For continuation of study, a student must satisfy the conditions presented below. In order to graduate, students must fulfill the course requirements for the program and have achieved at least a 60% Program Average (PA). The Academic Review Sub-Committee will assess all cases where a student's academic progress does not meet the Continuation of Study requirements and will interpret the academic regulations. The requirements will be applied in a manner consistent with the credit weights of the course, the role of the course in the Phase and the degree of integration of the course with concurrently required, and in light of the student's particular circumstances (see VIII—Undergraduate Degree Regulations and Procedures).

Full-time Study
The D.V.M. program is offered as a full-time program and normally requires four years (over the equivalent of eight academic semesters at the University of Guelph) to complete. In exceptional extenuating circumstances, the Academic Review Sub-Committee may allow a student to take courses on a part-time basis. In these instances, the Academic Review Sub-Committee has the discretion to select the courses that the student will register in on a part-time basis. Students permitted to take courses on a part-time basis are cautioned that there is an enrolment limitation for the program and that access to certain courses or resumption of the program on a full-time basis will be conditional on the availability of space.

Failed Courses
1. Continuation of study from one phase of the D.V.M. Program to the next is dependent on the successful completion of all courses, or approved equivalents, in the published schedule of studies for the D.V.M. Program.
2. A student who fails one course in a Phase may be required to repeat all courses in the Phase. The consequences of failure of any particular course in the D.V.M. Program are as follows:
   a. Failure in any of the following courses result in the Repeat of the Course:
      VETM*3210, VETM*3390, VETM*3430, VETM*3220, VETM*3440, VETM*3510, VETM*4220, VETM*4450, VETM*4530, VETM*4610, VETM*4660, VETM*4710, VETM*4870, VETM*4900, VETM*4920.
   b. Failure in any of the following courses results in the Repeat of the Phase:
      VETM*3070, VETM*3080, VETM*3120, VETM*3400, VETM*3410, VETM*3450, VETM*3460, VETM*3470, VETM*4460, VETM*4470, VETM*4480, VETM*4490, VETM*4540.
This information is also available as part of the Phase Handbooks.
3. A student will be allowed to fail a particular course only once. Any student who fails the same course twice will be required to withdraw and will be ineligible for readmission to the D.V.M. Program.
4. Grades obtained by D.V.M. students who repeat one or more VETM course(s) will be reported on the transcript in addition to the original course grade. In the instance where all courses in a Phase are repeated, the grades from the repeated VETM courses will constitute the new Phase Average (PHA). The new D.V.M. Program Average will include the grades obtained in both the original and repeated VETM course attempts.

Supplemental Privileges
1. In the circumstances of a failed course, the Academic Review Sub-Committee may, if appropriate and under special circumstances only, allow a student the opportunity to gain credit standing in a failed course by granting a supplemental privilege (see Failed Courses and Supplemental Privilege in Section VIII). Students must request a supplemental privilege by submitting the request to the Academic Review Sub-Committee, and the fee for the privilege, within 7 days of the release of grades for the phase in which the failure occurred. The Academic Review Sub-Committee, upon receiving a request from a student, and after consulting with the instructor and reviewing the student's course performance, will determine whether a supplemental privilege should be granted.
2. Students will be permitted supplemental privileges in a maximum of two courses over the entire D.V.M. Program. A supplemental privilege will not be granted for a second failure in a course. Any student granted a supplemental privilege must meet with the Associate Dean for Student Affairs who will inform the student of appropriate resources to be used to deal with their academic difficulties.

Conditions for Graduation
In order to qualify for graduation from the D.V.M. program, the student must have completed successfully all of the courses approved for the program. Students will not be allowed to graduate with a PA of < 60% or PHA of < 60% in Phase 4.

Voluntary Withdrawal from the Program
For the D.V.M. program, students must seek advice from, and submit a Request for Withdrawal form to, the Associate Dean, Students and Academic when voluntarily withdrawing from the program. Students who have voluntarily withdrawn from the D.V.M. program and who wish to return must give notice to the Associate Dean, Students and Academic O.V.C. of their intention to return by May 31 if they wish to return in September of the upcoming academic year. Students contemplating a withdrawal from the program are cautioned that there is an enrolment limitation for the program and that re-entry will be conditional on the availability of space. The Program Committee reserves the right to select the quota from among the qualified applicants.

Estimate of Expenses
Attention is drawn to Section VI—Schedule of Fees for information on tuition, University student organizations and rabies immunization required for all students in the program. In addition, while the college supplies most laboratory equipment, students may wish to purchase instruments for personal use. Texts, protective clothing, and a minimum of supplies for personal use may cost approximately $500 per semester.

Health and Safety
Students must follow the health and safety policies required for the various courses in the veterinary program. Pregnant students and others with increased medical risks should consult Health Services concerning potential health risks which may occur during the normal course of their studies.
Immunization against rabies is a requirement for admission and continuation in the D.V.M. Program. Annual rabies titres and booster immunizations (if necessary) are mandatory for all Program participants. Prospective students and in-course students should contact Student Health Services (519-824-4120 extension 52131) for further information and guidance about the rabies surveillance program. Faculty and staff members should contact Occupational Health Services, extension 52133, for information about medical surveillance programs provided in accordance with University Safety Policy 851.13.03.

### Schedule 5 (D.V.M. Continuation of Study)

Continuation of Study is assessed on the student's D.V.M. Program Average (not the University Cumulative Average) and according to the policy on failures as stated above. In Phase 2 and beyond, eligibility to continue is also assessed at the end of each Phase using the Phase Average (PHA). Courses that are given a grade of Pass or Fail do not affect either the PA or PHA because they are not attached to any numerical grade.

Students required to repeat a Phase must achieve the required PA of greater than or equal to 60% by the end of the repeated Phase. If a student does not achieve the required standing by the end of the repeated Phase, they will normally be required to withdraw from the program.

The required averages are as follows:

<table>
<thead>
<tr>
<th>For Course Attempts in Phase I</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program Average (PA)</td>
<td>Status of Student</td>
</tr>
<tr>
<td>PA &lt; 50%</td>
<td>Required to Withdraw</td>
</tr>
<tr>
<td>PA ≥ 50% but &lt; 60%</td>
<td>Required to Repeat Phase</td>
</tr>
<tr>
<td>PA ≥ 60%</td>
<td>Eligible to Continue</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>For Course Attempts in Phase 2 and Phase 3</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program Average (PA) and Phase Average (PHA)</td>
<td>Status of Student</td>
</tr>
<tr>
<td>PHA &lt; 50%</td>
<td>Required to Withdraw</td>
</tr>
<tr>
<td>PA or PHA ≥ 50% but &lt; 60%</td>
<td>Required to Repeat Phase*</td>
</tr>
<tr>
<td>PA and PHA ≥ 60%</td>
<td>Eligible to Continue</td>
</tr>
</tbody>
</table>

* Students required to repeat Phase 3 will not be permitted to proceed to the Externship course prior to Phase 4.

If Repeating Phase 1, 2, or 3

Continuation of Study Assessment for DVM Students Repeating Phase 1, 2 or 3

<table>
<thead>
<tr>
<th>Program Average (PA)</th>
<th>Status of Student</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA &lt; 60%</td>
<td>Required to Withdraw</td>
</tr>
<tr>

<td>Eligible to Continue</td>
</tr>
</tbody>
</table>

For Course Attempts in Phase 4

Continuation of Study Assessment for DVM Students in Phase 4

<table>
<thead>
<tr>
<th>Program Average (PA) and Phase Average (PHA)</th>
<th>Status of Student</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHA &lt; 50%</td>
<td>Required to Withdraw</td>
</tr>
<tr>
<td>PA or PHA ≥ 50% but &lt; 60%</td>
<td>Required to Remediate***</td>
</tr>
<tr>
<td>PA and PHA ≥ 60%</td>
<td>Eligible to Continue***</td>
</tr>
</tbody>
</table>

** Students finishing Phase 4 with a PA or PHA > 50% but < 60%, will not be permitted to graduate. The Academic Review Sub-Committee will establish the appropriate remediation requirements that must be fulfilled in order for the student to obtain the standing of Eligible to Graduate. These may include repeating a component of a course, one or more entire courses, or one or more clinical rotations.

*** Students finishing Phase 4 with a PA and PHA ≥ 60% and having satisfied all course requirements for the program are Eligible to Graduate.

Co-operative Education Programs

Co-operative Education (Co-op) constitutes part of the student's formal education and is available in over 35 majors for students. A form of experiential learning, Co-op is a model of education that integrates a student's academic learning with periods of paid workplace learning in fields relevant to the student’s academic and personal/professional goals. The academic and work schedules will vary with degree program and major. The first co-op work term is scheduled after the third or fourth academic semester, providing an academic foundation on which to build the work experience.

Each co-op position is developed and approved in collaboration between the employer and Co-operative Education Career Services (CECS). Students participate in a competitive employment process to secure an approved co-op position that is relevant to the student’s area of academic study. COOP*1100 – Introduction to Co-operative Education, a mandatory, non-credit course, is a prerequisite for the first co-op work term and prepares the student for the employment process.

The student's performance in the workplace is supervised and evaluated by the student's employer using the Work Performance Evaluation tool. The student’s progress during the work term is also monitored by CECS, which may include a site visit during the co-op work term and a review of the student's official Learning Goals. A Co-op Work Report is required for each co-op work term and is graded by an assigned Co-op Faculty Advisor.

All evaluation grades will appear on the student's official transcript.

The Co-operative Education program at the University of Guelph is accredited by the Co-operative Education and Work Integrated Learning Canada (CEWIL), therefore standardized guidelines regarding co-op programs will be followed at all times.

Course requirements and schedules of studies for specific majors are listed under the appropriate degree program in this section.

In addition to Co-operative Education CECS supports, trains, and leads students and alumni as they make career and further education planning decisions. Successful students connect with CECS early in their academic career and take full advantage of the career planning and job search services offered. CECS helps students to discern "what to do with their degree". As well, the CECS job posting service, Recruit Guelph, provides online job postings including full-time, part-time, contract, seasonal, summer and internships. Job & Career Fairs and employer networking events also provide exposure to the working world. Please refer to https://www.recruitguelph.ca/cecs for more information.

Admission Information

Normally students are admitted to a Co-operative Education program directly from high school in the Fall semester through Admission Services. For a complete listing of University of Guelph admission requirements refer to www.uoguelph.ca/admissions.

Some programs may admit a limited number of in-course students after first or second semester. Refer to the schedule of dates in the Undergraduate Calendar for in-course application deadlines.

External transfer students may apply to Co-operative Education following admission to the University of Guelph. Students must not be beyond second year of their studies and be interested in one of over 35 co-operative education programs available at the University of Guelph. Interested students should visit https://www.recruitguelph.ca/cecs/transfer-students for up-to-date information on admission eligibility.

The decision to admit an in-course or external transfer student is dependent upon space in the program, the graduation standards of the approved Academic & Work Sequence Agreement, and any other information relevant to the program.

Note: Due to the Schedule of Studies for Hotel & Tourism Management Co-op there is no Winter start date available. Students must begin their program in the Fall term.

Eligibility

High school students must have a minimum average of 80% to apply to the co-op program. Once accepted to the University of Guelph, the student must maintain a 70% cumulative average in the first 2 semesters of full-time study in order to continue in the co-op program.

First year in-course students must maintain a 70% cumulative average in their academic semester(s) prior to admission to the co-op program. There must also be space in the co-op program in which they wish to be admitted.

External transfer students must meet normal admission requirements, as well as submit an official transcript from their previous educational institution, and may be required to achieve a minimum 70% cumulative average prior to participating in the co-op employment process. An academic and work schedule must also be approved by the academic department prior to the student being accepted into the co-op program.

Continuation of Study

Students are required to meet a continuation requirement at the end of semester two. Students will be allowed to continue in the co-op program if their cumulative average, over 4.0 credits, is 70% or higher after two full-time academic semesters. * Students are also required to meet the conditions for continuation of study for their degree program as listed in the Undergraduate Calendar. In addition, all students must satisfactorily complete COOP*1100 - Introduction to Co-operative Education in the semester scheduled.

Co-op students are required to be registered full-time for the duration of their program as outlined in the schedule of studies listed in the Undergraduate Calendar. Co-op students are also required to meet other conditions, (e.g. satisfactory co-op work reports, work performance evaluations and learning goals) in order to continue in the co-op program.

Complete conditions for continuation of study for a co-op program are outlined in the "Policy Agreement for Student Involvement in Co-operative Education University of Guelph". The complete policy can be viewed at https://www.recruitguelph.ca/cecs/sites/uoguelph.ca/cecs/files/public/Co-opPolicyAgreement.pdf

* Students that cannot follow the prescribed schedule for their co-op program due to a disability may require an approved accommodation plan. CECS must approve the accommodation plan and students may be requested to provide additional information during the approval process.

Release of Academic Information

By applying to the co-op program, students grant permission to the Office of Registrarial Services to release Co-operative Education & Career Services their University of Guelph transcript and any transcript from other post-secondary institutions that may be part of the academic record held by the Office of Registrarial Services.

Students also grant permission to Co-operative Education & Career Services to release their resumes, cover letters and any transcripts released by the Office of Registrarial Services to prospective employers to whom the students are applying. Employment information, the Co-op Work Performance Evaluation grade, and the Co-op Work Report Evaluation grade will appear on the student's official academic transcript for each co-op work term accepted by the student. Students also grant permission for employment information to be released for use in statistical analysis at the University of Guelph.

Procedures for Work Term Reports

A Co-op Work Report is required for each co-op work term which the student accepts. Co-op Work Reports must be submitted to the Co-op Faculty Advisor according to the deadlines indicated in the Co-op Work Experience Agreement. CECS is responsible for grading the co-op work report within the time specified in the guidelines listed in the Schedule of Dates. Students completing two or more consecutive co-op work terms with the same employer should consult with their Co-op Faculty Advisor regarding co-op work report requirements for eight or twelve month co-op work terms. A grade of Outstanding, Very Good, Good, Satisfactory, or Unsatisfactory will appear on the student's Academic Record.

A student who does not submit a Co-op Work Report will be required to withdraw from co-op and a grade of "Required to Withdraw from Co-op" will be assigned to the student's official transcript. A student who receives an Unsatisfactory Co-op Work Report Evaluation will be given one opportunity to make revisions and resubmit the co-op report during the semester following the co-op work term. Students who are resubmitting a co-op work report within the prescribed timeline will not be eligible to proceed to the next employment process until receiving a grade of Satisfactory or higher on the report. If, upon resubmission, the co-op work report evaluation remains Unsatisfactory, the student will be required to withdraw from co-op and will be transferred to the regular program.

Confidential Co-op Work Reports are not permitted.

Conditions for Graduation

In order to graduate with co-op certification, co-op students must follow the conditions for graduation for their degree program as outlined in the Undergraduate Calendar. In lieu of the usual academic year, co-op students will be required to submit an Academic & Work Sequence Agreement, and any other information relevant to the program. Co-op students must also have paid all required co-op fees, including eight academic semesters and all co-op work terms, prior to receiving co-op certification.

Co-op Fees

As determined by the University of Guelph’s Board of Governors, involvement in the Co-op Program requires Co-op students to pay a co-op fee for a maximum of 8 academic semesters and all accepted co-op work terms (see Section VI--Schedule of Fees). It is important to note that co-op fees are amortized over the entire program beginning in Semester 1 and not related to the specific services received in any one term.

Co-op fees will be paid each academic and co-op work term semester and will be billed to the student’s financial account. If registered for an academic course during a co-op work term both the academic and co-op work term fees will be billed. If registered in an academic course during an OFF semester the co-op academic fee will be charged. In both cases the co-op academic fee will count towards the maximum of 8 academic fees.

If a student does not follow the prescribed schedule in the Undergraduate Calendar, this may result in an under or over payment on the student’s account. To resolve these issues, the student is required to contact CECS. Should a student not identify an over/under payment, CECS conducts an audit at the time of convocation and will bill or credit the student's account accordingly. Students are responsible for paying all other university fees as outlined in the Undergraduate Calendar.

Withdrawing from Co-op after accepting a second co-op work term will result in the student being responsible for paying the balance of their remaining co-op academic fees at the time of withdrawal.
Withdrawing from Co-op after accepting an eight or twelve month co-op work term will result in the student being responsible for paying the balance of their remaining co-op academic fees at the time of withdrawal.

**Schedule of Studies**

Students are required to follow the schedule of studies as outlined in the Undergraduate Calendar. Where a program has two co-op stream options, students will be defaulted to an established “Stream A”. 

If, under exceptional circumstances, the schedule cannot be followed, the student must obtain written approval of an alternative Co-op Academic & Work Sequence Agreement from the academic department and submit the form to CECS for final approval. These exceptions are listed on the sequence form.

There is no guarantee that a sequence revision will be approved.
University of Guelph-Humber

For University of Guelph-Humber programs please refer to http://www.guelphhumber.ca.
Associate Diploma Programs

For Associate Diploma Programs please refer to the Associate Diploma Program Calendar, available on the world wide web at http://www.uoguelph.ca/diploma_calendar/.
XI. Special Study Opportunities

Certificates and Diplomas

The University offers certificate and diploma programs for those who want to develop or upgrade skills in one of these areas without necessarily proceeding towards a three- or four-year degree program. These programs may be completed on a part-time basis.

Students currently registered in a degree program or intending to transfer into a degree program, should note double-counting regulations. Up to 50% of the requirements for a degree-credit certificate/diploma may be applied toward a major, minor or area of emphasis. The remaining 50% of the certificate/diploma requirements may be applied to electives, provided the specific courses in the certificate/diploma meet degree program requirements. For more information on double-counting regulations, undergraduate students should consult with the program counsellor for the degree program they seek to complete. Note that the Certificate in Leadership is exempt from this restriction.

Students apply for a certificate after they have completed all the courses by completing a Certificate Application Request Form. There is a certificate fee required and an additional courier fee (if requested).

For more information on the certificates, please email Open Learning and Educational Support <info@opened.uoguelph.ca>. There is a certificate fee required and an additional courier fee (if requested).

Certificate in Business

The Certificate in Business is designed to be beneficial to those who are not enrolled in a business program, but wish to gain knowledge of business concepts. It provides participants with opportunities to develop the professional skills essential for success in business environments. The functional areas of business are introduced in required courses. Participants may customize their learning through their choice of electives by either focusing on one particular subject area or selecting from different subject areas for more breadth. The Certificate in Business, available to both undergraduate students and open learners, is offered by the University of Guelph through the Gordon S. Lang School of Business and Economics.

Certificate in Civic Engagement and Global Citizenship

The value of combining a sense of self as a global citizen with the dynamic nature of civic engagement can result in a practical, informed and hopeful approach to addressing complex local and global problems shaped by different cultures, political systems and environments. The certificate in Civic Engagement and Global Citizenship aims to provide students with a critical understanding and awareness of the complexity of the world and the value of their disciplines as contributing to interdisciplinary approaches to solving problems. Students will explore how the diversity of people and privilege in the world contributes to both problems and solutions while having an opportunity to reflect upon their own place and privilege. They will develop the knowledge, skills, and values required to develop a sense of themselves as empowered citizens and community members who can undertake thoughtful, respectful and creative action for better communities at home and abroad.

The Certificate consists of 2.50 credits of coursework (1.00 in required courses and 1.50 in restricted electives) and completion of 120 hours of approved community engagement hours.

For more information, please visit: [http://www.uoguelph.ca/civic](http://www.uoguelph.ca/civic)

"Community Engagement Hours - The selection and approval process for the required 120 community engagement hours is reviewed in UNIV*2410."

Certificate in Communication Process: Bridging Theory and Practice

The five-course online Certificate in Communication Process sets out to enhance participants' knowledge, attitudes and skills necessary for successful careers in business, human resource management, education, medical and veterinary professions, social work, criminology, and international development.

This program focuses on facilitating knowledge-sharing through verbal and non-verbal signs and symbols, as it relates to units of different size and complexity - among individuals, groups, organizations, nations and regions of the world. By gaining insight into various communication processes, participants will be better equipped to effectively manage change in a constantly evolving environment.

The Certificate in Communication Process, available to both undergraduate students and open learners, is offered online through University of Guelph's School of Environmental Design and Rural Development, and is structured as follows:

**Required Courses**

<table>
<thead>
<tr>
<th>Course Code</th>

For more information on the certificate, visit the website at: [http://www.communicationprocess.ca/](http://www.communicationprocess.ca/)

Certificate in Environmental Citizenship

Developed from a social science perspective, this Certificate is beneficial to those who want to learn more about the global environmental issues facing us today and in the future. Participants gain in-depth knowledge about environmental changes, their global impact, and how one can directly contribute to the environment's sustainability. The Certificate consists of six degree-credit distance education courses taken online from the University of Guelph's School of Environmental Sciences. It is structured as follows, requiring six courses total, to include at least two at the 3000 or 4000 level:

**Required Course**

<table>

Certificate in Environmental Conservation

Developed from a biophysical science perspective, this Certificate is beneficial to those who want to gain knowledge of issues surrounding environmental protection, conservation and preservation, and environmental research. The Certificate consists of six degree-credit distance education courses taken online from the University of Guelph’s School of Environmental Sciences. The program is designed to provide participants with the credentials they need for professional advancement in the environment industry and/or personal enrichment. It is structured as follows, requiring six courses total, to include at least two at the 3000 or 4000 level:

**Required Course**

Certificate in Food Science

The Certificate in Food Science program is offered by the Department of Food Science to University of Guelph undergraduate students or online to Open Learning program students. It concentrates on the chemistry, analysis, microbiology and processing of foods, and on the maintenance of food safety and quality throughout. The Food Science certificate program provides recognition for food science education for University of Guelph students not in the B.Sc. Food Science Major and for individuals outside of the University of Guelph interested in the field of Food Science. Post-secondary courses in microbiology and chemistry are prerequisites for entrance into the program.

In-course students can select courses and when completed apply for the certificate through the Open Learning and Educational Support office (note the double-counting rule under XI. Special Study Opportunities, Certificates and Diplomas). Individuals from outside the University of Guelph should register for courses through the Open Learning program.

The DE courses of the program cannot be used as substitutes for core courses or restricted electives in the B.Sc. Food Science Major.

Certificate in German Language and Culture

The Certificate in German Language and Culture provides students with an intermediate level (B1) of competency in the German language and awareness of the cultures of German-speaking countries.

A minimum of 2.50 credits is required, including:

**Required Courses**

<table>
<thead>
<tr>
<th>Course</th>

</table>

Students with previous studies in German will begin in GERM*1100.

For more information, please visit the website at: [http://www.hospitalitystudies.com](http://www.hospitalitystudies.com).

Certificate in Leadership

The Certificate in Leadership is offered by the University of Guelph through the Gordon S. Lang School of Business and Economics. This certificate program allows undergraduate students to complete both their degree program and the certificate concurrently. As well, the certificate is available to students in the Open Learning program.

The program focuses on new leadership models and practical applications in a variety of organizational settings. 2.50 credits are required in addition to 120 hours of leadership practice. Students will develop an historical and theoretical understanding of leadership with particular emphasis on contemporary theories, models and research.

For more information, please visit the website at: [http://leadershipcertificate.com](http://leadershipcertificate.com).

**Note:** Students enrolled in the Leadership and Organizational Management major are not eligible for this certificate.
Certificate in Organic Agriculture

The Certificate in Organic Agriculture provides students with an interdisciplinary understanding of organic agricultural systems in the broader context of societal needs and developments. This broad perspective will enable students to investigate how societal changes shape the agriculture and food value chain in general and with regard to specific requirements, such as certification of organic agricultural and food production practices and standards. This certificate will require the completion of 2.50 credits: 1.50 credits of required courses, 1.00 credits from restricted electives.

Required Courses
OAGR*2070
OAGR*4180

Restricted Electives:
Students should note that some restricted electives require other courses not included among the required courses for the certificate as prerequisites. Further, some restricted elective courses may be priority access courses or restricted to certain programs or majors. Students should thus consult the most recent undergraduate calendar for specific requirements.

Students must select 1.00 credits of restricted electives from any of the following lists:

Soils:
AGR*2320 [0.50] Soils in Agroecosystems
ENVS*2060 [0.50] Soil Science
ENVS*3310 [0.50] Soil Biodiversity and Ecosystem Function

Animal and Plant Production:
ANSC*1210 [1.00] Principles of Animal Care and Welfare
ENVS*4100 [0.50] Integrated Management of Invasive Insect Pests
HORT*3510 [0.50] Vegetable Production
OAGR*4050 [1.00] Design of Organic Production Systems
PBIO*4070 [0.50] Biological and Cultural Control of Plant Diseases

Society and Sustainability:
EDRD*3400 [0.50] Sustainable Communities
ENVS*2070 [0.50] Environmental Perspectives and Choice
ENVS*2130 [0.50] Eating Sustainably in Ontario
GEOG*3320 [0.50] Food Systems: Issues in Security and Sustainability
SOC*2080 [0.50] Rural Sociology

Certificate in Public Policy and Administration

The five-course Certificate in Public Policy and Administration is designed to provide a solid base in key concepts and foundations of Canadian government, policy and administration by bringing together a number of Canadian political science and public policy courses. This certificate will be of interest to individuals currently working or seeking employment in the public sector or quasi-public sector as well as undergraduate students. All six courses in this certificate are also available in distance education format and to earn the Certificate, students will be required to successfully complete five of the six courses (2.50 credits) as follows:

Required Courses
POLS*2220*DE [0.50] Public Policy
POLS*2225*DE [0.50] Public Administration and Governance

3 of the following 4 courses:
POLS*2300*DE [0.50] Canadian Government and Politics
POLS*3250*DE [0.50] Public Policy: Challenges and Prospects
POLS*3300*DE [0.50] Governing Criminal Justice
POLS*3370*DE [0.50] Environmental Politics and Governance
POLS*3440*DE [0.50] Corruption, Scandal and Political Ethics

Students who wish to enrol in the Certificate in Public Policy and Administration should contact the Open Learning program Counsellor at Open Learning and Educational Support (ext. 56050.)

Certificate in Spanish Language and Culture

The Certificate in Spanish Language and Culture provides students with an intermediate level (B1) of competency in the Spanish language and awareness of the cultures of various Spanish speaking countries of the world.

A minimum of 2.50 credits is required, including:

Required Courses
SPAN*1100 [0.50] Introductory Spanish I
SPAN*1110 [0.50] Introductory Spanish II
SPAN*2000 [0.50] Intermediate Spanish I
SPAN*2010 [0.50] Intermediate Spanish II

1 of:
SPAN*2040 [0.50] Culture of Spain
SPAN*2990 [0.50] Hispanic Literary Studies
SPAN*3080 [0.50] Spanish American Culture
SPAN*3240 [0.50] Topics in Hispanic Linguistics
SPAN*3300 [0.50] Advanced Spanish I

Students with no previous Spanish will begin in SPAN*1100.

Students with previous studies in Spanish will begin at an appropriate level after placement by the Head of Spanish and Hispanic Studies and may take more advanced courses to complete the 2.50 credits.

Diploma in Applied Statistics

The Diploma in Applied Statistics is a program offered by the Department of Mathematics and Statistics, which seeks to give students of the Applied Sciences a technical competency in the use and application of Statistics.

The program is intended mainly for those whose primary area of expertise is not in Statistics, but who feel the need to be able to use modern statistical techniques. This program seeks to fill a need of scientists to reach a useful level of competency in the use of statistical methodology.

Diploma Requirements

The program consists of 5.00 credits chosen from the following list. It is important to take into account the necessary prerequisites when determining the sequence in which the courses are taken. Consult an advisor from the department for assistance.

MATH*1160 [0.50] Linear Algebra I
STAT*2040 [0.50] Statistics I
STAT*2050 [0.50] Statistics II
STAT*3100 [0.50] Introductory Mathematical Statistics I
STAT*3110 [0.50] Introductory Mathematical Statistics II
STAT*3210 [0.50] Experimental Design
STAT*3240 [0.50] Applied Regression Analysis
STAT*3320 [0.50] Sampling Theory with Applications
STAT*3510 [0.50] Environmental Risk Assessment
STAT*4050 [0.50] Topics in Applied Statistics I
STAT*4060 [0.50] Topics in Applied Statistics II
STAT*4140 [0.50] Topics in Applied Statistics III
STAT*4350 [0.50] Applied Multivariate Statistical Methods
STAT*4360 [0.50] Applied Time Series Analysis

Co-operative Education

Co-operative Education (Co-op) constitutes part of the student’s formal education and is available in over 35 majors for students. A form of work integrated learning, Co-op is a model of education that integrates a student’s academic learning with periods of paid workplace learning in fields relevant to the student’s academic and personal/professional goals. The academic and work schedules will vary with degree program and major. The first co-op work term is scheduled after the third or fourth academic semester, providing an academic foundation on which to build the work experience.

Each work term is developed in collaboration with the employer and is approved by the institution as a suitable learning environment. Students participate in a competitive employment process to secure an approved co-op work term that is relevant to the student’s area of academic study. COOP*1100 – Introduction to Co-operative Education, a mandatory, non-credit course, is a prerequisite for the first work term and prepares the student for the employment process.

The student’s performance in the workplace is supervised and evaluated by the student’s employer using the Work Performance Evaluation tool. The student’s progress during the work term is also monitored by Co-operative Education & Career Services (CECS), which may include an official site visit during the co-op work term and a review of the student’s official Learning Goals. A Co-op Work Term Report is required for each work term and is graded by an assigned Co-op Faculty Advisor. All evaluation grades will appear on the student’s official transcript.

The University of Guelph Co-operative Education program is accredited by the Co-operative Education and Work Integrated Learning Canada (CEWIL), therefore standardized guidelines regarding co-op work terms will be followed at all times.

Course requirements and academic/work sequences for specific majors are listed under the appropriate degree program in Chapter X of the Undergraduate Calendar.

In addition to Co-operative Education, CECS supports, trains and leads students and alumni as they make career and further education planning decisions. Successful students connect with CECS early in their academic career and take full advantage of the career planning and job search services offered. CECS helps students to discern “what to do with their degree”. As well, the CECS job posting service, Recruit Guelph, provides online job postings including full-time, part-time, contract, seasonal, summer and internships. Job & Career Fairs and employer networking events also provide exposure to the working world. Please refer to https://www.recruitguelph.ca/cecs/ for more information.

Co-operative Education Guidelines and Procedures

The following guidelines and procedures support the implementation of the “Policy on Co-operative Education Programing in Undergraduate Degree Programs”, approved by Senate on June 4, 2012. In the event of a discrepancy between the Policy and these Guidelines, the Policy will apply.

The following definitions shall apply in these guidelines and procedures:
**Co-operative Education** is defined by the University of Guelph as a collaborative partnership between the University and workplace employers who share a commitment to the learning objectives and outcomes of the co-operative education program as expressed through experiential education opportunities and the integration of workplace and academic learning.

**Co-op Program** (Co-operative Education Programming): Co-op education programming is offered in two distinct formats, as defined by CEWIL:

i. **“Co-op Option”** (Co-operative Education Option): A co-op option may be offered within an established degree program and major. The Schedule of Studies includes semesters of academic study sequenced with semesters of on-site approved paid work terms.

ii. **“Co-op Internship”** (Co-operative Education Internship) is defined as an on-site approved paid work experiences, normally 12 to 16 months in length commencing once 50% of the academic program is completed.

**“CECS”** means the Co-operative Education & Career Services department at the University of Guelph. CECS is the unit designated to coordinate and support co-operative education programming by providing administrative assistance to co-op students, co-op employers, and co-op faculty advisors.

**“Co-op Co-ordinator”** means the staff person assigned by CECS to provide support for a co-op education program through securing appropriate work term opportunities, providing orientation, advice and guidance to co-op students, and, in partnership with the Co-op Employer, monitoring student progress over the co-op work term.

**“Co-op Work Term”** is defined as the designated period of time that a co-op student is engaged in an on-site approved paid work experience.

**“Co-op Employer”** means the designated supervisor of a student who is participating in a co-op work term.

**“Work Term Report”** is a report written by the co-op student following the completion of a Co-op Work Term and submitted to the Co-op Faculty Advisor for evaluation.

**“Work Term Performance Evaluation”** is the formal evaluation of the student by the Co-op employer upon completion of the Co-op Work Term.

**“Co-op Faculty Advisor”** is defined as the faculty member assigned by the department or school to provide academic advice and guidance to students enrolled in the co-op program, provide advice and guidelines on the development of the student’s Work Term Report, and evaluates the student’s Work Term Report.

**“Co-op Certification”** is the official recognition of a co-op student’s satisfactory completion of all co-operative education requirements and graduation of their program, whereby they are awarded a co-operative education certificate.

**Guidelines for the Establishment of Co-op Programs:**

Co-operative Education Options shall be established according to the criteria listed under section 6.2 of the Policy on Co-operative Education Programming in Undergraduate Degree Programs at the University of Guelph. The roles and responsibilities of the co-operative education program partners are outlined under the Co-operative Education Programs in Chapter 10 Degree Programs.

**Schedule of Studies**

a. Every Co-op Option Schedule of Studies shall include the following features:

   • A minimum of three Co-op Work Terms to a maximum of five Co-op Work Terms shall be sequenced within the Schedule of Studies;
   • At least one Co-op Work Term shall occur in each of the Summer, Fall, and Winter semesters;
   • No more than two Co-op Work Terms shall commence in a Summer semester;
   • The first Co-op Work Term shall be scheduled no sooner than the second Winter semester of the program;
   • No more than five full-time academic semesters shall be completed before the first Co-op Work Term;
   • The Co-op Schedule of Studies shall not finish with a Co-op Work Term semester;
   • The Schedule of Studies for a Co-op Option shall not exceed eight academic semesters, a schedule that is no longer than five years;
   • At least thirty percent of the Schedule of Studies for the Co-op Option shall be comprised of semesters in Work Terms;
   • It is the responsibility of the academic department in conjunction with CECS to design the Co-op Option Schedule of Studies taking into account that sufficient and appropriate courses are offered in the academic semesters on campus so that Co-op students are available year-round to employers participating in the program.

b. Co-op Internships:

   • Co-op Internships normally commence once 50% of the academic program is complete and are 12 to 16 months in length.

c. The work term requirements:

   • Each work term is developed and/or approved by CECS as a suitable learning opportunity;
   • The student is engaged in productive work rather than merely observing;
   • The student receives remuneration for the work performed;

   • Work term opportunities without traditional remuneration must be approved by CECS;
   • The student’s progress on the work term is monitored by CECS;
   • The student’s performance on the job is supervised and formally evaluated by the student’s co-operative employer;
   • Student’s must complete a work term report and satisfactorily pass the academic requirements governing this assessment.

**Admissions**

a. Normally the minimum admission average required for students to be considered for admission to a Co-op Option is 80%. Exact cut-offs are determined on the basis on the quantity and quality of applications received and the number of places available in the program. Students not admitted to co-op will be automatically considered for the regular program. The number of admission offers to the Co-op Option will depend upon the capacity determined each year by the Co-operative Program Co-ordinating Committee.

b. University of Guelph students and external students to the University may be admitted for transfer to a Co-op Option if there is capacity available in the specified program. The minimum admissions average for internal transfer is 70% cumulative average in the first two full time semesters. Other conditions and application deadlines may apply. Students should consult the Program Counsellor for information on internal transfer.

**Continuation of Study**

a. It is mandatory that co-op students be registered full-time for the duration of their program as outlined in the schedule of studies listed in the Undergraduate Calendar.

b. Students are required to meet a continuation requirement at the end of semester two. Students will be allowed to continue in the co-op program only if their cumulative average is 70% or higher after their first two full-time academic semesters.

c. Students are required to complete and pass the mandatory Introduction to Co-operative Education (COOP *1100) non-credit course as the pre-requisite for the first employment process.

d. Students are required to follow the academic and work sequence as outlined in the Undergraduate Calendar.

e. Students who receive a Marginal work performance evaluation will be required to meet with their Co-op Co-ordinator. Students who receive two Marginal work performance evaluations will be withdrawn from co-op and transferred to the regular academic program. The grade as well as the phrase “Req to Withdraw from Co-op” will appear on the Official Transcript.

f. A student who receives an Unsatisfactory work term report will be required to withdraw from co-op. The grade as well as the phrase “Req to Withdraw from Co-op” will appear on the Official Transcript.

g. A student who does not complete and submit the Work Term Report by the 5th class day of the next semester may not register in the following work term.

h. A student on academic probation shall not be eligible to participate in the Work Term process and will not be eligible to commence a Co-op Work Term.

i. The co-op employment process is competitive and while CECS makes every effort to assist students in gaining employment, there is no guarantee that every student will become employed through the employment process.

