430 Advanced Independent Research S,F,W (0-12) [1.00]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to be the completion of the research proposal developed in ENVS*4410 by the student in consultation with a faculty advisor. This course can be selected in place of ENVS*4420 if the student and faculty advisor deem the project to be of sufficient scope to necessitate a 1.00 credit course. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Prerequisite(s): ENVS*4410. Minimum cumulative average of 70%.
Restriction(s): ENVS*4420. Registration in BSC(Env), BSC(Agr), BSCH or BBRM. Instructor consent required.
Department(s): School of Environmental Sciences

ENVS*4510 Introduction to Advanced Independent Study S,F,W (1-0) [0.50]
This course provides an opportunity for students to engage in advanced independent research and study. Students will undertake a project based on research in the literature that relates to environmental sciences. Projects will be designed to be completed in a single semester. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Prerequisite(s): Minimum of 10.00 credits. Minimum cumulative average of 70%.
Restriction(s): Restricted to students in the BBRM.EM, BSCH, BSC(Agr), BSC(Env). Instructor consent required.
Department(s): School of Environmental Sciences

ENVS*4520 Advanced Independent Study II S,F,W (0-6) [0.50]
This course provides an opportunity for students to engage in advanced independent research and study. Students will undertake a project based on research in the literature that relates to environmental sciences. Projects may be a continuation of research conducted in ENVS*4510, or they may be on a separate research topic. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offerings(s): Last offering - Summer 2019
Prerequisite(s): ENVS*4510. Minimum of 14.00 credits. Minimum cumulative average of 70%.
Restriction(s): Restricted to students in the BBRM.EM, BSCH, BSC(Agr), BSC(Env). Instructor consent required.
Department(s): School of Environmental Sciences

ENVS*4530 Advanced Independent Study S,F,W (0-12) [1.00]
This course provides an opportunity for students to engage in advanced independent research and study. Students will undertake a project based on research in the literature that relates to environmental sciences. This project course is designed to provide an intensive study experience that is completed in a single semester. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.
Offerings(s): Last offering - Summer 2019
Prerequisite(s): (1 of ENVS*3510, ENVS*3520, ENVS*3530). Minimum of 14.00 credits. Minimum cumulative average of 70%.
Restriction(s): ENVS*4510, ENVS*4520. Restricted to students in the BBRM.EM, BSCH, BSC(Agr), BSC(Env). Instructor consent required.
Department(s): School of Environmental Sciences
Equine
Ontario Agricultural College, Department of Animal Biosciences

**EQN*1010 Introduction to Equine Management F (2-6) [1.00]**

This course provides the basis for understanding the equine industry, both from a practical and a theoretical perspective. Students will participate in daily routine care and management procedures, and learn basic techniques such as horse handling, grooming, bandaging, blanketting, tack, tractor driving and fire safety. Horse-environment interactions will focus on equine behaviour. The relationship of horses with humans will be explored from ancient through to modern times, including breeding for specific equestrian sports, prominent horsemen/women, and the variety of career options. Current issues will be explored including economic status and hot topics in the industry. Students may expect early morning and some weekend assignments. Students must provide their own grooming kit.

**Restriction(s):** ENVM*1090, EQN*1020, EQN*1030, EQN*1100 Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*2040 Equine Anatomy and Physiology W (3-3) [0.50]**

This course examines the gross anatomy and physiology of the horse. All the major body organs will be studied in relation to their function in the equine. Comparative analysis will be made to other domestic farm animals.

**Prerequisite(s):** BIOL*1050

**Restriction(s):** Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*2050 Introduction to Equine Nutrition W (3-3) [0.50]**

This course introduces fundamental concepts of nutrition from a biochemical perspective. The biological roles of carbohydrates, lipids and proteins are studied, as well as the role of metabolic pathways in maintaining equine health at the cellular, organ, and whole body levels. Diagnosis, management, and prevention of equine nutritional diseases are discussed.

**Prerequisite(s):** BIOL*1050

**Restriction(s):** Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*2060 Equine Event Management I F (1-3) [0.50]**

This course will introduce skills required to organize equine events, such as horse shows and clinics. Major topics include event planning, and managing event staff and volunteers. Required activities outside of regularly scheduled class hours will be assigned. Students will assist in the planning and staging of equine events either on or off campus.

**Prerequisite(s):** EQN*1010

**Restriction(s):** EQN*1060 Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*2070 Equine Event Management II W (1-3) [0.50]**

This course will further develop the skills required to organize equine events, such as horse shows and clinics. Major topics include regional impact, marketing and budgeting. Required activities outside of regularly scheduled class hours will be assigned. Students will assist in the planning and staging of equine events either on or off campus.

**Prerequisite(s):** EQN*2060

**Restriction(s):** EQN*1070 Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*2150 Equine Facility Management and Design W (3-2) [0.50]**

This course introduces students to the design, development and management of an equine facility. Aspects of the building, renovating and management of horse facilities including site planning and interior design are presented. Special consideration is given to environmental control, waste management and environmental stewardship. Management topics include theoretical and practical skills, interacting with people, recruiting, supervising, motivating, training employees, effective listening, dealing with difficult people, group dynamics and leadership.

**Restriction(s):** AGR*2100, EQN*1050, EQN*2020 Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*2200 Equine Industry Trends and Issues I F (3-0) [0.50]**

This course discusses selected current global, national and regional issues in the horse industry. Analysis of strengths, weaknesses, opportunities and threats are applied to controversial issues in classroom discussions and reflective critical thinking.

**Prerequisite(s):** EQN*1010

**Restriction(s):** Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*2500 Equine Field Course F (0-4) [0.50]**

In this 10-day field course, students will tour a selected area, visiting premier equine educational and industry locations managed by elite professionals. Students are exposed to a broad, high caliber learning experience from a variety of industry operations, providing a catalyst for future courses in the BBRM degree program. An additional fee will be assessed per student to cover the cost of transportation and accommodation. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Contact course instructor during the preceding March course selection period.

**Prerequisite(s):** EQN*1050 or EQN*2150

**Restriction(s):** Registration in BBRM.EQM. Instructor consent required.

**Department(s):** Department of Animal Biosciences

**EQN*3050 Equine Exercise Physiology W (3-0) [0.50]**

This course considers the conversion of absorbed nutrients into metabolic fuels and the use of these substrates for work and heat production in horses. This knowledge is used as a basis for the understanding of the training and performance of horses used for competitive purposes.

**Prerequisite(s):** ANSC*3080 or EQN*2040, EQN*2050

**Department(s):** Department of Animal Biosciences

**EQN*3060 Equine Reproduction W (3-3) [0.50]**

Students will develop a solid foundation in reproductive endocrinology and physiology in the stallion and the mare, emphasis on physiology, breeding management and recognition of common reproductive problems in stallion, mare or foal. Practical experience includes dissection of reproductive tracts, semen collection and evaluation.

**Prerequisite(s):** BIOL*1090, EQN*2040

**Restriction(s):** Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*3070 Equine Health Management F (3-3) [0.50]**

This course asks the equine student to apply principles of management to knowledge of the equine industry, equine facility design, biological systems and equine anatomy and physiology. The role of management in the optimization of the health of the horse is critical to success in the industry. Fundamental principles of horse health will be introduced including important indicators of individual and herd health, record keeping and the role of management in disease causation. Application of current, scientifically based management principles and techniques will ask the student to develop both proactive and reactive decision making skills in the context of equine health management.

**Prerequisite(s):** EQN*2040

**Restriction(s):** Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*3150 Equine Exercise Physiology Laboratory W (0-3) [0.50]**

This course is an additional laboratory component to complement EQN*3050. Lab exercises focus on the practical application of theoretical knowledge to develop an understanding for the basic physiological principles of muscle contraction and fatigue, thermoregulation, energy utilization under differing exercise intensities, and how these principles can be applied to differential training strategies for equine athletes.

**Prerequisite(s):** ANSC*3080, EQN*2040, EQN*2050

**Co-requisite(s):** EQN*3050

**Restriction(s):** Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences

**EQN*4020 Advanced Equine Nutrition W (3-0) [0.50]**

This course focuses on the nutrition of horses at peak levels of performance or endurance. The use of real-world, case-study scenarios allows for the evaluation of practical feeding programs across a range of equine performance situations.

**Prerequisite(s):** EQN*2050 or NUTR*3210

**Department(s):** Department of Animal Biosciences

**EQN*4400 Equine Industry Trends and Issues II F (3-0) [0.50]**

This seminar course integrates discussion on selected current global, national and regional issues in the equine industry, building upon knowledge gained in earlier courses. Current issues in the equine industry will be examined through debate and discussion.

**Prerequisite(s):** 12.50 credits including EQN*2200

**Restriction(s):** Registration in BBRM.EQM

**Department(s):** Department of Animal Biosciences
### EQN*4500 Equine Integrated Project F (0-6) [1.00]

This course facilitates education, communication and an exchange of ideas between students and equine businesses to enhance the development of the equine industry and its leaders. Student teams work together with an existing equine enterprise to develop and carry out a hands-on research project that is of benefit to the business owner. Students apply the knowledge gained in preceding courses in a holistic approach to the project as a culmination of their learning.

**Prerequisite(s):** 15.00 credits  
**Restriction(s):** EQN*3500, Registration in BBRM.EQM  
**Department(s):** Department of Animal Biosciences

### External Courses

All courses labeled XSEN*XXXX are Seneca College Courses. The corresponding Seneca course numbers are provided. Detailed course profiles can be accessed through the Seneca College home page at http://www.senecac.on.ca/. All XSEN*XXXX courses are limited to students B.Sc. Biological and Pharmaceutical Chemistry.

#### XSEN*3030 Pharmacology and Applied Toxicology W (3-3) [0.50]

This subject is an introduction to the general aspects of pharmacology and toxicology. The lecture topics will cover the pharmacological activity of drugs on the autonomic nervous system, central nervous system and the cardiovascular system. The laboratory practicals will focus on testing, drug screening, and clinical trial methodology. This course is taught at Seneca College.

**Prerequisite(s):** BIOC*2580, CHEM*2400  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PHT-533  
**Department(s):** Department of Chemistry

#### XSEN*3040 Occupational Health and Chemistry W (2-3) [0.50]

A general coverage of general aspects of industrial hygiene. Specific topics include Canadian legislation with respect to Occupational Safety, modes of evaluation of chemical exposure, occupational toxicology, and instrumentation associated with the evaluation of the occupational environment. This course is taught at Seneca College.

**Prerequisite(s):** CHEM*2700  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #OCC-433  
**Department(s):** Department of Chemistry

#### XSEN*3060 Pharmaceutical Analysis - Advanced W (2-3) [0.50]

This course reinforces the concept of how the pharmaceutical laboratory works by focusing on method validation requirements within the pharmaceutical industry. It introduces students to the regulatory (ICH, FDA) requirements and guidelines for systems validation, including TPP-acceptable methods and GMP regulations. Validation methods that are taught include Related Substances, Assay, Dissolution and Cleaning. Critical validation parameters (e.g., linearity, specificity, limit of quantitation, etc.) are focused on as well as validation protocols including establishing specifications and dealing with exceptions or out-of-specification (OOS) results. Process validation characteristics (i.e., Design Qualification (DQ), Installation Qualification (IQ), Operation Qualification (OQ), Performance Qualification(PQ) or System Suitability) are also emphasized as well as “Best Practices” such as Process Capabilities and Annual Product Review. This course is taught at Seneca College.

**Prerequisite(s):** BIOC*2580, CHEM*2400  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PHA-533  
**Department(s):** Department of Chemistry

#### XSEN*3070 Pharmaceutical Product Formulations W (2-3) [0.50]

This subject deals with the theoretical and practical aspects of pharmaceutical product formulation with an emphasis on semi-solid and liquid formulations. The students prepare and test ointments, creams, lotions, and syrups in the laboratory. Formulation as it relates to overall product stability and efficacy is also covered in both theoretical and practical terms. This course is taught at Seneca College.

**Prerequisite(s):** CHEM*3750  
**Restriction(s):** XSEN*4020 , Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PAC-633  
**Department(s):** Department of Chemistry

#### XSEN*3200 Pharmaceutical Organic Chemistry W (1-3) [0.50]

The determination of the structure of organic compounds using spectroscopic methods such as N.M.R. and mass spectroscopy are discussed. Correlation of structure and reactivity (i.e. drug activity) of organic compounds is also explored. A multi-step synthesis of an anesthetic (lidocaine) and mass-spectrometric analysis of an unknown organic compound (or mixture) are examples of lab-projects. This course is taught at Seneca College.

**Prerequisite(s):** CHEM*2700  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #IPM-472  
**Department(s):** Department of Chemistry

#### XSEN*3210 Introduction to Pharmaceutical Manufacturing W (2-3) [0.50]

This laboratory oriented course is intended to introduce students to the world of pharmaceutical analysis and manufacturing. Certain select physical and chemical techniques used in the control of raw materials and finished dosage forms are emphasized. Topics will include the methods and equipment required to produce solid dosages.

**Prerequisite(s):** CHEM*2700  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PPF-633  
**Department(s):** Department of Chemistry

**Prerequisite(s):** ECON*2560 or FIN*2000

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Economics and Finance
Family Relations and Human Development

Department of Family Relations and Applied Nutrition.

These courses support two majors offered by the Department of Family Relations and Applied Nutrition: Adult Development, and Child, Youth and Family.

FRHD*1010 Human Development W (3-0) [0.50]
This course is an introduction to the study of the development of the individual throughout the life cycle. Emphasis will be placed on the interrelationships between physiological, sociological and psychological aspects of normal human development.

Offering(s): Also offered through Distance Education format.
Restriction(s): Not available to Child, Youth & Family or Child, Youth & Family Co-op majors. This is a Priority Access course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*1020 Couple and Family Relationships W (3-0) [0.50]
A survey of family dynamics throughout the life course, emphasizing themes of power, intimacy and family diversity. Topics may include: gender socialization, sexuality, mate selection, communication, abuse, couple interaction, parent-child relations, divorce, remarriage.

Offering(s): Also offered through Distance Education format.
Equate(s): FRHD*2010
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*1100 Life: Health and Well-Being F (3-0) [0.50]
This course integrates the theory, application and research of various aspects of health-related topics across the lifespan, emphasizing relevance to the lives of young adults

Offering(s): Also offered through Distance Education format.
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2040 Principles of Program Design for Children W (3-0) [0.50]
This course will examine the elements involved in planning and implementing quality play-based programs for young children. Some of the issues include: the role of the teacher, meeting developmental needs, the materials and the organization of the environment, and instructional strategies. The course will involve a workshop component.

Prerequisite(s): FRHD*2270 or PSYC*2450
Restriction(s): Restricted to students in B.A.Sc. Program (CYF, CYF:C majors).
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2060 Adult Development and Aging F (3-0) [0.50]
This course provides an overview of major theoretical approaches, research issues and methodologies, and significant research findings which relate to adult development and aging.

Prerequisite(s): 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2100 Development of Human Sexuality F (3-0) [0.50]
This course covers a social scientific analysis of human sexuality. Emphasis will be placed on the development of sexuality within an interpersonal context.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4.50 credits
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2110 Children and Youth with Exceptionalities F (3-0) [0.50]
This course provides an overview of childhood exceptionalities including intellectual differences, communication disorders, sensory impairments, developmental and behaviour disorders, and health problems. Issues faced by the exceptional child as well as the parents and siblings are discussed.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of FRHD*1020, FRHD*2060, FRHD*2260, FRHD*2280, (FRHD*2270 or PSYC*2450)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2260 Infant Development W (3-0) [0.50]
This course is an examination of developmental principles and milestones characterizing infant development from conception to 24 months. Emphasis will be placed on understanding the nature of the reciprocal family-infant interactions during this period, and on the societal context influencing those interactions.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2270 Development in Early and Middle Childhood F (3-0) [0.50]
This course is an examination of development in the early and middle childhood years, with emphasis on family and societal contexts.

Prerequisite(s): 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100
Restriction(s): PSYC*2450 This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2280 Adolescent Development W (3-0) [0.50]
This course explores psychosocial development in adolescence, emphasizing physiological, social and emotional changes.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*2400 Introduction to Human Services W (3-0) [0.50]
This course explores the roles, responsibilities and competencies of work in human services, emphasizing the development of professional knowledge, skills and ethical values for working with individuals and families in a variety of settings. Major topics covered in this course will include working with diverse populations, developing professional communication skills, professional values and ethical practice, self-awareness, self-care, career exploration, program planning and implementation.

Prerequisite(s): 1 of FRHD*1010, FRHD*2060, FRHD*2270, FRHD*2280, PSYC*2450
Restriction(s): FRHD*2300 , FRHD*2350 . Restricted to students in BASc CYF, CYF:C, ADEV, ADEV:C
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3040 Parenting and Intergenerational Relationships W (3-0) [0.50]
This course is a study of research concerning parent-child relationships across the lifespan.

Prerequisite(s): 9.50 credits including FRHD*1020, (1 of FRHD*1100, FRHD*2060, FRHD*2260, FRHD*2270, FRHD*2280, PSYC*2450)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3060 Principles of Social Gerontology F (3-0) [0.50]
A study of social and health aspects of individual and population aging, including theories and implications for understanding and working with the elderly.

Prerequisite(s): 9.50 credits including (FRHD*1020 or SOAN*3100)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition
FRHD*3070 Research Methods: Family Studies F (3-0) [0.50]
This course is a critical examination of research methods in family studies.
Prerequisite(s): 4.50 credits
Restriction(s): Restricted to students in B.A.Sc.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3090 Poverty and Health W (3-0) [0.50]
This course offers an in-depth examination of the factors associated with poverty across the lifespan, with a focus on the relationships between poverty and health and development. Poverty within vulnerable groups, issues concerning inequality and strategies to address poverty will also be explored.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 9.50 credits including (FRHD*1010 or FRHD*1100)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3150 Strategies for Behaviour Change W (3-0) [0.50]
This course will review the nature and use of behaviour change strategies commonly used in interventions with children, youth, and their families.
Prerequisite(s): 2 of FRHD*1010, FRHD*2060, FRHD*2260, (FRHD*2270 or PSYC*2450), FRHD*2280
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3180 Observation and Assessment Laboratory F (2-1) [0.50]
Direct observation as a strategy for collecting information on children's behaviour in applied and research settings is the focus of this laboratory course. Emphasis will be placed on theory, recording and interpreting observational data and communicating findings in written reports.
Prerequisite(s): FRHD*2110, (1 of FRHD*2040, FRHD*2300, FRHD*2400)
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3190 Administration of Programs for Children S, W (3-0) [0.50]
This course will review the nature and use of behaviour change strategies commonly used in interventions with children, youth, and their families.
Prerequisite(s): 7.00 credits including (1 of FRHD*2260, FRHD*2270, PSYC*2450)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3200 Practicum I: Child F,W (3-12) [1.00]
This practicum provides students with a seminar and supervised experience with children and is designed to demonstrate the application of theory studied earlier in the program. It will also provide opportunities for working directly with young people while examining such topics as the role of the teacher, teacher-child interaction, and program implementation. Students wishing to enrol in this course must consult with the instructor during course selection.
Prerequisite(s): FRHD*2040
Co-requisite(s): FRHD*3180, FRHD*3400
Restriction(s): Registration in the B.A.Sc. program (Child, Youth and Family or Child, Youth and Family Co-op majors). Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3250 Practicum I: Youth F,W (3-12) [1.00]
Through seminar and supervised experience with youth, students will demonstrate the application of theory studied earlier in the program. This practicum course will also provide opportunities for working directly with youth in a community setting while examining the role of the professionals involved and the communication with youth and community members. Developing skills in programming planning, implementation, and evaluation is a primary objective. Students wishing to enrol in this course must consult with the instructor during course selection.
Prerequisite(s): FRHD*2300 or FRHD*2400
Co-requisite(s): FRHD*3180, FRHD*3400
Restriction(s): Registration in the B.A.Sc. program (Child, Youth and Family or Child, Youth and Family Co-op majors). Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3290 Practicum I: Adult Development F,W (3-12) [1.00]
This course offers students an opportunity to participate in supervised field placement in health and social service agencies. The practicum and seminar will develop students' helping roles in agencies and facilitate the integration and application of theoretical knowledge from previous course work with practice. It will also provide opportunities for students to work directly with individuals and/or groups and to participate in on-going programs or services. Students wishing to enrol in this course must consult with the instructor during the course selection period.
Prerequisite(s): FRHD*2350 or FRHD*2400
Co-requisite(s): FRHD*3400
Restriction(s): Restricted to students in B.A.Sc. ADEV, ADEV-C, ADFW, ADFW-C.
Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3300 Communication and Counselling Skills F,W (3-0) [0.50]
This course is an examination and analysis of the theories and methods of communication as applied within the processes of family counseling and consultation.
Prerequisite(s): 4.50 credits including (FRHD*1020 or FRHD*1100)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3500 Research Internship S,F,W (0-6) [0.50]
This course will give students a direct, initial experience in conducting research in Family Relations and Human Development. The internship focuses on familiarizing students with the research process and building research skills through active engagement in research under the direct guidance of a faculty member.
Prerequisite(s): FRHD*3070, STAT*2090
Restriction(s): Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4020 Family Theory F (3-0) [0.50]
This course analyses theoretical approaches and concepts in the study of the family.
Prerequisite(s): 12.50 credits including FRHD*1020
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4070 Topics in Family Relations and Human Development U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in family studies. To be conducted by regular or visiting faculty with expertise in the area. Students should check with the Department of Family Relations and Applied Nutrition to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate.
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4080 Topics in Family Relations and Human Development U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in family studies. To be conducted by regular or visiting faculty with expertise in the area. Students should check with the Department of Family Relations and Applied Nutrition to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate.
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition
FRHD*4190 Assessment in Gerontology F (2-2) [0.50]
This course provides an examination and critique of current methods of assessing older adults. Tools to be considered include those for assessing dementia, depression, and pain. Students will examine diagnostic criteria that form the underpinnings of most tests and then examine each test for its psychometric properties and appropriate use. An understanding of the ethical principles governing assessment will be gained.
Prerequisite(s): 14.50 credits including FRHD*2060
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4200 Issues in Human Sexuality W (3-0) [0.50]
An advanced analysis of sexual development. Specific attention will be given to sexual problems, and the concepts, methods and issues associated with sex education and counselling.
Prerequisite(s): FRHD*1020, FRHD*2100 and 1.00 credit at the 3000 level in Family Relations and Human Development, Psychology or Sociology
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4210 Senior Seminar in Early Education and Care F (3-0) [0.50]
The course offers a study of the historical and philosophical basis of programs for young children evaluated from a developmental perspective. Emphasis will be on current approaches and programs and contemporary issues in early childhood programming.
Prerequisite(s): FRHD*3200
Equate(s): CSTU*4210
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4250 Aging and Health W (3-0) [0.50]
This course offers upper level undergraduates a forum to explore issues related to aging and health across the adult life span. More specifically, the conceptual groundwork necessary for understanding the roles of the life span developmental perspective, individual development, physiological changes in human aging, contextual influences and interactions, and several models/theories of aging and health will be examined. A primary objective of the course is the integration of models and theory to facilitate understanding of aging and health topics. Topics include but are not limited to: age changes and disease processes (both acute and chronic); mental health and illness; medication use; disease prevention and health promotion; influence of health on family relationships, caregiving, and placement decisions; systemic and societal influences on health; and ethical issues and controversies surrounding the end-of-life care and decision making, advanced directives, assisted suicide, and death and dying.
Prerequisite(s): 10.00 credits including FRHD*2060
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4260 Social Policy and Gerontology W (3-0) [0.50]
This course examines aging and adult development in relation to social policy with special reference to families.
Prerequisite(s): 9.50 credits including FRHD*2060
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4290 Practicum II: Adult Development F,W (3-16) [1.00]
This course enables students to extend their knowledge and professional skills in a second supervised placement working with adults of all ages, and their families. A variety of institutional settings are considered (e.g., school systems, treatment agencies, youth residential programs, senior care facilities, hospitals). The complexities of professional practice with diverse populations are explored in depth. Professional communication skills and relevant legal aspects are also addressed.
Prerequisite(s): 14.00 credits including FRHD*3400
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4320 Social Policies for Children, Youth and Families W (3-0) [0.50]
This course focuses on current social policies, programs, and services that affect children's development and family well-being. Issues include policies that affect income security, parental effectiveness, social service provision, and community resources.
Prerequisite(s): 9.50 credits
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4330 Practicum II: Child F,W (3-16) [1.00]
This course enables students to extend their knowledge and professional skills in a second supervised placement working with children in a health, education or social service agency. The practicum and seminar provides students with additional opportunities to integrate theoretical knowledge with practice experiences. Students are expected to assume additional responsibilities related to program design and implementation and in their supervised work with individuals and/or groups.
Prerequisite(s): FRHD*3200 or FRHD*3250
Restriction(s): FRHD*4170, FRHD*4290, FRHD*4340, Restricted to students in CYF and CYF:C major. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4340 Practicum II: Youth F,W (3-16) [1.00]
This course enables students to extend their knowledge and professional skills in a second supervised placement working with youth in a health or social service agency. The practicum and seminar provides students with additional opportunities to integrate theoretical knowledge with practice experiences. Students are expected to assume additional responsibilities related to program design and implementation and in their supervised work with individuals and/or groups.
Prerequisite(s): FRHD*3200 or FRHD*3250
Restriction(s): FRHD*4170, FRHD*4290, FRHD*4340, Restricted to students in CYF and CYF:C major. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4350 Practicum III: Child F,W (3-16) [1.00]
This course provides advanced undergraduate students with further direct experience working primarily with children aged 0-12 years within the context of a community or school setting. Students will continue to develop applied skills in leadership, communication, teamwork, and reflective practice; implement and evaluate effective programs/programming; assess personal interests and strengths in working with children; develop an appreciation of the role of the family in these settings; and examine the role of continuous professional learning for early childhood professionals.
Prerequisite(s): FRHD*3200 or FRHD*3250
Restriction(s): FRHD*4170, FRHD*4290, FRHD*4340, Restricted to students in CYF and CYF:C major. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4400 Youth, Risk and Resilience W (3-0) [0.50]
This course examines biological, and social-contextual aspects of developmental issues evident in childhood and adolescence. The theoretical perspective of developmental psychopathology will be used to examine literatures relating to risk, resilience, developmental trajectories, classification, assessment, and intervention. Students will have a chance to critically examine many mental health issues commonly found in childhood and adolescence.
Prerequisite(s): 14.00 credits including (1 of FRHD*1010, FRHD*2060, FRHD*2270, FRHD*2280, PSYC*2450)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.

## Food, Agricultural and Resource Economics

### FARE*1400 Economics of the Agri-Food System W (4-0) [1.00]
This course introduces students to the major aspects of economics, business and resource use in the Canadian agrifood sector. Students will be exposed to the techniques used by agrifood firms to plan, invest and measure performance. Decision making under both certainty and uncertainty will be considered. Students will be shown how the market equilibrium model can be used to conduct welfare analysis and modified to account for imperfect competition and externalities.

**Restriction(s):** This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*2410 AgriFood Markets and Policy W (3-0) [0.50]
Students will be provided with an introduction to agrifood markets, policies and institutions. Focus will be placed on: the role and function of futures markets; domestic agrifood policies; and agrifood trade policies, instruments and institutions. Economic analysis of contemporary issues in agrifood markets will be emphasized.

**Prerequisite(s):** FARE*1040 or FARE*1400

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*2700 Survey of Natural Resource Economics F (3-0) [0.50]
This course examines how humans, within a society, allocate natural resources - e.g., water, land, forests, and fisheries. Economic concepts and methods provide the basis for discussing and understanding both the use and misuse of natural resources.

**Prerequisite(s):** 1 of ECON*1050, FARE*1040, FARE*1400

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*3000 Food Industry Analysis and Policy F (3-0) [0.50]
This course explores the structure and functioning of the post-farm gate food sector through an applied industrial organization lens. Attention focuses on: the economic and business structure of the post-farm gate food industry; the economics of research and development, and innovation and commercialization in the food sector; the price and non-price strategies used in the industry; the economics of food safety and quality; and regulations and standards as it relates to food processing, distribution and retailing.

**Prerequisite(s):** 9.50 credits including (1 of ECON*1050, FARE*1040, FARE*1400), (1 of ECON*2740, STAT*2040, STAT*2060)

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*3030 The Firm and Markets F (3-1) [0.50]
A course in microeconomic theory applied to agricultural economics research. The theory of the firm is used to analyze production and resource use in agriculture. Resource allocation issues, risk, responsive decision-making, and firm strategy on vertical and horizontal integration are studied. Consumer theory is used to analyze food purchase decision. How theoretical relationships are quantified and used in the analysis of public policy issues is emphasized.

**Prerequisite(s):** ECON*2310, ECON*2770, ECON*3740

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*3170 Cost-Benefit Analysis W (3-0) [0.50]
The primary objective of this course is to introduce students to the basic principles of Cost-Benefit Analysis so that they can evaluate the worthiness of a public project or policy. Special emphasis is given to the trade-offs associated with agricultural, environmental and natural resource policies.

**Prerequisite(s):** 1 of ECON*2100, ECON*2310, ECON*2650, FARE*2700

**Restriction(s):** This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*3250 Food and International Development F (3-0) [0.50]
This course provides students with an economic perspective on issues in international development related to food, agriculture, and household behaviors. Different economic theories and approaches are used to understand various economic phenomena in the development context. Students are encouraged to consider critically an economic approach to the analysis of development issues related to food and agriculture, alongside the perspectives of other social science disciplines. Throughout the course, food and agriculture as development issues are considered primarily on a micro level, with a special focus on household behavior and decision-making.

**Prerequisite(s):** (FARE*1040 or ECON*1050), (FARE*1300 or ECON*1100)

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*3310 Operations Management F,W (3-0) [0.50]
The decision-making role of the operations manager in transforming inputs into desired outputs is the primary focus of this course. The major issues and problems of designing, scheduling, operating, and controlling the production system will be examined.

**Prerequisite(s):** (ACCT*1220 or ACCT*2220 ), (1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060, STAT*2120)

**Restriction(s):** This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*3320 Supply and Value Chain Management F (3-0) [0.50]
This course focuses on the coordination of decision-making along food industry supply chains and networks to achieve strategic and operational goals. This course uses a case-based approach to instruct students in the principles of supply chain management and key concepts for the analysis of supply chain management issues.

**Prerequisite(s):** FARE*3310

**Restriction(s):** This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*4000 Agricultural and Food Policy W (3-0) [0.50]
A critical analysis of agricultural income, marketing, adjustment and trade problems and policies in the developed countries, with particular emphasis on Canadian agricultural policies.

**Prerequisite(s):** 15.00 credits including ECON*2310

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*4210 World Agriculture, Food Security and Economic Development F (3-0) [0.50]
This course examines the role of agriculture in determining food security within developing countries and in promoting overall processes of economic development. The course uses economic concepts to understand the inter-relationships between agriculture system and access to food, including the supply of food and the livelihoods of those engaged in the agri-food system. Analyses of economic policies and programs in developing countries and their effect on poverty, food security and economic development are conducted.

**Prerequisite(s):** 10.00 credits including (FARE*1040 or ECON*1050), ECON*1100

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*4220 Advanced Agribusiness Management W (3-0) [0.50]
This course is oriented toward practical application of theory and analytical principles to the identification, analysis and solution of an agribusiness organization/management problems. Students work on a major agribusiness project as management consultants with an owner/operator. The course builds upon students' prior training in accounting, finance, mathematical analysis, computer applications, economics, agriculture and management.

**Prerequisite(s):** 1 of FARE*2410, BUS*3320 , ECON*2770, MGMT*3320

**Department(s):** Department of Food, Agricultural and Resource Economics

### FARE*4240 Futures and Options Markets W (3-0) [0.50]
This course is an introduction to the study of the theory and application of futures, options and other derivative instruments for marketing, hedging, investment and speculative purposes. Emphasis is placed on applications of agricultural and financial instruments to real business situations.

**Prerequisite(s):** 10.00 credits including (1 of ECON*2560, ECON*3560, FARE*2410, MGMT*3320)

**Restriction(s):** This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Food, Agricultural and Resource Economics
**FARE*4290 Land Economics F (3-0) [0.50]**

The economics of property rights is applied to issues in the allocation of land among agricultural, urban and other uses: contemporary trends, problems and policies in land planning, including expropriation and regulatory takings, soil erosion policy, farmland protection policy, endangered species policy and landfills and recycling.

**Prerequisite(s):** (FARE*2700, or ECON*2310) 0.50 credits at the 3000 or 4000 level in FARE or ECON

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4300 Resource Economics W (3-0) [0.50]**

This course explores the role of property rights and related institutions in natural resource stewardship. Potential applications of this perspective to natural resource policy, both in Canada and internationally, are considered. Classes use a discussion-based approach.

**Prerequisite(s):** 1 of FARE*2700, ECON*2310, ECON*2100, 0.50 credits at the 3000 or 4000 level in FARE or ECON

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4310 Resource Economics W (3-0) [0.50]**

This course explores the role of property rights and related institutions in natural resource stewardship. Potential applications of this perspective to natural resource policy, both in Canada and internationally, are considered. Classes use a discussion-based approach.

**Prerequisite(s):** 1 of FARE*2700, ECON*2310, ECON*2100, 0.50 credits at the 3000 or 4000 level in FARE or ECON

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4330 Advanced Operations Management W (4-0) [0.50]**

This course focuses on the decision-making role of the operations manager. It provides students with the opportunity to explore and apply their knowledge in a case-based, project-based course addressing issues and topics in the food industry. The course focuses on the fundamental concepts, issues, and techniques for efficient and effective operations. Topics include location strategy, process strategy, forecasting, inventory management, scheduling, project management, queuing management, supply chain management, lean operations and maintenance.

**Prerequisite(s):** FARE*3320

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4360 Marketing Research W (3-0) [0.50]**

A study of the marketing research function in business with emphasis on its role in providing information to assist managers in making marketing decisions.

**Prerequisite(s):** 1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2050, STAT*2060, STAT*2080

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4370 Food & Agri Marketing Management F (3-0) [0.50]**

The course focuses on the decision-making role of the marketing manager who is responsible for formulating the strategic marketing plan for food and agricultural businesses. The theory of selecting market target(s) for the firm’s product and/or services and the development of the marketing mix (product, price, promotion, distribution) with the aid of market research is covered. Note: Students with credit for this course may not proceed to MCS*1000.

**Prerequisite(s):** 10.00 credits including 1 of ACCT*2230, AGEC*2230, BUS*2230, COST*2600, MCS*2600

**Equate(s):** MCS*4370

**Restriction(s):** This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4380 Retailing, Merchandising and Sales W (3-0) [0.50]**

This course explores the merchandising and sales function, strategies and practices used by the retail food sector. The course includes development and application of concepts tied to effective sales management, as well as strategies and approaches to undertaking retail merchandising. Where relevant, focus is placed on business-to-business or business-to-consumer approaches. Students will learn to plan, execute, and evaluate sales and retail merchandising programs in a variety of alternative distribution channels.

**Prerequisite(s):** FARE*3320, FARE*4370

**Restriction(s):** MCS*4060

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4500 Decision Science F (3-0) [0.50]**

Quantitative techniques such as classical optimization, mathematical programming, simulation and input-output models are applied to firm, interregional, industry, and international problem situations in agricultural economics, including those dealing with resources and the environment. Time and risk and uncertainty dimensions are addressed.

**Prerequisite(s):** ECON*2770

**Equate(s):** AGEC*4500

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4550 Independent Studies I S,F,W (3-0) [0.50]**

A project based independent study course for majors in Agricultural Economics (of the Bachelor of Arts or Bachelor of Science in Agriculture degree programs), Agribusiness (of the Bachelor of Commerce degree program), and Environmental Economics and Policy (of the Bachelor of Science in Environmental Sciences degree program).

**Prerequisite(s):** 10.00 credits including 1 of AGEC*2410, AGEC*2700, AGR*2401/2, FARE*2410, FARE*2700

**Restriction(s):** Instructor consent required. Permission of the instructor and Chair of the Department of Food, Agricultural and Resource Economics is required.

**Department(s):** Department of Food, Agricultural and Resource Economics

---

**FARE*4560 Independent Studies II S,F,W (3-0) [0.50]**

An opportunity to conduct a second independent study project for majors in Agricultural Economics (of the Bachelor of Arts or Bachelor of Science in Agriculture degree programs), Agribusiness (of the Bachelor of Commerce degree program), and Environmental Economics and Policy (of the Bachelor of Science in Environmental Sciences degree program).

**Prerequisite(s):** 10.00 credits including 1 of AGEC*2410, AGEC*2700, AGR*2401/2, FARE*2410, FARE*2700

**Restriction(s):** Instructor consent required. Permission of the instructor and Chair of the Department of Food, Agricultural and Resource Economics is required.

**Department(s):** Department of Food, Agricultural and Resource Economics

---
Food Science

Department of Food Science

FOOD*2010 Principles of Food Science S,W (3-0) [0.50]
The principles involved in the processing, handling and storage of foods are introduced in this course. The relationship of science and technology to food processing is discussed.
Offering(s): Offered through Distance Education format only.
Restriction(s): FOOD*2150, FOOD*3090, NUTR*2150
Department(s): Department of Food Science

FOOD*2100 Communication in Food Science W (3-0) [0.50]
Students will acquire basic skills in technical and business communication and be prepared to complete a variety of communication assignments in subsequent semesters. Students will learn and apply the principles of effective written and oral communication.
Restriction(s): Restricted to students in BSC.FOOD, BSC.FOOD:C, BBRM.FIM, BBRM.FIM:C majors
Department(s): Department of Food Science

FOOD*2150 Introduction to Nutritional and Food Science F (3-0) [0.50]
This interdisciplinary course provides an introduction to the Food and Nutritional Sciences from both historical and modern perspectives. Major themes are the nutritional and functional properties of food, nutrient assimilation, food preservation and safety, and the interactions between food processing, diets and health. (Also listed as NUTR*2150.)
Prerequisite(s): (BIOL*1040 or BIOL*1080), CHEM*1040
Equate(s): NUTR*2150
Restriction(s): FOOD*2100, FOOD*3090 Not available to students registered in BASC.AHN major.
Department(s): Department of Food Science

FOOD*2400 Introduction to Food Chemistry S (3-0) [0.50]
The chemistry and biochemistry of the major components of foods (lipids, proteins, carbohydrates and water/ice) are introduced in this course. In addition, an overview of some of the reactions and changes in food components which occur during processing, handling and storage will be presented. This course may not be taken for credit by students in the Food Science Major.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): CHEM*1040
Restriction(s): FOOD*3030, FOOD*3050
Department(s): Department of Food Science

FOOD*2410 Introduction to Food Processing W (3-0) [0.50]
Food processes and the relationships between chemistry, microbiology, and engineering as they apply to food processing are discussed. The following topics are included: high and low temperature processes; moisture control and intermediate moisture foods; concentration and dehydration processes; and novel food processing techniques.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): CHEM*1040, (1 of BIOL*1040, BIOL*1070, BIOL*1080, MICR*2420)
Restriction(s): FOOD*3160, FOOD*3170 Not available to students registered in BSC.FOOD or BSC.FOOD:C majors.
Department(s): Department of Food Science

FOOD*2420 Introduction to Food Microbiology F (3-0) [0.50]
An introduction to the major groups of microorganisms important in foods is presented in this course, including microbial spoilage of food, food-borne illness, and food fermentations. Sources of contamination during production, processing and storage of foods and evaluation of food processing conditions used to control the presence and/or growth of microorganisms in foods are discussed.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of BIOL*1040, BIOL*1070, MICR*2420
Restriction(s): FOOD*3230. FOOD*3240. Not available to students registered in BSC.FOOD or BSC.FOOD:C majors.
Department(s): Department of Food Science

FOOD*2620 Food Engineering Principles W (3-2) [0.50]
Introduction to engineering principles and operations in food processing including heat transfer, fluid flow, material and energy balances, instrumentation and process control concepts.
Prerequisite(s): (BIOC*2580 or CHEM*2880), (1 of MATH*1030, MATH*1080, MATH*1200)
Department(s): Department of Food Science

FOOD*3030 Food Chemistry I F (3-3) [0.50]
This course covers the fundamental principles of the chemistry of foods. The course will discuss selected topics related to the chemistry (physical, organic and analytical) and physics of the major components in food materials such as lipids, proteins, carbohydrates and water.
Prerequisite(s): BIOC*2580
Restriction(s): Registration is limited to students registered in the BSCH.FOOD, FOOD:C or BASC.AHN majors.
Department(s): Department of Food Science

FOOD*3040 Food Chemistry II W (3-0) [0.50]
This course covers the fundamental principles of the chemistry of foods, as a continuation of FOOD*3030. This course will discuss topics related to the chemistry (physical, organic and analytical) and physics of the major components in food materials such as lipids, proteins, carbohydrates and water. This course is the same as FOOD*3050, without the laboratory component.
Prerequisite(s): BIOC*2580
Restriction(s): FOOD*2400, FOOD*3030. Not available to students registered in BSCH.FOOD or FOOD:C majors.
Department(s): Department of Food Science

FOOD*3050 Food Chemistry I F (3-0) [0.50]
This course covers the fundamental principles of the chemistry of foods. The course will discuss selected topics related to the chemistry (physical, organic and analytical) and physics of the major components in food materials such as lipids, proteins, carbohydrates and water. This course is the same as FOOD*3040, without the laboratory component.
Prerequisite(s): FOOD*3030 or FOOD*3050
Restriction(s): FOOD*3040. Not available to students registered in BSCH.FOOD or BSCH.FOOD:C majors.
Department(s): Department of Food Science

FOOD*3060 Food Science II W (3-0) [0.50]
This course covers the fundamental principles of the chemistry of foods, as a continuation of FOOD*3050. This course will discuss topics related to the chemistry (physical, organic and analytical) and physics of emulsions and emulsifiers, pigments, flavors and flavor perception, enzymes and processing additives. This course is the same as FOOD*3040, without the laboratory component.
Prerequisite(s): FOOD*3030 or FOOD*3050
Restriction(s): FOOD*3040. Not available to students registered in BSCH.FOOD or BSCH.FOOD:C majors.
Department(s): Department of Food Science

FOOD*3090 Food Science and Human Nutrition F (3-2) [0.50]
This course will introduce students to the chemistry and microbiology of food and post-production food handling and processing. It will also introduce students to the role of food components in human nutrition and the interactions between diets and health. Food product development will integrate these two disciplines. Lectures will be taken simultaneously with students in FOOD*2150/NUTR*2150. Lectures will be supplemented with a series of laboratory assignments.
Prerequisite(s): (AGR*1250 or AGR*1110), (1 of BIOL*1040, BIOL*1050, BIOL*1080), CHEM*1040
Restriction(s): FOOD*2100, FOOD*2150, NUTR*2150. Restricted to students in BSC(Agr) as well as students in the Minor in Agriculture.
Department(s): Department of Food Science

FOOD*3140 Food Processing I F (3-0) [0.50]
This course builds on basic engineering principles to understand the operation of modern food processing plant facilities. The standard equipment used and the underlying principles that control their operation are examined for various high temperature (blanching, pasteurization, sterilization, evaporation, drying, extrusion) and ambient temperature (size reduction, homogenization, emulsification, centrifugation, filtration, extraction, irradiation) unit operations.
Offering(s): First offering - Fall 2020
Prerequisite(s): ENGG*2660 or [FOOD*2620, (MICR*2030 or MICR*2420)]
Restriction(s): FOOD*3160. Not available to students registered in BSC.FOOD or BSC.FOOD:C
Department(s): Department of Food Science

FOOD*3160 Food Processing I F (3-3) [0.75]
This course builds on basic engineering principles to understand the operation of modern food processing plant facilities. The standard equipment used and the underlying principles that control their operation are examined for various high temperature (blanching, pasteurization, sterilization, evaporation, drying, extrusion) and ambient temperature (size reduction, homogenization, emulsification, centrifugation, filtration, extraction, irradiation) unit operations.
Prerequisite(s): ENGG*2660 or [FOOD*2620, (MICR*2030 or MICR*2420)]
Department(s): Department of Food Science

Last Revision: July 4, 2019
2019-2020 Undergraduate Calendar
FOOD*3170 Food Processing II W (3-3) [0.50]
This course looks at various low temperature food processing unit operations (e.g., refrigerated storage, freezers, freeze dryers), the design and operation of ancillary food plant equipment (e.g., refrigeration, boiler, pumping, control, sanitation, water, and wastewater treatment systems) and integration of the various unit operations into a functioning food process.
Prerequisite(s): FOOD*3140 or FOOD*3160
Department(s): Department of Food Science

FOOD*3230 Food Microbiology F (3-3) [0.75]
Important groups of microorganisms associated with food spoilage, food fermentations, food infections and intoxications are discussed in this course. Intrinsic and extrinsic factors and their relationship to microbial growth, control of microorganisms by food processing and application of Hazard Analysis Critical Control Points (HACCP) programs are also discussed. This course is the same as FOOD*3230, without the laboratory component.
Prerequisite(s): MICR*2420
Restriction(s): FOOD*2420, FOOD*3240 Restricted to students in BSCH.FOOD, FOOD.C, MICR, MICR.C and BASC.AHN majors.
Department(s): Department of Food Science

FOOD*3240 Food Microbiology F (3-0) [0.50]
Important groups of microorganisms associated with food spoilage, food fermentations, food infections and intoxications are discussed in this course. Intrinsic and extrinsic factors and their relationship to microbial growth, control of microorganisms by food processing and application of Hazard Analysis Critical Control Points (HACCP) programs are also discussed. This course is the same as FOOD*3230, without the laboratory component.
Prerequisite(s): MICR*2420
Restriction(s): FOOD*2420, FOOD*3240 Restricted to students in BSCH.FOOD, FOOD.C, MICR, MICR.C and BASC.AHN majors.
Department(s): Department of Food Science

FOOD*3260 Industrial Microbiology W (3-3) [0.50]
The course will present microbiological and technological principles of the industrial application of microorganisms followed by specific examples. Lectures will cover the basics of metabolic pathways and how these can be manipulated through selection or genetic engineering to increase productivity. The main focus of the course will be in the production of alcoholic beverages but will also include production of biomass, solvents, amino acids and organic acids of direct relevance to the food industry. The laboratory component of the course will include wine production, beer brewing and dairy fermentations. Field trips to a commercial winery and brewery will also aid the learning experience.
Prerequisite(s): MICR*2420
Restriction(s): FOOD*3270 Students must be of legal drinking age in the Province of Ontario. Restricted to students in BSCH.FOOD, FOOD.C, MICR or MICR.C majors.
Department(s): Department of Food Science

FOOD*3270 Industrial Microbiology W (3-0) [0.50]
The course will present microbiological and technological principles of the industrial application of microorganisms followed by specific examples. Lectures will cover the basics of metabolic pathways and how these can be manipulated through selection or genetic engineering to increase productivity. The main focus of the course will be in the production of alcoholic beverages but will also include production of biomass, solvents, amino acids and organic acids of direct relevance to the food industry. Field trips to a commercial winery and brewery will also aid the learning experience. This course is the same as FOOD*3260, without the laboratory component.
Prerequisite(s): MICR*2420
Restriction(s): FOOD*3260 Students must be of legal drinking age in the Province of Ontario. Not available to students registered in BSCH.FOOD or BSCH.FOOD.C majors.
Department(s): Department of Food Science

FOOD*3340 Introduction to Food Analysis F (3-0) [0.50]
This course offers an introduction to quantitative analysis of foods by chemical, physical and instrumental means. Determination of both major and minor constituents of foods are discussed.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): FOOD*2400
Restriction(s): FOOD*4120, FOOD*4190
Department(s): Department of Food Science

FOOD*3700 Sensory Evaluation of Foods W (3-3) [0.50]
This course is an introduction to sensory science. Students will gain an understanding of the factors contributing to sensory perception of foods. Sensory methodology and statistical tools for evaluation of all sensory aspects of food will be provided and all students will gain hands-on experience with implementation, statistical analysis and interpretation of sensory data. Consumer sensory testing methods will also be discussed.
Prerequisite(s): (FOOD*2150 or HTM*2700), (1 of STAT*2040, STAT*2060, STAT*2080)
Restriction(s): This is a Priority Access Course. Registration may be restricted to students in BSCH.FOOD, BSCH.FOOD.C, BBRM.FIM, BBRM.FIM.C, BCOM.HTM, BCOM.HTM.C or BASC.AHN during certain periods.
Department(s): Department of Food Science

FOOD*4020 Quality Management in the Food Industry W (4-0) [0.50]
Quality management is a business philosophy that focuses on maximizing customer satisfaction by ensuring the provision of products or services that consistently meet or exceed customer expectations. In this course, the student will come to understand the various definitions of quality as well as various quality management systems that are relevant to the food industry. The student will also gain an understanding of the crucial role of continuous improvement and monitoring customer satisfaction within the food industry. This course uses traditional lectures by the instructor and by guests from organizations that produce, ship, sell or regulate food products.
Offering(s): First offering - Winter 2022
Prerequisite(s): FARE*3310, FOOD*3170
Department(s): Department of Food Science

FOOD*4070 Food Packaging F (3-0) [0.50]
Functions of packaging in food preservation systems will be examined using a review of current packaging materials, their properties, production methods and applications for specific products. Additional topics include regulatory, environmental and marketplace influences on food packaging choices.
Prerequisite(s): 7.00 credits in science or engineering
Department(s): Department of Food Science

FOOD*4090 Functional Foods and Nutraceuticals W (3-0) [0.50]
The course examines the relation of functional foods and nutraceuticals (FFN) to food and drugs. The safety and efficacy of individual FFN products, and the regulatory issues that influence the development and commercialization of FFN in global markets are emphasized. Also listed as NUTR*4090.
Prerequisite(s): NUTR*3210
Equate(s): NUTR*4090
Department(s): Department of Food Science, Department of Human Health and Nutritional Sciences

FOOD*4110 Meat and Poultry Processing W (2-3) [0.50]
The course focuses on the principles and techniques employed by the meat industry in the production of raw and semi/fully cooked products. Lectures include a study of muscle structure and its relation to meat quality, the physical properties of meat proteins, lipids and flavour compounds important in meat processing. Practical applications of processing techniques (including producing different products in lab) packaging and merchandizing are emphasized in the laboratory. Other sources of animal proteins, such as eggs, are also covered. Emphasis is put on learning how various food science principles (e.g. emulsification, preservation, HACCP) are used to optimize meat products' quality and safety.
Prerequisite(s): 1 of ANSC*2340, FOOD*3090, FOOD*3140, FOOD*3160
Department(s): Department of Food Science

FOOD*4190 Advanced Food Analysis F (3-3) [0.50]
In this course the quantitative analysis of foods by chemical and physical methods will be studied with emphasis on modern/advanced technologies. Both major and minor constituents will be discussed.
Prerequisite(s): 1 of CHEM*2400, CHEM*2480, FOOD*3030, FOOD*3050
Co-requisite(s): Pre-requisites may be taken as co-requisites
Restriction(s): FOOD*4120
Department(s): Department of Food Science
**FOOD*4220 Topics in Food Science S,F,W (0-3) [0.50]**

Independent study of a selected topic in Food Science, involving a review and critical evaluation of the current literature. The course comprises independent library research and students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and the course co-ordinator in a prior course selection period.

**Prerequisite(s):** 14.00 credits including 1.50 credits at the 3000 level or higher in Food Science.

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Food Science

**FOOD*4230 Research in Food Science S,F,W (0-3) [0.50]**

This course involves independent laboratory research of a selected topic in Food Science, under the supervision of an individual faculty. The laboratory research is based on the literature review conducted in FOOD*4220. In addition, a review and critical appraisal of experimental principles will guide the design of laboratory experiments. Students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and the course co-ordinator in a prior course selection period.

**Prerequisite(s):** FOOD*4220

**Co-requisite(s):** FOOD*4220

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Food Science

**FOOD*4260 Food Product Development I F (3-3) [0.50]**

This course examines the research and development process related to new food products. Through a series of lectures and presentations students will learn the underlying theory behind food product development including idea generation, prototype development and new product manufacturing, evaluation and product marketing. Students will also gain a real world understanding of the process through their involvement and interaction with invited industry speakers. Students will work in teams with students from other disciplines to plan a food product development project.

**Prerequisite(s):** FOOD*2100, (FOOD*3030 or FOOD*3050), (FOOD*3140 or FOOD*3160), (FOOD*3230 or FOOD*3240), FOOD*3700

**Restriction(s):** FOOD*4100, FOOD*4700, MGMT*4020, MGMT*4030

**Department(s):** Department of Food Science

**FOOD*4270 Food Product Development II W (3-3) [0.50]**

This course will compliment the Food Product Development I course by further assisting students in gaining a comprehensive understanding of the principles and process of food product development. Students will use the theory obtained from the Food Product Development I course to put into practice and gain real life experience in the planning, conducting, and communicating results as a team while developing a pre-approved food product.

**Prerequisite(s):** FOOD*4260

**Restriction(s):** MGMT*4020, MGMT*4030

**Department(s):** Department of Food Science

**FOOD*4310 Food Safety Management Systems W (3-0) [0.50]**

Participants will learn and apply principles of food safety management and the systems involved. The course is organized in four modules: plant hygiene, principles of Hazard Analysis Critical Control Point (HACCP), HACCP based food safety programs in Canada, and ISO Food Safety Management Systems.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** (FOOD*2010 or FOOD*2150), (1 of FOOD*2410, FOOD*3140, FOOD*3160), (1 of FOOD*2420, FOOD*3230, FOOD*3240)

**Department(s):** Department of Food Science

**FOOD*4400 Dairy Processing W (3-3) [0.50]**

The production, processing, chemistry, microbiology and marketing of fluid milk, frozen dairy products, cheese, fermented dairy foods and butter are studied in this course.

**Prerequisite(s):** BIOC*2580, (FOOD*2150 or FOOD*3090), (MICR*2030 or MICR*2420)

**Department(s):** Department of Food Science

**FOOD*4520 Utilization of Cereal Grains for Human Food F (3-3) [0.50]**

The course will cover topics related to the history of agriculture as it relates to cereal grains; basic principles behind grain breeding and its relevance to grain quality and functionality; regulations as they relate to grain quality; fractionation of cereal components and their utilization; relationship between grain structure/composition and processing of cereal-based foods; principles of analytical tools commonly used to assess grain and product quality; science and technology as it relates to manufacturing and shelf life of common cereal-based foods from wheat, corn, rice and barley; functional and nutritional attributes of cereal grains; recent advances in cereal science and technology and the non-food uses of cereal grain components.

**Prerequisite(s):** BIOC*2580, (1 of BIOL*1040, BIOL*1070, BIOL*1080), (1 of AGR*2470, FOOD*2150, FOOD*3090, NUTR*3210)

**Department(s):** Department of Food Science
Frank B. Spalding

Chair of the French Department

School of Languages and Literatures

The School of Languages and Literatures offers a wide range of courses in French, including courses in French language, literature, and culture. This document provides an overview of the courses offered, including prerequisites, restrictions, and course descriptions.

**FREN*1000 French Language I F,W (3-1) [0.50]**
This course is an introduction to French language and culture. Students will learn basic French grammar and vocabulary through interactive activities and cultural immersion.

**FREN*1100 French Language II F,W (3-1) [0.50]**
This course continues the study of French language and culture. Students will develop more advanced language skills through reading, writing, and speaking.

**FREN*1200 French Language III F,W (3-1) [0.50]**
This course focuses on advanced language skills and cultural immersion. Students will engage in more complex conversations and written assignments.

**FREN*1300 French Language IV F,W (3-1) [0.50]**
This course is designed for students with advanced language skills. It focuses on cultural immersion and advanced language skills.

**FREN*2000 French Composition I F,W (3-0) [0.50]**
This course provides students with opportunities to develop their writing and composition skills in French.

**FREN*2500 French Composition II F,W (3-0) [0.50]**
This course further develops students' writing and composition skills in French.

**FREN*3000 French Literature I F,W (3-0) [0.50]**
This course introduces students to French literature, focusing on foundational works.

**FREN*3500 French Literature II F,W (3-0) [0.50]**
This course continues the study of French literature, focusing on later works.

**FREN*4000 French Literature III F,W (3-0) [0.50]**
This course provides an advanced study of French literature, focusing on specialized topics.

**FREN*4500 French Literature IV F,W (3-0) [0.50]**
This course offers an in-depth exploration of specific works and authors in French literature.

**FREN*5000 French Culture and Society F,W (3-0) [0.50]**
This course examines the cultural and societal context of French-speaking countries.

**FREN*5500 French Translation F,W (3-0) [0.50]**
This course introduces students to the art of translating French literature.

**FREN*6000 Independent Study F,W (3-0) [0.50]**
This course allows students to pursue a specific area of study under the guidance of a faculty advisor.

**FREN*6500 Seminar in French F,W (3-0) [0.50]**
This seminar focuses on a specific topic within French studies.

**FREN*7000 Research Project F,W (3-0) [0.50]**
This course provides students with the opportunity to conduct original research in a specific area of French studies.
XII. Course Descriptions, French Studies

FREN*3110 Storytelling in the Francophone World W (3-0) [0.50]
This course focuses on storytelling as a genre of folklore in various francophone traditions (French Canadian and American, European, Caribbean, African). Students will consider the functions of storytelling in culture and examine the structural and thematic components of folktales. Students will also explore the nature of storytelling from a performance perspective, reflecting on the elements that make good communication. Put into practice, storytelling will be used as a pedagogical tool to develop speaking, listening, reading and writing skills in French.

Offering(s): Offered in even-numbered years.
Prerequisite(s): FREN*2020, FREN*2060, FREN*2520
Department(s): School of Languages and Literatures

FREN*3130 Representing the Self F (3-0) [0.50]
By examining a variety of texts told by a real or fictional ‘I’, this course will explore such literary concerns as believable and unbelievable narrators, biography and autobiography and the construction of the self. Students will put to use their learning about the construction of the self in creating their own first-person narrative in French.

Offering(s): Offered in even-numbered years.
Prerequisite(s): FREN*2020, FREN*2060, FREN*2520
Department(s): School of Languages and Literatures

FREN*3140 Women in Literature, Art and Film W (3-0) [0.50]
This course will study French or Francophone women as creators of literary, artistic and cinematic works or might take the representation of women in literature, art or film as its focus. Drawing on specific contemporary theories, we will study representations of women's place, of the female body, class and linguistic identity, and of the creation of artistic work. Particular attention will be paid to the relationship between the personal and the socio-political spheres, sexual difference, and gender roles.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): FREN*2020, FREN*2060, FREN*2520
Department(s): School of Languages and Literatures

FREN*3160 Songs, Lyric Poetry in French F (3-0) [0.50]
This course will provide students with the opportunity to explore the cultural richness of song lyrics and poetry in the Francophone world. By engaging with a variety of songs including, but not limited to: traditional folk, political songs ("chansons engagées"), hip-hop to "World music", students will explore several facets of this complex subject. Activities include: in-depth research on the arc of critical reception of a given songwriter or band, comparing the treatment of a specific theme (for example “money” or “apathy” or “nostalgia”) across musical genres, researching for a biography of a songwriter/poet (such as Richard Desjardins or Jacques Brel).

Offering(s): Offered in even-numbered years.
Prerequisite(s): FREN*2020, FREN*2060, FREN*2520
Department(s): School of Languages and Literatures

FREN*3170 Fictions of Childhood F (3-0) [0.50]
This course will examine the classics of francophone children’s literature (for example, works by Perrault, la Comtesse de Ségur, Jules Verne, or Goscinny) and take into account representations of children or childhood in autobiographical texts, novels or film. Students will address questions such as: How did children's literature develop as a separate genre? What are the characteristics of the various types of writing for children (fairy tales, adventure fiction, novels of school and home, fantasy)? What is the function of a child narrator in novels for children or adults?