**Graduation Requirements**

Students are eligible to graduate with the “Co-op Certification” if they meet the following conditions:

a. Meet the academic conditions for graduation for their degree program as outlined in the Undergraduate Calendar.

b. Receive evaluations of “Good” or higher in all but one of the Work Performance Evaluations.

c. Receive evaluations of “Satisfactory” or higher in all Work Report Evaluations.

Students wanting to graduate with less than the required number of work terms must contact their Co-op Co-ordinator with the request and it will be brought to the Director CECS for final approval.

Students who do not achieve the requirements for continuation of study or graduation in the co-op program may appeal the decision (see Chapter VIII, Academic Consideration).

**Roles and Responsibilities of Co-operative Education Program Partners**

The University of Guelph’s co-operative education program requires a collaborative approach that engages all partners in the process. The success of the co-op programs at Guelph is dependent upon a commitment by all the partners involved.

**Students**

Student success in a co-op option requires commitment, students are required to read and understand the Policy Agreement for Undergraduate Student Involvement in Co-operative Education.
There is no guarantee that all students enrolled in co-op will have a work term. They must take responsibility for the employment process. This includes:

- Meeting the co-op continuation of study requirements;
- Successfully completing the COOP*1100 preparatory course; and,
- Understanding the competitiveness of the co-op application process and their responsibilities within the process.

Students must also take responsibility for success in the workplace. As such, students must:

- Adequately prepare for the work term and represent themselves and the University in the workplace;
- Set learning goals with the supervisor early in the term and work toward achieving those goals;
- Request a formal performance evaluation at the end of the term;
- Prepare a work term report for the Co-op Faculty Advisor;
- Successfully complete the requirements of the work terms; and
- Inform CECS on matters affecting their status.

The Academic Department

The Academic Department is responsible for all academic components of the co-op program including the offering of courses to support the co-op option and the evaluation of the co-op work term report. A Co-op Faculty Advisor is provided for each co-op program.

The role of the Co-op Faculty Advisor is to support the student on the academic requirements of the program. The responsibilities of the Co-op Faculty Advisor are to:

- Assist students in academic/work sequences and course selection;
- Provide detailed guidelines on the writing and marking of work term reports;
- Advise the student of appropriate work term report topics, supporting the process, grading of the work report and follow-up discussion with the student; and
- Undertake administrative tasks in support of the educational program, including management of the unit’s co-op program, supporting the development of materials about the program (where required), and establishing procedures for the co-op option within the department.

Co-operative Education & Career Services (CECS)

The role of CECS is to support all of the administrative functions related to the work term experience. Responsibilities of CECS include:

- Following the required operational guidelines as an accredited program of the Co-operative Education and Work Integrated Learning Canada (CEWIL);
- Preparing students for the co-op experience;
- Co-ordinating job development relevant to the academic curriculum and facilitating the employment process;
- Ensuring the quality of the job development effort;
- Providing all the administrative support required for the smooth functioning of the University’s co-operative education program;
- Operating the competitive employment processes including co-op interviews and employer information sessions, panels and informational interviews; Maintaining all employer, department and student data;
- Processing all clerical and administrative matters relating to the relationship between employer and institution;
- Building employer relationships and provide students with a range of suitable employment opportunities, and working closely in conjunction with the academic unit and Alumni Affairs and Development;
- Offering the COOP *1100 Introduction to Co-operative Education course the semester prior to the student employment process;
- Providing student support for resume, cover letter and interview preparation as well as career guidance where needed;
- Ensuring that the employer maintains the appropriate educational quality in the work term experience provided to the student;
- Working with the Registrar to ensure a reasonable number of students are admitted into the program;
- Ensuring that the academic/work program schedules provide year round availability of work terms to meet employer needs; and
- Assigning Co-op Co-ordinators to co-operative education options.

Co-op Co-ordinator

The role of the Co-op Co-ordinator is to work within specific programs to support the work-term process. Responsibilities of the Co-op Co-ordinator are to:

- Develop jobs in specific discipline areas;
- Advise students in regard to their activities in the employment process and on the work term;
- Market the co-op program to employers and obtaining work term commitments;
- Prepare co-op students for their involvement in co-operative education, and educate students concerning employer and performance expectations;
- Actively monitor the work term maintaining contact with the student during the work term;
- Be available any time during the work term to respond to student or employer inquiries;
- Conduct a work term site visit with the student and supervisor;
- Conduct pre- and post-work term student advisement and debriefing;
- Manage the student’s file and ensuring complete institutional records on each student;
- Undertake administrative tasks in support of the co-op program, including consultation with academic units on their co-op offering, consultation with Co-op Faculty Advisor on policy and procedure aspects of the program; and
- Approve special situations where students may complete a work term without traditional remuneration.

Co-op Program Coordinating Committee (CPCC)

The role of the CPCC is to provide administrative oversight and advice as it relates to the University’s co-op programs. Responsibilities of CPCC include:

- Ensure that all co-op programs conform to the established policy and standard practices;
- Co-ordinate co-op option schedule of studies to support the maximum availability of students in all three semesters;
- Review new program proposals to confirm that sufficient resources are available to mount a quality co-op program, including the assignment of a Co-op Coordinator and Co-op Faculty Advisor for each stream; and
- Monitor co-op programs to support high quality program delivery.

Employer

Good quality employers who understand the educational focus of the co-op programs are critical to the program. Responsibilities of the employer are to:

- Provide co-op work term job opportunities that meet the university’s educational objectives;
- Provide the university with an accurate job description along with any available company information;
- Conduct interviews and select the best candidate;
- Pay competitive wages in accordance with the student’s work term level and academic level;
- Provide safe employment including WSIB and liability insurance coverage for the duration of the employment period; and
- Comply with the Provincial Employment Standards Act.

During the work term:

- Orient the student to the organization, workplace protocols and the job during the first few weeks of the work term;
- Supervise the student and provide guidance when the student is setting learning goals at the start of the work term with a review mid-term and at the completion of the work term;
- Provide performance feedback to the student throughout the term and keeping the Co-op Coordinator current on any changes in the student’s performance;
- Meet with the Co-op Co-ordinator during the work term visit and providing feedback concerning the student’s performance and if there are concerns maintaining communication with the Co-op Co-ordinator;
- Provide career information and guidance as appropriate;
- Complete a work term performance evaluation form and exit interview for the student at the conclusion of the work term; and
- Assist the student with the selection of a topic for a work term report and providing comments on the final work term report if appropriate.

Distance Education

Online learning offers students a contemporary means through which the University continues its tradition of outreach and open learning opportunities. Online degree-credit courses are offered by Open Learning and Educational Support (OpenEd) in collaboration with academic departments and schools. This option provides students the opportunity to create a flexible study schedule, acquire credits while away on summer break or a co-op placement, and/or choose to learn in an interactive online course environment.

Online courses are designed to foster interaction between students, their instructor and the content. Students can expect to engage in activities, such as online discussions and individual and group assignments, using a variety of technologies and resources. Each semester, the University offers a wide range of online degree-credit courses from a variety of disciplines. Visit the OpenEd website for a list of available online courses and more information about learning online. Please note that University of Guelph degree students must register for online courses through WebAdvisor by selecting the DIO1 section.
General Studies
The objective of the General Studies program is to provide mature students with the opportunity to take university courses before registering in a specific degree program or to take university courses for continued learning with no immediate intention of registering in a degree program. The General Studies program does not lead towards a specific undergraduate degree at the University of Guelph.

Academic Counselling
General Studies students can obtain counselling for selecting courses, and planning their future program from the B.A.S. Counselling Office located in Room 128A MacKinnon Building. Prospective students should contact the Admissions Section of the Office of Registrarial Services.

Financial Assistance
Students registered in 3 or more courses of the General Studies program maybe eligible to apply to the Ontario Student Assistance Program (OSAP) if an Ontario resident. Students who are residents of other provinces must apply to their home province for financial assistance. General Studies students maybe eligible to apply for OSAP assistance for a maximum of two semesters. General Studies students who transfer to a degree program may continue to apply for OSAP.

Schedule of Studies
1. Students may take any undergraduate course offered by the University, as long as any stated prerequisites are met or the approval of the instructor is obtained.
2. Students may take Associate Diploma courses with the approval of the Director of the Associate Diploma program.
3. Students will not normally be eligible to continue in the General Studies program after enrolment in 20 courses.
4. The grade assigned for each course will become part of the student's University academic record.
5. Students who register in the General Studies program and who subsequently apply for transfer to a degree or diploma program, will be required to meet admission requirements for that program, and credit granted for courses taken in the General Studies program will be subject to the regulations pertaining to that program.

Tuition Fees
Students are advised to refer to Chapter VI - Schedule of Fees of the Undergraduate Calendar.

Undergraduate Regulations
Students are referred to Chapter VIII - Undergraduate Degree Regulations for additional information regarding registration, course selection, withdrawal from study, continuation of study, examination policy and requests for academic consideration.

Graduate Studies
The University of Guelph offers graduate programs in most departments and schools. These post-baccalaureate programs offer opportunities for personal, academic and professional growth. Students with a 70% average or higher should consider and investigate these options, beginning no later than their third undergraduate year. Decisions regarding the desired area of study and pursuit of scholarship support require forethought and planning. Information, and counselling are available through the graduate coordinators of each department/school. Further information on graduate programs may be found in the on-line Graduate Calendar at [https://www.uoguelph.ca/graduate/calendars/graduate-current/]. Applications is made on-line and accessed through Graduate Studies website at [https://www.uoguelph.ca/graduate/calendars/graduate-current/]. Students are also welcome to visit the Office of Graduate and Postdoctoral Studies, Level 3, University Centre.

The University of Guelph offers opportunities for qualified students to do graduate work leading to the Graduate Diploma (G.Dip) or the Master of Arts (M.A.), Master of Arts (Leadership) (M.Lead), Master of Applied Science (M.A.Sc.), Master of Science (M.Sc.), Master of Landscape Architecture (M.L.A.), Master of Applied Nutrition (M.A.N.), Master of Bioinformatics (M.Binf.), Master of Biomedical Science (M.B.S.), Master of Biotechnology (M.Biot.), Master of Business Administration (M.B.A.), Master of Engineering (M.Eng.), Master of Environmental Sciences (M.E.S.), Master of Fine Art (M.F.A.), Master of Food, Agricultural and Resource Economics (M.Fare), Master of Science in (Planning) Master of Planning (M.Plan), Master of Public Health (M.P.H.), Doctor of Philosophy (Ph.D.), and Doctor of Veterinary Science (D.V.Sc.) degrees.

Interdisciplinary Studies
The University of Guelph offers many interdisciplinary programs that cross departmental and college boundaries. In addition, specific courses and specializations have been modelled on an interdisciplinary approach to the topic or subject area.

Courses with an interdisciplinary approach and content are listed in Chapter XII under the following headings: Humanities, Physical Science, and Social Science as well as Interdisciplinary University Courses.

The following list of specializations is not intended to represent all the university's interdisciplinary initiatives. Instead it identifies those specializations that involve a significant degree of collaboration between departments or colleges. For further details, refer to the appropriate undergraduate degree program information in Chapter IX.

Bachelor of Arts
Criminal Justice and Public Policy
Environmental Governance
European Studies
International Development

Bachelor of Arts and Sciences
The University of Guelph offers an 8 semester (20.00 credits) honours program leading to a Bachelor of Arts and Sciences (B.A.S.) degree.
The Bachelor of Arts & Sciences program is designed for students who are motivated equally by the study of Arts/Social Sciences and the Sciences, and who find challenge and satisfaction in testing the traditional boundaries of study through undergraduate level interdisciplinary work. The program meets these objectives through a unique structure that accredits students in an Arts/Social Sciences core, a Sciences core, a Subject Area core of interdisciplinary humanities and sciences courses (ASCI*), and a minor in each of the Arts/Social Sciences and the Sciences (see below for choices of minors). The structure of the program ensures disciplinary rigour and breadth through completion of core requirements for a B.A.S. degree, concentration in two distinct minors, and concentration of learning in an academic cohort of B.A.S. students through the interdisciplinary ASCI courses in the B.A.S. core. This core is open only to students in the B.A.S. program. For more information please see: [http://www.uoguelph.ca/bas/]

Bachelor of Commerce
Agricultural Business
Hotel and Food Administration
Human Resources Management
Management Economics in Industry & Finance
Marketing Management
Public Management
Tourism Management

Bachelor of Science in Environmental Sciences

Open Learning
The University of Guelph serves the learning needs of people from a variety of age groups whose educational requirements may not match the program structure or services available through full-time undergraduate study. The adoption of the philosophy of lifelong learning, changes in the demographic characteristics of our communities, the explosion of new knowledge, and the effect of rapid technological advances on professional competence are major factors underlying the University's commitment towards alternative approaches to providing education through open learning.

Open Learning and Educational Support (OpenEd)
Open Learning and Educational Support (OpenEd) is an integral part of the University of Guelph’s learner centred and research-intensive mission.

As leaders in education, OpenEd creates innovative and relevant educational opportunities that meet the learning needs of a local and international audience. OpenEd is guided by learner-centred principles that are reflected in its diverse programs and rich learning experiences for traditional and lifelong learners. OpenEd intentionally integrates pedagogy with technology in the design, development and delivery of its educational programs. Through research and collaboration, it engages in scholarship to advance the teaching and learning mandate of the University of Guelph.

OpenEd supports University of Guelph educators and programs to improve curriculum, teaching practices, and the quality of student learning outcomes. In partnership with academic departments, OpenEd works with faculty to create and maintain interactive and engaging online learning experiences using instructional design best practices, evidence-based pedagogical approaches, and appropriate educational technologies that support identified learning outcomes. Additionally, OpenEd engages in a wide range of activities to develop, administer, and support educational technology at the institution, both in the classroom as well as in the online environment.

The Open Learning program
The Open Learning program is an open-admission program that provides anyone, regardless of their academic background, with an opportunity to register for University of Guelph online degree-credit courses.

Students may choose to register in the Open Learning program for personal enrichment, professional development, eventual application to a degree program, or to satisfy requirements from another post-secondary institution.
Open Learning program students can expect to have the same workload, assignments and examinations as those in a degree program. Upon successful course completion, they will receive the same credit weight as students in a degree program.

Visit the page on the OpenEd website for more information.

**Continuing Education Option**

Students who are not interested in receiving credit for courses may register as continuing education students. Learners who select this option are not required to complete assignments or related exams.

Visit the OpenEd website for more information.

**Guaranteed Admission to a B.A. Program**

Open Learning program students who have no previous post-secondary experience and have completed four courses (2.00 credits) with a 70% minimum cumulative average may transfer into a B.A. (Bachelor of Arts) program at the University of Guelph.

Applicants are advised to complete two courses (1.00 credit) from the College of Arts and two courses (1.00 credit) in the Social Sciences.

Visit the Open Learning and Educational Support website for more information about the Guaranteed Admission Pathway.

**Guaranteed Admission to the B.Comm. Program**

Open Learning program students with no previous post-secondary education will be offered guaranteed admission to the Bachelor of Commerce (B.Comm.) degree program under the following conditions.

1. Applicants must satisfy the English proficiency requirements (see the Undergraduate Calendar, Chapter IV Admission, English Proficiency).
2. Successful completion of four degree-level courses (2.00 credits) with a minimum cumulative average of 70% in at most, six course (3.00 credits) attempts. The four courses (2.00 credits) used in the calculation of the cumulative average will include any degree-level courses used to meet the English and mathematics requirements and must satisfy the following:
   a. at least 1.00 credits must be from arts and social sciences
   b. no more than 1.00 credits from mathematics and statistics combined may be used to calculate the cumulative average
3. Applicants must satisfy the following English and mathematics requirements:
   **English Requirement**
   A grade of 75% or higher in English 12U or the successful completion of one course (0.50 credits) from:
   ENGL*1030, ENGL*1200, GEOG*1220, SOC*1100 or WMST*1000

   **Mathematics Requirement**
   A grade of 75% or higher in the 12U mathematics course(s) required for the applicant's intended major or the successful completion of MATH*1030.

Visit the Open Learning and Educational Support website for more information about the Guaranteed Admission Pathway.

**Open Learning program Certificates and Diplomas**

Certificate in Business
Certificate in Communication Process: Bridging Theory and Practice
Certificate in Environmental Citizenship
Certificate in Environmental Conservation
Certificate in Food Science
Certificate in Hospitality Studies
Certificate in Leadership
Certificate in Public Policy and Administration
Refer to Certificates and Diplomas in this section for descriptions or visit the Certificate/Diploma page on the OpenEd Student Portal.

**Open Learning program Courses***

Please refer to Distance Education in this section for courses offered through the Open Learning program.

Visit the OpenEd website for technical and material requirements.

**Open Learning Bursary**

This bursary has been established by faculty, staff and friends of Open Learning and Educational Support (OpenEd). The funds are intended to provide support for non-degree students who are enrolled in the Open Learning program (courses, certificates and diplomas) and in need of financial assistance. Applicants must be Canadian citizens or permanent residents who can demonstrate significant financial need. Visit the Financial Assistance page on the OpenEd website for more information.

---

**Equine Science Certificate Scholarship**

This scholarship covers the cost of tuition for one course in the Equine Science Certificate program. The scholarship is available to Open Learning program students who have completed two courses in the program with a minimum cumulative average of 80%.

Applications must be submitted to Equine Guelph by February 12 each year. The application must include a short essay (maximum of two pages) that outlines the value of the program. Students may receive the scholarship only once.

**Virginia L. Gray Memorial Bursary**

Virginia L. Gray dedicated 38 years of her life to the University community until her retirement in 2007 as Director, Office of Open Learning. Virginia’s innovative approach to education positioned the University of Guelph to become an international leader in continuing and distance education. Virginia was committed to eliminating barriers to education and to supporting students who had a desire to advance their academic and career goals through education. Family, friends and colleagues of Virginia Gray have established and contributed to the Virginia L. Gray Memorial Bursary as a tribute to her exemplary work. Students interested in enrolling in an Open Learning and Educational Support continuing education or Open Learning program course are eligible to apply. Applicants must be Canadian citizens or Permanent residents. Applications will be reviewed on January 30th and July 30th for upcoming course offerings. Applications must include a letter outlining financial need and academic goals, and must include supporting documentation. Students may receive the bursary only once. Visit the Financial Assistance page on the OpenEd website for more information.

**Prof. H.J. Malik Statistics Prize**

This $150 prize is provided by family, colleagues and friends in honour of H.J. Malik, Professor Emeritus in the Department of Mathematics and Statistics. Application is not required for this award. Open Learning program distance education students who have completed the course STAT*2060 - Statistics for Business Decisions with the highest attained grade over 80% in the previous year will automatically be considered for this award. Award consideration takes place in May, following the previous spring, fall or winter semesters.

**Distance Education**

Open Learning and Educational Support (OpenEd) facilitates the delivery of online degree-credit courses to students. Online courses provide students with a flexible alternative in course scheduling. OpenEd assists in course development and preparation and is the focal point of this activity by providing information, student support, and administration. Please refer to the Distance Education heading in this section for the listing of courses offered through the distance format.

Visit the OpenEd website for more information about distance education.

**Certificate in English Language Program**

The English Language Certificate Program is an intensive academic English program designed to prepare ESL students aged 18 and over for academic study at the undergraduate and graduate level. Classes in grammar, reading, writing, listening and speaking help students achieve the advanced level English skill needed to be successful in academic studies. Students who successfully complete the English Language Certificate Program at the University of Guelph may use the English Language Certificate of English Proficiency, which meets the English proficiency requirements for entry into undergraduate and graduate studies at the University of Guelph and the University of Guelph-Humber. Applicants are encouraged to have an intermediate English skill level, and an academic goal to study at the University of Guelph.

Students may also earn the Certificate of English proficiency by completing the Integrated Admission Pathway (IAP). The Integrated Admission Pathway (IAP) will allow academically qualified international students, who meet the University’s undergraduate admission requirements but have not yet achieved English language proficiency, to complete degree credit courses through the University’s Open Learning program while studying English language courses to achieve the Certificate of English proficiency granted by Open Learning and Educational Support (OpenEd). The pathway includes a combination of classroom-based and fully online degree course offerings and provides a range of student support. Students with an IELTS 5.5 or TOEFL iBT 56 or equivalent and who satisfy the undergraduate admission requirements may be offered conditional admission to one of the following pathway streams:

- Bachelor of Arts
- Bachelor of Science (Mathematical Science, Environmental Geomatics)
- Bachelor of Science (Mathematical Science, Environmental Geomatics)
- Bachelor of Commerce (Undeclared)

Successful completion of the degree-credit courses with a 60% cumulative average and successful completion of the English Language courses with a 75% cumulative average will satisfy the conditions of admission to the degree program specified in the original offer letter. Successful students will enter the degree program at the level of second semester after having studied on campus for three successive semesters.

To learn more, please visit the website at: [http://www.elpguelph.ca](http://www.elpguelph.ca) or contact Open Learning and Educational Support by email at info@OpenEd.uoguelph.ca or call 519-767-5000.
Continuing Education

Open Learning and Educational Support annually offers over 100 professional development programs, courses, conferences, and certificates in collaboration with academic departments and/or professional organizations. For detailed information on learning opportunities offered by OpenEd, please visit the Open Learning and Educational Support website.

Certificate in Coaching for Leadership

Employee engagement and performance management are essential drivers in high performing organizations. The Coaching for Leadership program focuses on developing your leadership skills using the coach approach.

Courses will examine the necessary components of a coaching culture and assist in developing leadership skills in an online learning environment. Participants will learn about performance management and how to manage conflict to build high trust relationships. The program is focused on leadership development using coaching and communication methods to engage employees to achieve organizational excellence.

The program consists of four online courses. All courses in the program have been designed as independent courses and do not have to be completed in sequence. Each course is eight (8) weeks in duration resulting in approximately 30 contact hours. There are no formal admission requirements for the program however the course has been designed for senior leaders, managers, supervisors, human resource professionals, project managers and organizational consultants or anyone who is aspiring to be a leader. Participants can complete the certificate program within approximately one (1) year.

To learn more, please visit the Certificate in Coaching for Leadership website.

Certificate in Couple & Family Therapy Studies

The Certificate in Couple and Family Therapy Studies (CFTS) program is designed to provide specialized training and/or professional development in the theory, concepts and practices that inform needs, problems, and changing patterns of couple and family relationships. The focus of the program is on clinical or direct client service. Systems theory is the primary, although not the only, theoretical orientation within the program.

Courses in the Certificate in Couple and Family Therapy Studies cover the theory, concepts, and approaches of couple and family therapy practice. These courses introduce the major theories and central concepts that form the foundations of couple, family, and marriage therapy. They focus on the historical development of systemic therapy and introduce several models of therapy, such as: Cognitive-Behavioural, Experiential, Bowenian, Contextual, Structural, Strategic and many other models. A comparative analysis of the various models assists students in placing the various therapy tools into an integrated framework.

The courses use a variety of teaching and learning methods to effectively translate theories into practical methods for contemporary therapists. Examples of active learning strategies utilized to promote student engagement include: case studies, small group discussions, small group work projects, activities that utilize movement (e.g., role-plays, fish bowl, etc.). Students should anticipate that many discussions and interactive activities require reflection and sharing from personal and/or professional experience with class members and the instructor.

While any course can be taken as a standalone for personal or professional development, the certificate program consists of three required courses and three elective courses that must be successfully completed within five years.

The certificate is provided in partnership with the Ontario Association for Marriage and Family Therapy.

To learn more, please visit the Certificate in Couple and Family Therapy Studies website.

Certificate in Creative Writing

If you are an aspiring writer looking to get serious about your craft, then the Creative Writing Certificate program is designed for you. Take advantage of an opportunity to explore a variety of genres, improve your writing, and develop the tools to master a significant writing project.

Our creative writing courses are designed to include extensive interaction that works best in a face-to-face learning environment. Class sessions are based on small groups, and each student is encouraged to interact with the instructor and fellow students.

The certificate program consists of four different courses within the program offerings.

The program's design utilizes a highly interactive learning approach, engaging students in case studies and real-life scenarios to provide a deeper analysis of the many approaches, roles, complexities, and challenges in the field and specific functions.

There are no admission requirements. The certificate is achieved by successfully completing four different courses within the program offerings.

The certificate is provided in partnership with the Ontario Association of School Business Officials. To learn more, please visit the Certificate in Disability Management website.

Certificate in Disability Management

The Certificate in Disability Management program provides students with an opportunity to explore concepts and utilize evidence-based best practices to advance their knowledge and skills in disability case management, attendance management, and employee support. Within each of these focuses, legal obligations and ethical responsibilities are explored.

The program’s design utilizes a highly interactive learning approach, engaging students in case studies and real-life scenarios to provide a deeper analysis of the many approaches, roles, complexities, and challenges in the field and specific functions.

There are no admission requirements. The certificate is achieved by successfully completing four different courses within the program offerings.

To learn more, please visit the Certificate in Disability Management website.

English Language Program Certificate Program

The English Language Certificate Program is an intensive academic English program designed to prepare ELP students aged 18 and over for academic study at the undergraduate and graduate level. Classes in grammar, reading, writing, listening and speaking help students achieve the advanced level English skill needed to be successful in academic studies. Students who successfully complete the Advanced level earn the University of Guelph Certificate of English Proficiency, which meets the English proficiency requirements for entry into undergraduate and graduate studies at the University of Guelph and the University of Guelph-Humber. Applicants are encouraged to have an intermediate English skill level, and an academic goal to study at a university.

Students may also earn the Certificate of English proficiency by completing the Integrated Admission Pathway (IAP). The Integrated Admission Pathway (IAP) will allow academically qualified international students, who meet the University’s undergraduate admission requirements but have not yet achieved English language proficiency, to complete degree credit courses through the University’s Open Learning program while studying English language courses to achieve the Certificate of English proficiency granted by OpenEd. The pathway includes a combination of classroom-based and fully online degree course offerings and provides a range of student support.

Students with an IELTS 5.5 or TOEFL iBT 56 or equivalent and who satisfy the undergraduate admission requirements may be offered conditional admission to one of three-degree programs in this pathway:

- Bachelor of Arts (Economics)
- Bachelor of Science (Mathematical Science)
- Bachelor of Commerce (Undeclared)

Successful completion of the Integrated Admission Pathway requires:

- Completion of English Language courses with an overall average of 75% and no course average below 70%, equivalent to the ELCP Advanced Level and achievement of the Certificate of English Proficiency, which meets the University’s English proficiency requirements.
- Successful completion of all credit courses with a minimum 60% cumulative grade.

To learn more, please visit the English Language Programs website: https://opened.uoguelph.ca/English-Language-Programs or contact Open Learning and Educational Support by email at info@OpenEd.uoguelph.ca or call 519-767-5000.

Certificate in Equine Business Management

The Certificate in Equine Business Management is designed for anyone interested in working in the administrative and management aspects of the equine industry. Learn how to develop marketing and business plans, create budgets and set up financial records, manage operations and establish yourself as a professional. Take the first step in gaining the skills required for sustainable equine business success. The Certificate in Equine Business Management requires you to complete six courses.

This program is provided in partnership with Equine Guelph, the Centre for equine education and research at the University of Guelph.

To learn more, please visit the Equine Studies website.

Certificate in Equine Science

The Equine Science Certificate is designed to help you improve the management and welfare of horses in your care. The courses introduce you to research and evidence-based practice and are presented in a practical format, making it easy for you to directly apply what you have learned to the health and performance of your horse. This program is ideal for the horse owner: The Equine Science Certificate requires you to complete six courses successfully. All of the courses are completed online.

This program is provided in partnership with Equine Guelph, the Centre for equine education and research, at the University of Guelph.

To learn more, please visit the Equine Studies website.
The Diploma in Equine Studies developed with Equine Guelph, brings the expertise of a world-class veterinary college to horse owners. You will explore topics like equine safety and management practices, environmental stewardship, equine behavior, nutrition, anatomy, health, and welfare in this comprehensive program. With so many electives to choose from, you can customize your learning to best fit your interests and career goals, with an opportunity to integrate business courses with fundamental equine science studies. Whether you are new to the equine industry or have been involved for many years, the Diploma in Equine Studies will give you the extensive equine education that you are looking for. The Diploma in Equine Studies requires you to complete ten courses. This program is delivered in partnership with Equine Guelph, Centre for equine education and research at the University of Guelph.

To learn more, please visit the Equine Guelph, Centre for equine education and research at the University of Guelph.

Certificate in Equine Welfare
This program challenges you to consider welfare from the perspective of the horse. You will use an evidence-based approach to support your views for or against specific issues relating to equine management and gain an in-depth understanding of the Five Freedoms, a core concept in animal welfare. You will examine the science behind what is required to support sound management and welfare practices for horses in Canada and around the globe. The Equine Welfare Certificate will help you discover solutions to the behavior and health problems horses face because of our management practices. The Equine Welfare Certificate requires you to complete six courses.

This program is delivered in partnership with the Campbell Centre for the Study of Animal Welfare, and Equine Guelph the Centre for equine education and research, at the University of Guelph.

To learn more, please visit the Equine Guelph, Centre for equine education and research at the University of Guelph.

Certificate in Facilities Management
The Certificate in Facilities Management provides students with the knowledge, skills, and abilities required to manage and lead the Ontario School Board’s infrastructure in a way that meets legal requirements and regulating authorities' standards, ensuring sustainability and creating green learning environments for students and communities, as well as engenders employee engagement.

There are no admission requirements. The certificate is achieved by successfully completing four different courses from within the program offerings.

The certificate is provided in partnership with the Ontario Association of School Business Officials.

To learn more, please visit the Certificate in Facilities Management website.

Certificate in Human Resources Management for School Board Administration
The Certificate in Human Resources Management for School Board Administration program is designed for Ontario school board professionals who wish to develop and/or enhance their knowledge, skills, and abilities in effective human resources management as it relates to the uniqueness of the school board environment. The curriculum reflects the current and relevant information, critical issues, and challenges facing human resources professionals within Ontario school boards.

There are no admission requirements. The certificate is achieved by successfully completing four different courses from within the program offerings.

The certificate is provided in partnership with the Ontario Association of School Business Officials.

To learn more, please visit the Certificate in Human Resources Management for School Board Administration website.

Certificate in Information and Communication Technology Management
The Certificate in Information and Communication Technology Management program is designed for information technology professionals who wish to develop their knowledge and skills in effective information technology management and enhance their leadership and management competencies. This program offers students a strategic overview of the management of information and technology challenges and opportunities in today’s work environment.

There are no admission requirements. The certificate is achieved by successfully completing four different courses from within the program offerings.

The certificate is provided in partnership with the Ontario Association of School Business Officials.

To learn more, please visit the Certificate in Information and Communication Technology Management website.

Certificate in Information Management, Privacy, and Access
The Certificate in Information Management, Privacy, and Access is designed to provide a comprehensive overview of the fundamentals of information management, privacy, and access as it relates to functions within Ontario school boards. Additionally, the program offers students a strategic overview of leadership within today’s IMPA environment. Students will gain a sound understanding of the legislation affecting information management, privacy, and access, developing the necessary skills to design and deliver effective IMPA programs, policies, and procedures.

There are no admission requirements. The certificate is achieved by successfully completing four different courses from within the program offerings.

The certificate is provided in partnership with the Ontario Association of School Business Officials.

To learn more, please visit the Certificate in Information Management, Privacy, and Access website.

Certificate in Knowledge Mobilization
The Certificate in Knowledge Mobilization is designed to develop participants' knowledge, skills and values with respect to knowledge mobilization (KMb) and build capacity to select and apply KMb tools and techniques to move knowledge into action.

Addressing today's complex social, economic, health or environmental challenges calls for our increased capacity to collaborate in finding and implementing innovative solutions. While a vast amount of knowledge is created every day, only a fraction of it is effectively mobilized - shared, used, and applied to inform real-life situations. This lack of knowledge transfer or exchange is contributing to a gap between research, policy and practice, which hinders social innovation and slows down progress. The Certificate in Knowledge Mobilization can help close this gap by providing participants with the skills and tools to enable the efficient and appropriate dissemination, uptake and application of knowledge.

The certificate consists of three (3) online courses, eight weeks in length.

The certificate is provided in partnership with the Community Engaged Scholarship Institute.

To learn more, please visit the Certificate in Knowledge Mobilization website.

Certificate in Pupil Transportation Management
The Certificate in Pupil Transportation Management provides a unique opportunity for school board transportation specialists and independent operators to develop and enhance their knowledge, skills, and abilities in effective transportation management. The curriculum reflects the current information, evidence-based best practices, issues, and challenges facing pupil transportation at Ontario school boards.

There are no admission requirements. The certificate is achieved by successfully completing four different courses from within the program offerings.

The certificate is provided in partnership with the Ontario Association of School Business Officials.

To learn more, please visit the Certificate in Pupil Transportation Management website.

Certificate in Supply Chain Management for Public Procurement
The Certificate in Supply Chain Management for Public Procurement is designed to provide knowledge and skills required in supply chain management and applied in the broader public sector (e.g., school boards, hospitals, etc.). Students will develop a deeper understanding of the principles of supply chain management for public procurement and the critical issues currently facing the field (e.g. legislative and regulatory change, costing, risk), while advancing their skills in strategic sourcing decision-making, methods of procurement, managing the competitive bidding process, contract, and managing vendor relationships from negotiation to dissolution.

There are no admission requirements. The program is currently comprised of five different courses, four of which must be successfully completed to earn the certificate.

The certificate is provided in partnership with the Ontario Association of School Business Officials.

To learn more, please visit the Certificate in Supply Chain Management for Public Procurement website.

Certificate in Turf Managers' Short Course
The Turf Managers' Short Course is an intensive four-week residential program designed to provide turf industry personnel with knowledge in all aspects of turf management and culture. Students will learn to interpret and integrate turfgrass agronomic information to design and implement turfgrass management strategies. This program is delivered in partnership with the Guelph Turfgrass Institute.

To learn more please visit the Turf Managers' Short Course Certificate website.
Diploma in Equine Studies
The Diploma in Equine Studies developed with Equine Guelph, brings the expertise of a world-class veterinary college to horse owners. You will explore topics like equine safety and management practices, environmental stewardship, equine behavior, nutrition, anatomy, health, and welfare in this comprehensive program. With so many electives to choose from, you can customize your learning to best fit your interests and career goals, with an opportunity to integrate business courses with fundamental equine science studies. Whether you are new to the equine industry or have been involved for many years, the Diploma in Equine Studies will give you the extensive equine education that you are looking for.

This program is delivered in partnership with Equine Guelph, Centre for equine education and research at the University of Guelph.

To learn more, please visit the Equine Studies website.

Diploma in Human Resources Management
The Human Resources Management diploma program has been developed to provide you with the fundamental knowledge, skills and values to become a successful HR professional. The courses—all approved by the Human Resources Professionals Association (HRPA)—have been designed to assist you with understanding the day-to-day realities of working within the HR field. The courses include a mix of lectures, case studies, small group work, simulations and role playing. Our program instructors bring a wealth of knowledge and relevant work experience to the classroom. These experts will guide and coach you to develop the core competencies required to be proficient in the field of HR.

In order to receive your Diploma in Human Resources Management you must complete ten (10) courses within the program which include nine (9) Human Resources Professional Association (HRPA) approved courses and one (1) online course elective. There are no formal admission requirements for individuals interested in registering for courses.

To learn more, please visit the Diploma in Human Resources Management website.

Diploma in School Board Administration
The Diploma in School Board Administration (DSBA) is designed for Ontario school board professionals who wish to develop and enhance their skills and knowledge of the board’s business operations and functions. Facilitated by an expert team of instructors, the program explores a broad range of management topics and addresses strategic multidisciplinary issues in order to help participants effectively manage business opportunities and challenges in the school board environment. The intended audience includes individuals seeking to enhance their career potential within the school board environment.

While successful completion of post-secondary education is required for admission to the program, academic consideration may be extended to students with experience in a board environment. The diploma is achieved by successfully completing six online required courses and four elective courses, currently classroom-based. The diploma provided in partnership with the Ontario Association of School Business Officials.

To learn more, please visit the Diploma in School Board Administration website.

DNA Barcoding Courses
Explore DNA Barcoding, PCR, next generation sequencing and environmental DNA (eDNA), to monitor biodiversity and obtain precise species identification, authentication and traceability through online courses developed by the Centre for Biodiversity Genomics. Gain an introduction to and history of DNA barcoding and its application as a standard for species identification. Metabarcoding reviews the state of the current technology and the suite of bioinformatics tools available for sequence analysis and data interpretation. Regulatory and forensic applications of DNA barcoding can trace and authenticate to the species level substitutes or counterfeit in traded commodities and pests. Standard operating workflows will give you the tools to develop routine protocols and integrative operational procedures.

Admission to the program requires an Undergraduate degree or College diploma, and successful completion of a basic Statistics course.

These courses are provided in partnership with the Centre for Biodiversity Genomics at the University of Guelph.

To learn more, please visit the DNA Barcoding website.

Online Equine Studies Certificate Programs
Equine Science Certificate
The Equine Science Certificate is designed to help you improve the management and welfare of horses in your care. The courses introduce you to research and evidence-based practice and are presented in a practical format, making it easy for you to directly apply what you have learned to the health and performance of your horse. This program is ideal for the horse owner. The Equine Science Certificate requires you to complete six courses successfully. All of the courses are completed online.

This program is provided in partnership with Equine Guelph, the Centre for equine education and research, at the University of Guelph.

To learn more, please visit the Equine Studies website.

Certificate in Equine Business Management
The Certificate in Equine Business Management is designed for anyone interested in working in the administrative and management aspects of the equine industry. Learn how to develop marketing and business plans, create budgets and set up financial records, manage operations and establish yourself as a professional. Take the first step in gaining the skillset required for sustainable equine business success. The Certificate in Equine Business Management requires you to complete six courses.

This program is provided in partnership with Equine Guelph, the Centre for equine education and research at the University of Guelph.

To learn more, please visit the Equine Studies website.

Equine Welfare Certificate
This program challenges you to consider welfare from the perspective of the horse. You will use an evidence-based approach to support your views for or against specific issues relating to equine management and gain an in-depth understanding of the Five Freedoms, a core concept in animal welfare. You will examine the science behind what is required to support sound management and welfare practices for horses in Canada and around the globe. The Equine Welfare Certificate will help you discover solutions to the behavior and health problems horses face because of our management practices.

This program is delivered in partnership with the Campbell Centre for the Study of Animal Welfare and Equine Guelph the Centre for equine education and research, at the University of Guelph.

The Equine Welfare Certificate requires you to complete six courses.

To learn more, please visit the Equine Studies website.

Diploma in Equine Studies
The Diploma in Equine Studies developed with Equine Guelph, brings the expertise of a world-class veterinary college to horse owners. You will explore topics like equine safety and management practices, environmental stewardship, equine behavior, nutrition, anatomy, health, and welfare in this comprehensive program. With so many electives to choose from, you can customize your learning to best fit your interests and career goals, with an opportunity to integrate business courses with fundamental equine science studies. Whether you are new to the equine industry or have been involved for many years, the Diploma in Equine Studies will give you the extensive equine education that you are looking for.

This program is delivered in partnership with Equine Guelph, Centre for equine education and research at the University of Guelph.

To learn more, please visit the Equine Studies website.

Online Horticulture Studies Diploma Programs:
The Horticulture Diploma Programs include two diploma options:
Horticulturist Diploma
The Horticulture Diploma is designed to produce highly knowledgeable, skilled and versatile graduates looking to work in parks and recreation, institutional grounds, nurseries, greenhouses, garden centers, or as a naturalist or professional gardener.

To achieve the Horticulture Diploma, students must successfully complete ten courses: five required courses and five elective courses.

The five required courses are:
- Soil and Plant Growth
- Plant Identification
- Integrated Pest Management
- Business Principles in Horticulture
- Horticulture Capstone

Elective courses can be selected by the student from the listing shown in Table 1. Students can mix and match electives to suit their goals and objectives or they can complete the two (2) elective courses associated with an area of focus. If students successfully complete the two courses associated with an area of focus, the area of focus will be listed on their Diploma (e.g. Horticulture Diploma, Area of Focus in Greenhouse Production).

2020-2021 Undergraduate Calendar
Landscape Design Diploma

The Landscape Design Diploma will elevate your level of understanding and skills related to commercial and residential landscape design. Students who graduate from the diploma will have thorough knowledge of landscape design techniques and will be able to present their ideas to prospective clients in a professional manner. The Landscape Design Diploma is suited to anyone looking to pursue a career in landscape design or upgrade their credentials as a landscape designer.

To achieve the Landscape Design Diploma, students must successfully complete ten courses: eight required courses, a choice of two courses and one elective course.

The eight required courses are:

- Landscape Design I
- Landscape Design II
- Ecological Design
- Plant Identification
- Graphic and Presentation Styles
- Landscape Construction
- Business Principles in Horticulture
- Landscape Design Capstone Project

Students must choose one of the following two courses:

- Computer Assisted Drafting I
- Soil and Plant Growth

One elective course must be selected by the student from the approved listing shown in Table 1.

To learn more about the Horticulture Diplomas, please visit the Horticulture Studies website.

Online Horticulture Studies Certificate Programs:

There are five certificate programs. Students may choose to complete individual courses or complete a set of courses that count towards the certificates. Students who complete either the Horticulture or Landscape Design Certificate may continue to complete additional courses towards a diploma.

To learn more about the Horticulture Diplomas, please visit the Horticulture Studies website.

Horticulturist Certificate

The Horticulturist Certificate will show you how to create beautiful and hardy landscapes through innovative residential garden design tactics and strategies. You will explore topics related to plant care principles, soil conditions, plant science, and horticulture. The program is designed to prepare you with the knowledge and skills related to pests, diseases and weed management so you can effectively address plant health issues and optimize the well-being of any garden. Designed specifically for gardeners, this program will enhance your knowledge and skills with respect to the residential garden environment.

To achieve the Horticulturist Certificate, students must successfully complete five courses: three required courses and two elective courses.

The three required courses are:

- Soil and Plant Growth
- Plant Identification
- Integrated Pest Management

Elective courses can be selected by the student from the listing shown in Table 1. Students can mix and match electives to suit their goals and objectives or they can complete the two (2) elective courses associated with an area of focus. If students successfully complete the two courses associated with an area of focus, the area of focus will be listed on their Diploma (e.g. Horticulture Diploma, Greenhouse Production Area of Focus).

To learn more about the Horticulture Certificates, please visit the Horticulture Studies website.

Landscape Design Certificate

The Landscape Design Certificate will show you how to improve the design of current landscapes and offer meaningful solutions to landscape design challenges. Learn how to produce landscape drawings, recommend construction materials that satisfy client intentions, and deliver aesthetically pleasing design and function into residential and commercial settings.

To achieve the Landscape Design Certificate, students must successfully complete five courses: four required courses and a choice of two courses.

To learn more about the Horticulture Certificates, please visit the Horticulture Studies website.

Maintaining Golf Courses Certificate

The Maintaining Golf Courses Certificate is designed to provide students with valuable skills and knowledge related to golf course design and construction techniques, tree care, and the environmental care of golf courses. Develop practical and applied skills to design, construct and manage golf courses and turf, keeping the sustainable care of turf and plant communities at the forefront.

To achieve the Certificate, students must successfully complete six required courses.

Sustainable Urban Agriculture Certificate

The Sustainable Urban Agriculture Certificate is designed for urban dwellers, city planners and community gardeners interested in growing food in a sustainable manner to support families, neighbourhoods and communities.

To achieve the Certificate, students must successfully complete five courses: four required courses and one elective.

Sustainable Urban Horticulture Certificate

The Sustainable Urban Horticulture Certificate focuses on the environmental, social and economic implications of horticulture in our cities. The program is designed for landscape designers and builders, municipal planners and environmental advocates interested in micro-economic sustainability and maximizing aesthetic and property values through innovative garden design.

To achieve the Certificate, students must successfully complete five courses: four required courses and one elective.

Professional Association Affiliations

Several courses have been approved by the following associations and may be applied to each association’s respective professional programs:

- American Association of Sexuality Educators Counselors and Therapists (AASECT)
- Association of Administrative Assistants
- Board of Examiners in Sex Therapy and Counselling in Ontario (BESTCO)
- Canadian Golf Superintendents Association
- Canadian Payroll Association (CPA)
- College of Family Physicians of Canada
- Equestrian Canada
- Golf Course Superintendents Association of America
- Human Resources Professionals Association
- Industrial Accident Prevention Association (IAPA)
- Integrated Pest Management - Plant Health Care Council
- Ontario Association for Marriage and Family Therapy
- Ontario Association of School Business Officials
- Ontario Association of Veterinary Technicians (OAVT)

Summer Studies (Summer Semester)

Because the University operates on a three-semester system, a broad range of course offerings are available in the Summer Semester (May to August). During the summer months, degree-credit courses are offered in a variety of formats to meet the needs of full-time and part-time students both on and off campus.

Visit the OpenEd website for more information on distance education.
XII. Course Descriptions

General Information

Course Labelling and Levels
Each course is identified by a two-part code. The first part of the code refers to the subject area, the second to the level of the course. Thus, the course PSYC*3570 is a course in the subject area of Psychology (PSYC*XXXX), and is of a level that places it among courses in the 3000 series. The series 1000, 2000, 3000 and 4000 numbers are intended to indicate progressively more demanding content, and correspondingly increasing competence on the part of the students enrolled in the course. Courses in the 1000 series are mainly for first year students, those in the 2000 series are mainly for second year students, and those in the 3000 series are for third year students. Similarly, courses in the 4000 series are mainly intended to be taken by students in the fourth year of honours programs. It is important that students planning their courses have clearly in mind the significance of these numbers so that they may guard against undertaking course work at levels for which they are insufficiently prepared. A two-semester course (e.g. AGR*2351/2) is taken over 2 continuous semesters and counts as 1 course attempt per semester for classification, continuation of study and calculation of fees. Two-semester courses cannot be split.

Course Information
The letters S, F, W indicate the University's intention to offer the course in the Summer (S), Fall (F) or Winter (W) semester during the academic year covered by this Calendar. Although courses normally will be offered in the semester indicated, students preparing their course programs are advised to consult the Undergraduate Course Timetable. The University cannot guarantee that all courses will be offered in the exact semester indicated. The letter U indicates that an intended offering has not been assigned to the course. Students should consult the Undergraduate Course Timetable posted on WebAdvisor or contact the departments offering those courses to determine the semester offerings. The figures in parentheses ( ) following the semester designation are a general guide to the lecture and laboratory contact hours per week, the first digit being the number of lecture hours and the second, the number of laboratory hours. The credit weight for each course appears in brackets [ ]. A credit weight of [0.50] indicates 10-12 student effort hours, including class time, on academic tasks associated with the course.

Detailed course descriptions are maintained at the office of the department offering the course. Some courses, designated “Experiential Learning” courses in the Calendar description, are deliberately designed to accommodate the need to grant academic credit for experiential learning external to regular courses, in such contexts as co-operative education, field observation/job shadowing, internship/externships, practical, service learning, or work study (and other approved experience). Prior approval for admission to these courses must be obtained from the department and instructor concerned.

Course Prerequisites
In lists of course prerequisites, "or" conditions are spelled out explicitly, but "and" conditions are indicated with a comma , . For example: "CSTU*2270, FRHD*2010, NUTR*2010" means "CSTU*2270 and FRHD*2010 and NUTR*2010". A number of courses have stated prerequisites which are prior requirements for entry to the course. Students who do not satisfy course prerequisites, or who in the opinion of the instructor do not possess an equivalent background to that of the stated prerequisites, are not eligible to enroll in the course. When some specific background is desirable but not required, the course description will include a statement of recommended background. It is understood that the instructor may accept equivalent courses from other institutions in place of the stated prerequisites. Students who wish to enroll in courses for which they do not have the stated prerequisite(s) must obtain instructor approval as outlined in Section VIII, Undergraduate Degree Regulations and Procedures, in this Calendar.

Course Equates and Restrictions

Equates - Equate indicates a course identical to the one under which it is listed. The course may have been re-numbered or may be cross-listed under two subject areas. Students will not be permitted to register in equated courses.

Restrictions - A restriction is a "rule" that is placed on the computer system (Colleague) at the direction of an academic department so that particular students may not register in particular courses. The course may be restricted because there is sufficient overlap in content with another course so that it is inappropriate for the student to take a similar course for credit. In a different instance, the course may be restricted by "Instructor Consent" so that the student must discuss the special requirements of the course with the instructor before enrolling. Or, alternatively, the restriction may reflect a "Priority Access" designation for enrolment management purposes. (See Priority Access).
Accounting

Department of Management

ACCT*1220 Introductory Financial Accounting F,W (3-0) [0.50]

This introductory course is designed to develop a foundational understanding of current accounting principles and their implication for published financial reports of business enterprises. It builds the base of knowledge and understanding required to succeed in more advanced study of accounting. The course approaches the subject from the point of view of the user of accounting information rather than that of a person who supplies the information.

Offering(s): Also offered through Distance Education format.
Restriction(s): ACCT*2220. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Management

ACCT*1240 Applied Financial Accounting W (3-0) [0.50]

This course requires students to apply the fundamental principles emanating from accounting’s conceptual framework and undertake the practice of financial accounting. Students will become adept at performing the functions related to each step in the accounting cycle, up to and including the preparation of the financial statements and client reports. Students will also develop the skills necessary for assessing an organization’s system of internal controls and financial conditions.

Prerequisite(s): ACCT*1220 or ACCT*2220
Equate(s): AGEC*2230, BUS*2230
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Management

ACCT*2230 Management Accounting F,W (3-0) [0.50]

This course emphasizes the use of accounting information to facilitate effective management decisions. Topics include cost determination, cost control and analysis, budgeting, profit-volume analysis and capital investment analysis.

Prerequisite(s): ACCT*1220 or ACCT*2220
Equate(s): AGEC*2230, BUS*2230
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Management

ACCT*3280 Auditing I,F,S (3-0) [0.50]

Auditing I is an examination of the principles and theory underlying the practice of auditing. Concepts of materiality and audit risk are examined and discussed. Sources and techniques for gathering auditing evidence will also be examined. Modern organizations rely on information systems, technology and internal controls to manage and monitor their operations and the impact of these systems on the quality of information produced and on the scope of audits are important elements of this course.

Prerequisite(s): ACCT*3330
Department(s): Department of Management

ACCT*3330 Intermediate Financial Accounting I,F,W (3-0) [0.50]

This course presents a critical evaluation of accounting concepts, principles and practices in relation to both the traditional and current value accounting measurement models. Emphasis will be on the effect of alternative accounting practices and measurement models on income determination and asset valuation.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): ACCT*1220 or ACCT*2220
Equate(s): BUS*3330
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Management

ACCT*3340 Intermediate Financial Accounting II,S,F (3-0) [0.50]

This course focuses on how entities account for current and non-current liabilities and equity accounts, including, income taxes, leases, pensions and other post retirement benefits, share equity and retained earnings, stock options. Additional topics may include earnings per share, restatements and statement analysis.

Prerequisite(s): ACCT*3330
Department(s): Department of Management

ACCT*3350 Taxation S,F (3-0) [0.50]

The fundamentals of the tax system as it applies to all taxpayers will be the focus of the first half of the course. The second half will develop forms of business organizations from a tax perspective. Basic tax planning techniques which attempt to maximize the cash flows and returns on investments will then be studied. The emphasis in the course is on business decision making. A review of personal financial planning and investment decisions will also be included.

Prerequisite(s): ACCT*3330
Restriction(s): Enrolment may be restricted to particular degrees or programs. See the department for more information.
Department(s): Department of Management

ACCT*4220 Advanced Financial Accounting F (3-0) [0.50]

This course is a critical evaluation of issues and problems associated with business combinations, long-term intercorporate investments, foreign operations and accounting for not-for-profit organizations. There is a strong emphasis on applying this body of knowledge through practical problems.

Prerequisite(s): ACCT*3330 or BUS*3340
Equate(s): BUS*4220
Restriction(s): Enrolment may be restricted to particular degrees or programs. See the department for more information.
Department(s): Department of Management

ACCT*4230 Advanced Management Accounting W (3-0) [0.50]

This course provides advanced coverage of management accounting concepts and the application of management accounting information for managerial decision-making. This course extends the concepts covered in intermediate management accounting and also integrates pertinent situational problems from other functional areas of enterprises such as global trade and process controls.

Prerequisite(s): ACCT*3230 or BUS*3230
Equate(s): BUS*4230
Restriction(s): Enrolment may be restricted to particular degrees or programs. See the department for more information.
Department(s): Department of Management

ACCT*4270 Auditing II F (3-0) [0.50]

This course considers a number of advanced topics concerning both the auditor and audit techniques within the context of public accounting. It builds on the knowledge of the audit task derived in Auditing I - ACCT*3280 as well as the depth and breadth of knowledge gained in ACCT*3330 and ACCT*3340.

Prerequisite(s): ACCT*3280 or BUS*3280
Equate(s): BUS*4270
Department(s): Department of Management

ACCT*4290 IT Auditing and Data Analytics W (3-0) [0.50]

This course introduces the student to the field of auditing within a computer based environment. Students will develop an enhanced understanding of information systems, information system risks, management controls, control evaluation, audit strategies, and computer assisted audit techniques. The course will also introduce data analytic techniques used to analyze structured and unstructured data.

Prerequisite(s): ACCT*3280 or BUS*4280
Equate(s): BUS*4290
Department(s): Department of Management

ACCT*4340 Accounting Theory W (3-0) [0.50]

This course will draw on accounting research, primarily empirical research. Rather than covering specific GAAP rules, the course will focus on how investors react to GAAP rules, why financial information is important, and how its use/ misuse affects investor decision making and management behaviour. The course is thus about accounting, instead of about how to apply accounting standards.

Prerequisite(s): ACCT*4220
Restriction(s): ACCT*4240
Department(s): Department of Management

Revision:
### ACCT*4350 Income Taxation II F (3-0) [0.50]

An intensive study of the Canadian Income Tax Act and related statutes, this course will focus on the application to the taxation of individuals, partnerships and corporations. A strong emphasis will be placed on compliance and tax planning.

*Prerequisite(s):* ACCT*3350 or BUS*3350  
*Equate(s):* BUS*4350  
*Department(s):* Department of Management

### ACCT*4440 Integrated Cases in Accounting W (3-0) [0.50]

This course will help students develop an analytical approach to analyzing accounting problems and improve professional judgement. Students will apply previously-gained technical knowledge of accounting, tax, assurance, finance, and corporate governance to various financial reporting and advisory problems and scenarios. They will develop an enhanced understanding of the impact of user and preparer objectives on the selection of accounting policies, and accounting estimates in an environment of some uncertainty.

*Prerequisite(s):* ACCT*4220  
*Restriction(s):* ACCT*4240  
*Department(s):* Department of Management
**Agriculture**

Ontario Agricultural College, Dean's Office

AGR*1110 Introduction to the Agri-Food Systems F (6-0) [1.00]

This introductory course provides an overview of Canadian and global agri-food systems. Students will be introduced to many different facets of agriculture, including primary production (conventional and organic) of commodity, mid-value and high-value crops, and livestock. Students will explore the agri-food system by tracing consumer end-products back to primary production. Modern, industrial agri-food systems as well as subsistence farming will be discussed. The course incorporates an experiential learning component in which students will explore a new agri-food opportunity for Ontario by designing and assessing the value chain.

Restriction(s): AGR*1100 . AGR*1250 . Restricted to students in BAH.FARE, BSC(AGR), Minor in Agriculture

Department(s): Department of Plant Agriculture, Department of Animal Biosciences

Location(s): Guelph

AGR*2050 Agroecology W (3-0) [0.50]

This course considers the interactions of all important biophysical, technical and socioeconomic components of farming systems and examines these systems as the fundamental units of study. Mineral cycles, energy transformations, biological processes and socioeconomic relationships are analyzed as a whole in an interdisciplinary fashion.

Restriction(s): CROP*2110

Department(s): Department of Plant Agriculture, Department of Animal Biosciences

AGR*2150 Plant Agriculture for International Development F (3-0) [0.50]

This course will provide students interested in international development with an introductory mechanistic understanding of the biology underlying crop production in developing nations. Emphasis will be placed on simple, low-cost solutions from biology that have the potential to aid efforts in international development. This course is accessible to science and non-science students.

Restriction(s): AGR*2470

Department(s): Department of Plant Agriculture

AGR*2320 Soils in Agroecosystems F (3-2) [0.50]

This course is an introduction to soil resources with emphasis on management practices that will sustain the productivity of these resources and enhance the quality of the ecosystems of which they are a part. Students will develop a management plan for a farm that will take into account the roles of geological, geomorphological, biological, climatic and temporal factors on the formation, properties and uses of soils. The management plans will be placed in the broader context of provincial policies related to soil, air and water resources and local zoning regulations.

Restriction(s): ENVS*2060 or SOIL*2010

Department(s): School of Environmental Sciences

AGR*2350 Animal Production Systems, Health and Industry W (3-3) [0.50]

This course is designed to introduce the student to the Agri-food system in Ontario, nationally and internationally. All major animal industries will be covered starting from the grocery store and working back to the primary producer. Companion and exotic animals will also be covered. Topics include food, health and wellness (domestic animals and human), nutrition, housing, genetics, reproduction, husbandry practices and processing.

The course includes laboratories and animal production unit tours.

Restriction(s): BIOL*1030 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090)

Department(s): Department of Animal Biosciences

AGR*2470 Introduction to Plant Agriculture F (3-3) [0.50]

The basic principles of plant morphology, nutrition, growth and development will be related to where and how agriculturally significant plants are grown. Agroecosystems and farming systems will be considered as frameworks for crop production analyses. The course uses examples from temperate, sub-tropical and tropical crops and cropping systems. Labs include problem-solving exercises in the context of plant production.

Restriction(s): AGR*2150

Department(s): Department of Plant Agriculture

AGR*2500 Field Course in International Agriculture W (3-0) [0.50]

This course introduces students to a wide range of tropical and subtropical agricultural production systems and issues. The course is comprised of a weekly 3 hour evening lecture and a two week field trip to Costa Rica where students will visit corporate and individual farms, university and government research stations. The field trip occurs during Reading Week in February. This course must be recorded as part of your Winter course selection. The cost of the course is approximately $3200.00 per student, in addition to tuition and compulsory fees. Students must identify their interest in taking this course by contacting the instructor before the October course selection period of the previous year. In order to confirm reservations for travel arrangements a deposit of $300 in the form of a cheque, made payable to the University of Guelph, must be submitted to the Department of Plant Agriculture Undergraduate Program Assistant in the Crop Science building, room 306 by November. Some financial support for travel may be available.

Restriction(s): Registration in BSC(AGR) or BA.ID or Minor in Agriculture Instructor consent required.

Department(s): Department of Plant Agriculture

AGR*3010 Special Studies in Agricultural Science 1 S,F,W (3-0) [0.50]

A special study option that enables undergraduate students in semesters 5 through 8 to undertake specific projects in agricultural sciences. The topic of the special study will be determined in consultation with an faculty member and the individual student. Students are responsible for making appropriate arrangements with faculty at the departmental and/or college level prior to registration for the course.

Restriction(s): 10.00 credits

Department(s): Department of Plant Agriculture

AGR*3450 Research Methods in Agricultural Science F (3-2) [0.50]

This course provides students with an opportunity to enhance their understanding of the principles and processes of agricultural research. The course will provide students with a foundation in critical thinking, experimental design and data analysis that will be applicable to independent research projects and graduate studies. Students will also explore the practical requirements and limitations of scientific research. Laboratory and field safety, animal care, intellectual property and research ethics will be reviewed. Students will be required to practice both oral presentation and writing skills as core components of their evaluation.

Restriction(s): Completion of 7.50 credits including (1 of GEOG*2460, STAT*2040, STAT*2060, STAT*2080)

Department(s): Department of Plant Agriculture, Department of Animal Biosciences

AGR*3500 Experiential Education F (3-0) [0.50]

Student initiated experiential learning opportunities can be developed as a credit course in consultation with the course instructor. Students who find suitable employment in their chosen industry related to food, agriculture and environment over a summer semester can receive credit while completing the requirements for this course. This course is designed to run from May until November, with registration in the Fall semester. Students must confirm participation in this course by May 1st, prior to starting their summer employment. The course is designed to meet the needs of B.Sc.(Agr.), BBRM and Agricultural Business students. Department of Plant Agriculture.

Restriction(s): 5.00 credits

Department(s): Department of Plant Agriculture

AGR*4010 Special Studies in Agricultural Science II S,F,W (3-0) [0.50]

This special study option enables undergraduate students in semesters 5 through 8 to undertake specific projects in agricultural science. The topic of the special study will be determined in consultation with a faculty member and the individual student. Students are responsible for making appropriate arrangements with faculty member prior to registration for the course.

Restriction(s): 15.00 credits

Department(s): Department of Animal Biosciences

AGR*4020 Precision Techniques for Plant Agriculture F (3-0) [0.50]

This course will be a survey of principles and applications of technologies supporting precision farming and planning for natural resource data management. Topics will include Global positioning system (GPS), yield monitoring and mapping, remote sensing, geographic information system (GIS), variable rate technologies (VRT), data layering, Internet information access, and computer software for management.

Restriction(s): AGR*2470, STAT*2040, (BIOL*1050 or BIOL*1070)

Department(s): Department of Plant Agriculture
AGR*4450 Research Project I S,F,W (0-12) [1.00]
This course provides for the independent study of a current topic in agricultural or environmental science designed to encourage senior undergraduates to conduct research. The course includes participation in meetings organized by the coordinator, work with a faculty advisor to develop a research project, formulate hypotheses, design and carry out preliminary experiments to test the hypotheses. Students will carry out independent library research, begin experimental work, prepare a written report and make a presentation to other students in the course of the research plan and preliminary results. Students must make arrangements with both the faculty supervisor and the course coordinator at least one semester before starting the course. This course will normally be followed by AGR*4460 to provide 2 semesters to complete the research project.

Prerequisite(s): 10.00 credits
Restriction(s): Permission of the course coordinator (contingent on the availability and agreement of a faculty advisor). BSC(Agr) or BSC or BBRM, 70% cumulative average.
Department(s): Dean's Office, Ontario Agricultural College

AGR*4460 Research Project II S,F,W (0-12) [1.00]
Independent study of a current topic in agricultural or environmental science designed to encourage senior undergraduates to conduct research. The focus of this course will be the completion of the research plan developed in AGR*4450 by the student in consultation with a faculty advisor. The course includes participation in meetings organized by the coordinator and meetings with a faculty advisor to review research progress. Students will carry out independent research, prepare a written report of the research findings in a scholarly style and make a presentation to other students in the course of the research results. Open to students in semesters 6, 7 and 8 of the B.SC. (Agr.) or B.Sc. degree program.

Prerequisite(s): AGR*4450
Restriction(s): Permission of the course coordinator and faculty advisor.
Department(s): Dean's Office, Ontario Agricultural College

AGR*4600 Agriculture and Food Issues Problem Solving W (3-0) [1.00]
The issues facing the agriculture and food sector are many and varied and relate to the economy, the environment and society. Within these issues there are problems which require thoughtful solutions. Working in teams, with guidance from faculty advisors, students will have an opportunity to develop solutions to real-world problems facing the agriculture and food sector. In the process students will have an opportunity to develop their research, communication, presentation, writing and group work skills.

Prerequisite(s): 12.50 credits
Restriction(s): Registration in BSC(AGR), BBRM, B.COMM.FAB, B.COMM.FAB:C, BSC.PLSC, or BA.FARE program, or Minor in Agriculture.
Department(s): Department of Plant Agriculture
Anatomy

Department of Biomedical Sciences

For course listings and descriptions see Biomedical Sciences.

Additional course listings may be found in the course descriptions for Human Kinetics, Veterinary Medicine and Zoology.

</thead>
<tbody>
<tr>
<td>ANSC*1210</td>
<td>Principles of Animal Care and Welfare W</td>
<td>(4.5-0)</td>
<td>This course is an introduction to the major ethical theories that deal with humanity's duties to animals. The relationship of ethics to science will be discussed. Factors that contribute to the quality of life of animals will be considered and methods of assessing animal welfare will be described. Common causes of reduced animal welfare will be covered. The course will also deal with how different cultures approach animal welfare and attempt to regulate it. Prerequisite(s): 1 of BIOL<em>1050, BIOL</em>1070, BIOL<em>1080, BIOL</em>1090 Restriction(s): Registration in BSAG, BSCH, ABIO or BBRM.EQM Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*2340</td>
<td>Structure of Farm Animals W (3-0)</td>
<td>[0.50]</td>
<td>This course is an introduction to anatomy and carcass structure of farm animals. Consideration is given to the major systems in the body and the whole range of animal structure from molecular biology to commercial carcass grading. The course provides a basic understanding of factors such as meat tenderness, adipose development in the carcass, abnormalities of meat quality such as PSE pork and dark-cutting beef, and carcass composition. Offering(s): Also offered through Distance Education format. Prerequisite(s): 2 of BIOL<em>1050, BIOL</em>1070, BIOL<em>1080, BIOL</em>1090 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3040</td>
<td>Animal Reproduction W (3-3)</td>
<td>[0.50]</td>
<td>This course takes a multi-species approach to understanding the basic principles of animal reproduction. Both the anatomy and the physiology of reproductive systems are explored in agricultural, companion and wildlife species with an emphasis on animals under human management. In addition, the development and application of assisted reproductive technologies (ART) for animal management are introduced. Prerequisite(s): ANSC*3080 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3050</td>
<td>Aquaculture: Advanced Issues F (3-0)</td>
<td>[0.50]</td>
<td>This course examines the fundamental principles and advanced interdisciplinary issues involved in the farming of aquatic organisms. The course will concentrate primarily on finfish species due to their worldwide commercial importance. Lectures will cover fish physiology, behaviour, nutrition, genetics, water quality, health and disease, reproductive techniques, economic, political and legal issues and various culture technologies. Students will analyze contemporary challenges facing the aquaculture industry through exercises requiring interdisciplinary knowledge, lateral thinking, creative problem solving and bridging science and technology to issues management. Prerequisite(s): 8.00 credits in biology, including AGR<em>2350 or ZOO</em>2090 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3080</td>
<td>Agricultural Animal Physiology F (3-1.5)</td>
<td>[0.50]</td>
<td>This course is an introduction to the physiology of domesticated farm animals. The course will emphasize homeostatic control of the major body systems. The lectures cover the nervous, cardiovascular, respiratory, urinary, immune, endocrine and reproductive systems. The lectures and laboratories are closely integrated. Prerequisite(s): BIOC<em>2580 or EQN</em>2040 Restriction(s): Registration in BSC(Agr), BSC.ABIO or BBRM.EQM, Minor in Agriculture. Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3090</td>
<td>Principles of Animal Behaviour F (3-0)</td>
<td>[0.50]</td>
<td>This course deals with why vertebrates behave as they do (with particular emphasis on mammals and birds), covering the causation of behaviour (including learning, motivation, affective states, hormones, sensory processing, and neurobiological mechanisms); function (both immediate/proximate and adaptive/ultimate); ontogeny (including socialization and sensitive periods); and phylogeny (especially the influences of taxonomic group and domestication). This framework is then applied to the following aspects of animal behaviour: foraging, anti-predator responses, sleep, sociality, mating, parental behaviour, play, dispersal and territoriality, animal intelligence, and behavioural pathologies. Prerequisite(s): ANSC<em>1210 Restriction(s): ANSC</em>4090, Restricted to students in BSCH.ABIO, BSAG.ANSC and BBRM.EQM Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3120</td>
<td>Introduction to Animal Nutrition F (3-2)</td>
<td>[0.50]</td>
<td>This course applies the principles of nutrition to the development of diets and feeding programs for the various species of animals of agricultural importance. Co-requisite(s): NUTR*3210 Restriction(s): Registration in BSC(Agr) or BSC.ABIO Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3170</td>
<td>Nutrition of Fish and Crustacea W (3-0)</td>
<td>[0.50]</td>
<td>This course examines growth, digestive and metabolic processes, nutritional requirements and practical feeding programs for fish and crustaceans with an emphasis on those species used in aquaculture. Prerequisite(s): NUTR*3210 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3180</td>
<td>Wildlife Nutrition W (3-0)</td>
<td>[0.50]</td>
<td>This course is a study of the nutrition of avian and mammalian wildlife with emphasis on North American species and the role of nutrition in survival and population growth of wildlife in their natural habitat. Prerequisite(s): NUTR*3210 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*3270</td>
<td>Animal Disorders W (3-0)</td>
<td>[0.50]</td>
<td>This course will highlight common causes of infectious, metabolic and psychological/neurological disorders of domestic and companion animals, and their potential impact on animal welfare and production. Disorders will be addressed in the context of pathophysiology, transmission, and prevention strategies involving environmental enrichment, vaccination, biosecurity, nutrition, and genetic selection. Prerequisite(s): ANSC*3080 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4010</td>
<td>Animal Welfare Judging and Evaluation F (0-3)</td>
<td>[0.50]</td>
<td>This course provides senior level students with a structured opportunity to practice assessing animal welfare using scientific evidence. Students learn to present their evaluations in a logical and persuasive manner. They learn general criteria and approaches used to assess welfare and then apply that knowledge for assessment of four different species in practical settings. Prerequisite(s): 15.00 credits including ANSC<em>1210, ANSC</em>3080 Co-requisite(s): ANSC<em>3090 or ANSC</em>4090 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4040</td>
<td>Biotechnology in Animal Science F (3-2)</td>
<td>[0.50]</td>
<td>The course will provide an overview of how biotechnology has impacted biomedical science and animal production. Important principles of recombinant DNA, DNA marker identification, stem cell biology, and generation of transgenic animals will be emphasized. The current challenges and potential opportunities in biotechnology will also be discussed. Prerequisite(s): MBG<em>2040 or MBG</em>2400 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4090</td>
<td>Applied Animal Behaviour and Welfare W (3-0)</td>
<td>[0.50]</td>
<td>Students will build upon their basic knowledge of animal behaviour and welfare for in-depth examination of how genetic selection, housing and management practices affect the behaviour, health and well-being of farmed and companion animals. Topics will include effects of domestication and artificial selection on behaviour and health traits, and how early experience affects adaptability, sexual and maternal behaviour. Emphasis is placed on the application of behavioural knowledge to the design of housing and management procedures that promote healthy, productive animals and good welfare. Prerequisite(s): ANSC<em>3080, ANSC</em>3090 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4100</td>
<td>Applied Environmental Physiology and Animal Housing W (3-0)</td>
<td>[0.50]</td>
<td>Basic concepts of environmental physiology and their application to animal housing and management will be introduced. The course will review the physics of heat flow, light and air quality as they relate to animal biology and health. Other aspects, such as the physical environment, that impact on animal health and well-being will be discussed. Prerequisite(s): ANSC*3080 Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4230</td>
<td>Challenges and Opportunities in Dairy Cattle Production F (0-6)</td>
<td>[0.50]</td>
<td>This course will provide senior level students with experience in working as a team to propose solutions to dairy cattle industry problems. Teams of students will critically assess dairy cattle-related businesses at the farm or industry level under the supervision of a faculty member. Prerequisite(s): ANSC<em>3080, ANSC</em>3120, MBG*3060 Restriction(s): Instructor consent required. Department(s): Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4260</td>
<td>Beef Cattle Nutrition W (3-2)</td>
<td>[0.50]</td>
<td>This course is designed for students to evaluate problems in feeding beef cattle. Relevant aspects of digestion and metabolism of nutrients as well as current issues of feeding beef cattle and diagnosing nutritional deficiencies will be included. Prerequisite(s): ANSC*3120 Department(s): Department of Animal Biosciences</td>
</tr>

<tr>
<td>ANSC*4270</td>
<td>Dairy Cattle Nutrition F (3-2) [0.50]</td>
<td>Students will learn how nutrients are transformed from feed into milk and bodies of dairy animals. There will be an emphasis on feed management on farms and developing skills in formulation and evaluation of rations using computer models.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4280</td>
<td>Poultry Nutrition F (3-0) [0.50]</td>
<td>This course is designed to evaluate basic and applied poultry nutrition. Students will learn nutrient requirements of poultry, feeding value of ingredients used in poultry feed formulation and how feeding affects the environment, growth, reproduction, health, and composition of poultry products for human consumption.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4290</td>
<td>Swine Nutrition F (3-0) [0.50]</td>
<td>This course is designed to explore details of evaluating feed ingredients and formulating diets for swine. Students will use models to evaluate various aspects of nutrient partitioning for growth and reproduction in pigs.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4350</td>
<td>Experiments in Animal Biology W (0-6) [0.50]</td>
<td>This course provides an opportunity for directed hands-on projects involving live animals and laboratory techniques. A set of selected projects will be provided by Animal Biosciences faculty within their broad fields of study.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4470</td>
<td>Animal Metabolism W (3-0) [0.50]</td>
<td>Current concepts in whole animal metabolism and the quantitative techniques used to measure whole body metabolic kinetics will be presented. Tissue and organ specific biochemical processes will be integrated with whole body control mechanisms.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4490</td>
<td>Applied Endocrinology W (3-0) [0.50]</td>
<td>This course examines the endocrine systems of farm animals and their applications to improve and monitor the production, performance, behavior and health of livestock. Considerable emphasis will be placed upon understanding how knowledge of endocrine regulation can be applied within animal production systems.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4560</td>
<td>Pet Nutrition F (3-0) [0.50]</td>
<td>This course covers nutrient requirements, feed formulation and nutritional idiosyncrasies for dogs, cats, and exotic pets.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4610</td>
<td>Critical Analysis in Animal Science W (3-0) [0.50]</td>
<td>Students are guided to independently research and critically review a topic of emerging importance in animal biosciences. Students select a topic in consultation with the instructor.</td>
<td>Department of Animal Biosciences</td>
</tr>
<tr>
<td>ANSC*4650</td>
<td>Comparative Immunology W (3-0) [0.50]</td>
<td>This course gives an overview of the immune defense mechanisms of domestic species, and to compare common and unique defense strategies developed for resisting microbial and viral infections. Topics include innate and acquired immunity, evolution of the immune system, immunoregulation, and the host response to pathogen invasion.</td>
<td>Department of Animal Biosciences</td>