Offering(s): Offered in even-numbered years.
Prerequisite(s): FREN*2020, FREN*2060, FREN*2520
Department(s): School of Languages and Literatures

FREN*3500 French Translation II F (3-0) [0.50]
This course introduces students to an analysis of the similarities and contrasts between French and English grammar. As well, the course introduces students to analysis of various literary styles, and to their application in written translation.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): FREN*2500
Department(s): School of Languages and Literatures

FREN*3520 French Composition II W (3-0) [0.50]
This is a continuation of FREN*2520 with special emphasis on creative writing.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): FREN*2020, FREN*2060, FREN*2520
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Languages and Literatures

FREN*3610 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3620 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3630 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3640 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3650 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3660 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3670 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3680 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

FREN*3690 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]
Thematic courses relating to the literature, arts, and society of metropolitan France and of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

Prerequisite(s): 1 of FREN*2020, FREN*2030, FREN*2060
Restriction(s): Admission to Nice Program.
Department(s): School of Languages and Literatures

Last Revision: July 4, 2019
2019-2020 Undergraduate Calendar
### FREN*3700 Experiential Learning and Language S,F,W (0-0) [0.50]

This course provides an opportunity for independent study based on an experiential project in French Studies. The project (approximately 70 hours) must be approved by a faculty member in the School of Languages and Literatures. It will include research about experiential learning, a reflective piece of writing and a public oral presentation about the project.

**Prerequisite(s):** 10.00 credits including 1.50 credits in French Studies.

**Restriction(s):** A minimum cumulative average of 70% in all French Studies course attempts. Instructor consent required.

**Department(s):** School of Languages and Literatures

### FREN*4010 The Art of Adaptation F (3-0) [0.50]

This course examines the relationship between source text and its adaptation(s). The art of adaptation will be addressed through theories of authorship, identity, intertextuality and genre. Students will reflect on the ways artistic creation is achieved by means of repetition and variation, and will analyse the forms and codes of the traditions that are inherited and often transgressed.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** 1.00 credits at the 3000-level in French.

**Department(s):** School of Languages and Literatures

### FREN*4020 Contemporary Francophone Theatre W (3-0) [0.50]

The focus of this course is French and Québécois plays by twentieth-century dramatists. The approach to the texts will center on the social, political, and cultural contexts of the plays as well as representations of class, gender, and the role of language. The course will look at theatre as text, dramaturgy, spectacle and role-playing, as well as examine the role of theatre in contemporary society.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 1.00 credits at the 3000-level in French.

**Restriction(s):** FREN*3120

**Department(s):** School of Languages and Literatures

### FREN*4290 Post-Colonial Francophone Fiction W (3-0) [0.50]

This is a survey course of the works of 20th-century Francophone writers from Maghreb, Black Africa and the Caribbean.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** 1.00 credits at the 3000-level in French.

**Department(s):** School of Languages and Literatures

### FREN*4600 Honours Seminar in French Studies F (3-0) [0.50]

This course is a seminar on literary genres, movements and themes, or on the French language.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 1.00 credits at the 3000-level in French.

**Department(s):** School of Languages and Literatures

### FREN*4740 Research Paper in French Studies I S,F,W (3-0) [0.50]

A research paper in French on an approved topic in French literature or language will be required. Individual attention will be given to methods of research and techniques of writing. This course is intended to serve as an introduction to future research at the M.A. and Ph.D. levels.

**Prerequisite(s):** 1.00 credits at the 3000-level in French.

**Restriction(s):** 70% average in all French Studies course attempts is required, although at least 75% is recommended. Instructor consent required.

**Department(s):** School of Languages and Literatures

### FREN*4770 Research Paper in French Studies II S,F,W (3-0) [0.50]

A research paper in French on an approved topic in French literature or language will be required. Individual attention will be given to methods of research and techniques of writing. This course is intended to serve as an introduction to future research at the M.A. and Ph.D. levels.

**Prerequisite(s):** FREN*4740

**Restriction(s):** 70% average in all French Studies course attempts is required, although at least 75% is recommended. Instructor consent required.

**Department(s):** School of Languages and Literatures
# Geography

**Department of Geography, Environment and Geomatics**

Students majoring in other departments may take a number of Geography courses without the prerequisites listed below if they obtain the permission of the instructor.

**Note:** Several courses in Geography are listed as acceptable for the Natural and Mathematical Science B.A. Distribution Requirements or as Non-Science Electives for B.S.C. students.

For courses without a semester designation, or with an alternate year designation, please check with the department.

</thead>
<tbody>
<tr>
<td>GEOG*1200</td>
<td>Society and Space F (3-1)</td>
<td>0.50</td>
<td>This course introduces key concepts in contemporary Human Geography. The course applies a spatial perspective in exploring a wide ranging series of processes and issues in society. Topics include population growth and migration, models and challenges of urban and rural development, interpretation of cultural landscapes and selected issues relating to social welfare. <strong>Offering(s):</strong> Also offered through Distance Education format. <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*1220</td>
<td>Human Impact on the Environment F,W (3-0)</td>
<td>0.50</td>
<td>A global overview of the changing relationships among society, technology and the environment. This course emphasizes the major stages of human use of resources and the environmental consequences of global changes in production systems. It contrasts Third and First World experiences, focusing on core-periphery relationships. <strong>Offering(s):</strong> Also offered through Distance Education format. <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*1300</td>
<td>Introduction to the Biophysical Environment F,W (3-2)</td>
<td>0.50</td>
<td>This course provides an introduction to physical geography, focusing on the principles and processes governing climate, landforms, and vegetation systems and their interrelationships and will examine natural and human-induced changes to environmental systems. Laboratories will address techniques of measurement, representation and analysis of environmental systems using maps and satellite imagery, laboratory techniques, and field observation. <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*1350</td>
<td>Earth: Hazards and Global Change F,W (3-0)</td>
<td>0.50</td>
<td>This course investigates physical aspects of natural hazards that affect people and society and will focus on the natural systems and processes that cause climate variability and change, floods, earthquakes, volcanoes, landslides, hurricanes, tornadoes and other natural disasters. <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2000</td>
<td>Geomorphology F (3-2)</td>
<td>0.50</td>
<td>This course examines the changing relations between society and ecology by focusing on relations of power, including intra- and inter-state structures and processes. Environmental movements, conflicts, identities and values are considered along with localization and globalization. Particular attention is paid to ecological and development processes and strategies in the developing world. <strong>Prerequisite(s):</strong> 1 of ENGL<em>1100, ENVS</em>1050, ENVS<em>1060, GEOG</em>1300, GEOG<em>1350, GEOG</em>150, GEOG*1100 <strong>Restrictions:</strong> This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2030</td>
<td>Environment and Development F (3-0)</td>

<tbody>
<tr>
<td>GEOG*2210</td>
<td>Environment and Resources W (3-0)</td>
<td>0.50</td>
<td>This course examines the interrelationships between people and biophysical processes. The main themes are: 1) characteristics of natural resources and processes through which they are developed and used and 2) human response to environmental conditions, including natural hazards and global change. Contemporary Canadian case studies will be presented at the regional and national scales. <strong>Offering(s):</strong> Also offered through Distance Education format. <strong>Prerequisite(s):</strong> GEOG*1220 is recommended <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2230</td>
<td>Commodity Chains and Cultures of Consumption F (3-0)</td>
<td>0.50</td>
<td>An introduction to the spatial distribution of economic activity. The course examines patterns, processes and problems in extractive activities, manufacturing, marketing and the service sector, including the transportation of commodities and people. The principles of economic location are applied to regional economic analysis and development. <strong>Prerequisite(s):</strong> GEOG<em>1200 or GEOG</em>1220 <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2260</td>
<td>Applied Human Geography F (3-2)</td>
<td>0.50</td>
<td>This course introduces students to the geographical research process, guiding them through key methodological issues and techniques in human geography. The lab component of the course focuses on data collection using secondary documents, surveys, interviews, and participant observation, as well as both quantitative and qualitative analysis techniques. Lab assignments and class illustrations draw on a range of topics in human geography. <strong>Prerequisite(s):</strong> GEOG<em>1200 or (ANTH</em>1150 and GEOG*1220) <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2420</td>
<td>The Earth From Space F (3-3)</td>
<td>0.50</td>
<td>This course provides an introduction to the principles and techniques of air photo and satellite image interpretation. Topics include stereoscopic viewing, parallax, flightline planning, and mapping from air photos. Lab exercises focus on specific applications in natural habitats and in rural and urban settings. <strong>Prerequisite(s):</strong> 0.50 credits in geography and/or earth science <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2460</td>
<td>Analysis in Geography F (3-2)</td>
<td>0.50</td>
<td>The application of modern techniques to geographic study. The interpretation of geographic phenomena by objective methods. Major honour's students in Geography must complete this course by the end of semester 4. <strong>Prerequisite(s):</strong> 0.50 credits at the 1000 level in Geography <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2480</td>
<td>Mapping and GIS F,W (3-2)</td>
<td>0.50</td>
<td>An introduction to the theory and techniques of manipulating and displaying spatial data in a GIS (Geographic Information System). Mapping concepts such as scale, co-ordinate systems, map projections, symbolization and vector data encoding are introduced. Major honour's students in Geography must complete this course by the end of semester 4. <strong>Prerequisite(s):</strong> 5.00 credits <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*2510</td>
<td>Canada: A Regional Synthesis W (3-0)</td>
<td>0.50</td>
<td>This course is designed to provide a better understanding of the nature and basis of Canadian regionalism. The first section of the course stresses the biophysical base and the inequality of the natural resource endowment. The historical geographic approach and the systematic overviews of contemporary Canada stress respectively the development and nature of the Canadian space-economy. The final section on regions, regionalism and nationalism provides an overview of the heartland-hinterland dichotomy and centrifugal and centripetal forces operative in the nation. <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*3000</td>
<td>Fluvial Processes F (3-2)</td>
<td>0.50</td>
<td>This course examines processes and landforms associated with rivers. Particular emphasis is placed on the interaction between water and sediment movement and channel morphology. Case studies of human impact on river systems are presented. <strong>Prerequisite(s):</strong> GEOG<em>2000, (GEOG</em>2460 or STAT*2040) <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>
</tr>
<tr>
<td>GEOG*3020</td>
<td>Global Environmental Change S,F (3-0)</td>
<td>0.50</td>
<td>Major global environmental issues examined include climate change, deforestation, desertification and global fisheries. This course is interdisciplinary, exploring the interactions of bio-physical processes with human socio-economic dynamics, including policy initiatives. Particular attention is given to global climate change, its causes, its nature and extent, its implications for ecosystems and societies, and its governance implications. <strong>Offering(s):</strong> Also offered through Distance Education format. <strong>Prerequisite(s):</strong> 7.50 credits <strong>Department(s):</strong> Department of Geography, Environment and Geomatics</td>

### History

**Department of History**

Students wishing to take a 3000 level course must have pass standing in at least 7.50 university credits.

Students wishing to take a 4000 level course must have pass standing in at least 10.00 credits. Access to all 4000 level courses is restricted to students in the B.A. Honours program with a minimum 70% average in all history course attempts.

Students should note the prerequisite requirements for upper level courses in planning their individual programs.

Content of individual courses may vary depending on the instructor; students therefore should check course outlines at the time of course selection.

Courses marked (H) are honors courses. Students in a general program wishing to take these must obtain the permission of instructors concerned.

<tbody>
<tr>
<td>HIST*1010 Early Modern Europe S,F,W (3-0) [0.50]</td>
<td>This course will deal with the evolution and expansion of European society during the pre-industrial era. Concluding with the Renaissance and Reformation it will survey such themes as the voyages of exploration, the impact of western culture on indigenous societies, the development of commercial capitalism, the transformation of science and technology and the conflict between imperial powers in Europe and overseas.</td>
<td>Also offered through Distance Education format.</td>
</tr>
<tr>
<td>HIST*1050 Invitation to History F,W (3-0) [0.50]</td>
<td>This course introduces students to the basics of the historian's craft, including interpreting primary sources, locating and critically analyzing secondary sources, and writing for history. For more detail on the content of sections consult the History department website.</td>
<td>This is a Priority Access Course. Enrolment may be restricted to participants and specializations during certain periods. Please see the departmental website for more information.</td>
</tr>
<tr>
<td>HIST*1150 The Modern World F,W (3-0) [0.50]</td>
<td>This course is a survey of the twentieth century, focusing on major events and themes such as: the First and Second World Wars, the Great Depression, the rise and fall of fascism, social movements, revolutions, genocides, decolonization, nationalism, the Cold War, and the rise and decline of American power. The course draws its examples and case studies mainly from regions across the world, with the intention of broadening critical awareness and fostering global citizenship. (C)</td>
<td>Department(s): Department of History</td>
</tr>
<tr>
<td>HIST*1250 Science and Technology in a Global Context F,W (3-0) [0.50]</td>
<td>This course is an introduction to the culturally specific ways in which science and technology have developed historically from the ancient period through the twenty-first century. Emphasis will be placed on patterns in which scientific knowledge and practices have traveled and been constructed across cultures and the interconnected but distinct histories of science and technology.</td>
<td>Restriction(s): ASCI*1000</td>
</tr>
<tr>
<td>HIST*2000 The British Isles, 1066-1603 F (3-0) [0.50]</td>
<td>A comparative survey of the histories of England, Scotland, Ireland and Wales during the Medieval and Early Modern eras. Stress will be placed upon common themes such as institutional development, warfare and the often violent interaction between the English and the Celtic peoples.</td>
<td>Department(s): Department of History</td>
</tr>
<tr>
<td>HIST*2020 Film as History W (2-1) [0.50]</td>
<td>This course will consider film both as a source and as a comment on the past. Topics will vary depending on instructor expertise, and may include film as propaganda, the city in film, film as myth, women and gender in film, film and war.</td>
<td>Prerequisite(s): 2.00 credits</td>
</tr>
<tr>
<td>HIST*2040 War and Society W (3-0) [0.50]</td>
<td>Concentrating on developments following the introduction of gunpowder, the course will consider the evolution of military strategy and tactics, the impact of technology on warfare, and the relationship between war and civilian populations.</td>
<td>Offering(s): Also offered through Distance Education format.</td>

### Wesleyan College

**Department of History**

**Asociation**

A wide-ranging look at the diverse religions of the world including Hinduism, Buddhism, Judaism, Christianity, and Islam. The course focuses on each faith's social context and interactions from their beginnings to the present day.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** 2.00 credits

**Department(s):** Department of History

**HIST*2090 Indigenous Peoples of the Americas W (3-0) [0.50]**

This course covers selected events and issues in Indigenous history in the Americas, including topics such as origin narratives, self-governance, intertribal contact, transatlantic trade, treaty-making, stages of colonization, Indigenous rights and Indigenous protest movements. Themes may focus on specific regions of the Americas and may be examined through notable Indigenous figures, law and policy, technology, food, material culture, or moments of conflict.

**Prerequisite(s):** 2.00 credits

**Department(s):** Department of History

**HIST*2100 Pre-Confederation Canada F (3-0) [0.50]**

This course studies selected events and issues in pre-Confederation Canadian history including political, economic, social, and cultural developments.

**Prerequisite(s):** 2.00 credits, including 0.50 credits in History at the 1000 level

**Department(s):** Department of History

**HIST*2120 Animals and Society W (3-0) [0.50]**

This course provides a historical survey of modern human-animal relationships and the contradictions that characterize them. Topics may include: hunting and sporting, horses and 19th century cities, natural history and the zoo, history of veterinary medicine, 20th century animal sports, the birth of industrial animal agriculture, animals as biotechnology, anti-cruelty movements, petkeeping and consumerism, animal figures in popular culture. The thematic or geographic focus of the course may vary according to the expertise of the instructor.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 2.00 credits

**Department(s):** Department of History

**HIST*2130 Modern Sport – A Global History F (3-0) [0.50]**

Few activities lend themselves more powerfully to global histories of the modern world than sport. Since the mid-late nineteenth century, organized games have become integral parts of mass culture and everyday life around the world, reflecting and sometimes shaping much wider political and socio-economic processes. Encompassing key themes in the history of the modern world – such as race, empire, gender, mass media, and nationalism – this course critically analyzes the development of modern sport from a global perspective.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** 2.00 credits

**Department(s):** Department of History

**HIST*2190 Celtic Ireland and Britain in the Early Middle Ages W (3-0) [0.50]**

This course will explore the Celts of Ireland and Britain from the time of the druids to the post-millennium emergence of literature relating to a king called Arthur. Reflecting on what we know of the Celts, how we know it, and what the term means, the course will examine topics such as the development of kingdoms and elite 'heroic' culture, the spread of Christianity, the law, everyday life and the family, art and literature, and the interaction between the Celts and their neighbours.

**Prerequisite(s):** 2.00 credits

**Department(s):** Department of History

**HIST*2200 The Medieval World F (3-0) [0.50]**

The major events and developments in Europe, north Africa and Western Asia from the fall of the Roman Empire to 1500 a.d. Emphasis will be placed on the evolution of western Christianity, the rise and expansion of Islam, the emergence of the University, and the growth of literacy and print culture culminating in the humanist movement of the late Middle Ages.

**Prerequisite(s):** 2.00 credits

**Department(s):** Department of History

HIST*3020 Sexuality and Gender in History F (3-0) [0.50]
This course provides an introduction to the issues of sexuality and gender within history. The course will enable students to develop an understanding of how issues of masculinity, femininity, and sexuality were developed and defined across cultures. The chronological and geographic focus of the course may vary according to the interests and expertise of the instructor.
Prerequisite(s): 7.50 credits including 1.00 credits in History
Department(s): Department of History

HIST*3070 Modern India W (3-0) [0.50]
This course studies the history of modern India from 1757 to the present day. Topics include: European and British imperialism in India, Indian reactions to imperialism, socio-religious movements, the birth of nationalism and the nation-state in India, civil society and social issues in a developing nation, regionalism, foreign policy and India's place in the 21st century.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3080 United States in the World F (3-0) [0.50]
This course is a study of the United States as a global phenomenon. Thematic topics will go beyond foreign policy and military history to include imperialism, immigration, globalization, race, gender, ethnicity, consumption, tourism, and international cultural industries.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3100 Popular Culture and Punishment, 1700-1900 S,F (3-0) [0.50]
The course will survey the social, political and intellectual influences upon the leisure activities of Europeans and Americans in the period with special reference to institutions such as the prison, the asylum, the reformatory and the regulation of popular culture and leisure activities. Witchcraft and the witch-hunt will be discussed.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits including (HIST*1010 or SOC*1500)
Department(s): Department of History

HIST*3140 Witch-hunts and Popular Culture S,F (3-0) [0.50]
This course will explore the phenomenon of the 'witch-hunts' in early modern Europe through a focus on Scotland in the period 1560-1700. In addition to placing the witch-hunts in their historical context by providing students with the background to Scotland's political, religious, and social history in the early modern period, the course will introduce students to the considerable body of historical writing on the subject of the witch-hunts and give them hands on experience with primary source documents in order to discuss specific witch trials themselves. Popular and elite conceptions of witchcraft will be explored, as well as gender history.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 7.50 credits including 1.00 credits in History
Department(s): Department of History

HIST*3150 History and Culture of Mexico U (3-0) [0.50]
This course will cover the history and culture of Mexico from its Precolumbian civilizations to the present. Topics may include: Aztec and Mayan civilizations, European discovery and conquest, inquisition, convents, independence, the Mexican revolution, indigenismo, NAFTA and Zapatista insurgency in Chiapas.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3160 Canadian Political History U (3-0) [0.50]
This course consists of a detailed study of the background and development of the Canadian political process and culture. It devotes special attention to the changing role and character of the state.
Prerequisite(s): 7.50 credits including (1 of HIST*2100, HIST*2600 or HIST*2601/2, POLS*1400, POLS*2300)
Department(s): Department of History

HIST*3180 Canada Since 1945 U (3-0) [0.50]
This course provides an in-depth examination of political, social, cultural, and economic changes in Canada since the Second World War. Particular attention will be paid to the increased diversity of the Canadian population, the development of Canadian institutions, and the changing role played by Canada in the world.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3200 Youth in History F (3-0) [0.50]
This course examines the social history of childhood, youth and adolescence in western culture and how life-cycles vary as a function of class, race and ethnicity, gender and sexuality. It will examine the experiences of young people in different historical eras. Questions to be explored include: Does the notion of adolescence transcend history and culture? How have experts constructed institutions such as the high school, the juvenile justice system, the media, medical and social scientific research to channel youth rebellion? Historical case studies will be selected to show generations in political, community and domestic conflict. This interdisciplinary history course draws upon sociology, anthropology, cultural studies, art, music, literature, academic writing and research from Europe, Canada and the United States.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3230 Spain and Portugal, 1085 to 1668 F (3-0) [0.50]
The course examines the history of Spain and Portugal from the period of the reconquest to overseas expansion. The course covers the political, diplomatic, religious and cultural development of early modern Spain and Portugal and the rise of the overseas empire.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3240 Food History F (3-0) [0.50]
This course will examine the history of food and foodways from the early 19th century to the present. It will explore the impact of changing agricultural practices and the growth of the food processing industry, including the rise of nutritional science, and the impact on eating patterns.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3260 Cinema and the Moving Image F (3-0) [0.50]
This course provides a historical survey of cinema and the moving image, as well as the material, cultural, political and technological contexts of their production. Students will come to understand the broad development of the medium over the past one hundred and thirty years, beginning with early, pre-cinematic moving image technologies and ending with an analysis of the influence of other media and merchandizing on cinema. Students will also become familiar with crucial terminology for analyzing and writing about how films have been constructed and how they communicated to audiences over time. Geographical or thematic focus may vary according to the expertise of the instructor.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3270 Revolution in the Modern World W (3-0) [0.50]
This course offers a comparative analysis of revolutionary movements in the modern world. It focuses on the French Revolution, the development of a revolutionary tradition in the 19th century, the Russian Revolution, and the Communist Revolution in China. Comparative themes include the relative importance of ideology and class conflict, the emergence of professional revolutionaries, and the relationship between revolutions and international relations.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3310 Disease and History U (2-0) [0.50]
This interdisciplinary course provides an introduction to the historical interactions between disease and human society from the Middle Ages to the present. Major themes may include the co-construction of disease and society; disease and urbanization; disease and colonialism; disease and globalization; disease and gender.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3320 Modern China F (3-0) [0.50]
This course examines the history and culture of China since the nineteenth century. Topics may include economics, gender, imperialism, militarism, politics, and religion.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3330 The Scottish Diaspora W (3-0) [0.50]
The course offers a comprehensive overview of Scottish Diaspora history, focusing on a broad range of themes and settlement locations. Covering the period c.1750 to 1945, the historical geographies of the Scottish Diaspora explored include the ‘near Diaspora’ of England, Wales and Ireland; Continental Europe; the traditional settler Dominions; the United States; Africa; and Asia.
Prerequisite(s): 7.50 credits
Department(s): Department of History
XII. Course Descriptions, History

HIST*3350 Modern Germany U (3-0) [0.50]
This course will be devoted to a study of major themes in modern German history, and to an analysis of Germany's role in post-war Europe. Topics include the unification of Germany, the role of nationalism in modern German history, the significance of the Bismarck era, the rise of Hitler and the development of the two Germanies until their unification in 1990.
Prerequisite(s): 7.50 credits
Restriction(s): HIST*2830.
Department(s): Department of History

HIST*3360 History and Culture of Brazil W (3-0) [0.50]
This course will cover the history and culture of Brazil from its early indigenous civilizations to the present. Topics may include: European discovery and contact, the colonial era, slave trade and slavery, Dutch occupation, hybrid Afro-Christian religions, the Inquisition, independence, abolitionism, samba and carnival, dictatorships, soccer, favelas, and issues related to race, class, gender and the environment.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3370 Canada and the First World War F (3-0) [0.50]
This course examines Canada's role in the First World War. The question of how much the war was a transformative experience for Canadians will be central to students' learning, as they grapple with issues pertaining to race, ethnicity, class, gender, militarism, pacifism, religion, age, and memory.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3380 British Imperialism in Asia and Africa F (3-0) [0.50]
This course examines the British Empire from the 18th through the 20th centuries. It focuses on: the empire in Asia and Africa; ideologies of empire; and European and non-European approaches and reactions to empire.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3390 Governments and Indigenous Spaces F (3-0) [0.50]
This course examines how colonial and neo-colonial governments interacted with Indigenous societies by restricting social, economic, and cultural activities. It will explore the day-to-day impacts of colonial and neo-colonial governments on Indigenous spaces. Engagement with case studies will deepen student understanding of both bureaucratic violence and Indigenous survivance.
Prerequisite(s): 7.50 credits including (1.00 credits in History or IDEV*2400)
Department(s): Department of History

HIST*3410 Religion in 19th-Century Africa F (3-0) [0.50]
This course will introduce students to the dynamic 19th-century religious landscape of Africa before European colonization, examining the role of Islam and Christianity in the social organization and political transformation of African societies. It will examine how both these religions (in Sudanic, North and Northeast Africa on the one hand) and indigenous religions (in much of southern Africa on the other) intermediated and coloured the character of the encounter between African societies and European colonizers.
Attention will be given to the nature and impact of the Islamic revolutions that broke out across much of Sudanic and Northeast Africa during this period and the intersection between indigenous African religions, missionary Christianity, and the socio-political transformations that swept across much of coastal West and southern Africa.
Prerequisite(s): 7.50 credits including (1 of HIST*1150, HIST*2340, HIST*2960)
Department(s): Department of History

HIST*3440 The Global Sixties F (3-0) [0.50]
This course examines the political, social, and cultural history of one of the most important decades in the twentieth century: the sixties. It adopts global perspectives to ask how and why the sixties mattered in the development of the modern world. A diverse range of themes may be covered, from the political controversies stirred up by the Vietnam War, decolonisation in Africa, Mao's cultural revolution, the Cuban missile crisis, and the upheavals of 1968 to the social changes occasioned by the introduction of the birth control pill, the rise of The Beatles, and the emergence of television.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3450 The Uses of History U (2-1) [0.50]
As an introduction to the use of history outside the classroom, this course discusses public history and memory through the activities of governments, corporations, and voluntary associations. History as political propaganda, marketing strategy, and ideological support in a global and historical context is examined. Discussions will focus on history as presented in films, television, monuments, museums, commemorations, and other public and popular media.
Prerequisite(s): 7.50 credits including HIST*2450
Department(s): Department of History

HIST*3460 Natural Disasters in Global History W (3-0) [0.50]
The history of natural disasters offers insights into how the relationships between human societies and their natural environments have changed over time. Through a series of case studies, the course will trace the evolving history of natural disasters in global context from the late medieval period to the present. The course will address thematic issues including the construction of vulnerable landscapes and societies; the short-term impacts of disasters; changing patterns of disaster relief; and disasters and social change.
Prerequisite(s): 7.50 credits
Restriction(s): HIST*3430
Department(s): Department of History

HIST*3470 Independent Reading U (3-0) [0.50]
A course of independent study, based on a comprehensive reading list provided by the department. Evaluation will be based on two written examinations.
Prerequisite(s): 7.50 credits
Restriction(s): Instructor consent required.
Department(s): Department of History

HIST*3480 Workplace Learning U (0-0) [0.50]
An independent study course based on either History related voluntary or paid work experience. Evaluation will be based on assignments relating to work duties. This will usually be in the form of a weekly journal, and a major project relating to some specific aspect of the work experience. Students interested in this option must have their project approved by the department prior to the semester in which they plan to engage in their work experience. Students will then be assigned to a faculty supervisor who will oversee the project.
Prerequisite(s): 7.50 credits including 1.50 History or equivalent credits
Restriction(s): Instructor consent required.
Department(s): Department of History

HIST*3520 The Vikings: Early Medieval Encounters W (3-0) [0.50]
This course explores the topic of the Vikings in early medieval culture (700 - 1100). The focus will include the role of violence in early medieval society; the construction of the ‘Other’, as well as medieval and modern historiography. It provides students with enhanced knowledge of early medieval Europe, the Byzantine Empire and Russia.
Prerequisite(s): 7.50 credits including (HIST*2000 or HIST*2200)
Department(s): Department of History

HIST*3570 Women in Modern Europe U (3-0) [0.50]
This course will examine selected topics in modern European women's history. Attention will be given to action in the public sphere, women's personal and family lives and occupations.
Prerequisite(s): 7.50 credits including (1 of HIST*2500, HIST*2510, HIST*2800, HIST*2930)
Department(s): Department of History

HIST*3580 Women's History in Asia U (3-0) [0.50]
This course examines the roles of women in one or more countries of Asia through the prisms offered by ideas of 'race', class, gender, social status, material culture, intellectual life, and ideology.
Prerequisite(s): 7.50 credits including (1 of HIST*1150, HIST*2800, HIST*2910, HIST*2930)
Department(s): Department of History

HIST*3590 Ancient & Medieval India U (3-0) [0.50]
This course examines the history of India from the beginnings of civilization on the Indian subcontinent to the end of the Great Mughals in the 18th century. It provides an overview and analysis of the cultural, social, religious, political and economic development of Indian civilization, including development from tribe to state to civil society, political organization, socio-religious movements, cultural contact and exchange, and the development of a composite culture.
Prerequisite(s): 7.50 credits
Department(s): Department of History
HIST*3600 Quebec and French Canada U (3-0) [0.50]
This course examines selected themes in the social, economic, political and cultural evolution of Quebec and its relations with the rest of Canada. The course may also examine the development of French Canadian and Acadian communities in other provinces.
Prerequisite(s): 7.50 credits including (HIST*2600 or POLS*2300)
Department(s): Department of History

HIST*3640 Madness and Psychiatry F (3-0) [0.50]
This course will explore madness and the history of psychiatry in the modern world. Topics may include the development of asylums, wild children and human nature, the rise and fall of hysteria, psychoanalysis, as well as ways in which psychiatry has related to imperialism, racial policies, sexuality, gender, religious beliefs, and war.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3660 Canadian Social History U (2-0) [0.50]
This course examines selected themes in the development of Canadian society such as the role of class, the social consequences of industrialization and urbanization, immigration, ethnicity and religion, education and culture.
Prerequisite(s): 7.50 credits including (HIST*2600 or HIST*2601/2)
Department(s): Department of History

HIST*3690 Darwin, Culture and Society U (2-0) [0.50]
This course will focus on the historical, social, and cultural dimensions of Darwin’s theory of evolution, from the late 18th century to the present. Topics may include: natural history, classification, social Darwinism, race and imperialism, science & religion, science & literature, the eugenics movement, the Scopes trial, the modern evolutionary synthesis, sociobiology, gender, antievolutionism and creationism/intelligent design.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3750 The Reformation U (3-0) [0.50]
The changes in religious, social and cultural life in 16th century Europe will be discussed. This course will examine the impact of humanism, the developments in urban culture known as the Renaissance, the reform movements in central and western Europe, the Catholic response, and the resulting disintegration of the medieval social order.
Prerequisite(s): 7.50 credits including HIST*1010
Department(s): Department of History

HIST*3820 Early Modern France U (3-0) [0.50]
This course surveys French History from the Renaissance to the French Revolution. Students will examine the emergence of the powerful monarchy, 16th-century religious conflict and civil war, and the social, political and intellectual developments of the 17th and 18th centuries, which culminated in the 1789 Revolution.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3830 Modern Middle East W (3-0) [0.50]
This course explores struggles for national independence in the region after 1919, the impact of the developing oil industry, the creation of Israel and the resulting Arab-Israeli conflict, the rise of American influence, the divisiveness of Cold War politics, and the role of women in contemporary Islamic societies.
Prerequisite(s): 7.50 credits including (1 of HIST*2890, HIST*3840, POLS*3060)
Department(s): Department of History

HIST*3840 Ottoman Empire, 1300-1923 W (3-0) [0.50]
This course examines the rise of the Ottoman Empire in the 14th century, both in Europe and the Middle East, and traces its evolution until its demise in the 20th century. Students investigate the historiographical debates surrounding various aspects of writing Ottoman history.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3910 Religion in Africa Since 1900 W (3-0) [0.50]
This course will examine the intersection of Islam, Christianity, and the colonial and post-colonial experience of Africans and how these religions helped to determine the opportunities for and limits of colonial impact and anti-colonial nationalist activities. It will also examine the role of Islam in North Africa and of Christianity (and to a limited extent of Islam) in much of sub-Saharan Africa in the emergence of a new class of elite through whose leadership modern African nation states emerged after independence. Finally, it will examine the increasingly globalized characteristics of these religions and the pivotal role they have played in the emerging socio-political realities of late 20th and early 21st century Africa.
Prerequisite(s): 7.50 credits including (HIST*1150 or HIST*2340)
Department(s): Department of History

HIST*4010 Gender and Culture W (3-0) [1.00]
This course will examine how masculinity and femininity has been constructed in popular culture using newspapers, magazines, advertisements, films and novels. Careful attention will be paid to the intersections of gender, race and class. In addition to analyzing some outstanding texts in this field, students will have the opportunity to write an original essay on a topic of their choice.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4030 Historical Biography U (3-0) [1.00]
This advanced research seminar asks students to consider the role of the individual in history by reading theoretical works and examples drawn from the major schools of thought on this issue. Students will undertake to write a biography that will utilize primary sources and will include a detailed historiographical discussion of the works available on their chosen subject. (H)
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4040 Topics in Scottish History U (3-0) [1.00]
This is a seminar course dealing with selected aspects of Scottish social, economic and political history. The seminars will be based upon an examination of primary sources from the University library's extensive Scottish Collections, as well as secondary literature. Students should consult with the department for specific offerings. (H)
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4070 Experiential Learning: Research S,F,W (3-0) [1.00]
This course offers an opportunity for students to independently develop skills in the practice of historical research, such as working with archives, digitization, and database management. Students will work under the supervision of individual faculty members. Students must make arrangements with the faculty advisor well before course selection.
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4090 Modern European History U (3-0) [1.00]
This course is an in-depth examination of a theme or themes from European history in the nineteenth and/or twentieth centuries. Topics chosen will vary with expertise of the instructor. (H)
Prerequisite(s): 10.00 credits including (1 of HIST*1150, HIST*2510, HIST*3909)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History
HIST*4100 Africa and the Slave Trades U (3-0) [1.00]
This course will discuss the origins, character, and operation of slavery and the export slave trades in Africa. It will examine the interaction between domestic slavery and the export slave trades, on the one hand, and demographic, political, economic, social and cultural impact on African states and societies, on the other. Other themes to be examined include slave resistance in Africa, abolition and the introduction of legitimate commerce and their impact on Africa. (H)
Prerequisite(s): 10.00 credits including (1 of HIST*2340, HIST*2960, HIST*3410, HIST*3910)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4120 Topics in Global History U (3-0) [1.00]
This course focuses on issues that emphasize the history of connections between different parts of the world. Topics may include the growth of the world economy; transformations of the global environment; trade and exchange; diasporas and migration. (H)
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4140 Sexuality in the Middle Ages F (3-0) [1.00]
This course will provide a thematic approach to the foundations of western attitudes towards sex and sexuality as they developed in the European Middle Ages. It will examine the complex interweaving of Greek and Roman medicine, medieval Christian canon law and theology, and Germinic popular beliefs, which together provided the underpinnings of western values and practices pertaining to human sex and sexuality, with enduring results. The course will take an historiographical approach to topics and themes. (H)
Prerequisite(s): 10.00 credits including (1 of HIST*2000, HIST*2200, HIST*3020)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4160 Seminar in Canadian Political History U (3-0) [1.00]
Political events, key personalities, the political process, and state instruments and institutions will be analyzed with a view to understanding historical aspects of the political system and culture in Canada. (H)
Prerequisite(s): 10.00 credits including (HIST*2600 or HIST*2601/2)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4170 Exploration of Digital Humanities W (3-0) [1.00]
This course is designed to introduce students to applications of new and inter-disciplinary digital humanities approaches, methodologies and tools, and to explore their application to text, image, sound, map, and other media sources. It will appeal to students in literature, history, fine arts, and music who want an introduction to state-of-the-art digital humanities research. There will be flexibility to accommodate the specific disciplines and interests of the students. (H)
Prerequisite(s): 10.00 credits
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4180 American Identities F (3-0) [1.00]
This course analyzes how Americans have constructed and enacted identities in the U.S. as citizens and consumers through investigating concepts such as ‘race’, ethnicity, gender, sexuality, class, regional distinctions, and nationalism. (H)
Prerequisite(s): 10.00 credits including (HIST*2300 or HIST*2650)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4200 Health, Mind and Body F (3-0) [1.00]
This is a seminar course which will explore the history of health, the body and the mind. Possible topics include: the history of athletics and physical fitness, the history of disability, the history of nutritional science and advice, the history of women’s health, the history of disease, the history of mental illness, and the history of psychiatry. (H)
Prerequisite(s): 10.00 credits, including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4220 Cities and Canadian Culture U (3-0) [1.00]
Reflecting the fact that Canada’s population has been predominantly urban for a century, this seminar explores the role of urban centres in shaping Canadian cultural identity. Particular focus will be placed on the ways that city living and city form have affected the expression of Canadian identity through such topics as spectator sports, uses of public spaces, and metropolitan control of print and broadcast media (H)
Prerequisite(s): 10.00 credits including (HIST*2600 or HIST*2601/2)
Restriction(s): HIST*3220. Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4270 Topics in Modern Asia W (3-0) [1.00]
This course will examine select topics in the development of Asian countries from the 18th to the 21st Century. Select themes including imperialism, nationalism, economics, society, and gender will be examined in a variety of Asian countries. (H)
Prerequisite(s): 10.00 credits including HIST*2910.
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4280 Poverty and Policy in the Victorian Age U (3-0) [1.00]
Starting with the debates over the New Poor Law of 1834, this course will examine the changing content of the notion of poverty, and changing methods adopted to treat it. It will also look at the lives of the poor, in so far as these can be reconstructed from contemporary sources. (H)
Prerequisite(s): 10.00 credits including HIST*2500.
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4450 Life, Death and Migrations F (3-0) [1.00]
This seminar uses quantitative sources and methods to explore such themes as social inequality and demographic experience since 1800. It examines the value of such data for policy purposes, as well as the social and cultural contexts in which surveys are developed and undertaken. Students develop presentational and analytical skills through research projects. (H)
Prerequisite(s): 10.00 credits including HIST*2450, and at least 1.00 credits in History at the 3000 level or above.
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4470 Special History Project Seminar I U (3-0) [0.50]
This course is designed to train honours students in the techniques of research, interpretation and writing of history. The student will choose a topic for intensive study from a list approved by the department. (H)
Prerequisite(s): 10.00 credits
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.
Department(s): Department of History

HIST*4480 The French Revolution U (3-0) [1.00]
This seminar course provides an in-depth analysis of the French Revolution, 1789-1799, and the literature surrounding its interpretation. (H)
Prerequisite(s): 10.00 credits including (1 of HIST*2510, HIST*2820, HIST*3270, HIST*3820)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4620 Seminar in Canadian Rural History U (3-0) [1.00]
This course will examine selected topics in the social and economic transformation of rural Canada with relevant comparisons to the rest of North America and elsewhere. (H)
Prerequisite(s): 10.00 credits including (HIST*2600 or HIST*2601/2)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4700 Premodern History U (3-0) [1.00]
This course provides a detailed analysis of selected aspects of the Middle Ages from c. 1000 through the early modern period. Students should consult the department for specific offerings. (H)
Prerequisite(s): 10.00 credits including HIST*2000 or HIST*2200
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4720 Topics in Modern Asia W (3-0) [1.00]
This course will examine select topics in the development of Asian countries from the 18th to the 21st Century. Select themes including imperialism, nationalism, economics, society, and gender will be examined in a variety of Asian countries. (H)
Prerequisite(s): 10.00 credits including HIST*2910.
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History
### HIST*4820 Images, Conflict and Politics in the Middle East F (3-0) [1.00]
A seminar course designed to explore selected aspects of Islamic history and/or historiography. Students should consult the department for specific offerings. (H)

**Prerequisite(s):**
- 10.00 credits, (1 of HIST*2890, HIST*3830, HIST*3840, POLS*3060)

**Restriction(s):**
- Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.

**Department(s):**
- Department of History

### HIST*4970 Special History Project Seminar II U (3-0) [0.50]
A continuation of HIST*4470. (H)

**Prerequisite(s):**
- 10.00 credits

**Restriction(s):**
- Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.

**Department(s):**
- Department of History
Horticultural Science

Department of Plant Agriculture

HORT*1120 Grape and Wine Science W (3-0) [0.50]
This course will examine whole plant physiology as illustrated by the perennial system of a grapevine. Students will investigate all the primary functions of a green plant, with each function then related to a grapevine and how it functions in nature. Each function of the vine will be connected to the ultimate effects on fruit quality and by extension, wine quality throughout the course.
Offering(s): Offered through Distance Education format only.
Restriction(s): HORT*3430. Not acceptable for students in the BSC, BSC(Agr) or BSC(Env) programs.
Department(s): Department of Plant Agriculture

HORT*1130 Science of Gardening F (3-0) [0.50]
This course examines the growth, development and physiology of horticultural species used for food and ornamental aesthetic purposes. The interaction between plants and impact of environmental factors as such as light, temperature, CO2 and humidity on plant processes will be emphasized.
Restriction(s): Not acceptable for students in the BSC, BSC(Agr) or BSC(Env) programs.
Department(s): Department of Plant Agriculture

HORT*2450 Introduction to Turfgrass Science F (3-2) [0.50]
The biology, ecology, adaptation, and uses of cool-season and warm-season turfgrass species and cultivars will be introduced. Topics will include the identification and life strategies of different turfgrass species, principles of reproduction and techniques for establishment of turfgrass by seeding, sprigging and sodding. The ecology of management including mowing, irrigation, cultivation, mineral nutrition, repair and renovation, and management of stresses (thatch, weeds, insects, disease) will be covered. The turfgrass industry will be introduced, including application of ecological principles to athletic field management, sod production, golf course management, and professional lawn care.
Prerequisite(s): BIOL*1040 or [BIOL*1090, (1 of BIOL*1050, BIOL*1070, BIOL*1080)]
Restriction(s): HORT*3220
Department(s): Department of Plant Agriculture

HORT*3010 Annual, Perennial and Indoor Plants - Identification and Use F (2-2) [0.50]
This course focuses on the identification and adaptation of annual, biennial, perennial herbaceous and indoor plants. Lectures will be integrated with outdoor laboratory activities to emphasize utilization of plant groups in park, perennial border, general landscape, botanic garden and interscape settings.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1 of AGR*2470, LARC*2240, 0.50 credits in botany
Department(s): Department of Plant Agriculture

HORT*3050 Management of Turfgrass Insect Pests and Weeds F (3-2) [0.50]
Biology, behavior and impact of insect pests of turfgrass and recognition of symptoms will be emphasized. Identification and management of weed species commonly found in turfgrass will be discussed. Environmental impacts of cultural and chemical control techniques will be discussed for each group of pests and advances in chemical and biological control methods will be developed.
Prerequisite(s): HORT*2450
Restriction(s): DTM*3300
Department(s): Department of Plant Agriculture

HORT*3150 Principles and Applications of Plant Propagation F (2-2) [0.50]
Plant propagation is the art and science of multiplication of plant material involving the application of the principles of plant growth and development and the techniques of mass production. This course will explore biological, commercial, environmental, and social dimensions of plant propagation systems with emphasis on global trends in the plant production industry.
Prerequisite(s): AGR*2470 or BOT*2100
Restriction(s): HORT*3230, HORT*3350
Department(s): Department of Plant Agriculture

HORT*3270 Medicinal Plants W (3-0) [0.50]
This course will focus on the application of recent biotechnology advances to elucidate the physiology, biochemistry, and conservation biology of medicinal plants for enhancing their efficacy in preventing and curing human disease.
Prerequisite(s): 1 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090
Department(s): Department of Plant Agriculture

HORT*3280 Greenhouse Production W (3-3) [0.50]
This course examines the principles and practices of production, culture and marketing of greenhouse flower and vegetable crops.
Prerequisite(s): 1 of AGR*2050, AGR*2470, BOT*2100
Department(s): Department of Plant Agriculture

HORT*3310 Plants, Food and Health F (3-0) [0.50]
This course will provide an in-depth understanding of plants grown for food, spices and grains as they relate to humans in terms of disease prevention and health. Plants and their familial characteristics, the metabolic pathways characteristic to specific food types, and their effects on human physiology will be discussed. The topic will be introduced in the context of world food habits, plants as food and hot spots of healthy populations and their food customs.
Prerequisite(s): BIOL*2580
Department(s): Department of Plant Agriculture

HORT*3340 Wine-Grape Culture W (3-0) [0.50]
The history and impact of grape-growing in the New World will be presented and studied. Grape (Vitis) taxonomy (ameloploidy) and physiology will be studied as it relates to the Old World/New World wine growing. The physiology of fruiting and vegetative balance for managing wine quality in the vineyard will be studied in detail, especially as it pertains to cool climate and northern limit grape growing for premium wine quality. End product management and wine regions of the world will be examined.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of AGR*2470 or BOT*2100
Department(s): Department of Plant Agriculture

HORT*3510 Vegetable Production F (3-3) [0.50]
The principles of vegetable production will be studied in terms of sustainable crop management and the impact of biotic and abiotic factors will be discussed. Consideration will also be given to storage processing and marketing.
Prerequisite(s): 1 of AGR*2050, AGR*2470, BOT*2100
Department(s): Department of Plant Agriculture

HORT*4200 Plants, the Environment and Society W (3-0) [0.50]
The course will explore the environmental impact of plants in urban and rural landscapes and society's perception of the how those areas should be used. Emphasis will be placed on the ecology of managed landscapes and issues surrounding society's perception of management practices. The impact of public perception about the management and environmental impact of plants in urban and rural landscapes will be discussed, including the issues surrounding the use and maintenance of managed landscapes ecosystems.
Prerequisite(s): (1 of AGR*2470, BOT*2100, ENV*2330, LARC*2240)
Department(s): Department of Plant Agriculture

HORT*4300 Postharvest Physiology W (3-3) [0.50]
This course provides an examination and discussion of physiological and biochemical processes unique to postharvest development and deterioration. Principles and practices of storing fruits, vegetables, and florists’ and nursery stocks as well as marketing pathways for horticultural crops will be considered.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): AGR*2470
Department(s): Department of Plant Agriculture

HORT*4380 Tropical and Sub-Tropical Crops F (3-0) [0.50]
This course examines the production and utilization of tropical and sub-tropical crops in farming systems.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 1 of AGR*2470, BOT*2100, (AGR*2050, AGR*2150)
Department(s): Department of Plant Agriculture

HORT*4420 Fruit Crops F (3-3) [0.50]
Growth patterns, fruiting characteristics and adaptation to environmental conditions of fruit crops in temperate regions will be presented. Classification, cultural practices including propagation and the physiological principles underlying these practices will be emphasized.
Prerequisite(s): 1 of AGR*2050, AGR*2470, BOT*2100
Department(s): Department of Plant Agriculture
HORT*4450 Advanced Turfgrass Science W (3-2) [0.50]

This course emphasizes on plant stressors and physiological responses of plants to stress. Interactions between the soil system, the plant and the environment are considered, with focus on how soil physical, chemical and biological properties as well as environmental factors affect turfgrass plant health and physiology. Principles and strategies of biological control, cultural practices that affect plant health, pest life cycles and pest population levels are addressed in order to develop integrated management plans for turf aimed at reducing pest levels in an environmentally benign manner.

Prerequisite(s): AGR*2050 or AGR*2470

Department(s): Department of Plant Agriculture
XII. Course Descriptions, Hospitality and Tourism Management

Hospitality and Tourism Management

School of Hospitality, Food and Tourism Management.

HTM*1070 Responsible Tourism Policy and Planning F (3-0) [0.50]
This course focuses on the various aspects of tourism policy, planning and development with a heavy emphasis on responsible choices. Tourism is reviewed in a global context and its role, both positive and negative, in socio-economic development, poverty alleviation, climate change, and other topics of current importance are explored.

Restriction(s): HTM*2170 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations during certain periods. Please see the department for more information.

Department(s): School of Hospitality, Food and Tourism Management

HTM*1160 Lodging Operations W (3-0) [0.50]
This course introduces the lodging industry with the inclusion of terminology, organizational structures, and departmental responsibilities. The current global structure of the lodging environment including an analysis of major organizations and forecasts, the future of lodging with a reliance on a critical analysis of existing studies, consulting reports, and up-to-date lodging news is covered. Decision-making from the role of a lodging manager is investigated with a focus on safety, security, profitability, and ethical management.

Restriction(s): HTM*2100 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations during certain periods. Please see the department for more information.

Department(s): School of Hospitality, Food and Tourism Management

HTM*1700 Foodservice Management F (3-0) [0.50]
This course introduces students to the many facets of the foodservice industry in Canada. Emphasis will be placed on three areas of study; the foodservice industry and organizations, how foodservice relates to greater food systems and how issues in these areas affect the industry.

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations during certain periods. Please see the department for more information.

Department(s): School of Hospitality, Food and Tourism Management

HTM*2010 Hospitality and Tourism Business Communications F,W (3-0) [0.50]
This course is designed to enhance students' confidence and professionalism in the hospitality and tourism industry by improving their communication skills. The focus is primarily on writing, but also includes effective speaking and presentation skills. The assignments are based on hospitality and tourism issues.

Prerequisite(s): 4.00 credits

Restriction(s): Restricted to students in BCOMM.HAFA, BCOMM.HAFA:C, BCOMM.HTM, BCOMM.HTM:C or BCOMM.TMGT.

Department(s): School of Hospitality, Food and Tourism Management

HTM*2020 The Business of Sports and Event Tourism W (3-0) [0.50]
This course provides an introduction to the multi-faceted sports and event tourism industry from a business perspective. It focusses on a range of major sporting events such as the Olympics, national and international championships, and their influence on the sport tourism market in Canada. Students will understand components of sport management, event logistics, sponsorship, hospitality and licensing agreements.

Prerequisite(s): 4.00 credits including (MGMT*1000 or MGMT*2150)

Department(s): School of Hospitality, Food and Tourism Management

HTM*2030 Control Systems in the Hospitality Industry F,W (4-0) [0.50]
This is a study of the policies and procedures required to control food, beverage and other products, payroll and other operating costs. Areas examined include such topics as cost behaviour and analysis, menu analysis, budget preparation and the interpretation of data. The course will also stress the application of analytical techniques. Examples from all industry segments will be used.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 4.00 credits

Restriction(s): Restricted to students in BCOMM.HAFA, BCOMM.HAFA:C, BCOMM.HTM, BCOMM.HTM:C, BCOMM.TMGT or BASC.AHN

Department(s): School of Hospitality, Food and Tourism Management

HTM*2070 Event Management W (3-0) [0.50]
This course takes a holistic approach to the sales, servicing and management of the meetings, events, conventions, exhibitions, and incentive travel industries. Emphasis is placed on both the supply (product and service providers) and demand (meeting and event managers) elements of the industry. The course focuses on the unique operational and managerial functions of a significant sector of the tourism and hospitality industry.

Prerequisite(s): 1 of HTM*1000, HTM*1160, HTM*1700

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): School of Hospitality, Food and Tourism Management

HTM*2220 Communication and Media Strategy in Sport and Events F (3-0) [0.50]
All successful communication and media strategies in sport and events must take into account the complexities of this diverse and dynamic market of sport-related goods and services. This course examines sport and event communications through the investigation of internal and external factors that shape consumer demand in related industry sectors with an emphasis on digital media applications. Specifically, it will analyze the social, cultural and economic factors influencing the marketing of products, services and ideas.

Prerequisite(s): HTM*2020, MCS*1000

Restriction(s): This is a Priority Access Course. Restricted to students in BCOMM.SPMT, BCOMM.SPMT:C. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): School of Hospitality, Food and Tourism Management

HTM*2700 Understanding Foods F,W (3-2) [0.50]
This course explores the chemistry behind food preparation, food safety and handling; and the impact of different cooking methods on the colour, flavour and texture of food. Students will apply knowledge by cooking and assessing a series of prepared products.

Restriction(s): This is a Priority Access Course. Restricted to students in BCOMM.HAFA, BCOMM.HAFA:C, BCOMM.HTM, BCOMM.HTM:C, BCOMM.TMGT or BASC.AHN. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): School of Hospitality, Food and Tourism Management

HTM*2740 Cultural Aspects of Food F (3-0) [0.50]
Students are provided with an opportunity to learn about numerous cultural factors that influence food selection, preparation, and consumption patterns. Food history, religions, geographic location and culture are studied to develop an understanding of the impact of these factors on food related behaviours.

Prerequisite(s): 2.00 credits

Department(s): School of Hospitality, Food and Tourism Management

HTM*3020 The Impact of Business on Sport Industry F (3-0) [0.50]
To understand the role of a sports manager, students will apply financial decision making concepts to evaluate the continually evolving sports industry. Students will explore how globalization trends, technological advancements, and demographic changes are impacting the sports industry and their effect on supply, demand, pricing, commercialization, labor policy, and revenue in the sports industry.

Prerequisite(s): 9.00 credits including HTM*2020

Department(s): School of Hospitality, Food and Tourism Management

HTM*3030 Beverage Management F (2-2) [0.50]
Students will examine the beverage industry, including bottled water, energy drinks, coffee, tea and alcoholic beverages. In addition to the laws regulating production, labelling and marketing of these products, the course discusses the active components of beverages and their impact on the human body, consumption risks and recommended uses.

Prerequisite(s): 9.00 credits

Restriction(s): Students must be of legal drinking age in Ontario. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): School of Hospitality, Food and Tourism Management

HTM*3060 Lodging Management F (3-0) [0.50]
This course explores the principles and practices of lodging management and related activities. Students will use a systematic approach to lodging front office operations by detailing the flow of hotel business. Topics include rooms forecasting, reservations, registration, occupancy & revenue management, account settlement, a computer-based property management system (PMS), guest relations, and interdepartmental relationships. The essential internal and external information of lodging properties and the industry will be also overviewed and analyzed through multiple-set of industry performance reports.

Prerequisite(s): 9.00 credits including HTM*2010, (HTM*1160 or HTM*2100)

Department(s): School of Hospitality, Food and Tourism Management
HTM*3080 Marketing Strategy for Hospitality Managers F,W (3-0) [0.50]
This course focuses on major marketing decisions that hospitality managers face in generating and sustaining demand for their products and services through creating value for, and establishing strong relationships with their customers. Course content covers key elements of strategic marketing including, segmentation and target marketing, positioning and branding, pricing, promotions, personal selling, and distribution system decisions within the context of the hospitality and tourism industry.
Prerequisite(s): 9.00 credits including HTM*2010, MCS*1000
Department(s): School of Hospitality, Food and Tourism Management

HTM*3090 Restaurant Operations Management F,W (2-4) [1.00]
This course covers the application of managerial functions to restaurant and foodservice operations with the emphasis on teamwork and the principles of food production and service in a sustainable commercial restaurant setting. Students gain hands-on understanding of scheduling, purchasing, costing, nutritional analysis, and food safety while operating a student run restaurant.
Prerequisite(s): HTM*2030, (HTM*1700 or HTM*2700)
Department(s): School of Hospitality, Food and Tourism Management

HTM*3120 Service Operations Analysis F,W (3-0) [0.50]
This course presents an overview of strategic analysis of operations management in service industries. Tools and concepts are introduced for planning and evaluating initiatives to support service design, productivity and delivery. Topics include layout, location, productivity, service design and yield management while further developing spreadsheet skills in analytical contexts.
Prerequisite(s): (ACCT*1220 or ACCT*2220 ), (1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060, STAT*2080)
Restriction(s): FARE*3310. Restricted to students in BCOMM.BC, BCOMM.BHFA,C, BCOMM.HTM, BCOMM.HTM:C or BCOMM.TMG.T.
Department(s): School of Hospitality, Food and Tourism Management

HTM*3160 Destination Management and Marketing F (3-0) [0.50]
This course examines the attractiveness of communities (urban and rural; domestic and international) for visitors and the implications that result from the development of a tourism industry. Methods to encourage visitation are explored as are the attempts to create and manage the development of the community and the tourism industry in a sustainable manner.
Prerequisite(s): HTM*1070 or HTM*2170
Restriction(s): Restricted to students in BCOMM.BHAFA, BCOMM.BHFA,C, BCOMM.HTM, BCOMM.HTM:C, BCOMM.TMG.T, or BA.EURS Area of Emphasis in European Business.
Department(s): School of Hospitality, Food and Tourism Management

HTM*3180 Casino Operations Management W (0-0) [0.50]
This course examines the application of business management principles and procedures within casinos. Major topics include: the global and Canadian casino industries, regulation and control, casino accounting and statistics, casino marketing, security and surveillance, human resources, customer service, and specific casino operational management components.
Offering(s): Offered through Distance Education format only. Offered in even-numbered years.
Prerequisite(s): (1 of BUS*2090 , HROB*2090, HROB*2100 , ACCT*2230)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): School of Hospitality, Food and Tourism Management

HTM*3780 Managing Food in Canada W (3-0) [0.50]
This course provides an introduction to the Canadian food system. The subjects of global trade, supply chain management, food legislation and regulation, food safety, consumer food-related behavior, and food product development are studied to develop an understanding of how they impact the Canadian food system and its functionality.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of FOOD*2010, HTM*1700, HTM*2700
Restriction(s): AGR*1100,FARE*1400
Department(s): School of Hospitality, Food and Tourism Management

HTM*4050 Wine and Oenology W (2-2) [0.50]
This course provides students with knowledge about the wine industry and will emphasize knowledge about product, purchasing, pricing, and service.
Prerequisite(s): 9.00 credits
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): School of Hospitality, Food and Tourism Management

HTM*4060 Advanced Lodging Management W (3-0) [0.50]
This course integrates knowledge and skills in lodging operation, restaurant management, marketing and sales, managerial accounting and finance, revenue management and human resources management. Students will formulate and implement strategic business plans and budgets and evaluate business performance utilizing a hotel simulation program. This course particularly emphasizes development of analytical decision-making and problem solving skills.
Prerequisite(s): HTM*3060
Department(s): School of Hospitality, Food and Tourism Management

HTM*4080 Experiential Learning and Leadership in the Hospitality and Tourism Industry F,W (3-0) [0.50]
An integration of the students’ academic studies with their work experiences. Emphasis will be placed on applying and evaluating theoretical concepts in different working environments. Students will investigate the concept of workplace fit applying this to their prospective career path.
Prerequisite(s): 14.00 credits and a minimum of 700 hours of verified work experience in the hospitality and tourism industry.
Restriction(s): HTM*3150 . Restricted to students in BCOMM.HFA, BCOMM.HFA:C, BCOMM.HTM, BCOMM.HTM:C or BCOMM.TMG.T. Instructor Consent Required.
Department(s): School of Hospitality, Food and Tourism Management

HTM*4090 Hospitality Development, Design and Sustainability F (3-0) [0.50]
This course focuses on the development, design and management of the hospitality built environment. It explores issues related to the planning and development of hospitality properties, provides an introduction to property and asset management as related to the hospitality industry, and examines universal design as applied to the ‘servicescape’, all within the broad context of sustainability.
Prerequisite(s): 14.00 credits including HTM*1000 or HTM*1160
Restriction(s): REAL*3890
Department(s): School of Hospitality, Food and Tourism Management

HTM*4110 Advanced Food Service Operations W (1-7) [0.50]
This course focuses on the management and operation of food service events. Emphasis is placed on event planning and creativity in menu formulation, operational performance, and guest satisfaction. This includes ambience, total service and the dynamic relationship between service and the product of food and beverages.
Prerequisite(s): HTM*3090
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): School of Hospitality, Food and Tourism Management

HTM*4130 Current Management Topics U (3-0) [0.50]
Operating problems in the hospitality and tourism industry are analyzed and discussed using actual case studies. Students should check with the School of Hospitality, Food and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.
Restriction(s): Instructor consent required.
Department(s): School of Hospitality, Food and Tourism Management

HTM*4140 Current Management Topics U (3-0) [0.50]
Operating problems in the hospitality and tourism industry are analyzed and discussed. Students should check with the School of Hospitality, Food and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.
Restriction(s): Instructor consent required.
Department(s): School of Hospitality, Food and Tourism Management

HTM*4150 Current Management Topics U (3-0) [0.50]
Operating problems in the hospitality and tourism industry are analyzed and discussed. Students should check with the School of Hospitality, Food and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.
Restriction(s): Instructor consent required.
Department(s): School of Hospitality, Food and Tourism Management

HTM*4170 International Tourism W (3-0) [0.50]
This course encourages students to develop a cross-cultural awareness of the dimensions and issues of tourism, and the trends that shape the various sectors of the industry in every region of the world. Students will gain knowledge of the social, political and economic impacts of tourism globally, the patterns of international travel, regional development and marketing implications.
Prerequisite(s): 14.00 credits including HTM*3160
Department(s): School of Hospitality, Food and Tourism Management

Human Resources and Organizational Behaviour

Gordon S. Lang School of Business and Economics, Department of Management

**HROB*2010 Foundations of Leadership F,W (3-0) [0.50]**

Using an integrated approach to studying leadership, this foundation course covers history, evolving theories, models, and research both from a theoretical point of view and practical application. This course will use a seminar style with applied workshops, class discussions, guest speakers, and student participation. Students will prepare elements of a skills portfolio and a research paper. This is a required course for the Certificate in Leadership.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** BUS*2010

**Restriction(s):** UNIV*2000

**Department(s):** Department of Management

**HROB*2090 Individuals and Groups in Organizations F,W (3-0) [0.50]**

The course serves as an overview to organizational behaviour. It examines the individual, the group, the organization and how the three interrelate in order to enhance performance and productivity. (Also offered through Distance Education format.)