XII. Course Descriptions, Anthropology

ANTH*1120 Biological Anthropology F (3-0) [0.50]
In this course students will be introduced to the central concepts of biological anthropology. Potential topics to be explored include hominid evolution, contemporary human diversity, nutrition and diet, and an introduction of forensic anthropology and paleopathology.
Department(s): Department of Sociology and Anthropology

ANTH*1150 Introduction to Anthropology F,W (3-0) [0.50]
This course deals with humankind from a broad historical and cross-cultural perspective. Theoretical models, case studies and specific methods will be presented. Course topics may include the origin and transformations of human society, the relationship between biological and cultural traits, human language, variation in family structure and religion, the economic and political aspects of human society.
Offering(s): Also offered through Distance Education format.
Department(s): Department of Sociology and Anthropology

ANTH*2180 Public Anthropology W (3-0) [0.50]
This course explores approaches to public, engaged anthropology, and the application of anthropological theory and practice. Students will develop insights into the roles of anthropological and anthropological perspectives for diverse occupations, fields, and policies, and within contemporary public debates and discussions.
Prerequisite(s): 1 of ANTH*1150, IDEV*1000, SOC*1100
Department(s): Department of Sociology and Anthropology

ANTH*2230 Regional Ethnography F (3-0) [0.50]
This course offers a survey of ethnographic studies on selected cultural/geographical area(s) of the world. Topics covered may include social, economic and political systems, the colonial encounter, and the theoretical, methodological and political contexts of ethnographic representation.
Prerequisite(s): ANTH*1150
Department(s): Department of Sociology and Anthropology

ANTH*2660 Contemporary Indigenous Peoples in Canada W (3-0) [0.50]
An anthropological analysis of the impact of settler society on Indigenous cultures. Particular emphasis will be given to contemporary issues relating to Indigenous peoples in Canada, including First Nations, Inuit, and Métis peoples. Topics to be covered may include education, treaties and reserves, land claims, government administration, economic development, and reconciliation.
Prerequisite(s): 1 of ANTH*1150, IDEV*1000, SOC*1100
Department(s): Department of Sociology and Anthropology

ANTH*3550 Medical Anthropology W (3-0) [0.50]
This course provides an introduction to medical anthropology and the anthropology of health. We will examine theory, methods, practice, and contemporary and historical topical issues.
Prerequisite(s): SOAN*2120, (1 of ANTH*2160, ANTH*2180, ANTH*2230, ANTH*2660, IDEV*2500)
Department(s): Department of Sociology and Anthropology

ANTH*3650 The Anthropology of Indigenous Peoples Before Canada F (3-0) [0.50]
This course is an anthropological exploration of the events that took place before the arrival of Europeans in what is now Canada. It draws on evidence from a variety of intellectual perspectives including Indigenous knowledges, oral histories, anthropology, archaeology, history, genetics, and linguistics to investigate current understandings and uses of the past. Archaeological time sequences are covered along with stories and debates about human history in the time period before Canada.
Prerequisite(s): (1 of ANTH*2160, ANTH*2180, IDEV*2000), (1 of ANTH*2230, ANTH*2660, IDEV*2400, IDEV*2500)
Restriction(s): ANTH*2650
Department(s): Department of Sociology and Anthropology

ANTH*3690 Engaging Anthropological Theory F (3-0) [0.50]
This course offers an analysis of the main trends in anthropological theory and practice. Areas of discussion will include the crisis of representation, interpretive anthropology, feminist anthropology, and agency and structure debates.
Prerequisite(s): ANTH*2230, (ANTH*2160 or ANTH*2180), SOAN*2120
Department(s): Department of Sociology and Anthropology

ANTH*3770 Kinship, Family, and Power W (3-0) [0.50]
This course explores the changing nature of what it means to be a family from anthropological and cross-cultural perspectives. Topics of discussion include kinship, descent, marriage, our relationships to ancestors, gender and power relations, and the politics of kinship ties. In addition, the course considers the relevance of kinship to contemporary issues such as gay, lesbian, bisexual and transgendered families, the use of reproductive technologies, and international adoptions.
Prerequisite(s): ANTH*2230, (ANTH*2160 or ANTH*2180), SOAN*2120
Department(s): Department of Sociology and Anthropology

ANTH*3840 Seminar in Anthropology F,W (3-0) [0.50]
This seminar will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.
Prerequisite(s): 10.00 credits including (ANTH*2160, ANTH*2180), SOAN*2120
Department(s): Department of Sociology and Anthropology

ANTH*3850 Seminar in Anthropology F (3-0) [0.50]
This seminar will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.
Prerequisite(s): 10.00 credits including (ANTH*2160, ANTH*2180), SOAN*2120
Department(s): Department of Sociology and Anthropology

ANTH*3890 Special Projects in Anthropology S,F,W (3-0) [0.50]
This special study option/reading course is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the study is required.
Prerequisite(s): 10.00 credits
Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.
Department(s): Department of Sociology and Anthropology

ANTH*4300 Anthropological Issues F (3-0) [0.50]
Current issues and future trends in the discipline of socio-cultural anthropology will provide the subject matter of this variable content course. This course is meant to provide an opportunity for socio-cultural anthropology majors to consider the latest developments in the sub-discipline. Course topics will be announced and course outlines will be available at course selection time.
Prerequisite(s): ANTH*3690, SOAN*3070
Department(s): Department of Sociology and Anthropology

ANTH*4440 Culture, Rights and Development W (3-0) [0.50]
This course offers an analysis of the main trends in anthropological theory and practice. Areas of discussion will include the crisis of representation, interpretive anthropology, feminist anthropology, and agency and structure debates.
Prerequisite(s): ANTH*2230, (ANTH*2160 or ANTH*2180), SOAN*2120
Department(s): Department of Sociology and Anthropology

ANTH*4450 Seminar in Anthropology F (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.
Prerequisite(s): ANTH*3690 or SOC*3310, SOAN*3070

## ARAB*1100 Introductory Arabic I F (4-0) [0.50]

This course provides an introduction to Arabic script, articulation of the sounds, basic grammar, and is designed to enable students to begin communicating in Modern Standard Arabic (MSA). This course is not intended for students with native or near-native fluency in Arabic. Students with advanced Arabic may be removed from the course.

*Department(s):* School of Languages and Literature

## ARAB*1110 Introductory Arabic II W (4-0) [0.50]

This course is a continuation of Introductory Arabic I with emphasis on oral work. Heritage speakers of Arabic may be admitted with permission of the instructor. However, this course is not intended for students with native or near-native fluency in Arabic. Students with advanced Arabic may be removed from the course.

*Prerequisite(s):* ARAB*1100

*Department(s):* School of Languages and Literature
Art History

School of Fine Art and Music

Students with a special interest in particular courses in Art History should consult the School concerning prerequisites.

1. Some Art History lecture courses at the 2000- and 3000-level are offered on alternate years only and many Art History seminars have variable content. For course offerings and course descriptions please see the home page for the School of Fine Arts & Music www.uoguelph.ca/sofam/

2. Many Art History lecture courses are reading-intensive while seminar courses are writing and presentation-intensive.

3. Honours major students in Art History are required to take two 4000-level seminars (excluding ARTH*4620 ), preferably in their 7th and 8th semesters. Please see the individual course descriptions for pre-requisites and restrictions for these courses.

ARTH*1510 Art Historical Studies I F (3-0) [0.50]

This course considers the visual arts in the Western tradition from prehistory through the Middle Ages. Emphasis will be placed on historical and critical analysis of key monuments and on the prerequisite technologies, as well as on various ways of looking at the visual past and present.

Department(s): School of Fine Art and Music

ARTH*1520 Art Historical Studies II W (3-0) [0.50]

A consideration of the visual arts in the Western tradition. Emphasis will be placed on historical and critical analysis of key monuments and on the prerequisite technologies, as well as on various ways of looking at the visual past and present. Focus will be on the visual arts from the Renaissance to today.

Department(s): School of Fine Art and Music

ARTH*2050 Modern Latin American Art F (3-0) [0.50]

This course is an introduction to the study of visual culture and theory from South and Central America, Mexico and the Caribbean featuring art from the 20th century to the present.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2060 Indigenous Arts in the Americas F (3-0) [0.50]

This course offers an introduction to the arts and cultures of Indigenous peoples of North, South and Central America ("Turtle Island"). It will survey First Nations, Métis, and Inuit artworks, with an emphasis on contemporary art from 1980 to the present day. It will take into account recent scholarship on the history of colonization, land claims, sovereignty and the Truth and Reconciliation Commission of Canada.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2070 Art of the USA W (3-0) [0.50]

In art, the 20th century has been referred to as "The American Century." Artists in the USA have a tradition of creating new visual languages, of using new ideas and technologies, and of representing the vanguard. Where did these ideas originate, and how has the USA determined our notions of what art is? This survey course focuses on modern American artists, on the evolution and growth of modern visual culture, and on how technologies and societies impact on artistic taste.

Prerequisite(s): 1 of 2.00 credits, ARTH*1510, ARTH*1520

Department(s): School of Fine Art and Music

ARTH*2120 Introduction to Museology W (3-0) [0.50]

The course will examine the history of collections, traditions of cultural representation and display, constructions of authenticity, trade and exchange.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2150 Art and Archaeology of Greece F (3-0) [0.50]

This course is a survey of Ancient Greek Art and Archaeology, with stress on form and function plus stylistic trends and aesthetic values. The course will illuminate the cultural, social, and political life in Ancient Greece. (Also listed as CLAS*2150).

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Equate(s): CLAS*2150

Department(s): School of Fine Art and Music

ARTH*2220 The Visual Arts Today F (3-0) [0.50]

This course is an introduction to contemporary visual culture, its current controversies and its historical roots. The avant-garde movements of the modern period and the impact of new technologies and media will be examined within a rich historical context. Topics will include international exhibitions, selling art, art and popular culture, censorship, and the relation between words and images.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Restriction(s): ARTH*1220 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): School of Fine Art and Music

ARTH*2280 Modern Architecture W (3-0) [0.50]

This course is an investigation of architectural theory and practice within the social and spatial complexities of national and international life.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2290 History of Photographic Media S (3-0) [0.50]

This course is an introduction to the history of photography through to its application in contemporary visual arts.

Offering(s): Offered through Distance Education format only.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

ARTH*2480 Introduction to Art Theory and Criticism F (3-0) [0.50]

This course provides an overview of some of the most significant methodological approaches and critical practices used by art historians to write about visual culture. Traditional methods of art historical analysis include connoisseurship, iconography, and formalism. With these we will be exploring newer interpretative models and multidisciplinary approaches such as structuralism, semiotics, post-structuralism, and psychoanalytic theory as well as political theories such as feminism and socio-cultural theory.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): School of Fine Art and Music

ARTH*2490 History of Canadian Art F (3-0) [0.50]

This course provides an overview of the visual arts in Canada from the earliest times to the present, with emphasis on the diverse contributions made by the First Nations, by French and British colonization, and by subsequent settlers from a great variety of different cultural origins.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2540 Medieval Art F (3-0) [0.50]

This course considers visual arts during a period when the Christian church built a new synthesis out of the legacies of the late Roman Empire and its "barbarian invaders".

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2550 The Italian Renaissance W (3-0) [0.50]

This course will investigate the art, architecture, and visual and material culture of Renaissance Italy in its political, social, religious, intellectual and theoretical contexts. Topics can include artistic training and practice; methods, materials and techniques of art-making; science and perspective; patronage; collectors and collecting; public monuments and domestic art; Renaissance theory; humanism; artistic biography; and other thematic contexts.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2580 Late Modern Art: 1900-1950 F (3-0) [0.50]

This is a study of the historical avant-gardes in the social and political contexts of the period 1900-1950.

Offering(s): Offered in even-numbered years.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

ARTH*2600 Early Modern Art W (3-0) [0.50]

This course is a study of visual culture as it was transformed by the revolutions - industrial, political, and colonial - of the eighteenth and nineteenth centuries.

Prerequisite(s): 2.00 credits or (ARTH*1510 or ARTH*1520)

Department(s): School of Fine Art and Music

</table>
**ARTH*4330 Topics in Art & Visual Culture III W (3-0) [1.00]**

This seminar course is designed to explore one or more issues in Art and Visual Culture depending on the expertise of the instructor. Students should consult the department for specific offerings.

*Prerequisite(s):* 10.00 credits including 1.00 credits in Art History at the 3000 level.

*Department(s):* School of Fine Art and Music

---

**ARTH*4340 Topics in Art & Visual Culture IV F (3-0) [1.00]**

This seminar course is designed to explore one or more issues in Art and Visual Culture depending on the expertise of the instructor. Students should consult the department for specific offerings.

*Prerequisite(s):* 10.00 credits including 1.00 credits in Art History at the 3000 level.

*Department(s):* School of Fine Art and Music

---

**ARTH*4350 Topics in Art & Visual Culture V F (3-0) [1.00]**

This seminar course designed to explore one or more issues in Art and Visual Culture depending on the expertise of the instructor. Students should consult the department for specific offerings.

*Prerequisite(s):* 10.00 credits including 1.00 credits in Art History at the 3000 level.

*Department(s):* School of Fine Art and Music

---

**ARTH*4600 Individual Study - Art History S,F,W (3-0) [0.50]**

Each student establishes, in consultation with the faculty member who has agreed to supervise the course, the content of this special study within the area of expertise of that instructor. Students should plan their project and submit their proposal to the Director of the School (or designate) by the last day of classes in the semester prior to the one which they plan to enroll in ARTH*4600.

*Prerequisite(s):* 14.00 credits, including 6 credits in Art History.

*Restriction(s):* Instructor consent required.

*Department(s):* School of Fine Art and Music

---

**ARTH*4800 Experiential Learning F,W (3-0) [0.50]**

This course provides an opportunity for independent study based on Art History related voluntary or paid experience. Evaluation will be based on the student's performance on related work assignments at the host institution as well as any assignments determined by the relevant instructor. Written proposals/rationales, signed by the appropriate instructor, must be submitted to the Director of the School for approval by the last day of course selection in the Fall (for Winter) or Winter (for the following Fall semester).

*Prerequisite(s):* A minimum of 14.00 credits including 2.50 credits in Art History.

*Restriction(s):* Registration is limited to students registered in BA:ARTH specializations with a minimum cumulative average of 70% in all Art History course attempts. Instructor consent required.

*Department(s):* School of Fine Art and Music
### Arts and Sciences

**Dean's Office, College of Arts**

Registration in ASCI* courses is limited to students in the Bachelor of Arts and Sciences degree program.

**ASCI*1110 Society and Inquiry I F (3-0) [0.50]**

Through a series of historical and/or current case studies, this course introduces students to the ways in which social forces interact with inquiry. Students learn how to locate, present and critically evaluate evidence. This course also introduces students to the importance of good academic conduct and accountability in their work.

- **Equate(s):** ASCI*1000
- **Restriction(s):** Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*1120 Society and Inquiry II W (3-0) [0.50]**

Through a series of historical and/or current case studies, students will continue to explore the ways in which social forces shape inquiry. Students will learn to balance the weight of evidence from multiple sources and present those findings both orally and in writing.

- **Prerequisite(s):** ASCI*1110
- **Equate(s):** ASCI*1010
- **Restriction(s):** Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*2050 Uses of Knowledge F (3-0) [0.50]**

This course explores the ways in which academic knowledge can be transferred, translated and mobilized to the world and used to remedy social problems. Through historical and/or current case studies and using the knowledge acquired in their two minors, students will learn to assess and defend conflicting points of view both in written and oral formats. Through group exercises, students will learn to work collaboratively and envisage themselves as engaged citizens.

- **Prerequisite(s):** ASCI*1110
- **Equate(s):** ASCI*2000
- **Restriction(s):** Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*3000 Arts and Sciences Community Project F (3-0) [0.50]**

This course integrates the curricular, co-curricular and cross-disciplinary strands of the Arts and Sciences program through continued academic study and its application, modification, and critique in a community context. Students will conduct research and seminars on a selected topic while simultaneously completing a placement in a community agency appropriate to that topic. (See the B.A.S. program website for topics.)

- **Prerequisite(s):** ASCI*2000 or ASCI*2050
- **Restriction(s):** Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*3100 Case Studies in Arts and Sciences Research W (3-0) [0.50]**

This variable-content course introduces students to case studies in the integration of academic knowledge and practices with social movements, investigating the ways in which cultural, social, and scientific endeavours meet to work on real-world problems. The course may contain both historical and current case studies.

- **Prerequisite(s):** ASCI*2000 or ASCI*2050
- **Restriction(s):** Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*3200 Issues in Public Health S (3-0) [0.50]**

This course examines the practice of public health in Canada, and throughout the world, with an emphasis on the impact of social and political forces on matters relating to public health. As well, the course considers strategies for the delivery of initiatives to safeguard the health of the public.

- **Offerings:** Offered through Distance Education format only.
- **Prerequisite(s):** 8.50 credits
- **Department(s):** Dean's Office, College of Arts

**ASCI*3700 Independent Studies in Arts/Sciences S,F,W (3-0) [0.50]**

This course offers an opportunity for individual students to pursue unique curricular opportunities when they arise and are approved as appropriate to B.A.S. students (e.g., independent reading and/or research under a faculty member's supervision in a research lab or program; a course taken while studying on exchange or abroad; a course developed in conjunction with experiential learning situations, etc.). See the B.A.S. website for learning contracts and other requirements that must be completed well in advance to permit registration for independent studies.

- **Prerequisite(s):** A minimum of 9.00 credits.
- **Restriction(s):** Registration in the BAS degree program. Instructor consent required.
- **Department(s):** Dean's Office, College of Arts

**ASCI*4010 Arts and Sciences Honours Research Seminar W (3-0) [1.00]**

Under faculty supervision students will devise and research a topic, and then plan, develop, peer-edit and complete a major paper. Designed to function as a senior-level writing seminar, this course is particularly recommended to students who plan to pursue graduate study and who have a cumulative average of at least 75%.

- **Prerequisite(s):** 12.00 credits, including (1 of ASCI*3000, ASCI*3100, ASCI*3200, ASCI*3700); cumulative average of 75%
- **Restriction(s):** ASCI*4000 Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*4020 Topics in Arts and Sciences Research F,W (3-0) [0.50]**

This variable-content course provides a senior-level seminar experience in the conduct, presentation, and writing of research relevant to the interdisciplinary core of the Bachelor of Arts and Sciences degree program. (See the B.A.S. website for topics.)

- **Prerequisite(s):** 12.00 credits including (ASCI*2000 or ASCI*2050)
- **Restriction(s):** Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*4030 Topics in Arts and Sciences Research F,W (3-0) [0.50]**

This variable-content course provides a senior-level seminar experience in the conduct, presentation, and writing of research relevant to the interdisciplinary core of the Bachelor of Arts and Sciences degree program. (See the B.A.S. website for topics.)

- **Prerequisite(s):** 12.00 credits including (ASCI*2000 or ASCI*2050)
- **Restriction(s):** Registration in the BAS degree program.
- **Department(s):** Dean's Office, College of Arts

**ASCI*4700 Independent Studies in Arts/Sciences S,F,W (3-0) [0.50]**

This course offers an opportunity for individual students to pursue unique curricular opportunities when they arise and are approved as appropriate to B.A.S. students (e.g., independent reading and/or research under a faculty member's supervision in a research lab or program; a course taken while studying on exchange or abroad; a course developed in conjunction with experiential learning situations, etc.) See the B.A.S. website for learning contracts and other requirements that must be completed well in advance to permit registration for independent studies.

- **Prerequisite(s):** A minimum of 14.00 credits.
- **Restriction(s):** Registration in the BAS degree program. Instructor consent required.
- **Department(s):** Dean's Office, College of Arts

**ASCI*4710 Independent Studies in Arts/Sciences S,F,W (3-0) [0.50]**

This course continues work undertaken in ASCI*4700, and will normally be planned in concert with planning for ASCI*4700. This course offers an opportunity for individual students to pursue unique curricular opportunities when they arise and are approved as appropriate to B.A.S. students. See the B.A.S. website for learning contracts and other requirements that must be completed well in advance to permit registration for independent studies.

- **Prerequisite(s):** ASCI*4700
- **Restriction(s):** Registration in the BAS degree program. Instructor consent required.
- **Department(s):** Dean's Office, College of Arts
### Biochemistry

**Department of Molecular and Cellular Biology**

**BIOC*2580 Introduction to Biochemistry S,F,W (3-3) [0.50]**

This course introduces students to the evolution, chemical structure, and biological roles of the major molecular components of the cell: including proteins, nucleic acids, lipids, and carbohydrates. Topics and processes integrated through understanding biological macromolecules include enzymology and intermediary metabolism, with emphasis on catabolic processes. Students will gain basic investigative skills through hands-on experiences in a laboratory setting.

**Prerequisite(s):** CHEM*1050  
**Department(s):** Department of Molecular and Cellular Biology

**BIOC*3560 Structure and Function in Biochemistry S,F,W (3-0) [0.50]**

This course develops the understanding of biochemical processes by examining the molecular mechanisms underlying the regulation of specific cellular and physiological systems. Examples may include: oxygen binding and transport; regulation of enzyme function; carbohydrate and lipid metabolic pathways and metabolic integration; structure of membranes and membrane proteins; and membrane transport and signaling.

**Prerequisite(s):** BIOC*2580  
**Department(s):** Department of Molecular and Cellular Biology

**BIOC*3570 Analytical Biochemistry S,F (3-4) [0.75]**

This course covers the tools and techniques by which biological molecules are isolated, separated, identified, and analyzed. Detailed discussion of experimental methods for macromolecule purification and characterization is included.

**Prerequisite(s):** CHEM*2400 or CHEM*2480, BIOC*2580  
**Department(s):** Department of Molecular and Cellular Biology

**BIOC*4050 Protein and Nucleic Acid Structure F (3-0) [0.50]**

This course explores the relationship between the functions and the three dimensional structures of DNA, RNA and proteins. Topics covered include how these structures are determined, the principles governing their folding and architecture, why some proteins don’t fold at all, and the use of these structures to guide drug discovery. Practical skills are emphasized, including the use of bioinformatics and visualisation tools to analyse sequences and structures.

**Prerequisite(s):** BIOC*3560  
**Equate(s):** MCB*4050  
**Department(s):** Department of Molecular and Cellular Biology

**BIOC*4520 Metabolic Processes F (3-0) [0.50]**

This course is an in-depth study of the role of bioenergetics, regulation, and chemical mechanisms in carbohydrate, lipid, and nitrogen metabolism.

**Prerequisite(s):** BIOC*3560 or BIOC*3570  
**Department(s):** Department of Molecular and Cellular Biology

**BIOC*4540 Enzymology W (3-3) [0.75]**

This is a laboratory-intensive course where the topics studied include enzyme active sites and the mechanisms of enzyme action; enzyme kinetics and regulation; recombinant proteins and site-directed mutagenesis as tools for understanding enzymes.

**Prerequisite(s):** BIOC*3560 (may be taken concurrently), BIOC*3570  
**Department(s):** Department of Molecular and Cellular Biology

**BIOC*4580 Membrane Biochemistry W (3-0) [0.50]**

This course is a molecular examination of the structure and functions of cell membranes, cell surfaces and associated structures. Topics may include: membrane lipids; membrane protein structure; membrane transporters; ATP production; cytoskeleton; cell surface carbohydrates; membrane biogenesis; signal transduction.

**Prerequisite(s):** BIOC*3560 or BIOC*3570  
**Department(s):** Department of Molecular and Cellular Biology
Biology

Department of Human Health and Nutritional Sciences
Department of Molecular and Cellular Biology
Department of Plant Agriculture

BIOL*1050 Introduction to Biology F (3-2) [0.50]

This course will introduce concepts concerning the organization of life, from molecules to cells to ecosystems and discuss how they relate to day-to-day life. The dynamic and interactive nature of all living systems will be emphasized. The weekly tutorial will introduce students to the application of biology to daily life and emphasize critical thinking skills. This course will be valuable for students without Grade 12 or 4U Biology who are interested in environmental issues, medicine, agriculture, biodiversity and related topics.

Restriction(s): BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090
Department(s): Department of Integrative Biology, Department of Molecular and Cellular Biology

BIOL*1070 Biology of Plants & Animals in Managed Ecosystems F (3-2) [0.50]

In this course students will investigate the biology of plants and animals in the context of agroecosystems and other managed ecosystems. Students will learn about the form and function of plants and animals and interactions between organisms and their environments. The course strongly emphasizes participatory and self-directed learning, problem solving, reasoning and exposure to primary research literature and will address key concepts in evolution, plant and animal structure, physiology and ecology. Students lacking Grade 12 or 4U Biology should consult with their program counsellor prior to taking BIOL*1070 in first semester.

Department(s): Department of Plant Agriculture, Department of Animal Biosciences

BIOL*1090 Introduction to Molecular and Cellular Biology F,W (3-0) [0.50]

This course will foster an understanding of key concepts in molecular and cell biology and genetics including evolution, relationship between structure and function, energy and regulation, interrelatedness of life, and the nature of science. By relating these concepts to their daily lives, through analysis of problems and tutorial discussions, students will develop an understanding of five central themes: 1) all living things share common properties, 2) the cell is the fundamental functional unit of life, 3) managing energy is central to success, 4) genes are the fundamental information unit of life, and 5) heredity. Students lacking Grade 12 or 4U Biology should consult with their program counsellor prior to taking BIOL*1090 in first semester.

Department(s): Department of Human Health and Nutritional Sciences

BIOL*1500 Humans in the Natural World F,W (3-0) [0.50]

This course will examine past and present human interactions with Nature from an ecological perspective. It investigates current global issues that require multi-disciplinary environmental analysis.

Offering(s): Also offered through Distance Education format.
Restriction(s): Students in the BAS, BSC and BSC(ENV) program cannot take this course for credit.
Department(s): Department of Integrative Biology
BIOL*3660 Populations, Communities & Ecosystems W (4-0) [0.50]
This course will explore advanced topics in ecology, building on the foundation provided by BIOL*2060. The course material will be organized around common mechanisms that link ecological processes across levels of organization, such as organism function, species interactions, spatial connectivity and energetic transfers across trophic levels. Emphasis will be on testing ecological theory with quantitative analysis of empirical data, thereby gaining greater depth of understanding of ecological processes at the population, community and ecosystem scales. Through the examination of case studies, students will apply ecological knowledge and quantitative analysis to problem solving in areas such as resource management, conservation of populations and communities, and predicting biosphere responses to climate change.

Prerequisite(s): 10.00 credits including BIOL*2060, (1 of GEOG*2460, STAT*2040, STAT*2060, STAT*2230)
Department(s): Dean's Office, College of Biological Science

BIOL*3130 Conservation Biology W (4-0) [0.50]
This course is an introduction to the biological basis for conserving wild, living resources, including freshwater and marine fish, plants and wild life. Topics to be covered include principles of population, community and landscape genetics and ecology relevant to the conservation, restoration and management of endangered species, ecosystems and/or renewable resources, including an introduction to the theory and practice of sustained-yield harvesting.

Prerequisite(s): BIOL*2060
Department(s): Department of Integrative Biology

BIOL*3300 Applied Bioinformatics F (3-2) [0.50]
This course covers current methods for making use of large molecular data sets to identify the genes that control traits, to characterize genes' functions, and to infer genetic relationships among individuals. It focuses on case studies and current research in agriculture, environmental biology, and medicine to introduce molecular data analysis methods, including analyzing genome sequences, constructing nucleotide and protein sequence alignments, constructing phylogenies, and finding motifs and genes in biological sequences. Lab sessions include an introduction to Unix and Python for the biologist and hands-on use of several molecular data analysis programs.

Prerequisite(s): MBG*2040, (STAT*2040 or STAT*2230)
Department(s): Department of Plant Agriculture

BIOL*3450 Introduction to Aquatic Environments F (3-0) [0.50]
This course provides an introduction to the structure and components of aquatic ecosystems, how they are regulated by physical, chemical and biological factors, and the impact of humans on these environments and their biota.

Prerequisite(s): BIOL*1070, CHEM*1050, ZOO*2700 is strongly recommended
Department(s): Department of Integrative Biology

BIOL*3650 Applications in Biology W (3-0) [0.50]
In this course, students will explore selected topics related to the application of biological knowledge and techniques in society, such as biotechnology, forensic science, conservation biology, agriculture, health care, public health, and wildlife biology. Different topics are offered each year, reflecting the particular research or professional interest of the course instructor. Upcoming topics will be posted on the B.Sc. Advising website.

Prerequisite(s): 9.00 credits including (2 of BIOL*1070, BIOL*1080, BIOL*1090)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular CBS programs or specializations depending on the selected topic during certain periods. Please refer to the BSC Advising Website.
Department(s): Dean's Office, College of Biological Science

BIOL*3660 Internship In Biological Science S,F,W (1-0) [0.50]
This course provides an opportunity for independent learning in the biological sciences within a work-related environment (volunteer or paid). Students will develop a project plan directly related to the work experience in consultation with an external organization. Using this experience, students will apply knowledge of scientific methodologies to develop a project that benefits the organization and society at large, apply disciplinary knowledge and project management skills to complete the project, and reflect on their own development and future career plans. Students interested in this course must submit a completed registration form, for approval by the course coordinator, as part of the registration process for this course.

Prerequisite(s): 7.50 credits, minimum cumulative average of 60%
Restriction(s): Majors offered by CBS. Instructor consent required.
Department(s): Dean's Office, College of Biological Science

BIOL*3670 Introduction to Wildlife Rehabilitation W (0-0) [0.50]
This course focuses on Canadian wildlife and ways to mitigate various human-animal interactions. There will be a specific emphasis on wildlife rehabilitation: its benefits, risks (to humans and animals), ethical concerns, principles of stabilization of sick and injured animals, and other key areas for consideration. Common presentations and underlying reasons for sick and injured animals that are admitted to a rehabilitation centre are presented. Whether in a wildlife centre or in the field, understanding important physiologic differences between species and how to stabilize animals for subsequent treatment by a permitted rehabilitator or a wildlife veterinarian are discussed.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of ANSC*2340, BIOL*2060, BIOL*2400, ZOO*2090
Restriction(s): BIOL*3650
Department(s): Department of Integrative Biology

BIOL*3680 Wildlife Rehabilitation: Caring for Sick, Injured, and Orphaned Wildlife F (0-0) [0.50]
Wildlife rehabilitation is an important aspect of species protection and conservation, and a valuable career path for individuals with a special interest in wildlife biology. Content focuses on Canadian wildlife in terms of how to rehabilitate, triage, and stabilize sick, injured, and orphaned wildlife. Mitigating risk of illness and/or injury during the rehabilitation process will be discussed. This course helps prepare students to write the MNRF wildlife custodial authorization examination should they wish to pursue wildlife rehabilitation.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): BIOL*3670
Restriction(s): BIOL*3650
Department(s): Department of Integrative Biology

BIOL*4010 Adaptational Physiology W (3-0) [0.50]
This course examines adaptations of organisms to various aquatic and terrestrial environments. A mechanistic approach will be used to establish the strategies (anatomical, physiological, biochemical) of environmental adaptation. Examples will include adaptations of deep-sea and polar organisms, adaptations to salinity and desiccation challenges, oxygen availability, sensory adaptations and symbiotic adaptations.

Co-requisite(s): ZOO*3210 or ZOO*3620
Department(s): Department of Integrative Biology

BIOL*4020 Integrative Problems in Biological Science F,W (6-0) [1.00]
In this course, students work in teams to explore and address an authentic, biologically-based problem using an integrative and interdisciplinary approach. Topics are proposed by an external ‘client’ and will focus on a problem relating to societal needs (e.g., food, health, and environment), use of advanced technologies (e.g., genetic modification), or aspirations (e.g., sustainability). Students will explore the underlying basis for the problem, the current state of understanding, social implications, and develop a product or position to address the client’s needs.

Prerequisite(s): 14.00 credits
Restriction(s): Restricted to students in BSCH.BIOS
Department(s): Dean's Office, College of Biological Science

BIOL*4110 Ecological Methods F (3-3) [1.00]
This course will examine the theoretical and practical aspects of research methods in ecology. Emphasis will be placed on experimental design, sampling, population estimation, statistical inference, and characteristics of producers and consumers. Students will participate in research projects of their own design, and will gain experience in preparing research proposals, research papers and posters, and making oral presentations.

Prerequisite(s): BIOL*3010, BIOL*3060, (STAT*2040 or STAT*2230)
Restriction(s): Restricted to students in BSCH.WBC and Ecology majors/minors
Department(s): Department of Integrative Biology

BIOL*4120 Evolutionary Ecology W (4-0) [0.50]
This course is an examination of common ecological circumstances faced by plants and animals and the morphological, behavioral and life history characteristics that have evolved in response. Particular emphasis will be placed on evolutionary processes and on adaptive aspects of thermoregulation, foraging strategies, spatial distribution, social and reproductive strategies. The course will emphasize both the theoretical basis and the empirical evidence for ecological adaptation.

Prerequisite(s): BIOL*2060, BIOL*2400
Department(s): Department of Integrative Biology

**BIOL*4150 Wildlife Conservation and Management F (3-0) [0.50]**

This course builds on previous courses in population and community ecology to evaluate the long-term dynamics of threatened species in populations. The course will also provide a "hands-on" introduction to field interventions, with application to contemporary issues in population ecology and resource management. Lectures will be drawn from the following topics: growth and regulation of populations, long-term persistence of ecological communities, harvesting, bio-economics, and habitat modification.

**Prerequisite(s):** BIOL*3060 or BIOL*3130

**Department(s):** Department of Integrative Biology

**BIOL*4350 Limnology of Natural and Polluted Waters F (3-3) [0.50]**

This course will familiarize students with the characteristics and methods of study of the limnology of natural and polluted aquatic ecosystems. The laboratory includes methods of biological, chemical and physical assessment such as field surveys of algal, macrophyte and benthic invertebrate diversity, toxicity assays, and analyses of stream flow.

**Prerequisite(s):** BIOL*3450

**Department(s):** Department of Integrative Biology

**BIOL*4410 Field Ecology F (3-3) [0.75]**

This is a 12-day field course held in Algonquin Park, Ontario, during August. Students independently conduct and write reports about 2 research projects of their choice and design (in consultation with faculty members), on any of: vertebrate, invertebrate, or plant ecology, and/or behaviour, in terrestrial or aquatic habitats. Emphasis is placed upon students asking ecological questions, designing experiments, and then collecting data from intensive field work. There are no formal lectures, but an organizational meeting is held in the winter semester prior to the field course. The charge by the field station for room and board will be passed on to the student. Students are also responsible for their own transportation to and from the field station. A departmental application form must be submitted for approval at least 4 weeks prior to the last day of course selection for the Summer semester, and the signature of the course coordinator will be required to select the course. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology. Detailed information is available from the Department of Integrative Biology.

**Prerequisite(s):** 0.50 credits in ecology

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Integrative Biology

**BIOL*4500 Natural Resource Policy Analysis W (3-0) [0.50]**

This course explores the role of science in management decision-making for Canadian renewable natural resources, including legal, political, social and economic factors. The course will rely on active learning by students working in collaborative groups, leading to deeper understanding of real-world issues while developing professional skills that are essential for those who wish to make significant contributions at the science-management interface. Four themes will be explored: 1) acts/policies/guidelines, 2) science and other knowledge systems, 3) management strategy evaluation, and 4) decision analysis & adaptive management.

**Prerequisite(s):** 15.00 credits including BIOL*4150

**Restriction(s):** Registration in Semester 7 or 8.

**Department(s):** Department of Integrative Biology

**BIOL*4610 Arctic Ecology F (1-6) [0.75]**

This three-week field course provides an opportunity to study the flora and fauna of marine, freshwater and terrestrial environments of the high Arctic. Based in the high Arctic, the course includes lectures, field exercises and student projects. An information session is held in January; students are required to register before March. Signature of course coordinator is required for course selection. Students are responsible for cost of food and transportation. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology. Detailed information is available from the Department of Integrative Biology.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** BIOL*2060

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Integrative Biology

**BIOL*4700 Field Biology S,F,W (1-6) [0.50]**

Students may apply for 2-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.