**Equate(s):** BUS*2090

**Restriction(s):** HROB*2100 , HROB*4000, PSYC*3080

**Department(s):** Department of Management

**HROB*2220 Labour Relations F (3-0) [0.50]**

This course provides students with a working knowledge of the institutions and processes (both regulatory and non-regulatory) that govern the relationship between employers and employees. Students will comprehensively explore the human resources implications of the labour relations system by examining the actors, the environmental factors impacting the parties, the establishment and maintenance of bargaining rights, contract negotiation, and the administration of the collective agreement.

**Prerequisite(s):** 2.00 credits

**Equate(s):** ECON*2200

**Department(s):** Department of Management

**HROB*2290 Human Resources Management F,W (3-0) [0.50]**

This course examines the essential human resource function of planning, staffing, employee training and development, employee assistance programs, the legal environment and employee maintenance in a variety of organizational settings.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 1 of BUS*2090 , BUS*2220 , HROB*2090

**Restriction(s):** BUS*3000 , HROB*2100 , HROB*2290, HROB*3000 , PSYC*3070 This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Management

**HROB*3010 Compensation Systems F (3-0) [0.50]**

This course focuses on how organizations attract, retain, and motivate employees through formal and informal reward mechanisms. Topics include: developing pay structures, job analysis, job evaluation, pay systems, pay system administration, equity issues, and benefits.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 1 of BUS*3000 , HROB*2100 , HROB*2290, HROB*3000 , PSYC*3070

**Equate(s):** BUS*3010 , PSYC*3010

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Management

**HROB*3030 Occupational Health and Safety W (3-0) [0.50]**

The major objective of this course is to introduce Human Resources Professionals to this broad and ever changing field. Occupational Health and Safety is an inherently technical subject far broader than legislation only. The multiple dimensions of the various issues - technical, legislative, political and personal are a required part of the training for a professional in this field.

**Prerequisite(s):** 9.00 credits including (1 of BUS*3000 , HROB*2100 , HROB*2290, HROB*3000 , PSYC*3070 )

**Equate(s):** BUS*3030 , PSYC*3060

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Management
HROB*4030 Advanced Topics In Leadership and Organizational Management U (3-0) [0.50]

Students will actively examine issues in selected topic areas of human resource management at an advanced level and with a focus on application in an actual organizational setting. The focal area of the course, or range of human resource management topics covered by the course, will vary depending on instructor. Selected topic areas may include corporate social responsibility, leadership issues, strategic human resource management, gender issues, human rights issues, recruitment methods and outcomes, functional job analysis and validation methods, job performance criteria and appraisal tools, selection processes and tools, organizational justice, work attitudes, and prejudice and discrimination in the workplace. Specific topic areas will be announced prior to the course selection period.

Prerequisite(s): 12.50 credits including (1 of BUS*3000, HROB*2100, HROB*2290, HROB*3000, PSYC*3070)

Equate(s): BUS*4030

Department(s): Department of Management

HROB*4060 Human Resource Planning W (3-0) [0.50]

This course introduces the strategic planning role that human resources professionals play in organizations. Students will confront the challenges and demands of rightsizing, technological change, corporate repositioning, cost containment, productivity improvements, and the consequences of relocation, outplacement and retraining of staff. An understanding of the essential elements of the human resource planning process in organizations will be provided. Students will acquire knowledge in analyzing, assessing and programming for the human resource requirements of organizational, business and strategic plans.

Prerequisite(s): 15.00 credits including (1 of BUS*3000, HROB*2100, HROB*2290, HROB*3000, PSYC*3070)

Equate(s): BUS*4060, HTM*4160

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

Department(s): Department of Management

HROB*4100 Evidence-Based People Management F (3-0) [1.00]

This course provides students with the opportunity to conduct hands-on research in an organization on issues that relate to Human Resource Management. Students will work in groups and be expected to find organizations for their research project. Although students will be primarily accountable for finding their organizations to work with, instructor support will be provided to assist students if difficulties arise. The instructor will also serve as a resource throughout the project. Lecture topics include: understanding organizational issues, understanding the consulting process (e.g. engagement, communication, ethics), project planning, data collection methods in an applied context (e.g. sampling, confidentiality, practical constraints), and report writing.

Prerequisite(s): 12.50 credits including (1 of BUS*3000, HROB*2100, HROB*2290, HROB*3000, PSYC*3070)

Equate(s): BUS*4100, PSYC*4100

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

Department(s): Department of Management
Human Kinetics
Department of Human Health and Nutritional Sciences

HK*2270 Principles of Human Biomechanics F (3-1) [0.50]

This course will address the application of mechanical principles to the study of human movement. Topics will include: motion analysis techniques, anthropometrics, biological tissue tolerance, muscle force generation, static and dynamic equilibrium, work/energy and impulse/momentum as they apply to the description of motion, injury of musculoskeletal tissues and optimization of human performance.

Prerequisite(s): 4.00 credits including BIOL*1090, PHYS*1080
Department(s): Department of Human Health and Nutritional Sciences

HK*2810 Human Physiology I - Concepts and Principles W (3-0) [0.50]

This course will introduce the fundamental concepts and principles of communication systems (transport, ion movement, nerve and synapse, muscle) in humans. It will focus on primary physiological communication systems, such as the endocrine and central nervous systems, and integrate basic principles to understand larger systems such as the gastrointestinal tract.

Prerequisite(s): BIOL*2580, BIOL*1080
Department(s): Department of Human Health and Nutritional Sciences

HK*3100 Neuromuscular Physiology W (3-0) [0.50]

Normal muscle movement is controlled by the motor cortex or by reflexes within the context of the sensory environment. This course will introduce key concepts in motor control of mammalian, human movement, coordination of movement, motor program selection, motor program execution, motor unit recruitment, skeletal muscle excitation-contraction coupling. This course is required for students wishing to gain certification by the Ontario Kinesiology Association.

Prerequisite(s): 1 of BIOM*3200, HK*3810, ZOO*3600
Restriction(s): Restricted to B.Sc., Major in Human Kinetics or Neuroscience Minor.
Department(s): Department of Human Health and Nutritional Sciences

HK*3401 Human Anatomy: Dissection F (3-3) [0.75]

First part of the two-semester course HK*3401/2. Refer to HK*3401/2 for course description.

Co-requisite(s): HK*3810
Restriction(s): HK*3501/2. Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science.
Department(s): Department of Human Health and Nutritional Sciences

HK*3401/2 Human Anatomy: Dissection F-W [1.50]

A two-semester lecture and laboratory course in human anatomy which includes a detailed study of the skeleton, upper and lower limbs, thorax, abdomen, pelvis, perineum, head, neck and central nervous system. The labs involve hands-on dissection. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*3401 in the Fall semester and HK*3402 in the Winter semester. A grade will not be assigned to HK*3401 until HK*3402 has been completed.

Co-requisite(s): HK*3810
Restriction(s): HK*3501/2. Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science.
Department(s): Department of Human Health and Nutritional Sciences

HK*3402 Human Anatomy: Dissection W (3-3) [0.75]

Second part of the two-semester course HK*3401/2. Refer to HK*3401/2 for course description.

Prerequisite(s): HK*3401
Department(s): Department of Human Health and Nutritional Sciences

HK*3501 Human Anatomy: Prosection F (3-2) [0.75]

First part of the two-semester course HK*3501/2. Refer to HK*3501/2 for course description.

Co-requisite(s): HK*3810
Restriction(s): HK*3401/2. Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science. Instructor consent required.
Department(s): Department of Human Health and Nutritional Sciences

HK*3501/2 Human Anatomy: Prosection F-W [1.50]

A two-semester lecture and laboratory course in human anatomy which includes a detailed study of the skeleton, upper and lower limbs, thorax, abdomen, pelvis, perineum, head, neck and central nervous system. Labs involve observation of anatomical details using prosections and dissected specimens. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*3501 in the Fall semester and HK*3502 in the Winter semester. A grade will not be assigned to HK*3501 until HK*3502 has been completed.

Co-requisite(s): HK*3810
Restriction(s): HK*3401/2. Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science. Instructor consent required.
Department(s): Department of Human Health and Nutritional Sciences

HK*3502 Human Anatomy W (3-2) [0.75]

Second part of the two-semester course HK*3501/2. Refer to HK*3501/2 for course description.

Prerequisite(s): HK*3501
Department(s): Department of Human Health and Nutritional Sciences

HK*3600 Applied Human Kinetics I F (3-3) [0.75]

This course covers laboratory techniques which are central to human biology, together with their underlying concepts. Human performance and function are evaluated through cellular, organic, systemic and whole person studies. The student's technical competence and conceptual understanding are emphasized.

Prerequisite(s): HK*2270
Co-requisite(s): HK*3810
Restriction(s): Registration in the Human Kinetics major.
Department(s): Department of Human Health and Nutritional Sciences

HK*3810 Human Physiology II - Integrated Systems F (4-0) [0.75]

This course will build on the fundamental concepts and principles of communication systems developed in Human Physiology I and examine more complex physiological phenomena such as the control of blood volume and blood pressure, which integrates tissue of the cardiovascular system, the heart, vasculature and kidney, and acid-based physiology, which integrates the respiratory system and the kidney. Finally, all systems will be integrated to determine how the body responds to challenges such as altitude, exercise and shock (blood loss).

Prerequisite(s): HK*3810
Department(s): Department of Human Health and Nutritional Sciences

HK*4070 Clinical Biomechanics W (3-2) [0.50]

This course covers functional anatomy, neurophysiology and mechanical characteristics of humans at the tissues and whole-body levels. Pathomechanics of human movement resultant from disease, abuse or trauma will be examined. Special emphasis will be placed on etiology, testing and correction of functional disorders with special reference to balance, gait and orthopaedic biomechanics.

Prerequisite(s): ENGG*2660 or (HK*2270, HK*3600)
Department(s): Department of Human Health and Nutritional Sciences

HK*4230 Advanced Study in Human Health and Nutritional Sciences S,F,W (3-0) [0.50]

The student will conduct independent literature research of an approved topic to be decided by the student in consultation with a faculty advisor. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): 12.00 credits
Restriction(s): Course coordinator consent required.
Department(s): Department of Human Health and Nutritional Sciences

HK*4240 Occupational Biomechanics and Ergonomics W (3-2) [0.75]

This course introduces the methods available for reducing musculoskeletal injuries in the workplace. Topics include: biomechanical, psychophysical, physiological, and integrated approaches to performing physical demands analyses, anatomy and etiology of low back injuries and upper limb disorders, principles of redesigning tasks to reduce the risk of injury, pre-employment screening and legislated guidelines. Students apply the course material to ergonomic assessments performed in industrial environments.

Prerequisite(s): ENGG*1210 or HK*3600
Department(s): Department of Human Health and Nutritional Sciences

HK*4511 Teaching, Learning & Knowledge Transfer II S,F,W (0-6) [0.50]

First part of a two-semester course HK*4511/2. In consultation with a faculty advisor, the student will select, design and complete an independent project on the scholarship of teaching, learning and/or knowledge transfer in human health. This is a two-semester course offered over consecutive semesters; when you select it you must select HK*4511 in the first semester and HK*4512 in the second semester (a grade will not be assigned to HK*4511 until HK*4512 has been completed). Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): 10.00 credits including BIOL*1080
Restriction(s): Course coordinator consent required.
Department(s): Department of Human Health and Nutritional Sciences

HK*4512 Teaching, Learning & Knowledge Transfer II S,F,W (0-6) [1.00]

In consultation with a faculty advisor, the student will select, design and complete an independent project on the scholarship of teaching, learning and/or knowledge transfer in human health. This is a two-semester course offered over consecutive semesters; when you select it you must select HK*4511 in the first semester and HK*4512 in the second semester (a grade will not be assigned to HK*4511 until HK*4512 has been completed). Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

Prerequisite(s): 10.00 credits including BIOL*1080
Restriction(s): Course coordinator consent required.
Department(s): Department of Human Health and Nutritional Sciences

HK*4550 Human Cardio-respiratory Physiology F (3-0) [0.50]

The central focus of this course is a comprehensive examination of the effects of a variety of work parameters on normal cardio-respiratory adjustments required to meet metabolic demands. Immediate adjustments to increase metabolic rate as well as long term cardio-respiratory adaptability will be discussed.

Prerequisite(s): HK*3810 or HK*3940
Department(s): Department of Human Health and Nutritional Sciences

HK*4600 Applied Human Kinetics II W (3-3) [0.75]

The objective of this course is to expand on the introductory laboratory practices developed in HK 3600 Applied Human Kinetics I. Students will examine the functioning of a human body at rest and in motion, while learning clinical and advanced laboratory techniques. The students will be introduced to the underlying concepts of various physiological and biomechanical measures in lecture. Subsequently, the principles from the lecture will be used to make direct measures in the laboratory, with an emphasis on understanding exercise physiology, clinical testing practices, and integrative approaches to studying human movement. Students will be asked to critically analyze the laboratory measures and findings, and to integrate the lecture and laboratory material in formalized laboratory reports.

Prerequisite(s): HK*3600
Restriction(s): Restricted to students in Human Kinetics.
Department(s): Department of Human Health and Nutritional Sciences
## Humanities

**College of Arts**

### HUMN*1030 What Makes a Literary Classic? F (3-0) [0.50]

Why are some books considered classics? What is the nature of their impact on literature, on culture, at either the national or world level, on their age? The focus of this course will be on works that are considered classics, from different ages and from different national and linguistic traditions, as well as theoretical essays. Texts read will be in English translation.

| Offering(s): | Offered in odd-numbered years. |
| Department(s): | School of Languages and Literatures |

### HUMN*1300 Fundamentals of Arts Management I W (3-0) [0.50]

This course provides an introduction to arts, culture, and heritage management as a career possibility. Students will develop an understanding of management and communication as they relate to the cultural sector (visual art, film and theatre, sound/music, and heritage). Course assignments and projects will deal with the broad range of issues facing those who work in management/administration of the arts, whether in the public or the private sectors.

| Department(s): | School of Fine Art and Music |

### HUMN*1300 Fundamentals of Arts Management II F (3-0) [0.50]

This course provides an in-depth investigation of the practice of arts management in the Canadian context. Students will explore and research the history and structure of arts funding and arts organizations and learn the basics of entrepreneurship in the Canadian context.

| Prerequisite(s): | 2.00 credits |
| Department(s): | School of Fine Art and Music |

### HUMN*3000 Narratives of Migration W (3-0) [0.50]

People move from one location to another for a variety of reasons. This course examines how literary texts and other forms of creative expression represent various forms of dislocation such as migration and exile. The focus of the course will be on theories of migration and creative works in an array of texts and media. Texts will be read in English translation.

| Offering(s): | Offered in even-numbered years. |
| Department(s): | School of Languages and Literatures |

### HUMN*3020 Myth and Fairy Tales in Germany F (3-0) [0.50]

The course explores the role of mythology, fairy tales and legends in German literature and culture. Topics may include the formation of a national identity, the allegorical fairy tale and its role in Romanticism, women and the fairy tale, the fairy tale and the socialization of children (incl. Disney), adaptations of mythologies in modern literature. Authors may include Goethe, Brothers Grimm, ETA Hoffmann. Lectures and texts are in English. This course is offered in conjunction with GERM*3020.

| Offering(s): | Offered in even-numbered years. |
| Department(s): | School of Languages and Literatures |

### HUMN*3100 London Studies in the Humanities W (2-3) [0.50]

An integrated course of studies in the Humanities (including 2 or more of theatre, visual arts, history, music, literature and philosophy) as they relate to London cultural resources. For London Semester students only.

| Prerequisite(s): | Admission to London Semester. |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3150 Paris Studies in the Humanities W (2-3) [0.50]

An integrated course of study in the Humanities (including 2 or more of theatre, visual arts, history, music, literature and philosophy) as they relate to Paris cultural resources. For Paris Semester students only.

| Prerequisite(s): | Admission to Paris Semester. |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3190 Experiential Learning S,F,W (0-0) [0.50]

This course provides an opportunity for independent study based in the Arts and/or Humanities related to either voluntary or paid experience. Evaluation will be based on assignments directly related to the experience. Students interested in this course must have their project approved by the instructor and the office of the Associate Dean (Academic) of the College of Arts prior to the semester in which they plan to engage in their experiential learning experience.

| Prerequisite(s): | 7.50 credits |
| Restriction(s): | Instructor consent required. |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3210 Introduction to Polish History and Culture F (6-4) [1.00]

An integrated course of studies in the humanities as they relate to the resources of Krakow, Poland. For Krakow Semester students only.

| Prerequisite(s): | Admission to Krakow Semester. |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3220 Krakow Studies in the Humanities I F (3-2) [0.50]

An integrated course of studies in the humanities as they relate to the resources of Krakow, Poland. For Krakow Semester students only.

| Prerequisite(s): | Admission to the Krakow Semester. |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3230 Krakow Studies in the Humanities II F (3-2) [0.50]

An integrated course of studies in the humanities as they relate to the resources of Krakow, Poland. For Krakow Semester students only.

| Prerequisite(s): | Admission to the Krakow Semester. |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3240 India Studies in the Humanities W (3-0) [0.50]

An integrated course of studies in the humanities as they relate to India. This course looks at selected aspects of one or more areas in the humanities, including Indian religions, philosophy, literature (in English), history, language (Hindi), art and music. For India Semester students only.

| Prerequisite(s): | Admission to the India Semester. |
| Department(s): | Dean's Office, College of Social and Applied Human Sciences |

### HUMN*3300 Latin American Studies in the Humanities F,W (1-2) [0.50]

This is an integrated course of studies in the humanities as they relate to the resources of Latin America. It is offered either as preparation for the Latin America semester (in fall) or during this study abroad program (in winter).

| Prerequisite(s): | Admission to the Latin America semester. |
| Restriction(s): | Instructor consent required. |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3400 Renaissance Lovers and Fools F (3-0) [0.50]

In this course, students will read Italian Renaissance plays such as Machiavelli’s “The Mandrake” and Bibbiena’s “Calandria” with special attention to the portrayals of lovers and fools. The course will place particular emphasis on representations of class and gender relations. Additional readings in medieval literature, history, and critical theory will provide background and context for the plays. Lectures and texts are in English. This course is offered in conjunction with ITAL*3400.

| Prerequisite(s): | 5.00 credits |
| Department(s): | Dean's Office, College of Arts |

### HUMN*3470 Holocaust & WWII in German Lit. & Film F (3-0) [0.50]

This course focuses on texts and films pertaining to World War II and the Holocaust, the development of the thoughts and the language of genocide, and the representation of the Holocaust in literature and films. The objective is to gain an understanding of the ideas and emotions underlying ethnocentrism and anti-Semitism, and to consider artistic responses to the experience of persecution and mass-murder. Lectures and discussions are in English. Students who wish to do a German credit must register for GERM*3470.

| Offering(s): | Offered in odd-numbered years. |
| Prerequisite(s): | 5.00 credits |
| Department(s): | School of Languages and Literatures |
This course provides an opportunity for independent study based in the Arts and/or Humanities related to either voluntary or paid experience. Evaluation will be based on assignments directly related to the experience. Students interested in this course must have their project approved by the instructor and the office of the Associate Dean (Academic) of the College of Arts prior to the semester in which they plan to engage in their experiential learning experience.

**Prerequisite(s):** 10.00 credits

**Restriction(s):** Instructor consent required.

**Department(s):** Dean's Office, College of Arts

## Interdisciplinary Physical Science

### IPS*1500 Integrated Mathematics and Physics I F (6-4) [1.00]
This is a foundational course for students in B.Sc. mathematical and physical sciences majors. The disciplines of Mathematics and Physics are taught in an integrated fashion that demonstrates how they support and enrich one another. Atomic structure, algebra and trigonometry, forces and Newton's laws, functions and graphing, differentiation, angular momentum and energy conservation, limits, integration, kinematics, and special relativity are presented in a harmonized fashion to ensure students have an improved understanding of these fundamentals.

**Prerequisite(s):** 1 of 4U Physics, PHYS*1020, PHYS*1300  
**Restriction(s):** MATH*1080, MATH*1200, PHYS*1000, PHYS*1080  
**Department(s):** Department of Physics, Department of Mathematics and Statistics

### IPS*1510 Integrated Mathematics and Physics II W (6-4) [1.00]
This is the second foundational course for students in B.Sc. mathematical and physical sciences majors. The disciplines of Mathematics and Physics are taught in an integrated fashion that demonstrates how they support and enrich one another. Thermodynamics, integration, electrostatics, partial derivatives, multidimensional integrals, simple harmonic motion, Taylor's series, and spectroscopy are presented in a harmonized fashion to ensure students have an improved understanding of these fundamentals.

**Prerequisite(s):** IPS*1500  
**Restriction(s):** MATH*1090, MATH*1210, MATH*2080, PHYS*1010, PHYS*1070, PHYS*1130  
**Department(s):** Department of Physics, Department of Mathematics and Statistics

### IPS*3000 Science Communication F (3-3) [0.50]
This course focuses on developing the skills required to communicate science for non-specialist audiences. The principles and practices of public speaking and writing will be explored, employing a variety of media. Through multiple oral and written assignments, students will explore tailoring their message for various audience-types.

**Prerequisite(s):** 2.00 credits in PHYS at the 2000 level or higher  
**Restriction(s):** PHYS*4300  
**Department(s):** Department of Physics
# Interdisciplinary Social Science

_College of Social and Applied Human Sciences_

**ISS*2000 Asia U (3-0) [0.50]**

This course will survey China and/or India, noting the major historical trends, cultural factors, economic systems, and political institutions and political processes.

*Department(s):* Department of Political Science

**ISS*3100 London Studies in the Social Sciences W (2-3) [0.50]**

An integrated course of studies in the social sciences as they relate to the resources of London. For London Semester students only.

*Restriction(s):* Admission to the London Semester.

*Department(s):* Dean's Office, College of Arts

**ISS*3150 Paris Studies in the Social Sciences W (2-0) [0.50]**

An integrated course of studies in the social sciences as they relate to the resources of Paris. For Paris Semester students only.

*Restriction(s):* Admission to the Paris Semester.

*Department(s):* Dean's Office, College of Arts

**ISS*3250 Krakow Studies in the Social Sciences I F (3-2) [0.50]**

An integrated course of studies in the social sciences as they relate to the resources in Krakow, Poland. For Krakow students only.

*Restriction(s):* Admission to the Krakow Semester.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

**ISS*3260 Krakow Studies in the Social Sciences II F (3-2) [0.50]**

An integrated course of studies in the social sciences as they relate to the resources in Krakow, Poland. For Krakow students only.

*Restriction(s):* Admission to the Krakow Semester.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

**ISS*3270 India Studies in the Social Sciences W (3-0) [0.50]**

An integrated course of studies in the social sciences as they relate to India. This course looks at selected aspects of one or more areas in the social, geographic, economic and political aspects of Indian society. For India Semester students only.

*Restriction(s):* Admission to the India Semester.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

**ISS*3300 Latin American Studies in the Social Sciences F,W (1-2) [0.50]**

This is an integrated course of studies in the social sciences as they relate to the resources of Latin America. It is offered either as preparation for the Latin America semester (in fall) or during this study abroad program (in winter).

*Restriction(s):* Admission to the Latin America semester. Instructor consent required.

*Department(s):* Dean's Office, College of Arts

**ISS*3420 Women Social and Political Theorists W (3-0) [0.50]**

The writings of seventeenth and nineteenth century women social and political theorists will be explored as contributing to the development of classical and contemporary social and political theory. These women wrote on status of women and gender role issues as well as dealing with such fundamental matters as the nature and origin of society/social contract, political rights and obligations, government, constitutional change, revolution, slavery, socialism, the welfare state, imperialism and racism. An important feature of the course would be to show women theorists' contributions on central political interests and the integration of gender issues with those of class and race.

*Prerequisite(s):* SOAN*2111/2 or POLS*2000

*Restriction(s):* Not available to students in Anthropology, Criminal Justice & Public Policy or Sociology areas of study.

*Department(s):* Department of Sociology and Anthropology, Department of Political Science
Interdisciplinary University

UNIV*3550, UNIV*3550 and UNIV*4500 are re-numbered and now appear under Environmental Design and Rural Development (EDRD)

UNIV*1200 First Year Seminar F,W (3-0) [0.50]
First Year Seminars are interdisciplinary courses designed especially for first year students. The goal of the First Year Seminar course is to provide opportunities for students to participate in small enrolment, discussion-oriented classes in their first year. Different seminar topics are offered each year in each separate course section, reflecting the particular research or professional interest of the course instructor. The seminar course counts as a free elective in the student's Schedule of Studies. For information about how the seminar courses may in some cases fulfill particular program distribution requirements, students should contact their program counsellor. A list of current and archived offerings is available by following the links on the First Year Seminars web page.

Restriction(s): Fewer than 5.00 credits.
Department(s): Provost & VP Academic

UNIV*1250 Experiential Learning Opportunity I: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will not be assigned to UNIV*1250 until UNIV*1260 has been completed. Students who wish to enroll in this course should see Student Life and Career Services for more information.

Prerequisite(s): UNIV*1250
Department(s): Associate VP Academic

UNIV*1260 Experiential Learning Opportunity II: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will be assigned at the end of the completion of both UNIV*1250 and UNIV*1260. Student who wish to enroll in this course should see Student Life for more information.

Prerequisite(s): UNIV*1250
Department(s): Associate VP Academic

UNIV*2100 CAREER READY: DEVELOP YOUR FUTURE F,W (3-0) [0.50]
This course introduces students to career development theory and provides the practical knowledge required to succeed in the current and future world of work. Students will examine key concepts from career development theory and will engage in reflective and experiential learning activities aimed at preparing them for job search and the world of work. Within the context of career development, issues related to mental well-being, diversity, intercultural competencies, and the implications of disclosure and accommodation will be studied.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 4.00 credits
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to non-BComm and non-Co-op students.
Department(s): Department of Management

UNIV*2250 Experiential Learning Opportunity III: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will not be assigned to UNIV*2250 until UNIV*2260 has been completed. Students who wish to enroll in this course should see Student Life and Career Services for more information.

Prerequisite(s): UNIV*1250, UNIV*1260
Department(s): Associate VP Academic

UNIV*2260 Experiential Learning Opportunity IV: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail will be assigned at the end of the completion of both UNIV*2250 and UNIV*2260. Students who wish to enroll in this course should see Student Life and Career Services for more information.

Prerequisite(s): UNIV*2250
Department(s): Associate VP Academic

UNIV*2410 Engaged Global Citizenship F (3-0) [0.50]
In this course students will gain an understanding of the concepts, values, and skills related to effective community engagement and responsible global citizenship. As culturally-aware global citizens, students will be challenged to identify a meaningful role for themselves in contributing to a more equitable and sustainable environment by developing an action plan for participating in community engagement opportunities at the local, national or international scale. This is the required introductory course for the Certificate in Civic Engagement and Global Citizenship.

Prerequisite(s): 4.00 credits
Restriction(s): Fewer than 10.50 credits.
Department(s): Department of Political Science

UNIV*3000 Civic Engagement & Service Learning W (3-0) [0.50]
This course provides a unique opportunity for students to develop civic leadership skills and increase their awareness and appreciation for the social relevance of higher education through a community service-learning experience. Curricular and co-curricular learning are integrated through continued academic study and its application, modification, and critique in a community context. Students will conduct research and seminars on a selected topic while simultaneously completing a placement in a community agency appropriate to that topic.

Prerequisite(s): 9.00 credits
Department(s): Associate VP Academic

UNIV*3100 University Studies in London I U (3-0) [0.50]
This course is an intensive and integrated study in the arts, social sciences and/or sciences as they relate to the resources of London. This course is for London Session Semester students only.

Prerequisite(s): Admission to the London Semester.
Department(s): Dean's Office, College of Arts

UNIV*3200 University Studies in London II U (3-0) [0.50]
This course is an intensive and integrated study in the arts, social sciences and/or sciences as they relate to the resources of London. This course is for London Session Semester students only.

Prerequisite(s): Admission to the London Semester.
Department(s): Dean's Office, College of Arts

UNIV*3310 Flexible Internship in Agri-Food F,W (2-0) [0.50]
This course offers an experiential learning opportunity through an unpaid 40-hour internship in the agri-food sector with partners in government, industry or civil society organizations. Students will learn about the integrated nature of the agro-food industry in Canada and the forces that shape this system, including their own food choices. Knowledge of current and future trends in the agri-food system will assist students with developing career-readiness skills that will be applied during the process of securing and working in an internship position. This internship is flexible and can be completed during the course or by the end of the following semester. Completing the internship is required for completing the course.

Prerequisite(s): 9.00 credits
Restriction(s): UNIV*2100. Not available to co-op students. Must have at least a 70% cumulative grade average. Must be in class levels 05, 06 or 07 to be able to complete internship requirement before graduation. Instructor consent required.
Department(s): Department of Food, Agricultural and Resource Economics

UNIV*3310 University Studies in Paris I W (2-3) [0.50]
An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.

Prerequisite(s): Admission to the Paris Semester.
Department(s): Dean's Office, College of Arts

UNIV*3310 University Studies in Paris II W (2-3) [0.50]
An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.

Prerequisite(s): Admission to the Paris Semester.
Department(s): Dean's Office, College of Arts

Integrative Biology
Department of Integrative Biology

**IBIO*3100 Interpreting Biodiversity I W (1.5-3) [0.50]**
This is the first of two courses that explore global and local issues in biodiversity as a capstone experience for biodiversity majors. The overall goal of the course is to provide opportunities for BIOD students to engage the application of their knowledge and skills to complex problems and issues involving “real-life” biodiversity projects within academic, government, or industry spheres. The learning outcomes include the application of key skills for interpreting biodiversity and writing a research proposal and work plan that will be executed in IBIO*4100.

*Prerequisite(s):* 12.00 credits  
*Restriction(s):* Enrolment restricted to BSCH:BIOD majors.  
*Department(s):* Department of Integrative Biology

**IBIO*4100 Interpreting Biodiversity II F (1.5-3) [1.00]**
This is the second of two courses that explore global and local issues in biodiversity as a capstone experience for biodiversity majors. The overall goal of the course is to provide opportunities for students to engage the application of their knowledge and skills to complex problems and issues involving “real-life” biodiversity projects within academic, government, or industry spheres. The learning outcomes include the application of key skills for interpreting biodiversity, the collection and analysis of biodiversity data. This student centred experience will culminate with an oral presentation and written report to the “clients”, classmates and instructors.

*Prerequisite(s):* IBIO*3100  
*Restriction(s):* Enrolment restricted to BSCH:BIOD majors.  
*Department(s):* Department of Integrative Biology

**IBIO*4500 Research in Integrative Biology I F,W (0-12) [1.00]**
The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

*Prerequisite(s):* 12.00 credits  
*Restriction(s):* Minimum cumulative average of 70%. Instructor consent required.  
*Department(s):* Department of Integrative Biology

**IBIO*4510 Research in Integrative Biology II F,W (0-12) [1.00]**
The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

*Prerequisite(s):* IBIO*4500  
*Restriction(s):* Minimum cumulative average of 70%. Instructor consent required.  
*Department(s):* Department of Integrative Biology

**IBIO*4521 Thesis in Integrative Biology F (0-12) [1.00]**
This course is the first part of the two-semester course IBIO*4521/2. Refer to IBIO*4521/2 for course description. This is a two-semester course offered over consecutive semesters F-W. When you select this course, you must select IBIO*4521 in the Fall semester and IBIO*4522 in the Winter semester. A grade will not be assigned to IBIO*4521 until IBIO*4522 has been completed.

*Prerequisite(s):* 12.00 credits  
*Restriction(s):* Normally a minimum cumulative average of 70%. Permission of course coordinator.  
*Department(s):* Department of Integrative Biology

**IBIO*4522 Thesis in Integrative Biology W (0-12) [1.00]**
This course is the second part of the two-semester course IBIO*4521/2. Refer to IBIO*4521/2 for course description. This is a two-semester course offered over consecutive semesters F-W. When you select this course, you must select IBIO*4521 in the Fall semester and IBIO*4522 in the Winter semester. A grade will not be assigned to IBIO*4521 until IBIO*4522 has been completed.

*Prerequisite(s):* IBIO*4521  
*Department(s):* Department of Integrative Biology

**IBIO*4600 Integrative Marine and Freshwater Research F (3-3) [1.00]**
In this course, students will integrate theory and analytical methods to address common problems in marine and freshwater biology. Particular emphasis will be placed on the process of inquiry including: development of research problems, data retrieval from existing literature, design and interpretation of experiments, sampling, statistical inference, and written and oral presentation.

*Prerequisite(s):* BIOL*3450, (STAT*2040 or STAT*2230), (ZOO*3210 or ZOO*3610)  
*Restriction(s):* Restricted to students in BSCH:MBF.  
*Department(s):* Department of Integrative Biology
International Development

IDEV*1000 Understanding Development and Global Inequalities S,F,W (3-0) [0.50]
The objective of the course is to provide an introduction to the study of international development as a contested and evolving effort to counteract global inequalities. Students will learn about the historical and political origins of the international development system, as well as the main development actors and institutions. The course will provide an introduction to foundational concepts within development studies, including poverty, inequality, human rights, foreign aid, and sustainable development.
Offering(s): Also offered through Distance Education format.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2000 The Development Landscape: Actors and Institutions F (3-0) [0.50]
This course examines the local and global context within which inclusive and sustainable development takes place. It explores why particular economic, social, political, and institutional structures are in place and the implications of those structures for inclusive and sustainable development. Key issues will include global institutions, religion, the global economy, natural and physical environment, gender, urbanization, power structures, and architecture. Students will critically assess the conceptualization and methodologies used in development studies, as well as implications for policy, practice, and research.
Offering(s): First offering - Fall 2020
Prerequisite(s): IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2100 Research in International Development F (3-0) [0.50]
This course explores the ethical dimensions of conducting research and producing knowledge in a context of inclusive and sustainable development. Students will explore the cultural, methodological, and ethical challenges of conducting research in vulnerable communities, using concepts of positivism, difference, identity, and intersectionality to understand the ways in which they might engage in a mutually-respectful process of research and engagement. The course provides a broad survey of research methods, including documentary, observational, qualitative, and quantitative approaches, exploring their key characteristics, strengths and weaknesses and ethical implications of producing knowledge for development.
Offering(s): First offering - Fall 2020
Prerequisite(s): IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2300 Theoretical Perspectives on Development S,W (3-0) [0.50]
This course will explore alternative theoretical perspectives on inclusive and sustainable development, drawing from an interdisciplinary lens of economics, sociology, geography, and political science, amongst others. Students will examine how theoretical perspectives have changed over time and how they differ according to alternative disciplinary and philosophical perspectives. How dominant theoretical perspectives on development at any point in time influence policy and practice aimed at bringing about inclusive and sustainable development will also be explored.
Offering(s): First offering - Winter 2021
Prerequisite(s): ECON*1050, ECON*1100, IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2400 Development, Social Justice and Human Rights W (3-0) [0.50]
This course will explore the nature of social justice and links to concepts and practice of human rights. It examines how development can be seen in terms of the advancement of social justice. Students will identify and critically assess alternative approaches to promoting social justice within a development context and the related actions by actors locally and globally. It will explore the related ethical issues associated with development policy and practice. Key topics will include poverty, hunger, power, gender, race, and class.
Prerequisite(s): IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2500 International Development Studies W (4-0) [0.50]
This course is an introduction to a broad range of topics in international development as studied by various researchers and from perspectives of different social-sciences disciplines. Special emphasis will be placed on research arising from the seven areas of emphasis in the undergraduate IDS program, the integration of diverse disciplines and paradigms, and the implications for public policy. Students in the International Development major should complete this course before semester five.
Prerequisite(s): POLS*2080, ANTH*1150 or ECON*1050
Equate(s): IDEV*2010
Restriction(s): Registration in B.A. International Development major, minor or area of concentration.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2700 Poverty and Inequality W (3-0) [0.50]
This course explores the nature and determinants of poverty and inequality at the local and global levels and the interrelationship between these. It examines the patterns and dynamics of poverty and inequality, for example over time and geographically. In doing so, it explores the nature and practical application of alternative approaches to their assessment and measurement. Students will reflect on and critically assess diverse approaches to reducing poverty and inequality locally and globally.
Prerequisite(s): 7.50 credits including IDEV*2500
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3100 Achieving Sustainable Development W (3-0) [0.50]
This course explores the environmental, social, and economic dimensions of sustainability and the interrelationships and trade-offs between sustainability and inclusive development. Alternative approaches for assessing and measuring sustainability will be covered. The course enables students to reflect and critically assess diverse approaches to promoting inclusive development that is sustainable locally to globally. Key issues might include climate change, urbanization, trade, extractive industries, conservation and eco-tourism, pollution, resource depletion, and water and sanitation.
Offering(s): First offering - Winter 2022
Prerequisite(s): 9.00 credits including IDEV*2000, IDEV*2100, IDEV*2300
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3010 Case Studies in International Development F,W (3-0) [0.50]
This course is an in-depth examination of select case studies in international development.
Prerequisite(s): 10.00 credits including IDEV*2010 or IDEV*2500
Restriction(s): Registration in B.A. International Development major. Minimum of 68% overall cumulative average.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3000 Poverty and Inequality F (3-0) [0.50]
This course explores the nature and determinants of poverty and inequality at the local and global levels and the interrelationship between these. It examines the patterns and dynamics of poverty and inequality, for example over time and geographically. In doing so, it explores the nature and practical application of alternative approaches to their assessment and measurement. Students will reflect on and critically assess diverse approaches to reducing poverty and inequality locally and globally.
Prerequisite(s): 7.50 credits including IDEV*2500
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3300 Engaging in Development Practice F,W (3-0) [0.50]
This course provides an opportunity for students to engage with development practitioners in a real-world context. Students will implement a community engagement project determined in consultation with a community partner. The focus of engagement opportunities will be on the analysis of a development issue and defining related policy and/or practice options. The course explores the challenges associated with engaging with development practitioners in the real world and equips students with the necessary skills for successful engagement.
Prerequisite(s): 7.50 credits including IDEV*2500
Restriction(s): Restricted to students in BAH.IDEV.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3300 Managing and Evaluating Change in Development W (3-0) [0.50]
This course explores the key practical skills required by those engaged in the implementation of development policy and practice including logical frameworks, theories of change, impact assessment, and project management. It aims to equip students with an understanding of the nature of these techniques, and how and where they are employed. The strengths and weaknesses of these techniques and their implications for development policy and practice are explored.
Prerequisite(s): 7.50 credits including IDEV*2500
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3500 Field Course in Development Studies S (3-0) [1.00]
This course examines development within the context of an international or Canadian location, with the location varying each year. The course is comprised of an on-campus teaching component followed by a field trip during the summer semester. Topics may include poverty, food security, global migration, sustainable development, gender, community engagement. Information on the location and cost of the field school is available in the fall semester from the department with applications in January, prior to each summer offering.
Prerequisite(s): 7.50 credits
Restriction(s): A cumulative average of 70%. Instructor consent required.
Department(s): Dean's Office, College of Social and Applied Human Sciences
IDEV*4000 Development in Action F,W (3-0) [1.00]

This capstone course for the Major in International Development Studies course equips students to analyze complex issues in inclusive and sustainable development by applying and integrating the diverse theoretical and empirical concepts, approaches and ideas taught throughout their studies in International Development. Students will reflect on their personal positions and perspectives on development and drawing on their engagement experience. The course shows how different perspectives on sustainable and inclusive development can influence understanding and proposed solutions to development issues.

Offering(s): First offering - Fall 2022
Prerequisite(s): 14.00 credits including IDEV*2400, IDEV*3000, IDEV*3100, IDEV*3300
Restriction(s): Registration in B.A.IDS major. Minimum of 68% overall cumulative average. Instructor consent required.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*4100 Thesis in International Development Studies I S,F,W (3-0) [0.50]

Supervised by a faculty member, students will undertake a literature review and plan, develop and write a research proposal. The topic of thesis will be selected in consultation with the supervisory faculty member prior to registration for the course. Students are advised to contact the IDS Academic Advisor for further information.

Offering(s): First offering - Fall 2022
Prerequisite(s): 14.00 credits including IDEV*3000, IDEV*3100
Restriction(s): Registration in B.A.IDS with a minimum average of 80% in all IDS major course attempts. Instructor consent required.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*4150 Thesis in International Development Studies II S,F,W (3-0) [0.50]

Students conduct, write and present an undergraduate thesis under the supervision of a faculty member.

Offering(s): First offering - Winter 2023
Prerequisite(s): IDEV*4100
Restriction(s): Restricted to students in BAH.IDS. Instructor consent required.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*4190 Regional Context S,F,W (1.5-0) [0.25]

In this course students will learn about a region that they intend to study further in an advanced work/study project (IDEV*4200) or in a structured semester abroad. It may be offered as a reading course or as a seminar.

Prerequisite(s): 10.00 credits including IDEV*2010 or IDEV*2500
Restriction(s): Instructor consent required. Written approval of the faculty advisor for International Development.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*4200 Advanced Work/Study in International Development S,F,W (3-0) [0.75]

Individual work/study option at an advanced level. See IDEV*3200 for course description.

Prerequisite(s): IDEV*4190
Restriction(s): Instructor consent required. Written approval of the faculty advisor for International Development.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*4500 International Development Seminar F,W (3-0) [1.00]

This course brings together students in international development in their final year of study to examine key debates and to integrate knowledge from different areas of emphasis in the specialization. Students draw from a variety of disciplinary and inter-disciplinary perspectives in lectures, text-based seminars and in reaction to guest speakers. In addition, students develop and present research projects which focus theoretical insight on practical concerns.

Prerequisite(s): 15.00 credits
Restriction(s): Registration in B.A International Development major. Minimum of 68% overall cumulative average.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*4600 Advocating and Effecting Change in Development Policy and Practice S,F,W (3-0) [0.50]

This course aims to equip students with the knowledge and understanding needed to advocate for, and bring about, change in policy and practice that impact inclusive and sustainable development within government, civil society organizations and the private sector. The course examines the actions and processes through which changes in policy and practice take place, and the barriers that need to be overcome in order to effect such changes. These might include formal legal, political and administrative engagement, use of social media, protest, civil disobedience, etc. The course predominantly involves the in-depth analysis of successes and failures of advocacy and activism efforts at bringing about changes that have positive development impacts.

Offering(s): First offering - Fall 2022
Prerequisite(s): 14.00 credits including IDEV*2400, IDEV*3000, IDEV*3100, IDEV*3300
Department(s): Dean's Office, College of Social and Applied Human Sciences
### Italian Studies

*School of Languages and Literatures*

*Note: Literary texts are, at all levels, studied in the original language. Students registering in these courses will be expected to have the appropriate knowledge.*

Management

Department of Management
Department of Marketing and Consumer Studies
School of Hospitality, Food, and Tourism Management

MGMT*1000 Introduction to Business F (4-0) [1.00]
This course is intended for B.Comm. students in semester one. It provides students with an understanding of the evolution of forms of business organization and their role in social and economic development. The main focus is on current economic, social and environmental issues that impact business organizations and which, in turn, are impacted by business decisions. Ethical considerations and the concept of sustainability are essential components. Students develop oral and written communication skills in small seminar groups.
Restriction(s): CME*1000, MGMT*2150. Registration in BCOMM and fewer than 7.50 credits.
Department(s): School of Hospitality, Food and Tourism Management

MGMT*1100 Business Career Preparation F,W (1-0) [0.00]
This course is designed to provide students with knowledge and tools to enhance their career readiness skills, leading to a greater level of confidence and success when approaching the career search process. Students will be guided through a framework for career management and steps to create a personal “career toolkit”. This would include materials and resources such as a resume and cover letter, best practices for making more informed decisions about career paths, how to access to career opportunities and presenting themselves professionally to employers. The majority of the course will be delivered online via CourseLink, supplemented by two in-class activities. A pass/fail grade will be assigned upon completion of the course.
Prerequisite(s): 4.00 credits
Restriction(s): COOP*1100. Restricted to students in BCOMM with fewer than 10.00 credits. This is a Priority Access Course. Enrolment may be restricted to particular majors during certain periods.
Department(s): Dean's Office, Gordon S. Lang School of Business and Economics

MGMT*1290 Principles of Management W (3-0) [0.50]
This course provides an overview of the role of managers in the modern organization. Students will learn about the history of management theory and will examine in depth the major management functions of planning, leading, organizing, and controlling. The concepts of management ethics and sustainability are also introduced.
Offering(s): First offering - Winter 2020
Prerequisite(s): MGMT*1000
Department(s): Department of Management

MGMT*2150 Introduction to Canadian Business Management S,F,W (3-0) [0.50]
This is an introductory course in the fundamentals of business management in Canada. Students will be exposed to the basic functions of business and management. This course will also cover small business and entrepreneurship, forms of business ownership, competing in the global business environment and the economic and political realities of business in Canada today. Note: Students registered in the B.Comm program are required to select MGMT*1000 Introduction to Business.
Offering(s): Also offered through Distance Education format.
Equate(s): HTM*2150
Restriction(s): MGMT*1000
Restriction(s): Not available to students in the BCOMM program.
Department(s): School of Hospitality, Food and Tourism Management

MGMT*3020 Corporate Social Responsibility S,F,W (3-0) [0.50]
This course provides students an opportunity to examine a comprehensive range of topics and issues related to business and sustainability and aims to explore the implications of changing stakeholder expectations, and opportunities for organizational sustainable value creation. Key topics will include CSR theories and frameworks, global issues and role of business in society, socially responsible investing, green consumption, CSR and firm competitive advantage, reputation, corporate governance and ethics, regulation and social/environmental reporting.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 9.00 credits
Equate(s): BUS*3020
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Management

MGMT*3030 Managerial Communications and Team Leadership W (3-0) [0.50]
This course is designed to enhance managerial skills in interpersonal communication (both oral and written), team leadership and meeting facilitation through an intensive seminar experience. The content of the seminars are based on a review of the ‘great books’ of leadership and management. Students will collectively select, review, discuss, and debate the texts, and upon successful completion of the course will have further developed their skills in critical enquiry, consultation, evaluation, presentation, facilitation and leadership.
Prerequisite(s): 12.50 credits.
Restriction(s): Restricted to students in BCOMM Minimum of 70% cumulative average. Instructor consent required.
Department(s): School of Hospitality, Food and Tourism Management

MGMT*3140 Business Analytics S,F (3-0) [0.50]
Business analytics is an evidence-based approach to management decision-making using analytic tools to transform data into insight. This course will combine student’s existing math / statistics skills and business knowledge with modern analytic tools (spreadsheets and other applications) in order to develop a toolkit of analysis tools for solving a variety of business problems. Topics include data management and transformation, visualization, optimization, simulation, and regression. Descriptive, predictive, and prescriptive analytics will be covered.
Prerequisite(s): 9.00 credits including (1 of MATH*1030, MATH*1080, MATH*1200)
(1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060)
Restriction(s): Restricted to students in BCOMM. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Management

MGMT*3200 Negotiation and Conflict Management F (3-0) [0.50]
This course teaches students about negotiation theory in addition to practical strategies and styles that can improve their conflict management and negotiation skills. The course covers conflict management from a variety of perspectives, including as first party and as third party skills.
Offering(s): First offering - Fall 2020
Prerequisite(s): HROB*2290, MGMT*1200
Department(s): Department of Management

MGMT*3300 Project Management F,W (3-0) [0.50]
This course provides students with an understanding of the concepts, principles, and practices for project management with special focus on planning, controlling, and managing projects to success. The course also emphasizes the techniques most frequently used in the context of both internal and external organizational roles of a project manager.
Prerequisite(s): MGMT*1200
Department(s): Department of Management

MGMT*3320 Financial Management S,F,W (3-0) [0.50]
The viewpoint taken in the course is that of the senior financial officer of a business firm. The focus is on the management of cash, accounts receivable, inventory and short and intermediate term liabilities. Emphasis is placed on the analysis and forecasting of financial statements, and financial modeling for planning and controlling the growth of the business enterprise.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of ACCT*2230, BUS*2230, Hafa*3070, HTM*3070
Equate(s): BUS*3320
Restriction(s): Registration in BCOMM or BA.EURS area of emphasis in European Business Studies.
Department(s): Department of Management

MGMT*3400 Current Topics in Management S,F,W (3-0) [0.50]
This course provides a lecture, discussion or seminar program on a selected topic or current issue in management. The specific topic of the course will be identified on an ad hoc basis as contemporary issues and topics in management arise.
Prerequisite(s): 9.00 credits including (MGMT*1000 or MGMT*2150)
Restriction(s): BUS*4250, HTM*4200. Restricted to students in BCOMM and BA.EURS_EBS. This is a Priority Access Course. See department for more information.
Department(s): Department of Management
MGMT*4090 Strategic Management F,W (3-0) [0.50]

Strategic management is a synthesis of the principles of business management with emphasis upon the formation of business decisions and policies. The purpose of this course is to enable the student to draw on analytical tools and factual knowledge from other courses in analyzing comprehensive business problems and establishing viable plans and methods to implement the developed plans of action.

Prerequisite(s): (1 of ECON*2560, ECON*3460, ECON*3560), MGMT*3320, (1 of FARE*3310, HTM*3120, REAL*3890)

Restriction(s): BUS*4250, HTM*4200. Restricted to students in BCOMM and BAH.EURS_EBS. This is a Priority Access Course. See department for more information.

Department(s): School of Hospitality, Food and Tourism Management

MGMT*4020 Interdisciplinary Food Product Development I F (3-3) [0.50]

This is an interdisciplinary course that involves management, food science and human health and nutrition majors. This course requires interdisciplinary teams of students to develop new food products, services and business ventures for the agricultural and food industries. Processes include analyzing, planning, coordinating and implementing information required for the conception, promotion and distribution of new food products and marketing ideas designed to create and maintain beneficial exchanges between food and agricultural industries while meeting the expectations and demands of consumers and the economy.

Prerequisite(s): 14.00 credits, minimum 70% cumulative average

Restriction(s): FOOD*4260. Students in BCOMM, BSC:FOOD and BSC:NANS majors. Instructor consent required.

Department(s): Department of Marketing and Consumer Studies

MGMT*4030 Interdisciplinary Food Product Development II W (3-3) [0.50]

This is an interdisciplinary food product development course that involves management, food science and human health and nutrition majors. This course requires interdisciplinary teams of students to develop new food products, services and business ventures for the agricultural and food industries. Processes include analyzing, planning, coordinating and implementing information required for the conception, promotion and distribution of new food products and marketing ideas designed to create and maintain beneficial exchanges between food and agricultural industries while meeting the expectations and demands of consumers and the economy.

Prerequisite(s): MGMT*4020, minimum 70% cumulative average

Restriction(s): FOOD*4270. Students in BCOMM, BSC:FOOD and BSC:NANS majors. Instructor consent required.

Department(s): Department of Marketing and Consumer Studies

MGMT*4040 Advanced Topics in Management W (3-0) [0.50]

This advanced topics course provides a lecture-discussion or seminar program on a selected topic or issue in management. The specific topics covered in this course may change on an annual basis. The course topics will be announced prior to the course selection process.

Offering(s): First offering - Winter 2021

Prerequisite(s): 12.00 credits including MGMT*1200

Department(s): Department of Management

MGMT*4050 Business Consulting F,W (3-0) [0.50]

Offered through the Centre for Business and Student Enterprise (CBASe), this project-based course is designed to provide students with an opportunity to engage with community organizations by working as consultants in interdisciplinary teams, and to investigate and propose sustainable solutions to live cases put forth by real world clients. Project requirements will vary based on the needs of the assigned client.

Prerequisite(s): (1 of MCS*1000, MGMT*1000, MGMT*2150), 10.00 credits, minimum 70% cumulative average

Restriction(s): Instructor consent required.

Department(s): Department of Marketing and Consumer Studies

MGMT*4060 Business Consulting F,W (3-0) [0.50]

Offered through the Centre for Business and Student Enterprise (CBASe), this project-based course is designed to provide students with an opportunity to engage with community organizations by working as consultants in interdisciplinary teams, and to investigate and propose sustainable solutions to live cases put forth by real world clients. Project requirements will vary based on the needs of the assigned client.

Prerequisite(s): (1 of MCS*1000, MGMT*1000, MGMT*2150), 10.00 credits, minimum 70% cumulative average

Restriction(s): Instructor consent required.

Department(s): Department of Marketing and Consumer Studies

MGMT*4100 Management Decision Making F (3-0) [0.50]

This course is designed to improve decision-making skills and will examine the process of decision-making, taking into account complexity, risk and outcomes, and the impact of decisions on people, the community and the organization. The course also considers the role of rationality/non-rationality in decision-making and examine how uncertainty and ambiguity may influence managerial perceptions of choices and risks.

Offering(s): First offering - Fall 2020

Prerequisite(s): MGMT*3140, MGMT*3200

Department(s): Department of Management

MGMT*4200 Management Capstone W (3-0) [0.50]

This course examines management from a strategic perspective, focusing on how organizations can achieve competitive advantage through leveraging their resources. Students will be challenged to integrate their knowledge of management theories to develop strategic solutions to organizational issues.

Offering(s): First offering - Winter 2021

Prerequisite(s): HROB*3100, MGMT*3200

Equate(s): HROB*4000

Department(s): Department of Management

MGMT*4260 International Business W (3-3) [0.50]

This course covers international business and deals with the strategic and functional areas of management in the international business environment. This course examines the factors that shape strategic management outside a firm's domestic markets. It uses a mix of readings, lectures, case studies, individual and group projects.

Prerequisite(s): 14.50 credits

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): Department of Management

MGMT*4350 Business Case Competition Preparation F (3-0) [0.50]

This course will focus on the critical analysis of current business practices through the use of case studies to develop integrative decision-making, negotiation and presentation skills. Strategy formulation and implementation will be investigated in the context of complex business case competitions.

Prerequisite(s): 9.50 credits.

Restriction(s): Restricted to students in BCOMM Minimum of 70% cumulative average. Instructor consent required.

Department(s): Department of Management

MGMT*4991 Management Thesis S,F,W (3-0) [1.00]

This two semester course represents the production of an undergraduate thesis in any management discipline. The thesis is an independent research project under the direct supervision of an individual faculty member. The research topic will be chosen in consultation with a faculty advisor, and will normally reflect the student’s major in the Bachelor of Commerce program. A departmental registration form must be obtained from the course coordinator and signed by the faculty advisor before students can be admitted into the course. This two-semester course is offered over any two consecutive semesters, with MGMT*4991 in the first semester and MGMT*4992 in the second semester. A grade will not be assigned in MGMT*4991 until MGMT*4992 has been completed.

Prerequisite(s): 14.00 credits

Restriction(s): Restricted to students in BCOMM Minimum of 70% cumulative average. Instructor consent required.

Department(s): Dean's Office, Gordon S. Lang School of Business and Economics, Department of Economics and Finance, Department of Food, Agriculture and Resource Economics, Department of Management, Department of Marketing and Consumer Studies, School of Hospitality, Food and Tourism Management
MGMT*4991/2 Management Thesis S,F,W (3-0) [1.00]

This two semester course represents the production of an undergraduate thesis in any management discipline. The thesis is an independent research project under the direct supervision of an individual faculty member. The research topic will be chosen in consultation with a faculty advisor, and will normally reflect the student’s major in the Bachelor of Commerce program. A departmental registration form must be obtained from the course coordinator and signed by the faculty advisor before students can be admitted into the course. This two-semester course is offered over any two consecutive semesters, with MGMT*4991 in the first semester and MGMT*4992 in the second semester. A grade will not be assigned in MGMT*4991 until MGMT*4992 has been completed.

Prerequisite(s): 14.00 credits
Restriction(s): Restricted to students in BCOMM Minimum of 70% cumulative average. Instructor consent required.
Department(s): Dean's Office, Gordon S. Lang School of Business and Economics, Department of Economics and Finance, Department of Food, Agricultural and Resource Economics, Department of Management, Department of Marketing and Consumer Studies, School of Hospitality, Food and Tourism Management

MGMT*4992 Management Thesis S,F,W (3-0) [1.00]

This two semester course represents the production of an undergraduate thesis in any management discipline. The thesis is an independent research project under the direct supervision of an individual faculty member. The research topic will be chosen in consultation with a faculty advisor, and will normally reflect the student’s major in the Bachelor of Commerce program. A departmental registration form must be obtained from the course coordinator and signed by the faculty advisor before students can be admitted into the course. This two-semester course is offered over any two consecutive semesters, with MGMT*4991 in the first semester and MGMT*4992 in the second semester. A grade will not be assigned in MGMT*4991 until MGMT*4992 has been completed.

Prerequisite(s): 14.00 credits, MGMT*4991
Restriction(s): Restricted to students in BCOMM Minimum of 70% cumulative average. Instructor consent required.
Department(s): Dean's Office, Gordon S. Lang School of Business and Economics, Department of Economics and Finance, Department of Food, Agricultural and Resource Economics, Department of Management, Department of Marketing and Consumer Studies, School of Hospitality, Food and Tourism Management
XII. Course Descriptions, Marketing and Consumer Studies

Marketing and Consumer Studies

Department of Marketing and Consumer Studies
For courses without semester designations, please check with the department. Advance schedules are available in the department.