**Prerequisite(s):** BIOL*2060

**Restriction(s):** Permission of the course coordinator. Instructor consent required.

**Department(s):** Department of Integrative Biology

**BIOL*4710 Field Biology S,F,W (1-6) [0.25]**

Students may apply for 1-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.

**Prerequisite(s):** BIOL*2060

**Restriction(s):** Permission of the course coordinator. Instructor consent required.

**Department(s):** Department of Integrative Biology

**BIOL*4800 Field Biology S,F,W (1-6) [0.50]**

Students may apply for 2-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.

**Prerequisite(s):** BIOL*2060

**Restriction(s):** Permission of the course coordinator. Instructor consent required.

**Department(s):** Department of Integrative Biology

**BIOL*4810 Field Biology S,F,W (1-6) [0.25]**

Students may apply for 1-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.

**Prerequisite(s):** BIOL*2060

**Restriction(s):** Permission of the course coordinator. Instructor consent required.

**Department(s):** Department of Integrative Biology

**BIOL*4900 Field Biology S,F,W (1-6) [0.50]**

Students may apply for 2-week courses in the OUPFB (Ontario Universities Program in Field Biology). This program offers a diversity of field courses in biological subjects ranging from the Arctic to the Tropics, microbes to mammals, and covering marine, freshwater and terrestrial habitats. Costs include food and lodging and may include transportation. Detailed information is available from the Department of Integrative Biology.

**Prerequisite(s):** BIOL*2060

**Restriction(s):** Permission of the course coordinator. Instructor consent required.

**Department(s):** Department of Integrative Biology
Biomedical Sciences

Department of Biomedical Sciences

Some Biomedical Science courses are Priority Access Courses and enrollment may be restricted to particular programs or specializations. See department for more information.

Additional course listings may be found in the course descriptions for Toxicology and Veterinary Medicine.

BIOM*2000 Concepts in Human Physiology F,W (3-0) [0.50]
This is an introductory course that examines the fundamental integrative aspects of human physiological systems and their role in the maintenance of homeostasis. Course content is intended to serve the needs of non-bioscience students and includes the study of aspects of cellular metabolism, nerve and muscle function and general anatomy and function of the cardiovascular, respiratory, gastrointestinal, immune, central and peripheral nervous, endocrine, renal and reproductive systems. This course cannot be used to fulfill requirements for any biological science minor.

Offering(s): Also offered through Distance Education format.
Restriction(s): ANSC*3080, BIOM*3200, HK*2810, HK*3810, HK*3940, ZOO*3200, ZOO*3210, ZOO*3600, ZOO*3620. Not available to BSC Students in biology science specializations or BAS program.
Department(s): Department of Biomedical Sciences

BIOM*3000 Functional Mammalian Neuroanatomy F (3-2) [0.50]
The main objective of the course is to understand the functional organization of the mammalian nervous system. It includes a review of the major cell types found in the nervous system and an overview of the basic physiological principles of brain function followed by a detailed three dimensional and histological examination of the mammalian brain and spinal cord. Emphasis is placed on understanding the relationship between anatomy, physiology and behaviour.

Prerequisite(s): 1 of BIOM*3200, HK*3810, HK*3940, NEUR*2000, PHYS*2030, PSYC*2140, ZOO*3200, ZOO*3600
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department of Biomedical Sciences website for more information.
Department(s): Department of Biomedical Sciences

BIOM*3010 Biomedical Comparative Anatomy F (2-3) [0.50]
This lecture and laboratory course is designed for students interested in the biomedical and health sciences. Labs provide an introduction to veterinary anatomy, with small and large animal dissections. Human and clinical veterinary anatomy, as well as biomechanical and functional differences are considered.

Prerequisite(s): 1 of BIOL*1070, BIOL*1080, BIOL*1090
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department of Biomedical Sciences website for more information.
Department(s): Department of Biomedical Sciences

BIOM*3040 Medical Embryology W (3-3) [0.75]
The patterns and principles of normal embryonic and fetal development of mammals are covered with an emphasis on comparison to adult anatomy and medical implications. In laboratories, the teratology of prenatal anomalies are also examined. There is a focus on gathering embryological information and developing scientific reasoning skills through essays and presentations.

Prerequisite(s): (BIOL*1070, BIOL*1090), (1 of BIOL*1080, BIOM*3200, HK*3810, HK*3940), (1 of BIOM*3010, HK*3401, HK*3501, ZOO*2090)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department of Biomedical Sciences website for more information.
Department(s): Department of Biomedical Sciences

BIOM*3090 Principles of Pharmacology S,F,W (3-0) [0.50]
This course will introduce students to the basic principles of pharmacology. Topics to be covered include pharmacokinetics and drug-receptor interactions as well as the mechanism of action and toxicity of drugs acting on the cardiovascular and central nervous system.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): BIOM*2580, (1 of ANSC*3080, BIOM*3200, HK*3810, HK*3940, ZOO*3200, ZOO*3600)
Department(s): Department of Biomedical Sciences

BIOM*3200 Biomedical Physiology S,F,W (6-0) [1.00]
This course focuses on the normal functioning of mammals. The physiology of the nervous, muscular, endocrine, reproductive, cardiovascular and digestive systems and homeostasis as reflected in respiratory and renal function is treated in a detailed manner. The integrative nature of various physiological systems is highlighted and cellular and molecular information is incorporated to enhance the understanding of these systems. Aspects of medically significant changes in the mammalian physiological systems are also introduced.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): BIOM*2580
Restriction(s): HK*3810. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department of Biomedical Sciences website for more information.
Department(s): Department of Biomedical Sciences

BIOM*3210 Critical Thinking in the Health Sciences F (3-0) [0.50]
This course will explore a variety of issues related to the scientific ideals and practical realities of health sciences research and its clinical applications. Topics will include critical thinking, critical appraisal of the medical literature, the principles of evidence based medicine, and selected issues related to scientific integrity.

Prerequisite(s): 7.50 credits including (1 of BIOL*1070, BIOL*1080, BIOL*1090)
Restriction(s): BIOM*4210
Department(s): Department of Biomedical Sciences

BIOM*4030 Endocrine Physiology W (3-0) [0.50]
The course is designed to provide a senior level introduction to the endocrine discipline, focusing largely on mammals, with some examples taken from other vertebrate taxa. The course will give an introduction to the historical developments in the discipline, explore the actions of hormones and other chemical signalling pathways, and examine processes of hormone synthesis and secretion. The focus of the course will be the integrative nature of hormone actions in the regulations of various physiological processes in animal systems, such as metabolic control, growth, and reproduction. The course will also explore aspects of "non-classical" endocrinology, endocrine dysfunctional states and emerging environmental concerns related to endocrine dysfunction.

Prerequisite(s): BIOG*2580, [1 of BIOM*3200, HK*3810, HK*3940, ( ZOO*3200, ZOO*3210), ZOO*3600]
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department of Biomedical Sciences website for more information.
Department(s): Department of Biomedical Sciences

BIOM*4050 Biomedical Aspects of Aging W (3-0) [0.50]
Aging is accompanied by alterations in the physiological and biochemical functioning of body organ systems. The relationship between aging and the cardiovascular, respiratory, digestive/nutrition and reproductive systems will be discussed as will homeostatic functions associated with bone metabolism and fluid balance.

Prerequisite(s): 1 of BIOM*3200, HK*3810, HK*3940
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department of Biomedical Sciences website for more information.
Department(s): Department of Biomedical Sciences

BIOM*4070 Biomedical Histology F (2-3) [0.50]
This histology course is designed for students interested in biomedical sciences. Basic tissue types and major organ systems of mammals will be examined using virtual microscopy. Lectures and discussions will focus on the relationship of tissue structure to cell and organ functions and the effects of injury or disease on microscopic structure.

Prerequisite(s): (MCB*2050 or MCB*2210), (1 of ANSC*3080, BIOM*3200, HK*3810, HK*3940)
Restriction(s): ZOO*3000 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Biomedical Sciences

BIOM*4090 Pharmacology S,F,W (3-0) [0.50]
Topics covered in this course include drugs used in the treatment of inflammatory, allergic, hormonal, infectious, neoplastic and hemorrhagic/thromboembolic disease. The focus will be on drug targets and mechanisms of action that explain therapeutic and toxicological effects.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): BIOM*3090
Department(s): Department of Biomedical Sciences

Biomedical Sciences

Department of Biomedical Sciences

<tr>
<td>This multidisciplinary course provides an introduction to various aspects of mammalian reproduction of medical and veterinary significance. The course will cover the normal physiology and gross and micro anatomy of the female and male reproductive systems. Placentation, pregnancy and post-partum physiology will also be addressed. The impact of the reproductive biology on social and economic issues will be discussed.</td>
</tr>
<tr>
<td><strong>Prerequisite(s):</strong> (1 of BIOM<em>3010, HK</em>3401, HK<em>3501, ZOO</em>2090), (1 of BIOM<em>3200, HK</em>3810, ZOO<em>3210 , ZOO</em>3620)</td>

## Botany

**Department of Integrative Biology**

**Department of Molecular and Cellular Biology**

**Department of Plant Agriculture**

Additional course listings may be found in the course descriptions for Biology and Plant Biology.

---

### BOT*1200 Plants and Human Use W (3-0) [0.50]

This course will examine past and present interactions between humans and plants with emphasis on major changes in civilization and cultures as a result of these interactions. The approach will be to consider several case studies of how unique structural and chemical properties of various plant organs have played a role in their use by humans. Not an acceptable course for students in B.SC. Biological Sciences Programs, B.A.S. Program, B.SC. (ENV.) or B.SC. (AGR.) Programs.

**Restriction(s):** BIOL*1050

**Department(s):** Department of Plant Agriculture

### BOT*2000 Plants, Biology and People W (3-0) [0.50]

The course deals with the biology of plant species of historical and cultural importance. It will focus on plants used as a source of drugs, herbal medicines, industrial raw materials, food products, perfumes and dyes. Examples of plant products that will be looked at include cocaine, chocolate, tea, opium, hemp and ginseng. The relevant morphology, physiology, distribution and ethnobotany of these plant species will be discussed.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** BIOL*1050 or BIOL*1070

**Restriction(s):** BOT*1200

**Department(s):** Department of Plant Agriculture

### BOT*2100 Life Strategies of Plants F,W (3-3) [0.50]

This course introduces the structures and processes used by plants in the greening of our planet, and how and why plants are basic to the functioning of the biosphere. This course includes hands-on experience in examining the cells, tissues and architectures of plants as well as selected processes of plant function.

**Prerequisite(s):** 2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090

**Department(s):** Department of Molecular and Cellular Biology

### BOT*3050 Plant Functional Ecology F (3-3) [0.50]

This course integrates fundamental and applied aspects of plant ecology, focusing on the roles of functional traits, physiological mechanisms, life history strategies, abiotic constraints, and biotic interactions in influencing plant distribution and abundance. Specific topics include physiological ecology, growth and allocation patterns, influence of biotic and trophic interactions [pollinators, pathogens, herbivores, competitors, mutualists, decomposers] on the structure and function of plant communities, and effects of global environmental change. Labs will include a field component that explores variation in functional aspects of plants. This course is especially valuable for students interested in plant or wildlife biology and environmental management.

**Prerequisite(s):** 7.50 credits including BIOL*1070

**Department(s):** Department of Integrative Biology

### BOT*3310 Plant Growth and Development W (3-3) [0.50]

In this course the unique function and structure of plants is explored in relation to their growth, survival and adaptation to the environment. The control of growth and development by environmental and hormonal signals is explained through lectures and "hands-on" laboratories.

**Prerequisite(s):** BIOL*1090, (BIOL*1070 or BIOL*1080)

**Department(s):** Department of Molecular and Cellular Biology

### BOT*3410 Plant Anatomy F (3-3) [0.50]

The intricate internal structure of plants is explored in this course. The development, pattern and significance of cells, tissues and organs will be emphasized as well as the histological and microscopical methods used to study them. The lab emphasizes interpretation of plant structure as it relates to function.

**Prerequisite(s):** 2 of BIOL*1070, BIOL*1080, BIOL*1090

**Department(s):** Department of Molecular and Cellular Biology

### BOT*3710 Plant Diversity and Evolution W (3-3) [0.50]

This course integrates fundamental and applied aspects of plant evolution, focusing on the evolutionary history of plants, classification and identification, and hypotheses related to the evolution of plant form and life history. Specific topics include evolutionary process in plants and evolution of physiological, reproducte, behavioural, and morphological traits. Labs will focus on methods and contemporary tools for phylogenetic reconstruction, comparative analyses, identification, and basic morphology/anatomy. This course is especially valuable for students interested in plant or wildlife and environmental management.

**Prerequisite(s):** 7.50 credits including BIOL*1070

**Department(s):** Department of Integrative Biology

---

### BOT*4380 Metabolism in the Whole Life of Plants W (3-0) [0.50]

This course follows the developmental changes that take place in plants, and explores the molecular, biochemical and physiological mechanisms that are responsible for development. Emphasis will be placed on the importance of modern experimental methods and critical evaluation of data.

**Prerequisite(s):** BIOL*1090, BIOC*2580

**Department(s):** Department of Molecular and Cellular Biology

CHEM*1040 General Chemistry I F,W (3-3) [0.50]
This course introduces concepts of chemistry, the central link between the physical and biological sciences. Principles discussed include chemical bonding, simple reactions and stoichiometry, chemical equilibria and solution equilibria (acids, bases, and buffers), and introductory organic chemistry.
Prerequisite(s): 4U Chemistry, (or equivalent) or CHEM*1060
Department(s): Department of Chemistry

CHEM*1050 General Chemistry II F,W (3-3) [0.50]
This course provides an introductory study of the fundamental principles governing chemical transformations: thermodynamics (energy, enthalpy, and entropy); kinetics (the study of rates of reactions); and redox/electrochemistry.
Prerequisite(s): CHEM*1040
Department(s): Department of Chemistry

CHEM*1060 Introductory Chemistry F (3-0) [0.50]
This course stresses fundamental principles of chemistry and is designed for students without Grade 12 or 4U Chemistry or equivalent. Topics include: atomic theory, the periodic table, stoichiometry, properties of gases and liquids, acid-base concepts and chemical equilibria. This course is intended only for students who require the equivalent of Grade 12 or 4U Chemistry in order to proceed to CHEM*1040.
Offering(s): Offered through Distance Education format only.
Department(s): Department of Chemistry

CHEM*1100 Chemistry Today W (3-0) [0.50]
This course stresses fundamental principles of chemistry and is designed for students without Grade 12 or 4U Chemistry or equivalent. Topics include: atomic theory, the periodic table, stoichiometry, properties of gases and liquids, acid-base concepts and chemical equilibria. This course is intended only for students who require the equivalent of Grade 12 or 4U Chemistry in order to proceed to CHEM*1040.
Offering(s): Offered through Distance Education format only.
Department(s): Department of Chemistry

CHEM*2060 Structure and Bonding F (3-1.5) [0.50]
This course covers the applications of symmetry, simple crystal structures and principles of bonding. Molecular orbital theory is used to explain the fundamental relationship between electronic and molecular structure. This course provides the elementary quantum background for an understanding of the electronic structures of atoms and molecules.
Prerequisite(s): CHEM*1050, [IPS*1510 or (MATH*1210, 1 of PHYS*1010, PHYS*1070, PHYS*1300)]
Department(s): Department of Chemistry

CHEM*2070 Structure and Spectroscopy S,W (3-1.5) [0.50]
This course provides an introduction to spectroscopy and its relationship to molecular structure and dynamics. Rotational, vibrational, electronic and magnetic resonance spectroscopies will be studied. Concepts introduced in CHEM*2060 will be applied to chemical and biochemical problems through spectroscopic techniques. Central to this course is the use of spectroscopy for the determination of molecular structures and the investigation of molecular motions.
Prerequisite(s): CHEM*2060
Department(s): Department of Chemistry

CHEM*2400 Analytical Chemistry I S,F,W (3-6) [0.75]
This course provides instruction in quantitative analysis of important inorganic species in solution by volumetric, gravimetric and spectrophotometric techniques. The students will utilize spreadsheet applications to study solution equilibria and data analysis. This course is intended to build the foundations of good analytical laboratory practice.
Prerequisite(s): CHEM*1050
Restriction(s): CHEM*2480 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department website for more information.
Department(s): Department of Chemistry

CHEM*2480 Analytical Chemistry I S,F,W (3-3) [0.50]
This course consists of a lecture portion that is the same as CHEM*2400 and a 3 hour laboratory component.
Prerequisite(s): CHEM*1050
Restriction(s): CHEM*2400 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department website for more information.
Department(s): Department of Chemistry

CHEM*2700 Organic Chemistry I S,W (3-3) [0.50]
This course provides an introduction to organic chemistry through the discussion of stereochemy and major reaction mechanisms such as nucleophilic substitution and elimination, electrophilic addition, free radical reactions, electrophilic aromatic substitution, nucleophilic addition and nucleophilic acyl substitution.
Prerequisite(s): CHEM*1050
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Chemistry

CHEM*2820 Thermodynamics and Kinetics F (3-3) [0.50]
This course examines the laws and applications of chemical thermodynamics and chemical kinetics.
Prerequisite(s): CHEM*1050, (1 of IPS*1510, MATH*1210, MATH*2080)
Restriction(s): CHEM*2880, PHYS*2240
Department(s): Department of Chemistry

CHEM*2880 Physical Chemistry F (3-1.5) [0.50]
This course is designed to introduce students to modern methods of instrumental analysis in analytical chemistry. The focus of the course is on trace analysis, and therefore methods for the identification, separation and quantification of trace substances in solids, liquids and vapors will be described. The course is intended to build the foundations of good laboratory practice with good understanding of new concepts and principles of instrumental chemical analysis.
Prerequisite(s): CHEM*1050, (1 of IPS*1500, MATH*1000, MATH*1080, MATH*1200)
Restriction(s): CHEM*2820
Department(s): Department of Chemistry

CHEM*3360 Environmental Chemistry and Toxicology S,W (3-0) [0.50]
This course examines the chemistry of the natural environment and the influence of pollutants upon the environment. Topics will include methods of introduction of pollutants to, and removal of pollutants from, the environment. (Also listed as TOX*3360.)
Offering(s): Also offered through Distance Education format.
Prerequisite(s): CHEM*1050
Equate(s): TOX*3360
Department(s): Department of Chemistry

CHEM*3340 Analytical Chemistry II: Instrumental Analysis S,F,W (3-3) [0.50]
This course is designed to introduce students to modern methods of instrumental analysis in analytical chemistry. The focus of the course is on trace analysis, and therefore methods for the identification, separation and quantification of trace substances in solids, liquids and vapors will be described. The course is intended to build the foundations of good laboratory practice with good understanding of new concepts and principles of instrumental chemical analysis.
Prerequisite(s): (CHEM*2400 or CHEM*2480)
Restriction(s): TOX*3300 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Chemistry

CHEM*3440 Analytical Chemistry III: Analytical Instrumentation F (3-3) [0.50]
Analytical Instrumentation, data acquisition, processing and applications in Chemistry and Biological Chemistry.
Prerequisite(s): CHEM*3430
Department(s): Department of Chemistry

CHEM*3640 Chemistry of the Elements I F (3-3) [0.50]
A comprehensive introduction to concepts used by inorganic chemists to describe the structure, properties, and reactivity of compounds of the main group elements. The most important concepts covered are: Electronic Structure of Atoms, Symmetry, MO theory, Acids and Basis, Structure of Solids, Trends in the Periodic System.
Prerequisite(s): CHEM*2070
Department(s): Department of Chemistry

CHEM*3650 Chemistry of the Elements II W (3-3) [0.50]
The chemistry and structure of transition metal compounds; electronic spectral and structural properties of transition metal complexes; mechanisms of their substitution and redox reactions. Introduction to organometallic chemistry.
Prerequisite(s): CHEM*3640
Department(s): Department of Chemistry
CHEM*2700 Organic Chemistry II S,F (3-3) [0.50]
This course provides continued coverage of fundamental aspects of organic chemistry using an assimilation of carbonyl chemistry, unsaturated systems and carbon-carbon bond forming processes to acquaint students with methods of organic synthesis. Topics also include an introduction to spectroscopic methods for the identification of organic compounds.
Prerequisite(s): CHEM*2700
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Chemistry

CHEM*3760 Organic Chemistry III W (3-3) [0.50]
This course provides an in-depth treatment of various aspects of organic chemistry. This will include such topics as the chemistry of heterocycles, polar rearrangements, organic photochemistry, synthetic planning and a detailed discussion of organic spectroscopy.
Prerequisite(s): CHEM*3750
Department(s): Department of Chemistry

CHEM*3860 Quantum Chemistry F (3-1) [0.50]
This course provides an introduction to quantum chemistry and how it applies to the understanding of the electronic structure of atoms and molecules, as well as the geometric structure of molecules. The theoretical background needed to understand molecular spectroscopy is also provided. An integral part of this course is the use of commercial software for the computation of molecular properties.
Prerequisite(s): CHEM*2070, ( MATH*2170 or MATH*2270)
Department(s): Department of Chemistry

CHEM*3870 Molecular Spectroscopy W (3-3) [0.50]
This course covers elementary group theory with applications to molecular spectroscopy and provides a continuation of the topics of rotational, vibrational and electronic spectroscopy and their applications in chemistry from CHEM*2070.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): CHEM*3860, ( MATH*2150 or MATH*2160 )
Department(s): Department of Chemistry

CHEM*4010 Chemistry and Industry W (3-0) [0.50]
This course examines industrial processes for the production of organic and inorganic chemicals. The environmental impact and the challenges of a large-scale operation will be considered alongside the actual chemical processes involved.
Prerequisite(s): CHEM*2700, (CHEM*3430 or TOX*3300), (1 of IPS*1510, MATH*1210, MATH*2080 )
Department(s): Department of Chemistry

CHEM*4040 Advanced Topics in Analytical Chemistry W (3-0) [0.50]
Recent developments in instrumental methods of chemical analysis. A typical selection will include topics from the areas of surface analysis and the applications of lasers in chemical analysis.
Prerequisite(s): CHEM*3430
Department(s): Department of Chemistry

CHEM*4620 Advanced Topics in Inorganic Chemistry F (3-0) [0.50]
This course provides a contemporary treatment of subjects of current interest in modern inorganic chemistry. Possible topics include solid state chemistry, main group chemistry and organometallic chemistry.
Prerequisite(s): CHEM*3650
Department(s): Department of Chemistry

CHEM*4630 Bioinorganic Chemistry W (3-0) [0.50]
This course covers the role and importance of transition metal systems in biological processes.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): BIOC*2580, CHEM*3650
Co-requisite(s): CHEM*3650
Department(s): Department of Chemistry

CHEM*4720 Organic Reactivity W (3-0) [0.50]
This course is an introduction to physical organic chemistry, including discussion of reactive intermediates, substituent effects, medium effects, the mechanisms of organic reactions and the theoretical description of the bonding in organic molecules.
Offering(s): Offered in even-numbered years.
Prerequisite(s): CHEM*3760
Co-requisite(s): CHEM*3760
Department(s): Department of Chemistry

CHEM*4730 Synthetic Organic Chemistry F (3-0) [0.50]
This course provides an introduction to synthetic organic chemistry, including discussion of retrosynthetic analysis, modern synthetic methods, organic reaction, and syntheses of natural products. The integration of these topics for the rational design of synthetic schemes will also be discussed.
Prerequisite(s): CHEM*3750
Department(s): Department of Chemistry

CHEM*4740 Topics in Bio-Organic Chemistry F (3-0) [0.50]
This course covers the principles, methods and techniques of current bio-organic chemistry with emphasis on modern synthetic and analysis methods applied to biological molecules, a molecular based approach to structure recognition, and an introduction to molecular modeling and drug design.
Prerequisite(s): BIOC*2580, CHEM*3750
Department(s): Department of Chemistry

CHEM*4880 Topics in Advanced Physical Chemistry W (3-0) [0.50]
This course will cover selected topics in advanced physical chemistry. Possible topics include statistical thermodynamics, advanced quantum chemistry, spectroscopy, and magnetic resonance.
Offering(s): Offered in even-numbered years.
Prerequisite(s): (CHEM*2820 or PHYS*3240 ) , CHEM*3860
Department(s): Department of Chemistry

CHEM*4900 Chemistry Research Project I S,F,W (0-12) [1.00]
This course provides undergraduates with an opportunity to conduct research in an area of chemistry. Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration. Students cannot choose a supervisor with whom they already have research experience in another capacity (e.g. a summer research position). The project supervisor must be a faculty member of the Chemistry Department. Students should note that most projects are of two semesters' duration, and should plan their studies on the expectation that they will also register in CHEM*4910 in a subsequent semester.
Prerequisite(s): 5.00 credits in chemistry including (1.50 credits from CHEM*3430, CHEM*3640, CHEM*3650, CHEM*3750, CHEM*3760, CHEM*3860)
Restriction(s): Instructor consent required.
Department(s): Department of Chemistry

CHEM*4910 Chemistry Research Project II S,F,W (0-12) [1.00]
This is a research project and seminar in chemistry . Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration.
Prerequisite(s): CHEM*4900
Restriction(s): Instructor consent required.
Department(s): Department of Chemistry
## Chinese

### CHIN*1200 Introductory Chinese I F (3-0) [0.50]
This introductory course in Mandarin Chinese provides the fundamentals of grammar, structure, and idiom, and due importance to the spoken language. This course is for students with no previous knowledge of the language.

**Restriction(s):** Students with native or near-native ability in Chinese will not be admitted to this course.

**Department(s):** School of Languages and Literatures

### CHIN*1210 Introductory Chinese II W (3-0) [0.50]
This course, a continuation of CHIN*1200, emphasizes the application of basic grammatical structure in oral work and the comprehension of elementary reading texts. This course is intended for students who have only a basic knowledge of Mandarin Chinese. Students with basic knowledge of Chinese may seek instructor consent.

**Prerequisite(s):** CHIN*1200

**Department(s):** School of Languages and Literatures

### CHIN*1280 Conversational Chinese I F (3-0) [0.50]
The emphasis of this course is intensive practice of conversation and vocabulary acquisition in Mandarin Chinese.

**Restriction(s):** This course is restricted to students who are not fluent in Mandarin Chinese.

**Department(s):** School of Languages and Literatures

### CHIN*1290 Conversational Chinese II W (3-0) [0.50]
This is a continuation of Intermediate Chinese I. Additional emphasis will be given to the study of Chinese characters and grammar.

**Prerequisite(s):** CHIN*2200

**Restriction(s):** This course is restricted to students who are not fluent in Mandarin Chinese.

**Department(s):** School of Languages and Literatures

### CHIN*2010 Chinese Language and Culture F (3-5) [1.00]
This language course provides the application of basic grammatical structures in relation to conversational Mandarin (Chinese). The course may include the comprehension of elementary reading texts. The course focuses on Chinese, as a language, and its relation to understanding the culture of China. This course is offered as part of the Shanghai Semester.

**Prerequisite(s):** CHIN*1200 or equivalent

**Restriction(s):** Admission to the Shanghai semester. Instructor consent required.

**Department(s):** School of Languages and Literatures

### CHIN*2200 Intermediate Chinese I F (3-0) [0.50]
This course supports the further development of the four basic language skills (speaking, writing, reading, and listening) acquired in previous Chinese Language courses and includes a survey of grammar, complex sentences and logical stress.

**Prerequisite(s):** CHIN*1210

**Restriction(s):** Instructor consent required.

**Department(s):** School of Languages and Literatures

### CHIN*2210 Intermediate Chinese II W (3-0) [0.50]
This is a continuation of Intermediate Chinese I. Additional emphasis will be given to the study of Chinese characters and grammar.

**Prerequisite(s):** CHIN*2200

**Restriction(s):** Instructor consent required.

**Department(s):** School of Languages and Literatures
## Classical Studies

School of Languages and Literatures

Unless otherwise noted, these courses do not require a knowledge of the Greek or Latin languages.

### CLAS*1000 Introduction to Classical Culture FW (3-0) [0.50]

This course provides a wide-ranging look at essential features of Greek and of Roman culture and society. Considerable emphasis will be given to the classical views of the human condition.

*Department(s): School of Languages and Literatures*

### CLAS*2000 Classical Mythology WS (3-0) [0.50]

An examination of the nature and function of myth in Classical Antiquity. The course shows how the narrative and symbolic structure of myths orders individual and communal experience. The myths that have influenced Western civilization receive special emphasis.

*Offering(s): Also offered through Distance Education format.

*Department(s): School of Languages and Literatures*

### CLAS*2150 Western Art: Greece F (3-0) [0.50]

A survey of Ancient Greek Art and Archaeology, with stress on form and function plus stylistic trends and aesthetic values. The course will illuminate the cultural, social, and political life in Ancient Greece. (Also listed as ARTH*2150).

*Equate(s): ARTH*2150

*Department(s): School of Languages and Literatures*

### CLAS*2350 The Classical Tradition W (4-0) [0.50]

This course examines the transmission of Graeco-Roman culture in circumstances radically different from those in which it originated. It highlights the aspects of classical culture most influential in forming the Western tradition.

*Offering(s): Offered in odd-numbered years.

*Prerequisite(s): CLAS*1000 or CLAS*2000

*Department(s): School of Languages and Literatures*

### CLAS*2360 The Classical Tradition (in Latin) W (6-0) [1.00]

This course augments CLAS*2350 for students of Latin through the reading and study of Latin in certain primary sources, in particular Cicero, Quintilian, Augustine.

*Offering(s): Offered in odd-numbered years.

*Prerequisite(s): LAT*2000

*Department(s): School of Languages and Literatures*

### CLAS*3010 The Roman Revolution W (4-0) [0.50]

An examination of the collapse of the Roman Republic and the development of the Imperial government under Augustus. The paradox of the external power and inner instability of Rome.

*Offering(s): Offered in even-numbered years.

*Prerequisite(s): 1 of CLAS*1000, CLAS*2000, HIST*2850

*Department(s): School of Languages and Literatures*

### CLAS*3040 Greek Tragedy and Comedy W (4-0) [0.50]

The nature of tragedy, and the existential and moral questions raised by the plays of Aischylos, Sophokles, and Euripides. Comedy, fantasy, and society in Aristophanes.

*Offering(s): Offered in even-numbered years.

*Prerequisite(s): CLAS*1000 or CLAS*2000

*Department(s): School of Languages and Literatures*

### CLAS*3050 The Rise and Fall of Athens (in Greek) F (6-0) [1.00]

This course augments CLAS*3000 for students of Greek through the reading and study in Greek of selected primary sources, such as Herodotus, Thucydides, and Plutarch.

*Offering(s): Offered in even-numbered years.

*Prerequisite(s): GREK*2020

*Department(s): School of Languages and Literatures*

### CLAS*3060 The Roman Revolution (in Latin) W (6-0) [1.00]

This course augments CLAS*3010 for students of Latin through the reading and study in Latin of selected primary sources, notably Sallust, Cicero, Caesar, and Suetonius.

*Offering(s): Offered in even-numbered years.

*Prerequisite(s): LAT*2000

*Department(s): School of Languages and Literatures*

### CLAS*3070 History of the Hellenistic World (in Greek) F (6-0) [1.00]

This course augments CLAS*3020 for students of Greek through the reading and study in Greek of selected books from the Iliad and/or Odyssey. The course will include close study of the epic dialect and features of its formulaic language.

*Offering(s): Offered in odd-numbered years.

*Prerequisite(s): GREK*2020

*Department(s): School of Languages and Literatures*

### CLAS*3090 Greek Tragedy and Comedy (in Greek) W (6-0) [1.00]

This course augments CLAS*3040 for students of Greek through the reading and study in Greek of an extant play.

*Offering(s): Offered in even-numbered years.

*Prerequisite(s): GREK*2020

*Department(s): School of Languages and Literatures*

### CLAS*3100 Religion in Greece and Rome F (4-0) [0.50]

An examination of the varieties of religious experience and of religious activity in Greece and Rome, before the establishment of Christianity. Particular attention is paid both to the relations of religion to state and to the relations of the individual to gods.

*Offering(s): Offered in even-numbered years.

*Prerequisite(s): CLAS*1000 or CLAS*2000

*Department(s): School of Languages and Literatures*

### CLAS*3120 Religion in Greece and Rome (in Latin) F (6-0) [1.00]

This course augments CLAS*3100 for students of Latin through the reading and study of Latin of selected primary sources.

*Offering(s): Offered in even-numbered years.

*Prerequisite(s): LAT*2000

*Department(s): School of Languages and Literatures*

### CLAS*3150 Space: Roman Art and Urbanism W (3-0) [0.50]

Introduction to Roman art and urbanism from the Early Republic to the end of the imperial period. The course will survey the developments of Roman art with an emphasis on architecture, sculpture and painting. It will illuminate the development of the urban space in the context of cultural, social and political life. (Also listed as ARTH*3150).

*Offering(s): Offered in even-numbered years.

*Equate(s): ARTH*3150

*Department(s): School of Languages and Literatures*
### CLAS*3300 Directed Reading in Greek or Latin U (3-0) [0.50]

This course is designed for students of Greek or Latin who are seeking an enriched learning opportunity, through directed reading and/or research in the original language (Greek or Latin). Consult the Classical Studies faculty advisor for information about this opportunity.

**Prerequisite(s):** LAT*2000, (1 of CLAS*2350, CLAS*3010, CLAS*3100, CLAS*4000), or GREEK*2020, (1 of CLAS*3000, CLAS*3020, CLAS*3030, CLAS*3040)

**Restriction(s):** Instructor consent required.

**Department(s):** School of Languages and Literatures

### CLAS*3700 Experiential Learning and Language S,F,W (0-0) [0.50]

This course provides an opportunity for independent study based on an experiential project in Classical Studies. The project (approximately 70 hours) must be approved by a faculty member in the School of Languages and Literatures. It will include research about experiential learning, a reflective piece of writing and a public oral presentation about the project.

**Prerequisite(s):** 10.00 credits including 1.50 credits in Classics.

**Restriction(s):** A minimum cumulative average of 70% in all Classics course attempts.

**Instructor consent required.**

**Department(s):** School of Languages and Literatures

### CLAS*4000 Novel and Romance in Antiquity F (4-0) [0.50]

The historical and formal roots of fiction in the classical prose romances. Special attention is paid to the influence of myth, religion, historiography and ethical biography. Among texts studied are Daphnis and Chloe, Satyricon, and Aithiopika.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** CLAS*3030 or CLAS*3040

**Department(s):** School of Languages and Literatures

### CLAS*4010 Novel and Romance in Antiquity (in Latin) F (6-0) [1.00]

This course augments CLAS*4000 for students of Latin through the reading and study in Latin of an extant novel.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** LAT*2000

**Department(s):** School of Languages and Literatures

### CLAS*4150 Research Paper in Classics F,W (3-0) [0.50]

This course is intended to complement courses in specified studies in classics. It engages the student in research and in critical writing, and permits the examination, in depth, of a topic of importance to the discipline and of interest to the student.

**Prerequisite(s):** 1.50 credits in Classical Studies courses at the 3000 level

**Department(s):** School of Languages and Literatures

### CLAS*4400 Seminar in Classics W (3-0) [0.50]

A seminar course complementing courses of specific study in classics. It seeks to define the nature of the discipline, its values and its procedures. Attention will be paid to recent methodological and ideological trends in the discipline.

**Prerequisite(s):** 1.50 credits in Classical Studies at the 3000 level

**Department(s):** School of Languages and Literatures
Computing and Information Science

School of Computer Science

Note: Credit may be obtained for 1 of CIS*1000 or CIS*1200. Students who major or minor in Computing and Information Science may not receive credit for the following courses unless taken to satisfy the requirements of another program: MATH*1050.

CIS*1000 Introduction to Computer Applications S,F,W (3-2) [0.50]
This course provides a survey of computer systems and software, including an introduction to computer programming, data organization, and the social impact of computing. The course emphasizes application packages for personal and business use.

Offering(s): Offered through Distance Education format only.
Restriction(s): CIS*1200, Not available to students registered in BASC:AHN, BCOMP degree or a CIS minor.
Department(s): School of Computer Science

CIS*1050 Web Design and Development S,W (0-0) [0.50]
An introduction to the basics of designing and developing a website. It examines the basic concepts, technologies, issues and techniques required to develop and maintain websites. The course is suitable for students with no previous programming experience.

Offering(s): Offered through Distance Education format only.
Department(s): School of Computer Science

CIS*1200 Introduction to Computing F,W (3-2) [0.50]
This course covers an introduction to computer hardware and software, data organization, problem-solving and programming. The course includes exposure to application packages for personal and business use and is intended for students who wish a balance between programming and the use of software packages.