MCS*1000 Introductory Marketing S,F,W (3-0) [0.50]
This course covers the marketing of both products and services. Students will be introduced to the theoretical concepts through lectures and class discussions and have the opportunity to apply these concepts through case analysis and discussion.
Offering(s): Also offered through Distance Education format.
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*2000 Business Communication in a Changing World F (3-0) [0.50]
This course provides an overview of business communication by reviewing and discussing key issues (such as ethics and globalization), and the components of a business plan. Weekly lectures are supplemented by discussions of business cases and hand-in assignments designed to introduce students to basic business communication skills.
Prerequisite(s): 4.00 credits including MCS*1000
Restriction(s): Registration in BCOMM.MKMN or BCOMM.MKMNC
Department(s): Department of Marketing and Consumer Studies

MCS*2000 Business Communication in a Changing World F (3-0) [0.50]
In this course students are introduced to the concepts and principles of information acquisition, manipulation and management as relevant to organizational decision-making. Experience in the evaluation of information technology applications used in organizations is provided.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4.00 credits
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*2020 Information Management F,W (3-0) [0.50]
This introductory course is designed to help students develop and achieve their personal goals in financial management.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Equate(s): COST*2100
Department(s): Department of Marketing and Consumer Studies

MCS*2600 Fundamentals of Consumer Behaviour F,W (3-0) [0.50]
Organizations survive and achieve their goals by satisfying the needs and wants of consumers as well as or better than their competitors. This course examines consumer behaviours, the economic, social, cultural and psychological factors related to consumer behaviours, the evolution and change in behaviours and relationships, and the ways in which consumers respond to stimuli employed in the marketing of products, services and ideas.
Prerequisite(s): MCS*1000, (1 of BUS*2090, HROB*2090, HROB*2100, PSYC*1000, PSYC*1200). Although not required, it is recommended that students take PSYC*1000 prior to MCS*2600.
Restriction(s): Registration in BCOMM programs, BCOMM.MKTG minor, or BAH.EURS. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3000 Advanced Marketing F (3-0) [0.50]
This course provides students with an opportunity to extend their knowledge of the marketing principles and strategies learned in MCS*1000 to develop a marketing plan and to explore sales as a career.
Prerequisite(s): 10.00 credits including MCS*1000
Restriction(s): Not available to BCOMM students registered in BCOMM.MKMN, BCOMM.MKMNC, AGBU, AGBU.C majors.
Department(s): Department of Marketing and Consumer Studies

MCS*3010 Quality Management W (3-0) [0.50]
This course covers general concepts and expectations of quality assurance from consumer, government, managerial and technological points of view and examines the relationship of national and international groups concerned with quality assurance. Seminars apply concepts to selected products and services.
Prerequisite(s): 10.00 credits including (1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060, STAT*2080)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3020 Research Methods F,W (3-0) [0.50]
This course examines the concepts, principles and practices for consumer, market and product development research processes. Topics include research problem definition, research objectives, research design, measurement, sampling methods, execution, research management, analysis and interpretation, and report writing.
Prerequisite(s): 1 of ECON*2740, PSYC*1010, STAT*2060
Restriction(s): Registration in BCOMM.MKMN, BCOMM.MKMNC, BCOMM.REH, BCOMM.REH.C, or the BCOMM.MKMN, BCOMM.MKTG minor. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3040 Business and Consumer Law S,F,W (3-0) [0.50]
This course introduces students to statutory and common law concerning business and consumer transactions. An overview of the laws of contracts and torts forms the basis of business and product/service relationships. Discussion topics include sale of goods and consumer protection legislation; debtor-creditor relations; competition law; intellectual property rights and manufacturers' product liability.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4.00 credits
Restriction(s): Registration in BCOMM program, BAH.BADM minor, or BA:EURS area of emphasis in European Business Studies. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3500 Marketing Analytics F,W (3-0) [0.50]
This course teaches students decision making theory and the methods of analysis that support decision making in the marketing discipline. Topics include customer, competitor and market analysis and methods such as forecasting and decision modeling.
Prerequisite(s): 10.00 credits including ECON*1050, (MATH*1000 or MATH*1030), MCS*2600, (1 of ECON*2740, PSYC*1010, STAT*2060)
Equate(s): MCS*3610
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3600 Consumer Information Processes F,W (3-0) [0.50]
This course provides an in-depth treatment of information processing research and theories as they relate to consumer judgement and choice. Components of theory addressed include: attention and perception, motivation, processing capacity, encoding and memory storage, retrieval and decision processes. Applications to marketplace policy and strategy are discussed.
Prerequisite(s): 15.00 credits including MCS*2600, MCS*3030
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3620 Marketing Communications F,W (3-0) [0.50]
This course covers concepts of communication management as practiced by organizations in all economic sectors. Communication management principles are applied to the design and evaluation of communication programs.
Prerequisite(s): 10.00 credits including MCS*1000, MCS*2600
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*4020 Research in Consumer Studies U (3-0) [0.50]
This course provides the opportunity for an independent investigation of a pertinent topic in consumer studies. Registration requires departmental approval.
Prerequisite(s): 15.00 credits including MCS*3030
Restriction(s): Registration in BCOMM.MKMN or BCOMM.MKMNC.C. Instructor consent required.
Department(s): Department of Marketing and Consumer Studies
XII. Course Descriptions, Marketing and Consumer Studies

MCS*4040 Management in Product Development F (3-0) [0.50]
The major components of this course are new product strategy formulation, the role of technical and market research, the analysis of opportunities, management of development processes, product launches, government and regulatory controls.
Prerequisite(s): 10.00 credits including MCS*1000, MCS*2600
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*4060 Retail Management F (3-0) [0.50]
This course encompasses a comprehensive view of the retailing sector and an application of marketing concepts in both the domestic and international retail marketplace. Key topics include retail format selection, retail management strategy, target shopper analysis, site selection, and merchandise planning. Additional focus will include the buying, financial analysis, and pricing activities involved in retail operations. The course will also investigate the evolving nature of e-commerce and retail supply chain management issues and opportunities.
Prerequisite(s): 14.00 credits including MCS*3600
Restriction(s): Registration in BCOMM.MKMN, BCOMM.MKMN.C. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*4100 Entrepreneurship F (3-0) [0.50]
This course examines the role and effect of small business in Canada, and, in doing so, helps marketing students appreciate the challenges involved in having full responsibility for a business and/or for creatively moving a business forward. The course focuses on the analysis of entrepreneurial skills and, through the development of the business plan, the steps involved in starting a new venture or increasing the size of a business.
Prerequisite(s): 15.00 credits including MCS*3500
Restriction(s): Registration in BCOMM.MKMN or BCOMM.MKMN.C.
Department(s): Department of Marketing and Consumer Studies

MCS*4300 Marketing and Society W (3-0) [0.50]
This course focuses on how the dissemination of marketing knowledge can influence society through the decisions made by public policy makers, corporate decision makers and non-profit marketers. It also covers how the marketing decisions made and actions taken by corporate, non-profit and public sector decision makers can affect society. As the theme of 'reciprocal influence' is developed, both direct and indirect influences of marketing knowledge and marketing decisions are pursued.
Prerequisite(s): 15.00 credits including MCS*2600
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*4370 Marketing Strategy F,W (3-0) [0.50]
This course focuses on the decision-making role of the marketing manager who is responsible for formulating the strategic marketing plan. The theory of selecting market target(s) for the firm’s products and/or services and the development of the marketing mix (product, price, promotion, distribution) with the aid of market research and computerized information systems is covered.
Prerequisite(s): 15.00 credits including MCS*3030, MCS*3500
Equate(s): AGEC*4370, FARE*4370
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*4400 Pricing Management F (3-0) [0.50]
The objective of this course is to provide a useful conceptual framework as well as analytical techniques that can be applied in managing pricing functions. Topics to be covered include pricing strategies, tactical issues related to pricing, pricing methods, treatment of costs for pricing, consideration of competition, legal limitations and role of price in customer buying decisions for both consumer and industrial goods and services.
Prerequisite(s): 10.00 credits including (BCON*3740 or MCS*3030)
Restriction(s): MCS*3100. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*4600 International Marketing F,W (3-0) [0.50]
This course examines the study of marketing in a global context with specific emphasis on the strategic implications of marketing in different country cultures. Included are the global marketing environment and the competitive challenges and opportunities confronting today’s international marketers, the cultural environment of global marketing, the assessment of global market opportunities and the development of global marketing strategies.
Prerequisite(s): 10.00 credits including MCS*3030
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*4910 Topics in Consumer Studies U (3-0) [0.50]
This course provides a lecture-discussion or seminar on a selected topic in consumer studies to be conducted by faculty with expertise in the area. Students should check with the department to determine what topic, if any, will be offered during a semester. Alternatively, they can ask a faculty member in MCS to supervise them as they study a topic or do a project of interest.
Prerequisite(s): 15.00 credits including MCS*2600
Restriction(s): Registration in the BCOMM.MKMN or BCOMM.REH major. Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

MCS*4920 Topics in Consumer Studies U (3-0) [0.50]
This course provides a lecture-discussion or seminar on a selected topic in consumer studies to be conducted by faculty with expertise in the area. Students should check with the department to determine what topic, if any, will be offered during a semester. Alternatively, they can ask a faculty member in MCS to supervise them as they study a topic or do a project of interest.
Prerequisite(s): 15.00 credits including MCS*2600
Restriction(s): Registration in the BCOMM.MKMN or BCOMM.REH major. Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

MCS*4950 Consumer Studies Practicum S,F,W (3-0) [0.50]
The practicum provides students with supervised experience in developing marketing plans or working on consumer studies projects.
Prerequisite(s): 15.00 credits including MCS*3030, MCS*3500, MCS*3620
Restriction(s): Registration in BCOMM.MKMN or BCOMM.MKMN.C. Instructor consent required.
Department(s): Department of Marketing and Consumer Studies
II. Course Descriptions, Mathematics

Mathematics

Department of Mathematics and Statistics

Suggested initial course sequence:

1. For students with 4U or OAC Calculus and expecting to pursue further studies in mathematics or the physical sciences: MATH*1200, MATH*1210.
2. For students interested in applications to the biological sciences: MATH*1080, MATH*2080.
3. For students not expecting to pursue further studies in mathematics: MATH*1030, 1 of 4U Advanced Functions, 4U Advanced Functions and Calculus.

MATH*1030 Business Mathematics F,W (3-0) [0.50]

Primarily intended for business and economics students, this course is designed to introduce and reinforce the essential mathematical skills needed to understand, analyze, and solve mathematical problems related to business and economics. Topics covered include basic algebra; functions, including a review of exponential and logarithmic functions; sequences and series with financial applications; limits; continuity; and differential calculus including derivatives, higher order derivatives, and curve sketching.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 4U Advanced Functions

Restriction(s): MATH*1080, MATH*1200 Not available to students registered in the BSC program.

Department(s): Department of Mathematics and Statistics

MATH*1080 Elements of Calculus I F,W (3-1) [0.50]

This course provides an introduction to the calculus of one variable with emphasis on mathematical modelling in the biological sciences. The topics covered include elementary functions, sequences and series, difference equations, differential calculus and integral calculus.

Prerequisite(s): 1 of 4U Advanced Functions, 4U Advanced Functions and Calculus or equivalent

Restriction(s): IPS*1500, MATH*1200

Department(s): Department of Mathematics and Statistics

MATH*1090 Elements of Calculus II W (3-1) [0.50]

This course will expand on integration techniques, and introduce students to difference and differential equations, vectors, vector functions, and elements of calculus of two or more variables such as partial differentiation and multiple integration. The course will emphasize content relevant to analyzing biological systems, and methods will be illustrated by application to biological systems.

Prerequisite(s): 1 of IPS*1500, MATH*1080, MATH*1200

Restriction(s): IPS*1510, MATH*1210, MATH*2080

Department(s): Department of Mathematics and Statistics

MATH*1160 Linear Algebra I F,W (3-0) [0.50]

This course provides an introduction to linear algebra in Euclidean space. Topics covered include: N-dimensional vectors, dot product, matrices and matrix operations, systems of linear equations and Gaussian elimination, linear independence, subspaces, basis and dimension, matrix inverse, matrix rank and determinant, eigenvalues, eigenvectors and diagonalization, orthogonality and projections, linear transformations. Some fundamental proofs and applications of these topics will be included.

Prerequisite(s): 4U Calculus and Vectors or 4U Advanced Functions

Restriction(s): ENGG*1500, MATH*2150, MATH*2160

Department(s): Department of Mathematics and Statistics

MATH*1200 Calculus I F (3-1) [0.50]

This is a theoretical course intended primarily for students who expect to pursue further studies in mathematics and its applications. Topics include inequalities and absolute value; compound angle formulas for trigonometric functions; limits and continuity using rigorous definitions; the derivative and derivative formulas (including derivatives of trigonometric, exponential and logarithmic functions); Fermat's theorem; Rolle's theorem; the mean-value theorem; applications of the derivative; Riemann sums; the definite integral; the fundamental theorem of calculus; applications of the definite integral; the mean value theorem for integrals.

Prerequisite(s): 1 of 4U Calculus and Vectors, 4U Advanced Functions and Calculus or Grade 12 Calculus

Restriction(s): IPS*1500, MATH*1080

Department(s): Department of Mathematics and Statistics

MATH*1210 Calculus II W (3-1) [0.50]

This course is a continuation of MATH*1200. It is a theoretical course intended primarily for students who need or expect to pursue further studies in mathematics, physics, chemistry, engineering and computer science. Topics include inverse functions, inverse trigonometric functions, hyperbolic functions, indeterminate forms and l'Hospital's rule; techniques of integration, parametric equations, polar coordinates, Taylor and Maclaurin series; functions of two or more variables, partial derivatives, and if time permits, an introduction to multiple integration.

Prerequisite(s): MATH*1080 or MATH*1200

Restriction(s): IPS*1510, MATH*1090, MATH*2080

Department(s): Department of Mathematics and Statistics

MATH*2000 Proofs, Sets, and Numbers F (3-1) [0.50]

This course exposes the student to formal mathematical proof, and introduces the theory of sets and number systems. Topics include relations and functions, number systems including formal properties of the natural numbers, integers, and the real and complex numbers. Equivalence relations and partial and total orders are introduced. The geometry and topology of the real number line and Cartesian plane are introduced. Techniques of formal proof are introduced including well-ordering, mathematical induction, proof by contradiction, and proof by construction. These techniques will be applied to fundamental theorems from linear algebra.

Prerequisite(s): 1 of IPS*1500, MATH*1080, MATH*1160, MATH*1200

Department(s): Department of Mathematics and Statistics

MATH*2130 Numerical Methods W (3-1) [0.50]

This course provides a theoretical and practical introduction to numerical methods for approximating the solution(s) of linear and nonlinear problems in the applied sciences. The topics covered include: solution of a single nonlinear equation; polynomial interpolation; numerical differentiation and integration; solution of initial value and boundary value problems; and the solution of systems of linear and nonlinear algebraic equations.

Prerequisite(s): (CIS*1300 or CIS*1500), (1 of IPS*1510, MATH*1090, MATH*1210, MATH*2080)

Department(s): Department of Mathematics and Statistics

MATH*2200 Advanced Calculus I F (3-0) [0.50]

The topics covered in this course include infinite sequences and series, power series, tests for convergence, Taylor's theorem and Taylor series for functions of one variable, planes and quadratic surfaces, limits, and continuity, differentiability of functions of two or more variables, partial differentiation, directional derivatives and gradients, tangent planes, linear approximation, Taylor's theorem for functions of two variables, critical points, extreme value problems, implicit function theorem, Jacobians, multiple integrals, and change of variables.

Prerequisite(s): 1 of IPS*1510, MATH*1090, MATH*1210, MATH*2080

Department(s): Department of Mathematics and Statistics

MATH*2210 Advanced Calculus II W (3-0) [0.50]

This course continues the study of multiple integrals, introducing spherical and cylindrical polar coordinates. The course also covers vector and scalar fields, including the gradient, divergence, curl and directional derivative, and their physical interpretation, as well as line integrals and the theorems of Green and Stokes.

Prerequisite(s): MATH*2200

Department(s): Department of Mathematics and Statistics

MATH*2270 Applied Differential Equations F (3-1) [0.50]

This course covers the solution of differential equations that arise from problems in engineering and science. Topics include linear equations of first and higher order, systems of linear equations, Laplace transforms, series solutions of second-order equations, and an introduction to partial differential equations.

Prerequisite(s): (1 of ENGG*1500, MATH*1160, MATH*2150, MATH*2160), (1 of IPS*1510, MATH*1090, MATH*1210, MATH*2080)

Restriction(s): MATH*2170

Department(s): Department of Mathematics and Statistics

MATH*3100 Differential Equations II W (3-1) [0.50]

This course continues the study of differential equations. Power series solutions around regular singular points including Bessel equations are presented. First order linear systems and their general solution by matrix methods are thoroughly covered. Nonlinear systems are introduced along with the concepts of linearization, stability of equilibria, phase plane analysis, Lyapunov's method, periodic solutions and limit cycles. Two-point boundary value problems are discussed and an introduction to linear partial differential equations and their solution by separation of variables and Fourier series is given.

Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), (MATH*2170 or MATH*2270)

Department(s): Department of Mathematics and Statistics
MATH*3130 Abstract Algebra F (3-0) [0.50]
This course is an introduction to abstract algebra, covering both group theory and ring theory. Specific topics covered include an introduction to group theory, permutations, symmetric and dihedral groups, subgroups, normal subgroups and factor groups. Group theory continues through the fundamental homomorphism theorem. Ring theory material covered includes an introduction to ring theory, subrings, ideals, quotient rings, polynomial rings, and the fundamental ring homomorphism theorem.
Offering(s): Offered in even-numbered years.
Prerequisite(s): MATH*2000, (1 of MATH*1160, MATH*2150, MATH*2160)
Department(s): Department of Mathematics and Statistics

MATH*3160 Linear Algebra II W (3-0) [0.50]
The topics in this course include complex vector spaces, direct sum decompositions of vector spaces, the Cayley-Hamilton theorem, the spectral theorem for normal operators and the Jordan canonical form.
Prerequisite(s): (MATH*1160 or MATH*2160), 1.00 credits in MATH or STAT at the 2000 level or above
Department(s): Department of Mathematics and Statistics

MATH*3200 Real Analysis F (3-0) [0.50]
This course provides a basic foundation for real analysis. The rigorous treatment of the subject in terms of theory and examples gives students the flavour of mathematical reasoning and intuition for other advanced topics in mathematics. Topics covered include the real number line and the supremum property; metric spaces; continuity and uniform continuity; completeness and compactness; the Banach fixed-point theorem and its applications to ODEs; uniform convergence and the rigorous treatment of the Riemann integral.
Prerequisite(s): MATH*2000, MATH*2210, (MATH*1160 or MATH*2160)
Department(s): Department of Mathematics and Statistics

MATH*3260 Complex Analysis W (3-0) [0.50]
This course extends calculus to cover functions of a complex variable; it introduces complex variable techniques which are very useful for mathematics, the physical sciences and engineering. Topics include complex differentiation, planar mappings, analytic and harmonic functions, contour integration, Taylor and Laurent series, the residue calculus and its application to the computation of trigonometric and improper integrals, conformal mapping and the Dirichlet problem.
Prerequisite(s): MATH*2200
Department(s): Department of Mathematics and Statistics

MATH*3510 Biomathematics W (3-0) [0.50]
This is a course in mathematical modelling which has applications to engineering, economics, business and logistics. Topics covered include linear programming and the simplex method, network models and the shortest path, maximum flow and minimal spanning tree problems as well as a selection of the following: non-linear programming, constrained optimization, deterministic and probabilistic dynamic programming, game theory and simulation.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), 0.50 credits in statistics
Co-requisite(s): MATH*2200
Department(s): Department of Mathematics and Statistics

MATH*4060 Topics in Mathematics II W (3-0) [0.50]
In this course students will discuss selected topics at an advanced level as in MATH*4050, but with different choice of topic.
Offering(s): Offered in even-numbered years.
Prerequisite(s): MATH*3200
Department(s): Department of Mathematics and Statistics

MATH*4150 Topics in Mathematics III F,W (3-0) [0.50]
In this course students will discuss selected topics at an advanced level as in MATH*4050, but with different choice of topics.
Prerequisite(s): MATH*3200
Department(s): Department of Mathematics and Statistics

MATH*4200 Advanced Analysis W (3-0) [0.50]
This course focuses on first and second-order partial differential equations, with examples and applications from selected fields such as physics, engineering and biology. Topics may include the wave equation, the heat equation, Laplace's equation, linearity and separation of variables, solution by Fourier series, Bessel, Legendre and Green's functions, an introduction to the method of characteristics and Fourier transforms. The classification of linear second-order partial differential equations is discussed.
Offering(s): Offered in even-numbered years.
Prerequisite(s): MATH*3200
Department(s): Department of Mathematics and Statistics

MATH*4240 Advanced Topics in Modeling and Optimization F (3-0) [0.50]
This course is a study of advanced topics in the areas of optimization and modeling. Topics may include continuous and discrete models together with techniques for their analysis and design, and optimization topics such as game theory, networks, nonlinear problems, Markov chains, queuing theory, agent-based models, computational intelligence based techniques and computational optimization techniques.
Prerequisite(s): 0.50 credits in Mathematics at the 3000 level.
Department(s): Department of Mathematics and Statistics

MATH*4270 Partial Differential Equations F (3-0) [0.50]
This course covers the fundamentals of applying mathematical modelling techniques to understanding and predicting the dynamics of biological systems. Students will learn the development, analysis, and interpretation of mathematical models based on discrete-time and continuous-time models. Applications may include examples from population biology, ecology, infectious diseases, microbiology, and genetics.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), (MATH*2170 or MATH*2270)
Department(s): Department of Mathematics and Statistics

MATH*4310 Combinatorics and Graph Theory W (3-0) [0.50]
This course is an introduction to combinatorics with a focus that includes graph theory. Specific topics covered are enumerative combinatorics up to inclusion-exclusion, the theory of simple graphs, Latin squares and orthogonal Latin squares, and introductory coding theory. Instructors may continue to one or more of the Polya theory of counting, graph coloring and embedding, combinatorial design theory, Ramsey theory, or advanced topics in enumerative combinatorics.
Offering(s): First offering - Winter 2021 Offered in odd-numbered years.
Prerequisite(s): 10.00 credits including MATH*2000
Department(s): Department of Mathematics and Statistics

MATH*4440 Case Studies in Mathematics and Statistics W (3-0) [0.50]
This course introduces students to the capabilities of technology in solving complex mathematical and statistical problems. The course will focus on case studies drawn from engineering, computer science, biology, life and physical sciences, medicine, and/or economics.
Prerequisite(s): At least 3.0 mathematics and/or statistics credits at the 3000 level or above.
Restoration(s): Restricted to students in the Mathematical Science major.
Department(s): Department of Mathematics and Statistics

MATH*4600 Advanced Research Project in Mathematics F,W (0-6) [1.00]
Each student in this course will undertake an individual research project in some area of mathematics, under the supervision of a faculty member. A written report and a public presentation of the project will be required.
Restriction(s): Approval of a supervisor and the course coordinator.
Department(s): Department of Mathematics and Statistics
Microbiology
School of Environmental Sciences
Department of Molecular and Cellular Biology
Department of Pathobiology

MICR*2420 Introduction to Microbiology S,F,W (3-3) [0.50]
This course will introduce students to the diversity of microorganisms, including, bacteria, viruses, and fungi, and the impact of microbes on everyday life. The interactions of microorganisms with the biotic and abiotic worlds will be discussed. Topics will include the roles of microorganisms in host-pathogen interactions in disease, the beneficial aspects of microorganisms in bioremediation and food production, and their application in biotechnology.
Prerequisite(s): 4.00 credits including (1 of BIOL*1070, BIOL*1080, BIOL*1090, CHEM*1040)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Molecular and Cellular Biology

MICR*2430 Methods in Microbial Culture and Physiology F,W (1.5-3) [0.50]
This course uses a hands-on approach to investigate microbial growth and factors that impact growth and the interactions of microbes with biotic and abiotic environments. This course will explore the ecological diversity of microorganisms of selected environments. Students will develop a wide range of microbiology-related laboratory skills.
Prerequisite(s): MICR*2420
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Molecular and Cellular Biology

MICR*3090 Mycology F (3-3) [0.50]
This course provides an introduction to the fungal lifestyle and to classification and evolution of the major groups of fungi, including microfungi, yeasts and other eukaryotic microbes. The characteristics of fungal cell structure, genetics and metabolism will be presented, and fungal reproduction and sporulation processes discussed with reference to the life cycles of representative forms. The ecological and economic importance of fungi will be demonstrated by considering fungal ecology, symbiotic relationships, mycotoxins and pathogenic fungi and industrial applications of fungi and yeasts. Laboratory work will provide familiarity with procedures for culturing, examining and identifying fungi and yeasts.
Prerequisite(s): BOT*2100 or MICR*2430
Equate(s): BIOL*3050
Department(s): Department of Molecular and Cellular Biology

MICR*3220 Plant Microbiology F (3-0) [0.50]
In this course the interaction between plants and microorganisms will be studied. Topics include molecular plant-microbe interactions, plant defenses, bacterial ice nucleation, interaction among plant microbes, root noduleation, mycorrhizae, wood decay, and decomposition of plant litter.
Prerequisite(s): BIOL*1070, BIOL*1090
Department(s): School of Environmental Sciences

MICR*3230 Immunology F (3-0) [0.50]
This course provides an introduction to the immune response of the vertebrate host, the cells and tissues of the lymphoid system, humoral and cell-mediated immunity, the concept of immunity to diseases and current techniques in immunology.
Prerequisite(s): BIOL*1090, BIOC*2580
Department(s): Department of Molecular and Cellular Biology, Department of Pathobiology

MICR*3260 Microbial Adaptation W (3-1) [0.50]
In this course students examine the physiological responses of bacteria to their diverse and changing environments. By using information technologies to access and analyze the relevant research literature, students learn how and why researchers study this subject, and how research outcomes are evaluated.
Prerequisite(s): BIOC*3560, MBG*3080
Department(s): Department of Molecular and Cellular Biology

MICR*3330 World of Viruses F (3-0) [0.50]
Viruses infecting many organisms will be covered in the context of their global impact on disease and history, beneficial uses of viruses, and their role in advances of molecular theory. A fundamental virology background will be achieved by understanding the diversity of viruses, their replication strategies and their interactions with the host in disease. The relevance of viruses in society will be highlighted by discussion of historical accounts and contemporary news articles.
Prerequisite(s): MCB*2050
Department(s): Department of Molecular and Cellular Biology

MICR*3420 Microbial Diversity and Ecology F (3-0) [0.50]
The cycling of elements (carbon, nitrogen, sulphur) within ecosystems involves the contributions of diverse microorganisms. This course will study the diversity of predominately Bacteria and Archaea in selected ecosystems at an organismal level, investigate the metabolic and enzymatic diversity in microbes that contribute to and thrive within these environments, and examine the methodologies used to study the relationships and evolution of microorganisms within an ecosystem.
Prerequisite(s): BIOC*3560, MBG*2040, MICR*2430
Department(s): Department of Molecular and Cellular Biology

MICR*3430 Advanced Methods in Microbiology W (1-6) [0.75]
This course will use a hands-on approach to investigate concepts and develop skills needed for the isolation, identification and classification of microorganisms. Classical, molecular, and bioinformatic techniques will be used to isolate and identify bacteria and viruses from natural environments.
Prerequisite(s): MBG*3080, MICR*2430
Co-requisite(s): MBG*3350
Department(s): Department of Molecular and Cellular Biology

MICR*4010 Pathogenic Microbiology W (3-0) [0.50]
This course focuses on the interactions between microbial pathogens and host animals, including immune and inflammatory responses of the host’s defense mechanisms. The structural and physiological characteristics of a number of important microbes causing human and animal diseases are considered.
Prerequisite(s): MBG*3080, MCB*2050, MICR*3230
Department(s): Department of Molecular and Cellular Biology

MICR*4330 Molecular Virology W (2-3) [0.50]
This course will focus on molecular aspects of virus replication cycles and the diverse strategies used for replication of select RNA and DNA viruses. Virus-host interactions including tumour virology and host antiviral responses such as interferon and apoptosis will be discussed. Viral anti-host defence responses as well as recent advances in molecular virology and evolution will be also be covered.
Prerequisite(s): MICR*3330, (MICR*2430 is recommended)
Department(s): Department of Molecular and Cellular Biology

MICR*4430 Medical Virology W (3-0) [0.50]
This course is designed to present an overview of the major viruses causing important diseases in humans. The course focuses on the molecular mechanisms of viral pathogenesis, determinants of viral virulence and the host response to infections. Diagnosis of viral infections, vaccines and controls of viral infections are also discussed. The first part of the course will cover the basic principles and concepts used in the study of viral diseases, modern diagnostic methods and recent advances in the application of molecular virology to the development of recombinant vaccines and other means to combat viral diseases. The second half of the course will include material on the individual diseases and caustive viruses.
Prerequisite(s): MICR*3330
Department(s): Department of Pathobiology

MICR*4520 Microbial Cell Biology F (3-0) [0.50]
This course explores the structure-function relationships of macromolecular complexes and cellular ultrastructures involved in fundamental microbial processes. The structures of macromolecular machines will be considered from the perspective of the cellular requirements for survival in different environments, and will be discussed in the context of their integration into cell division and the bacterial cell cycle, as well as their exploitation as targets for antibiotics and other therapeutic approaches.
Prerequisite(s): BIOC*3560, MBG*3080
Department(s): Department of Molecular and Cellular Biology
MICR*4530 Immunology II W (3-0) [0.50]

This course will focus on advanced aspects of the structure and function of the vertebrate immune system in health and disease. Various topics including inflammation, hypersensitivity reactions, immune-mediated diseases such as allergy and autoimmunity, immune response to infection, vaccine development, experimental systems, immunoinformatics and antibody engineering will be discussed.

Prerequisite(s): MICR*3230

Department(s): Department of Molecular and Cellular Biology
Molecular and Cellular Biology

Department of Molecular and Cellular Biology

**MB*C2580 Molecular Biology of the Cell F,W (4-0) [0.50]**

This course will develop an understanding of the key concepts of the molecular biology of the cell, integrating principles of cell structure and function with the underlying molecular mechanisms. Discussions will focus on aspects of gene regulation, genomics, cell cycle control, protein synthesis, intracellular protein trafficking and protein degradation in eukaryotic cells. Many of these concepts will be discussed in the context of how defects in cellular processes give rise to disease.

**Prerequisite(s):** BIOC*2580, MBG*2040

**Department(s):** Department of Molecular and Cellular Biology

**MCB*3010 Dynamics of Cell Function and Signaling W (3-0) [0.50]**

This course examines the dynamic properties of cells as they relate to cell-cell and cell-substrate interactions and elaborates on the fundamentals of intracellular signal transduction during these interactions. Topics will include the function and regulation of signalling modules, the cytoskeleton, and membrane component in the context of cellular interactions with other cells and with the extracellular matrix. These concepts will be integrated to develop a deeper understanding of dynamic cellular function within different tissue environments and physiological settings.

**Prerequisite(s):** BIOC*3560, MCB*2050

**Department(s):** Department of Molecular and Cellular Biology

**MCB*4010 Advanced Cell Biology W (3-0) [0.50]**

This course examines the cellular and molecular biology of signal transduction. The major theme is an understanding of how eukaryotic cells receive, transmit and respond to environmental signals. Topics will include cellular regulation of cell cycle progression and cell death as well as the consequences of deregulated signal transduction in terms of disease, primarily cancer.

**Prerequisite(s):** MCB*3010

**Department(s):** Department of Molecular and Cellular Biology

**MCB*4050 Protein and Nucleic Acid Structure F (3-0) [0.50]**

This course explores the relationship between the functions and the three dimensional structures of DNA, RNA and proteins. Topics covered include how these structures are determined, the principles governing their folding and architecture, why some proteins don’t fold at all, and the use of these structures to guide drug discovery. Practical skills are emphasized, including the use of bioinformatics and visualisation tools to analyse sequences and structures.

**Prerequisite(s):** BIOC*3560

**Department(s):** Department of Molecular and Cellular Biology

**MCB*4500 Research Project in Molecular & Cellular Biology S,F,W (0-12) [1.00]**

This course involves independent research of a practical or theoretical nature on a specific topic in molecular and cellular biology. It is carried out under the supervision of an individual faculty member. Students should make arrangements with both a faculty advisor and the course coordinator at least one semester in advance of taking the course.

The signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from, and submitted to, the course coordinator no later than the 2nd class day of the semester in which the student is registered for the course.

**Prerequisite(s):** MCB*4500. Normally, students must have completed 6 semesters in an appropriate program in the biological sciences. Minimum 70% cumulative average in science courses during the first 6 semesters of the relevant majors.

**Restriction(s):** Students in programs offering project courses cannot enroll in MCB*4510. Grade requirements may be waived in exceptional circumstances at the discretion of faculty advisor and course coordinator. Course coordinator consent required.

**Department(s):** Department of Molecular and Cellular Biology

**MCB*4510 Research Project in Molecular & Cellular Biology S,F,W (0-12) [1.00]**

This course involves independent research of a practical or theoretical nature on a specific topic in molecular and cellular biology. **Department(s):** Department of Molecular and Cellular Biology

**MCB*4600 Topics in Molecular and Cellular Biology S,F,W (1-3) [0.50]**

This course involves independent study of a current topic in Molecular and Cellular Biology, selected from the recent research literature and involving a review and critical appraisal of the area. The course comprises independent library research, participation in weekly meetings, and written and oral presentations. Students should make arrangements with both faculty advisor and the course coordinator in a prior course selection period.

**Prerequisite(s):** MCB*4510. Grade requirements may be waived in exceptional circumstances at the discretion of faculty advisor. Normally, students must have a minimum of 3.00 credits in 3000 or 4000 level BIOC, MBG, MCB OR MCR courses.

**Restriction(s):** Students in programs offering topics courses cannot enroll in MCB*4600. Coordinator consent required.

**Department(s):** Department of Molecular and Cellular Biology
Molecular Biology and Genetics

Department of Animal Biosciences
Department of Molecular and Cellular Biology
Department of Plant Agriculture
Department of Integrative Biology

MBG*1000 Genetics and Society W (3-1) [0.50]
This course covers the basic principles of genetics in human society. The roles of genes and inheritance in the biology of humans and the organisms with which we interact. Introduction to some of the social and ethical consequences of genetic knowledge and practice. This is a science course designed primarily for students in the Arts or Social and Applied Human Sciences.
Restriction(s): Students in the BAS, BSC and BSC(ENV) program cannot take this course for credit.
Department(s): Department of Molecular and Cellular Biology

MBG*2040 Foundations in Molecular Biology and Genetics F,W (4-0) [0.50]
This course will develop an understanding of the fundamental concepts in genetics, including patterns of inheritance, allelic variation, gene interaction, linkage, gene mapping and changes in chromosome structure and number. This will be followed by in-depth discussions on gene structure, replication, transcription, translation, recombination, mutation and DNA repair, and an introduction to gene regulation.
Prerequisite(s): 4.00 credits including BIOL*1090
Department(s): Department of Molecular and Cellular Biology

MBG*2400 Fundamentals of Plant and Animal Genetics F (3-2) [0.50]
Fundamental aspects of plant and animal genetics are covered in this course including the chromosomal basis of inheritance, natural and artificial selection, domestication, epigenetics and quantitative traits. Population dynamics and the effect of selection on allele frequencies will be introduced with examples from agricultural crop and animal species and companion animal species. Genomics will be introduced with an emphasis on the development and use of molecular genetic markers in marker assisted selection.
Prerequisite(s): (BIOL*1050 or BIOL*1070), BIOL*1090
Department(s): Department of Animal Biosciences

MBG*3040 Molecular Biology of the Gene F (3-0) [0.50]
In this course, the structure, expression, control and modification of eukaryotic genes will be discussed with an emphasis on the underlying mechanisms and structure/function relationships. Many topics covered in introductory courses are included but discussed at a more advanced level. Students will have the opportunity to learn current genetic concepts and principles through lectures, as well as the application of this knowledge in the real world through primary literature reading and group research projects.
Prerequisite(s): MCB*2050
Restriction(s): MBG*4080
Department(s): Department of Molecular and Cellular Biology

MBG*3050 Human Genetics W (3-3) [0.50]
This course is designed to introduce the student to the study of biological inheritance in humans. The course includes discussion of the genetic basis of human individual differences, gene frequencies in human populations, human behavioral genetics, human cytogenetics, biochemical genetics and developmental genetics, medical genetics and other aspects of human heredity.
Prerequisite(s): MCB*2050
Department(s): Department of Molecular and Cellular Biology

MBG*3060 Quantitative Genetics W (3-0) [0.50]
This course examines the nature of Mendelian inheritance when extended to quantitative traits that are jointly influenced by the environment and the simultaneous segregation of many genes. Prediction of response to natural and artificial selection in populations will also be studied.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): MBG*2400, 0.50 credits in statistics
Department(s): Department of Animal Biosciences

MBG*3080 Bacterial Genetics F (3-0) [0.50]
This course focuses on the genetics of prokaryotic microorganisms and their viruses. Some major topics covered are: regulation of gene expression, analysis of bacterial and phage genomes, plasmids, transposable elements, and mutation studies.
Prerequisite(s): MBG*2040, MICR*2420
Department(s): Department of Molecular and Cellular Biology

MBG*3100 Plant Genetics W (3-2) [0.50]
This course examines reproduction in plants, genome organization, organelle and polyploid genetics, and analyses of mutations, genetic variation and linkage with classical and modern approaches.
Prerequisite(s): (MBG*2040 or MBG*2400), STAT*2040
Department(s): Department of Plant Agriculture

MBG*3350 Laboratory Methods in Molecular Biology S,F,W (1.5-8) [0.75]
This course involves laboratory based instruction in the basic methodologies of Molecular Biology. Students will have the opportunity to develop technical skills and practical knowledge sufficient to perform basic procedures independently, and to diagnose and analyze experimental results obtained with these techniques.
Prerequisite(s): BIOC*2580, MCB*2050
Restriction(s): Registration in BSC.BIOC (major or minor), BIOC:C , BTOX, BTOX:C, BPCH, BPCH:C, MICR(major or minor), MICR:C , MBG (major or minor), PBTC, PLSC (major or minor), TOX, TOX:C
Department(s): Department of Molecular and Cellular Biology

MBG*3660 Genomics W (3-0) [0.50]
This course examines the genomes of eukaryotes and prokaryotes including how genomes are mapped and sequenced, the function of the genome and ethical issues arising from genomic information. How genomic data is used for understanding and treating human disease and for the study of evolution will also be discussed.
Prerequisite(s): MCB*2050
Department(s): Department of Molecular and Cellular Biology

MBG*4020 Genetics of Companion Animals F (3-0) [0.50]
This course explores theoretical and applied aspects of breeding programs for performance, pleasure and hobby animal populations to enhance genetic selection and population viability. Case studies are used to explore the theory and practice of designing practical and sustainable breeding programs that integrate molecular genetics, animal breeding and statistical genomics for a variety of single and multiple birth species.
Prerequisite(s): MBG*3060
Equate(s): ANSC*4020
Department(s): Department of Animal Biosciences

MBG*4030 Animal Breeding Methods and Applications W (3-2) [0.50]
Theoretical and scientific aspects of practical animal breeding programs which lead to genetic improvement of efficiency and profitability of animal production will be presented along with applications to livestock and poultry species. This course integrates quantitative genetics with concepts of statistics, economics, biology and biotechnology and expands into development of practical breeding plans.
Prerequisite(s): MBG*3060
Department(s): Department of Animal Biosciences

MBG*4040 Genetics and Molecular Biology of Development F (3-2) [0.50]
This course provides an examination of the genetic mechanisms that underlie organismal development. The molecular biology of cell determination and differentiation and the genetic control of morphogenesis and pattern formation will be emphasized.
Prerequisite(s): MBG*3040
Department(s): Department of Molecular and Cellular Biology

MBG*4110 Epigenetics F (3-0) [0.50]
This course presents classical non-Mendelian phenomena, including analysis of chromosome breakage, transposition, imprinting and paramutation. Modern advances in gene regulation via epigenetic phenomena will be a central theme, focusing on chromatic remodeling, gene silencing and RNA interference as they pertain to organism development, with an emphasis on plants.
Prerequisite(s): MBG*3040
Department(s): Department of Molecular and Cellular Biology

MBG*4160 Plant Breeding F (3-2) [0.50]
This course examines the application of genetic principles to plant improvement. Topics include breeding objectives, mating systems, selection, testing and germplasm maintenance of horticultural and crop plants.
Prerequisite(s): (MBG*2040 or MBG*2400), STAT*2040
Department(s): Department of Plant Agriculture
MBG*4240 Applied Molecular Genetics in Medicine and Biotechnology W (3-0) [0.50]
This course will examine advanced techniques and methods used in molecular biology, medicine and biotechnology such as genome, transcriptome and proteome analysis, contemporary genetic screens, genetic engineering, transgenic organisms and gene therapy. The course will highlight the most recent developments and applications of such techniques.
Prerequisite(s): MBG*3040
Department(s): Department of Molecular and Cellular Biology

MBG*4270 DNA Replication, Recombination and Repair W (3-0) [0.50]
This course will examine the DNA transactions that determine the structure and function of the genome, with an emphasis on natural and synthetic mutagens and their mode of action, replication and recombination of genetic material, recognition and repair of DNA damage, and inherited and somatic genetic diseases arising from abnormal DNA metabolism.
Prerequisite(s): MCB*2050
Department(s): Department of Molecular and Cellular Biology

MBG*4300 Plant Molecular Genetics F (3-0) [0.50]
This course studies the molecular genetics of plants. The topics include: plant genome diversity and synteny; Arabidopsis thaliana genome, hormonal, environmental and developmental regulation of gene expression; chloroplast and mitochondrial genomes; and gene expression and silencing in transgenics. The course will be delivered using a lecture and paper discussion format. Students will learn and use a variety of computer techniques to search and analyze plant genome databases.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): MBG*2040 or MBG*2400
Department(s): Department of Plant Agriculture

Concert Winds

Contemporary Music Ensemble

Early Music Ensemble

Jazz Band

Note: All ensembles are not necessarily offered every semester.

Solo Performance (Applied Music): Private instruction is offered in piano, voice, orchestral instruments, and various jazz and early instruments. In order to register in Applied Music (MUSC*1500), students must arrange an audition with the School of Fine Art and Music at the time of course selection. Applied Music is restricted to students registered in a Music program (general, area of concentration; honors, major or minor), in Semesters 1-4 (with the exception of Honours Majors in Music, who may audition to register in MUSC*1500 at any time in their studies).

Applied Music courses are designed to be taken in successive semesters. Registration in this sequence following an interruption of more than one semester requires permission of the Director of the School. Students may be required to re-apply before registering to continue in Applied Music. Students must achieve a minimum grade of 70% in Applied Music courses in order to proceed to the next level.

MUSC*1060 Amadeus to Zeppelin: Music and Culture F,W (3-0) [0.50]

This course explores the place classical music holds in contemporary society, drawing upon texts from popular and cyber culture. Focusing on examples that engage with Western art music from 1100 – 1791 C.E., this course teaches students the skills necessary for media and information literacy while also developing music-historical knowledge and providing foundational training in university-level writing about music. No prior musical training is necessary.

Restriction(s): MUSC*2280 , MUSC*2600 , MUSC*2610 , MUSC*2620

Department(s): School of Fine Art and Music

MUSC*1090 Physics of Music F (3-0) [0.50]

This course is designed for arts and social science students with an interest or background in music. The fundamentals of vibrations and waves will be introduced and applied to a study of archetypal instruments. The psychoacoustic basis of pitch and loudness will be discussed.

Offering(s): Offered in even-numbered years.

Equate(s): PHYS*1810

Restriction(s): Students who have standing in any 1000 level physics course, except PHYS*1300 or PHYS*1600, may enrol in this course only if they are completing an honours or general B.A. program in Music. In this case, permission of the instructor is required.

Department(s): School of Fine Art and Music

MUSC*1130 Introduction to Musicianship S,F,W (0-8) [0.50]

Fundamentals of ear training, sight-singing, keyboard, and written skills (rudiments such as scales, intervals and basic chord identification) are introduced. Proficiency on an instrument is not required, but previous experience with note-reading is expected. MUSC*1130 cannot be counted toward a specialization in music.

Offering(s): Offered through Distance Education format only.

Equate(s): MUSC*1120

Restriction(s): MUSC*1180

Department(s): School of Fine Art and Music

MUSC*1180 Musicianship I F,W (3-0) [0.50]

This course explores the inner workings of music--its harmonic, melodic, and rhythmic building blocks. Through intense exercises that hone skills in ear training, dictation, keyboard, improvisation, and harmonization, students gain a deep understanding of how music works, and acquire practical musical skills that contribute to future work in composition, music theory, (ethno)musicology, pedagogy, and performance. A solid base in rudiments is required for this course, and will be assessed upon registration.

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): School of Fine Art and Music

MUSC*1500 Applied Music I F,W (1-6) [0.50]

This course provides individual instruction in the technical and stylistic aspects of artistic performance, and prepares students for public performance. In order to register for this course, students must arrange an audition with the School of Fine Art and Music at the time of course selection.

Restriction(s): Successful completion of an audition. Registration in semesters 1 to 4 (with the exception of BA Honours Music Majors, who may apply at any time). Registration in a Music Specialization.

Department(s): School of Fine Art and Music

MUSC*1510 Applied Music II S,F,W (1-6) [0.50]

This course is a continuation of MUSC*1500.

Prerequisite(s): A minimum grade of 70% in MUSC*1500.

Restriction(s): Registration in a Music Specialization.

Department(s): School of Fine Art and Music

MUSC*2010 The Musical Avant-Garde F (3-0) [0.50]

This course offers an introduction to the avant-garde musical life of the 20th century and beyond including the works of Debussy, Stravinsky, Satie, Schoenberg, Cage, Cowell, and others.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2030 Music in Canada F (3-0) [0.50]

The background and development of musical life in Canada. Cultivation of understanding of Canadian music using recorded examples with emphasis on 20th-century compositions.

Offering(s): Offered in even-numbered years.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2100 Creating Music on the Computer F,W (3-0) [0.50]

An introduction to computer technologies as they apply to the creation and manipulation of music. Topics will be drawn from the areas of sound synthesis and processing, recording, encoding, and transcription. The course will include a classroom and an applied component.

Prerequisite(s): MUSC*1180

Department(s): School of Fine Art and Music

MUSC*2140 History of Jazz F,W (3-0) [0.50]

A survey of the major styles, personalities, and performances of the jazz tradition in terms of its social and cultural contexts through the examination of jazz texts and commentary, autobiographies of musicians, and recorded examples of important performances.

Offering(s): Also offered through Distance Education format.

Department(s): School of Fine Art and Music

MUSC*2150 Music and Popular Culture F,W (3-0) [0.50]

A survey of the major genres, styles, personalities and performance of popular music primarily in the 20th-century through lectures, listening, discussion and reading. Issues such as the relationships between popular music and race, class, technology, and art will be examined. Technical knowledge of music is not required.

Offering(s): Also offered through Distance Education format.

Department(s): School of Fine Art and Music

MUSC*2180 Musicianship II F,W (3-0) [0.50]

A continuation of MUSC*1180.

Prerequisite(s): MUSC*1180

Department(s): School of Fine Art and Music

MUSC*2220 Electronic Music in the Digital Age W (3-0) [0.50]

This course will provide an introduction to digital music, from the initial "cybernetic" experiments of the 1950s to the evolution of software tools for synthesizing, processing, and analyzing sound to the development of music/audio-related hardware such as digital synthesizers, samplers, recorders, mixers, and workstations. An overview of musical genres utilizing digital technology will be presented (experimental, techno, dance, rap, ambient, etc.). Digital technology, including the revolutionary MIDI protocol, will be set into historical context, looking at musical and social developments and milestones, as well as related non-digital technology such as analog synthesizers and multi-track recorders.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2270 World Music F (3-0) [0.50]

This course offers an ethnomusicological introduction to the musical life of Sub-Saharan Africa, India, South America, the Middle East, Indonesia, and the Far East.

Restriction(s): MUSC*2200 , MUSC*2110

Department(s): School of Fine Art and Music

XII. Course Descriptions, Music

Restriction(s): None

Department(s): School of Fine Art and Music

Offering(s): Offered through Distance Education format only.

Equate(s): MUSC*1130
MUSC*2330 Beethoven to Broadway: Music and Culture II W (3-0) [0.50]
This course explores the connections between contemporary culture and the history of Western Art Music. Focusing on material from 1750 to 1890, this course considers how cyber and popular culture engage with and often distort the historical origins of “classical” music. Students will further develop media and research literacy skills and will continue to hone their command of writers’ craft. The ability to read music is required for this course.

Prerequisite(s): MUSC*1060
Restriction(s): MUSC*2600, MUSC*2610, MUSC*2620
Department(s): School of Fine Art and Music

MUSC*2380 Classical Music from Concert Hall to Cinema S (3-0) [0.50]
This is a music appreciation course intended for non-music majors. This course explores the sonic codes of western art music (“Classical” music) as they developed in their original contexts, as well as their current use and meaning in today’s film soundtracks. The works chosen for study are those likely to be encountered in modern concert and opera halls and are selected primarily from the Baroque, Classical, and Romantic eras.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 2.00 credits
Restriction(s): MUSC*1060, Not available to students registered in a Music specialization.
Department(s): School of Fine Art and Music

MUSC*2410 Applied Composition I F (3-0) [0.50]
This course offers class instruction in the technical and aesthetic aspects of music composition.

Prerequisite(s): MUSC*2180
Restriction(s): Registration in a Music Program (Honours major or minor, General)
Department(s): School of Fine Art and Music

MUSC*2420 Applied Composition II W (3-0) [0.50]
This course is a continuation of MUSC*2410.

Prerequisite(s): A minimum grade of 70% in MUSC*2410.
Restriction(s): Registration in a Music Program (Honours major or minor, General)
Department(s): School of Fine Art and Music

MUSC*2500 Applied Music III S,F,W (1-6) [0.50]
A continuation of MUSC*1510.

Prerequisite(s): (MUSC*1180 or MUSC*2180), a minimum grade of 70% in MUSC*1510. (MUSC*1180 or MUSC*2180 may be taken as corequisite)
Restriction(s): Registration in a Music specialization.
Department(s): School of Fine Art and Music

MUSC*2510 Applied Music IV S,F,W (1-6) [0.50]
A continuation of MUSC*2500.

Prerequisite(s): A minimum grade of 70% in MUSC*2500
Restriction(s): Registration in a Music specialization.
Department(s): School of Fine Art and Music

MUSC*2530 Instrumental Ensembles I F,W (0-2) [0.25]
The study and performance of selected instrumental music through participation in one of the School’s ensembles: Chamber Ensemble, Concert Winds, Contemporary Music Ensemble, Jazz Ensemble. In order to register for an ensemble, the student must arrange for an audition with the School of Fine Art and Music. Auditions will be held prior to the first day of classes each Fall and Winter semester. Students must check with the School of Fine Art and Music office for audition dates. Students are encouraged to audition for an ensemble in the Fall semester and to participate in it for both Fall and Winter semesters. Not all ensembles will be able to accept new members in Winter. Consult the School of Fine Art and Music for further information.

Restriction(s): Instructor consent required. Successful completion of an audition.
Department(s): School of Fine Art and Music

MUSC*2540 Instrumental Ensembles II F,W (0-2) [0.25]
A continuation of MUSC*2530.

Prerequisite(s): MUSC*2530
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*2550 Choral Ensembles I F,W (0-2) [0.25]
The study and performance of selected choral literature through participation in one of the School’s ensembles: the University of Guelph Symphonic Choir, the Gryphon Singers. In order to register for an ensemble, the student must arrange for an audition with the School of Fine Art and Music. Auditions will be held prior to the first day of classes each Fall and Winter semester. Students must check with the School of Fine Art and Music office for audition dates. Students are encouraged to audition for an ensemble in the Fall semester and to participate in it for both Fall and Winter semesters. Not all ensembles will be able to accept new members in Winter. Consult the School of Fine Art and Music for further information.

Equate(s): MUSC*2520
Restriction(s): Instructor consent required. Successful completion of an audition.
Department(s): School of Fine Art and Music

MUSC*2560 Choral Ensembles II F,W (0-2) [0.25]
A continuation of MUSC*2550.

Prerequisite(s): MUSC*2550
Equate(s): MUSC*2520
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*2570 Keyboard Accompaniment I F,W (0-2) [0.25]
A continuation of MUSC*2570.

Prerequisite(s): MUSC*2570
Department(s): School of Fine Art and Music

MUSC*2660 Materials of Music I F (3-0) [0.50]
This course is a study of music theory and analysis. It builds on rudiments and musicianship skills developed in MUSC*1180 and introduces students to materials of music including melodic construction, phrase structure, linear counterpoint, rhythmic organization, and diatonic harmony. Students will work on both applied and analytical assignments.

Prerequisite(s): MUSC*1180
Co-requisite(s): MUSC*2180
Restriction(s): MUSC*1250, MUSC*2360
Department(s): School of Fine Art and Music

MUSC*3010 Materials of Music II W (3-0) [0.50]
This course continues the study of music theory and analysis. Students move on to learn about and work with more advanced concepts of tonal harmony and music analysis. The second half of the course introduces students to post-tonal music (20th-century). Students will work on both applied and analytical assignments.

Prerequisite(s): MUSC*2180, MUSC*2660
Restriction(s): MUSC*2360, MUSC*2370, MUSC*2670
Department(s): School of Fine Art and Music

MUSC*3150 Music in London F (3-0) [0.50]
A lecture/seminar course that will examine in depth choral and instrumental music of major composers from representative periods and media, performed at London, England. Compositions will be analyzed in relation to their stylistic technique, formal structure, and historical place in the repertoire of music. A professor of music will present weekly seminars, arrange assignments, and give personal supervision in London.

Restriction(s): Admission to the London Semester.
Department(s): School of Fine Art and Music

MUSC*3210 Instrumental Ensembles III F,W (0-2) [0.25]
This course is a continuation of MUSC*2540.

Prerequisite(s): MUSC*2540
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*3220 Instrumental Ensembles IV F,W (0-2) [0.25]
This course is a continuation of MUSC*3210.

Prerequisite(s): MUSC*3210
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music
MUSC*2560  Choral Ensembles III F,W (0-2) [0.25]
This course is a continuation of MUSC*2560.
Prerequisite(s):  MUSC*2560
Restriction(s):  Instructor consent required.
Department(s):  School of Fine Art and Music

MUSC*2560  Choral Ensembles IV F,W (0-2) [0.25]
This course is a continuation of MUSC*2560.
Prerequisite(s):  MUSC*2560
Restriction(s):  Instructor consent required.
Department(s):  School of Fine Art and Music

MUSC*3410  Collaborative Performance Project II F,W (0-3) [0.25]
This course is a continuation of MUSC*2560.
Prerequisite(s):  A minimum grade of 70% in MUSC*2560 and (2 of MUSC*2530, MUSC*2540, MUSC*2550, MUSC*2560).
Restriction(s):  Registration in a Music Program (Honours major or minor, General).
Department(s):  School of Fine Art and Music

MUSC*3420  Collaborative Performance Project IV F,W (1-6) [0.50]
This course is a continuation of MUSC*3410.
Prerequisite(s):  A minimum grade of 70% in MUSC*3410.
Restriction(s):  Registration in a Music Program (Honours major or minor, General).
Department(s):  School of Fine Art and Music

MUSC*3500  Collaborative Performance Project V S,F,W (1-6) [0.50]
A continuation of MUSC*2510.
Prerequisite(s):  3.00 credits in music courses including a minimum grade of 70% in MUSC*2510, (MUSC*2540 or MUSC*2560).
Restriction(s):  Registration in a Music Program (Honours major or minor, General, Area of Concentration).
Department(s):  School of Fine Art and Music

MUSC*3510  Collaborative Performance Project VI S,F,W (1-6) [0.50]
A continuation of MUSC*3500 including preparation and performance of a juried recital, restricted to students in a Music program (honours major or minor or general, area of concentration).
Prerequisite(s):  4.00 credits in music courses including a minimum grade of 70% in MUSC*3500
Restriction(s):  Registration in a Music Program (Honours major or minor, General, Area of Concentration).
Department(s):  School of Fine Art and Music

MUSC*3550  Collaborative Performance Project I F,W (0-3) [0.25]
The study and performance of selected instrumental or vocal chamber music through participation in a small ensemble under the guidance of a supervising instructor. Students will organize the ensemble, which normally consists of two to six vocalists and/or instrumentalists, design a project with the instructor, and submit a proposal to the Music Faculty Committee for approval by the last day of course selection in fall (or winter) or winter (for the following fall). A form is available from the School Office for this purpose.
Prerequisite(s):  MUSC*2500, (2 of MUSC*2530, MUSC*2540, MUSC*2550, MUSC*2560)
Restriction(s):  Registration in a Music Program (Honours major or minor, General, Area of Concentration). Instructor consent required.
Department(s):  School of Fine Art and Music

MUSC*3560  Collaborative Performance Project II F,W (0-3) [0.25]
A continuation of MUSC*3550.
Prerequisite(s):  MUSC*3550
Restriction(s):  Instructor consent required.
Department(s):  School of Fine Art and Music

MUSC*3630  Tragedy, Technology, and Torture: Music Post 1900 F (3-0) [0.50]
This course examines music from the late 19th century (Debussy and post-romantic composers) to the present from both historical and theoretical perspectives.
Prerequisite(s):  MUSC*2660, (MUSC*2330 or MUSC*2620)
Co-requisite(s):  MUSC*3010
Department(s):  School of Fine Art and Music

The following topics courses normally focus on current areas of faculty research. It is expected that students will have completed at least 7.50 credits before taking these upper-level courses.

MUSC*3730  Topics in Jazz and Improvised Music F (3-0) [1.00]
This course provides a seminar experience in focussed topics related to jazz and improvised music. Topics will normally include some combination of the following: jazz/improvisation history and theory, critical studies in jazz/improvised music. Subject matter will vary according to the instructor.
Offering(s):  Offered in even-numbered years.
Prerequisite(s):  7.50 credits including MUSC*2140
Department(s):  School of Fine Art and Music

MUSC*3740  Topics in Popular Music Studies F (3-0) [1.00]
This course examines the rise and impact of the cultural industries on production and consumption of music, the development of transnational popular music, and the role popular music plays in the politics of social identity.
Offering(s):  Offered in even-numbered years.
Prerequisite(s):  7.50 credits including (MUSC*1180 or MUSC*2180), MUSC*2150
Department(s):  School of Fine Art and Music

MUSC*3800  Topics in Music History/Analysis W (3-0) [1.00]
This course examines selected topics in music history, performance practice, and analysis, and music within its cultural context.
Offering(s):  Offered in even-numbered years.
Prerequisite(s):  7.50 credits including (MUSC*2670 or MUSC*3010), MUSC*3630
Department(s):  School of Fine Art and Music

MUSC*3820  Topics in Ethnomusicology F (3-0) [1.00]
Topics for this course will normally include some combination of the following: a specific world music tradition, ethnomusicological issues, theories, or methods. Subject matter will vary according to the instructor.
Offering(s):  Offered in odd-numbered years.
Prerequisite(s):  7.50 credits including (MUSC*1180 or MUSC*2180), MUSC*2270
Department(s):  School of Fine Art and Music

MUSC*3860  Topics in Digital Music F (3-0) [1.00]
This is a course which focuses on a specific area of digital music production. Topics may include advanced audio production, advanced MIDI sequencing, advanced music notation/instrumentation, synthesis and signal processing, music-oriented computer programming, or interactive computer music. Normally, a major creative project will be completed and presented as an outcome of the course.
Offering(s):  Offered in odd-numbered years.
Prerequisite(s):  7.50 credits including MUSC*2100, MUSC*2220
Restriction(s):  Instructor consent required.
Department(s):  School of Fine Art and Music

MUSC*3880  Topics in Music Pedagogy W (3-0) [1.00]
This course examines current philosophical trends in music education, and the application of various theories of music learning. Students will be asked to process conflicting ideas as presented through readings, class discussion, and their own experience as learners. There is also a practical component, in which each student will conduct an ensemble or give a series of private lessons, as well as present a collaborative teaching assignment.
The course is designed to prepare music students to teach privately or in a classroom.
Offering(s):  Offered in odd-numbered years.
Prerequisite(s):  7.50 credits including MUSC*2180, MUSC*2660
Department(s):  School of Fine Art and Music

MUSC*4200  Independent Project in Music S,F,W (3-0) [0.50]
This is an independent learning option in music for qualified students working in consultation with a faculty advisor. The project may take the form of a course of readings and assignments, enabling the student to investigate a topic in music not otherwise available in the curriculum. It may also include a creative component (such as composition) or an experiential learning component (such as a professional performance opportunity, or a community outreach opportunity). A written proposal, signed by the faculty advisor, must be submitted to the Director of the School for approval by the last day of course selection in the previous semester.
Prerequisite(s):  3.00 credits in Music, including (1 of MUSC*3730, MUSC*3740, MUSC*3800, MUSC*3820, MUSC*3860, MUSC*3880)
Restriction(s):  Registration in a Honours major or minor in music or an area of concentration (General Program) in Music. Instructor consent required.
Department(s):  School of Fine Art and Music
MUSC*4450 Honours Seminar in Music W (3-0) [1.00]
The Honours Seminar in Music teaches advanced research methods common to a range
of musical investigations: musicology (including ethnomusicology, popular music and
jazz), music theory, music pedagogy, and musical creation. In addition, the Honours
Seminar in Music allows students to engage in individual research with concentrated
energy through a one semester/one credit course in a supportive peer environment.
Students will develop a research project proposal for approval by the instructor in the
semester prior to enrolling in this course.
Prerequisite(s): Completion of the music core.
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*4460 Honours Music Recital Preparation S,F,W (1-6) [0.50]
First part of a two-semester performance project culminating in a music recital at the end
of the second semester. Students will present a preparatory performance at the end of the
first semester. Qualified instrumentalists, vocalists, and composers who have completed
the applied music or applied composition course sequences are eligible to present a
full-length recital. In the case of composers it is the responsibility of the student to organize
performers to present the music. Recital proposals must be submitted to the Director of
the School, on the provided form, by the last day of course selection in the previous
semester. MUSC*4460 and MUSC*4470 are normally taken over consecutive semesters.
Prerequisite(s): Completion of the music core, a minimum grade of 70% in
MUSC*3510
Equate(s): MUSC*4401
Restriction(s): Permission of the School and registration in an honours major in music.
Department(s): School of Fine Art and Music

MUSC*4470 Honours Music Recital S,F,W (1-6) [0.50]
Second part of a two-semester performance project culminating in a music recital at the end
of the second semester. MUSC*4460 and MUSC*4470 are normally taken over
consecutive semesters.
Prerequisite(s): A minimum grade of 70% in MUSC*4460
Equate(s): MUSC*4402
Restriction(s): Registration in an honours major in music.
Department(s): School of Fine Art and Music
## Nanoscience

### NANO*1000 Introduction to Nanoscience F (3-0) [0.50]
This course introduces students to the emerging field of nanoscience. Its representation in popular culture and journalism will be contrasted with the present and near future realities in the field. Current industrial and business applications will be discussed. Guest lectures will be given by faculty performing research in the field. The course also aims to help students in their transition to the academic life by emphasizing skills and values such as academic integrity and problem solving and by actively connecting their first-year science core courses to the field of nanoscience.

**Prerequisite(s):** 4U Chemistry or 4U Physics

**Restriction(s):** Registration in Nanoscience Major.

**Department(s):** Department of Chemistry

### NANO*2000 Synthesis and Characterization of Nanomaterials I F (3-3) [0.50]
This course explores the structural, mechanical, and electronic properties of matter. Methods to fabricate nanosstructured materials such as nanoparticles, nanocomposites, thin films, polymers, and ferrofluids will be discussed. Techniques that have been developed to analyze these materials are also discussed, including scattering, microscopy and spectroscopy.

**Prerequisite(s):** CHEM*1050, [IPS*1510 or (MATH*1210, PHYS*1010)]

**Restriction(s):** Registration in Nanoscience Major.

**Department(s):** Department of Chemistry

### NANO*2100 Synthesis and Characterization of Nanomaterials II W (3-3) [0.50]
The structural, mechanical, and electronic properties of matter will be discussed. Topics will include methods to fabricate nanosstructured materials such as nanoparticles, nanocomposites, thin films, polymers, and ferrofluids, as well as techniques that have been developed to analyze these materials, including scattering, microscopy, and spectroscopy.

**Prerequisite(s):** NANO*2000

**Department(s):** Department of Physics

### NANO*3200 Nanolithographic Techniques F (3-3) [0.50]
Lithographic techniques applied at the micrometer and nanometer scale are key to the production of devices for the electronic and related industries. Projection and proximity techniques (XUV, electron, and ion beams) and writing processes (electron beam, ion beam, and scanned probe) will be explored. Emphasis will also be placed on soft lithographic techniques such as stamping and dip-pen nanolithography.

**Prerequisite(s):** NANO*2100

**Department(s):** Department of Chemistry

### NANO*3300 Spectroscopy of Nanomaterials W (3-3) [0.50]
The interaction of nanostructured matter with light gives rise to some of its most important observable properties. The absorption and fluorescence properties of nanomaterials will be studied. Particular attention will be paid to experiments which require nanoscale path lengths, such as IR spectroscopy of monomolecular thin films. Local spectroscopic probes with nanoscale resolution such as Near-field Scanning Optical Microscopy (NSOM) and Scanning Probe Spectroscopy (SPS) will be explored.

**Prerequisite(s):** NANO*2100, (CHEM*3860 or PHYS*3230)

**Department(s):** Department of Chemistry

### NANO*3500 Thin Film Science F (3-3) [0.50]
The deposition and growth of thin layers of materials is an important process on the production of many devices. This course will study the various methods by which thin films are grown including physical and chemical vapour deposition, molecular beam epitaxy, atomic layer epitaxy, and self-assembled monolayers. Experimental techniques for analyzing the properties of thin films will also be discussed.

**Prerequisite(s):** NANO*2100

**Department(s):** Department of Physics

### NANO*3600 Computational Methods in Materials Science W (3-3) [0.50]
Many computational techniques have been brought to bear on the study of nanostructured matter. This course will present several of these techniques and will introduce a number of computational packages that can be used to study matter. Monte Carlo and ab initio methods along with molecular dynamics simulations will be studied, with an emphasis upon the implementation of the software packages and the appropriate interpretation of the results.

**Prerequisite(s):** (MATH*1160 or MATH*2160), (MATH*2170 or MATH*2270), (CHEM*3860 or PHYS*3230)

**Department(s):** Department of Physics

### NANO*4100 Biological Nanomaterials F (3-0) [0.50]
Biological systems provide a rich range of examples of specialized chemical systems that are structured on the nanoscale. Nanofibres, microtubules, viruses, and ribosomes are examples of systems that can be studied from the perspective of nanoscience. Using these systems or developing artificial systems which mimic their functionality are important growth areas in nanoscience and will be explored in this course.

**Prerequisite(s):** MATH*2270, (CHEM*2820 or PHYS*2240)

**Department(s):** Department of Physics

### NANO*4200 Topics in Nanomaterials W (3-0) [0.50]
This course will introduce students to special topics in nanostructured materials. The course will illustrate how to design, create, characterize and utilize new materials in which the presence of a nanoscale structural elements results in new properties of fundamental and technological importance.

**Prerequisite(s):** NANO*3300, NANO*3500, (CHEM*3860 or PHYS*3230)

**Department(s):** Department of Chemistry

### NANO*4700 Concepts in Quantum Computing F (3-0) [0.50]
This course introduces concepts in quantum computation and quantum information. Following an introduction to the basics of linear algebra, quantum mechanics, and computer science, presented from the viewpoint of quantum information theory, topics covered will include quantum computation, quantum algorithms, quantum error correction, quantum cryptography and quantum communication.

**Prerequisite(s):** MATH*1160, (CHEM*3860 or PHYS*3230)

**Department(s):** Department of Chemistry

### NANO*4900 Advanced Studies in Nanoscience W (1-5) [0.50]
This course will guide students through the primary literature of the field with readings from recent achievements. Students will select individual topics on which they will prepare seminars and written reports.

**Prerequisite(s):** 1.50 credits in NANO courses at the 3000 level.

**Restriction(s):** PHYS*4300

**Department(s):** Department of Physics

### NANO*4910 Nanoscience Research Project I S,F,W (0-12) [1.00]
Students will work with faculty in their laboratories on research topics of current interest. A final written paper and oral presentation of the work will be given by the students.

**Prerequisite(s):** 1.50 credits in NANO courses at the 3000 level.

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Chemistry

### NANO*4920 Nanoscience Research Project II S,F,W (0-12) [1.00]
Students will work with faculty in their laboratories on research topics of current interest. A final written paper and oral presentation of the work will be given by the students.

**Prerequisite(s):** NANO*4910

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Chemistry

<tbody>
<tr>
<td>NEUR*2000</td>
<td>Introduction to Neuroscience F (3-0) [0.50]</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>This course offers an introduction to the mammalian nervous system, with emphasis on the structure and function of the human brain. General principles of the function and organization of nervous systems will be discussed, providing both an overview of the subject and a foundation for advanced courses. Topics will include the physical and chemical bases for action potentials, synaptic transmission, and sensory transduction; anatomy; development; sensory and motor pathways; and the neuroscience of brain diseases. Prerequisite(s): BIOL<em>1090, PSYC</em>1000. Restriction(s): PSYC*2410. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Department(s): Department of Psychology</td>
</tr>
<tr>
<td>NEUR*3100</td>
<td>Molecular Biology of Neurodevelopmental and Degenerative Disease F (3-0) [0.50]</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>This course will follow the life of nervous system cells from birth, through their functional life, and ending in ageing and degenerative disease. Focus will be on the molecular and cellular events that govern these processes and the diseases and pathologies, such as Parkinson's and Alzheimer's, that arise as a consequence of their dysfunction. Finally, students will be introduced to the new and rapidly advancing field of adult neural stem cells and the promises and potential problems of their use in treating many of the diseases that will have been discussed throughout. Prerequisite(s): MCB<em>2050, (NEUR</em>2000 or PSYC*2410). Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs (BSCH.NEUR, NEUR minor) or semester levels during certain periods. Department(s): Department of Molecular and Cellular Biology</td>
</tr>
<tr>
<td>NEUR*3500</td>
<td>Techniques in Neuroscience W (2-3) [0.50]</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>This course provides an introduction to selected techniques used in Neuroscience. Students will investigate and learn key methods in neurophysiology and biomechanics, neuroanatomy, cognitive neuroscience, and molecular and cellular neurobiology, used to address contemporary problems in this multidisciplinary field. These techniques will be introduced through literature review, hands-on laboratory exercises and demonstrations. A diversity of vertebrate and invertebrate model organisms will be considered as well as the ethical considerations that accompany the use of animals or human subjects in research. Prerequisite(s): (NEUR<em>2000 or PSYC</em>2410 ), PSYC*3270. Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs (BSCH.NEUR) or semester levels during certain periods. Department(s): Department of Molecular and Cellular Biology, Department of Biomedical Sciences, Department of Psychology, Department of Human Health and Nutritional Sciences</td>

Nutrition

Department of Animal Biosciences
Department of Family Relations and Applied Nutrition
Department of Human Health and Nutritional Sciences

**NUTR*1010 Introduction to Nutrition F,W (3-0) [0.50]**
This course is an introduction to human nutrition, with major emphasis on nutrients and their dietary sources, functions, and relationships to health. Topics will include the energy-containing nutrients, selected vitamins and minerals and weight management. We will also explore current popular topics and emerging diet-disease relationships.

**Offering(s):** Also offered through Distance Education format.

**Restriction(s):** This is a Priority Access Course. For B.A.Sc. and FCS minor and some restrictions may apply during some time periods.

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*1020 Professional Practice in Applied Nutrition W (3-0) [0.50]**

Through lectures, readings, group activities, and case studies students will explore the key knowledge and skills needed for a successful professional career in applied nutrition in Canada. Critical thinking, regulatory and ethical issues as applied in business, health care, public health and social services context are emphasized.

**Restriction(s):** Restricted to students in BASc.AHN major.

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*2050 Nutrition Through the Life Cycle F (3-0) [0.50]**
This course explores how individual, family, community and societal factors influence nutritional needs and dietary intake from infancy through older adulthood. Implications for nutrition care and community-level programs are discussed.

**Offering(s):** Also offered through Distance Education format.

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*2150 Introduction to Nutritional and Food Sciences F (3-0) [0.50]**
This interdisciplinary course provides an introduction to the Food and Nutritional Sciences from both historical and modern perspectives. Major themes are the nutritional and functional properties of food, nutrient assimilation, food preservation and safety, and the interactions between food processing, diets and health. (Also listed as FOOD*2150.)

**Prerequisite(s):** NUTR*1010

**Equate(s):** BIOL*1040 or BIOL*1080, CHEM*1040

**Restriction(s):** FOOD*2100, FOOD*3090. Not available to students registered in B.A.Sc. AHN major.

**Department(s):** Department of Food Science

**NUTR*3070 Nutrition and Physical Activity Interventions W (3-0) [0.50]**
This course examines the development, implementation, and evaluation of: a) integrated interventions to improve both nutrition and physical activity behaviours; and, b) interventions to improve physical activity behaviours of people of different ages in various settings. Various theories and models used to develop nutrition and physical activity interventions will be examined.

**Prerequisite(s):** FRHD*3070, NUTR*2050

**Restriction(s):** Registration in the B.A.Sc. program.

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*3090 Clinical Nutrition I W (3-3) [1.00]**
The epidemiology, pathophysiology, and role of nutrition will be considered in the prevention and management of several major chronic conditions including cardiovascular diseases, disorders of energy balance and diabetes mellitus. There is an emphasis on developing the skills for high risk individual management approaches.

**Prerequisite(s):** (BIOM*2000 or BIOM*3200), FRHD*3070, NUTR*2050, (NUTR*3190 or NUTR*3210), STAT*2090

**Co-requisite(s):** FRHD*3400

**Restriction(s):** NUTR*3040. Registration is limited to students registered in B.A.Sc. AHN major.

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*3110 Food Security W (3-0) [0.50]**
The prevalence of food insecurity in Canada and selected industrialized and non-industrialized countries is examined. The course will review environmental, social, and other factors associated with food insecurity and take critical look at the effectiveness of programs and policies designed to improve food security.

**Prerequisite(s):** 9.50 credits including NUTR*2050

**Restriction(s):** Registration is limited to students registered in the B.A.Sc. AHN major.

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*3150 Aging and Nutrition W (3-0) [0.50]**
This course provides an in-depth study of the determinants of food intake and nutrient recommendations for aging adults. Specific consideration will be given to eating environments and physiological changes that influence access, preparation, and consumption of food by older adults living in the community and in facilities. An emphasis will be placed on chronic disease prevention and management.

**Prerequisite(s):** 1 of NUTR*1010, NUTR*2150, NUTR*3210

**Restriction(s):** NUTR*2070

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*3210 Fundamentals of Nutrition S,F,W (3-0) [0.50]**
This is the foundation course for the study of nutrition. The occurrence, uptake and metabolic role of nutrients will be discussed in relation to growth, reproduction and longevity in human subjects, domestic animals and other species.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** BIOC*2580

**Department(s):** Department of Human Health and Nutritional Sciences

**NUTR*3330 Micronutrients, Phytochemicals and Health F (3-0) [0.50]**
The course emphasizes the biochemical basis for the dietary essentiality of vitamins and minerals. The course extends the fundamentals of nutrition to include conditional essentiality of micronutrients, biochemical individuality and the use of micronutrient supplementation to promote human and animal health. Both plant and animal sources of nutrients are discussed.

**Prerequisite(s):** NUTR*3210

**Department(s):** Department of Human Health and Nutritional Sciences

**NUTR*3360 Lifestyle Genomics F (3-0) [0.50]**
This course explores how genes and lifestyle choices (in particular diet and exercise) interact to affect cell and tissue function, and impact human health. These concepts will be examined through in-depth discussions of common metabolic diseases. The course is designed to highlight the integrative and inter-connected cellular, molecular, and physiological mechanisms underlying these conditions.

**Prerequisite(s):** BIOC*2580, BIOL*1080, MCG*2040

**Restriction(s):** Registration in BSCH.HK and BSCH.NANS (major or minor).

**Department(s):** Department of Human Health and Nutritional Sciences

**NUTR*3390 Applied Nutritional and Nutraceutical Sciences I F (3-3) [0.75]**
This course will introduce and develop key concepts of the applied aspects of the Nutritional and Nutraceutical Sciences. Enrichment of foods with health protectant chemicals, establishing biomarkers and risk indicators of disease, testing of bioavailability/efficacy to support basic health claims, health assessment and nutrigenomic analysis as adjuvants in the effective use of functional foods and nutraceuticals, and regulatory and marketing/consumer issues are topics that will be addressed.

**Prerequisite(s):** NUTR*3210

**Restriction(s):** Registration in the B.Sc. NANS major or minor and the B.Sc. FFAN minor.

**Department(s):** Department of Human Health and Nutritional Sciences

**NUTR*4010 Nutritional Assessment F (3-0) [0.50]**
This course examines the principles and methods used in nutritional assessment of individuals and populations in health and disease states. Dietary, anthropometric and biochemical techniques will be primary components. Nutritional screening, advanced techniques for body composition assessment, physical exam and clinical indicators will also be addressed. Significant independent learning will be required.

**Prerequisite(s):** 14.50 credits including NUTR*2050, NUTR*3210

**Restriction(s):** Registration in the B.A.Sc. AHN major.

**Department(s):** Department of Family Relations and Applied Nutrition

**NUTR*4040 Clinical Nutrition II F (3-0) [0.50]**
This course is a continuation of NUTR*3090. This lecture based course is concerned with the application of nutrition to clinical conditions. Methods and content of medical nutrition therapy in prevention and treatment of gastrointestinal, renal, hepatic diseases and catabolic states will be emphasized. Ethical issues in nutrition management of disease and health professional practice will be addressed.

**Prerequisite(s):** 14.50 credits including, [1 of BIOM*2000, BIOM*3100 or BIOM*3110, BIOM*3200, (NUTR*3040 or NUTR*3090)]

**Restriction(s):** Registration in the B.A.Sc. AHN major.

**Department(s):** Department of Family Relations and Applied Nutrition
NUTR*4070 Nutrition Education F (3-0) [0.50]
This course covers methods and approaches in nutrition education with particular emphasis on community programs in nutrition for different age groups; dietary counselling; nutrition education in the preschool, in prenatal and other specialized programs.
Prerequisite(s): FRHD*3400, NUTR*2050
Restriction(s): This is a Priority Access Course. Registration may be restricted to students registered in B.A.Sc. majors and the Family and Child Studies minor during certain time periods.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4090 Functional Foods and Nutraceuticals W (3-0) [0.50]
The course examines the relation of functional foods and nutraceuticals (FFN) to foods and drugs. The safety and efficacy of individual FFN products, and the regulatory issues that influence the development and commercialization of FFN in global markets are emphasized. (Also listed as FOOD*4090.)
Prerequisite(s): NUTR*3210
Equate(s): FOOD*4090
Department(s): Department of Human Health and Nutritional Sciences, Department of Food Science

NUTR*4120 Applied Clinical Skills W (0-3) [0.50]
This is a laboratory-based course which will enable students to gain skills in independently completing nutrition assessments and care plans of individuals and groups as they would be expected to do in nutrition professions. Students will comprehensively assess nutritional status, apply knowledge of human physiology, pathophysiology, medical terminology and nutritional assessment to diagnose nutritional problems/issues and formulate, implement and evaluate a nutrition intervention.
Prerequisite(s): NUTR*4010, NUTR*4040
Restriction(s): NUTR*4850. Restricted to students in B.A.Sc. AHN with at least 75% grade average in all completed NUTR and FRHD courses.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4210 Nutrition, Exercise and Energy Metabolism F (3-0) [0.50]
In this course energy metabolism will be considered under the headings: thermodynamic principles, energy deposition and hormonal control of metabolism; nutrition, exercise and environmental influences on energy balance and enzyme adaptation; nutrition and exercise in the control of body composition.
Prerequisite(s): NUTR*3210, (1 of BIOM*3200, HK*3810
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4320 Nutrition and Metabolic Control of Disease W (3-0) [0.50]
This course provides a discussion of disorders of metabolism, either inherited or acquired, in which nutrition plays a major role in the etiology, pathogenesis, or treatment. The nutritional control of the affected metabolic pathways and the interaction of nutrition with exercise, drugs and gene therapy will be presented.
Prerequisite(s): NUTR*3210, (1 of BIOM*3200, HK*3810, ZOO*3210, ZOO*3620)
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4330 Applied Nutritional and Nutraceutical Sciences II W (3-3) [0.75]
In this course laboratory and other investigational techniques are covered, together with their underlying concepts. The course is designed to enhance understanding of the design and use of nutraceuticals for human and animal health.
Prerequisite(s): NUTR*3330, NUTR*390, HK*3810
Restriction(s): Registration in B.Sc. NANS major or minor.
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4360 Current Issues in Nutrigenomics W (3-0) [0.50]
This course discusses controversial and/or emerging topics in Human Health and Nutritional and Nutraceutical Sciences as it relates to nutrigenomics.
Prerequisite(s): NUTR*3210, (BIOM*3200 or HK*3810)
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4510 Toxicology, Nutrition and Food F (3-0) [0.50]
This course examines the role of foods, herbsals and nutraceuticals as sources of antinutrients, natural toxins and environmental contaminants. The impact of toxic exposures on nutritional status, the impact of nutritional status on safe metabolism of toxins, and the use of this knowledge in the design of functional foods are also examined. Assessing the risk of genetically modified foods and radioactive contamination of a food supply.
Prerequisite(s): NUTR*3210
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4810 Applied Human Nutrition Thesis I U (3-0) [0.50]
Planning, developing and writing a research proposal under individual faculty supervision. Topic to be decided by the student in consultation with the supervisory faculty member before course selection or registration period.
Prerequisite(s): FRHD*3070, NUTR*2050, (NUTR*3040 or NUTR*3090)
Restriction(s): Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4850 Field Experience in Nutrition Education W (2-4) [0.50]
This course offers a supervised experience in nutrition education and a seminar. Students will apply principles of program planning, nutrition education theory and professional behaviour in a community setting. Placements may be arranged in institutional or community health settings, educational facilities, social services, or food industry. Seminar topics include professional ethics, exploring values, and issues management.
Prerequisite(s): FRHD*3400, NUTR*4040, NUTR*4070
Restriction(s): NUTR*4120 Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4900 Selected Topics in Human Nutrition W (3-0) [0.50]
This course requires reading and discussion on selected areas in human nutrition and its application; formal class reports and term papers. Primarily for Applied Human Nutrition majors.
Prerequisite(s): FRHD*3070, (NUTR*3040 or NUTR*3090), NUTR*410
Restriction(s): Registration in B.A.Sc. AHN major.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4910 Applied Human Nutrition Thesis II U (6-0) [1.00]
The student will conduct and write an undergraduate thesis under the direction of a faculty member.
Prerequisite(s): NUTR*4810
Department(s): Department of Family Relations and Applied Nutrition
### OAGR*2070 Introduction to Organic Agriculture W (3-3) [1.00]

Students will be exposed to the scale of the organic industry today, including the factors driving interest in organics for both producers and consumers. The foundational principles underlying contemporary organic agriculture will be presented and first hand experience of current organic practices will be provided. In addition, this course will rely on small group mentoring to stimulate independent, learner-centered analysis of selected topics in organic agriculture.

**Prerequisite(s):** 5.00 credits

**Restriction(s):** OAGR*2050, OAGR*3030

**Department(s):** Department of Plant Agriculture, School of Environmental Sciences

### OAGR*4050 Design of Organic Production Systems F (6-0) [1.00]

Students will apply organic agriculture principles to the design and concept of agricultural operations, taking into account the interactions of soils, plants and animals with environmental and managerial factors.

**Prerequisite(s):** OAGR*2070

**Restriction(s):** OAGR*3130, OAGR*4160

**Department(s):** Department of Plant Agriculture, School of Environmental Sciences

### OAGR*4180 Social Issues in Organic Agriculture W (2-2) [0.50]

This interdisciplinary course will examine the major social issues in organic agriculture from both a global and local perspective, with an emphasis on synthesis and integration. Issues will include globalization, sustainability, gender, food, social movements, the organic agri-food system, rural communities, and the role of the family farm.

**Prerequisite(s):** 1 of EDRD*3400, OAGR*2070, SOC*2080

**Department(s):** School of Environmental Design and Rural Development
### Pathology

**Department of Pathobiology**

XII. Course Descriptions, Philosophy

Philosophy

Department of Philosophy

Note: Specific descriptions of all courses to be offered in a given semester will be available from the Department of Philosophy in each preceding semester. Students are advised to consult these descriptions. Different sections of a course often emphasize different aspects of that course.

1. All 2000 level philosophy courses are open to students who have completed 2.00 credits or who have completed one of PHIL*1000, PHIL*1010, PHIL*1050.
2. Unless otherwise noted, 3000 level philosophy courses are open to students who have completed at least 1.50 credits in philosophy or 7.50 credits.
3. For most 4000 level courses, students are expected to have completed at least 1.00 credits in philosophy at the 3000 level. Some 4000 level credits have specific prerequisites, e.g. PHIL*4230, PHIL*4360 (see course descriptions in the following pages). If a student is taking several credits with such prerequisites, then the number of other philosophy credits which need to be completed may exceed the general requirement of 1.00 credits at the 3000 level. PHIL*4310 is designed to be open to seventh and eighth semester students who have no previous philosophy credit. If in doubt about being well prepared for a particular course, the student should consult with either the instructor or the chair of the department.
4. Students may receive credit for PHIL*1000, PHIL*1010 and PHIL*1050, but only one may be counted towards the minimum number of philosophy credits required for a degree in philosophy. Students intending to proceed in the discipline at the 2000 level are advised to take only 0.50 credits at the 1000 level.

PHIL*1000 Classic Thinkers F (3-0) [0.50]
This course will deal with enduring philosophical questions through an exploration of primary texts in the history of philosophy. Topics covered may include the nature of knowledge and the different types of knowledge, the relationship between the mind and the body, and the nature of good and evil. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department's website.
Department(s): Department of Philosophy

PHIL*1010 Introductory Philosophy: Social and Political Issues F,W (3-0) [0.50]
This course introduces philosophy through an examination of important issues in politics and society, such as punishment, animal rights, discrimination, war and violence, equality and property. Issues may be introduced through contemporary or historical philosophical writings.
Department(s): Department of Philosophy

PHIL*1030 Sex, Love, and Friendship F,W (3-0) [0.50]
This course introduces students to philosophical inquiry through the careful study of the forms of interpersonal relationships. Issues central to friendship, love, and sexuality which may be addressed include pleasure, happiness, responsibility, power and oppression, gender, marriage and morality.
Department(s): Department of Philosophy

PHIL*1050 Ethics, Knowledge, and Reality W (3-0) [0.50]
This course introduces students to philosophy through the exploration of basic perennial philosophical problems and questions, such as whether there is free will, a God, objective right and wrong, genuine knowledge of the world, and other topics. The readings for the course will consist primarily of 20th century philosophical writing.
Department(s): Department of Philosophy

PHIL*2000 Philosophy of Biology W (3-0) [0.50]
This course focuses on philosophical issues that arise within biology, such as the explanation of altruism, the question of whether species are real, and the challenge of how to identify adaptations. The course also examines philosophical issues that arise at the interface between biology and society, such as the implications of evolutionary theory for traditional views about human nature, or the proper role for scientists in advocating for environmental policies.
Prerequisite(s): 2.00 credits including 0.50 credits in BIOL
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Philosophy

PHIL*2030 Philosophy of Medicine F (3-0) [0.50]
Medicine is a philosophical, not merely a practical, enterprise. This course covers philosophical concepts which are widely used to evaluate health and health-practices that include: autonomy, consent, mind, will, rights, harm, fairness, dignity, truth and even 'health' itself. Issues central to health and health care practice include: the nature of professional-client relationships, genetic counseling, passive and active euthanasia, pharmacology and behaviour modification, resource allocation, and the special set of issues raised by reproductive technologies.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)
Department(s): Department of Philosophy

PHIL*2060 Philosophy of Feminism I W (3-0) [0.50]
This course examines metaphysical, epistemological and ethical issues in feminist philosophy, including such topics as the nature and consequences of patriarchy, human nature, sexual divisions of labour, women's studies, rationalizations of inequalities and explorations into a contemporary feminist agenda for social, political and economic changes.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)
Department(s): Department of Philosophy

PHIL*2070 Philosophy of the Environment W (3-0) [0.50]
Environmental Philosophy asks questions such as: How has ‘nature’ been conceptualized in the Western philosophical tradition, in aesthetics, science, and ethics? What arguments have been offered for the view that humans are superior among creatures? What connections might there be between the ways that nature, humankind, and animals have been conceptualized and the ways that humans have tended to act toward the non-human natural environment? This course may cover such topics as: climate change, resource extraction and justice, biotechnology, obligations to future generations, risk assessment and discount rates, species lost, conservation vs. preservation.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)
Department(s): Department of Philosophy

PHIL*2080 Animals in Philosophy S (3-0) [0.50]
This course will examine the concept of the animal itself, the nature of animal minds, the importance of species membership, and the relationship between human and non-human animals. It will discuss applied issues related to animal welfare, wildlife, agriculture, experimentation, and the environment. It will also explore some of the ethical, social, political and feminist perspectives on animals as they are addressed by philosophers. As such, the course aims to enable students to analyze growing concerns that animals play in our lives.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)
Department(s): Department of Philosophy

PHIL*2100 Critical Thinking F,W (3-0) [0.50]
This course is designed to develop clarity of thought and method in the analysis and construction of arguments. By contrast to PHIL*2110, the emphasis here is upon informal principles of critical thinking and arguments stated in terms of ordinary language. Topics include the nature and methods of arguing, classification, definition and fallacies.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)
Department(s): Department of Philosophy

PHIL*2110 Formal Logic W (3-0) [0.50]
This course studies the basic principles and techniques of formal logic. The analysis of the logical structure of sentences and arguments is explored, together with the fundamental principles of elementary sentential logic and quantification.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)
Department(s): Department of Philosophy

PHIL*2120 Ethics F,W (3-0) [0.50]
Philosophical ethics is the attempt to systematize, explain, and justify the standards by which we evaluate our conduct as persons. The course may include treatment of controversial ethical issues such as abortion, euthanasia, war, and the treatment of animals and will cover many of the following questions: can we expect to find a single, universal code of ethics that applies to all human beings, or do such codes vary for each society or even for each individual? What are the roles of reason and emotion in ethics? Is morality grounded on a principle, and if so, what is it? Are there any traits of character that one must have to be a good person? Given that traditional ethical codes have been almost universally sexist, how must ethics be refashioned in order for women to achieve equal recognition?
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)
Department(s): Department of Philosophy

PHIL*2140 Ancient Greek Philosophy F (3-0) [0.50]
A survey of the beginnings of Western philosophy, this course will focus on themes such as the nature of reality, the ways we might come to have knowledge, and the good life for human beings. This course will typically consider such thinkers as Socrates, Plato, Aristotle, and Epicurus, although the specific course content will vary with the instructor.
Prerequisite(s): 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1030, PHIL*1050)
Department(s): Department of Philosophy
### PHIL*2160 Early Modern Philosophy: Reason vs. Experience W (3-0) [0.50]

Philosophers of the seventeenth and eighteenth centuries grappled with a central question regarding the foundation of human knowledge: Does knowledge arise from pure reasoning alone or from sensory experience? This question inspired debates regarding scepticism, the nature of reality, the connection between mind and body, language and meaning, moral certainty, and the relationship between religion and science, to name but a few.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1030, PHIL*1050)

**Department(s):** Department of Philosophy

### PHIL*2170 Existentialism F (3-0) [0.50]

Existentialism is a philosophy built around the experience of human freedom. This course focuses on the character of the subject who makes choices, and on the personal and political responsibilities that attach to the making of decisions. The course will examine this and other themes associated with Existentialism through nineteenth and twentieth century representative works, which include Kierkegaard, Sartre, de Beauvoir, Camus, and others.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

### PHIL*2180 Philosophy of Science F (3-0) [0.50]

As a system of knowledge pursuit, science develops laws and theories to explain, predict, understand, and control empirical phenomena. This course introduces students to many of the challenging assumptions, foundations, and implications of science. Topics include the nature of scientific knowledge, the structure of scientific theories, the distinction between science and pseudo-science, whether there is a scientific method, and how social and political processes influence the way science develops.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

### PHIL*2240 Knowledge and Belief F (3-0) [0.50]

This course is an introduction to epistemology, which is the study of the nature, scope, and limits of knowledge. This course will examine a number of the central questions in epistemology, such as: what can we know? What is the nature of knowledge? And what is the difference between knowledge and true belief?

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1030, PHIL*1050)

**Equivalents:** PHIL*2250

**Department(s):** Department of Philosophy

### PHIL*2280 Key Concepts in Political Philosophy F (3-0) [0.50]

This course presents an in-depth treatment of one or more key concepts in political philosophy. Among the many possible concepts that the course may address are those of freedom, equality, power, community, identity, autonomy, justice, rights, political obligation, representation, authority, legitimacy, exploitation, emancipation, and development. These concepts may be explored historically or through contemporary political and/or philosophical debates.

**Prerequisite(s):** 0.50 credits in either Philosophy or Political Science

**Restriction(s):** POLS*2000

**Department(s):** Department of Philosophy

### PHIL*2370 Metaphysics and Mind W (3-0) [0.50]

This course studies major theories of the nature of reality, and of issues and problems that arise in the investigation of fundamental features of the world. Texts read may be either historical or contemporary. Among possible topics explored in the course are materialism, free will, and determinism, the nature of time, and the position of consciousness in the world.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1030, PHIL*1050)

**Department(s):** Department of Philosophy

### PHIL*2600 Business and Professional Ethics W (3-0) [0.50]

This course examines ethical and evaluative issues relating to business and professional practices, and is intended for students registered in a science or professional program, but without a background in philosophy. Topics to be explored include the nature of values and ethical systems, duties and rights, private and public goods, the consumer movement, social marketing, corporate social accounting, private right and professional responsibility.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

### PHIL*3040 Philosophy of Law F (3-0) [0.50]

This course is an introduction to the main topics in the philosophy of law. It aims to give students a philosophical grounding in such issues as the purpose and nature of law, the relationship between law and individual freedom and the question of international law. Thinkers studied may include St. Thomas Aquinas, John Stuart Mill and H.L.A. Hart. The course may also include an examination of the way in which controversial ethical and social issues are treated under the Canadian Charter of Rights and Freedoms.

**Prerequisite(s):** 1.50 credits in Philosophy or 7.50 credits or PHIL*2120

**Department(s):** Department of Philosophy

### PHIL*3050 Philosophy of Art W (3-0) [0.50]

This course considers various philosophical questions concerning art such as the nature of a work of art, the nature of beauty, the relationship between the artist and the audience, the task of the art critic, the social function of art.

**Offering(s):** Also offered through Distance Education format. Offered in even-numbered years.

**Prerequisite(s):** 1.50 credits in Philosophy or 7.50 credits

**Department(s):** Department of Philosophy

### PHIL*3060 Medieval Philosophy W (3-0) [0.50]

An overview of philosophical thought of the Middle Ages, that is, roughly of the period between 500 AD and 1500 AD. The course will focus on several themes from the Christian, Jewish and Islamic traditions to show that many of the philosophical concerns of the present day were also of concern to thinkers of the period. In particular, we will look at the relationship between knowledge and belief, the nature of human happiness, the question of whether God exists and, if so, whether his existence can be rationally demonstrated, and the problem of free will, among others. Thinkers to be discussed will generally include St. Augustine (354-430), St. Anselm (1033-1109), al-Farabi (ca. 850-ca. 950), Maimonides (1135-1204) and St. Thomas Aquinas (1224/25-1274).

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 1.50 credits in Philosophy or 7.50 credits

**Department(s):** Department of Philosophy

### PHIL*3100 Kant and His Legacy W (3-0) [0.50]

This course offers an in-depth study of the philosophy of Immanuel Kant, one of the most influential figures in the history of philosophy. The course will include study of one or more of his major works. Kant’s works may be studied on their own, or in conjunction with the study of works of later philosophers who were significantly influenced by Kant’s philosophical ideas.

**Prerequisite(s):** 1.50 credits in Philosophy or 7.50 credits

**Restriction(s):** PHIL*3080, PHIL*3090

**Department(s):** Department of Philosophy

### PHIL*3160 Metaphysics W (3-0) [0.50]

A common way of thinking of the world is that it consists of objects with properties that persist through time while changing in different ways. Yet there are deep puzzles about each of these basic, seemingly indespensible concepts. What does it take to be an object? How much can an object change without becoming a different object? Are some of an object’s properties essential to it? Metaphysics is the business of proposing and debating answers to these questions and related questions. This course introduces students to these debates.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 1.50 credits in Philosophy or 7.50 credits

**Department(s):** Department of Philosophy

### PHIL*3170 Topics in the Philosophy of Science W (3-0) [0.50]

This course studies specialized questions about science within a broad intellectual and social context. Contested issues regarding the nature of science, its aims and methods, and science’s relation to society will be critically examined. Past offerings of the course have examined such topics as realism and antirealism, naturalized explanations, the unity/diversity of science, and feminist approaches to science.

**Prerequisite(s):** 1 of (1.50 credits in Philosophy, 7.50 credits, PHIL*2180)

**Department(s):** Department of Philosophy

### PHIL*3180 Philosophy of Mind F (3-0) [0.50]

This course is a survey of central issues and positions in contemporary philosophy of mind. Topics may include: the nature of the mind and its relation with the brain; the puzzle of conscious experience; and the problem of mental content.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 1.50 credits in Philosophy or 7.50 credits

**Department(s):** Department of Philosophy
XII. Course Descriptions, Philosophy

PHIL*3190 Epistemology F (3-0) [0.50]
This course is an advanced introduction to the central issues in epistemology, such as the nature of knowledge and how it differs from mere true belief. Possible topics include skepticism, theories of justification and rationality, self-knowledge and the sources of belief.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3200 Continental Philosophy F (3-0) [0.50]
This course focuses on 20th century French and German philosophy and the influences that shaped it. The course will be part historical, part contemporary. The historical part may survey touchstones of current Continental thought in ancient and modern philosophy. The contemporary part of this course may focus on any of the hundred or so key figures in 20th or 21st century Continental thought, or groupings thereof according to particular thematic.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3210 Women in the History of Philosophy F (3-0) [0.50]
This course will examine selected works of women philosophers and their contributions to the major philosophical debates of their day. The philosophers covered may be drawn from any period in the history of philosophy, up to, and including, the 20th century and topics covered have ranged across feminist issues, epistemology, metaphysics, and ethics. Because texts and topics will vary with the instructor, students are advised to consult the departmental website.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3230 Theories of Justice W (3-0) [0.50]
This course will explore the relationship between human beings and language, and between language and the world. In particular, it may address such fundamental questions as: What is it about the way in which we use words that gives them the meanings they have? And what is the relationship between words and objects to which they refer? Authors studied may include representatives from the analytic and/or continental traditions in philosophy.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3250 Philosophy of Language F (3-0) [0.50]
This course will explore the relationship between human beings and language, and between language and the world. In particular, it may address such fundamental questions as: What is it about the way in which we use words that gives them the meanings they have? And what is the relationship between words and objects to which they refer? Authors studied may include representatives from the analytic and/or continental traditions in philosophy.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3260 Set Theory and Modal Logic U (3-0) [0.50]
Both set theory and modal logic are important tools in contemporary philosophy. Set theory is about relationships among collections of things. Modal logic elaborates the notions of necessity and possibility in formal models of different possible worlds. Students will explore these topics by producing and understanding informal proofs of important facts, and by doing exercises developing understanding of the semantics of modal logic.

Prerequisite(s): PHIL*2110
Restriction(s): PHIL*4110
Department(s): Department of Philosophy

PHIL*3280 21st Century Philosophy F (3-0) [0.50]
This course is an introduction to the most current philosophical texts and movements developed since the beginning of the 21st Century. Students will be taught to understand and work creatively with the most recent ideas in the discipline. Material covered will focus almost exclusively on the philosophical texts written in or after the year 2000.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3290 Advanced Ethical Theory F (3-0) [0.50]
This course focuses on the theoretical foundations of morality. Ethical theory comprises metaethics, which is primarily concerned with the objectivity of moral judgments; normative ethics, which is concerned with the principles of sound moral judgment, and moral psychology, which is concerned with moral motivation and moral reasoning.

Offering(s): First offering - Fall 2018
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3300 Democracy and Its Critics F (3-0) [0.50]
This course will review classical and contemporary positions on the nature and value of democracy, including arguments for and against it from a variety of stances in political philosophy. It will also examine the merits of competing models of democracy, issues dealing with limitations on majority rule in pluralistic societies, and the applicability of democracy in international contexts.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3350 Selected Topics in Philosophy U (3-0) [0.50]
The topics for this course will vary from one offering to the next, and will deal with material, such as Philosophy of History, Philosophy of Social Science and advanced Philosophy of Religion generally arising from the instructor's current research interests. This course gives students a chance to explore topics and texts not usually covered in other courses. Students are encouraged to consult the departmental website for course content and availability.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3360 Nineteenth Century Philosophy F (3-0) [0.50]
This course provides a survey of 19th century philosophy, a period of extreme change and upheaval, championed mainly by German thinkers. The course will engage with topics such as the nature of individual freedom; historical approaches to understanding concepts of reality and moral norms; proposed radical revisions to traditional moral and social order; and confronting the possible meaninglessness or absurdity of human life.

Offering(s): First offering - Fall 2018 Offered in even-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Restriction(s): PHIL*3080, PHIL*3090
Department(s): Department of Philosophy

PHIL*3410 Major Texts in the History of Philosophy W (3-0) [0.50]
This course will consider central and continuing philosophical issues through an exploration of primary texts in the history of philosophy. The readings and periods stressed will vary from year to year, but could cover significant and enduring texts from the ancient period right up to the 21st century. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department's website.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3450 Ethics in the Life Sciences W (3-0) [0.50]
This course is an advanced introduction to the ethical implications of values and practices guiding research in the life sciences. Fields of discussion may include ethics in health care, genetics and human reproduction, environmental sciences, agriculture, animal husbandry, animal welfare, and food technologies. Material covered will be drawn from current books and articles by philosophers in this rapidly expanding area.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits. PHIL*2120, PHIL*2180 are recommended.
Department(s): Department of Philosophy

PHIL*3710 Directed Reading F,W (3-0) [0.50]
This course is intended as an intensive course of reading chosen by the student in consultation with the faculty member.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*3910 Indian Philosophy F (3-0) [0.50]
This course provides an analysis of selected primary sources of Indian philosophy in translation, from the Vedic Upanishads to the"integral yoga" of Sri Aurobindo. Emphasis will be on the basic inspirational works of Hinduism and Buddhism, and their respective views on the ultimate nature of reality, the self, suffering, freedom, ignorance and enlightenment.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy
PHIL*3920 Chinese Philosophy W (3-0) [0.50]

This course analyzes selected primary sources of Chinese philosophy, in translation, from the 1 Ching to Mao Tse-tung. Emphasis will be on the foundational works of Confucianism, Taoism, Ch’an (or Zen) Buddhism, and Neo-Confucianism, concerning such issues as the ultimate nature of being, non-being and human destiny, proper government of the self, the family and society, and the principles and practice of enlightenment.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*4040 Advanced Philosophy of the Environment U (3-0) [0.50]

This course is an exploration in detail of central debates in environmental philosophy. Possible topics include: genetic modification of plants and animals, duties to future generations, obligations to distant global others, the ethics of encounters, animal welfare, trans-species communication, restoration and conservation projects, aesthetics, virtue ethics and stewardship.

Prerequisite(s): (PHIL*1010 or PHIL*2120), PHIL*2070
Department(s): Department of Philosophy

PHIL*4060 Philosophy of Feminism II U (3-0) [0.50]

This course is an advanced study of problems in feminist philosophy. The course may cover specific topics or the work of one or more feminist philosophers. Topics may be drawn from feminist ethics, epistemology, and/or postmodernism. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department's website.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or PHIL*2060
Department(s): Department of Philosophy

PHIL*4120 Current Debates in Language and Mind U (3-0) [0.50]

Each offering of this course will focus on a specific issue or set of related issues that are now being debated in Philosophy of mind and Philosophy of language. Readings will be contemporary works.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4130 Current Debates in Continental Philosophy U (3-0) [0.50]

Each offering of this course will focus on close study of either one or two figures of contemporary relevance in discussions of Continental European philosophy, or a specific issue or set of related issues that are now being debated in that field.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4140 Current Debates in Philosophy of Science U (3-0) [0.50]

Each offering of this course will focus on a specific issue or set of related issues that are now being debated in Philosophy of Science. Readings will be contemporary works.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4160 Philosophy Field Course F (3-0) [1.00]

This variable content course addresses an issue which is relevant to the contemporary world from a range of philosophical perspectives. The course is built on research into the issue, including material gathered during a 1-2 week field trip which is held in the summer immediately preceding the semester in which the student takes the course. The field trip is a mandatory component of the course, one for which the student assumes the costs of transportation, food and lodging.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 13.00 credits and a minimum cumulative average of 70%.
Restriction(s): Restricted to students in Philosophy major or minor. Instructor consent required.
Department(s): Department of Philosophy

PHIL*4230 Current Debates in Social and Political Philosophy U (3-0) [0.50]

This is an advanced level course that examines in detail selected historical or contemporary treatments of specific issues in social and political philosophy.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4310 Applied Ethics U (3-0) [0.50]

An advanced study of specific problems in applied ethics. This is an intensive course designed for philosophy majors as well as for seventh and eighth semester students who have had no previous philosophy course.

Department(s): Department of Philosophy

PHIL*4340 Current Debates in Ethics U (3-0) [0.50]

This course offers an advanced study of problems in ethical theory. This course will examine contemporary and perennial issues in ethics through recent or historical texts. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department's website.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4360 Current Debates in Epistemology U (3-0) [0.50]

An examination of central problems concerning the nature of knowledge. In some offerings the selection will emphasize problems in the Philosophy of Language.

Prerequisite(s): 1 of (1.00 credits in Philosophy at the 3000 level, 12.50 credits, PHIL*3190)
Department(s): Department of Philosophy

PHIL*4370 Current Debates in Metaphysics U (3-0) [0.50]

An advanced study of problems concerning the nature of reality.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4410 Major Texts in Philosophy U (3-0) [0.50]

Advanced study of a major text in philosophy not treated in either PHIL*4400 or PHIL*4420.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level
Department(s): Department of Philosophy

PHIL*4420 Major Texts in Philosophy U (3-0) [0.50]

Advanced study of a major text in philosophy not treated in either PHIL*4400 or PHIL*4410.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level
Department(s): Department of Philosophy

PHIL*4710 Directed Reading F,W (3-0) [0.50]

This course is intended as an intensive course of reading chosen by the student in consultation with the faculty member.

Prerequisite(s): 1.00 credits in Philosophy at the 3000-level
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*4720 Directed Reading F,W (3-0) [0.50]

This course is intended as an intensive course of reading chosen by the student in consultation with the faculty member.

Prerequisite(s): 1.00 credits in Philosophy at the 3000-level
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*4800 Honours Philosophy Research Paper I U (3-0) [0.50]

The preparation of a major research paper under the supervision of a faculty member. Normally open only to 7th semester honours philosophy students.

Prerequisite(s): 1.00 credits in Philosophy at the 3000 level
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*4820 Philosophy Research Presentation F,W (3-0) [0.50]

The focus of this course is mastering the oral presentation of a philosophical argument, and engaging in respectful, intellectually honest discussion with one's audience. Students will develop and present a philosophical claim which they will explain and defend during a question period after the presentation. Students are expected to have topic for their presentation at the beginning of the course.

Prerequisite(s): 14.00 credits including 1.00 credits in Philosophy at the 3000-level
Restriction(s): Restricted to students in Philosophy major.
Department(s): Department of Philosophy
XII. Course Descriptions, Physics

Physics

Department of Physics

PHYS*1010 Introductory Electricity and Magnetism W (3-3) [0.50]
This is a course for engineering and physical science students on the phenomena of electromagnetism and introductory DC circuit analysis. Topics include electric charges and fields, electric potential and current, electric resistance, capacitance, inductance, magnetic fields, electric circuits, Ohm's Law, and application of Kirchhoff's Laws to node and mesh analysis of DC circuits. The course will conclude with an introduction to AC circuits.
Prerequisite(s): (1 of MATH*1080, MATH*1200), (4U Physics or equivalent )
Restriction(s): IPS*1510
Department(s): Department of Physics

PHYS*1070 Physics for Life Sciences II W (3-3) [0.50]
This course discusses physics of matter and energy at the macroscopic and microscopic levels, with special emphasis on topics of importance to the biological sciences. Topics include properties of waves, acoustics and hearing, optical systems and vision, quantum nature of radiation and its interaction with biomolecules, electricity, high energy radiation and radioactivity.
Prerequisite(s): (4U Physics or PHYS*1020 ), 4U Mathematics
Restriction(s): IPS*1510, PHYS*1130, PHYS*1300. This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Physics

PHYS*1080 Physics for Life Sciences F,W (3-3) [0.50]
This course discusses aspects of classical physics with particular emphasis on topics of importance in the biological and environmental sciences. Topics include mechanics and applications to anatomical problems, fluid statics and dynamics, molecular motion, diffusion, osmosis, and heat.
Prerequisite(s): (1 of 4U Physics, PHYS*1020 , PHYS*1300 ), 4U Mathematics
Restriction(s): IPS*1500, PHYS*1000 . This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Physics

PHYS*1130 Physics with Applications F (3-1) [0.50]
This is an introductory course for engineering students. Topics include measurement and error analysis, translational and rotational kinematics and dynamics, simple harmonic motion, waves, acoustics, and optics, with an emphasis on relevant applications of these physical concepts. The course will conclude with an introduction to quantum phenomena.
Prerequisite(s): (4U Calculus and Vectors or equivalent), (4U Physics or equivalent)
Restriction(s): IPS*1510, PHYS*1070
Department(s): Department of Physics

PHYS*1300 Fundamentals of Physics F (3-3) [0.50]
This course introduces students to fundamental phenomena in physics, with particular emphasis on applications to the biological sciences. Topics include: analyzing one-dimensional and two-dimensional motion; Newton’s laws; momentum, energy and associated conservation laws; interactions between charges, resistive direct-current circuits; the fundamentals of waves, with applications to acoustics; ionizing radiation, radioactivity and medical applications. This course is designed for students who have not completed 4U Physics (or equivalent): students with credit in 4U Physics (or equivalent) may not take this course for credit.
Restriction(s): SPIH 4U (or equivalent) PHYS*1020 PHYS*1070. This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Physics

PHYS*1600 Contemporary Astronomy F (3-0) [0.50]
This course is designed for non-science students. Emphasis will be on the interdisciplinary and contemporary aspects of astronomy with the object of providing a perspective of our place in the physical universe. Topics will include the solar system, stars and stellar evolution, pulsars, black holes, quasars and cosmology. Students are encouraged to suggest and participate in discussion on items of special interest.
Offering(s): Offered through Distance Education format only.
Restriction(s): Students with standing in any other 1000 level course credit in physics (except PHYS*1020 or PHYS*1300, PHYS*1810)) may not use this course for credit. B.Sc. students may not take this course for credit.
Department(s): Department of Physics

PHYS*1810 Physics of Music F (3-0) [0.50]
This course is designed for arts and social science students with an interest or background in music. The fundamentals of vibrations and waves will be introduced and applied to a study of archetypal instruments. The psychoacoustic basis of pitch and loudness will be discussed.
Offering(s): Offered in even-numbered years.
Equate(s): MUSC*1090
Restriction(s): Students who have standing in any 1000 level physics course, (except PHYS*1300 or PHYS*1600) may enrol in this course only if they are completing an honours or general B.A. program in Music. In this case, permission of the instructor is required.
Department(s): Department of Physics

PHYS*2030 Biophysics of Excitable Cells W (3-1) [0.50]
An intermediate biophysics course with special emphasis on the physical properties of nerve cells and of biological transducers such as the ear and the eye.
Prerequisite(s): 1.00 credits in physics (excluding PHYS*1020 , PHYS*1600, PHYS*1810)
Department(s): Department of Physics

PHYS*2180 Experimental Techniques in Physics W (3-3) [0.50]
This course is designed to aid students in the development of core practical skills in physics. Students will be required to conduct a series of experiments exploring fundamental concepts in mechanics, electricity & magnetism, thermal physics, as well as the experimental basis of quantum physics. There will be a strong emphasis on data and error analysis with a variety of software applications.
Prerequisite(s): PHYS*2330
Department(s): Department of Physics

PHYS*2240 Thermal Physics F (3-0) [0.50]
This course will introduce students to the basic ideas of thermal physics, including temperature, heat, work, thermal and diffusive equilibrium, and the Boltzmann distribution. The statistical basis for entropy and for thermodynamics will be discussed. Applications of thermodynamics to both non-interacting and interacting systems will be presented.
Prerequisite(s): (1 of IPS*1510, MATH*1210, MATH*2080 , (IPS*1500 or PHYS*1080))
Restriction(s): CHEM*2820
Department(s): Department of Physics

PHYS*2310 Mechanics W (4-0) [0.50]
This course continues building the foundation in mechanics begun in the first year. Topics include, one, two and three dimensional motion, damped and forced harmonic oscillator, gravitation and orbital motion, special relativity, noninertial reference frames, and rigid body dynamics.
Prerequisite(s): MATH*2270, (1 of IPS*1500, PHYS*1000 , PHYS*1080)
Restriction(s): PHYS*2480
Department(s): Department of Physics

PHYS*2320 Electricity and Magnetism I F (4-0) [0.50]
This course continues building the foundation in electricity and magnetism begun in the first year and is intended for students proceeding to advanced studies in the physical sciences. Topics include vector calculus, electric fields, potential, electric work and energy, Gauss’s Law, Poisson’s and Laplace’s equations, capacitors, D.C. circuits, transients and dielectric materials.
Prerequisite(s): IPS*1510 or [MATH*1210 or MATH*2080 ), (1 of PHYS*1010, PHYS*1070, PHYS*1130)]
Restriction(s): PHYS*2460
Department(s): Department of Physics

PHYS*2340 Electricity and Magnetism II W (4-0) [0.50]
This course is a continuation of PHYS*2330. Topics include magnetic fields and forces, the Biot-Savart equation, Ampere's Law, magnetic induction, LRC transients, A.C. circuits and magnetic materials.
Prerequisite(s): PHYS*2330
Restriction(s): PHYS*2470
Department(s): Department of Physics

PHYS*2600 General Astronomy F (4-1) [0.50]
An introduction to astronomy, this course covers the solar system, the sun, stellar and galactic structure.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): IPS*1500 or (1 of PHYS*1010, PHYS*1070, PHYS*1080, PHYS*1130, PHYS*1300), (1 of MATH*1030, MATH*1080, MATH*1160, MATH*1200)
Department(s): Department of Physics
PHYS*3000 Optics: Fundamentals and Applications W (3-0) [0.50]
This course will introduce students to the fundamental principles of wave and geometric optics, with an emphasis on applications. Topics will include reflection, refraction, diffraction, interference, and polarization, as well as fibre optics, imaging systems and lasers.
Prerequisite(s): PHYS*2340, PHYS*3130
Restriction(s): PHYS*3220
Department(s): Department of Physics

PHYS*3080 Energy W (3-0) [0.50]
This course covers energy resources and the production, transmission, interconversion, consumption and waste of energy in the industrial society. Emphasis is placed on environmental impact and human safety. Topics include fossil fuels, nuclear fission and fusion, wind and solar power, the hydrogen economy, and conservation strategies.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): (IPS*1500 or PHYS*1080), (1 of MATH*1000, MATH*1080, MATH*1200), (1 of IPS*1510, PHYS*1010, PHYS*1070, PHYS*1130, PHYS*1300)
Department(s): Department of Physics

PHYS*3130 Mathematical Physics F (3-0) [0.50]
This course covers a number of mathematical techniques that are required in all areas of physics. Curvilinear coordinates, special functions, Fourier series and integral transforms, Green’s functions, and a number of advanced topics will be discussed. The course emphasizes the application of these techniques to solve a variety of physics problems, providing context to the fundamental tools of the discipline.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160, MATH*2200, MATH*2270, PHYS*2310, PHYS*2340)
Department(s): Department of Physics

PHYS*3170 Radioactivity and Radiation Interactions F (3-0) [0.50]
This course will provide a fundamental understanding of radiation physics and dosimetry, as well as assist students in the development of their problem solving skills in this field. Topics will include: atomic and nuclear structure, radioactivity, interaction of radiation with matter, radiobiology, radiation dosimetry, and external radiation protection. Throughout the course, applications of radiation physics in medicine will be highlighted.
Prerequisite(s): (1 of IPS*1510, MATH*1210, MATH*2080), ( MATH*2170 or MATH*2270)
Department(s): Department of Physics

PHYS*3250 Quantum Mechanics I F (4-0) [0.50]
This course consists of a formal treatment of quantum mechanics. Topics include wave packets and free particle motion, the Schrodinger equation, harmonic oscillator, piecewise constant potentials, central forces and angular momentum, and the hydrogen atom.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), ( MATH*2170 or MATH*2270), (PHYS*2340 or PHYS*2470)
Department(s): Department of Physics

PHYS*3400 Advanced Mechanics F (3-0) [0.50]
This course covers Lagrangian mechanics and Hamiltonian mechanics. Topics include least action principles, Poisson brackets, Liouville's theorem, Hamilton- Jacobi theory, the transition to quantum mechanics and introduction to non-linear dynamics.
Prerequisite(s): (MATH*2170 or MATH*2270), (PHYS*2310 or PHYS*2440)
Department(s): Department of Physics

PHYS*3510 Intermediate Laboratory F,W (0-6) [0.50]
This modular course consists of experiments in modern and classical physics. Modules include laboratory instrumentation employing computers, modern physics, waves and optics, molecular physics, biophysics, and solid state physics.
Prerequisite(s): PHYS*2180 or (NANO*2100, PHYS*2310)
Department(s): Department of Physics

PHYS*4001 Research in Physics F (0-6) [0.50]
This course is the first part of the two-semester course PHYS*4001/2. Refer to PHYS*4001/2 for the course description.
Prerequisite(s): PHYS*3510
Restriction(s): PHYS*4510. Instructor consent required.
Department(s): Department of Physics

PHYS*4001/2 Research in Physics F-W (0-6) [1.00]
This is a two-semester (F-W) course in which students apply their knowledge and skills through independent research of an experimental or theoretical nature within physics. Students will be required to present their results in both oral and written reports. Students must make arrangements with a faculty supervisor and obtain approval of the course co-ordinator before course selection. Approval of the course co-ordinator will only be granted upon receipt of a completed registration form, available from the co-ordinator during the course selection period. This is a two-semester course offered over consecutive semesters. When you select it, you must select PHYS*4001 in the Fall semester and PHYS*4002 in the Winter semester. A grade will not be assigned to PHYS*4001 until PHYS*4002 has been completed.
Prerequisite(s): PHYS*3510
Restriction(s): PHYS*4510. Instructor consent required.
Department(s): Department of Physics

PHYS*4002 Research in Physics W (0-6) [0.50]
This course is the second part of the two-semester course PHYS*4001/2. Refer to PHYS*4001/2 for the course description.
Prerequisite(s): PHYS*4001
Department(s): Department of Physics

PHYS*4040 Quantum Mechanics II W (3-0) [0.50]
This is a second course in quantum mechanics. Topics include spin and two-level systems, quantum systems of multiple particles, quantum description of fermions and bosons, time-independent perturbation theory, and the fine structure of hydrogen.
Prerequisite(s): PHYS*3230
Department(s): Department of Physics

PHYS*4070 Clinical Applications of Physics in Medicine W (3-0) [0.50]
This course provides an overview of the application of physics to medicine. The physical concepts underlying the diagnosis and treatment of disease will be explored. Topics will include general imaging principles such as resolution, intensity, and contrast; x-ray imaging and computed tomography; radiotopes and nuclear medicine, SPECT and PET; magnetic resonance imaging; ultrasound imaging and radiation therapy.
Prerequisite(s): PHYS*3170
Restriction(s): PHYS*4560
Department(s): Department of Physics

PHYS*4120 Atomic and Molecular Physics F (3-0) [0.50]
The application of quantum theory to atomic and molecular structure, and the interaction between electromagnetic radiation and atoms and simple molecules.
Prerequisite(s): PHYS*4040
Department(s): Department of Physics

PHYS*4130 Subatomic Physics W (3-0) [0.50]
This course surveys the field of subatomic physics from radioactive emanations to conjectured subunits of nucleons. Topics include quark models; strong, electromagnetic and weak interactions; isospin, strangeness, conservation laws and symmetry principles; systematics of nuclear properties, nuclear radioactivity, nuclear models and reactions.
Prerequisite(s): PHYS*4040
Department(s): Department of Physics

PHYS*4150 Solid State Physics W (3-0) [0.50]
The topics covered in this course include: bonding in solids, thermal and electrical properties of solids, energy bands, imperfections in solids, properties of semiconductors and insulators.
Prerequisite(s): PHYS*4040, PHYS*4240
Department(s): Department of Physics

PHYS*4180 Advanced Electromagnetic Theory F (3-0) [0.50]
This course covers Maxwell's equation, Lorentz-force law, conservation of charge, and conservation of energy (Poynting's theorem). In addition, the course will discuss potentials, gauge transformations, wave equations, and multipole expansions as well as Green's functions for the Poisson and wave equations. Additional topics include electrostatics and magnetostatics (including boundary-value problems), motion of charged particles in electromagnetic fields, and propagation and generation of electromagnetic waves.
Prerequisite(s): (PHYS*2340 or PHYS*2470)
Department(s): Department of Physics

PHYS*4240 Statistical Physics II F (3-0) [0.50]
A continuation of PHYS*2240 including a discussion of the grand canonical distribution, quantum statistics, and transport theory.
Prerequisite(s): (PHYS*2240 or PHYS*3240), PHYS*3230
Department(s): Department of Physics

Physiology

Department of Biomedical Sciences

For course listings and descriptions see Biomedical Sciences.