Offering(s): Offered through Distance Education format only.
Restriction(s): CIS*1000 Not available to students registered in a BCOMP degree or a CIS minor.
Department(s): School of Computer Science

CIS*1250 Software Design I F (3-2) [0.50]
This is an introductory course which involves a general overview of design and problem solving as it is practiced in different disciplines. The course will include an examination of the quality of software as the end product of the design process. It will include a study of the pervasiveness of software, and the platform specific considerations. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.

Restriction(s): Restricted to students in BCOMP:SENG and BCOMP:SENG:C
Department(s): School of Computer Science

CIS*1300 Programming F (3-2) [0.50]
This course examines the applied and conceptual aspects of programming. Topics may include data and control structures, program design, program solving and algorithm design, operating systems concepts, and fundamental programming skills. This course is intended for students who plan to take later CIS courses. If your degree does not require further CIS courses consider CIS*1500 Introduction to Programming.

Restriction(s): CIS*1500 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): School of Computer Science

CIS*1500 Introduction to Programming F,W (3-1) [0.50]
This course introduces problem-solving, programming and data organization techniques required for applications using a general purpose programming language. Topics include control structures, data representation and manipulation, program logic, development and testing. This course is intended for students who do not intend to enroll in further CIS courses. If your degree requires further CIS courses, CIS*1300, is required.

Offering(s): Also offered through Distance Education format.
Restriction(s): CIS*1300 Not available to students registered in a BCOMP degree, a CIS minor, BENG:CENG or BENG:ESC.
Department(s): School of Computer Science

CIS*1910 Discrete Structures in Computing I F (3-2) [0.50]
This course is an introduction to discrete structures and formal methodologies used in computer science, including Boolean, algebra, propositional logic, predicate logic, proof techniques, set theory, equivalence relations, order relations, and functions.

Department(s): School of Computer Science

CIS*2030 Structure and Application of Microcomputers F (3-3) [0.50]
This course examines the components of a computer system, including memories, CPU, buses, and input/output subsystems and interface hardware. Programming of these systems is studied, including instruction sets, addressing modes, assembly/machine language programming, development of algorithms for data acquisition, display, and process control.

Prerequisite(s): CIS*1910, CIS*2500
Department(s): School of Computer Science

CIS*2170 User Interface Design W (3-2) [0.75]
This course is a practical introduction to the area of user interface construction. Topics include user interface components and their application, best practices for user interface design, approaches to prototyping, and techniques for assessing interface suitability.

Prerequisite(s): 1 of CIS*1200, CIS*1300, CIS*1500
Department(s): School of Computer Science

CIS*2225 Software Design II W (3-2) [0.50]
This course focuses on the process of software design. Best practices for code development and review will be examined. The software development process and tools to support this will be studied along with methods for project management. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.

Prerequisite(s): CIS*1250, CIS*1300
Restriction(s): Restricted to BCOMP:SENG majors.
Department(s): School of Computer Science

CIS*2430 Object Oriented Programming F (3-2) [0.50]
This course introduces the Object Oriented (OO) approach to programming and algorithm design. Topics will include the creation and use of objects from class libraries, user defined objects, inheritance, modularity, generic code, components, collections and containers, and an introduction to OO design methodologies.

Prerequisite(s): CIS*2500
Department(s): School of Computer Science

CIS*2500 Intermediate Programming W (3-2) [0.50]
In this course students learn to interpret a program specification and implement it as reliable code, as they gain experience with pointers, complex data types, important algorithms, intermediate tools and techniques in problem solving, programming, and program testing.

Prerequisite(s): CIS*1300
Department(s): School of Computer Science

CIS*2520 Data Structures F (3-2) [0.50]
This course is a study of basic data structures, such as lists, stacks, queues, trees, and tables. Topics which will be examined include abstract data types, sequential and linked representations, and an introduction to algorithm analysis; various traversal, search, insertion, removal, and sorting algorithms.

Prerequisite(s): CIS*2500, (1 of CIS*1910, ENGG*1500, MATH*2000)
Department(s): School of Computer Science

CIS*2750 Software Systems Development and Integration W (3-2) [0.75]
This course introduces techniques and tools used in the development of large software systems. Students learn methods for organizing and constructing modular systems, manipulating files, introductory interface design, and use of databases. Software tools for managing projects, database connectivity, configuration management, and system application programmer interfaces are also covered.

Prerequisite(s): CIS*2430, CIS*2520
Department(s): School of Computer Science

CIS*2910 Discrete Structures in Computing II W (3-2) [0.50]
This course is a further introduction to discrete structures and formal methodologies used in computer science, including sequences, summations, recursion, combinatorics, discrete probability, and graph theory.

Prerequisite(s): CIS*1300, (CIS*1910 or ENGG*1500)
Department(s): School of Computer Science

CIS*3050 Systems Programming F (3-1) [0.50]
This course will familiarize students with system level interface tools and their common applications. The purpose, function, design and use of these tools will be explored, allowing students to determine where and when these tools are useful in software development projects. Tools examined in the course include loadable libraries, file system locking, signals, pipes, asynchronous reading/writing to files and memory, file system sockets, shared memory models, and hardware device properties and control.

Prerequisite(s): CIS*3110
Department(s): School of Computer Science
CIS*3090 Parallel Programming F (3-1) [0.50]
This course examines the current techniques for design and development of parallel programs targeted for platforms ranging from multicore computers to high-performance clusters, with and without shared memory. It includes theoretical models for, and hardware effects on, parallel computation, the definitions of speedup, scalability, and data-versus-task-parallel approaches. The course will also examine strategies for achieving speedup based on controlling granularity, resource contention, idle time, threading overhead, work allocation, and data localization.
Prerequisite(s): (CIS*2030 or ENGG*3640), CIS*3110
Department(s): School of Computer Science

CIS*3110 Operating Systems I W (3-1) [0.50]
This course covers operating systems in theory and practice by focusing on the components in a system: scheduling, resource allocation, process management, multi-programming, multi-tasking, I/O control, file systems, and mechanisms for client-server computing using examples from contemporary operating systems.
Prerequisite(s): CIS*2520, (CIS*2030 or ENGG*2410).
Department(s): School of Computer Science

CIS*3120 Digital Systems I W (3-2) [0.50]
This course examines Boolean algebra, minimization of Boolean expressions, design of combinational and sequential logic circuits, memory design, control, ALU, bus design, microprogramming and CPU design.
Prerequisite(s): CIS*1910, CIS*2500
Department(s): School of Computer Science

CIS*3130 System Modeling and Simulation F (3-2) [0.50]
This course examines discrete simulation based on event queues and random number generation. The topics covered include discrete-event simulation models, random number generators, generating random variates and processes, input modeling, model verification and validation. Application areas such as manufacturing, services, and computing are highlighted.
Prerequisite(s): CIS*2500, STAT*2040
Restriction(s): CIS*2460
Department(s): School of Computer Science

CIS*3150 Theory of Computation F (3-0) [0.50]
This course explores the theory of computation including automata theory, Turing machines and their variants, formal languages, parsing, the Halting problem, undecidability, and NP-completeness.
Prerequisite(s): CIS*2750, CIS*3490
Department(s): School of Computer Science

CIS*3190 Software for Legacy Systems W (0-0) [0.50]
This course is an introduction to legacy software systems used in business, manufacturing, and engineering. Topics include COBOL programming, mainframe systems, and integration of legacy systems with contemporary computing systems.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): CIS*2500 or work experience in a related field.
Department(s): School of Computer Science

CIS*3210 Computer Networks F (3-1) [0.50]
This course covers the high-level (protocol) oriented aspects of computer networks, specifically: application, session, transport and network layers. It includes the Internet, socket-level programming, multimedia and quality of service issues. The hardware aspects (switches, LANs, modems, transmission paths) are only covered at a functional level.
Prerequisite(s): CIS*3110
Department(s): School of Computer Science

CIS*3250 Software Design III F (3-3) [0.50]
This course will examine the historical development of design methodologies and working with legacy systems. It will include an examination of programming paradigms and trends in software design from the past and present. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.
Prerequisite(s): CIS*2250, CIS*2500
Department(s): School of Computer Science

CIS*3260 Software Design IV F (3-3) [0.50]
This course is a study of software architectures and system design methodologies. This will include advanced techniques for project management and experience evaluating software tools. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.
Prerequisite(s): CIS*2750, CIS*3250, CIS*3760
Department(s): School of Computer Science

CIS*3490 The Analysis and Design of Computer Algorithms W (3-2) [0.50]
The design and analysis of efficient computer algorithms are studied. Topics which will be studied include: standard methodologies, asymptotic behaviour, optimality, lower bounds, implementation considerations, graph algorithms, matrix computations (e.g. Strassen's method), NP-completeness.
Prerequisite(s): (CIS*1910 or (CIS*2910 and ENGG*1500)), CIS*2520
Department(s): School of Computer Science

CIS*3530 Data Base Systems and Concepts F (3-1) [0.50]
This course is a study of data organization and data management principles with the perspective of analyzing applications suitable for implementation using a DBMS. This will include an analysis of several data base models, query specification methods, and query processing techniques. Overview of several related issues including concurrency control, security, integrity and recovery. Students will demonstrate projects through project assignments.
Prerequisite(s): CIS*2520
Department(s): School of Computer Science

CIS*3700 Introduction to Intelligent Systems W (3-1) [0.50]
This course covers the core topics of Artificial Intelligence, namely: agents and environment, search, knowledge representation, reasoning, and learning. The last three topics are covered using logic as the common formalism for coherence. The course introduces a broad range of basic concepts, terminology, and applications, in addition to providing some specific, widely applicable methodologies.
Prerequisite(s): (CIS*3750 or CIS*3760), (CIS*2460 or STAT*2040)
Department(s): School of Computer Science

CIS*3750 System Analysis and Design in Applications F,W (3-2) [0.75]
This course is an introduction to the issues and techniques encountered in the design and construction of software systems, focusing on the theory and models of software evolution. Topics include requirements and specifications, prototyping, design principles, object-oriented analysis and design, standards, integration, risk analysis, testing and debugging.
Prerequisite(s): CIS*2750
Department(s): School of Computer Science

CIS*3760 Software Engineering F,W (3-2) [0.75]
This course is an examination of the software engineering process, the production of reliable systems and techniques for the design and development of complex software. Topics include object-oriented analysis, design and modeling, software architectures, software reviews, software quality, software engineering, ethics, maintenance and formal specifications.
Prerequisite(s): CIS*3750
Department(s): School of Computer Science

CIS*4010 Cloud Computing W (3-0) [0.50]
This course introduces students to fundamentals of cloud computing and software development for cloud platforms. It covers topics such as virtualization, architecture of cloud systems, programming for the cloud, resource management, as well as privacy and security issues.
Prerequisite(s): CIS*3110
Department(s): School of Computer Science

CIS*4020 Data Science F (3-1) [0.50]
Data Science focuses on extracting the important relations in data. The course is intended as a survey of the discipline and focuses on applied computational methods for data analysis. Topics include algorithms, computational and machine learning methods, software tools, and modeling, as they apply to the analysis of and discovery in big data.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): CIS*2750, MATH*1160, STAT*2040
Department(s): School of Computer Science

CIS*4030 Mobile Computing W (3-0) [0.50]
This course introduces students to mobile computing and mobile application development. It examines mobile technology, application development, user interaction, data storage, and software tools.
Prerequisite(s): CIS*2030, CIS*2750, CIS*3110
Department(s): School of Computer Science

CIS*4050 Digital Systems II F (3-1) [0.50]
This course examines central processor architectures, control and microprogramming, memory systems, special architectures, underlying support for special architectures, architectures suitable for very large scale integration.
Offering(s): Offered in even-numbered years.
Prerequisite(s): CIS*3110, CIS*3120
Department(s): School of Computer Science

</table>

This course serves as an introduction to systematic methods of testing and verification, covering a range of static and dynamic techniques and their use within the software development process. Concepts such as defining necessary reliability, developing operational profiles, techniques to improve and predict software reliability, preparing and executing tests, black box testing, white box testing, unit testing, system testing, and integration testing will be explained.

Prerequisite(s): CIS*3750 or CIS*3760
Department(s): School of Computer Science

This is a capstone course which applies the knowledge gained from the previous Software Design courses to a large team project. The course has an applied focus and will involve software design and development experiences in teams, a literacy component, and the use of software development tools.

Prerequisite(s): CIS*2750, CIS*3260
Department(s): School of Computer Science

This course examines the methods for user interface software design, including interface representations and testing. Topics which will be included include the evaluation and design of sample application systems, impacts of computer-based information systems on individuals and organizations, implementation and testing tools, and planning of the learning stages and design of assistance subsystems.

Prerequisite(s): CIS*3110, (CIS*3750 or CIS*3760)
Department(s): School of Computer Science

A variety of advanced features, code generation and optimization. Overall design implementation of a compiler, techniques for parsing, building and manipulating intermediate representations of a program, implementation of important features, code generation and optimization.

Prerequisite(s): CIS*2030, CIS*3110, CIS*3150
Department(s): School of Computer Science

This is an introduction to the process of image processing. Emphasis is placed on topics such as image enhancement, segmentation morphological analysis, texture analysis, visualization and image transformations. Applications of image processing in medicine, forensics, food and security are surveyed.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): CIS*2750, CIS*3110, (CIS*2460 or STAT*2040)
Department(s): School of Computer Science

This course introduces concepts of soft computing: modelling uncertainty, granular computing, neurocomputing, evolutionary computing, probabilistic computing and soft computing for software engineering.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): CIS*3490, (CIS*3750 or CIS*3760), (CIS*2460 or STAT*2040)
Department(s): School of Computer Science

This is an introduction to computer graphics. Topics include graphics programming concepts, geometrical transformations, viewing 3-D projections, raster graphics, sculptured surfaces, visible surface determination, image processing and other special topics. Practical issues will be covered by assignment using currently available graphics equipment.

Offering(s): Offered in even-numbered years.
Prerequisite(s): CIS*3110, CIS*3750 or CIS*3760
Department(s): School of Computer Science

This course covers basic concepts and practices in computer and network security. This includes topics such as fundamental concepts of computer security, network security, threat landscape, threat intelligence and attack methods, ethical hacking concepts and other hacking techniques, security technology and security policies, and cloud security.

Prerequisite(s): CIS*3210
Restriction(s): Instructor consent required.
Department(s): School of Computer Science

This course is an introduction to modern cryptography, with an eye toward practical applications. Topics covered include classical systems, information theory, mathematical background material, symmetric and asymmetric crypto-systems and their cryptanalysis, hash functions and message authentication (MAC), provable security, key-exchange and management, authentication and digital signatures. Importance of learning Cryptography in Digital Forensics will also be discussed

Prerequisite(s): CIS*3490
Restriction(s): Instructor consent required.
Department(s): School of Computer Science

This course is a detailed study of the compilation process. Topics include interpreters, overall design implementation of a compiler, techniques for parsing, building and manipulating intermediate representations of a program, implementation of important features, code generation and optimization.

Prerequisite(s): CIS*2030, CIS*3110, CIS*3150
Department(s): School of Computer Science

This course is an introduction to the foundations of modern cryptography, with an eye toward practical applications. Topics covered include classical systems, information theory, mathematical background material, symmetric and asymmetric crypto-systems and their cryptanalysis, hash functions and message authentication (MAC), provable security, key-exchange and management, authentication and digital signatures. Importance of learning Cryptography in Digital Forensics will also be discussed

Prerequisite(s): CIS*3490
Restriction(s): Instructor consent required.
Department(s): School of Computer Science

This course is an introduction to computer graphics. Topics include graphics programming concepts, geometrical transformations, viewing 3-D projections, raster graphics, sculptured surfaces, visible surface determination, image processing and other special topics. Practical issues will be covered by assignment using currently available graphics equipment.

Offering(s): Offered in even-numbered years.

Restriction(s): Instructor consent required.
Department(s): School of Computer Science

This course is an introduction to modern cryptography, with an eye toward practical applications. Topics covered include classical systems, information theory, mathematical background material, symmetric and asymmetric crypto-systems and their cryptanalysis, hash functions and message authentication (MAC), provable security, key-exchange and management, authentication and digital signatures. Importance of learning Cryptography in Digital Forensics will also be discussed

Prerequisite(s): CIS*3490
Restriction(s): Instructor consent required.
Department(s): School of Computer Science

This course covers basic concepts and practices in computer and network security. This includes topics such as fundamental concepts of computer security, network security, threat landscape, threat intelligence and attack methods, ethical hacking concepts and other hacking techniques, security technology and security policies, and cloud security.

Prerequisite(s): CIS*3210
Restriction(s): Instructor consent required.
Department(s): School of Computer Science

This course is a detailed study of the compilation process. Topics include interpreters, overall design implementation of a compiler, techniques for parsing, building and manipulating intermediate representations of a program, implementation of important features, code generation and optimization.

Prerequisite(s): CIS*2030, CIS*3110, CIS*3150
Department(s): School of Computer Science

This course is an introduction to the process of image processing. Emphasis is placed on topics such as image enhancement, segmentation morphological analysis, texture analysis, visualization and image transformations. Applications of image processing in medicine, forensics, food and security are surveyed.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): CIS*2750, CIS*3110, (CIS*2460 or STAT*2040)
Department(s): School of Computer Science

This course introduces concepts of soft computing: modelling uncertainty, granular computing, neurocomputing, evolutionary computing, probabilistic computing and soft computing for software engineering.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): CIS*3490, (CIS*3750 or CIS*3760), (CIS*2460 or STAT*2040)
Department(s): School of Computer Science

This is an introduction to computer graphics. Topics include graphics programming concepts, geometrical transformations, viewing 3-D projections, raster graphics, sculptured surfaces, visible surface determination, image processing and other special topics. Practical issues will be covered by assignment using currently available graphics equipment.

Offering(s): Offered in even-numbered years.
Prerequisite(s): CIS*3110, CIS*3750 or CIS*3760
Department(s): School of Computer Science

This course covers basic concepts and practices in computer and network security. This includes topics such as fundamental concepts of computer security, network security, threat landscape, threat intelligence and attack methods, ethical hacking concepts and other hacking techniques, security technology and security policies, and cloud security.

Prerequisite(s): CIS*3210
Restriction(s): Instructor consent required.
Department(s): School of Computer Science

This course is a continuation of CIS*4900. The student will conduct and write an undergraduate thesis under the individual supervision of a faculty member. In addition the student is required to present their work in a seminar and also participate in the critical analysis and review of the work of other students taking this course.

Prerequisite(s): CIS*4900
Restriction(s): Instructor consent required.
Department(s): School of Computer Science
# Co-operative Education

Co-operative Education & Career Services

COOP*XXXX courses are limited to students registered in a co-operative education program.

## COOP*1100 Introduction to Co-operative Education F,W (1-0) [0.00]

This course will introduce students to the theory, practice and policies of co-operative education at the University of Guelph. Students will learn to take full advantage of the co-op option. They will acquire practice in the skills required to succeed in the competitive process of securing suitable work terms. Specifically, the course will cover: characteristics and expectations of professional work environments, interview skills, resume and cover letter writing, as well as general skills required to be successful in the co-op program. Students also obtain practice in the co-op employment process.

## COOP*1000 Co-op Work Term I F,W,S (3-0) [0.50]

This is a semester long experience in a paid work setting. Co-op work semesters differ depending on the program and major. Location of the work term is varied. Refer to the schedule of studies for your degree program to determine which semester this course is scheduled. Students must obtain a passing work report evaluation and work performance evaluation grade in order to continue in the Co-op Program.

### Crop Science

**CROP*3300 Grain Crops W (3-0) [0.50]**

Management strategies and world production of the major temperate grain crops are studied relative to their botanical and physiological characteristics and to available environmental resources. The utilization of grain crops for human food, livestock feed, and various industrial products are examined.

**Prerequisite(s):** AGR*2050 or AGR*2470  
**Department(s):** Department of Plant Agriculture

**CROP*3310 Protein and Oilseed Crops F (3-0) [0.50]**

Management strategies and world production of the major temperate protein and oilseed crops are studied relative to their botanical and physiological characteristics and to available environmental resources. The utilization of protein and oilseed crops for human food, livestock feed and various industrial products are examined.

**Prerequisite(s):** AGR*2050 or AGR*2470  
**Department(s):** Department of Plant Agriculture

**CROP*3340 Managed Grasslands F (3-2) [0.50]**

Managed forage grasses and legumes provide grazing, cover crops, conserved feed, and a wider range of services to the environment and society at large. Agro-ecological, genetic, and managerial considerations will be integrated toward addressing questions of ruminant and equine production and environmental management. Forage species will be distinguished morphologically and physiologically, focusing on adaptation to climatic, edaphic, and managerial constraints and applications for horses, including weed and poisonous plant risks. Topics will include: sward lifespan, establishment and maintenance practices, forage quality indices, integration of harvest management for pastures and stored feed, and environmental implications for plant and animal biodiversity and water quality.

**Prerequisite(s):** 1 of AGR*2050, AGR*2320, AGR*2470, ENVS*2060  
**Department(s):** Department of Plant Agriculture

**CROP*4220 Cropping Systems W (3-0) [0.50]**

This course will cover the design of cropping systems for specific livestock, poultry and cash crop enterprises; integration of all factors affecting crop yields, quality and economy of production such as choice and interchangeability of crops, crop sequence, tillage, pest control, seasonal work programming, harvesting, drying and storage.

**Prerequisite(s):** (1 of CROP*3300, CROP*3310, CROP*3340), (1 of AGR*2320, ENVS*3080, ENVS*4090, ENVS*4160)  
**Department(s):** Department of Plant Agriculture

**CROP*4240 Weed Science F (3-3) [0.50]**

Weeds will be studied in relation to agricultural practices. Principles of chemical, mechanical and biological control will be outlined. Laboratories will include weed identification, weed control methods, and demonstrations of the effects of various herbicides.

**Prerequisite(s):** AGR*2470  
**Department(s):** Department of Plant Agriculture

**CROP*4260 Crop Science Field Trip F (0-4) [0.50]**

This field study course is designed to increase the student’s knowledge of agricultural production, agricultural policy and agri-business. Students will tour the midwestern United States just prior to the start of the fall semester, visiting cash crop, horticultural and livestock farms, and supporting industries such as processing, manufacturing, elevators and stockyards. A student fee will be assessed to cover transportation and lodging.

**Prerequisite(s):** 12.50 credits including AGR*2470  
**Restriction(s):** A cumulative average of 65%. Instructor consent required.  
**Department(s):** Department of Plant Agriculture

Economics

Department of Economics and Finance

For courses without semester designations, please check with the department. Advance schedule are available in the department.

**ECON*1050 Introductory Microeconomics S,F,W (3-0) [0.50]**
This course looks at the Canadian Economy in terms of aggregate performance and policy; analysis of the determinants of national income, employment and the price level, and the role of government monetary and fiscal policies in improving the rate of economic growth.

**Offering(s):** Also offered through Distance Education format.
**Equate(s):** ECON*1200
**Department(s):** Department of Economics and Finance

**ECON*1100 Introductory Macroeconomics S,F,W (3-0) [0.50]**
This course looks at the Canadian Economy in terms of aggregate performance and policy; analysis of the determinants of national income, employment and the price level, and the role of government monetary and fiscal policies in improving the rate of economic growth.

**Offering(s):** Also offered through Distance Education format.
**Department(s):** Department of Economics and Finance

**ECON*2100 Economic Growth and Environmental Quality F (3-0) [0.50]**
This course examines the implications of economic growth on the quality of the environment, employing the basic principles of economic analysis.

**Offering(s):** Also offered through Distance Education format.
**Prerequisite(s):** ECON*1050 or FARE*1040
**Department(s):** Department of Economics and Finance

**ECON*2310 Intermediate Microeconomics S,F,W (3-0) [0.50]**
This course is an analysis of the behaviour of households and firms under alternative assumptions and market conditions.

**Offering(s):** Also offered through Distance Education format.
**Prerequisite(s):** (ECON*1050 or FARE*1040), (1 of IPS*1500, MATH*1030, MATH*1080, MATH*1200)
**Department(s):** Department of Economics and Finance

**ECON*2420 Canadian Economic History W (3-0) [0.50]**
This course surveys the development of the Canadian economy from the aboriginal economy to the early fur and fish trades, agricultural settlement, industrialization, the Great Depression, growth of the public sector and fast economic growth after World War Two. Particular attention is paid to international economic relations and to regional differences within Canada.

**Prerequisite(s):** ECON*1050, (ECON*1100 or HIST*2450)
**Department(s):** Department of Economics and Finance

**ECON*2650 Introductory Development Economics F (3-0) [0.50]**
This course introduces students to the economic experience of developing countries, the ways in which economists try to understand it, and the implications for policy. The basic tools of economic analysis as taught in the introductory courses are used to analyze topics that may include theories of growth, trade, education, foreign investment, exchange rates, labour markets, the role of government, environmental sustainability and strategies related to agriculture, population, industry and investment.

**Prerequisite(s):** ECON*1050, ECON*1100
**Department(s):** Department of Economics and Finance

**ECON*2720 Business History W (3-0) [0.50]**
This course surveys the evolution of economic activity and organization from before the industrial revolution to the present. Particular attention is given to the changing relationship between technology and business organization, the shift from proprietorship to corporation and the rise of multinational enterprise. Other topics may include the relationship between business and government, the role of the entrepreneur in the process of technical change and the evolution of work patterns and standards of living.

**Prerequisite(s):** ECON*1050, (ECON*1100 or any 1.50 credits in history)
**Department(s):** Department of Economics and Finance

**ECON*2740 Economic Statistics F,W (3-1) [0.50]**
This course is designed to prepare students conceptually and mathematically for (ECON*2560 or FIN*2000), Theory of Finance and ECON*3740, Introduction to Econometrics. Topics include the summation operator, descriptive statistics, frequency distributions, probability and statistical independence, the binomial distribution, algebra of the expectation operator, discrete bivariate distributions, covariance, variance of a linear function of random variables, the normal and t distributions, sampling distributions, point and interval estimation, hypothesis testing and an introduction to ordinary least squares. Additional topics may be included at the instructor's discretion. Examples and assignment questions are drawn from economics and finance.

**Prerequisite(s):** ECON*1100, (ECON*1050, or FARE*1040), (1 of MATH*1000, MATH*1030, MATH*1050, MATH*1080, MATH*1200)
**Department(s):** Department of Economics and Finance

**ECON*2770 Introductory Mathematical Economics F,W (3-0) [0.50]**
This course applies the elements of calculus and matrix algebra to simple microeconomic and macroeconomic problems.

**Offering(s):** Also offered through Distance Education format.
**Prerequisite(s):** ECON*1100, (ECON*1050, or FARE*1040), (1 of MATH*1030, MATH*1080, MATH*1200)
**Department(s):** Department of Economics and Finance

**ECON*3100 Game Theory W (4-0) [0.50]**
The course introduces students to non-cooperative game theory, which is an important method of analysis for economics situations involving small numbers of interacting economic agents. The course is centered on the concept of Nash equilibrium, and applies this equilibrium concept to static and dynamic games with full as well as incomplete information. The purpose of the course is to enable students to take any economic situation, find an economic model (game) that depicts the incentives facing the participants, and analyze the game to predict the behaviour of the economic agents.

**Prerequisite(s):** ECON*2310, ECON*2410, (ECON*2770 or MATH*1210)
**Restriction(s):** ECON*3770
**Department(s):** Department of Economics and Finance

**ECON*3300 Economics of Health and the Workplace U (3-0) [0.50]**
This course will introduce students to concepts of health economics with particular relevance to workplace issues. Topics to be covered include the determinants of health, the demand for and supply of health care, the market for health care providers, health insurance, public and private, the role of health insurance in the labour market, whether not having to provide comprehensive health insurance to their workers gives Canadian firms an edge over their American competitors, workplace health risks and their effects on working conditions and salaries, workplace wellness programs and their evaluation, and the analysis of the cost effectiveness of health interventions.

**Prerequisite(s):** ECON*2310, (1 of ECON*2740, PSYC*2010, STAT*2040, STAT*2050, STAT*2060, STAT*2080, STAT*2090, STAT*2100, STAT*2400)
**Department(s):** Department of Economics and Finance

**ECON*3400 The Economics of Personnel Management U (3-0) [0.50]**
In this course, we examine the economics of personnel management in organizations. Using mainstream microeconomic and behavioural economic theory, we will consider such issues as recruitment, promotion, financial and non-financial incentives, compensation, job performance, performance evaluation, and investment in personnel. The interplay between theoretical models and empirical evidence will be emphasized in considering different approaches to the management of personnel.

**Prerequisite(s):** ECON*2310 or ECON*2200
**Department(s):** Department of Economics and Finance

**ECON*3500 Urban Economics W (3-0) [0.50]**
Land is a scarce resource and is an input into production and consumption. Transportation costs are important and the structure of a city has real effects on the economic and social activities that occur in it. This course discusses how the price of a good varies by location, how the market price of a property varies over time, and how the structure of cities responds to market forces. The course discusses some public policy and managerial implications of the location dimension.

**Prerequisite(s):** ECON*2310
**Department(s):** Department of Economics and Finance

**Revision:** 2020-2021 Undergraduate Calendar
ECON*3810 Advanced Macroeconomics W (4-0) [0.50]

This course provides an advanced study of a wide range of issues in intertemporal macroeconomics. When constructing macroeconomic models in this course we will explicitly take into account microeconomic foundations. The models constructed will be used to study short-run fluctuations (or business cycles) and long-term growth, and to explain cross country income disparities. Topics also include open economy macroeconomic issues.

Prerequisite(s): ECON*2410, (ECON*2740 or STAT*2040), (ECON*2770 or MATH*1210)
Department(s): Department of Economics and Finance

ECON*3900 Intermediate Special Study in Economics S,F,W (3-0) [0.50]

This intermediate special study course is designed to provide an opportunity for students to gain or enhance their knowledge and understanding of a particular topic in economics and explore an area of interest beyond what is provided through regularly scheduled courses. Students will work, individually or in a group setting, to an agreed program of study and typically complete a major paper/report or series of papers/reports normally on a specific topic of choice under the guidance of a faculty member.

Prerequisite(s): ECON*2310, ECON*2410, ECON*2740, ECON*2770
Restriction(s): Instructor consent required.
Department(s): Department of Economics and Finance

ECON*4400 Managerial Economics W (3-0) [0.50]

This course introduces students to the latest developments in the economic analysis of the inside workings of firms. The course is centered on the concept of organizational structure, which is made up of three variables: allocation of decision rights, performance evaluation and performance incentives. The course tries to explain the diversity of economic organizations, and more generally, why economic activity is sometimes carried out through firms and sometimes through markets.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): ECON*2310 Students must have completed a minimum of 12 credits.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*4500 Topics in Urban Economics U (3-0) [0.50]

This course will investigate selected theoretical and applied topics in urban economics in depth. Among topics which might be treated are location theory, the theory of spatial structure, transportation economics, the economics of housing, the economics of land use regulation, urban public finance.

Prerequisite(s): ECON*3740, (ECON*3710 or ECON*3500)
Department(s): Department of Economics and Finance

ECON*4640 Advanced Econometrics F (3-0) [0.50]

This course discusses the classical linear regression model and its extensions including generalized least squares and the theory and application of F tests. The maximum likelihood principle is introduced, as are alternative approaches to testing, e.g. LM, LR and Wald tests. Additional topics may be included at the instructor's discretion. Matrix algebra is used and proof of the Gauss-Markov theorem is included, but discussion of proofs is in general limited in order to allow substantial applications to data using statistical software such as TSP, SHAZAM, SAS, STATA.

Prerequisite(s): ECON*3740
Department(s): Department of Economics and Finance

ECON*4700 Advanced Mathematical Economics F (3-1) [0.50]

This course provides students with the necessary mathematical skills required to build rigorous models in economics, including differential and integral calculus, optimization and comparative statics analysis and advanced topics in linear algebra. It continues in the second half with application to modelling in a particular area of economics. The specific area will vary from year to year, and can include such topics as general equilibrium modelling, mathematical finance models, or economics of the environment.

Prerequisite(s): ECON*3710, ECON*3740
Department(s): Department of Economics and Finance

ECON*4710 Advanced Topics in Microeconomics F (3-0) [0.50]

An intensive study of the scope, methodology, and content of contemporary microeconomics; selected topics in partial and general equilibrium analysis.

Prerequisite(s): ECON*3710
Department(s): Department of Economics and Finance

ECON*4720 Topics in Economic History U (3-0) [0.50]

This course uses economic theory to analyse the process of historical economic change.

Prerequisite(s): 12.50 credits including (1 of ECON*2310, ECON*2720, ECON*3720, ECON*3730)
Department(s): Department of Economics and Finance
ECON*4750 Topics in Public Economics U (3-0) [0.50]
This course examines selected topics related to the expenditure and taxation functions of government. Topics may include issues in public good theory such as the free rider problem, the problem of eliciting truthful revelation of preferences and the use of taxes as a corrective device for externalities. The course may also address optimal taxation as well as tax evasion. Throughout this course the trade-off between efficiency and equity is emphasized.
Prerequisite(s): ECON*3710
Department(s): Department of Economics and Finance

ECON*4760 Topics in Monetary Economics U (3-0) [0.50]
Selected topics in monetary economics such as theories of the demand for and supply of money, the nature and role of private banks and central banks, the transmission processes of monetary policy are examined.
Prerequisite(s): (ECON*3600 or ECON*3810), ECON*3740, [1 of ECON*3510, ECON*3710, (ECON*3960 or FIN*3500)]
Department(s): Department of Economics and Finance

ECON*4780 Topics in Industrial Organization U (3-0) [0.50]
Selected topics in the theoretical and empirical study of the organization and performance of firms and markets are covered in this course. Topics may include: strategic behaviour of firms such as actions to deter entry of rivals, pre-emptive choice of location and product quality, and research and development; the regulation of firms under uncertainty; econometric analysis of the use of market power; and modern advances in the theory of the firm.
Prerequisite(s): ECON*3530, ECON*3740
Department(s): Department of Economics and Finance

ECON*4790 Topics in Labour Market Theory U (3-0) [0.50]
Selected topics in advanced labour market theory with emphasis on empirical evidence for the Canadian labour market are covered in this course.
Prerequisite(s): ECON*3740, (ECON*3710 or ECON*3520)
Department(s): Department of Economics and Finance

ECON*4800 Competitiveness and Strategic Advantage U (3-0) [0.50]
This course is about the creation and maintenance of long-term vision for the corporation from the perspective of the general manager. It is concerned with both the determination of strategic direction and the management of the strategic process.
Prerequisite(s): 14.50 credits including ECON*2310, (BUS*3320 or MGMT*3320), (ECON*2560 or FIN*2000)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Economics and Finance

ECON*4810 Advanced Topics in Macroeconomics W (3-0) [0.50]
This course explores the theory of complex aggregate economic models; their assumptions, construction, and use in the analysis of macroeconomic activity.
Prerequisite(s): ECON*3740, ECON*3810
Department(s): Department of Economics and Finance

ECON*4830 Economic Development W (3-0) [0.50]
A study of the theories, problems and policies of economic growth with special reference to underdeveloped countries.
Prerequisite(s): ECON*2310
Department(s): Department of Economics and Finance

ECON*4860 Seminar in Current Economic Problems U (3-0) [0.50]
In a seminar setting, selected contemporary economic problems are examined.
Prerequisite(s): (ECON*3600 or ECON*3810), ECON*3710, ECON*3740
Department(s): Department of Economics and Finance

ECON*4880 Topics in International Economics U (3-0) [0.50]
Selected topics involving the advanced analysis of the causes and effects of trade and financial flows and international factor movements are covered in this course.
Prerequisite(s): [1 of or ECON*3610, ECON*3810, (ECON*3860 or FIN*3400)], (ECON*3710 or ECON*3620)
Department(s): Department of Economics and Finance

ECON*4890 History of Economic Thought U (3-0) [0.50]
A study of the development of economic theory, the tools of economic analysis, and the evaluation of economics as a science, together with an analysis of the circumstances affecting this development.
Prerequisite(s): ECON*2310, ECON*2410
Department(s): Department of Economics and Finance

ECON*4900 Special Study in Economics S,F,W (3-0) [0.50]
The special study option is designed to provide senior undergraduate students with an opportunity to pursue an independent course of study. The subject matter will be related to regular 4000 level courses. Students will be required to submit a major paper/report on the subject matter studied. Formal agreement between the student and instructor of the course is required as well as the approval of the department chair or designate.
Prerequisite(s): (ECON*3600 or ECON*3810), ECON*3710, ECON*3740
Department(s): Department of Economics and Finance

ECON*4910 Special Study in Economics S,F,W (3-0) [0.50]
The special study option is designed to provide senior undergraduate students with an opportunity to pursue an independent course of study. The subject matter will be related to regular 4000 level courses. Students will be required to submit a major paper/report on the subject matter studied. Formal agreement between the student and instructor of the course is required as well as the approval of the department chair or designate.
Prerequisite(s): (ECON*3600 or ECON*3810), ECON*3710, ECON*3740
Department(s): Department of Economics and Finance

ECON*4930 Environmental Economics F (3-0) [0.50]
This course is an advanced treatment of the interrelationship between economic activities and the state of the natural environment from an economics perspective.
Prerequisite(s): 14.50 credits including ECON*2310, ECON*2770
Department(s): Department of Economics and Finance
Environmental Design and Rural Development

School of Environmental Design and Rural Development

EDRD*1400 Introduction to Design W (3-0) [0.50]
This course is designed to increase visual awareness and recognition of natural and planned design elements in the environment. Students will investigate the roles of designers and seek to develop an understanding of design as an applied process that responds to human needs.