Additional course listings may be found in the course descriptions for Veterinary Medicine and Human Kinetics.
# Plant Biology

**School of Environmental Sciences**

**Department of Plant Agriculture**

## PBIO*3110 Crop Physiology W (3-3) [0.50]

This course examines the physiological basis of crop yield determination, with emphasis on phenomena that express themselves at the whole canopy (rather than single plant) level of organization. It covers canopy scale measurements of crop growth, development, and solar radiation capture; photosynthesis, beginning at the level of biochemistry and working up to the whole canopy scale; how photoassimilates are used in the processes of respiration, growth and yield formation; and crop - environment interactions, including water stress, nutrient uptake and utilization, and light quality effects on photomorphogenesis.

**Prerequisite(s):** 1 of BIOL*1050, BIOL*1070, BIOL*1090  
**Department(s):** Department of Plant Agriculture

## PBIO*3750 Plant Tissue Culture F (2-3) [0.50]

This course examines and discusses the principles, protocols and utilization of plant cell tissue culture systems. In vitro propagation and regeneration, mutagenesis and selection, secondary metabolite elicitation and cell transformation techniques including protoplast fusion, direct DNA uptake and plant bacterial co-cultivation will be emphasized.

**Prerequisite(s):** AGR*2470 or BOT*2100  
**Department(s):** Department of Plant Agriculture

## PBIO*4000 Molecular and Cellular Aspects of Plant-Microbe Interactions F (3-0) [0.50]

This course examines molecular and cellular aspects of the interaction between plants and microorganisms such as mycorrhizae, pathogenic fungi, Agrobacterium, pathogenic bacteria, and plant viruses. Topics include microbial virulence, signaling, gene expression, and disease resistance in plants.

**Prerequisite(s):** 1 of BOT*2100, MICR*2030, (BIOL*1070, BIOL*1090, MBG*2040)  
**Department(s):** School of Environmental Sciences

## PBIO*4070 Biological and Cultural Control of Plant Diseases W (3-0) [0.50]

This course examines current concepts and approaches to managing plant pathogens and diseases in crops and natural plant communities by measures that have minimal impact on the environment. Topics include naturally-occurring biological control such as suppressive soils and induced host resistance, use of microbial agents and their modes of action, transgenic disease resistance, use of organic soil amendments and mulches to promote microbial diversity and suppress pathogens, and effects of sanitation, crop sequences, tillage, flooding, soil solarization and other cultural practices on microbial communities, including pathogens and on disease epidemics.

**Prerequisite(s):** 1 of ENVB*3210, ENVS*3210, MICR*3090, MICR*3220  
**Equate(s):** ENVB*4070  
**Department(s):** Department of Plant Agriculture

## PBIO*4150 Molecular and Cellular Aspects of Plant Development W (3-0) [0.50]

This course explores current concepts and approaches to managing plant pathogens and diseases in crops and natural plant communities by measures that have minimal impact on the environment. Topics include naturally-occurring biological control such as suppressive soils and induced host resistance, use of microbial agents and their modes of action, transgenic disease resistance, use of organic soil amendments and mulches to promote microbial diversity and suppress pathogens, and effects of sanitation, crop sequences, tillage, flooding, soil solarization and other cultural practices on microbial communities, including pathogens and on disease epidemics.

**Offering(s):** Offered in even-numbered years.  
**Prerequisite(s):** (AGR*2470 or BOT*2100), (MBG*2040 or MBG*2400)  
**Department(s):** Department of Plant Agriculture

## PBIO*4290 Cannabis Production W (3-0) [0.50]

This course covers the essential biology and biochemistry of cannabis (Cannabis sativa), as well as the science and technologies of propagation, cultural management and production, postharvest storage and processing of the plant, and the potential environmental impacts and related remediation technologies. It will also discuss the history of cultivation and uses of the plant, and current legislation of cannabis production and consumption in different cultures/countries. Students will learn through lectures (including guest lectures), hands-on laboratory practices, site visits, literature research and presentations, and group discussions.

**Prerequisite(s):** 14.50 credits including CHEM*1040, ENVS*3300, (ENVS*2040 or ENVS*3210)  
**Department(s):** Department of Plant Agriculture

## PBIO*4530 Plants and Environmental Pollution W (3-0) [0.50]

This course analyzes the environmental pollution effects on physiological and ecological processes of plants, in both managed and unmanaged ecosystems. Pollutants under study include contaminants of air (such as ozone, sulphur dioxide, NOx) and soil (such as metals). This course also covers how to use plants to improve air (both indoor and outdoor), water and soil environment. The format includes both lecture and presentation/discussion of current and historical peer-reviewed literature.

**Prerequisite(s):** (1 of BIOL*2060, BOT*2100, ENVM*1200, ENVS*2040, ENVS*2330, PBIO*3110), CHEM*1040  
**Department(s):** School of Environmental Sciences

## PBIO*4750 Genetic Engineering of Plants W (3-3) [0.50]

This course provides an examination and discussion of the principles, protocols and applications of molecular biology and transformation technology to the genetic improvements of plants.

**Prerequisite(s):** (AGR*2470 or BOT*2100), (MBG*2040 or MBG*2400)  
**Department(s):** Department of Plant Agriculture
Political Science

Department of Political Science

For courses without semester designations, please check with the department. Advance schedules are available in the department.

The department works in cooperation with the department of Political Science at the University of Waterloo to offer courses via the video link classroom. These courses are identified by the designation LINK in their course description. Further information can be obtained from the department.

POLS*1150 Understanding Politics F,W (3-1) [0.50]

This is the recommended introductory course for students intending to pursue a specialization in Political Science. An introduction to the basic concepts of politics, such as liberty, equality, social justice, constitutionalism, sovereignty, federalism, parliamentary versus presidential government. The course will emphasize the meaning and use of these terms within Canada in the context of other political systems.

Restriction(s): POLS*1000, POLS*1300
Department(s): Department of Political Science

POLS*1400 Issues in Canadian Politics F (3-0) [0.50]

Through the lens of contemporary political issues, this course will examine the pillars of the Canadian political system - Parliamentary government, federalism and the Charter of Rights and Freedoms - and how they reflect and affect the distinctly Canadian societal cleavages: linguistic, regional, ethnic, national, and sexual. Students will develop an awareness and understanding of these concepts, institutions and processes, which will enhance their ability to interpret current political events and provide a foundation upon which to explore Canadian politics, identity, public policy and governance in upper level political science courses.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Political Science

POLS*1500 World Politics F (3-0) [0.50]

An examination of the fundamental patterns of international politics, focusing especially on the major issues and contemporary events at the root of international conflict. As well, the reality of globalization and interdependence is assessed in terms of the alternative patterns of international cooperation in the contemporary world.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Political Science

POLS*2000 Political Theory F (3-0) [0.50]

A study of the philosophic and ideological developments which have led to the emergence of the modern state and contemporary politics.

Offering(s): Offered through Distance Education format only.
Restriction(s): PHIL*2280
Department(s): Department of Political Science

POLS*2080 Development and Underdevelopment F (3-0) [0.50]

An examination of the politics of development, distribution and conflict in Africa, Asia, the Middle East and the Americas from a comparative and international perspective.

Department(s): Department of Political Science

POLS*2100 Comparative Politics W (3-0) [0.50]

An examination of the evolution, purposes, structures and functions of the state in relation to the economy and civil society.

Department(s): Department of Political Science

POLS*2150 Gender and Politics W (3-0) [0.50]

This course introduces students to competing approaches to gender and politics. Students will examine the interrelationship of gender, politics and the state, focusing on its implications for political mobilization, representation and participation, public policy, global gender issues in international relations, and cultural and regional differences in gender politics. The course provides the student with the conceptual and analytical tools for upper-year courses on politics and gender, sexuality and politics in particular.

Department(s): Department of Political Science

POLS*2200 International Relations F (3-0) [0.50]

An introduction to basic theories and concepts in the study of international relations, including an analysis of power, national interest, security, survival, nationalism, sovereignty, decision-making, interdependence, integration, and transnationalism.

Department(s): Department of Political Science

POLS*2250 Public Administration and Governance W (3-0) [0.50]

The course explores, from both practical and theoretical perspectives, planning and implementation of programs and services through government departments and agencies and "alternative" processes and structures, sometimes involving non-governmental actors. The course critically evaluates the changing role of bureaucracy; financial and human resource management; and the evolving concepts of responsibility and accountability.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): POLS*1150 or POLS*1400
Department(s): Department of Political Science

POLS*2300 Canadian Government and Politics F,W (3-0) [0.50]

This course explores the core institutions of Canadian government, including parliamentary government, federalism, the Charter of Rights and Freedoms and electoral systems. How these institutions shape and are shaped by political parties and social forces, as well as current issues like Quebec nationalism, identity politics and Aboriginal governance, are covered.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Political Science

POLS*2350 Law from a Political Science Perspective F (3-0) [0.50]

This course will consider law as both the output of political action and as the structure in which political action occurs. It will introduce students to core legal concepts, explore the impact of law on private and public actors, and help students develop legal research skills.

Prerequisite(s): POLS*1150 or POLS*1400
Department(s): Department of Political Science

POLS*2650 Political Inquiry and Research Methods F (3-0) [0.50]

This course offers an introduction to the principles of inquiry in political science. Students will study the crucial components of research and engage subjects such as theorization, research ethics, conceptualization, operationalization, research design, case selection, and both quantitative and qualitative methods of data collection.

Prerequisite(s): 4.00 credits including POLS*1150
Restriction(s): POLS*3180
Department(s): Department of Political Science

POLS*3000 Politics of Africa U (3-0) [0.50]

Africa in the 20th Century has been the scene of rapid political and economic change. This course analyzes African politics in the light of contemporary problems of development and modernization.

Prerequisite(s): 1 of IDEV*2000, POLS*2080, POLS*2100
Department(s): Department of Political Science

POLS*3050 Canadian Campaigns & Elections W (3-0) [0.50]

This course provides an introduction to the electoral process in Canada. It will explore factors that explain citizens’ vote choices and the strategies used by candidates and their campaigns to win these votes. The course integrates literature on the electoral system, campaign financing, political parties, political communication, and voting behaviour.

Prerequisite(s): POLS*1400 or POLS*2300
Department(s): Department of Political Science

POLS*3060 Politics of the Middle East and North Africa U (3-0) [0.50]

Students will examine the political dynamics of selected states and societies (e.g. Egypt, Syria, Saudi Arabia, Iran, Israel, Jordan and Algeria) in the Middle East and North Africa (MENA). Issues to be covered: the impact of early Middle Eastern/North African history upon today's politics; class structures in the MENA countries and their impact on politics; the rise of Arab nationalism; Zionism; the politics of oil; the status of women; the political impact of economic restructuring; Islamic movements; state-building; and political liberalization and democratization in the Middle East and North Africa.

Prerequisite(s): 1 of IDEV*2000, POLS*2080, POLS*2100
Department(s): Department of Political Science

POLS*3080 Politics of Latin America U (3-0) [0.50]

An exploration of Latin American politics from a multidimensional perspective. It analyzes the interaction among contemporary political structures, ideologies and processes in the context of socio-economic change.

Prerequisite(s): 1 of IDEV*2000, POLS*2080, POLS*2100
Department(s): Department of Political Science

POLS*3130 Law, Politics and Judicial Process U (3-0) [0.50]

This course emphasizes the study of the judicial system as a branch of government and highlights the interaction between the judiciary, law, the political process and public policy. Issues such as judicial selection and Charter of Rights decisions by courts will be explored. Comparisons with the judicial process in other countries will supplement the focus on the Canadian judicial process.

Prerequisite(s): 1 of POLS*2350, POLS*2250, POLS*2300
Department(s): Department of Political Science

2019-2020 Undergraduate Calendar

Last Revision: July 4, 2019
XII. Course Descriptions, Political Science

POLS*3140 Canadian Charter of Rights and Freedoms W (3-0) [0.50]
This course examines the legal and political effects of the Canadian Charter of Rights and Freedoms. Issues to be examined may include the Charter’s influence on Canadian political culture and identity, interest groups and social movements, the power of the courts, and public policy. Analysis of specific Charter sections and judicial decisions along with comparisons to other countries will be used to aid the analysis.
Prerequisite(s): POLS*2300 or POLS*2350
Department(s): Department of Political Science

POLS*3160 Global Gender Justice F (3-0) [0.50]
This course will introduce students to theories and concepts of gender justice and women’s political empowerment in the Global South, the Global North, and across borders. It will also examine selected topics and cases such as political representation, gender and culture, religion, nationalism, gender and disability, household authority, and reproductive rights.
Prerequisite(s): POLS*2080 or POLS*2100
Department(s): Department of Political Science

POLS*3210 The Constitution and Canadian Federalism S,W (3-0) [0.50]
Canada’s constitution and its federal system lie at the heart of the ongoing crisis facing the Canadian Confederation. This course examines the major features of our constitutional development, how the current system of intergovernmental relations has evolved, and the challenges posed by Canada’s cultural diversity, pressures for decentralisation, and the maintenance of national sovereignty.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): HIST*2600 or POLS*2300
Department(s): Department of Political Science

POLS*3230 Modern Political Thought W (3-0) [0.50]
This course explores the impact of modern science and technology, and its impact on the western tradition of justice from the seventeenth century to the twentieth century. It will explore this theme in writers such as Thomas Hobbes, Jonathan Swift, J-J Rousseau, Edmund Burke, Friedrich Nietzsche and George Grant. The exact selection of thinkers will vary from year to year and students are advised to check the course outline.
Prerequisite(s): POLS*2000 or POLS*2280
Restriction(s): POLS*3021
Department(s): Department of Political Science

POLS*3250 Public Policy: Challenges and Prospects F (3-0) [0.50]
This course covers the dominant theories that explain the origins and character of public policy in Canada, and other countries. The focus will be on both governmental and nongovernmental actors.
Prerequisite(s): POLS*1400 or POLS*2250
Department(s): Department of Political Science

POLS*3270 Local Government in Ontario U (3-0) [0.50]
Municipal governments are major spenders of public funds in Canada, and are also the level of government closest to the people. In this course, students will examine the major problems confronting urban government in Ontario.
Prerequisite(s): 7.50 credits
Department(s): Department of Political Science

POLS*3300 Governing Criminal Justice U (3-0) [0.50]
The course provides an overview of the policy process and outcomes of the Canadian criminal justice system. Particular emphasis is placed on examining, using various public policy and public management perspectives, the practices and interactions of governmental agencies within the system, such as police agencies and boards, departments of Justice, Solicitor-General, corrections and parole agencies, courts and the legal profession.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of POLS*2350, POLS*2250, POLS*2300
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*3320 Politics of Aid & Development F (3-0) [0.50]
This course examines the motivations and mechanisms by which industrialized states have designed and implemented foreign aid programs and policy, primarily since the end of the Second World War. Particular emphasis will be placed on the role of multilateral, bilateral and nongovernmental organizations in the delivery of development assistance and humanitarian relief.
Prerequisite(s): IDEV*2000 or POLS*2080
Department(s): Department of Political Science

POLS*3370 Environmental Politics and Governance S,F (3-0) [0.50]
This course examines environmental politics and governance in Canada as well as in comparative and international contexts. This is accomplished by surveying how various political, legal, administrative, and private-public actors and processes influence the development and implementation of environmental policy.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits
Department(s): Department of Political Science

POLS*3410 U.S. Politics and Government U (3-0) [0.50]
This course involves a treatment of the basic principles and institutions of national government and politics in the United States as well as the making and execution of public policy at the national and state levels.
Prerequisite(s): POLS*2100 or POLS*2300
Department(s): Department of Political Science

POLS*3440 Corruption, Scandal and Political Ethics U (3-0) [0.50]
This course will introduce students to the phenomenon of political corruption and the study of its incidence. Attention will be paid to historical examples, contemporary scandals, and analytical articles, dealing with the nature, causes and effects, and proposed cures of political corruption, and the ethical dilemmas inherent in political life.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 5.00 credits
Department(s): Department of Political Science

POLS*3450 European Governments and Politics F (3-0) [0.50]
Europe has forged a new form of political organization, the European Union, in addition to its variety of national democratic forms. This course offers a comparative examination of selected national governments, as well as an exploration of this new supra-national organization.
Prerequisite(s): 4.00 credits including 1 of EURO*1050, POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3470 Business-Government Relations in Canada U (3-0) [0.50]
The public and private sectors in Canada have become more and more interrelated in recent years as evidenced by tax and expenditure policies, the role of regulation and public enterprise, and the increasing emphasis on consultation and co-ordination. This course examines the evolving relationship between governments and the private sector in Canada, including business (both large and small), organized labour, specific sectors such as agriculture and consumer affairs and voluntary organizations.
Prerequisite(s): POLS*1400 or POLS*2250
Department(s): Department of Political Science

POLS*3490 Conflict and Conflict Resolution F (3-0) [0.50]
This course will examine the growing body of literature which considers violent conflict and its management. Materials are organized to reflect the trajectory of many contemporary conflicts: from explanations for violence, to identifying conditions and means to resolve conflict and, finally, to post-conflict governance.
Prerequisite(s): 1 of POLS*1500, POLS*2100, POLS*2200
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*3650 Quantitative Methods of Data Analysis W (3-0) [0.50]
This course examines quantitative research methods of data analysis used in political science. Students learn how to apply basic descriptive and inferential statistical procedures to research political problems and test hypotheses. In lab, students will acquire the skills to perform data analysis
Prerequisite(s): 1 of POLS*2650, POLS*3180, SOAN*2120
Restriction(s): Registration in Criminal Justice & Public Policy or Political Science (major, minor or area of concentration) or International Development (major only).
Department(s): Department of Political Science

POLS*3670 Comparative Public Policy and Administration W (3-0) [0.50]
This course examines the role of the bureaucracy in national development in various economic, social and political environments. The focus of the course is the interplay between bureaucracy, democracy and development in a comparative perspective.
Prerequisite(s): 1 of IDEV*2010, IDEV*2500, POLS*2080, POLS*2100, POLS*2250
Department(s): Department of Political Science
POLS*3710 Politics and Sexuality U (3-0) [0.50]
Sexuality is treated as a subject for political theory from a number of critical and interdisciplinary perspectives. The course examines the relationship between sexuality and politics by analyzing the dynamics of power in the context of sexuality.
Prerequisite(s): POLS*2000 or PHIL*2060
Department(s): Department of Political Science

POLS*3790 International Political Economy W (3-0) [0.50]
This course examines major features of the contemporary international political economy, treating major theories and concepts within this approach to international relations (hegemony, globalization, interdependence, world systems theory, etc.) and focusing on the operation of key international institutions and regimes (i.e. communications, trade and transport policy).
Prerequisite(s): 1 of IDEV*2000, IDEV*2010, IDEV*2500, POLS*2080, POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3850 Experiential Learning in Political Science U (3-0) [0.50]
This course allows students to reflect upon their involvement in some form of politically related activity, including simulations, volunteer programs, or internship work with government or non-government organizations. The student must find a faculty member from the Department of Political Science willing to act as a supervisor for the course. See the Political Science website for the learning contract and other requirements that must be completed in advance of registering for this course.
Prerequisite(s): Minimum of 10.00 credits, 2.00 of which must be in Political Science.
Restriction(s): Approval of the experience and evaluation criteria by the Undergraduate Committee of the Department of Political Science. Instructor consent required.
Department(s): Department of Political Science

POLS*3890 Government and Politics of India W (3-0) [0.50]
The course is designed to provide a survey of the history, society, culture, politics, government, bureaucracy and foreign relations of India.
Prerequisite(s): 1 of POLS*2080, POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3920 Politics of China F (3-0) [0.50]
This course is a detailed study of the political history of modern China and its current politics. The main objective is to assess the extent to which the Chinese Communist Party has fulfilled its mandate, which is to build a sovereign and united China as well as to modernize the country within a socialist framework.
Prerequisite(s): 1 of POLS*2080, POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3960 Selected Topics in Political Science S,F,W (3-0) [0.50]
Readings and research in selected areas of the discipline not covered by regular course offerings. Students present a proposal and seek approval from a member of the department in the semester previous to enrolment in this course. The method of course presentation, emphasis, and evaluation are at the discretion of the instructor.
Prerequisite(s): 1.50 credits at the 3000 level in Political Science or equivalent
Restriction(s): Instructor consent required.
Department(s): Department of Political Science

POLS*4030 Contemporary Political Theory U (3-0) [0.50]
This course provides an analysis of selected theories and political issues discussed by prominent 20th-Century thinkers. These contemporary works will be examined as part of the long tradition of political discourse dating back to the classical period.
Prerequisite(s): POLS*2000 and at least 1.00 credits at the 3000 level in the Political Thought stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4050 Advanced Topics in Law and Politics U (3-0) [1.00]
This course explores advanced topics in law and politics depending on the interests of the instructor. Potential topics include investigating the law and politics of social change or analyzing debates about the political power of courts in Canada or in comparative perspectives.
Prerequisite(s): POLS*3130, (0.50 credits at the 3000-level in the Law, Policy and Governance stream or the Comparative Politics stream).
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4060 Advanced Topics Lecture in Law and Politics F,W (3-0) [0.50]
This advanced lecture course explores topics in law and politics. Specific topics vary depending on the interests of the instructor. Potential topics include the relationship between law and social change, human rights, the relationship between law and power, judicial decision-making, and the relationship between law, class, gender, race, and sexuality.
Prerequisite(s): 1 of POLS*2350, POLS*3130, POLS*3140, POLS*3300
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4070 Courts and Parliament F,W (3-0) [1.00]
The course critically examines the complex relationship between the judiciary and representative institutions. By comparing the treatment of current political controversies (assisted suicide, prostitution, drug treatment), students will better appreciate the often-subtle exchanges between the two institutions and further enhance their research abilities in regards to both legal and legislative processes.
Prerequisite(s): 1 of POLS*2350, POLS*3130, POLS*3300
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4100 Women, Justice and Public Policy U (3-0) [1.00]
This course will use gender-based analysis in examining a series of justice and public policy issues affecting the lives of women, including equality rights, pay and employment equity, domestic violence, sexual assault, family policy, health care policy, and pornography. How do current policies that developed out of neoliberalism influence the lives of women in different ways than men? How can/should they be changed to recognize the different life experiences of women as distinguished from men? The primary focus of the topics covered in this course will be Canadian, although the experiences in other countries will be covered, particularly as it relates to "best practices," where appropriate.
Prerequisite(s): 2 of POLS*2250, POLS*2300, POLS*3250 and 1.00 credits in the Public Policy, Governance and Law or Canadian Politics.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4140 Conceptions of Canada W (3-0) [1.00]
This course will explore evolving conceptions of Canadian identity and nationalism through consideration of political culture, institutions and constitutional arrangements. Possible topics include: multiculturalism, Aboriginal identity and community, Quebec nationalism, social citizenship, rights and representation, as well as Canada's global role and significance.
Prerequisite(s): POLS*2300 and 1.00 credits at the 3000 level in the Canadian Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4150 Advanced Lecture in Conceptions of Canada W (3-0) [0.50]
This advanced lecture course will explore evolving conceptions of Canadian identity and nationalism through a consideration of political culture, institutions, and constitutional arrangements. Possible topics include: multiculturalism, Aboriginal identity and community, Quebec nationalism, social citizenship, rights and representation, as well as Canada's global role and significance.
Prerequisite(s): POLS*2300, (2 of HIST*3160, POLS*3050, POLS*3210, POLS*3270, POLS*3470)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science
POLS*4160 Multi-Level Governance in Canada U (3-0) [1.00]
This course considers the evolving relationship among levels of government in Canada. The growth of cities, the growth of policy responsibilities of provinces, the influence of international organizations, and the development of First Nations government in Canada all challenge the conventional study of federal-provincial relations in Canada. From year to year, this course examines one or several of these contemporary dynamics.
Prerequisite(s): POLS*2300 and 1.00 credits at the 3000 level in the Canadian Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4200 International Political Economy U (3-0) [1.00]
The course relies on theoretical approaches in IPE to examine relationships between politics and economics across national and regional levels. The evolution of the global political economy and its governance structures is explored, as well as contemporary debates about globalization and state and non-state actors’ responses. Issue-areas may include: money and power, technology, trade, development and the environment.
Prerequisite(s): (1 of POLS*2080, POLS*2100, POLS*2200); and at least 1.00 credits at the 3000 level in the International Relations and Global Studies stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4250 Topics in Public Management W (3-0) [1.00]
This course will examine various topics related to governance, such as public management reform, public sector leadership, third sector organizations or budgeting and human resources.
Prerequisite(s): POLS*2250 and 1.00 credits at the 3000 level in the Public Policy, Governance and Law stream or the Canadian Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4260 Topics in Public Policy U (3-0) [1.00]
This course will examine various public policy issues such as social policy or health care policy in a Canadian or comparative context.
Prerequisite(s): (2 of POLS*2250, POLS*2300, POLS*3250), 1.00 credits in the Public Policy, Governance and Law stream or the Canadian Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4270 Advanced Lecture in Public Management F (3-0) [0.50]
This advanced lecture course examines various topics related to governance, such as public management reform, public sector leadership, third sector organizations, or budgeting and human resources.
Prerequisite(s): POLS*2250, (2 of HIST*3160, POLS*3050, POLS*3130, POLS*3210, POLS*3250, POLS*3270, POLS*3300, POLS*3370, POLS*3440, POLS*3470, POLS*3670)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information. Students may not receive credit for both POLS*4250 and POLS*4270
Department(s): Department of Political Science

POLS*4280 Advanced Lecture in Public Policy W (3-0) [0.50]
The advanced lecture course will examine various public policy issues, such as social policy, health care policy, environmental policy, or economic policy in a Canadian or comparative context.
Prerequisite(s): (2 of POLS*2250, POLS*2300, POLS*3250), (2 of HIST*3160, POLS*3050, POLS*3130, POLS*3210, POLS*3270, POLS*3300, POLS*3370, POLS*3440, POLS*3470, POLS*3670)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information. Students may not receive credit for both POLS*4260 and POLS*4280
Department(s): Department of Political Science

POLS*4300 Human Rights, Ethics, and Development W (3-0) [1.00]
This course will examine the political and ethical consequences of adopting a human rights framework in national and international contexts by both state and non-state actors. This subject will be explored from a range of historical, theoretical and practical perspectives.
Prerequisite(s): (1 of POLS*2080, POLS*2100, POLS*2200), 1.00 credits at the 3000 level in Political Science.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4310 Advanced Lecture in Women, Justice and Public Policy F/W (3-0) [0.50]
This advanced lecture course will use gender-based analysis in examining a series of justice and public policy issues affecting the lives of women, including equality rights, pay and employment equity, domestic violence, sexual assault, family policy, health care policy and pornography. The primary focus of the topics covered in the course will be Canadian, although the experiences of women in other countries will be covered, particularly as it relates to "best practices" where appropriate.
Prerequisite(s): (2 of POLS*2250, POLS*2300, POLS*2350, POLS*3250), (2 of HIST*3160, POLS*3050, POLS*3130, POLS*3210, POLS*3270,POLS*3300, POLS*3370, POLS*3440, POLS*3470, POLS*3670)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information. Students may not receive credit for both POLS*4100 and POLS*4320
Department(s): Department of Political Science

POLS*4320 Advanced Lecture on Human Rights, Ethics and Development F (3-0) [0.50]
This advanced lecture course examines the political and ethical consequences of adopting a human rights framework in national and international contexts by both state and non-state actors. This subject will be explored from a range of historical, theoretical and practical perspectives.
Prerequisite(s): (1 of POLS*2080, POLS*2100, POLS*2200), 1.00 credits at the 3000 level in Political Science.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information. Students may not receive credit for both POLS*4300 and POLS*4320
Department(s): Department of Political Science

POLS*4340 Nationalism, State-building and Identity U (3-0) [1.00]
The course examines the role of nationalism in contemporary politics. Nationalism as such is understood as a major political force in state-building. Its impact on both global and national politics is assessed in relation to other forms of identity-based politics.
Prerequisite(s): (1 of POLS*2000, POLS*2100, POLS*2200), (0.50 credits at the 3000 level in the Comparative Politics stream or 0.50 credits at the 3000 level in the International Relations and Global Studies stream).
Department(s): Department of Political Science

POLS*4370 Topics in Comparative Politics U (3-0) [1.00]
This course considers theories and problems in comparative politics and government in developing and industrialized countries. The geographical and theoretical focus of the course will reflect the interests of the instructor.
Prerequisite(s): (POLS*2080 or POLS*2100) and 1.00 credits at the 3000 level in the Comparative Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4710 Topics in International Relations U (3-0) [1.00]
This course considers theories and problems in the field of International Relations. The theoretical and/or geographical focus of the course will reflect the interests of the instructor.
Prerequisite(s): POLS*2200 and 1.00 credits at the 3000 level in the International Relations and Global Studies stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4720 Topics in International Relations U (3-0) [1.00]
This course considers the evolving relationship among levels of government in Canada. The growth of cities, the growth of policy responsibilities of provinces, the influence of international organizations, and the development of First Nations government in Canada all challenge the conventional study of federal-provincial relations in Canada. From year to year, this course examines one or several of these contemporary dynamics.
Prerequisite(s): POLS*2300 and 1.00 credits at the 3000 level in the Canadian Politics stream.

<td>POLS*4730</td>
<td>International Relations of the Middle East</td>
<td>This course is an introduction to the international relations of the Middle East. The course focuses on theories of international relations and their applicability to specific case studies of Middle Eastern politics. The course provides a critical examination of conflicts in the region, and contextualizes those conflicts within both realist and neo-realist theories of international relations. The course also provides a critical examination of the Arab-Israeli crisis, with a focus on peace negotiations. The course is offered as a seminar, with a heavy emphasis on class participation. Students participate in a simulation of an Arab-Israeli peace negotiation.</td>

Population Medicine

POPM*3240 Epidemiology F,W (3-0) [0.50]
The course examines the basic concepts of health and disease in populations. Methods used in descriptive and analytic epidemiological studies, including the design, analysis and interpretation of results for observational studies and field trials are presented.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): (BIOL*1080 or BIOL*1090), STAT*2040
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the Department of Population Medicine website for more information.
Department(s): Department of Population Medicine

POPM*4040 Epidemiology of Food-borne Diseases F (3-0) [0.50]
This course examines the epidemiology and prevention of food-borne infections and intoxications, including those of both microbiological and chemical origin. Drawing on outbreak investigations, surveys, risk assessments, government surveillance systems and basic research, the biological, ecological, socio-economic and public health context of these diseases will be discussed.

Prerequisite(s): 1 of FOOD*3230, POPM*3240
Restriction(s): FOOD*4210
Department(s): Department of Population Medicine

POPM*4230 Animal Health F (3-0) [0.50]
This course examines the causes and effects of important diseases of food animals in Canada, with a focus on dairy cattle. Elements of physiology, epidemiology, microbiology, nutrition, and production management are integrated into a health management approach emphasizing disease prevention. The course is directed at senior undergraduate students with interest in and knowledge of, food animal production agriculture.

Offering(s): Offered in DE format every other year starting with F19
Prerequisite(s): ANSC*2340 or ANSC*3080
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the Department of Population Medicine website for more information.

## Psychology

**Department of Psychology**

Psychology majors are encouraged to participate in the on-going research of the department, through independent study courses: PSYC*3240, PSYC*4240, PSYC*4870, and PSYC*4880.

The required number of Psychology credits for the Major is 9.00. Students may choose to take up to an additional 2.00 credits in Psychology. The maximum number of credits at each level is as follows:

<table>
<thead>
<tr>
<th>Level</th>
<th>Credits</th>

</tr>
</tbody>
</table>

Students wishing to take a 2000, 3000 or 4000 level course without having completed the appropriate prerequisites must receive permission of the Psychology Academic Advisor and Manager who will determine whether the student has the required background for the course.

**Honours Courses**: Courses designated with (H) are for students in Psychology Honours programs. These include: B.A. Honours Psychology (PSYC, PSYC:C) major or minor, B.A. Information Systems and Human Behaviour (ISHB) major, B.Sc. Psychology: Brain and Cognition (PBC), major or minor, and the Neuroscience (NEUR) major or minor. A cumulative average of at least 70% in all course attempts in Psychology or registration in the ISHB major, NEUR minor, or PBC major or minor is required to enroll in H designated courses.

For courses without semester designations, please check with the department. The remaining courses will normally be offered as indicated. Advance schedules are available in the department.

---

### PSYC*1000 Introduction to Psychology S,F,W (3-0) [0.50]

This is an introduction to the content and methods of psychology. It will cover the major areas such as neuroscience, sensation and perception, learning, cognition, motivation, human development, personality, psychopathology and its treatment, and social psychology.

**Offering(s)**: Also offered through Distance Education format.

**Restriction(s)**: This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s)**: Department of Psychology

---

### PSYC*1010 Making Sense of Data in Psychological Research F,W (3-0) [0.50]

This course introduces research designs and quantitative approaches used in psychological science, with an emphasis on conceptual understanding. Specific topics include distributions, meta-analysis, confidence intervals and p-values, effect size, and regression, as well as the differences between descriptive, correlational, and experimental research designs.

**Offering(s)**: Also offered through Distance Education format.

**Prerequisite(s)**: 1 of PSYC*1000, PSYC*1100 , PSYC*1200

**Restriction(s)**: PSYC*2010 , STAT*2040, STAT*2060, STAT*2080, STAT*2090, STAT*2100 , STAT*2120 This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s)**: Department of Psychology

---

### PSYC*1500 Foundational Skills for Psychology F,W (3-0) [0.50]

This course is designed to help Psychology majors to optimize their learning in the Psychology program. The primary focus is on individual skill development with respect to academic learning, written and oral communication, career planning, and working in groups. Specific topics will vary by instructor.

**Co-requisite(s)**: 1 of PSYC*1000, PSYC*1100 , PSYC*1200

**Restriction(s)**: Restricted to Psychology majors BAH, BAH:C, BSC:PBC, and Psychology Area of Concentration

**Department(s)**: Department of Psychology

---

### PSYC*2020 Abnormal Psychology W (3-0) [0.50]

This course is an introduction to abnormal psychology including a multidimensional conceptualization of mental health, assessment, diagnosis, and treatment. Common psychological disorders will be explored with respect to etiology, assessment, current diagnosis and classification, as well as treatment. Emphasis will be given to broad empirical research and to the experiences of individuals with these disorders.

**Prerequisite(s)**: PSYC*1000

**Restriction(s)**: PSYC*3390 , This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s)**: Department of Psychology

---

### PSYC*2070 Teams, Leadership, and Professional Behaviour F,W (3-0) [0.50]

The course will focus on the theory and practical application of Organizational Psychology with regard to leadership, teams, and professional behaviour. The course will provide students with opportunities to assess their leadership and teamwork skills, as well as active learning activities to practice these skills. Key topics will include work motivation, time management, personal organizational skills, goal setting, conflict management, social influence and stress management.

**Prerequisite(s)**: PSYC*1500 or 4.00 credits in Psychology

**Restriction(s)**: PSYC*3080 , Restricted to Psychology majors BAH, BAH:C, BSC:PBC, and Psychology Area of Concentration

**Department(s)**: Department of Psychology

---

### PSYC*2310 Social Psychology S,F,W (3-0) [0.50]

This course introduces students to the field of social psychology. Major topics introduced will include: social influence, social cognition, attitude, stereotype and prejudice, the self, attraction and interpersonal relationships, group processes and intergroup relations. The course also aims for students to use the knowledge acquired to think critically about how their actions and those of others are influenced by social forces. In addition, the course aims to introduce students to the role of culture in shaping thoughts and behaviour and to provide them an opportunity to appreciate diverse perspectives.

**Offering(s)**: Also offered through Distance Education format.

**Prerequisite(s)**: 1 of PSYC*1000, PSYC*1100 , PSYC*1200

**Department(s)**: Department of Psychology

---

### PSYC*2330 Principles of Learning F (3-0) [0.50]

This course provides a detailed description of principles and concepts of learning and motivation, as well as an introduction to their underlying neurobiological mechanisms. Through the examination of empirical evidence in the fields of Psychology and Behavioural Neuroscience, this course offers a comprehensive description of the role of conditioning in normal and abnormal behaviors.

**Prerequisite(s)**: PSYC*1000

**Restriction(s)**: This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s)**: Department of Psychology

---

### PSYC*2360 Psychological Methods and Statistics S,F,W (3-0) [0.50]

This course builds on students’ understanding of basic psychological research methods and statistics, with an emphasis on designing, interpreting, and communicating research. Topics covered throughout the term may include: research ethics, the scientific method, qualitative and quantitative measures, reliability and validity, complex research designs using multiple predictor or independent variables, and the reading and writing of psychological journal articles.

**Offering(s)**: Also offered through Distance Education format.

**Prerequisite(s)**: (1 of PSYC*1000, PSYC*1100 , PSYC*1200 ), (1 of PSYC*1010, PSYC*2010 , STAT*2040)

**Department(s)**: Department of Psychology

---

### PSYC*2390 Sensation and Perception W (3-0) [0.50]

The course objective is to consider the processes of sensory inputs and perception. Approaches ranging from psychophysiology and cognitive psychology to physiology and anatomy will be used. In considering the psychology of sensation and perception, some of the anatomical and physiological aspects of selected senses will be covered in detail and the roles of experience, organization of inputs, and theories of perception are discussed. Topics to be emphasized will vary with the instructor, but may include ontogenetic development, learning, and modification of inputs and their perception. Students will participate in on-line laboratory demonstrations and experiments. (C)

**Offering(s)**: Also offered through Distance Education format.

**Prerequisite(s)**: 1 of PSYC*1000, PSYC*1100 , PSYC*1200

**Restriction(s)**: This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s)**: Department of Psychology

---

### PSYC*2410 Behavioural Neuroscience I F (3-0) [0.50]

This course is a general introduction to the structure and function of the nervous system. The physiological basis of sensory (input) systems and the motor (output) system are examined as are central physiological bases of processes such as learning and memory.

**Offering(s)**: Also offered through Distance Education format.

**Prerequisite(s)**: 1 of PSYC*1000, PSYC*1100 , PSYC*1200

**Restriction(s)**: This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s)**: Department of Psychology

---

*Last Revision: July 4, 2019*
PSYC*2450 Developmental Psychology F (3-0) [0.50]
This course is an introduction to and an analysis of the major theories of developmental psychology. Emphasis will be placed on the processes of development in the child including physical growth, perception, cognition, personality and interactions with the social environment. The application of developmental psychology to educational and social issues will be discussed.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of PSYC*1000, PSYC*1100 , PSYC*1200
Restriction(s): FRHD*2270, This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*2650 Cognitive Psychology W (3-0) [0.50]
This course is an introduction to cognitive processes, including topics in the areas of attention, memory, language and reasoning. Students will be exposed to and participate in on-line laboratory demonstrations and experiments.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of PSYC*1000, PSYC*1100, PSYC*1200
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*2740 Personality W (3-0) [0.50]
This course is a review of the theory, assessment procedures and research findings pertinent to major personality constructs. Personality research, methodology and design will also be covered.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of PSYC*1000, PSYC*1100, PSYC*1200
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*3000 Historical and Critical Perspectives on Psychology F,W (3-0) [0.50]
The purpose of this course is to help students understand the socio-historical and theoretical context of modern psychological research and practice. This includes: 1) evaluating basic assumptions underlying modern psychology by drawing on historical, theoretical and philosophical perspectives, and 2) investigating historical and current controversies within psychology. Topics may include the question of psychology’s scientific status, the assumptions embedded in psychological theory and research methodology, social constructionism, free will/agency, and the relations between psychology, power, ethics, and politics.

Prerequisite(s): PSYC*2070, PSYC*2360, PSYC*2390, PSYC*2410, PSYC*2650
Restriction(s): Restricted to psychology majors BAH, BAH.C, BSC.BPB, and Psychology area of concentration
Department(s): Department of Psychology

PSYC*3200 Psychology of Law U (3-0) [0.50]
An examination of psychological methods, findings and theories in the study of law. Topics will include the fallibility of the eyewitness; juror decisional processes; credibility of witnesses and attorneys; socialization into legal systems, police behaviour, etc.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.50 credits in Psychology or PSYC*2310
Department(s): Department of Psychology

PSYC*3300 Neurochemical Basis of Behaviour W (3-0) [0.50]
This course analyses how drugs act on various neurochemical systems to regulate motivation and behaviour. Topics of discussion may include psychopathology and its treatment.

Prerequisite(s): 2.50 credits in Psychology including (BIOM*3090 or PSYC*2410)
Department(s): Department of Psychology

PSYC*3310 Evolutionary Psychology F (3-0) [0.50]
Evolutionary Psychology (EP) offers a Darwinian frame of reference for studying questions about human nature. After reviewing basic material on genetics and natural selection, we will examine and criticize the contribution of EP to the understanding of the various aspects of individual and social behaviour, such as altruism, logic, mate selection, health, morality, aesthetics, and the role of culture.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 2.50 credits in Psychology
Department(s): Department of Psychology

PSYC*3110 Topics in Health Psychology W (3-0) [0.50]
This course covers research in health psychology. Possible topics include the interplay of psychosocial factors, behaviour, and physical health; pediatric health psychology; health interventions at the individual, family, group or community levels.

Offering(s): Offered in even-numbered years.
Prerequisite(s): NEUR*2000 or 2.50 credits in Psychology
Department(s): Department of Psychology

PSYC*3240 Independent Research Project S,F,W (0-6) [0.50]
This course provides individual students with hands-on experience conducting a research project. Students are supervised directly by a faculty member as they conduct an in-depth investigation of a specific topic within psychology. Typically, the course involves both the practice and reporting of research. Through this experience students will develop a broader appreciation of the relations between knowledge, theory and research while acquiring basic skills in research methodologies and modes of inquiry. In addition, students will develop their written and oral communication skills (e.g., integration of relevant literature, reporting of research). Course registration requires the signature of the Psychology Academic Coordinator. This signature is contingent upon the student demonstrating they have obtained a faculty supervisor's signature and satisfy the course prerequisites. Please see the Psychology department website for more information.

Prerequisite(s): 2.50 credits in Psychology including PSYC*2360
Equate(s): PSYC*3900
Restriction(s): A minimum grade point average of 75% in Psychology courses.
Instructor consent required.
Department(s): Department of Psychology

PSYC*3250 Psychological Measurement F,W (3-0) [0.50]
This course focuses on training students how to conduct research such that measurement theory guides measure selection and construction. Consequences of measurement theory (reliability/validity) for the accuracy of research findings and interpretation of test scores are also covered. A variety of individual difference variables are examined with an emphasis on how measurement strategies differ depending on the nature of the construct.

Prerequisite(s): PSYC*2360
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB.
Department(s): Department of Psychology

PSYC*3270 Cognitive Neuroscience F (3-0) [0.50]
This course provides an overview of the neural processes that support cognitive abilities such as attention, perception, memory, emotion, and reasoning. An emphasis is placed on primary research with the goal of revealing the types of methods that cognitive neuroscientists use, and types of questions that they ask, as they try to understand the relationship between our minds and brains.

Prerequisite(s): 1 of NEUR*2000, PSYC*2390, PSYC*2410, PSYC*2650
Restriction(s): PSYC*4600
Department(s): Department of Psychology

PSYC*3280 Minds, Brains & Machines U (3-0) [0.50]
This course will introduce the student to basic issues in cognitive science from philosophical and psychological perspectives. Connectionism, Turing Machines, artificial intelligence, and alternative naturalistic models of the mind will be among the topics explored.

Prerequisite(s): 2.50 credits in Psychology or 3.00 credits in Philosophy
Department(s): Department of Psychology

PSYC*3290 Conducting Statistical Analyses in Psychology F,W (3-1) [0.50]
This course focuses on training students in the quantitative analysis and communications skills needed to become a researcher in psychology. Students conduct a correlation-based meta-analysis to help them concretely understand sampling distributions and the difficulties associated with obtaining study results that replicate. This meta-analytic foundation is then leveraged to teach traditional psychological analysis techniques (e.g., t-test, analysis of variance, and bi-variate/multiple regression) with an emphasis on maximizing factors that increase the probability of study findings that replicate. The value of interpreting results using effect sizes with confidence intervals is discussed and the logic of null-hypothesis testing is briefly reviewed.

Prerequisite(s): 2.50 credits in Psychology including PSYC*2360
Restriction(s): PSYC*2400, STAT*2050.
Department(s): Department of Psychology
PSYC*3300 Psychology of Gender W (3-0) [0.50]
This course will examine the theories and psychological research that deals with the impact of gender upon people's lives and behaviour. Topics will include gender-role socialization and stereotypes; gender-related status and power differentials; and gender differences and dynamics in the physiological, intrapyschic, interpersonal, and socio-cultural domains.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.50 credits in Psychology including PSYC*2310
Department(s): Department of Psychology

PSYC*3330 Memory and Attention F (3-0) [0.50]
This course provides an overview of attention and memory: how we prioritize some objects and events over others and how such prior experience influences our subsequent thoughts, feelings and actions. The course will cover what is known about memory and attention from research in the overlapping fields of cognitive psychology, neuropsychology, and cognitive neuroscience.
Prerequisite(s): 2.50 credits in Psychology including PSYC*2650
Department(s): Department of Psychology

PSYC*3350 Cross-Cultural Psychology F (3-0) [0.50]
This course provides an examination of cultural differences from the perspective of psychology, and of individual and group relations within and between culturally diverse societies. The primary goal of this course is to provide a framework and knowledge base with which to understand the various contexts, processes and outcomes of intercultural contact.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.50 credits in Psychology including PSYC*2310
Department(s): Department of Psychology

PSYC*3410 Behavioural Neuroscience II W (3-2) [0.50]
This course will focus on contemporary research and theory related to such selected topics as physiological correlates of memory, learning, motivation, emotion, stress, sensory and motor functions. Both the central and peripheral components of the nervous system will be examined in relation to the above.
Prerequisite(s): NEUR*2000 or PSYC*2410
Restriction(s): Restricted to students in Neuroscience (major or Minor). This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*3450 Social and Personality Development W (3-0) [0.50]
This course is an examination of research, methodological issues and theories concerning personality-social development. Topics may include temperament, imitation, parent-child interaction, and the development of attachments, sex-roles, morality, aggression and pro-social behaviour.
Prerequisite(s): 2.50 credits in Psychology including (FRHD*2270 or PSYC*2450)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*3470 Putting Psychology to Work W (3-0) [0.50]
This course provides students with the opportunity to prepare for the transition to post-graduate programs and work. This course covers topics related to industrial psychology from individual and organizational perspectives. Topics include: the history of work and industrial psychology, career management, job analysis, recruitment, selection, employment law, compensation and benefits, performance appraisal, training and development as well as succession planning.
Prerequisite(s): PSYC*2070, PSYC*2360, (2 of PSYC*2020, PSYC*2310, PSYC*2450, PSYC*2740), (1 of PSYC*2330, PSYC*2390, PSYC*2410, PSYC*2650)
Restriction(s): PSYC*3070, Restricted to psychology majors BAH, BAH:C, and Psychology area of concentration. This is a Priority Access Course. (BAG Psychology area of concentration)
Department(s): Department of Psychology

PSYC*3480 Psychology of Sport U (3-0) [0.50]
This course provides an examination of individual and group behaviour in physical activities and sports. Emphasis will be placed on understanding psychological concepts which are pertinent to sports, e.g., motivation, social and personality development, cognition, leadership and group dynamics.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): PSYC*2310 or PSYC*2740
Department(s): Department of Psychology

PSYC*3490 Social and Organizational Psychology F (3-0) [0.50]
A number of applied issues will be examined from a social and organizational psychological perspective. The topics will include health and well-being; attributions and person perception; intergroup relations and prejudice; and social influence. Students will learn how to apply psychological theories and research to understand and ameliorate applied issues.
Prerequisite(s): 3.00 credits in Psychology including PSYC*2070, PSYC*2310
Restriction(s): PSYC*3080, This is a Priority Access Course. For Psychology majors BAH, BAH:C, BSC: PBC, and Psychology area of concentration
Department(s): Department of Psychology

PSYC*3570 The Psychology of Death and Dying U (3-0) [0.50]
An examination of theory, research, and issues in the psychology of death and dying. Emphasis is upon the cognitive operations used to process information about death and the influence of death constructs in daily life. Topics include the development of death concepts throughout the life-span, death anxiety in society, the needs of the dying person, the psychology of grieving, and unexpected losses such as deaths by suicide or miscarriage.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of FRHD*2270, PSYC*2310, PSYC*2740, PSYC*2450
Department(s): Department of Psychology

PSYC*3800 Psychology and Education U (3-0) [0.50]
The application of psychological principles and techniques to the study of the educational process.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of FRHD*2270, PSYC*1000, PSYC*1100, PSYC*1200
Department(s): Department of Psychology

PSYC*3850 Intellectual Disabilities U (3-0) [0.50]
This course covers applied and theoretical aspects of intellectual disabilities, and lays a foundation for work in the area of intellectual disabilities.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): FRHD*2270 or PSYC*2450
Department(s): Department of Psychology

PSYC*3910 Psychology Externship F,W,S (0-6) [0.50]
An independent program of study formally integrating the student's academic study with one or more work experiences, to be decided by the student in consultation with the supervisory faculty (normally the department's co-op coordinator) prior to registration in the course. In order to qualify for this course, the student must be employed in a work setting at the time of registration to help ensure that a suitable project is feasible in the context of a work placement or employment. The department is not responsible for obtaining employment. The course project is aimed at making a significant contribution to the work setting. The student must consult with the supervisory faculty before selecting or registering for the course. (Enrolment is limited. Not open to co-op students.)
Prerequisite(s): PSYC*2070, PSYC*2360, (2 of PSYC*2020, PSYC*2310, PSYC*2450, PSYC*2740), (1 of PSYC*2330, PSYC*2390, PSYC*2410, PSYC*2650)
Restriction(s): Restricted to Psychology majors BAH, BAH:C, and Psychology area of concentration. Instructor consent required.
Department(s): Department of Psychology

PSYC*4240 Advanced Independent Research Project S,F,W (3-6) [0.50]
This course provides individual students with hands-on experience conducting a research project. Students are supervised directly by a faculty member as they conduct an in-depth investigation of a specific topic within psychology. Typically, the course involves both the practice and reporting of research. Students will apply the research and communication skills they have acquired through prior coursework in order to work more independently. Course registration requires the signature of the Psychology Academic Manager. This signature is contingent upon the student demonstrating they have obtained a faculty supervisor's signature and satisfy the course prerequisites. Please see the Psychology department website for more information. [https://www.guelphph.ca/psychology/]
Prerequisite(s): 14.00 credits including ([ PSYC*2040 or PSYC*3290 )], 1.00 credits in Psychology at the 3000 level]
Restriction(s): PSYC*4500, PSYC*4510 Restricted to students in BAH.PSYC. BAH.PSYC.C, BAH.ISHB, BSCH.PBC or a major or minor in Neurosciences with a minimum grade point average of 75% in all Psychology course attempts. Instructor consent required.
Department(s): Department of Psychology
PSYC*4310 Advanced Topics in Social and Applied Social Psychology W (3-0) [0.50]
This is an in-depth examination of specific advances in social psychological research, theory, and/or applications. Selected topic areas may include the psychology of social groups, women’s health and well-being, and community interventions. Specific topics, to be announced prior to course selection, will vary according to the interests of the instructor of the course.
Prerequisite(s): 14.00 credits including [PSYC*2310, PSYC*3250, (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*4330 Industrial/Organizational Psychology F (3-0) [0.50]
Students will examine theoretical and methodological issues in selected topic areas of industrial/organizational psychology. Selected topic areas may include diversity issues, trust and justice, job performance, employment selection, and stress and well-being. Specific topics, to be announced prior to course selection, will vary according to the interests of the instructor of the course.
Prerequisite(s): 14.00 credits including [PSYC*3250, (1 of PSYC*2070, PSYC*3070, PSYC*3080, PSYC*3490), (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*4460 Advanced Topics in Clinical and Applied Developmental Psychology W (3-0) [0.50]
This course covers issues and theories in clinical or applied developmental psychology. Topics may include pediatric (child health) psychology, attachment relationships, non-suicidal self-injury, and aggression. The selected topic, to be announced prior to course selection, will vary on the basis of the expertise of the instructor.
Prerequisite(s): 14.00 credits including [PSYC*3250, (PSYC*2040 or PSYC*3390, PSYC*2450 or PSYC*2740), (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*4470 Advanced Topics in Behavioural and Cognitive Neuroscience F (3-0) [0.50]
Major areas of contemporary behavioural or cognitive neuroscience will be covered in a seminar format. Selected topic areas may include the neural basis of learning, memory, attention, sensation, and perception. The selected topic, to be announced prior to course selection, will vary on the basis of the expertise of the instructor.
Prerequisite(s): PSYC*3270, (NEUR*2000 or PSYC*2410)
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, BSCH.NEUR, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts. and a minimum of 14.00 completed credits. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*4540 Practical Applications of Psychology F,W (3-0) [1.00]
This is a required capstone course for students in Psychology’s BA and BSC Honours major programs, excepting those who are taking the Honours Thesis courses (PSYC*4780 or 4880). The course adopts a problem-based learning approach in which students will be presented with problems resembling those that they will face in their professional and personal lives. Students will apply their psychological knowledge and skills to analyze the problem, consider solutions, and communicate recommendations to hypothetical stakeholders.
Prerequisite(s): 14.00 credits including [PSYC*3250, (PSYC*3000 or 7.50 credits in Psychology), (PSYC*2040 or PSYC*3290)]
Restriction(s): PSYC*4870, PSYC*4880. Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC or a major or minor in Neurosciences with a minimum grade point average of 70% in all Psychology course attempts.
Department(s): Department of Psychology

PSYC*4570 Special Topics in Applied Psychology U (3-0) [0.50]
This is an in-depth examination of specific advances in the application of psychology theory and methods. Specific topics will vary according to the expertise of the instructor.
Prerequisite(s): 14.00 credits including [PSYC*3250, (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC or a major or minor in Neurosciences with a minimum grade point average of 70% in all Psychology course attempts.
Department(s): Department of Psychology

PSYC*4580 Special Topics in Behavioural Sciences U (3-0) [0.50]
This course provides an in-depth examination of specific theoretical and methodological advances for understanding human and/or animal behaviour. Specific topics will vary according to the expertise of the instructor, but could include advances in Social Psychology, Industrial/Organizational Psychology, Cognitive or Behavioural Neuroscience.
Prerequisite(s): 14.00 credits including [PSYC*2040 or PSYC*3290], 1.00 credits in Psychology at the 3000 level
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neurosciences with a minimum grade point average of 70% in all Psychology course attempts.
Department(s): Department of Psychology

PSYC*4750 Seminar in Motivation and Emotion W (3-0) [0.50]
This course provides an in-depth examination of human motivation and emotion—the neurocognitive mechanisms and corresponding subjective feelings that focus thoughts and behaviours in an adaptive way toward some objects and events in the environment and away from others. The course material and assignments will cover what is known about motivation and emotion from research in the overlapping fields of cognitive and social psychology, emotion theory, and cognitive-affective neuroscience.
Prerequisite(s): 14.00 credits including 1.50 credits in Psychology at the 3000 level
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts.
Department(s): Department of Psychology

PSYC*4780 Advanced Research Methods and Statistics F (3-0) [0.50]
As a companion to honours thesis, this course focuses on advanced research methods, including qualitative methods, and statistical techniques, and presenting research in oral and written form. Topics of emphasis will be internal validity, ecological validity, and construct validity, as well as the correspondence between complex designs and the statistical techniques that can be used to analyze the data resulting from such designs. In addition to readings, lectures, and in-class exercises, students will be guided through the process of analyzing qualitative data and reporting on an empirical investigation in oral and written form.
Prerequisite(s): 14.00 credits including PSYC*3250, (1 of PSYC*2040 or PSYC*3290 or STAT*2050)
Restriction(s): PSYC*3370, PSYC*3380. Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience. with a minimum cumulative average of 70% in all Psychology course attempts. Instructors consent required.
Department(s): Department of Psychology

PSYC*4870 Honours Thesis I S,F,W (3-0) [0.50]
Under individual faculty supervision, students plan, develop, and write a research proposal and prepare an extensive review paper on their area of research. Group sessions are held on research ethics, subject protocols and computer data handling techniques. This course will be graded on a Pass/Fail basis. Note that enrolment in this course is limited and a minimum grade point average of 70% in all Psychology course attempts. and a minimum of 14.00 completed credits. This is a Priority Access Course. Some restrictions may apply during some time periods.
Prerequisite(s): 14.00 credits including PSYC*3250, (PSYC*2040 or PSYC*3290) or STAT*2050
Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience. with a minimum cumulative average of 70% in all Psychology course attempts. Instructors consent required.

### Real Estate and Housing

**Gordon S. Lang School of Business and Economics, Department of Marketing and Consumer Studies.**

**REAL*1820 Real Estate and Housing F (3-0) [0.50]**

This survey course acquaints students with the theories, practices and principles of real estate and housing. Topics include how real estate assets and markets differ from other assets, government involvement in the housing and real estate sectors, non-market housing in Canada, financing real estate, and development.