Department(s): School of Environmental Design and Rural Development

EDRD*2020 Interpersonal Communication F (3-0) [0.50]
This course introduces dyadic and small-group communication. The focus is on communication style and effectiveness with attention to verbal and nonverbal communication, listening behaviour and conflict.

Offering(s): Offered through Distance Education format only.
Department(s): School of Environmental Design and Rural Development

EDRD*2250 Planning Theory and Practice F (3-0) [0.50]
The course links the body of planning theory to the Canadian experience of local planning practice. It provides an introduction to the issues of planning in the public realm and its role in implementation of the development of municipalities through both growth as well as decline. This is achieved by examining planning theory and reflecting on the context and process of planning in practice in Canada. The student in the course will come to understand both the role of theory in guiding practice as well as the role of practice in evolution of theory. This understanding is critical to the role of the professional planner in facilitating local development and managing change in the public interest.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 2.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*2650 Introduction to Planning and Environmental Law W (3-0) [0.50]
The goal of the course is to introduce the students to the principles and processes that govern the management of land use and the protection of the environment. This will be done through an examination of the key legislation and regulations applied to land use and the environment.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*3050 Agricultural Communication F (3-0) [0.50]
This course investigates communications, public relations and media production for engaging a wide audience with a focus on various types of media, including the internet. Communication strategies and landmark media campaigns are considered. Students will be involved in the preparation of a professional portfolio of media.

Prerequisite(s): 10.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*3120 Educational Communication F (3-0) [0.50]
This course addresses the communication concepts and practices within the formal and non-formal educational contexts. Communication is central to teaching and learning because communication mediates a conscious effort either on the part of the learners to learn, or on the part of the teachers to provide and transfer knowledge, attitudes and skills.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Restriction(s): REXT*3100
Department(s): School of Environmental Design and Rural Development

EDRD*3140 Organizational Communication W (3-0) [0.50]
This course explores the application of communication process theory to organizations with special emphasis on internal organizational processes experienced at individual and group levels. Students examine communication in different organizational contexts including civil society, government, business and transnational corporations.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Restriction(s): REXT*3040
Department(s): School of Environmental Design and Rural Development

EDRD*3160 International Communication W (3-0) [0.50]
This course examines the role of communication in global development. Emphasis is on the application of interpersonal, intercultural communications and the mass media in the development process.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Restriction(s): REXT*3060
Department(s): School of Environmental Design and Rural Development

EDRD*3160 Sustainable Communities W (3-0) [0.50]
This course will explore the issue of the sustainability of small, rural and remote communities in Canada. A variety of issues will be explored in the context of sustainable communities, including the impact of global climate change, demographic changes, economic changes, automation and labour market challenges, individual and community health and well-being etc. In addition, we will critically examine how federal/provincial/territorial/municipal governments support or hinder the sustainability of these communities.

Prerequisite(s): 10.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*3450 Watershed Planning Practice F (3-0) [0.50]
This course introduces the principles and practice of watershed-based planning, with an emphasis on Ontario, with reference to other jurisdictions in Canada and international contexts including the United States. The course provides an overview of the history of water resource use and abuse, basic concepts of hydrology, water resource management, ecosystem approaches, and planning theory.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Department(s): School of Environmental Design and Rural Development

EDRD*3500 Recreation and Tourism Planning F,W (3-0) [0.50]
Application of planning theory to recreation and tourism in the private and public sectors, approaches to implementing plans, and strategies for involving stakeholders in the planning process. Focus will also be on the impact of various approaches to planning recreation and tourism.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Equivalences: UNIV*3500
Department(s): School of Environmental Design and Rural Development

EDRD*4010 Tourism Planning in the Less Developed World W (3-0) [0.50]
This course will provide a discussion and investigation of tourism from an interdisciplinary point of view. The subject of tourism development cuts across many disciplines and is fundamental to a variety of scholars and practitioners working in tourism and development generally. While a variety of important theories and planning practices from a variety of disciplines have been selected for study, planning and community development theory will provide the overarching perspective. The features of planning theories and models and stress analysis and intervention into human and environmental systems. This perspective begins with the view that tourism is a complicated human construct and as such needs to be structured and guided in order to maximize the benefits to all stakeholders in the system.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5 credits
Department(s): School of Environmental Design and Rural Development

EDRD*4020 Rural Extension in Change and Development W (3-0) [0.50]
The planning and management of development programs with emphasis on the role of non-formal education and counselling in influencing behavioral change and adoption of innovation. Case studies include cross cultural and international considerations.

Prerequisite(s): 10.00 credits
Equivalences: REXT*4020
Department(s): School of Environmental Design and Rural Development

EDRD*4120 Leadership Development in Small Organizations F (3-0) [0.50]
The main theories of leadership will be discussed with exploration of the current literature, practice leadership skills and perform relevant activities in an on-line environment. Emphasis will be placed on the communication challenges facing leaders in small organizations and the importance of developing a culture of shared leadership.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 10.00 credits
Restriction(s): REXT*4100
Department(s): School of Environmental Design and Rural Development
## Engineering

### ENGG*1100 Engineering and Design I F (2-4) [0.75]
This course provides an introduction to engineering and design. An overview of design processes is covered and students experience a defined, open ended design project. Physical design development is emphasized, supplemented by elements of analysis. Engineering communications emphasize the visual form and span engineering drawings across a spectrum of engineering disciplines (2D and 3D, realistic and symbolic). Sketching and computer aided tools are both developed. Written communications (individual and team) focus on design. The practice of professional engineering, ethical principles and the engineer’s role and obligations in society are all introduced. The coursework is based to reflect the practice of engineering and the character of the School of Engineering.

**Restriction(s):** Registration in the BENG Program

**Department(s):** School of Engineering

### ENGG*1210 Engineering Mechanics I W (3-2) [0.50]
This course presents the fundamental principles of Newtonian mechanics; distributed loading; free body diagrams; rigid body equilibrium; structural analysis; internal loading of structural members; friction; dynamics of particles; linear and angular momentum of rigid bodies; conservation of energy; principles of impulse and momentum, and plane motion of rigid bodies.

**Prerequisite(s):** MATH*1200, PHYS*1130

**Department(s):** School of Engineering

### ENGG*1500 Engineering Analysis F,W (3-1) [0.50]
This course deals with engineering applications of matrix algebra, vector spaces and computer techniques to solve linear systems. Topics include theory and applications of linear transformations, eigenvalues and eigenvectors, diagonalization, complex-variable algebra, and multi-variable functions.

**Restriction(s):** MATH*1160, MATH*2150, MATH*2160

**Department(s):** School of Engineering

### ENGG*2100 Engineering and Design II F,W (2-4) [0.75]
This course is a progression in engineering design skills with particular emphasis on computer usage in design, oral communication of solutions and team skills. Computer usage in design will include advanced CAD/CAM/CAE tools; and database management software. An introduction to safety in engineering practice and design, and the concept of sustainable development are covered.

**Prerequisite(s):** Completion of 4.0 credits including ENGG*1100

**Department(s):** School of Engineering

### ENGG*2120 Material Science F,W (3-2) [0.50]
Study of the mechanical, electrical, magnetic, optical and thermal properties of solids. Atomic order and disorder in solids, single-phase metals, and multiphase materials (their equilibria and micro-structure) are examined as a basis for understanding the causes of material properties. Interwoven throughout the course is an introduction to materials selection and design considerations.

**Prerequisite(s):** CHEM*1040, PHYS*1130

**Department(s):** School of Engineering

### ENGG*2130 Introduction to Environmental Engineering F (1.5-3) [0.50]
This course introduces the field of environmental engineering, including minimizing the negative effects of human activities, responsible resource use and recovery, and remediation of soil, water and air pollution. Students will explore relevant ethical issues and as well as regulations and policies in diverse areas of environmental engineering. Skills development integrated throughout the course elements will emphasize writing, teamwork, the collaborative nature of the field, engineering tools used in environmental engineering, and data management and analysis.

**Prerequisite(s):** 4.0 credits

**Restriction(s):** Registration in BENG.ENVE or BENG.ENVE.C.

**Department(s):** School of Engineering

### ENGG*2160 Engineering Mechanics II F (3-1) [0.50]
Fundamental principles of the mechanics of deformable solids; stress and strain; Mohr’s circle for transformation of stress and strain; deflection under load; design of beams, shafts, columns and pressure vessels; failure theory and design.

**Prerequisite(s):** ENGG*1210, ENGG*1500, 0.50 credits in calculus

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to the BME and MECH specializations in the BENG and BENG:C programs. See department for more information.

**Department(s):** School of Engineering

### ENGG*2180 Introduction to Manufacturing Processes W (3-2) [0.50]
This course is designed to provide students with an overview of a wide variety of manufacturing processes involved in industrial activities. While most of the manufacturing processes are to be introduced during the course, more emphasis will be given on those processes which are more common in industry, namely material removal processes, casting, and forming. In addition to introducing the various manufacturing process, mathematical models and several empirical data and equations describing the various manufacturing processes will be covered in order to provide the students with a better understanding of the relations between the parameters involved.

**Prerequisite(s):** ENGG*2160

**Co-requisite(s):** ENGG*2120

**Department(s):** School of Engineering

### ENGG*2230 Fluid Mechanics F,W (3-2) [0.50]
Analysis of steady ideal and viscous fluid flow systems using the Continuity, Bernoulli and Momentum equations. Boundary layer theory is treated in terms of viscous and pressure drag, lift and its importance in heat and mass transfer. Dimensional analysis and dynamic similitude are studied to provide an understanding of flow systems analysis and modeling. Introduction to pipe flow and open channel flow.

**Prerequisite(s):** ENGG*1210, MATH*1210

**Department(s):** School of Engineering

### ENGG*2340 Kinematics and Dynamics W (3-2) [0.50]
The course will cover kinematic and dynamic analysis including graphical and analytical methods for kinematic analysis of space, mechanisms and elementary body motion in space, static and dynamic force analyses of mechanisms, gyroscopic forces, dynamics of reciprocating and rotating machinery, cam and gear mechanisms and specifications.

**Prerequisite(s):** ENGG*1210

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to the MECH specialization in the BENG and BENG:C programs. See department for more information.

**Department(s):** School of Engineering

### ENGG*2400 Engineering Systems Analysis F (1.5-3) [0.50]
This course provides the foundational skills required to model and analyze elementary dynamic engineering systems. The course will focus on basic mechanical, electrical, thermal and hydraulic systems under the assumptions of linearity and time invariance. Students will learn to identify relevant elements and generate system models. System behaviours will be analyzed by solving for such responses as the impulse response, step response, and sinusoidal steady-state response using differential equations, Laplace transform methods, and computer-based methods. The relationship of such system parameters as time constant, degree of damping and resonance frequencies with the transient and steady-state responses will be examined. The complex valued system transfer function will be defined and analyzed.

**Prerequisite(s):** ENGG*1210, ENGG*1500, MATH*1200, MATH*1210, PHYS*1010

**Co-requisite(s):** MATH*2270

**Department(s):** School of Engineering
ENGG*2410 Digital Systems Design Using Descriptive Languages F (3-3) [0.50]
Review of Boolean algebra and truth tables, Karnaugh maps. Design, synthesis and realization of combinational circuits. Design, synthesis and realization of sequential circuits. VHDL: structural modeling, data flow modeling, synchronous & asynchronous behavior descriptions, algorithmic modeling. Designing with PLDs. Digital design with SM charts. Designing with PGAs and complex programmable logical devices. Hardware testing and design for testability. Hierarchy in large designs. The course will primarily be concerned with the design of multi-input, multi-output digital controllers which provide the central control signals that orchestrate the collection of hardware devices (from SSI to VLSI) found in a digital system. An introduction to FPGA-based, as well as microprocessor-based digital systems design will be given. Design examples will include systems such as UART, microcontroller CPU, ALU and data acquisition system.
Prerequisite(s): PHYS*1130, (CIS*1300 or CIS*1500)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the CENG and ESC specializations in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*2450 Electric Circuits W (3-2) [0.50]
This course explores the fundamentals of electric circuit analysis. Course topics include: lumped circuit abstraction; circuit elements and their characteristics; nodal and mesh analysis; linearity and superposition principles; fundamental circuit theorems; Thevenin and Norton equivalent circuits; introduction to the ideal operational amplifier and operational-amplifier circuits; dynamics of first and second order circuits including switched circuits; coupled inductors and transformers; alternate-current circuits and sinusoidal steady-state analysis with phasor methods.
Prerequisite(s): ENGG*2400, PHYS*1010
Department(s): School of Engineering

ENGG*2550 Water Management W (3-0) [0.50]
The influence of fundamental engineering and hydrologic principles on the choices available for management of water on a watershed basis is demonstrated for representative techniques used in management for water supply, irrigation, flood control, drainage and water pollution control. Selected problems are studied to reveal the technical, environmental, legal, jurisdiction, political, economic and social aspects of water management decisions.
Prerequisite(s): 5.00 credits including CHEM*1040
Department(s): School of Engineering

ENGG*2560 Environmental Engineering Systems W (3-2) [0.50]
Analysis techniques for natural and engineered systems including chemical, physical and biological processes. Mass balance analysis for steady state and unsteady state situations. Analysis under both equilibrium and non-equilibrium conditions. Reactor types including batch, plug-flow, CSTR. Noise pollution, control and prevention.
Prerequisite(s): CHEM*1050, MATH*2270
Department(s): School of Engineering

ENGG*2660 Biological Engineering Systems I W (3-1) [0.50]
This course deals with the mathematical description and identification of biological systems through: mass and energy balances; reactions in biological systems; and applications in biomedicine, food and bioprocessing.
Prerequisite(s): ENGG*2400, MATH*2270, (1 of BIOL*1070, BIOL*1080, BIOL*1090)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BIOE specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3050 Embedded Reconfigurable Computing Systems F (3-2) [0.50]
This course introduces the students to the analysis, synthesis and design of embedded systems and the implementation of embedded systems using Field Programmable Gate Arrays. Topics include: review of digital design concepts; Programmable Logic Devices; Field Programmable Logic Devices; physical design automation (partitioning, placement and routing); Hardware Descriptive Languages: VHDL: Verilog; High Level Languages; System-C; Handle-C; Fixed Point and Floating Point Arithmetic; Hardware Accelerators; Reconfigurable Instruction Set Computers; Hardware Software Co-design techniques; Application of Field Programmable Logic in Embedded Systems.
Prerequisite(s): ENGG*2410, ENGG*3380
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the CENG specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3070 Integrated Manufacturing Systems F (3-2) [0.50]
Common production machines and manufacturing systems are dealt with, particularly automated systems, robotics, computer control and integration techniques, materials handling, inspection processes and process control. The course addresses societal and environmental issues related to manufacturing.
Prerequisite(s): ENGG*2120
Department(s): School of Engineering

ENGG*3080 Energy Resources & Technologies F (3-2) [0.50]
The challenges of changing the global energy system to reduce dependence on finite fossil energy sources, and transition to environmentally sustainable energy sources, are examined. The reserves, consumption, applications and environmental and human impacts of oil, coal and natural gas usage are examined. The fundamental principles, applications and status of a range of renewable energy sources and technologies will be covered to provide a solid background for further study of sustainable energy.
Prerequisite(s): ENGG*3260
Restriction(s): ENGG*2030
Department(s): School of Engineering

ENGG*3100 Engineering and Design III W (3-2) [0.75]
This course combines the knowledge gained in the advanced engineering and basic science courses with the design skills taught in ENGG*1100 and ENGG*2100 in solving open-ended problems. These problems are related to the student's major. Additional design tools are presented, including model simulation, sensitivity analysis, linear programming, knowledge-based systems and computer programming. Complementing these tools are discussions on writing and public speaking techniques, codes, safety issues, environmental assessment and professional management. These topics are taught with the consideration of available resources and cost.
Prerequisite(s): Registration in the BENG program and completion of 6.00 credits of ENGG courses including ENGG*2100
Restriction(s): Students must have a minimum cumulative average of 60% or higher in all ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*3120 Computer Aided Design and Manufacturing W (3-2) [0.75]
The course presents the elements of solid modelling, creation of parts increasing complexity and the assembly of parts to form a final design, along with mechanism simulation. The operation and programming of CNC machines is covered.
Prerequisite(s): ENGG*2100, ENGG*3280
Department(s): School of Engineering

ENGG*3130 Modelling Complex Systems W (3-2) [0.50]
This course explores the application of systems thinking to complex global issues. Key topics will include: systems theory, complex adaptive systems, systems tools, and systems approaches. The course will emphasize the role of computational modelling and simulation as a central tool for applying systems thinking to real-world settings.
Prerequisite(s): ENGG*2400, STAT*2120, (CIS*1300 or CIS*1500)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the ESC specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3140 Mechanical Vibration F (3-3) [0.50]
This course will provide students with an introduction to the fundamental concepts of vibration engineering using both single and multiple degrees of freedom concepts. The free and forced response of these systems will be covered. Emphasis will be placed on the design of vibration suppression and isolation of mechanical systems. Concepts of natural frequencies and mode shapes and their significance in the solution of multiple degrees of freedom problems will be covered. Vibration of rotating machinery, balancing, condition monitoring, and predictive vs. preventative maintenance philosophies will be introduced.
Prerequisite(s): ENGG*2340, MATH*2270
Department(s): School of Engineering

ENGG*3150 Engineering Biomechanics F (3-2) [0.50]
The following topics related to biomechanics are covered in this course: kinematic and kinetic analysis techniques; electromyography: current techniques in laboratory instrumentation and biomedical applications.
Prerequisite(s): 4.00 ENGG credits, including ENGG*1210
Department(s): School of Engineering
ENGG*3160 Biological Engineering Systems II F (3-2) [0.50]
Mass transfer in biological systems: concepts; gas-liquid mass transfer; membrane transport processes; and heterogeneous reactions. Applications may include fermenter aeration, tissue perfusion, mass transfer limitations in biofilms, microbial floccs and solid tumours, protein recovery and drug delivery.
Prerequisite(s): ENGG*2230, ENGG*2660
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BIOE specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3170 Biomaterials W (3-2) [0.50]
Physical properties of natural and synthetic (e.g. stainless steel, polymers) materials used in biological engineering applications are presented in this course. Topics will include microstructure and mechanical properties of typical biomaterials, quantification of advanced material properties and behaviours, fabrication, compatibility, biodegradation and mechanical failure. Typical applications will include processing of biomaterials as well as equipment and implant design.
Prerequisite(s): ENGG*2120
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BIOE and BME specializations in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3180 Air Quality F (3-2) [0.50]
The study of the transport, transformation and deposition processes associated with air pollutants. The chemical and biological nature, impacts, and sources of air pollutants.
The physical aspects of the atmospheric boundary layer. The mathematical treatment of diffusion in a homogeneous field in a boundary layer. Regulatory approaches worldwide and their use of air quality modeling. The use of models for the design of stacks and monitoring networks.
Prerequisite(s): ENGG*2230, (ENGG*2560 or ENGG*2660)
Co-requisite(s): ENGG*3260
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the ENV basc courses in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3190 Logic Synthesis W (3-2) [0.50]
This course presents automatic logic synthesis techniques for computer-aided design (CAD) of very large-scale integrated (VLSI) circuits and systems. Topics covered are: two-level Boolean network optimization, multi-level Boolean network optimization, technology mapping for library-based designs and field-programmable gate-array (FPGA) designs, and state-assignment and re-timing for sequential circuits. The course will also cover various representations of Boolean functions such as binary decision diagrams (BDDs) and discuss their applications to logic synthesis.
Prerequisite(s): ENGG*2410
Department(s): School of Engineering

ENGG*3210 Communication Systems W (3-2) [0.50]
This course is an introduction to the fundamentals of data communication and computer networking. The data communication basics will cover signal transmission and signal encoding techniques such as: multiplexing techniques, signaling, encoding and decoding, error detection and recovery, sliding window techniques. Computer networking basics will cover: communication network components and topologies, multiple access design issues and performance analysis, switching, routing, services and applications, and security. The course will also cover the mathematical tools (Fourier transform, etc.) used in signal analysis.
Prerequisite(s): MATH*2130, STAT*2120
Department(s): School of Engineering

ENGG*3220 Groundwater Engineering W (3-2) [0.50]
This course introduces water resources engineering and environmental engineering students to the fundamentals of groundwater systems. Emphasis is placed on quantitative analyses required for groundwater resource extraction and quality protection of the saturated zone. Laboratories emphasize problem solving, use of commercial software and practical groundwater engineering investigation.
Prerequisite(s): ENGG*2230
Department(s): School of Engineering

ENGG*3240 Engineering Economics F (3-0) [0.50]
This course covers the principles of project evaluation; analysis of capital and operating costs of engineering alternatives, benefit-cost ratio; break-even studies, evaluations recognizing risk, replacement and retirement of assets; tax considerations, influence of sources of funds.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): MATH*1210
Restriction(s): Registration in the Engineering program.
Department(s): School of Engineering

ENGG*3250 Energy Management & Utilization W (3-2) [0.50]
This course introduces notions of energy conservation and efficiency, an integrated approach to energy auditing and examples of typical applications (examples include: steam generation and distribution, process or comfort cooling, pumping and compressed air, human needs for modern living, energy consumption in buildings and industry). It also covers pinch technology and its application for energy recovery in industry, and methods to achieve low energy buildings.
Co-requisite(s): ENGG*3430
Restriction(s): ENGG*3030
Department(s): School of Engineering

ENGG*3260 Thermodynamics F (3-2) [0.50]
This course covers macroscopic thermodynamics and its applications to engineering practice. Topics include properties of pure substances and equilibrium, the First Law of thermodynamics (energy transfer and energy balance in closed and flow systems), the Second Law of thermodynamics and its applications (entropy analysis of closed and flow systems, quantification of irreversibilities and inefficiencies, quality of energy, etc.).
Prerequisite(s): CHEM*1040, ENGG*2230, ENGG*2400, MATH*2270
Department(s): School of Engineering

ENGG*3270 Electromagnetics in Biomedical Engineering F (3-2) [0.50]
This course explores the fundamentals of electromagnetics in biomedical engineering. Course topics include the following: vectors and spatial geometry, partial derivatives, multiple integrals, vector calculus, electrostatics, steady-state electric circuits, magnetostatics, Ampere's Law, Faraday's Law, and propagation of electromagnetic waves. Applications within biomedical engineering will be covered, e.g., computerized tomography, electromagnetic radiation safety and physiological effects, magnetic sensitivity of brain and heart tissue, tissue electrical resistances, ophthalmology, and light-tissue interaction.
Prerequisite(s): ENGG*2450
Department(s): School of Engineering

ENGG*3280 Machine Design F (3-3) [0.75]
This course covers the principles of project evaluation; analysis of capital and operating costs of engineering alternatives, benefit-cost ratio; break-even studies, evaluations recognizing risk, replacement and retirement of assets; tax considerations, influence of sources of funds.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): MATH*1210
Restriction(s): Registration in the Engineering program.
Department(s): School of Engineering

ENGG*3340 Geographic Information Systems in Environmental Engineering F (3-0) [0.50]
Geographical information system structure and functions. Data structuring and application program development. Data input, display and analysis. Applications in environmental engineering and natural resource development/management. Students will be able to use a GIS software package to build geographical information systems.
Prerequisite(s): (CIS*1300 or CIS*1500), MATH*1080 or MATH*1200
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the WRE specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering
ENGG*3370 Applied Fluids and Thermodynamics W (3-2) [0.50]
This course builds on the fundamentals of fluid dynamics and thermodynamics introduced in previous courses by looking at relevant applications. Topics to be covered include: heating, ventilation and air conditioning (HVAC); heat engine systems such as the Carnot cycle for refrigeration and heat pumps and the Rankine cycle for vapour power systems; compressible flow, turbomachinery such as pumps, turbines, and propellers; and an introduction to combustion.

Prerequisite(s): ENGG*2230, ENGG*2620
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the MECH specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3380 Computer Organization and Design W (3-2) [0.50]
This course contains a detailed examination of modern computer organization and techniques for microprocessor architecture design. Topics include - CPU design, instruction set design, addressing modes, operands; data flow design: internal bus structure, data flow signals, registers; control sequence design: hardwired control, decoding, microprogramming; architecture classes: CISC, RISC, and DSP; Memory organization; performance. Students must complete a term project that includes design, implementation, and demonstration of a CPU using a hardware descriptive language like VHDL.

Prerequisite(s): ENGG*2410
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the CENG specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3390 Signal Processing F (3-2) [0.50]
This course will establish the fundamental analysis and design techniques for signal processing systems. Topics covered include: definition and properties of linear time-invariant systems; impulse response and convolution; continuous-time Laplace transform, Fourier series, Fourier transform; discrete-time Fourier transform, discrete-time Fourier series, fast Fourier transform, Z transform; complex frequency response; filter analysis and design for both continuous and discrete time systems. Students will be able to design continuous-time filters and both design and implement discrete-time digital filters using computer-based tools.

Prerequisite(s): ENGG*2400
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BME, CENG and ESC specializations in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3410 Systems and Control Theory W (3-2) [0.50]
This course introduces the theory and techniques required to analyze and design of closed loop, automatic controllers for engineering systems, with applications in electrical, mechanical, and biomedical systems. Topics include modeling in time and frequency domains (including linear time invariance, causality, and linearization); sketching and interpreting Bode plots; stability of closed loop systems (including analysis via Rouih Hurwitz and Nyquist); performance metrics including gain and phase margin, sensitivity, and error tracking; and control using ON/OFF, PID, root locus, and frequency domain (lead/lag) techniques. Computer tools to aid in control design and analysis are a crucial component of the course. Optional advanced topics include but are not limited to state-space control, performance limitations, and control of non-linear systems.

Prerequisite(s): ENGG*2400, MATH*2270
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BME, CENG, ESC and MECH specializations in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3440 Process Control W (3-2) [0.50]
Students will learn about dynamic process behaviour and process control strategies relevant to biological and environmental engineering, including how to analyze, model, predict and control processes in time and frequency domains. Performance and stability parameters will be the Rankine cycle for vapour power systems; compressible flow, turbomachinery such as pumps, turbines, and propellers; and an introduction to combustion.

Prerequisite(s): ENGG*2400, MATH*2270
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BIOE and ENVF specializations in the BENG and BENG:C programs.
Department(s): School of Engineering

ENGG*3450 Electronic Devices F (3-2) [0.50]
This course explores the theory and principles of modern electronic devices and their applications in circuits. Course topics include: intrinsic and doped semiconductors; drift and diffusion currents; metal-semiconductor contacts and MOS capacitors; pn junctions and breakdown phenomena; solid-state diodes; bipolar and MOS field-effect transistors; current-voltage characteristics and biasing; small-signal models and operation; circuit integration; analysis and design of application circuits, operational transconductance amplifiers, and logic gates.

Prerequisite(s): ENGG*2450
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3470 Mass Transfer Operations W (3-2) [0.50]

Prerequisite(s): ENGG*2230, ENGG*2620, MATH*2270
Co-requisite(s): ENGG*3430
Department(s): School of Engineering

ENGG*3490 Introduction to Mechatronics Design W (3-2) [0.75]
This course covers the design of mechatronic systems, which are synergistic, combinations of components and controls drawn from mechanical engineering, electronics, and computer engineering. The course covers the following areas: (1) modeling of mechatronic systems (mechanical, electrical/electronic systems) and understanding their behaviour, (2) sensing and measurement including a variety of mechatronics sensors (fundamentals and applications), (3) actuators specific to mechatronics including motors and drivers (fundamentals and applications), (4) basic microcontroller programming as well as sensor/actuator integrations, and (5) control and its applications in mechatronics.

Prerequisite(s): ENGG*2340, ENGG*2450
Co-requisite(s): ENGG*3410
Department(s): School of Engineering

ENGG*3510 Electromechanical Devices F (3-3) [0.50]
The aim of this course is to develop an understanding of the electrical and electromechanical principles and their applications as devices used in engineering. The course covers magnetic fields of currents and coils; magnetic materials; magnetic circuits; induced, electric and magnetic fields (EMF), inductance, transformers magnetic forces, permanent magnets and electromagnets. The course examines the principles of variable-reluctance devices, stepper motors, moving-coil devices, direct current (DC) and alternating current (AC) motors. Semiconductors materials and devices, diodes, and transistors; principles of modern electronic devices and their applications in their circuits; as well as operational amplifiers and digital logics are also studied.

Prerequisite(s): ENGG*2450, PHYS*1101
Department(s): School of Engineering

ENGG*3570 MEMS and Microfabrication F (3-2) [0.50]
This course presents a broad survey of micro-electro-mechanical systems (MEMS) and microfabrication technologies. It covers silicon and non-silicon microfabrication techniques for microsensors, microactuators, and nanotechnology. It introduces CAD tools and mechanical and electrical issues in designing devices such as micromotors, grippers, accelerometers, and pressure sensors. It discusses limitations and challenges in design and fabrication of MEMS and enables the application of general micromachining principles to developing novel devices.

Prerequisite(s): ENGG*2450, PHYS*1101
Department(s): School of Engineering
ENGG*3590 Water Quality F (3-3) [0.50]

This course builds on the student's experience in chemistry, biology, physics and fluid mechanics, and provides an engineering perspective on: (i) standard methods of water quality analysis for physical, chemical and biological characteristics of water; (ii) significance and interpretation of analytical results; (iii) modeling of water quality in natural systems and (iv) introduction to engineered water and wastewater treatment systems.

Prerequisite(s): ENGG*2230, ENGG*2560, STAT*2120, (1 of BIOL*1040, BIOL*1090, MICR*1020, MICR*2420)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the ENVE and WRE specializations in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3640 Microcomputer Interfacing F (3-3) [0.50]

This course focuses on the subject of interfacing microcomputers to external equipment. Topics include peripheral devices, hardware interfaces, device driver software and real time programming. Advanced programming: debugging of embedded systems, data structures and subroutine calls, high-level system programming. Interrupts and resets, real time events, signal generation and timing measurements. Synchronous and asynchronous serial communication. Parallel I/O ports and synchronization techniques. I/O interfacing, microcomputer busses, memory interfacing and direct memory access (DMA). Data acquisition topics include signal conditioning analog to digital conversion and digital signal processing.

Prerequisite(s): ENGG*2410, ENGG*2450
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the CENG and ESC specializations in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*3650 Hydrology F (3-3) [0.50]

Quantitative study of natural water circulation systems with emphasis on basic physical principles and interrelationships among major processes; characteristics of mass and energy, inputs to and output from watersheds; factors governing precipitation occurrence, evaporation rates, soil-water storage changes, groundwater recharge and discharge, run-off generation; methods of streamflow analysis; mathematical modeling.

Prerequisite(s): (ENGG*2230 or MET*2100), (MATH*1210 or MATH*2080), (STAT*2120 or STAT*2040), and competency in computing.
Department(s): School of Engineering

ENGG*3670 Soil Mechanics F (3-2) [0.50]

Relations of soil physical and chemical properties to strength; soil water systems and interactive forces. Visco-elastic property and pressure-volume relationships of soil systems. Stress-strain characteristics of soil under dynamic loads. Application of engineering problems. Laboratory and field investigation methods.

Prerequisite(s): ENGG*2120, ENGG*2230
Department(s): School of Engineering

ENGG*3700 Optimization for Engineers F (3-2) [0.50]

This course serves as an introduction to optimization. Topics to be covered include but are not limited to: linear programming, sensitivity analysis, linear integer programming technique, dynamic programming, Markov chains, transportation method, decision analysis, and queuing theory.

Prerequisite(s): MATH*2130, MATH*2270, (CIS*1300 or CIS*1500)
Department(s): School of Engineering

ENGG*3830 Bio-Process Engineering F (3-1) [0.50]

Application of engineering principles to the processing of biological products in the biological and food industry. Analysis and design of unit processes such as sedimentation, centrifugation, filtration, milling and mixing involving rheology and non-Newtonian fluid dynamics of biological materials. Analysis of heat and mass balances for drying, evaporation, distillation and extraction.

Prerequisite(s): ENGG*2230, ENGG*2660
Co-requisite(s): ENGG*3260
Department(s): School of Engineering

ENGG*4000 Proposal for Engineering Design IV S,F (0-0) [0.00]

In this course students will prepare a proposal for the design project that will be completed in the Engineering Design IV course in their program of study. Teams normally of 3 to 4 students (single student groups not allowed) will prepare the proposal, providing details on the proposed project, identify the group members and identify the faculty advisor, who has a P.Eng.. Students are responsible for creating their own design group and securing a faculty advisor.

Prerequisite(s): ENGG*3100
Restriction(s): Registration in the semester preceding the last semester of the BENG Program. Instructor consent required. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*4030 Manufacturing System Design W (3-3) [0.75]

Students work in groups to design a manufacturing system to produce a specific product. Choices must be made about the materials to be used, the methods to manufacture each part of the product and the final assembly and/or packaging process. Attention is paid to economics and efficiency of the overall manufacturing system.

Prerequisite(s): ENGG*2180, ENGG*3070
Department(s): School of Engineering

ENGG*4040 Medical Imaging Modalities F (3-2) [0.50]

This course will introduce students to the fundamental concepts related to interaction of electromagnetic fields with body tissues. Topics include: physics of x-rays, ultrasound, gamma cameras, and ultrasound imaging. Emphasis will be on the underlying physics and computation, highlighting factors affecting image quality, patient safety, and clinical use.

Prerequisite(s): ENGG*3390 or PHYS*3130
Restriction(s): PHYS*4070
Department(s): School of Engineering

ENGG*4050 Quality Control W (3-2) [0.50]

The basics of quality management and quality control based on statistical and systems approaches are covered. Emphasis is placed on the tools of quality control and quality management and the use of statistical techniques to monitor and control system performance and quality.

Prerequisite(s): STAT*2120
Department(s): School of Engineering

ENGG*4060 Biomedical Signals Processing W (3-2) [0.50]

This course will cover the basic knowledge of medical imaging systems, how they operate and to what uses they can be applied. Systems covered will include x-ray radiography, computed tomography, magnetic resonance imaging, positron emission tomography, gamma cameras, and ultrasound imaging. Emphasis will be on the underlying physics and computation, highlighting factors affecting image quality, patient safety, and clinical use.

Prerequisite(s): ENGG*3390
Department(s): School of Engineering

ENGG*4070 Life Cycle Assessment for Sustainable Design W (3-2) [0.50]

This course will introduce students to the fundamental concepts related to interaction of electromagnetic fields with body tissues. Topics include: physics of x-rays, ultrasound, gamma cameras, and ultrasound imaging. Emphasis will be on the underlying physics and computation, highlighting factors affecting image quality, patient safety, and clinical use.

Prerequisite(s): ENGG*3390
Department(s): School of Engineering

ENGG*4080 Micro and Nano-Scale Electronics F (3-2) [0.50]

The purpose of this course is to describe the operating principles of analog integrated micro and nano electronic circuits and to teach how to design and use such circuits systems. Course topics include: device and circuit fabrication in silicon and non-silicon based technologies; operation and layout of active and passive elements; analog and switched-capacitor filters; analog-to-digital and digital-to-analog converters; amplifiers; oscillators and circuits for radio-frequency and optical communications; readout channels for integrated sensors, and analog integrated circuits for mechatronics and bioengineering. The main emphasis is on device models, circuit operation, and design techniques.