**Equate(s):** COST*1820, MCS*1820

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*2820 Real Estate Finance W (3-0) [0.50]**

This course examines the financing of both residential and commercial investment real estate. A mathematical approach is used to examine the impact of various lender and borrower decisions about loan terms (amortization periods, pre-payment options, etc.). The evolution of the Canadian housing finance system is contrasted with that in the United States. New methods of financing real estate other than traditional mortgages are discussed.

**Prerequisite(s):** 5.00 credits

**Equate(s):** COST*2820, MCS*2820

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*2850 Service Learning in Housing F (3-0) [0.50]**

This course provides an introduction to ethics and social issues as they apply to the housing and real estate industries. Students will be required to participate in a 10-15 hour service learning exercise where they volunteer for a frontline housing agency/provider. They will then share their experiences with their classmates during the final week of classes.

**Prerequisite(s):** 4.00 credits

**Equate(s):** COST*2850, MCS*2850

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*3810 Real Estate Market Analysis F (3-0) [0.50]**

In this course students examine the processes used to analyze supply and demand in the real estate market. The course focuses on using research methodologies to define the scope of analysis; identify data needs; collect information from various sources, including on-line resources; and interpret the results. Applications to different property types are discussed. Current market trends are also examined. As well, the course deals with marketing real estate: listing procedures, advertising, negotiating.

**Prerequisite(s):** (MC*1820 or REAL*1820), (ECON*2740 or STAT*2060)

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*3870 Topics in Housing U (3-0) [0.50]**

Lecture-discussion or seminar on a selected topic or area of specialization related to housing to be conducted by faculty with special interests or expertise in the area. Students should confirm with the department prior to course selection what topic(s), if any, will be offered during specific semesters.

**Prerequisite(s):** Will be indicated by the department when the course is offered.

**Equate(s):** COST*3870, MCS*3870

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*3880 Topics in Housing U (3-0) [0.50]**

Lecture-discussion or seminar on a selected topic or area of specialization related to housing to be conducted by faculty with special interests or expertise in the area. Students should confirm with the department prior to course selection what topic(s), if any, will be offered during specific semesters.

**Prerequisite(s):** Will be indicated by the department when the course is offered.

**Equate(s):** COST*3880, MCS*3880

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*3890 Property Management W (3-0) [0.50]**

Financial theory is used to examine the diversification benefits of including real estate with financial assets in an investment portfolio. Diversification strategies within a real estate portfolio are also covered. The marketing and leasing of real estate space culminates in a leasing negotiation exercise between pairs of students. Differing property management issues faced by managers of residential, office, retail, industrial and mixed use properties are covered.

**Prerequisite(s):** (1 of COST*1800, REAL*1820, MCS*1820), (1 of ACCT*2230, BUS*2230, ECON*3560, HTM*3070, MCS*2820, REAL*2820)

**Equate(s):** COST*3890, MCS*3890

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*4820 Real Estate Appraisal F (3-0) [0.50]**

This course deals with the basic principles involved in valuing real estate. The market comparison, cost and income approaches of appraisal are covered. The major emphasis in the course is on using discounted cash flow projections to value income-producing real estate. The term project involves the use of a spreadsheet program to estimate property value for a property chosen by the student. While valuation of single family homes is covered, the main emphasis is on investment real estate.

**Prerequisite(s):** (1 of CIS*1200, CIS*1500, MCS*2020), (1 of ACCT*2230, BUS*2230, ECON*2560, ECON*3560, MCS*2820, REAL*2820)

**Equate(s):** MCS*4820

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*4830 Real Estate Development Project W (6-0) [1.00]**

This is a capstone course covering the real estate development process and bringing together concepts from all other Real Estate and Housing courses. It deals with the development, redevelopment and renewal of real estate and housing services. Students will complete a phased project that considers all aspects of development feasibility including market analysis, physical constraints, financial viability and government regulation.

**Prerequisite(s):** 15.00 credits including REAL*3810, REAL*4820

**Equate(s):** MCS*3820, MCS*4810. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*4840 Housing and Real Estate Law F (3-0) [0.50]**

This course lays out the legal principles which guide the expanding and changing body of law dealing with housing and real estate development and forms of occupancy; statutory and regulatory matters are explored.

**Prerequisite(s):** 9.00 credits including MCS*1000, (1 of COST*1800, MCS*1820, REAL*1820), (MCS*2820 or REAL*2820)

**Equate(s):** MCS*4840

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies

**REAL*4870 Sustainable Real Estate F (3-0) [0.50]**

This course is designed to give students an understanding of how topics in sustainability and climate change affect and are affected by real estate and urban economics. Students will develop an understanding of the reasons for and benefits of sustainability practices in real estate and planning.

**Prerequisite(s):** 14.00 credits

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

**Department(s):** Department of Marketing and Consumer Studies
Sociology

Department of Sociology and Anthropology

The Department of Sociology and Anthropology offers three types of courses: sociology courses with the prefix SOC*; anthropology courses with the prefix ANTH*; and departmental courses with the prefix SOAN*.

Courses will normally be offered in the semesters designated. For information on other semesters these courses will be offered and the semesters those courses without designations will be offered, please check with the department. In addition to regularly scheduled courses, students may elect to do independent study. A student who wishes to do a reading course should first consult the professor with whom he/she wishes to work. Please note: a student is allowed a total of 1.00 credits only for reading courses.

SOAN*2112, SOAN*2120

This is a Priority Access Course. Enrolment may be restricted to courses that are available.

Please note: the availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.

SOAN*2112 Sociology S,F,W (3-0) [0.50]

An introductory course dealing with the basic concepts and methods of sociology applied to societies, groups and individuals. Students will gain an understanding of basic social processes such as socialization, social exchange, deviance and conformity, social change and basic social institutions such as the economy, the polity, the family, religion, education.

Offering(s): Also offered through Distance Education format.

Department(s): Department of Sociology and Anthropology

SOAN*1500 Crime and Criminal Justice F,W (3-0) [0.50]

This course will introduce students to the study of crime and criminal justice. It will examine the various criminological theories, types of criminal behaviour, and the criminal justice system.

Department(s): Department of Sociology and Anthropology

SOC*2010 Canadian Society U (3-0) [0.50]

A description of the structure of Canadian society with its social, political and economic tensions.

Prerequisite(s): SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2070 Social Deviance S,F,W (3-0) [0.50]

An introduction to some of the basic theories of deviance and social control and their application to selected social problems.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): SOC*1100 or SOC*1500

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website.

Department(s): Department of Sociology and Anthropology

SOC*2080 Rural Sociology W (3-0) [0.50]

An introduction to the structure and processes of rural society. This course deals with diverse topics such as agrarian movements, the rise of the agro-industrial complex, the role of the state in agriculture, the question of community, and rural environmental issues. A comparative perspective is cultivated, although the primary emphasis is on Canadian society.

Prerequisite(s): 1 of ANTH*1150, IDEV*1000, GEOG*1220, SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2280 Society and Environment F (3-0) [0.50]

An introduction to the nature and dimensions of the environmental crisis. The values, interests and social institutions (including government and industry) that promote pollution or environmentalism will be considered. Issues to be examined may include global warming, nuclear energy, environmental toxics, species extinction and population growth pressures.

Prerequisite(s): 1 of ANTH*1150, GEOG*1220, IDEV*1000, SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2390 Class and Stratification U (3-0) [0.50]

An examination of the persistent bases of social inequalities such as wealth, income, power and prestige including class formation, class consciousness, political activity and social mobility.

Prerequisite(s): SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2700 Criminological Theory F,W (3-0) [0.50]

This course will examine the development of criminological theory from the late 1700s to contemporary times.

Prerequisite(s): SOC*1500

Department(s): Department of Sociology and Anthropology

SOC*2760 Homicide S,F,W (3-0) [0.50]

This course will review legal definitions of homicide, statistical trends in homicide—both in Canada and internationally—and theoretical explanations of homicide. The course will also examine the key criminological/sociological empirical research studies on the various types of homicide, such as: femicide, familialicide, serial and mass murder.

Offering(s): Offered through Distance Education format only.

Prerequisite(s): 1 of ANTH*1150, FRHD*1010, PHIL*1010, POLS*1400, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100, SOC*1500

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website for more information.

Department(s): Department of Sociology and Anthropology

SOC*3040 Sociology of Social Welfare W (3-0) [0.50]

This course examines the major factors that shape the welfare state and considers what impact welfare policies have on people. Central to the discussion is welfare in Canada and what changes are desirable and feasible.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): SOAN*2112, SOAN*2120

Department(s): Department of Sociology and Anthropology

SOC*3130 Politics and Society U (3-0) [0.50]

An interpretation of the political process and its relationship to other aspects of the social structure, including such topics as political parties, movements, factions, citizen participation, power structures and the process of political exchange.

Prerequisite(s): SOAN*2112, SOAN*2120

Department(s): Department of Sociology and Anthropology

SOC*3310 Contemporary Theory F (3-0) [0.50]

This course outlines and evaluates the major theories in use today. A central aspect of the course is instruction in the application of these theories.

Prerequisite(s): SOAN*2112, SOAN*2120

Department(s): Department of Sociology and Anthropology

SOC*3380 Society and Nature W (3-0) [0.50]

The course provides a range of worldviews which address the relations between society and the environment. Material in the course will include historical perspectives and contemporary perspective, thereby allowing students to understand that worldviews concerning this crucial relation are dynamic, changing and reflect the diverse, and sometimes competing, perspectives of a society within particular moments of history.

Prerequisite(s): GEOG*2210 or SOC*2280

Department(s): Department of Sociology and Anthropology

SOC*3410 Individual and Society W (3-0) [0.50]

This course deals with the relationship between the individual and society through close examination of social interaction in a variety of settings. Students will be exposed to a range of theories, methods and concepts from cognitive, micro, dramaturgical, and interpretive sociologies, and will learn to apply these to the analysis of personal relationships, intercultural encounters, institutional life, collective action, and everyday life-worlds.

Prerequisite(s): SOAN*2112, SOAN*2120

Department(s): Department of Sociology and Anthropology

SOC*3490 Law and Society W (3-0) [0.50]

This course examines the social basis of law. Specific topics include the law as an instrument of stability or change, and the role of law makers, law enforcers and interpreters, including the legal profession, the police, judges and courts.

Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website.

Department(s): Department of Sociology and Anthropology

Last Revision: July 4, 2019
SOC*3710 Youth Justice F,W (3-0) [0.50]  
This course examines concerns about youth crime in Canada and elsewhere. It examines the history of legislation to control youth crime, criminal justice processing and practices, public reactions and concerns about youth crime and theoretical models used to explain youth crime.  
Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120  
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).  
Department(s): Department of Sociology and Anthropology

SOC*3730 Courts and Society W (3-0) [0.50]  
This course is an introduction to the social processes involved in the court, particularly the criminal court. Typical concerns will be the place of courts in society, public opinion and confidence in courts, purposes and principles of sentencing, sentencing reforms and disparities (e.g., across gender and race), the role of criminal records, jury, the roles of judges, and alternatives to criminal courts.  
Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120  
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).  
Department(s): Department of Sociology and Anthropology

SOC*3740 Corrections and Penology F (3-0) [0.50]  
This course will examine the current state of knowledge regarding the role of corrections and penology. It will examine such specific issues as public perception and reaction to the criminal justice system's methods of punishment and treatment of criminal offenders, the effectiveness of sentencing options and policies, including fines, probation, prison sentences and parole. It will also examine the various theoretical and methodological approaches to the study of courts, corrections and penology.  
Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120  
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).  
Department(s): Department of Sociology and Anthropology

SOC*3750 Police in Society F,W (3-0) [0.50]  
This course will examine the role of police in society. It will examine theories of policing, the history of policing and such issues as police citizen interaction, relations with visible minorities, methods for controlling police behaviour, and the effectiveness of the police in carrying out specific policy directives.  
Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120  
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).  
Department(s): Department of Sociology and Anthropology

SOC*3840 Seminar in Sociology F,W (3-0) [0.50]  
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.  
Prerequisite(s): 10.00 credits including (1 of SOAN*2112, SOC*2080, SOC*2700), SOAN*2120  
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).  
Department(s): Department of Sociology and Anthropology

SOC*3850 Seminar in Sociology F,W (3-0) [0.50]  
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.  
Prerequisite(s): 10.00 credits including (1 of SOAN*2112, SOC*2080, SOC*2700), SOAN*2120  
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).  
Department(s): Department of Sociology and Anthropology

SOC*3950 Special Projects in Sociology S,F,W (3-0) [0.50]  
This special study option/reading course is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the study is required.  
Prerequisite(s): 10.00 credits  
Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.  
Department(s): Department of Sociology and Anthropology

SOC*4010 Violence and Society F,W (3-0) [0.50]  
This course will focus on the changing nature of violence in our society by critically evaluating theory, research and public policy on the causes and control of violence. The links among structural, institutional and interpersonal violence will be examined as well as the social construction of violence, particularly why some forms of violence are considered to be more serious social problems than others.  
Prerequisite(s): 14.00 credits including (SOC*2700 or SOC*3310), (SOCAN*3120 or POLS*3650)  
Restriction(s): Restricted to students in BAH:CJPP and BAH:SOC with an average of 70% in all course attempts in Political Science, Sociology and Anthropology courses  
Department(s): Department of Sociology and Anthropology

SOC*4030 Advanced Topics in Criminology F (3-0) [0.50]  
This is an in-depth study of selected issues in criminology.  
Prerequisite(s): 14.00 credits including (2 of SOC*3490, SOC*3710, SOC*3730, SOC*3740, SOC*3750), (1 of ANTH*3690, SOC*2700, SOC*3310), (SOCAN*3120 or POLS*3650)  
Restriction(s): Restricted to students in BAH:CJPP with an average of 70% in all course attempts in Political Science, Sociology and Anthropology and Anthropology courses  
Department(s): Department of Sociology and Anthropology

SOC*4200 Advanced Topics in Criminal Justice W (3-0) [0.50]  
This is an in-depth study of issues in criminal justice.  
Prerequisite(s): 14.00 credits including (2 of SOC*3490, SOC*3710, SOC*3730, SOC*3740, SOC*3750), (1 of ANTH*3690, SOC*2700, SOC*3310), (SOCAN*3120 or POLS*3650)  
Restriction(s): Restricted to students in BAH:CJPP with an average of 70% in all course attempts in Political Science, Sociology and Anthropology and Anthropology courses  
Department(s): Department of Sociology and Anthropology

SOC*4230 Comparative Sociology W (3-0) [0.50]  
Societies and social institutions in cross-cultural perspectives. The focus of this course will vary but in every instance will explicitly involve cross-cultural comparisons.  
Offering(s): Offered in even-numbered years.  
Prerequisite(s): 12.50 credits including SOAN*2120, SOC*2080  
Department(s): Department of Sociology and Anthropology

SOC*4300 Theoretical and Methodological Issues U (3-0) [0.50]  
This course will provide an opportunity for sociology majors to consider in detail the integration of theoretical and methodological issues at an advanced level. It is meant to engage students in the latest developments in a particular area of the discipline. Course topics will be announced and course outlines will be available at course selection time. This course is highly recommended to students who are considering graduate work in sociology.  
Prerequisite(s): 14.00 credits including SOAN*3070, SOAN*3120, SOC*3310  
Department(s): Department of Sociology and Anthropology

SOC*4410 Women, Work and Public Policy F,W (3-0) [0.50]  
In this course students will critically assess the transformation of women’s work in contemporary society. A range of topics pertaining to women’s work will be explored with particular attention paid to the processes through which class, gender, race, ethnicity, and age shape divisions of work. The course will also focus on theories that have attempted to explain the transformation of women’s work.  
Prerequisite(s): 12.50 credits including (1 of ANTH*2160, SOAN*2112, SOC*2700), SOAN*2120  
Department(s): Department of Sociology and Anthropology

SOC*4420 Sociology of Food F (3-0) [0.50]  
This course is directed towards upper level students in sociology and related disciplines who wish to consider the variety of contentious issues surrounding food in the contemporary world. The course will encourage a sociological approach to food systems that is both historically informed and comparative in scope.  
Prerequisite(s): 12.50 credits including (1 of ANTH*2160, IDEV*2300, SOAN*2112), SOC*2080, IDEV*2100, SOAN*2120  
Department(s): Department of Sociology and Anthropology

Sociology and Anthropology

Department of Sociology and Anthropology

The Department of Sociology and Anthropology offers three types of courses: sociology courses with the prefix SOC*; anthropology courses with the prefix ANTH*; and departmental courses with the prefix SOAN*.

SOAN*2111 Classical Theory F (3-0) [0.50]
First part of the two-semester course SOAN*2111/2. Refer to SOAN*2111/2 for course description.
Prerequisite(s): 1 of ANTH*1150, SOC*1100, SOC*1500
Department(s): Department of Sociology and Anthropology

SOAN*2112 Classical Theory W (3-0) [0.50]
Second part of the two-semester course SOAN*2111/2. Refer to SOAN*2111/2 for course description.
Prerequisite(s): SOAN*2111
Department(s): Department of Sociology and Anthropology

SOAN*2120 Introductory Methods F,W (3-0) [0.50]
A general introduction to the process of social research emphasizing research design, techniques of data collection, analysis and interpretation of research results.
Prerequisite(s): 1 of ANTH*1150, SOC*1100, SOC*1500
Restriction(s): Restricted to students in ANTH, BECN, CJFP, ID, SOC, BAG-ARTS
Department(s): Department of Sociology and Anthropology

SOAN*2200 Social Research Methods F (3-0) [0.50]
Non-quantitative techniques in social research including participant observation, unobtrusive methods, case studies and interviewing.
Prerequisite(s): SOAN*2100
Department(s): Department of Sociology and Anthropology

SOAN*3040 Globalization of Work and Organizations F (3-0) [0.50]
This course examines the social, economic, and political dimensions of work, locating work and its transformation within the broader context of globalization, economic restructuring, and shifts in public policy. Theoretical approaches and concepts used in the study of work will be introduced and critically assessed.
Prerequisite(s): 1 of ANTH*2160, IDEV*2500, SOAN*2112
Restriction(s): SOAN*2040
Department(s): Department of Sociology and Anthropology

SOAN*3070 Qualitative and Observational Methods W (3-0) [0.50]
This course explores families and households from a gender perspective, using insights from sociology and anthropology.
Prerequisite(s): 1 of ANTH*2160, SOAN*2112, SOAN*2400, SOAN*2120
Restriction(s): FRHD*3120
Department(s): Department of Sociology and Anthropology

SOAN*3120 Quantitative Methods F (3-0) [0.50]
This course introduces basic descriptive and inferential techniques used in quantitative social research. Students will acquire the skills needed to perform basic analyses and to read the research literature. They will also acquire skills in using a standard computer package to perform data analyses. Topics include: data organization, sample description, hypothesis testing and measures of association.
Prerequisite(s): SOAN*2120
Restriction(s): Restricted to students registered in Anthropology, Criminal Justice and Public Policy, Sociology, International Development (GAD or RAD).
Department(s): Department of Sociology and Anthropology

SOAN*3130 Protest, Resistance, and Collective Action W (3-0) [0.50]
The course introduces students to the study of social movements and contentious collective action, looking at the motivations, tactics, outcomes of movement participants, and how these are theorized.
Prerequisite(s): 1 of ANTH*2160, IDEV*2300, IDEV*2500, SOAN*2112
Department(s): Department of Sociology and Anthropology

SOAN*3240 Gender & Global Inequality I F (3-0) [0.50]
In this course, students will develop their ability to use a gender perspective to study social change in the context of global inequalities. Students will develop their knowledge of the core concepts and theories in Gender and Development (GAD) thinking and practice, while exploring the development process from a critical perspective.
Prerequisite(s): 1 of ANTH*2160, IDEV*2010, IDEV*2500, SOC*2080
Department(s): Department of Sociology and Anthropology

SOAN*3250 Social Change in Latin America W (3-0) [0.50]
This course provides a critical, comparative examination of the social-structural and cultural transformations occurring in Latin America in a context of deepening integration with the global north. Topics to feature prominently may include land reform, depeasantization, out-migration, maquiladoras, informal employment, race and ethnic relations, religiosity and religious identification, and social movements. The particular sub-regional focus may vary.
Prerequisite(s): 1 of ANTH*2160, IDEV*2010, IDEV*2500, SOC*2080
Department(s): Department of Sociology and Anthropology

SOAN*3260 Perspectives on Development F (3-0) [0.50]
This course examines theories and processes relating to international development and the responses to these by anthropologists and/or sociologists.
Prerequisite(s): 1 of ANTH*2160, IDEV*2010, IDEV*2300, IDEV*2500, SOC*2080
Restriction(s): ANTH*3680, Registration in Anthropology, Sociology or International Development.
Department(s): Department of Sociology and Anthropology

SOAN*4210 Indigenous-Settler Relations in Canadian Society W (3-0) [0.50]
This seminar-based course is designed to provide students with an opportunity to explore contemporary Indigenous-Settler relations in Canadian Society. Grounded in an exploration of worldviews and meaningful knowledge systems engagement, the course may explore governance, decolonisation, re-appropriation, reconciliation, etc. The specific content areas will vary depending on the instructor.
Prerequisite(s): 12.50 credits including (1 of ANTH*2660, IDEV*2400, IDEV*2500, GEOG*2210, SOAN*2290), (1 of GEOG*2260, IDEV*2100, SOAN*3070)
Equate(s): SOC*4310
Department(s): Department of Sociology and Anthropology

SOAN*4220 Gender and Change in Rural Canada F (3-0) [0.50]
This course examines socio-cultural structures affecting historically gendered positions and roles in rural Canada.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 12.50 credits including (1 of ANTH*2160, IDEV*2300, SOC*2080)
(1 of IDEV*2100, SOAN*2120, WMST*3000)
Department(s): Department of Sociology and Anthropology

SOAN*4230 Gender & Global Inequality II W (3-0) [0.50]
An in-depth and critical examination of a range of gender issues in the context of development, this course aims to enhance students’ ability to critically analyze development theory and practices using gender analysis. It provides students an opportunity to deepen their understanding of gender issues in a global context, with the aim of further equipping them to participate effectively in gender and development-related research, policy-making, and implementation.
Prerequisite(s): 12.50 credits including SOAN*3240, (1 of GEOG*3090, POLS*2650, POLS*3180, SOAN*2120)
Restriction(s): SOAN*4240
Department(s): Department of Sociology and Anthropology

<tbody>
<tr>
<td>SOAN*4250</td>
<td>Energy and Society F (3-0) [0.50]</td>
<td>This seminar addresses the links between social relations and various types of energy including petroleum, other hydrocarbons, nuclear and solar energies. Topics may include corporations, states, international organizations and popular movements.</td>
<td>12.50 credits including (IDEV<em>2100 or SOAN</em>2120), (1 of ANTH<em>2160, IDEV</em>2300, SOAN<em>2112, SOC</em>2080)</td>
<td>Department of Sociology and Anthropology</td>
</tr>
<tr>
<td>SOAN*4260</td>
<td>Migration, Inequality and Social Change W (3-0) [0.50]</td>
<td>This seminar critically examines the complex relationships between migration, inequality and social change. Students will develop their understanding of key debates in contemporary migration, exploring relevant theory, research and public policy. Topics may include the migration-development nexus, the role of migration policies in structuring inequalities, migrant rights and resistance, and transnational families.</td>
<td>12.50 credits including (IDEV<em>2100 or SOAN</em>2120), (1 of ANTH<em>2160, IDEV</em>2300, IDEV<em>2500, SOAN</em>2112, SOC*2080)</td>
<td>Department of Sociology and Anthropology</td>
</tr>
<tr>
<td>SOAN*4320</td>
<td>Transition from School to Work W (3-0) [0.50]</td>
<td>This applied course examines the evolving research and models in the transitions from school to work area. There is an evolving literature in this area based, in part, on the successful application of research in the transition from high school to postsecondary education. This 'capstone' course also considers the practical issues involved in making such a move, considering the knowledge, skills, and values needed by university students to succeed in the modern workplace (public, private, and not-for-profit sectors) in Canada. Students will complete an &quot;Action Sociology/Anthropology Project,&quot; as well as a &quot;Skills Portfolio,&quot; and other work related to their own transition.</td>
<td>Registration in Sociology, Anthropology or Criminal Justice &amp; Public Policy majors in semester 7 or 8.</td>
<td>Department of Sociology and Anthropology</td>
</tr>
<tr>
<td>SOAN*4500</td>
<td>Community Development W (3-0) [0.50]</td>
<td>An analysis of approaches to community development defined as planned, change-directed action undertaken by individuals, groups and organizations. The course will include the examination of actual community development practices.</td>
<td>(1 of ANTH<em>2160, IDEV</em>2010, IDEV<em>2500, SOC</em>2080), (GEOG<em>2210 or SOAN</em>2120)</td>
<td>Department of Sociology and Anthropology</td>

Spanish

School of Languages and Literatures

All courses are conducted in Spanish (reading, writing and speaking), and literary texts are, at all levels, studied in the original language.

**SPAN*1100 Introductory Spanish I F,W (3-1) [0.50]**
This course introduces students to the basics of spoken and written Spanish through the study of grammar and vocabulary. The course is for students with no previous studies in Spanish.

*Offering*: Also offered through Distance Education format.

*Equate(s)*: HISP*1100

*Department(s)*: School of Languages and Literatures

**SPAN*1110 Introductory Spanish II F,W (3-1) [0.50]**
This is a continuation of SPAN*1100. Students will develop and apply increased reading, writing, listening and oral skills in Spanish through the study of new vocabulary and grammatical structures and culture.

*Offering*: Also offered through Distance Education format.

*Equate(s)*: HISP*1110

*Department(s)*: School of Languages and Literatures

**SPAN*2000 Intermediate Spanish I F,W (3-1) [0.50]**
This course is for students who have completed either first year University Spanish or 4U Spanish as well as for those who are heritage speakers. This course examines cultural topics and grammatical structures in greater depth while focusing on vocabulary acquisition, and development of oral, written, and listening skills.

*Equate(s)*: HISP*2000

*Department(s)*: School of Languages and Literatures

**SPAN*2010 Intermediate Spanish II F,W (3-1) [0.50]**
Students will acquire and apply improved skills in reading, writing, and conversation through further study of grammar and culture. The course encourages students to enhance their analytical and linguistic skills through the use of appropriate structures as they formulate and support opinions.

*Prerequisite(s)*: HISP*2000 or SPAN*2000

*Equate(s)*: HISP*2010

*Department(s)*: School of Languages and Literatures

**SPAN*2040 Culture of Spain F (3-0) [0.50]**
This course is an examination of the historical and cultural events that provided the background for the development of modern Spain, as well as a visual survey of Spanish culture.

*Offering*: Offered in odd-numbered years.

*Prerequisite(s)*: HISP*1110 or SPAN*1110

*Equate(s)*: HISP*2040

*Department(s)*: School of Languages and Literatures

**SPAN*2990 Hispanic Literary Studies W (3-0) [0.50]**
This course is an introduction to literary studies in Spanish. The course focuses on critical terminology and methods through a selection of prose, poetry and drama from Spain and Spanish America.

*Prerequisite(s)*: HISP*1110 or SPAN*1110

*Equate(s)*: HISP*2990

*Department(s)*: School of Languages and Literatures

**SPAN*3080 Spanish American Culture F (3-0) [0.50]**
This course is a survey through selected readings, class discussion and audio-visual materials of the Spanish American countries, their histories, society, institutions and culture.

*Offering*: Offered in even-numbered years.

*Prerequisite(s)*: HISP*2000 or SPAN*2000

*Equate(s)*: HISP*3080

*Department(s)*: School of Languages and Literatures

**SPAN*3210 Topics in Hispanic Studies F,W (3-0) [0.50]**
This course, taught in Spanish, with texts in the original language, provides an intensive study of a specific aspect of Hispanic Studies.

*Prerequisite(s)*: ( HISP*3220 or SPAN*3220), ( HISP*3230 or SPAN*3230)

*Equate(s)*: HISP*3210

*Department(s)*: School of Languages and Literatures

**SPAN*3220 Literature and Arts I: Spain F (3-0) [0.50]**
This course will be taught in Spanish, with texts studied in the original language, and provides a detailed examination of a theme, period or movement in the literature and/or arts of Spain.

*Prerequisite(s)*: HISP*2990 or SPAN*2990

*Equate(s)*: HISP*3220

*Department(s)*: School of Languages and Literatures

**SPAN*3230 Literature and Arts II: Latin America W (3-0) [0.50]**
This course will be taught in Spanish, with texts studied in the original language, and provides a detailed examination of a theme, period or movement in the literature and/or arts of Latin America.

*Prerequisite(s)*: HISP*2990 or SPAN*2990

*Equate(s)*: HISP*3230

*Department(s)*: School of Languages and Literatures

**SPAN*3240 Topics in Hispanic Linguistics W (3-0) [0.50]**
This course offers an introduction to linguistic topics including history of the Spanish language, language variation and change, and Spanish phonetics, which may vary from year to year.

*Offering*: Offered in odd-numbered years.

*Prerequisite(s)*: HISP*1110 or SPAN*1110

*Equate(s)*: HISP*3240

*Department(s)*: School of Languages and Literatures

**SPAN*3300 Advanced Spanish I F (3-0) [0.50]**
This is an advanced language course that focuses on the refinement of students' written and verbal communication skills in Spanish.

*Prerequisite(s)*: HISP*2010 or SPAN*2010

*Equate(s)*: HISP*3300

*Department(s)*: School of Languages and Literatures

**SPAN*3700 Experiential Learning and Language S,F,W (0-0) [0.50]**
This course provides an opportunity for independent study based on an experiential project in Spanish or Hispanic Studies. The project (approximately 70 hours) must be approved by a faculty member in the School of Languages and Literatures. It will include research about experiential learning, a reflective piece of writing and a public oral presentation about the project.

*Offering*: Also offered through Distance Education format.

*Prerequisite(s)*: 10.00 credits including 1.50 credits in Spanish.

*Restriction(s)*: A minimum cumulative average of 70% in all Spanish course attempts. Instructor consent required.

*Department(s)*: School of Languages and Literatures

**SPAN*3800 Directed Readings in Hispanic Studies U (3-0) [0.50]**
A reading course in Spanish or Spanish American literature designed according to the previous studies and the interests of the individual student. Normally, students will not be permitted to take more than two courses in the Directed Readings sequence.

*Prerequisite(s)*: 1.00 credits from the following: ( HISP*3220 or SPAN*3220), ( HISP*3230 or SPAN*3230), SPAN*3080

*Equate(s)*: HISP*3800

*Restriction(s)*: Instructor consent required.

*Department(s)*: School of Languages and Literatures

**SPAN*3810 Directed Readings in Hispanic Studies U (3-0) [0.50]**
A reading course in Spanish or Spanish American literature designed according to the previous studies and the interests of the individual student. Normally, students will not be permitted to take more than two courses in the Directed Readings sequence.

*Prerequisite(s)*: 1.00 credits from the following: ( HISP*3220 or SPAN*3220), ( HISP*3230 or SPAN*3230), SPAN*3080

*Equate(s)*: HISP*3810

*Restriction(s)*: Instructor consent required.

*Department(s)*: School of Languages and Literatures

**SPAN*4100 Seminar in Hispanic Studies F,W (3-0) [1.00]**
This seminar is taught in Spanish, with texts studied in the original language. It provides an opportunity for students to study and research a specific aspect of Hispanic Studies.

*Prerequisite(s)*: ( HISP*4410 or SPAN*4410), ( HISP*4420 or SPAN*4420)

*Department(s)*: School of Languages and Literatures

| SPAN*4410  | Senior Seminar on Latin American W (3-0) | [1.00]  | This capstone seminar is taught in Spanish, with texts studied in the original language, and will explore in detail a major movement, period or theme in Latin American literature or culture. Students who have completed this course previously should register in SPAN*4100.  
**Offering(s):** Offered in odd-numbered years.  
**Prerequisite(s):** HISP*2990 or SPAN*2990  
**Department(s):** School of Languages and Literatures |
| SPAN*4420  | Senior Seminar on Spain or Africa W (3-0) | [1.00]  | This seminar is taught in Spanish, with readings from texts in the original language. It addresses a major issue, movement, theme or period in the literature and culture of Spain, or, in some years, of the Spanish-speaking regions of Africa.  
**Offering(s):** Offered in even-numbered years.  
**Prerequisite(s):** HISP*2990 or SPAN*2990  
**Department(s):** School of Languages and Literatures |
| SPAN*4500  | Spanish Translation - Theory and Practice W (3-0) | [1.00]  | This course introduces students to the theory and practice of translation by applying current theoretical principles and linguistic precision to the process of translation from Spanish to English and English to Spanish. Students work with a variety of texts from multiple fields, including journalism, business, science and literature.  
**Prerequisite(s):** HISP*3500 or SPAN*3500  
**Equate(s):** HISP*4500  
**Department(s):** School of Languages and Literatures |
| SPAN*4840  | Research Paper in Hispanic Studies U (3-0) | [1.00]  | Students will write an intensive research paper in Spanish on a topic relating to a literary or linguistic subject in Hispanic Studies. This paper will be completed within one semester and students will be assigned to a faculty supervisor who will oversee the project.  
**Prerequisite(s):** (HISP*3220 or SPAN*3220), (HISP*3230 or SPAN*3230)  
**Equate(s):** HISP*4840  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Languages and Literatures |
Department of Mathematics and Statistics

Suggested initial course sequences:

1. For students interested in applied statistics a minimal course sequence is: (STAT*2040 or STAT*2100), STAT*2050, STAT*3210, STAT*3240, STAT*3320.
2. Credit may be obtained in only 1 of STAT*2050 or STAT*2090 and only 1 of STAT*2040, STAT*2060, STAT*2080, STAT*2100, or STAT*2120.
3. Graduate students may be admitted to later parts of a sequence by permission of the department.
4. Students who major or minor in Statistics may not receive credit for the following courses unless taken to satisfy the requirements of another program: ECON*2740, PSYC*3210, PSYC*3320.

STAT*2040 Statistics I S,E,F,W (3-0) [0.50]
This course focuses on the practical methods of Statistics and the topics include: descriptive statistics; univariate models such as binomial, Poisson, uniform and normal; the central limit theorem; expected value; the t, F and chi-square models; point and interval estimation; hypothesis testing methods up to two-sample data; simple regression and correlation; introduction to analysis of variance. Assignments will deal with real data from the natural sciences and involve the use of statistical software for computing and visualization.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of 4U Calculus and Vectors, Advanced Functions and Calculus, OAC Calculus, MATH*1080
Restriction(s): STAT*2060, STAT*2080, STAT*2120, STAT*2230
Department(s): Department of Mathematics and Statistics

STAT*2050 Statistics II F,W (3-0) [0.50]
In this course, students will learn how to implement good study design and analyze data from complex studies. This course follows naturally from STAT*2040 and features both previously unseen statistical techniques, as well as studying in greater depth some topics covered in STAT*2040. These topics will include: experiments and observational studies; a review of t-tests and confidence intervals; confounding variables; association and causality; Analysis of Variance (ANOVA); simple and multiple linear regression; binary responses (logistic regression); odds ratios and relative risk; and an introduction to experimental design (including blocked designs and factorial treatment designs). Assignments carried out using modern statistical software will form the basis for mastering the material.
Prerequisite(s): 1 of STAT*2040, STAT*2060, STAT*2120, STAT*2230
Restriction(s): STAT*2090
Department(s): Department of Mathematics and Statistics

STAT*2060 Statistics for Business Decisions F,W (3-0) [0.50]
This course is designed for students interested in the application of statistics in a business setting. Topics covered will include the role of statistics in business decisions, organization of data, frequency distributions, probability, normal and sampling distributions, hypothesis tests, linear regression and an introduction to time series, quality control and operations research.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): (4U mathematics or equivalent) or 0.50 credit in mathematics
Restriction(s): STAT*2040, STAT*2080, STAT*2120. Not available to B.Sc. students.
Department(s): Department of Mathematics and Statistics

STAT*2080 Introductory Applied Statistics I F (3-0) [0.50]
The topics covered in this course include: Frequency distributions, graphing and tabulation of data; measures of central tendency, variability and association; elementary probability; hypothesis testing and confidence intervals; basic concepts of experimental design; treatment designs; simple linear regression and correlation. Examples come from a variety of disciplines, including family studies, education, marketing, medicine, psychology and sociology.
Prerequisite(s): (4U mathematics or equivalent) or 0.50 credit in mathematics
Restriction(s): STAT*2040, STAT*2060, STAT*2100, STAT*2120. BSc students cannot take this course for credit.
Department(s): Department of Mathematics and Statistics

STAT*2090 Introductory Applied Statistics II W (3-0) [0.50]
The topics covered in this course include: analysis of qualitative data; analysis of variance for designed experiments; multiple regression; exposure to non-parametric methods; power and sample size calculations; special topics such as logistic regression. Examples come from a variety of disciplines, including nutrition, family studies, education, marketing, medicine, psychology and sociology.
Prerequisite(s): STAT*2080
Restriction(s): BIOL*2250, STAT*2050, STAT*2250
Department(s): Department of Mathematics and Statistics

STAT*2120 Probability and Statistics for Engineers F,W (3-0) [0.50]
The topics covered in this course include: Sample spaces; probability, conditional probability and independence; Bayes' theorem; probability distributions; probability densities; algebra of expected values; descriptive statistics; inferences concerning means, variances, and proportions; curve fitting, the method of least squares and correlation. An introduction to quality control and reliability is provided. This course is recommended for students in the B.Sc.(Eng.) program.
Prerequisite(s): 1 of IPS*1510, MATH*1210, MATH*2080
Restriction(s): STAT*2040, STAT*2060, STAT*2080, STAT*2100
Department(s): Department of Mathematics and Statistics

STAT*2230 Biostatistics for Integrative Biology W (3-2) [0.50]
This course introduces students to the design, completion and interpretation of research projects, including identifying categories of research questions, types of data, data gathering methods, efficient graphic and numeric methods to summarize data, standard statistical analyses involving parameter estimation and hypothesis tests and interpreting results in the context of research goals. Statistical concepts underlying practical aspects of biological research will be emphasized. Computer-intensive laboratory sessions will focus on practical data organization, visualization, statistical analysis using software, and interpretation and communication of statistical results.
Prerequisite(s): BIOL*1070
Restriction(s): BIOL*2250, STAT*2040, STAT*2060, STAT*2080, STAT*2120, STAT*2250. Restricted to students in the BSC majors in BIOD, MBF, WBC, WLB, and ZOO, and BSES majors in ECOL and ECOL.C.
Department(s): Department of Mathematics and Statistics, Department of Integrative Biology

STAT*3100 Introductory Mathematical Statistics I F (3-0) [0.50]
The topics covered in this course include: Probability spaces; discrete and continuous random variables; multivariate distributions; expectations; moments, Chebyshev's inequality, product moments; sums of random variables, generating functions; Gamma, Beta, t and F distributions; central limit theorem; sampling distributions.
Prerequisite(s): (1 of IPS*1510, MATH*1210, MATH*2080 ), (STAT*2040 or STAT*2120)
Department(s): Department of Mathematics and Statistics

STAT*3110 Introductory Mathematical Statistics II W (3-0) [0.50]
Estimation, unbiasedness, Cramer-Rao inequality, consistency, sufficiency, method of moments, maximum likelihood estimation; hypothesis testing, Neyman-Pearson lemma, likelihood ratio test, uniformly most powerful test; linear regression and correlation; non-parametric methods.
Prerequisite(s): STAT*3100
Department(s): Department of Mathematics and Statistics

STAT*3210 Experimental Design F (3-0) [0.50]
This course presents the basic principles of design: randomization, replication, and local control (blocking); RCBD, Latin square and crossover designs, incomplete block designs, factorial and split-plot experiments, confounding and fractional factorial designs, response surface methodology; linear mixed model computer analysis of the designs; nonparametric methods; Taguchi philosophy.
Offering(s): Offered in even-numbered years.
Prerequisite(s): STAT*2050
Department(s): Department of Mathematics and Statistics

STAT*3240 Applied Regression Analysis F (3-1) [0.50]
This course reviews simple linear regression and introduces multiple regression with emphasis on theory of least squares estimation, residual analysis, and model interpretation. Within the multiple regression context, transformations of variables, interactions, model selection techniques, ANOVA, influence diagnostics and multicollinearity will be discussed. Topics may also include Box-Cox transformations, weighted regression, and logistic and Poisson regression. This course is supplemented with computer labs involving interactive data analysis using statistical software.
Prerequisite(s): (1 of IPS*1510, MATH*1210, MATH*2080 ), (1 of MATH*1160, MATH*2150, MATH*2160 ), STAT*2050
Department(s): Department of Mathematics and Statistics

STAT*3320 Sampling Theory with Applications F (3-0) [0.50]
This course focuses on the design and analysis of survey samples for finite populations. Topics covered include: non-probability and probability sampling, simple random sampling, stratified sampling, cluster sampling, systematic sampling, double sampling, two-phase sampling and multi-stage cluster sampling. Expectation, variance estimation results in the context of research goals. Statistical concepts underlying practical aspects of biological research will be emphasized. Computer-intensive laboratory sessions will focus on practical data organization, visualization, statistical analysis using software, and interpretation and communication of statistical results.
Prerequisite(s): WBC, WLB, and ZOO, and BSES majors in ECOL and ECOL.C.
Restriction(s):
Department(s): Department of Mathematics and Statistics, Department of Integrative Biology

2019-2020 Undergraduate Calendar
Last Revision: July 4, 2019
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
</table>
| STAT*3510   | Environmental Risk Assessment W (3-0) [0.50] | Contemporary statistical methods for assessing risk are discussed. Topics covered include: dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk, trend analysis, survey of models for assessing risk. Case studies are used to illustrate the methods. | Prequisite(s): STAT*2050  
Department(s): Department of Mathematics and Statistics |
| STAT*4000   | Statistical Computing F (3-0) [0.50] | The topics in this course will include pseudorandom number generation, numerical optimization as used in statistics, simulation study design, Monte Carlo integration and variance reduction, and bootstrapping. Other topics may include permutation tests, visualization of multivariate data, and big data. | Prequisite(s): MATH*2130, STAT*2050, STAT*3110  
Department(s): Department of Mathematics and Statistics |
| STAT*4050   | Topics in Applied Statistics I W (3-0) [0.50] | Topics such as statistical computing procedures, quality control, bioassay, survival analysis and introductory stochastic processes will be covered. This course is intended for statistics students and interested students from other disciplines who have appropriate previous courses in statistics. Information on particular offerings will be available at the beginning of each academic year. | Offering(s): Offered in odd-numbered years.  
Prequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4060   | Topics in Applied Statistics II W (3-0) [0.50] | Same as for STAT*4050. | Offering(s): Offered in even-numbered years.  
Prequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4150   | Topics in Applied Statistics III F,W (3-0) [0.50] | In this course students will discuss selected topics at an advanced level as in STAT*4050, but with different choice of topics. | Prequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4340   | Statistical Inference W (3-0) [0.50] | This course reviews and extends the theory of estimation introduced in STAT*3110. Topics including point estimation, interval estimation, hypothesis testing and decision theory will be presented from both the frequentist and likelihood-based perspectives. Foundational issues concerning the frequentist and Bayesian paradigms will also be discussed. | Prequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4350   | Applied Multivariate Statistical Methods F (3-0) [0.50] | This course introduces the multivariate normal, and Wishart and Hotelling’s T-square distributions. Topics covered include: statistical inference on the mean vector, canonical correlation, multivariate analysis of variance and covariance, multivariate regression, principal components analysis, and factor analysis. Topics will be illustrated using examples from various disciplines. | Prequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4360   | Applied Time Series Analysis F (3-0) [0.50] | This course will investigate the nature of stationary stochastic processes from the spectral and time domain points of view. Aspects of parameter estimation and prediction in a computationally intensive environment will be the presentation style. The methods developed in this course will have applicability in many sciences such as engineering, environmental sciences, geography, soil sciences, and life sciences. | Prequisite(s): STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4600   | Advanced Research Project in Statistics F,W (0-6) [1.00] | Each student in this course will undertake an individual research project in some area of statistics, under the supervision of a faculty member. A written report and a public presentation of the project will be required. | Restriction(s): Approval of a supervisor and the course coordinator.  
Department(s): Department of Mathematics and Statistics |
Studio Art

School of Fine Art and Music

Admission to all Studio Art courses is based on the university's policy with regard to Priority Access Courses. Admission to ALL Studio Courses at the 3000-level and above is restricted to students who:

1. are currently registered in the Art History or Studio Art Specializations of the Bachelor of Arts Program;
2. have an average of 70% in all ARTH and SART course attempts;
3. have completed (ARTH*1220 or ARTH*2200 ) or (ARTH*1510 or ARTH*1520), SART*1050 and SART*1060.

School of Fine Art and Music

SART*1060 Foundation Studio F,W (2-4) [0.50]

This course provides a foundation in the technical and theoretical aspects of contemporary two-dimensional media. Through a combination of lectures, studio projects, readings and a field trip the students will explore perceptual, conceptual and topical dimensions of art making practices.

Restriction(s): Registration in semesters one, two, three or four. May not register in SART*1060 in the same term. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations during certain periods. Please see the departmental website for more information.

Department(s): School of Fine Art and Music

SART*1060 Core Studio F,W (2-4) [0.50]

This course provides a foundation in the technical and theoretical aspects of contemporary three-dimensional and time-based media. Through a combination of lectures, studio projects and guest speakers, students will explore perceptual, conceptual and topical dimensions of contemporary art making practices.

Restriction(s): Registration in semesters one, two, three or four. May not register in SART*1050 in the same term. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations during certain periods. Please see the departmental website for more information.

Department(s): School of Fine Art and Music

SART*1150 Contemporary Artistic Practice F (3-0) [0.50]

This course, which uses a web-based platform, is an introduction to contemporary art and artists. Lectures will be augmented by studio art assignments and online discussions in order to develop an understanding of material covered in the course.

Offering(s): Offered through Distance Education format only.

Department(s): School of Fine Art and Music

SART*2090 Drawing I F,W (0-6) [0.50]

This course will consider the activity of drawing as an ability to work with a varied range of applications – all of them concerned with the investigation and development of ideas through making an image. This course is an introduction to the basic concepts, techniques and media of drawing, through disciplined observational and imaginative study.

Prerequisite(s): (1 of ARTH*1220 , ARTH*1510, ARTH*1520), SART*1050, SART*1060

Co-requisite(s): SART*1060 can be taken as co-requisite

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

Department(s): School of Fine Art and Music

SART*2200 Painting I F,W (0-6) [0.50]

This course is designed to introduce students to the fundamentals of observational painting in oil and acrylic paint. In addition to developing skill in colour-mixing, composition, and using value to create space and form, students will learn proper care for tools and how to prepare supports. Regular discussions of contemporary and relevant historical examples will assist students to understand their work as part of the broader conversation and discourse in painting. Prior or concurrent Drawing classes are recommended.

Prerequisite(s): (1 of ARTH*1220 , ARTH*1510, ARTH*1520), SART*1050, SART*1060

Co-requisite(s): SART*1060 can be taken as co-requisite

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

Department(s): School of Fine Art and Music

SART*2300 Sculpture I F,W (0-6) [0.50]

This course is an introduction to contemporary sculptural concerns through projects, readings and visual research. Sculptural principles of form and space will be addressed through hands-on engagement with a variety of materials and methods. Readings provide an overview of Modernist sculpture and basic critical theory.

Prerequisite(s): (1 of ARTH*1220 , ARTH*1510, ARTH*1520, ARTH*2220), SART*1050, SART*1060

Co-requisite(s): SART*1050 can be taken as co-requisite

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

Department(s): School of Fine Art and Music

SART*2460 Printmaking F (0-6) [0.50]

This course is an introduction to the printmaking media of intaglio, relief and silkscreen. Conceptual issues will be examined in relation to the creation of prints with discussions around the characteristics of the edition, the monoprint and the series through printmaking objects and readings.

Prerequisite(s): (1 of ARTH*1220 , ARTH*1510, ARTH*1520, ARTH*2220), SART*1050, SART*1060

Co-requisite(s): SART*1060 can be taken as co-requisite

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

Department(s): School of Fine Art and Music

SART*2610 Photography I F,W (0-6) [0.50]

This course is an introduction to the historic, conceptual, and material nature of photography in contemporary art. Course content will include basic digital, analogue and studio techniques, and an exploration of historic techniques such as the Photogram and Camera Obscura. Readings, discussions, and assignments will forge connections between historic and contemporary modes of image making, and will encourage students to experiment with innovative ways of utilizing the photographic medium.

Prerequisite(s): (1 of ARTH*1220 , ARTH*1510, ARTH*1520, ARTH*2220), SART*1050, SART*1060

Co-requisite(s): SART*1060 can be taken as co-requisite

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

Department(s): School of Fine Art and Music

SART*2700 Digital Media I: Using Vector and Raster Images F (0-6) [0.50]

This course provides an in-depth introduction to the image making possibilities in digital media. Students will learn various methods of drawing vector-based imagery and compositing raster images in industry-leading drawing and image creation applications. Readings covering relevant principles and theories in digital media will form a critical supplement to the course. Some computer experience is recommended.

Prerequisite(s): (1 of ARTH*1220 , ARTH*1510, ARTH*1520, ARTH*2220), SART*1050, SART*1060

Co-requisite(s): SART*1060 can be taken as co-requisite

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

Department(s): School of Fine Art and Music

SART*2710 Digital Media II: Animation W (0-6) [0.50]

This course adds to the important key concepts and methods unique to digital media introduced in Digital Media I with an in-depth introduction to animation in digital media. Students will learn a number of basic principles and methods in animation using industry standard digital tools. Students will apply their understanding of these concepts and methods for the production of a number of short animated sequences using industry leading vector-based animation and motion graphics application software. Readings covering relevant principles and theories will form a critical supplement to the course.

Prerequisite(s): SART*2700

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

Department(s): School of Fine Art and Music
SART*2800 Experimental Studio I F,W (0-6) [0.50]
This course introduces students to different processes used by the contemporary studio artist, with an emphasis on time-based and interdisciplinary forms of production. Students will be actively engaged in exploring a variety of skills, processes and concepts, in the development of video, multimedia, artist multiples, and site-specific interventions. An understanding of the technical, theoretical, and historical concerns of experimental art practices will provide a solid base for upper level courses, where students will develop a stronger capacity to work with media that are appropriate to realize their ideas.
Prerequisite(s): (1 of ARTH*1220, ARTH*1510, ARTH*1520, ARTH*2220), SART*1050, SART*1060
Co-requisite(s): SART*1050 can be taken as co-requisite
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.
Department(s): School of Fine Art and Music

SART*3090 Drawing II F,W (0-6) [0.50]
This course attempts to foster understanding of the basis and technical issues necessary to the making of drawings while introducing the philosophical and critical issues related to the discipline. This course will consider drawing as an activity with a wide range of applications.
Prerequisite(s): SART*2090
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3200 Painting II F,W (0-6) [0.50]
In this course, technical, aesthetic and philosophical issues central to contemporary painting will be investigated. These include diverse approaches to representational painting today as well as an introduction to abstraction and other non-representational strategies. Activities such as class discussions, field trips and presentations on contemporary artists will assist students to situate their own developing practices within the field.
Prerequisite(s): SART*2200
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3300 Sculpture II F,W (0-6) [0.50]
This is a technical and experimental course. Critical issues in modernist and post-modernist sculpture will be explored and deployed. Projects will focus on the tools and operations of the wood shop, axioms and principles of modernism, operations of the welding shop and 3D printing, and the critical and generative principles of post-modernism.
Prerequisite(s): SART*2300
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3470 Printmaking and Photo/Digital Technologies F (0-6) [0.50]
This course will introduce the use of contemporary digital imaging for printmaking applications in etching, silkscreen and lithography. File preparation, film input, digital prints and mixed media approaches will be covered. Conceptual issues will be examined in relation to the creation of prints with discussions around the use of digital files and output as a source for printmaking.
Prerequisite(s): SART*2460
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3480 Digital Media III: Creating Content for the Web F (0-6) [0.50]
This course introduces students to key methods behind the design, development, and delivery of a modern website. Students will gain a stronger grasp of the syntax, standards and methods for using HTML, CSS, and will be introduced to JavaScript to display a variety of static and dynamic content on the Web introduced in Digital Media I and II. Readings covering relevant principles and theories will give students a stronger critical awareness of the Internet as a medium for expression, and a variety of in-class exercises will guide students towards the completion of a fully functional final website.
Prerequisite(s): SART*2710
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3600 Digital & Non-Silver Photography W (0-6) [0.50]
This course combines non-silver and digital photographic methods as the basis for an aesthetic investigation into the formal, conceptual, technical and theoretical issues related to historic and new technologies in photographic practice. Course content will include non-silver printing such as Platinum/Palladium, large format photography, and an exploration of scale in digital photographic production. In-class discussions, readings and seminars are designed to provide students with a critical and historical understanding of the art-making process.
Prerequisite(s): SART*2610
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3660 Printmaking II F,W (0-6) [0.50]
This course provides an introduction to stone lithography and will continue to investigate the formal and technical aspects of printmaking techniques covered in SART*2460. Students will be actively engaged in exploring contemporary concerns in printmaking through ideas of dissemination, sequence and systems through scrutiny of printmaking objects and readings.
Prerequisite(s): SART*2460
Restriction(s): SART*3450
Department(s): School of Fine Art and Music

SART*3750 Photography II F,W (0-6) [0.50]
This course encourages visual problem solving and analytical skills within an experimental and exploratory studio art practice. Course material is presented through lectures, labs, and critiques to engage with the form, content and technical attributes of the medium. Scale, electronic flash lighting, medium format photography, and darkroom printing will be covered. In-class discussions, readings and seminars are designed to provide students with a critical and historical understanding of the art-making process.
Prerequisite(s): SART*2610
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3770 Experimental Studio II F,W (0-6) [0.50]
Students will explore and consider the found object and appropriation in art, the use of language and text in art, and other conceptual art practices in various media. In a context of critical reading, writing, class exercises and discussion - students will continue developing their technical skills in video and sound production. We may also consider such forms as collage, the artist book and/or artist multiple, performance, social practice art, and other experimental studio strategies.
Prerequisite(s): SART*2800
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

SART*3800 Experiential Learning I S,F,W (0-6) [0.50]
This is an independent study course based on Studio Art-related practical experience. Evaluation will be based on assignments related to work duties. Written proposals, signed by the supervisor and a faculty member, must be submitted to the Director for the School for approval by the last day of course selection in the Fall (for Winter) or Winter (for the following Summer or Fall).
Prerequisite(s): 3.00 credits in Studio Art
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts. Instructor consent required.
Department(s): School of Fine Art and Music

SART*3900 Experiential Learning II S,F,W (0-6) [0.50]
This course provides students with an opportunity to continue the workplace or activity begun in SART*3800 in greater depth, or to experience a new work/study situation. Evaluation will be based on assignments related to work duties. Written proposals, signed by the supervisor and a faculty member, must be submitted to the Director for the School for approval by the last day of course selection in the Fall (for Winter) or Winter (for the following Summer or Fall) semester.
Prerequisite(s): SART*3800 and 3.50 credits in Studio Art
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 80% in all ARTH and SART course attempts.
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

Last Revision: July 4, 2019  2019-2020 Undergraduate Calendar
SART*3090 Drawing III F (0-6) [0.50]
This course will study the technical development of observational drawing as well as the experimental and intentional development of drawing as a contemporary art form. Drawings will be made and discussed with attention to semiotic theory in order to examine the production and interpretation of meaning.
Prerequisite(s): SART*3090
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4130 Drawing IV W (0-6) [1.00]
This is an advanced course which explores drawing through individually oriented production supported by critical study of diverse contemporary approaches to the medium. In this course drawings will continue to be considered in the light of semiotic theory in order to examine the production and interpretation of meaning.
Prerequisite(s): SART*4090
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4410 Printmaking III F (0-6) [0.50]
This course focuses on independent work with an emphasis on an experimental use of printmaking media. Students will continue to investigate digital and traditional printmaking methods. There will be greater emphasis on the critical issues relevant to printmaking with attention to clarity of personal statement, originality and professionalism both in studio practice and discussion.
Prerequisite(s): SART*3450 or (3 of SART*2460, SART*2470, SART*3410, SART*3450, SART*3470)
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4470 Printmaking IV W (0-6) [1.00]
This course focuses on independent work with an emphasis on an experimental use of printmaking media. Students will continue to investigate digital and traditional printmaking methods. There will be greater emphasis on the critical issues relevant to printmaking with attention to clarity of personal statement, originality and professionalism both in studio practice and discussion.
Prerequisite(s): SART*4410
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4660 Topics in Experimental Studio F (0-6) [0.50]
For this advanced course, a specific and timely theme, subject, or technique will be explored in a context of critical reading, writing, class exercises and discussion. Topics will vary according to the proposals of artist-instructors. Students will be encouraged to produce works in media such as video art, audio art, artist book and/or multiple, performance, social practice art, interventions, and other "post-studio" and experimental studio practices.
Prerequisite(s): SART*3770
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.
Department(s): School of Fine Art and Music

THST*3170 Special Topics F (3-0) [0.50]

This course provides students with the opportunity to work intensively in an area of theatre work in a project defined by faculty research. The material and topic will vary but the course will consistently engage with an area of creative practice, such as scenography and design, directing, acting studio or playwriting. This course may be offered as a performance-centered studio, a design studio workshop, or a playwriting seminar, depending on the instructor. Consult the Theatre Studies website for more information on a specific iteration of the course.

Prerequisite(s): 7.50 credits, including THST*2270
Restriction(s): THST*3540, THST*3550, THST*3620, THST*3650, THST*3660, THST*3850 Restricted to students in a Theatre Studies specialization.
Department(s): School of English and Theatre Studies

THST*3190 Theatre Workshop III F (3-2) [1.00]

Students in this course will undertake the design, technical production and performance of a fully realized theatrical production. All production assignments (cast, technical crews, front of house, dramaturgy, assistant director, assistant designer) will be drawn from students enrolled in the course and in cooperation with senior students enrolled in THST*4500. The course will be taught as a workshop in skill-specific modules, out-of-class rehearsals, and technical training crew calls. Depending on the scale of the production and the class enrolments, this course may be co-taught with THST*2190.

Prerequisite(s): 7.50 credits, including THST*2190
Restriction(s): THST*3080, THST*3110, THST*3120, THST*3220, THST*3230 Restricted to students in a Theatre Studies specialization.
Department(s): School of English and Theatre Studies

THST*3260 Shakespeare: Text & Performance S (3-0) [0.50]

This course offers an analysis of a selection of plays by William Shakespeare. In addition to textual analysis, the students will be introduced to the stage history of the plays being considered, with attention to conditions of production. The course normally will include consideration of plays by Shakespeare which are currently in production at the Stratford Festival; students will have the opportunity to see the plays in performance for which an additional fee may be charged. The course is taught as an intensive seminar in conjunction with the Stratford Festival and is offered in Stratford, Ontario. This course features variable content. Please consult the Theatre Studies website for more information.

Prerequisite(s): 2.50 credits in Theatre Studies including (1 of THST*2010, THST*3140, 1.00 credits in English)
Department(s): School of English and Theatre Studies

THST*3340 Voice and Text in Performance S (6-6) [0.50]

Within a studio context, students are introduced to techniques of voice, particularly in relation to performing verse. The course is taught as an intensive lab in conjunction with the Stratford Festival and is offered in Stratford, Ontario. The course may involve a lab fee. Admission to the course is by application to the School of English and Theatre Studies. Further information is available from the School.

Prerequisite(s): 2.50 credits in Theatre Studies including (1 of THST*3080, THST*3110, THST*3190)
Co-requisite(s): THST*3260
Restriction(s): Instructor consent required.
Department(s): School of English and Theatre Studies

THST*3500 Performance Praxis I W (3-2) [0.50]

Students will collaborate in the exploration of theory and creative practice in a project-based course. The projects may be theatrical or media-based, or an integration of both depending on the iteration of the course. Please consult the Theatre Studies website for more information.

Prerequisite(s): THST*2050, THST*2270
Restriction(s): THST*3340, THST*3460, THST*3480, THST*3550, THST*3700 Restricted to students in a Theatre Studies major or minor.
Department(s): School of English and Theatre Studies

THST*3530 Canadian Cinema F (2-3) [0.50]

This course is designed to give the student knowledge and understanding of Canadian film and film makers.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits
Department(s): School of English and Theatre Studies

THST*3600 Directed Readings U (3-0) [0.50]

This course provides Independent study opportunities based upon bibliographies established in consultation with the instructor. An essay will normally constitute the written requirement for the course. Tutoring and/or consultation will be arranged, depending on the topic or materials for study. Projects for this course are subject to the approval of the School, and must be submitted to the Director, on forms provided by the School, no later than the last day of classes in the semester prior to enrolment in the course.

Prerequisite(s): 3.00 credits in Theatre Studies including ([ THST*2010, THST*2230 ) or (THST*3140, THST*2190)], (1 of THST*2050, THST*2080, THST*2120, THST*2240)
Restriction(s): Instructor consent required.
Department(s): School of English and Theatre Studies

THST*3630 Special Studies in Studio Practice U (3-0) [0.50]

The course provides an intensive exploration of one aspect of studio practice: playwriting, acting, design or technical theatre.

Prerequisite(s): 3.00 credits in Theatre Studies including one of the following, as appropriate to the topic of the course: THST*2080, THST*2120, THST*2230, THST*2240.
Equate(s): DRMA*3630
Restriction(s): Instructor consent required.
Department(s): School of English and Theatre Studies

THST*3950 Drama in London U (2-4) [0.50]

This course is designed for students taking the London Semester consisting of a study of theatre events in London, through attending performances, reading texts and meeting for weekly seminars.

Equate(s): DRMA*3950
Restriction(s): Permission of the Co-ordinator of the London Semester.
Department(s): School of English and Theatre Studies

THST*4240 Theatrical Organization and Culture F (3-0) [0.50]

This course studies various models of theatrical organization such as social context, theatrical funding, board and management structures, and artistic mandates together with their implications for theatrical production and interpretation.

Prerequisite(s): 10.00 credits including 1.00 credits in Theatre Studies.
Restriction(s): THST*3240
Department(s): School of English and Theatre Studies

THST*4270 Research Seminar I F (3-0) [0.50]

This course is a research seminar in selected topics in media, theatre and performance. The course features variable content. Please consult the Theatre Studies website for more information.

Prerequisite(s): 10.00 credits, including (1 of THST*2270, THST*3140, THST*3550, THST*3650, THST*3660)
Restriction(s): THST*4320, Restricted to students in a Theatre Studies specialization, with an average of 70% in the specialization.
Department(s): School of English and Theatre Studies

THST*4280 Ensemble Project W (6-9) [1.00]

This course provides Independent study opportunities based upon bibliographies established in consultation with the instructor. An essay will normally constitute the written requirement for the course. Tutoring and/or consultation will be arranged, depending on the topic or materials for study. Projects for this course are subject to the approval of the School, and must be submitted to the Director, on forms provided by the School, no later than the last day of classes in the semester prior to enrolment in the course.

Prerequisite(s): THST*2010, THST*2230, THST*2240, THST*3140, THST*3550, THST*3580, THST*3650, THST*3660
Restriction(s): Restricted to majors in Theatre Studies who have completed a minimum of 14.00 credits with 70% cumulative average in Theatre Studies.
Department(s): School of English and Theatre Studies

THST*4290 Research Seminar II W (3-0) [0.50]

This is an advanced research seminar in selected topics in media, theatre and performance. The course features variable content. Please consult the Theatre Studies website for more information.

Prerequisite(s): 10.00 credits, including THST*4270
Restriction(s): THST*4330, Restricted to students in a Theatre Studies specialization with an average of 70% in the specialization.
Department(s): School of English and Theatre Studies

XI. Course Descriptions, Veterinary Medicine

VETM*3460 Theriogenology P2 (V-V) [0.75]
A lecture and laboratory course covering the normal and abnormal reproductive systems of domestic animals. The course will include mammalian reproductive physiology and histology, diagnosis and treatment of reproductive disorders, including infertility, and management of breeding programs of the common domestic species. An introduction to the new reproductive technologies used in theriogenology will also be provided.

Prerequisite(s): All Phase 1 courses.
Co-requisite(s): All Phase 2 courses.
Department(s): Department of Biomedical Sciences, Department of Population Medicine

VETM*3470 Anaesthesiology and Pharmacology P2 (V-V) [0.75]
This course provides the general principles, pharmacologic basis, and practical applications of general and local anaesthesia in small and large animals. Other topics covered include fluid and acid-base imbalance and the prevention and treatment of surgical shock.

Prerequisite(s): All Phase 1 courses.
Co-requisite(s): All Phase 2 courses.
Department(s): Department of Biomedical Sciences, Department of Clinical Studies

VETM*3510 Principles of Surgery P2 (2-0) [0.25]
The principles of surgery in various animal species are given. The lecture topics include patient and surgeon preparation, tissue handling instrumentation, suturing and surgical principles and approaches to various organ systems and anatomical regions.

Prerequisite(s): All Phase 1 courses.
Co-requisite(s): All Phase 2 courses.
Department(s): Department of Clinical Studies

VETM*4220 Art of Veterinary Medicine III P3 (2-0) [0.50]
This modular course will require students to apply the knowledge and skills acquired in Phases 1 and 2 to problems that incorporate aspects of one or more of the following areas: communications and conflict resolution, ethics, professional behaviour, human-animal interactions, analysis and planning, and business issues. This course will focus on methods to resolve difficulties in the above areas that are interfering with intrapersonal and interpersonal relationships and with how to return abnormal situations to normal ones. Problem-solving, conflict resolution and stress management through application of innate and acquired knowledge and skills will be expected. The course will be taught primarily through case analysis.

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Dean’s Office, Ontario Veterinary College, Department of Population Medicine, Veterinary Teaching Hospital

VETM*4420 Clinical Pharmacology P3 (V-V) [0.25]
This course stresses rational drug therapy through an understanding of drug factors, host factors and disease factors, with emphasis on clinically relevant properties of selected major drug classes and used for therapy (prevention and treatment) in small animals, food animals, and horses.

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Restriction(s): Registration in the D.V.M. Program
Department(s): Department of Biomedical Sciences

VETM*4450 Equine Medicine and Surgery P3 (3-0) [0.50]
The course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the horse. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses.

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Clinical Studies

VETM*4460 Food Animal Medicine and Surgery P3 (V-V) [1.00]
The course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the common ruminant species and swine. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses. The graduating competencies can be found on the OVC website (http://www.ovcnet.uoguelph.ca/homepage/html).

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Clinical Studies, Department of Population Medicine

VETM*4470 Medicine and Surgery of Dog and Cat P3 (V-V) [1.00]
The course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the dog and cat. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses. The graduating competencies can be found on the OVC website (http://www.ovcnet.uoguelph.ca/homepage/html).

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Clinical Studies

VETM*4480 Comparative Medicine P3 (V-V) [0.75]
The course will contribute to students' achievement of selected elements of graduating competency in the context of pet birds, commercial poultry and non-traditional species (fish, amphibians, reptiles, rabbits, rodents, ferrets, non-domestic carnivores and non-domestic ungulates). The primary emphasis is directed towards enhancing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses. The graduating competencies can be found on the OVC website (http://www.ovcnet.uoguelph.ca/homepage/html).

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Pathobiology

VETM*4490 Systems Pathology P3 (V-V) [1.00]
The course will contribute to students' achievement of selected elements of graduating competency in the context of pathology across the range of species. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to carry out the post-mortem examinations, select and perform relevant ancillary diagnostic tests and procedures, interpret findings, and initiate and interpret results of further investigations. The graduating competencies can be found on the OVC website (http://www.ovcnet.uoguelph.ca/homepage/html).

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Pathobiology

VETM*4530 Health Management III P3 (V-V) [0.50]
The course will contribute to students' achievement of greater depth in selected elements of graduating competency in the context of health management in species of their choice. The primary emphasis is directed towards developing species-specific skills, knowledge and attitudes that will permit the entry-level veterinarian to assess and advise on animal production and performance and evaluate the necessity for, and implementation of, health management programs. The course is constructed of a series of species-based modules. Students will be required to take two of the modules. The graduating competencies can be found on the OVC website (http://www.ovcnet.uoguelph.ca/homepage/html).

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Population Medicine

VETM*4540 Surgical Exercises P3 (V-V) [1.75]
Veterinary students receive training in preoperative planning, anaesthesia and surgical techniques, operative room decision making and post-operative care in this laboratory course. Students begin by practicing technical skills on inanimate models. They progress to performing a series of supervised operations designed to parallel the most commonly performed surgeries in private practice. A once weekly rounds period allows discussion of issues arising from the previous anaesthesia and surgery, and planning for the upcoming laboratory. Though some didactic material is presented, the course is mainly experiential. The evaluation outcome of the course is outstanding, pass or fail.

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Restriction(s): Registration in the D.V.M. Program
Department(s): Department of Population Medicine

VETM*4610 Small Animal Stream P4 (V-V) [7.50]
This course is for students who have selected the Small Animal Stream in Phase 4 of the DVM Program. The goal of the small animal stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.

Prerequisite(s): All Phase 3 courses.
Co-requisite(s): VETM*4900
Restriction(s): Registration in the DVM program.
Department(s): Dean’s Office, Ontario Veterinary College
### VETM*4660 Rural Community Practice Stream P4 (V-V) [7.50]

This course is for students who have selected the Rural Community Practice Stream in Phase 4 of the DVM Program. The goal of the rural community practice stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.

**Prerequisite(s):** All Phase 3 courses.

**Co-requisite(s):** VETM*4900

**Restriction(s):** Registration in the DVM program.

**Department(s):** Dean's Office, Ontario Veterinary College

### VETM*4710 Food Animal Stream P4 (V-V) [7.50]

This course is for students who have selected the Food Animal Stream in Phase 4 of the DVM Program. The goal of the food animal stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.

**Prerequisite(s):** All Phase 3 courses.

**Co-requisite(s):** VETM*4900

**Restriction(s):** Registration in the DVM program.

**Department(s):** Dean's Office, Ontario Veterinary College

### VETM*4870 Clinical Medicine III P3 (0-2) [0.25]

This course will contribute to students' achievement of selected DVM 2000 elements of competency in the context of the hospital environment. This is an integrated course in which students will enhance a variety of clinical skills, including physical examination, history taking, problem solving, and ancillary diagnostic tests and procedures. This course is primarily carried out in the Veterinary Teaching Hospital where students will be exposed to case material from the Large and Small Animal Clinics. The emphasis is directed towards enhancing the skills, knowledge and attitudes that will permit the student to maximize the benefit to be derived from senior year courses.

**Prerequisite(s):** All Phase 2 courses.

**Co-requisite(s):** All Phase 3 courses.

**Department(s):** Department of Clinical Studies

### VETM*4900 Veterinary Externship P4 (0-0) [2.50]

This is an eight-week experiential learning opportunity that junior students in the DVM Program must organize by the mid-way through Phase 3. The externship must be in approved private, primary care, veterinary practice. Senior students in the DVM Program, under the supervision of a designated host veterinarian, will experience being part of a team providing health care services to the public. This course will provide students with the opportunity to integrate and apply their knowledge and experience from previous courses, and further refine their problem-solving and communication skills, and enhance their ability to work as part of a team. The evaluation outcome of this course is outstanding, pass or fail.

**Prerequisite(s):** All Phase 1, Phase 2 and Phase 3 courses.

**Department(s):** Department of Clinical Studies

### VETM*4920 Equine Stream P4 (V-V) [7.50]

This course is for students who have selected the Equine Stream in Phase 4 of the DVM Program. The goal of the equine stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.

**Prerequisite(s):** All Phase 3 courses.

**Co-requisite(s):** VETM*4900

**Restriction(s):** Registration in the DVM program.

**Department(s):** Dean's Office, Ontario Veterinary College

</table>
ZOO*2090 Vertebrate Structure and Function F (3-3) [0.50]
This course offers a comparative survey of the structure and functioning of the chordates with emphasis on the vertebrates and includes a laboratory study of the anatomy of selected vertebrates.
**Prerequisite(s):** 4.00 credits including BIOL*1070
**Department(s):** Department of Integrative Biology

ZOO*2700 Invertebrate Morphology & Evolution W (3-3) [0.50]
This course examines the vast diversity of invertebrate taxa and the tools and concepts used to classify them and understand their origins. Principles of zoogeography, phylogeny, natural selection and comparative analyses will form the conceptual backbone of the course. In lectures and labs, students will ‘climb’ the tree of life, from the most ancient pre-invertebrates to more derived forms, and explore their anatomical and morphological diversity.
**Prerequisite(s):** 4.00 credits including BIOL*1070
**Department(s):** Department of Integrative Biology

ZOO*3000 Comparative Histology F (3-3) [0.50]
This course provides an introduction to the microscopic structure of the major organ systems of the vertebrate body. Beginning with an examination of epithelial, connective, muscular, and nervous tissues, the course then examines the comparative histology of the circulatory, nervous, digestive, integumentary, respiratory, excretory, reproductive, endocrine, and sensory systems of vertebrates.
**Prerequisite(s):** ZOO*2090
**Department(s):** Department of Integrative Biology

ZOO*3050 Developmental Biology W (3-3) [0.50]
This course will focus on the development of vertebrates and invertebrates from fertilized egg to adult. It will examine fertilization, cell differentiation into tissues and organs, regulation of cell growth, and transmission of developmental information to the next generation. Throughout, the course will emphasize the evolutionary mechanisms that have shaped developmental patterns in animals.
**Prerequisite(s):** MBG*2040, BIOL*2400 is strongly recommended.
**Department(s):** Department of Integrative Biology

ZOO*3600 Comparative Animal Physiology I F (3-0) [0.50]
This course will examine the physiological processes that enable animals to live within a diverse range of environments. Lectures will focus on the underlying molecular and cellular events that mediate physiological processes and contribute to whole animal homeostasis, and emphasize strategies and adaptations used by different animals when influenced by various environmental conditions. Fundamental mechanisms in animal physiology such as diffusion, osmosis, feedback systems, and homeostasis will be explored in nervous, muscular, endocrine and sensory physiological systems. An associated lab course (ZOO*3610) is available.
**Prerequisite(s):** BIOL*2580, ZOO*2090, (STAT*2040 or STAT*2230 is recommended)
**Department(s):** Department of Integrative Biology

ZOO*3610 Lab Studies in Animal Physiology I F (0-3) [0.25]
This hands-on laboratory course will provide practical experience in comparative animal physiology and complement themes covered in the lecture course (ZOO*3600). Students will learn skills and techniques used for conducting experiments on living animals with the goal of characterizing physiological processes. Students will learn how to collect data, statistically analyze results and write formal laboratory reports.
**Prerequisite(s):** STAT*2040 or STAT*2230
**Co-requisite(s):** ZOO*3600
**Department(s):** Department of Integrative Biology

ZOO*3620 Comparative Animal Physiology II W (3-0) [0.50]
This course will examine the physiological processes that enable animals to live within a diverse range of environments. With a focus on respiratory, cardiovascular, osmoregulatory and digestive physiological processes, the lectures will examine the underlying molecular and cellular events that mediate physiological processes and contribute to whole animal homeostasis. An associated lab course (ZOO*3630) is available.
**Prerequisite(s):** ZOO*3600
**Restriction(s):** ZOO*3210
**Department(s):** Department of Integrative Biology

ZOO*3630 Lab Studies in Animal Physiology II W (0-3) [0.25]
In this hands-on laboratory course, students will apply skills and techniques to conduct experiments on living animals with the goal of characterizing physiological processes. Students will advance their writing skills through preparation of several full lab reports. The last experiment in the course is a self-directed study where students will develop hypotheses, generate and test predictions and design the experiment using tools they have learned in the course.
**Prerequisite(s):** ZOO*3610
**Co-requisite(s):** ZOO*3620
**Restriction(s):** ZOO*3210
**Department(s):** Department of Integrative Biology

ZOO*3700 Integrative Biology of Invertebrates F (3-3) [0.50]
This course explores variation in physiology, reproduction and life history among invertebrates, and the role of invertebrates in marine, freshwater and terrestrial ecosystems. Through field experiences, lab study and a class experiment, we will examine the diverse solutions that invertebrates have evolved to live in very different environments, including: circulation and gas exchange; feeding and digestion; osmoregulation and excretion, nervous system and sensory structures; locomotion and biomechanics, and invertebrate communities.
**Prerequisite(s):** ZOO*2700
**Department(s):** Department of Integrative Biology

ZOO*4070 Animal Behaviour F (3-0) [0.50]
This course provides an introduction to the theories and principles of the behaviour of animals. It includes comparative studies of learning, socialization, social interaction, and other components of animal behaviour.
**Prerequisite(s):** BIOL*2400, (STAT*2040 or STAT*2230)
**Department(s):** Department of Integrative Biology

ZOO*4170 Experimental Comparative Animal Physiology W (3-3) [0.50]
In this course an experimental approach to the study of physiological mechanisms and adaptive responses to changes in the environment will be stressed. The focus of the course will be on laboratory exercises.
**Prerequisite(s):** 1 of BIOM*3200, HK*2810, ZOO*3210, ZOO*3600
**Department(s):** Department of Integrative Biology

ZOO*4300 Marine Biology and Oceanography F (3-3) [0.75]
This intensive two-week course is held in late August or early September before classes commence for the Fall semester. The course is held at the Huntsman Marine Science Centre, St. Andrews, New Brunswick. The ecology, behaviour, physiology, biochemistry, biomechanics of marine plants and animals will be studied as well as basic oceanographic techniques. Students will be able to familiarize themselves with the techniques and equipment involved in various branches of marine biology and oceanography. In addition, to regular tuition fees, students are responsible for the cost of transportation to St. Andrews, and for charges levied by the Huntsman Marine Science Centre for room and board. These fees are paid to Student Finance and Awards of the University of Guelph. A department application form must be submitted for approval before course selection. The signature of the course coordinator is required to select the course. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology.
**Prerequisite(s):** BIOL*3450, ZOO*2700
**Department(s):** Department of Integrative Biology

ZOO*4330 Biology of Fishes W (2-3) [0.50]
This course provides a comparative examination of selected freshwater and marine fishes to illustrate the influence of aquatic environments on life styles, behavioral patterns, physiological responses, population biology and community structure. The use of niche, habitat and ecotone concepts in defining the role of fishes in representative types of aquatic ecosystems will be examined.
**Prerequisite(s):** 15.00 credits including (STAT*2040 or STAT*2230), ZOO*2090
**Department(s):** Department of Integrative Biology

ZOO*4570 Marine Ecological Processes W (3-1) [0.50]
This course provides an advanced analysis of the physical and biogeochemical processes in the world's oceans and the dependence of biological processes on physical and chemical processes from micro- to macro-scales. Topics to be discussed include production and energy transfer within pelagic food webs, export of energy to the benthos, and structure and dynamics of marine communities.
**Prerequisite(s):** BIOL*2060, BIOL*3450, PHYS*1080
**Department(s):** Department of Integrative Biology
### ZOO*4910 Integrative Vertebrate Biology F (3-0) [0.50]

This course examines the proximate and historical causes of diversity in morphology, physiology and behaviour among major groups of vertebrates (fishes, amphibians, reptiles, birds, mammals). First, topics such as vertebrate origins, zoogeography, taxonomy and comparative methods will be developed as a foundation for inquiry. The remainder of the course will be organized around specific contemporary problems in vertebrate biology such as the evolution of endothermy; feeding strategies and metabolism; locomotion and migration; trends in vertebrate reproduction; evolution of brain size and complexity in relation to cognition and communication. Each problem will be explored through analyses of taxonomic diversity, historical and phylogenetic constraints, physiological and developmental causes, and functional effects.

**Prerequisite(s):** BIOL*2400, ZOO*2090  
**Co-requisite(s):** ZOO*3600  
**Department(s):** Department of Integrative Biology

### ZOO*4920 Lab Studies in Ornithology F (0-3) [0.25]

This course provides a practical experience in the study of Ornithology. Using University collections of prepared and preserved specimens and field observations where possible, students will develop and apply skills in identification and sampling, explore relations between species diversity and habitat, and investigate, through guided study, the extent of anatomical, skeletal, reproductive and morphological variation and its functional and evolutionary causes.

**Prerequisite(s):** 14.00 credits including ZOO*2090  
**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information. Instructor consent required.  
**Department(s):** Department of Integrative Biology

### ZOO*4940 Lab Studies in Herpetology W (0-3) [0.25]

This course provides a practical experience in the study of Herpetology. Using University collections of prepared and preserved specimens and field observations where possible, students will develop and apply skills in identification and sampling, explore relations between species diversity and habitat, and investigate through guided study, the extent of anatomical, skeletal, reproductive and morphological variation and its functional and evolutionary causes.

**Prerequisite(s):** 15.00 credits including ZOO*2090  
**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.  
**Department(s):** Department of Integrative Biology

### ZOO*4950 Lab Studies in Mammalogy W (0-3) [0.25]

This course provides a practical experience in the study of Mammalogy. Using University collections of prepared and preserved specimens and field observations where possible, students will develop and apply skills in identification and sampling, explore relations between species diversity and habitat, and investigate through guided study, the extent of anatomical, skeletal, reproductive and morphological variation and its functional and evolutionary causes.

**Prerequisite(s):** 15.00 credits including ZOO*2090  
**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.  
**Department(s):** Department of Integrative Biology
XIII. Diploma Programs

For information about Associate Diploma Programs offered at the University of Guelph and Ridgetown Campus, please refer to the current Diploma Program Calendar. The current Diploma Program Calendar is available on [http://www.uoguelph.ca/diploma_calendar/](http://www.uoguelph.ca/diploma_calendar/).
XIV. General Information

Centre for International Programs

The Centre for International Programs, the first of its kind in Canada, aims to facilitate, stimulate and support a continuously growing range of University involvement in international activities. This goal is accomplished by developing and maintaining contacts with university partners around the world, supporting study abroad programs, and providing liaison with government agencies, private sector companies and non-governmental organizations. The Centre provides information on international opportunities and resources to students and faculty, and manages the University's student exchange programs. The Centre contributes to university policy on internationalization and serves as a focal point for links with other universities, government agencies, and private sector firms wishing to cooperate with the university in international activities.

Diversity and Human Rights

The Office of Diversity and Human Rights located at the north side of the campus at Fielding House, 15 University Avenue East. All enquiries are confidential. Office hours are Monday-Friday: 8:45a.m. - 4:45p.m. Phone: 824-4120, ext. 53000; Website: https://www.uoguelph.ca/diversity-human-rights/.

The Office of Diversity and Human Rights (DHR) is a welcoming, safe, and confidential resource for staff, students and faculty seeking information, training and support on issues relating to diversity, inclusion, equity, and human rights.

In accordance with the Ontario Human Rights Code, the University of Guelph’s Human Rights Policy and Procedures prohibit harassment or discrimination on the basis of: race, colour, ancestry, place of origin (where you were born), ethnic background, citizenship, creed (religion), sex (including pregnancy), disability, sexual orientation, gender expression, gender identity, age, marital status, and family status. In some cases, discrimination includes unfair treatment on the basis of the receipt of public assistance or a pardoned criminal offense.

These Policy and Procedures documents are available at the Diversity and Human Rights website https://www.uoguelph.ca/diversity-human-rights/

Definitions

Harassment is a course of comments or actions that are known, or ought reasonably to be known, to be unwelcome. It can involve words or actions that are known or should be known to be offensive, embarrassment, humiliating, demeaning or unwelcome, based on a ground of discrimination. (as identified in the preceding section.)

Discrimination refers to any form of unequal treatment based on a Code ground that results in disadvantage, whether imposing extra burdens or denying benefits. It may be intentional or unintentional. It may involve direct actions that are discriminatory on their face, or it may involve rules, practices or procedures that appear neutral, but have the effect of disadvantaging certain groups of people. It may be obvious, or it may occur in very subtle ways. Discrimination needs only to be one factor among many factors in a decision or action for a finding of discrimination to be made.

Inquiries and Complaints

All members of the University community (including students, staff and faculty) have the right to seek confidential advice and information about concerns or complaints regarding harassment or discrimination. DHR may assist individuals to resolve complaints by serving as a resource to the parties involved, providing mediation, or facilitating the University's human rights concern and complaint resolution procedures. In addition, any party may consult with DHR regarding any university decision which may relate to human rights.

Services

DHR delivers training and awareness on inclusion, equity, accessibility and human rights issues to all members of the University community; connects students, staff and faculty involved in human rights disputes with trained and independent support personnel; and in collaboration with university constituents, coordinates the university’s compliance with federal and provincial initiatives and legislation relating to human rights, equity, and accessibility.

Policy on Intellectual Property

The University of Guelph (the “University”) is one of the most research intensive universities in Canada, and has a long history of high-quality, innovative research that changes lives and improves life. The University is committed to enabling and supporting the people and partnerships that advance the quality, pre-eminence and societal value of the University’s research and creative endeavors.

It is recognized that in the course of research, new Intellectual Property will be created that may be commercially valuable and that may require patent or other protection in order to reach its full potential. Accordingly, the goal of this Policy is to encourage the creation of Intellectual Property and to facilitate its development and commercialization, while preserving the principles of academic and intellectual freedom.

No Personnel will be obliged to engage in the commercial exploitation of the results of their University Activities or to provide commercial justification for it, except as required in any grant application, award, or Contract.

The fundamental principle of this Policy is that, subject to the specific exceptions set out herein, Intellectual Property is owned by those who create it.

This Policy replaces the Inventions Policy (1991), the Copyright Policy (1989) and the Software Creation Policy (1989). It does not replace or supersede any other policy or collective agreement.

This Policy is effective as of May 1, 2014 and is not retroactive. This Policy applies to all Personnel.

Section 1: Definitions

1.1 “Commercialization” means the patenting, marketing, manufacturing, sale, distribution, licensing, sublicensing, transferring, granting of rights of use or leasing of Intellectual Property or products or services covered by, claimed by, or incorporating Intellectual Property.

1.2 “Contract” means a written agreement between the University and a Personnel and/or a third party. Contract shall also mean the terms or conditions under which funding is provided to the University to support the Personnel’s University Activities.

1.3 “Copyright” means the rights granted under the Copyright Act, RSC 1985, c.42, as amended from time to time.

1.4 “Creator” means the person or persons who creates, conceives, designs, discovers, develops, invents or authors Intellectual Property.

1.5 “Intellectual Property” means any result of intellectual or artistic activity and includes, but is not limited to Works, Tangible Research Property, software, databases and database layouts, Inventions, industrial or artistic designs, trade marks, trade names, domain names, integrated circuit topographies, know-how and trade secrets, whether or not registerable or registered under the law.

1.6 “Invention” means the rights associated with any patentable or potentially patentable idea, discovery or know-how and any associated or supporting technology that is required for development or application of the idea, discovery or know-how.

1.7 “Moral Rights” means the Canadian statutory rights of an author of a work in which Copyright subsists to be associated with the work and to prevent the distortion, mutilation or modification of the work to the prejudice of the honour and reputation of the author.

1.8 “Net Revenue” equal those gross receipts that the University is entitled to retain from Commercialization activity, less: (i) the University’s out-of-pocket costs and fees associated with securing, maintaining and enforcing intellectual property protection such as patenting and litigation expenses, (ii) out-of-pocket costs incurred by the University in the licensing of the intellectual property and (iii) any out-of-pocket expenses in making, shipping or otherwise distributing Tangible Research Property.

1.9 “Personnel” means one or more individuals carrying on the University Activities, paid or unpaid and who is are not a Member as defined in the Collective Agreement between the University of Guelph and the University of Guelph Faculty Association. Personnel include but are not limited to, Professor Emeriti, staff, students, sessional lecturers, post-doctoral fellows, volunteers and adjunct faculty. In the absence of a Contract governing new Intellectual Property created during their visit, visiting scientists and visiting students are considered Personnel for the purpose of this Policy.

1.10 “Principal Investigator” means the Personnel who is identified as principally responsible for the performance and supervision of research associated with a Contract.

1.11 “Tangible Research Property” means plant germplasm, cell lines, organisms, proteins, plasmids, DNA/RNA, chemical compounds, transgenic animals and other materials useful for research or for commercial purposes for which patent applications are not filed or, if filed, do not issue.

1.12 University Activities” means activities which are carried on by Personnel in the course of their employment or association with the University, or using University facilities, equipment, or other resources.

1.13 “Work” means original literary, dramatic, musical and artistic work and includes every original production in the literary, scientific or artistic domain, whatever maybe the mode or form of its expression such as websites, books, texts, articles, monographs, glossaries, bibliographies, cartographic materials, modular posters, study guides, laboratory manuals, correspondence course packages, interactive textbooks, course work delivered on the Internet, including distance education, multimedia instructional packages, syllabi, tests and work papers, lectures, musical and/or dramatic compositions, choreographic works, performers’ performances, unpublished scripts, films, filmstrips, charts, transparencies, other visual aids, video and audio tapes and cassettes, computer programs, live video and audio broadcasts, programmed instructional materials, drawings, paintings, sculptures, photographs, and other works of art.

Section 2: Copyright

1. Copyright belongs to Personnel who create Work, even if it is produced during the course of their University Activities, except in those cases where:

   a. there is a pre-existing Contract that assigns the ownership rights to the University or to a third party; or

   b. the Work is produced according to Section 2.2.

2. No Personnel shall claim any rights, and the University reserves to itself the ownership rights in any Works that are:
a. encompassed within section 2.1(a) above;
b. produced by Personnel at the specific request or direction of the University;
c. produced by Personnel employed for the express purpose of creating or producing Works, or where there is an explicit requirement in a Personnel’s job description for this responsibility;
d. an assessment, grading, report or correspondence produced pursuant to Personnel’s University Activities;
e. Works provided to a Personnel to assist him/her in carrying out his/her duties and modified by the Personnel, such as a laboratory manual; or
f. produced and designed to assist in the day-to-day administration of the University’s affairs.

3. Personnel shall not be required to waive their Moral Rights.

4. In the event that Work is the creation of more than one Personnel, the provisions of this Policy shall apply on a pro rata basis to all the Creators of the Work, unless a written agreement among the Creators, or a Contract states otherwise.

5. Where a Work is owned by a Personnel, Personnel may enter into an agreement with the University, at each party’s discretion, for the performance of commercialization activities such as evaluation, marketing and negotiation of licenses. The Creator(s) will be entitled to receive seventy-five percent (75%) of Net Revenues received by the University as a result of successful commercialization of a Work owned by a Personnel.

6. The University may, at any time, elect to terminate or relinquish its rights in any Work. In the event that the University or assignee relinquishes its rights in any Work, all Intellectual Property rights shall revert back to the Creator(s). In the event that any Creator is deceased, the rights shall revert to the estate of that Creator.

7. All Personnel who own Copyright pursuant to this Policy hereby grant to the University:
   a. a nonexclusive, royalty-free, irrevocable and non-transferable license to use such works in other, non-commercial teaching and/or scholarly, research or creative activities of the University, subject to copyright requirements of academic journals and other vehicles of scholarly publication; and
   b. in the case of written works submitted as partial fulfillment of the requirements for completing a degree at the University, the non-exclusive right to reproduce, translate, and/or distribute the written work worldwide in print and electronic format and in any medium, including but not limited to audio or video.

This license shall not apply to a Personnel’s personal documents, including unpublished lecture notes, course notes, lab notes or any work-in-progress.

Section 3: Inventions and Tangible Research Property

3.1 Inventions and Tangible Research Property belong to Personnel who create the Invention or Tangible Research Property, even if it is produced during the course of their University Activities, except in those cases where:
   a. there is a pre-existing Contract that assigns the ownership rights to the University or to a third party; or
   b. the Invention or Tangible Research Property is created according to Section 3.2.

3.2 No Personnel shall claim any ownership, and Personnel hereby assign ownership to the University in any Inventions or Tangible Research Property that is:
   a. encompassed within section 3.1(a) above;
   b. produced by Personnel at the specific request or direction of the University; or
   c. produced by Personnel employed for the express purpose of creating or producing Inventions or Tangible Research Property, or where there is an explicit requirement in a Personnel’s job description for this responsibility.

3.3 Prior to proceeding with a patent application or Commercialization activity, Personnel shall provide written disclosure to the University of any Invention made by him/her. Such disclosure shall assert whether ownership of the Invention is claimed by Personnel according to this Policy and the Personnel’s intention to pursue Commercialization independently or with the assistance of the University. If the University fails to challenge in writing the assertions of the Personnel within three (3) months of the receipt of disclosure of the Invention, the University shall be deemed to have accepted as accurate the assertions set out in the disclosure. Failure by a Personnel to disclose an Invention shall not terminate or waive any potential claim by the University regarding Intellectual Property rights.

3.4 Subject to section 3.3, where Personnel own an Invention or Tangible Research Property according to this Policy, they may, at their sole discretion, make arrangements for protection and Commercialization at their sole expense and benefit.

3.5 Where an Invention or Tangible Research Property is owned by Personnel, Personnel may enter into an agreement with the University, at each party’s discretion, for the performance of commercialization activities such as evaluation, patent protection, marketing and negotiation of licenses. The Creator(s) will be entitled to receive fifty percent (50%) of Net Revenues as a result of commercialization of an Invention or Tangible Research Property by the University.

3.6 Where an Invention is owned by the University, Personnel may enter into an agreement with the University, at each party’s discretion, for the performance of commercialization activities such as evaluation, patent protection, marketing and negotiation of licenses. The Creator(s) will be entitled to receive fifty percent (50%) of Net Revenues as a result of Commercialization of an Invention by University.

3.7 Where Tangible Research Property is owned by the University according to Section 3.2, University reserves to itself all ownership rights and revenues.

3.8 The University reserves to itself and Personnel shall grant a fully paid-up, non-exclusive, royalty-free, irrevocable and non-transferable license to use any Personnel-owned Invention or Tangible Research Property made, discovered or developed using the University’s facilities, support personnel, support services, equipment or materials, for academic and research purposes.

3.9 In the event that an Invention or Tangible Research Property is the creation of more than one Personnel, the provisions of this article apply on a pro rata basis to all the Creators unless a written agreement or Contract states otherwise.

3.10 The University may, at any time, elect to terminate or relinquish its rights in any Invention or Tangible Research Property. In the event that the University or any other assignee relinquishes its rights in any Invention, all Intellectual Property rights shall revert back to the Creator(s). In the event that any Creator is deceased, the rights shall revert to the estate of that Creator.

Section 4: Additional Items

4.1 The Principal Investigator has the duty to inform any collaborators or co-investigators, including all Personnel involved in the research, of the terms of any Contract governing the research, including terms related to ownership or Commercialization of Intellectual Property.

4.2 The name “University of Guelph” and abbreviations thereof, and the logos of the University of Guelph and their component parts, are trademarks and service marks of the University and are owned by the University. Personnel will take all reasonable and practicable steps to ensure that the name of the University and such other trade-marks and service marks are not used in connection with Intellectual Property without the prior written agreement of the University. No statement made by a Personnel with respect to Intellectual Property may, in any way, imply approval, promotion or use of such Intellectual Property by the University without the prior written agreement of the University. Notwithstanding the foregoing, nothing shall prevent Personnel from stating his/her employment, rank and title in connection with Intellectual Property.

4.3 This Policy is effective as of its implementation, and all Contracts between a Personnel and the University made prior to this date will be governed under the terms of those Contracts and the applicable policies in place at the time of the Contract.

4.4 Subject to Section 5, the Vice-President (Research) is responsible for making such determinations as are necessary under this Policy.

Section 5: Dispute Resolution

5.1 It is recognized that disputes may arise between the University and Personnel with respect to Intellectual Property and the implementation of this Policy. When disputes arise, every effort shall be made by all parties acting in good faith to resolve disputes at the lowest possible level.

5.2 If a dispute cannot be resolved informally, the matter will be referred to the Vice President (Research) (or his/her delegate), who will consult with others as appropriate and issue a written decision.

Section 6: Policy Review and Procedures

6.1 The Vice President (Research) is authorized to develop and up-date procedures to aid implementation of the Policy.

6.2 Amendments to the Policy require the approval of the Board.

6.3 The Board of Governors will review this Policy at least every five (5) years.

Policy on Non-Academic Misconduct

The University of Guelph's core value is the pursuit of truth. It is animated by a spirit of free and open enquiry, collaboration, and mutual respect. It asserts the fundamental equality of all human beings and is committed to creating for all members of its community, an environment that is hospitable, safe, supportive, equitable, pleasurable, and above all, free and open enquiry, collaboration, and mutual respect. It is recognized that disputes may arise between the University and Personnel with respect to Intellectual Property and the implementation of this Policy. When disputes arise, every effort shall be made by all parties acting in good faith to resolve disputes at the lowest possible level.

Failure to abide by these responsibilities may result in penalties. The University of Guelph has developed a policy that sets out the University’s expectations regarding conduct as members of the University of Guelph community. Please click onto the following to view the Policy on Non-Academic Misconduct: https://www.uoguelph.ca/secretariat/office-services/student-judicial-services/non-academic-misconduct/policy-non-academic-misconduct
XIV. General Information, Policy on Non-Academic Misconduct

Purpose and Jurisdiction

1. The University of Guelph is an environment that develops the person, scholar & citizen. This Policy sets out the University’s expectations regarding student conduct as members of the University of Guelph community.

2. In this Policy, a “student” is any person registered in a diploma, undergraduate or graduate program at the University of Guelph or otherwise taking credit or non-credit courses offered by the University of Guelph, or any person who was a student at the time the alleged breach occurred. “Campus” means the physical grounds of either the University’s main campus or the regional campuses. This Policy does not apply to students registered at University of Guelph-Humber programs and attending Humber College.

3. Except as noted in paragraph 4, 5 and 6 this Policy applies to all student non-academic behaviour on campus and to students who are engaged in University programs off campus. Allegations regarding other off campus conduct may be brought forward under this Policy if the violation in question materially affects the safety, integrity or educational interests of the University community or as provided under the Community Standards Protocol.

4. Alleged breaches of this Policy which arise within University residences may in the discretion of Student Housing Services, proceed under the Residence Community Living Standards.

5. Alleged breaches of this Policy which arise at the Ridgetown campus will be subject to the process and procedures specific to that campus.

6. Alleged breaches of this Policy committed by students who are identified as Students-At-Risk by the Student At-Risk Team (“SART”) may at the discretion of the SART team, proceed under the Protocol for Responding to Students At-Risk. Alleged incidents of sexual violence, as defined in the Sexual Violence Policy, will proceed under the Sexual Violence Policy and the Sexual Violence Policy – Procedures Document for Students.

University Community Values

7. The University of Guelph’s core value is the pursuit of truth. It is animated by a spirit of free and open inquiry, collaboration, and mutual respect. It asserts the fundamental equality of all human beings and is committed to creating for all members of its community, an environment that is hospitable, safe, supportive, equitable, pleasurable, and above all, intellectually challenging (University of Guelph Act, 1964). It is expected that all members of the University community will support and enrich these values by interacting with each other in a manner that is respectful, civil and consistent with the following responsibilities.

Failure to abide by these responsibilities, or assisting or conspiring with another individual to act contrary to these responsibilities may result in penalties.

Diversity

8. Students have a responsibility to help create and uphold an environment that respects the diversity and differences of members of our campus, and allows all members to be treated with dignity, worth and respect. An example of this type of responsibility is the requirement to abide by the University’s commitment to the Ontario Human Rights Code and the Human Rights at the University of Guelph Policy 1, including but not limited to refraining from engaging in activities that express intolerance on grounds prohibited by the Human Rights at the University of Guelph Policy.

1 Allegations of breach may be pursued either under this Policy or the applicable human rights policy or legislation

Integrity

9. Students have a responsibility to help maintain the integrity of the University as a community for learning. An example of this type of responsibility is the requirement to abide by all Federal, Provincial and Municipal laws2 and University policies including but not limited to:

a. Drugs and Drug Paraphernalia - to not possess, use, supply or traffic illegal drugs, drug paraphernalia or controlled substances.

b. Alcohol - to possess, purchase, and/or use of liquor by those under the age of 19 is prohibited. The sale or provision of alcohol to anyone under the age of 19 is prohibited. Consumption or open possession of liquor is prohibited on campus other than in those areas where it has been specifically permitted.

c. Smoking - to abide by the University’s policy, Smoking in the Workplace, which includes not smoking or using an electronic cigarette inside any University building or vehicle, or within nine metres of any building entrance or exit.

d. Information Technology (IT) - to use computer login codes or passwords and University IT resources (e.g., computing account or workstation) in accordance with the University’s Acceptable Use Policy.

e. Permits and Identification - to not acquire, use, loan or disseminate University identification, express plans, building access cards, bus passes or parking permits that are stolen, borrowed, cancelled, lost, false, altered or expired. To not loan any of your identification to others nor alter or produce fake identification.

2 Allegations of criminal or other offences may be addressed off-campus under the applicable legislation. The University may also initiate charges under this Policy with respect to the same incident(s) if Campus Community Police in consultation with the Associate Vice-President Student Affairs determine that the allegation in question materially affects the safety, integrity and/or educational interests of the University community.

Learning

10. Students have a responsibility to help support community members’ access to the tools they need to engage in their learning and development, both in and outside of the classroom. An example of this type of responsibility is the requirement to abide by the following:

a. University Property - to respect posted hours and limits on entry where such conditions exist.

b. Property - to not destroy, tamper with, deface or vandalize, monopolize, unlawfully access, remove, obtain through fraudulent means, or possess property not your own, including but not limited to property of the University and personal property.

c. Disruption - to not interfere with the normal functioning of the University, nor to intimidate, interfere with, threaten or otherwise obstruct any activity organized by the University, including classes, or to hinder other members of the University community from being able to carry on their legitimate activities, including their ability to speak or associate with others.

Safety

11. Students have a responsibility to support an environment that enables students to be safe and free from harm3 An example of this type of responsibility is the requirement to abide by the following:

a. Harassment - to treat all members of the University community with respect and without harassment. Harassment is defined as any attention or conduct (oral, written, virtual, graphic or physical) by an individual or group who knows, or ought reasonably to know, that such attention or conduct is unwelcome/unwanted, offensive or intimidating. Examples include but are not limited to bullying and haz ing.

b. Bodily Harm - to not engage in activities that are likely to endanger the health or safety of yourself or another person, or to assault or threaten to assault another person or to knowingly cause another person to fear bodily harm.

c. Firearms and Other Weapons - to not bring on campus any firearms or weapons (examples include but not limited to: BB guns, sling shots, paintball guns, firecrackers, gunpowder or any other forms of unauthorized hazardous materials). Students are not allowed to use any objects to injure, threaten or intimidate a person.

d. Fire and Life Safety Equipment - to not tamper or interfere with, discharge or activate any life safety or fire equipment on campus unless for the purposes of responding to an emergency. Life safety equipment includes but is not limited to defibrillators, fire extinguishers, fire alarm s and emergency phones.

e. Guests - to take reasonable steps to ensure your guests comply with this Policy. Students may be held responsible for any breach of the rules committed by your guests on campus.

3 Alleged incidents of Sexual Violence, as defined in the Sexual Violence Policy, will proceed under the Sexual Violence Policy and the Sexual Violence Policy – Procedures Document for Students.

Interim Suspension

12. If a student has been charged with a breach under this Policy and a student’s conduct raises a reasonable apprehension of harm to the student or to others at the University, or the normal functioning of the University, the President or designate may, in his or her discretion, implement an interim suspension order. A Judicial Hearing will be undertaken as soon as possible and, in any event, no longer than fourteen working days from the laying of the charge.

Process - Main Campus

13. Students who do not comply with these responsibilities may be charged with a breach of this Policy in two ways:

a. a Notice of Offence issued by Campus Community Police, or

b. a charge laid by an individual or by the University.

14. The hearing process under this Policy is carried out by the Judicial Committee based on the principles of fairness, participation and efficiency.

15. The Judicial Committee has authority to issue orders and penalties as outlined in its Terms of Reference. If a student has been found guilty of previous breaches of this Policy or the Residence Community Living Standards, that information is made available to the Judicial Committee for penalty consideration.

Information on the Judicial procedures or common penalties may be obtained from the Judicial Website, or by calling the Judicial Officer, University Centre, at extension 52464 or from the Director’s Office at Ridgetown campus.

Process - Regional Process and Procedures for the Ridgetown campus is available at: http://www.uoguelph.ca/registrar/calendars/diploma/current/
Periodic Review Process

16. This Policy will be reviewed no less frequently than every five years by the Student Rights & Responsibilities Committee. Comments and specific suggestions for amendments or additions to the Policy are welcome at any time and should be referred to the Office of Student Affairs at: st_affs@uoguelph.ca.

Notification of Disclosure of Personal Information to Statistics Canada

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide range of matters, including education. It is essential to be able to follow students across time and institutions to understand, for example, the factors affecting enrolment demand at postsecondary institutions. The increased emphasis on accountability for public investment means that it is also important to understand ‘outcomes’. In order to conduct such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada, student identification information (student’s name, student ID number, Social Insurance Number), student contact information (address and telephone number), student demographic characteristics, enrolment information, previous education, and labour force activity. The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used for statistical purposes only, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student. Students who do not wish to have their information used can ask Statistics Canada to remove their identifying information from the national database. On request by a student, Statistics Canada will delete an individual’s contact information (name, address, or other personal identifiers) from the PSIS database. To make such a request, please contact us: Via telephone: Monday to Friday 8:30 A.M. to 4:30 P.M. EST/EDST 1-800-263-1136 (Toll Free) or 1-514-283-8300 Via mail: Institutional Surveys Section, Centre for Education Statistics, Statistics Canada, Main Building, SC 2100-K 100 Tunney's Pasture, RHC 13th floor Ottawa, Ontario, K1A 0T6 Via e-mail: PSIS-SIEP_contact@statcan.gc.ca Further details on the use of this information can be obtained from the Statistics Canada Web site http://www.statcan.gc.ca/eng/start

University ID Cards

A University ID Card is issued to each student registered at the University. The following regulations apply:

1. The University of Guelph Card must have: the University of Guelph logo; the cardholder’s surname, first name and identification number; a colour photograph of the cardholder; a barcode for library check-out privileges; a magnetically encoded stripe on the back of the card; and a brief summary of the rules and regulations for use of the card.

2. The Card is the property of the University of Guelph.

3. The Card is not transferable and the cardholder will be responsible for all use made of the Card unless and until written notice is received by Enrolment Services, Office of Registrarial Services.

4. Presentation of the Card will be required before certain University services will be extended. University services may be denied to an individual who does not present a valid card.

5. The Card may not be retained as collateral for any University service except for those services holding and displaying a permit, signed by the Registrar authorizing the withholding of the student, faculty or staff identification card for short periods while that person is utilizing the services offered.

6. A University Card will be issued to each new student. New students who do not obtain a card must contact the ID Card Centre at Enrolment Services, level 3, University Centre for assistance.

7. The University of Guelph ID Card colour photo must show a clear, front view of the applicant’s full face. Hats, headbands or sunglasses may not be worn in the photo. The applicant’s eyes must be open and looking directly ahead. Head coverings worn for religious or medical reasons can be worn but must not cover any part of the applicant’s face. The head covering must not obscure or obstruct a full front view of the applicant’s face, nor can it cast a shadow on the face. Persons with a niqab or burka who require their University ID Card be issued at the University of Guelph campus will have a female staff member photograph and verify the individual’s identity in a private setting.

8. Loss or finding of the University Card should be reported to the ID Card Centre at Enrolment Services.

9. A service charge will be levied for replacement cards.

E. Allen-Vercoe, Professor, B.Sc (University of London), Ph.D. (Open University, UK)

J. Bag, Adjunct Professor, B.Sc., M.Sc., Ph.D. (CALC.)

M. Baker, Professor, B.Sc. (W.LAUR.), M.Sc., Ph.D. (WAT.)

A.J. Bendall, Associate Professor, B.Sc. (CANBERRA), Ph.D. (SYDNEY)

M. Brauer, Associate Professor, B.Sc. (CALG.), M.Sc., Ph.D. (WISC.)

M. Campbell, Professor and VP Research, MA (OXFORD), B.Sc., Ph.D. (GUELPH)

A.J. Clarke, Professor, B.Sc., M.Sc., Ph.D. (WAT.)

J.J. Colasanti, Associate Professor, B.Sc., Ph.D. (W.ONT.)

G. Cox, Assistant Professor, B.Sc., Ph.D. (LEEDS)

J. Dawson, Professor, B.Sc. (W.LAUR.), Ph.D. (ALTA.)

M. Emes, Professor, B.Sc., Ph.D. (SHEFFIELD)

J. Geddes-Mcallister, Assistant Professor, B.Sc., M.Sc. (LETHBRIDGE), Ph.D. (BR. COL.)

S. Graether, Associate Professor, B.Sc., M.Sc., Ph.D. (QU.)

G. Harauz, Professor, B.A.SC., M.Sc., Ph.D. (TOR.)

N. Jones, Professor, B.Sc. (GUELPH), Ph.D. (TOR.)

P.D. Josephy, Professor, B.Sc. (TOR.), Ph.D. (BR.COL.)

A. Kaushik, Adjunct Professor, B.V.SC., M.V.SC. (HISBA), D.V.SC. (INSECT), PARIS)

C. Khursigara, Associate Professor, B.Sc., Ph.D. (MCG.)

M.S. Kimber, Associate Professor, B.Sc., Ph.D. (TOR.)

J. Lalonde, Assistant Professor, B.A. (OTT.), M.A., Ph.D. (MCG.)

R. Lu, Associate Professor, B.Sc. (WUHAN), M.MED. (BEIJING), Ph.D. (SASK.)

J. Mathur, Associate Professor, B.Sc., M.Sc. (LUCKNOW U, INDIA) Ph.D. (GORAHPUR, INDIA)

B. Meng, Associate Professor, B.Sc., M.Sc., (HEBEI AGRIC.), Ph.D. (CNEL)

A.R. Merrill, Professor, B.Sc. (LETH.), Ph.D. (OTT.)

R.D. Mosser, Associate Professor, B.Sc., Ph.D. (WAT.)

R.T. Mullen, Professor, B.Sc., Ph.D. (ALTA.)

L.M. Mutharia, Associate Professor, B.Sc., M.Sc. (NAIROBI), Ph.D. (BR. COL.)

A. Nassau, Associate Professor, B.Sc., M.Sc. (AMST), Ph.D. (LEIDEN)

M.L. Perreault, Assistant Professor, M.Sc., Ph.D. (MCM.)

S.J. Rothstein, Professor, B.A. (SWARTHMORE), Ph.D. (WISC.)

S. Ryan, Assistant Professor, Ph.D. (U of OTT.)

S. Seah, Associate Professor, B.Sc., M.Sc. (SINGAPORE), Ph.D. (SHEFF.)

R. Shapiro, Assistant Professor, B.Sc. (MCG.), Ph.D. (TOR.)

I. Tetylow, Associate Professor, B.Sc. (NEWCASTLE), Ph.D. (BANGOR)

J. Uniacke, Associate Professor, Ph.D. (CDIA)
School of Environmental Design and Rural Development

School of Environmental Design and Rural Development

School of Environmental Design and Rural Development
A corequisite is a course where the content is integrated with that of another course such that the courses must be taken simultaneously.

Course
A course is an organized unit of study extending over a semester, (e.g. Economics ECON*1100).

Course Attempt
A course attempt reflects the situation where a student has completed courses either satisfactorily or unsatisfactorily.

Course Equate
Equate indicates a course identical to the one under which it is listed. The course may have been re-numbered or may be cross-listed under two subject areas. Students will not be permitted to register in both equated courses.

Course Level
Course level denotes the seniority of a course. 1000-level and 2000-level courses are considered first and second year courses. 3000-level and 4000-level courses are considered senior level courses.

Course Load
Course load denotes the total weight of the credits in which a student is enrolled determining part-time or full-time status. Courses taken via Letter of Permission are not used to calculate course load.

Course Restriction
A restriction is a "rule" that is placed on the computer system (Colleague) at the direction of an academic department so that particular students may or may not register in particular courses. The course may be restricted because there is sufficient overlap in content with another course so that it is inappropriate for the student to take a similar course for credit. In a different instance, the course may be restricted by "Instructor Consent" so that the student must discuss the special requirements of the course with the instructor before enrolling. Or, alternatively, the restriction may reflect a "Priority Access" designation for enrolment management purposes. (See Priority Access).

Course Section
A course section is a subgroup of a course that denotes time and location.

Course Selection
Course selection is the process by which students select course sections for the succeeding semesters.

Credit
A credit is a unit of academic measurement equivalent to a single-weighted one-semester course.

Credit Standing
Credit standing (CRD) denotes that the student has successfully completed a course, but was not assigned a numerical grade.

Cumulative Average
Cumulative Average is calculated by dividing the weighted course total by the total credit attempts over all semesters (see Weighted Course Total).

Degree Program
See Program and Baccalaureate.

Deferred Privilege
A deferred privilege (DEF) is a temporary extension of time granted at the discretion of a Program Committee to a student for completion of the requirements of a course, normally for illness or compassionate reasons.

Diploma (degree-level)
See Secondary Area of Study.

Diploma Program Calendar
The Diploma Program Calendar is an annual publication containing official information about Associate Diploma Programs and regulations of the University of Guelph and Ridgetown campus.

Drop Period
The drop period for single semester courses starts at the beginning of the add period and extends to the 40th class day where students are permitted to drop a course for the current semester.
Elective
An elective is a course, acceptable within the program but chosen at the discretion of the student.

Equate
See Course Equate.

Faculty Advisor
See Chapter VII - Academic Advising.

Grade Report
A grade report is released by the Registrar to each student at the conclusion of a semester via WebAdvisor. It notes the courses attempted and the grades assigned (if applicable).

Hiatus
See Withdrawal.

In-course Student
In-course refers to a student enrolled in a program of study at the University.

Mailing Address
The mailing address is a temporary address used for mailing if one is recorded; otherwise the home address is used.

Minor
See Secondary Area of Study.

New Student
New student refers to a student who has never before been registered at the University of Guelph.

Prerequisite
A prerequisite is a prior requirement for entry into a course. Where a course is specified as a prerequisite, pass standing in the course is required.

Priority Access
Priority Access is the process by which a department implements course restriction rules in order to limit registration in a course where enrolment demand habitually exceeds course capacity and where there is demonstrated need to restrict access to a particular cohort of students on a priority basis. In general, course restrictions are clearly defined in the calendar course listings so that students are advised in advance of the intended audience for the course.

Program
A program is a structure of courses leading to a University degree (e.g. B.A.Sc. program).

Program Counsellor
See Chapter VII - Academic Advising.

The Program Counsellor is someone who assists students in the development of educational plans which are realistic and compatible with their life goals by helping to identify and assess alternatives and consequences of decisions, and providing interpretation of regulations applying to the specific degree program.

Registration
Registration is the official enrolment of students in the University for a particular semester, and includes the selection of course sections and the payment of tuition fees and, where appropriate, other University fees.

Required to Withdraw
See Rustication.

Restricted Elective
A restricted elective is a course which must be chosen from a stated group of courses to satisfy the program requirements.

Restriction
See Course Restriction

Rustication
A defined period of time during which the student is not eligible to register in their current academic program as a result of an academic review decision. After the period of rustication the student must apply for re-admission to the University of Guelph.

Schedule of Dates
The schedule of dates is a list of significant dates at the University, approved by Senate.

Schedule of Studies
A schedule of studies is the requirements for specializations, majors, minors, and course offerings. The curriculum of a secondary area of study may be composed of elements of the core course offerings of a major, or may be a coherent package of courses organized around a theme, a course of study that bridges two or more disciplines, and/or a training program for a particular skill. Secondary Area may be a minor or degree-level certificate or diploma.

Secondary Area of Study
An identified set and sequence of courses, and/or other units of study, research and practice within an area of disciplinary or interdisciplinary study, which is completed on an optional basis while fulfilling the requirements for the awarding of a degree, and may be recorded on the graduate's academic record. The curriculum of a secondary area of study may be composed of elements of the core course offerings of a major, or may be a coherent package of courses organized around a theme, a course of study that bridges two or more disciplines, and/or a training program for a particular skill. Secondary Area may be a minor or degree-level certificate or diploma.

Semester
A semester is an independent academic period of 15 weeks, half of an academic year; similar to a term at other universities. Summer semester is from May to August. Fall semester is from September to December. Winter semester is from January to April. (see Weighted Course Total)

Semester Average
Semester Average is calculated by dividing the weighted course total by the total credit attempts in the semester (see Weighted Course Total).

Semester Level
See Class Level.

Session
A session is an academic period of 7 weeks within the Summer semester, including 6 weeks of classes and 1 week of examinations. Courses presented during a session will be equivalent to a regular semester offering.

Specialization
For specialization see schedule of studies.

Subject
A subject is a defined sector of study composed of 1 or more courses within a discipline.

Supplemental Privilege
Supplemental privileges are granted at the discretion of the Program Committee, and in consultation with the instructor, affording a student who has received a failing grade on the original course attempt, the opportunity to obtain credit for the course while retaining the original failing grade.

Transcript
A transcript is an official document prepared by the Registrar recording a student's courses and grades. After convocation, the degree earned including the area(s) of specialization (major, minor, area of concentration, area of emphasis), graduation standing, and the conferral date are noted on the transcript.

Two-Semester Course
A two-semester course is a course that is taken over 2 continuous semesters and counts as 2 course attempts for classification, continuation of study and calculation of fees. Two semester courses cannot be split.

Undergraduate Calendar
The undergraduate calendar is an annual publication containing official information about the undergraduate academic programs and regulations of the University.

Weighted Course Total
Weighted Course Total is the sum of the credit weights multiplied by the grade received in each course.

Withdrawal

Withdrawal of registration for an academic term after the start of classes.

Withdrawal with Failure

Withdrawal with failure may be applied to a course or an academic term. The notation "WF" will appear against the course(s) in the grade field on the official transcript.
Revisions

On the basis of information received from program committees, colleges or departments the 2019-2020 Undergraduate Calendar includes the following revisions:

Note
Those who may have used the PDFs to download and print off these calendar sections are advised to re-print the revised sections accordingly. Please be aware sectioning, page numbering, table of contents may have changed.

February 6, 2019
Initial publication of the 2019-2020 Undergraduate Calendar.

April 8, 2019
Second publication of the 2019-2020 Undergraduate Calendar.
• Chapter 8 - Undergraduate Degree Regulations and Procedures -- Withdrawal -- updating Voluntary Withdrawal and Cancelling a semester registration.
• Chapter 16 - Administration and Faculty - Changes and updates to various listings.

May 31, 2019
Third publication of the 2019-2020 Undergraduate Calendar.
• Chapter 10 - Updates to all Coop Programs.

July 4, 2019
Forth publication of the 2019-2020 Undergraduate Calendar.
• Chapter 6 - Schedule of Fees - updated
• Chapter 8 - Undergraduate Degree Regulations and Procedures -- Drops -- updated
• Chapter 16 - Administration and Faculty - Changes and updates to various listings.

July 19, 2019
Fifth publication of the 2019-2020 Undergraduate Calendar.
• Chapter 12 - Course Descriptions - Added the following courses -- ENGG*3270, ENVS*4030, FIN*3100, PBIO*4290, HTM*2220, UNIV*2100, UNIV*3140
• Chapter 16 - Administration and Faculty - Changes and updates to various listings.