Prerequisite(s): ENGG*3450
Department(s): School of Engineering

Revision: 2020-2021 Undergraduate Calendar
ENGG*4090 Food and Beverage Engineering W (3-3) [0.75]
Students work in groups to design a system for manufacturing a specific food or beverage product. Choices are made about the specific processes to be used, the final packaging and marketing of the product. Attention is paid to the economics and efficiency of the overall production process.
Prerequisite(s): ENGG*3070, ENGG*3510, MICR*1020
Co-requisite(s): ENGG*2660, ENGG*4050, ENGG*4280
Department(s): School of Engineering

ENGG*4110 Biological Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Biological Engineering program. Teams normally of 3-4 students apply engineering analysis and design principles to a problem in a biological system or process. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.
Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*4120 Engineering Systems and Computing Design IV F,W (2-6) [1.00]
This is the capstone design course for the Engineering Systems and Computing program. Teams normally of 3-4 students apply engineering analysis and design principles to a problem involving control system, computer hardware or computer software technology. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.
Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*4130 Environmental Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Environmental Engineering program. Teams normally of 3-4 students apply engineering analysis and design principles to an environmental engineering problem. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.
Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*4140 Water Resources Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Water Resources Engineering program. Teams normally of 3-4 students apply engineering analysis and design principles to a problem involving water resources or wastewater engineering. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.
Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*4150 Computer Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Computer Engineering program. Teams normally of 3-4 students apply engineering analysis and design principles to a computer engineering problem. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.
Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

ENGG*4160 Biomedical Engineering Design IV F,W (2-6) [1.00]
This is the capstone design course for the Biomedical Engineering program. Teams normally of 3-4 students apply engineering analysis and design principles to a biomedical engineering problem. A completely specified solution at the level of preliminary or final design is required, including assessment of socio-economic and environmental impact. This is a small group design that requires reports and a poster presentation to a professional standard. Ethics and legal case studies relevant to professional engineering practice are presented during the lectures. Only students currently registered in ENGG*4000 will be permitted to select this course.
Prerequisite(s): All 1000 and 2000 level core courses and ENGG*4000
Restriction(s): Registration in semester 8 (last semester) of the BENG program and in a maximum of 3.25 credits registration. Students must have a minimum cumulative average of 60% or higher in ALL ENGG courses. Restriction waiver requests are handled by the Director, School of Engineering, or designate.
Department(s): School of Engineering

**ENGG*2420 Wireless Sensor Networks F (3-2) [0.50]**

This course focuses on the fundamentals behind the design of wireless sensor networks. Topics include node architecture, operating systems, protocols and applications for wireless sensor networks. The course emphasizes basic architectural framework including physical layer, medium access control layer and network layer. It also covers network management topics such as power management, time synchronization and localization. The course has a number of experiments with sensor network software and hardware. The primary focus of the experiments is to give students hands-on programming experience with various microcontrollers and sensing platforms.

Prerequisite(s): ENGG*3640
Restriction(s): ENGG*4650
Department(s): School of Engineering

**ENGG*2420 Interdisciplinary Mechanical Engineering Design W (3-3) [0.75]**

This is a general design course for students registered in the B. Eng. major in mechanical engineering who wish to develop a broad based mechanical engineering foundation. Students work in groups to develop a general mechanical engineering design. Special attention is paid to the sustainability of the design, its economic feasibility and overall efficiency.

Prerequisite(s): ENGG*3100
Department(s): School of Engineering

**ENGG*2423 Energy Conversion F (3-3) [0.75]**

The course introduces the technical criteria for the design of efficient energy conversion processes and systems. It covers review of boilers and cycles, fuel and combustion calculations, and fundamentals of both traditional and emerging energy conversion processes and systems for production of thermal, mechanical, and electrical energy. Topics include fossil, biomass, nuclear fuels, wind, solar, geothermal and fuel cells. Mechanisms for storing energy generated from each of these systems are also studied. The course also discusses conversion of automobile, renovation of old fossil fuel fired plant, co-firing of opportunity fuel, waste to energy technology, emission, and economics of energy projects.

Prerequisite(s): ENGG*3080, ENGG*3260
Restriction(s): ENGG*2050
Department(s): School of Engineering

**ENGG*2440 Site Remediation F (3-1) [0.50]**

Remediation of contaminated sites is done to mitigate impacts to the environment and public health. The course will: review the applicable legislation; identify the important soil, water, air and chemical interactions; review the steps of an environmental risk assessment so that contaminated sites can be identified and evaluated to see if remediation is required; and evaluate and appraise various remediation technologies to complete the soil and groundwater remediation.

Co-requisite(s): ENGG*3590, ENGG*3670
Department(s): School of Engineering

**ENGG*2450 Watershed Systems Design W (3-2) [0.75]**

This course is a hydrological analysis of watersheds including stream flow for design of structures and channels, flood warning, flood plain mapping and low-flow characteristics. Hydraulic analysis is applied to the design of dams, reservoirs, control structures, energy dissipation structures, bridges and culverts. An analysis of steady flow profiles, flood waves, and sediment transport is applied in the design of natural and constructed channels and protective works for rivers to achieve environmentally sustainable land use in watershed systems.

Prerequisite(s): ENGG*2230, ENGG*3650
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the WRE specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

**ENGG*2450 Food Processing Engineering Design W (3-2) [0.75]**

This course covers the design of various food processing operations and the physico-chemical and mechano-biological response of foods to such operations. Topics include: process evaluation; optimization of operations such as thermal and chemical processes; and rheological properties of various food forms.

Prerequisite(s): ENGG*3430 or FOOD*3170
Department(s): School of Engineering

**ENGG*3590 Solid and Hazardous Waste Management F (3-2) [0.50]**

Prerequisite(s): ENGG*2560 or ENGG*2660
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the ENVE specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

**ENGG*3660 Water-Site Conservation Systems Design F (3-2) [0.75]**

Properties of soils and land use governing the occurrence and magnitude of overland flow, soil erosion, infiltration, percolation of soil water, and variations in soil water storage. Design of soil and water management systems and structures to control soil erosion and protect water quality for environmentally and economically sustainable land use planning. Design of surface and subsurface drainage systems for rural land. Design of sprinkler and trickle irrigation systems.

Prerequisite(s): ENGG*2230, ENGG*3650, ENGG*3670
Department(s): School of Engineering

**ENGG*3680 Bio-reactor Design F (3-2) [0.75]**

This course covers the design of various bio-reactors and anaerobic fermentation processes and systems for production of thermal, mechanical, and electrical energy. It covers review of boilers and cycles, fuel and combustion calculations, and fundamentals of both traditional and emerging energy conversion processes and systems for production of thermal, mechanical, and electrical energy. Topics include fossil, biomass, nuclear fuels, wind, solar, geothermal and fuel cells. Mechanisms for storing energy generated from each of these systems are also studied. The course also discusses conversion of automobile, renovation of old fossil fuel fired plant, co-firing of opportunity fuel, waste to energy technology, emission, and economics of energy projects.

Prerequisite(s): ENGG*3080, ENGG*3260
Restriction(s): ENGG*2050
Department(s): School of Engineering

**ENGG*370 Urban Water Systems Design F (3-2) [0.75]**

Estimation of water quantity and quality needed for urban water supply and drainage. Design of water supply, pumping systems, pipe networks and distributed storage reservoirs from analysis of steady and transient, pressurized and free surface flow. Rates of generation of flows and pollutants to sanitary and storm sewers, design of buried pipe and open channel drainage systems with structures for flow and pollution control. Modeling of water systems for sustainable urban development.

Prerequisite(s): ENGG*2230, ENGG*3650
Department(s): School of Engineering

**ENGG*3750 Bio-instrumentation Design F (3-2) [0.75]**

Theory and selection criteria of devices used in measurements in biological systems; design of complete measurement systems including transducers, signal conditioning and recording components; error analysis. Differences between measurements in biological and physical systems.

Prerequisite(s): ENGG*3450
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the BIOC specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

**ENGG*4000 Biomechanical Engineering Design W (3-2) [0.75]**

This course covers concept development, design, modeling, manufacture and testing of biomechanical devices including athletic equipment, assistive devices, medical implants and tools. Other topics include the biomechanical factors influencing design, regulatory issues, current development trends, and the possible future direction of design and technology.

Prerequisite(s): 6.00 ENGG credits including ENGG*3150, ENGG*3170
Department(s): School of Engineering

**ENGG*4340 Real-time Systems Design F (3-3) [0.75]**

This course teaches real-time concepts from a system and computing perspective covering topics related to four major areas. Real-time computer control and system modeling area teaches basic real-time design and system modeling concepts for hard and soft real-time computer control applications. Real-time Operating Systems (RTOS) area introduces common kernel objects and inter-task communication and synchronization using examples from current commercial RTOS. Topics in the area of scheduling present theoretical results related to uniprocessor and multiprocessor scheduling algorithms and topics in the area of fault tolerance and reliability present current techniques at software and hardware level.

Prerequisite(s): ENGG*2400, ENGG*3640
Department(s): School of Engineering
ENGG*4430 Neuro-Fuzzy and Soft Computing Systems W (3-0) [0.50]
This course covers the basics of fuzzy systems, neural networks and neuro-fuzzy systems. The main focus is the concepts and algorithms of fuzzy sets, rules, and reasoning, as well as neural network structures, supervised learning and unsupervised learning of neural networks, and hybrid neuro-fuzzy systems. The applications of neural networks and fuzzy systems to control systems, signal processing, systems modeling and systems identification will be presented through examples.
Prerequisite(s): ENGG*3410
Department(s): School of Engineering

ENGG*4440 Computational Fluid Dynamics W (3-2) [0.50]
Computational methods for fluid mechanics form the core of the course. The concepts of modelling are covered including numerical analysis, the governing equations for fluid problems and finite discretization methods. Mathematical models for turbulence are presented and the student is exposed to the use of commercial software for the solution of complex problems in fluid dynamics.
Prerequisite(s): ENGG*2230, ENGG*3370
Department(s): School of Engineering

ENGG*4450 Large-Scale Software Architecture Engineering F (3-2) [0.50]
This course introduces the students to the analysis, synthesis and design of large-scale software systems at the architectural level. This is in contrast to the algorithmic and data structure viewpoint of most software systems. Large-scale software systems are complex, execute on many processors, under different operating systems, use a particular or many language(s) of implementation, and typically rely on system layers, network connectivity, messaging and data management and hardware interfacing. The material covered includes architectural styles, case studies, architectural design techniques, formal models, specifications and architectural design tools. The laboratory sessions will expose the students to analyzing and redesigning an existing large-scale software system.
Prerequisite(s): (CIS*2420 or CIS*2520), ENGG*2100
Department(s): School of Engineering

ENGG*4460 Robotic Systems F (3-3) [0.50]
This course covers robotic technology fundamentals, mathematical representation of kinematics, planning and execution of robot trajectories, introduction to robot languages, programming of robotic systems, different application domains for robots (e.g. assembly, manufacturing, medical, services, etc.), and robot sensors. The goal of this course is to provide students with a comprehensive background, approaches and skills to apply robotics technology to real world engineering applications and problems.
Prerequisite(s): ENGG*1500, ENGG*2400
Department(s): School of Engineering

ENGG*4470 Finite Element Analysis F (3-2) [0.50]
The theory of finite element analysis is presented including element derivation and solution procedures. Students use a finite element package to solve problems based on static and dynamic applications in mechanical systems. Examples are chosen from classical machines as well as biological systems.
Prerequisite(s): ENGG*2160, MATH*2130, MATH*2270
Department(s): School of Engineering

ENGG*4480 Advanced Mechatronic Systems Design W (3-3) [0.75]
The course is a follow up to the introductory mechatronics course and aims at covering advanced topics that are necessary in developing mechatronic systems. Topics include: signal conditioning and filtering for mechatronics system including advanced filters such as Kalman filters; important/advanced electronic circuits for mechatronics systems; microcontroller interfacing and programming; design and development of motion control for mechatronics systems including PLC; introduction of integrated complex mechatronics systems: concept, structure, and applications. Through a design project, students will use and apply these concepts in building a complex mechatronics system with advanced features.
Prerequisite(s): ENGG*3490
Department(s): School of Engineering

ENGG*4490 Sampled Data Control Design W (3-2) [0.75]
This course introduces the theory and techniques required to analyze, design, and implement sampled data controllers on real, continuous time systems. Topics include sampling, system identification and modeling, delay, state-space and frequency domain approaches to control; emulation methods, and direct z-domain methods. In the course project, students will apply the techniques discussed in class to design and implement a computer based controller for a real physical system, then compare the actual results obtained to the expected theoretical results and discuss sources of error and limitations of their approach.
Prerequisite(s): ENGG*3390, ENGG*3410
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the ESC specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*4510 Assessment & Management of Risk W (3-1) [0.50]
This course will develop the bases by which risk to human health and the environment can be assessed. Issues of hazardous waste cleanups, permitting of water and air discharges, food safety, flood protection, as examples, are addressed. The course also examines how decisions are made to manage the risks to acceptable levels.
Prerequisite(s): STAT*2040 or STAT*2120
Department(s): School of Engineering

ENGG*4540 Advanced Computer Architecture W (3-2) [0.50]
This course covers topics such as: basics of pipeline structure, advanced pipelining and instruction level parallelism, multiprocessor and thread-level parallelism, memory-hierarchy design (main memory, virtual memory, caches), storage systems, interconnection networks, multiprocessor architectures (centralized and distributed). Advanced topics related to new emerging computer architectures will also be presented. The emphasis in each topic is on fundamental limitations and the trade-offs involved in designing computer systems, including memory and processing bandwidth, network bandwidth and latency, synchronization, and storage system bandwidth and latency.
Prerequisite(s): ENGG*3380
Department(s): School of Engineering

ENGG*4550 Sustainable Energy Systems Design W (3-2) [0.50]
This course introduces the students to the analysis, synthesis and design of Very Large Scale integration (VLSI) digital circuits and implementing them in silicon. The topics of this course are presented at three levels of design abstraction. At device level: MOS diode; MOS (FET) transistor; interconnect wire. At circuit level: CMOS inverter; static CMOS gates (NAND, NOR); dynamic gates (NAND, NOR); static latches and registers; dynamic latches and registers; pipelining principles and circuit styles; BICMOS logic circuits. At system level; implementation strategies for digital ICs; interconnect at system level; timing issues in digital circuits (clock structures); the adder; the multiplier; the shifter; memory design and array structure; low power design circuits and architectures, approaches to control, emulation methods, and direct z-domain methods. In the course project, students will apply the techniques discussed in class to design and implement a computer based controller for a real physical system, then compare the actual results obtained to the expected theoretical results and discuss sources of error and limitations of their approach.
Prerequisite(s): ENGG*3490
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to the ESC specialization in the BENG and BENG:C programs. See department for more information.
Department(s): School of Engineering

ENGG*4560 Embedded System Design W (3-3) [0.75]
This course introduces the basic principles of embedded system design. It utilizes advanced hardware/software abstractions to help design complex systems. Topics include: design of embedded CPUs; embedded architecture cores; system-on-chip designs and integration using processor cores and dedicated core modules; embedded computing platforms; embedded programming design and analysis; processes and operating systems; networks for embedded systems; distributed embedded architectures; design examples that target robotics, automobile, and communication systems.
Prerequisite(s): ENGG*3380 or ENGG*3640
Department(s): School of Engineering

ENGG*4580 Sustainable Energy Systems Design W (3-3) [0.75]
The analysis and design of sustainable energy systems are presented in this course. Techniques considered include generation of alternative designs to satisfy a problem definition; evaluation of alternative designs; application of modeling simulations and cost analyses.
Prerequisite(s): ENGG*3080, ENGG*3370, ENGG*3430
Department(s): School of Engineering

<td>ENGG*4660</td>
<td>Medical Image Processing W (3-2) [0.50]</td>
<td></td>
<td>This course covers the fundamentals of medical image processing. Image processing topics covered include: fundamentals of resolution and quantization; linear systems as applied to multi-dimensional continuous and discrete systems; point operations such as contrast enhancement and histogram equalization; geometric operations for distortion correction, including interpolation methods; linear filtering in both the spatial and spatial-frequency domains; and image restoration and inverse filtering. Image segmentation is covered in the framework of pattern recognition using single and multiple dimensional features, and includes the fundamental Bayes classifier as well as machine learning methods for both supervised and unsupervised learning.</td>
<td>ENGG*3390</td>
<td>School of Engineering</td>

English
School of English and Theatre Studies

1. ENGL*1080 and ENGL*2080 provide a strong foundation for English studies at the University level and are required courses for students intending to major or minor in English. These linked courses expose students not only to a broad range of texts from different countries and historical periods but also to some of the exciting developments in the discipline.

2. Honours major students are required to take the seminar courses ENGL*2120, ENGL*2130, ENGL*3940, ENGL*3960; preferably in their 3rd, 4th, 5th and 6th semesters. ENGL*1080 is a pre-requisite to ENGL*2120 and ENGL*2130; ENGL*2080 is a pre-requisite to ENGL*3940 and ENGL*3960.

3. Honours major students are required to take one 4000-level seminar, preferably in their 7th and 8th semesters. The prerequisites for the 4000-level seminars are ENGL*2080 plus one of ENGL*2120, ENGL*2130 plus one of ENGL*3940, ENGL*3940, ENGL*3960.

4. Honours minor students are required to take the seminar course ENGL*2120 and one of ENGL*2130, ENGL*3940, ENGL*3960, preferably in their 3rd to 6th semester.

5. Many English lecture courses are offered in alternate years only and many English seminars have variable content. For more information, students should consult the School's home page at http://www.arts.uoguelph.ca/sets/.

6. Many English lecture courses are reading-intensive while seminar courses are writing and presentation-intensive. Honours major students are advised to take two lectures and one seminar per semester beginning in their 3rd semester.

7. WRITING- AND PRESENTATION-INTENSIVE: Seminars emphasize written and oral work to help students develop the critical reading and writing skills essential to their learning throughout the curriculum.

8. READING-INTENSIVE: Lectures emphasize breadth of reading, contexts, and comparisons, to help students develop the knowledge base essential to their understanding of the field. In order to allow essay-writing to be concentrated in seminars, assignments in lecture courses will not predominantly take the traditional essay form but a range of other formats.

9. Students can register in a maximum of 2.00 credits in English at the 4000 level.

ENGL*1030 Effective Writing S,F,W (3-0) [0.50]
This course is designed primarily for those not pursuing a specialization in English and focuses on the development of the skills for effective writing. Topics will include sentence and paragraph structure, essay organization, and the implementation of convincing written arguments. Students will apply these skills to the completion of several written assignments, culminating in a short work of non-fiction prose.
Offering(s): Also offered through Distance Education format.
Department(s): School of English and Theatre Studies

ENGL*1080 Literatures in English I: Reading the Past F,W (3-0) [0.50]
This course is focused on the disciplinary skill of close reading and is intended for students planning to specialize in the study of English Literature. Through a series of case studies, the course introduces students to a range of historical and national writings in prose, poetry, and drama, and to some of the key terms and concepts in contemporary literary studies. Lectures and discussions address selected works from the Middle Ages onwards, the periods in which these works were produced, and some of the ways in which these texts have been or could be interpreted. ENGL*1080 and its companion course, ENGL*2080, are required for a major or minor in English. Students are encouraged to enrol in ENGL*2080 in the semester after they have completed ENGL*1080. Reading- and writing-intensive course.
Restrictions: This is a priority access course. Enrollment in the fall semester may be restricted to students registered in the English major, minor, area of concentration, Creative Writing minor, or in semesters one or two of the BA or BAS program.
Department(s): School of English and Theatre Studies

ENGL*1200 Reading the Contemporary World F,W (3-0) [0.50]
This course, which is designed primarily for those not planning a specialization in English, introduces students to literary texts and persuasive forms of writing, bringing to the forefront some of the links between language and contemporary social and political issues. Course materials will represent diversity in terms of national origins, gender, race, and class. The course emphasizes the use of figurative language as well as the development of students’ critical reading and writing skills. Students planning to major or minor or pursue an area of concentration in English must take ENGL*1080 and ENGL*2080, but may also take ENGL*1200 and count it as an elective lecture.
Offering(s): Also offered through Distance Education format.
Department(s): School of English and Theatre Studies

ENGL*1410 Major Writers U (3-0) [0.50]
This course, which is designed primarily for those not planning a specialization in English, offers an introduction to the study of literature through a chronological consideration of works by selected major authors from the Middle Ages to the present century, in relation to their social, intellectual and literary backgrounds. The course emphasizes the use of figurative language as well as the development of students’ critical reading and writing skills. Students planning to major or minor or pursue an area of concentration in English must take ENGL*1080 and ENGL*2080, but may also take ENGL*1410.
Department(s): School of English and Theatre Studies

ENGL*1590 Medicine and Literature W (3-0) [0.50]
This course explores the representational and cultural practices concerning health care and the body. Students will examine how literary texts represent, interpret, and critique the cultures of biomedical science, the clinic, and the hospital. Areas of interest include disease, illness, health, disability, and psychological and physiological trauma.
Department(s): School of English and Theatre Studies

ENGL*2040 Latina/o Literature and Cultural Production: Intro F (3-0) [0.50]
This survey course introduces students to the terms, methodologies, and debates that form the interdisciplinary critical practice of Latina/o Studies. The course takes a pan-Latina/o approach to the study of English-language and cultural production by various Latina/o(s) primarily in the U.S. Because different Latina/o(s) have been concentrated in particular U.S. regions and cities, the approach allows students to study how Latina/o literature and art have shaped the politics and culture of different regions and cities.
Reading-intensive course.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): ENGL*1080
Equates: ENGL*2060
Department(s): School of English and Theatre Studies

ENGL*2080 Literatures in English II: Finding a Critical Voice F,W (3-0) [0.50]
This course revisits the historical, national, and genre sweep of ENGL*1080 by conducting a range of specific, more in-depth studies of particular works (including some of the texts examined in ENGL*1080) in their historical moments. Seminars help students to develop a range of critical approaches through oral presentations and essay-writing. Students are encouraged to enroll in ENGL*2080 in the semester after they have completed ENGL*1080.
Prerequisite(s): ENGL*1080
Restriction(s): ENGL*3020, ENGL*3120
Department(s): School of English and Theatre Studies

ENGL*2090 Studies in Shakespeare W (3-0) [0.50]
This course focuses on Shakespeare as both a writer and an enduring cultural presence. It may, at the instructor’s choice, focus on works by Shakespeare as well as works by others in response to Shakespeare, in Shakespeare’s original historical context or in more contemporary contexts. The course may address, among others, genre, performance, adaptation, the politics of Shakespearean interpretation, including issues such as gender, subjectivity, empire, and nation. Reading-intensive course.
Prerequisite(s): ENGL*1080
Restriction(s): ENGL*3020, ENGL*3120
Department(s): School of English and Theatre Studies

ENGL*2120 Seminar: Critical Practices F,W (3-0) [0.50]
This course guides students through a range of critical approaches and explores their implications for readings of a limited number of literary texts. The seminar’s main areas of concentration are: (1) close reading, centering on the way a particular poem, work of fiction, or play works in its details and overall structure; (2) critical approaches and methodologies; (3) critical writing and discussion. (Choices of approaches and texts will be determined by individual instructors.) Writing- and presentation-intensive course.
Prerequisite(s): ENGL*1080
Restriction(s): Registration in the English major, minor or area of concentration, or minor in Creative Writing.
Department(s): School of English and Theatre Studies

ENGL*2130 Seminar: Literature and Social Change F,W (3-0) [0.50]
This course explores the social and cultural work that literary texts perform. Seminars will illuminate such categories as gender, sexuality, nation, race, ethnicity, and class; particular ways in which they are written into a limited number of literary works; and some of the critical debates surrounding our interpretations of those processes. (Choices of approaches and texts will be determined by individual instructors.) Writing- and presentation-intensive course.
Prerequisite(s): ENGL*1080
Restriction(s): Registration in the English major, minor or area of concentration, or minor in Creative Writing.
Department(s): School of English and Theatre Studies

2020-2021 Undergraduate Calendar
Revision.
ENGL*2190 Queer Literatures and Cultures W (3-0) [0.50]
This course examines the ways in which gender, sexuality, and identity politics are addressed, critiqued, and shaped by queer literature, performance and media. This course will consider the meanings of “queer” itself and explore how queerness intersects with race, class, gender, sex, and other forms of social difference.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2200 Postcolonial Literatures, Film, and Other Media F (3-0) [0.50]
This course introduces students to contemporary literatures, film, and other media that engage with the impact of European colonization on eighty-five percent of the globe. The course may include material from Africa, Australia, the Americas, the Caribbean, the Indian Subcontinent, and the Pacific. Reading-intensive course.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2260 Law and Literature F (3-0) [0.50]
This course introduces students to the intersections between law and literature. The course encourages students to read literary texts by focusing on issues of justice, crime, judgment, and equity. Students will examine how literature can serve as an alternative cultural arena or site that gives voice to experiences and knowledges that cannot be translated into the law’s language of equivalence and neutrality. By reading literary texts in relation to the law, students will examine how literature and literary theory can enhance our understanding of the law.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2270 Fairy, Trickster, and Mythical Hero F (3-0) [0.50]
This course focuses on the everyday emergence of the fantastic, the otherworldly, and the extraordinary in commonly told cultural narratives such as the fairy tale, trickster tale and myth. The course may focus on tales of specific regions (e.g. Europe, North America, the South Pacific), and may cross a range of genres (oral tale, pantomime, short story, film, graphic novel) as well as historical periods. The course may also address continuities and discontinuities in versions of traditional narratives created by tellers, writers, and other artists.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2280 Sporting Bodies W (3-0) [0.50]
This course examines various aspects of sports and play as they are manifested in a range of literary texts and other cultural forms. Because the emergence of sport as a social practice has been so intertwined with notions of regulation, performance, and fandom, sporting culture offers a valuable site for looking at questions of identity and social relations more broadly.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2290 Outlaws W (3-0) [0.50]
Literary narratives about crime and the criminal have both glamorized the outlaw and idealized the restoration of law and order. Students will examine how literary narratives frame the figure of the outlaw in order to: contemplate the relationship between the individual and law, as well as between outlaw communities and the law; shape popular understandings of the law and the consequences of breaking the law; interrogate the law’s absolute claim to justice; examine the cost of policing to maintain law and order; and/or critique state power by giving voice to the marginalized.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2310 Vampires, Ghosts, and Mummies: Literature and the Supernatural F (3-0) [0.50]
While we often dismiss the occult or the supernatural in literature as simple entertainment, this course encourages students to examine how literary works engage the occult and the supernatural in order to address issues of power, race, gender, imperialism and modernity from the nineteenth century to the present.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2330 Print Culture and Cinema F (3-0) [0.50]
This course moves between writing and cinema, in different periods and with different emphases according to the instructor’s expertise. Topics may include: adaptation from page to screen and adaptation theory; the relationship between print forms and early motion picture and between fiction and film; the construction of celebrity and spectacles in print and movie cultures; questions of “fidelity,” technology, silence and sound, literary prestige and film publicity. Reading-intensive course.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2360 Medieval Literature W (3-0) [0.50]
This course introduces students to the literature of the English Middle Ages. Students will read both Old English texts (such as Beowulf and The Wanderer) and Middle English texts (such as Sir Gawain and the Green Knight and selections from The Canterbury Tales) alongside non-literary medieval texts—histories, guides to religious living, and philosophical tracts—that together work to reveal the cultural context in which medieval writers worked. The class will also include representative medieval drama (mystery plays and/or morality plays) and works by and about women (such as the works of Marie de France and Margery Kempe).
Offering(s): Offered in even-numbered years.
Prerequisite(s): 2.00 credits
Restriction(s): ENGL*3560
Department(s): School of English and Theatre Studies

ENGL*2370 Literature and Community-Engaged Learning F (3-0) [0.50]
This community-engaged learning (CEL) course aims to foster relationships between students and various community partners (local historical societies, art galleries, hospitals, schools, media outlets, and service organizations) in order for students to connect their study of literature with local community histories, needs, and cultural productions. Through internships, field trips, archival research, interviews, and/or service, students will produce research for public dissemination (talks, conferences, exhibits, publications, podcasts, performances, etc.).
Offering(s): Offered in even-numbered years.
Prerequisite(s): 2.00 credits
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to students registered in the English major or minor, or Creative Writing minor.
Department(s): School of English and Theatre Studies

ENGL*2550 North American Native Literatures W (3-0) [0.50]
This course explores selected issues, perspectives, and voices within the study of Native literatures and their contexts in North America. One purpose of the course is to raise questions about the meaning of the U.S.-Canadian border for Native writers. Reading-intensive course.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2640 Culture, Location, Identity: Minoritized Literatures in Canada and Beyond F (3-0) [0.50]
This course will open up debates around emergent issues, perspectives, and voices in the literatures of minoritized cultures particularly within the North American context. Questions about the meanings of various borders for understanding Canadian negotiations of identity, culture, and location will remain a consistent feature of this variable content course. Reading-intensive course.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2740 Children's Literature F,W (3-0) [0.50]
This variable-content course will involve the study and discussion of poems, stories, novels and plays by and about women. Reading-intensive course.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2740 Children's Literature F,W (3-0) [0.50]
This variable-content course will involve the study and discussion of poems, stories, novels and plays by and about women. Reading-intensive course.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

ENGL*2880 Women in Literature W (3-0) [0.50]
This course examines the ways in which gender, sexuality, and identity politics are addressed, critiqued, and shaped by queer literature, performance and media. This course will consider the meanings of “queer” itself and explore how queerness intersects with race, class, gender, sex, and other forms of social difference.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.00 credits
Department(s): School of English and Theatre Studies

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Course Hours</th>
<th>Notes</th>
</tr>
</thead>
</table>
| ENGL*2920  | Elements of Creative Writing F,W (3-0) [0.50] | 4.00 credits | This course focuses on teaching character, dialogue, setting and plot. Students will learn how to create a compelling narrative, as well as recognize the key elements in the narratives that surround us, for example advertisements, blogs, or film, television, etc. Student skills are developed through a combination of lectures, in-class workshops, peer editing, and short written assignments.
| ENGL*3050  | Intermediate Fiction Workshop F,W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | Students will gain a deeper understanding of the basic elements of creative writing (character development, effective dialogue, narrative arc, and setting) through practical experiments, discussions, and group writing exercises. Through the writing workshops, students will hone their skills as creative writers, critical thinkers, and editors.
| ENGL*3060  | Intermediate Poetry Writing Workshop F (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | Students will gain a deeper understanding of the basic elements of poetry writing (form, line, metre, imagery, rhyme, rhythm, syntax, and metaphor). Alongside this attention to form, students will explore the histories of these global poetics and their relationship to historical developments. Through reading assigned texts and the writing workshops, students will hone their skills as creative writers, critical thinkers, and editors.
| ENGL*3070  | Intermediate Screenwriting Workshop W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | With emphasis on craft, this workshop addresses some fundamentals of feature screenwriting through various writing, reading and viewing assignments and exercises, as well as the workshopping of students' written work. Topics will include: story structure, theme, character development, story lines, scene construction, synopsis writing and pitching, and options for further training and development.
| ENGL*3080  | History and Linguistics of the English Language W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This course introduces the key historical developments of the English language and the primary tools for the study of language. Students will learn the rudiments of morphology, phonology, and syntax of the English language from the earliest periods to the present day. Topics to be discussed may include: the origins of and precursors to the English language; lexicon and grammar of English; the persistence of language change; the historical factors that affect language change; the origins and implications of language variety; the formation of prestige dialects; and the current state of the English language in Canada and the world. Reading-intensive course.
| ENGL*3090  | Special Topics in Creative Writing Workshop F,W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This course will provide students with opportunities to write in genres other than fiction, poetry, playwriting and screenwriting. Each iteration will focus on a particular genre, which might include graphic novels, writing narrative of games, memoir or travel writing. Please consult the School of English and Theatre Studies’s website for more information on a specific iteration of the course.
| ENGL*3220  | Representing Britain: 18th- & 19th-Century Literature W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This course explores selected topics in the interrelation of literature and politics from the late seventeenth to the nineteenth century in Britain. Areas of focus may include: the literature of civil war, constitutionalism and revolution; satire and society; writings emerging from sufferage reform and agitation, the colonization of Ireland, the construction of political subjectivity, political paranoia, conspiracy and sedition. Reading-intensive course.
| ENGL*3240  | Studies in Early Modern Literature and Culture W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This course examines various aspects of the literature and culture of early modern England. The course may examine, at the instructor's choice, some part of the fifteenth, sixteenth and seventeenth centuries and may focus on a variety of issues, including gender and sexuality, poets and politics, religion and authority, nation and empire, and their relation to literary production. The genres and writers examined will vary.
| ENGL*3300  | Restoration to Romanticism: Forging the Nation F (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | Drawing upon a range of literary texts from a variety of genres, this course will explore the politics of language and style in a series of cultural debates that shaped British national character from the late seventeenth to the late eighteenth centuries. Selected topics may include: literary representations of religious establishment and dissent; the division of power; the question of minority cultures; revolution and reaction; the problem of economic stability. Reading-intensive course.
| ENGL*3320  | Romanticism to Victorianism: Culture and Conformity F (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This course explores the key texts in various genres of British cultural debates of the late eighteenth to the late nineteenth century. Focal points may include: literary representations of family and society; science and narrative; Britain's "others"; class and conflict; protest and power; the roots of modernism; European influences. Reading-intensive course.
| ENGL*3340  | British Imperial Culture F (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This multi-genre course introduces students to the literature of British imperialism in the eighteenth and nineteenth centuries. The course will consider the changing relationship between nation, empire, and colony by examining literary representations of such topics as: orientalism; travel writing; the construction of race; the representation of trade; the popular literature of empire; children's literature; the question of the other. Reading-intensive course.
| ENGL*3380  | Studies in the History of Literary Production W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This course will examine a range of issues arising from the materiality of book production and circulation. Topics may include serialization; mass production and circulation; patronage; reviewing; circulating libraries; licensing; censorship; children's literature; periodicals; gift books; letters; and other aspects of publishing and the public sphere. Reading-intensive course.
| ENGL*3420  | 20th- & 21st-Century Drama W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This course offers a selective study of 20th- and/or 21st-century play-scripts written in English. Students are advised to consult the web-descriptions for the particular focus of the course's offering.
| ENGL*3460  | Literature in London U (2-3) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | A study of British literature in its social and historical context. Reading of particular works will be supported by visits to sites of literary interest, the use of special library and museum collections, and attendance at public lectures and performances. For London Semester students only.
| ENGL*3470  | Twentieth-Century British Literature I W (3-0) [0.50] | 7.50 credits including 0.50 credits in English (excluding ENGL*1030) | This multi-genre course explores aesthetic and socio-cultural movements (including modernism) in British literature from the turn of the century to mid-century. Reading-intensive course.

<td>ENGL*3540</td>
<td>Writing the United States W (3-0) [0.50]</td>
<td>This multigenre course explores the relationship between literary production and political power from the emergence of U.S. culture through the long nineteenth century. Areas of focus may include national fantasy; the literatures of war, imperial expansion, captivity, and genocide; narratives of race and immigration; the cult of domesticity; and the rise of mass culture. Reading-intensive course.</td>
<td>Offered in odd-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3550</td>
<td>Modern United States Literatures W (3-0) [0.50]</td>
<td>This multigenre course explores powerful examples of modern United States literatures, from about the First World War to the present. The selection is wide, including both traditional and experimental forms; female and male writers from various ethnic and racial groups; and a range of cultural issues. Reading-intensive course.</td>
<td>Offered in odd-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3570</td>
<td>Chaucer in Context F (3-0) [0.50]</td>
<td>This course will introduce students to significant aspects of Chaucer's writing read in the context of works by Chaucer's precursors and near contemporaries. Reading-intensive course.</td>
<td>Offered in even-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3630</td>
<td>Writing Canada: Forging the Nation W (3-0) [0.50]</td>
<td>This multigenre course focuses on Canadian literature to World War One, examining cultural contestation in the Canadian settler colony among the Canadian, U.S., British, and indigenous peoples. Topics may include the rise of nationalist discourse, race and nation, landscape and the sublime, gothic, sentimental, and historical fiction, children's literature, slavery and resistance narratives, travel and captivity narratives. Reading-intensive course.</td>
<td>Offered in odd-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3680</td>
<td>20th- &amp; 21st-Century Canadian Literature and Criticism F (3-0) [0.50]</td>
<td>This course examines Canadian literature and criticism in English from the beginnings of the twentieth century to the present in relation to a variety of social, cultural, and historical contexts. Reading-intensive course.</td>
<td>Offered in odd-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3690</td>
<td>History of Literary Criticism F (3-0) [0.50]</td>
<td>This course introduces students to the major critics and texts formative in the development of an English critical tradition. The study will begin with Plato and Aristotle, and proceed from the Renaissance through to modernist critical theory.</td>
<td>Offered in odd-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3750</td>
<td>Studies in Postcolonial Literatures W (3-0) [0.50]</td>
<td>This course is a concentrated study in a major sub-area of postcolonial literature. Specific topics will vary each year, but may involve focus on a particular genre or region such as Africa, Australia, Canada, the Caribbean, India, and the Pacific. Reading-intensive course.</td>
<td>Offered in even-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3760</td>
<td>The Atlantic World W (3-0) [0.50]</td>
<td>This is a variable content course aimed at considering the intercultural effects which emerge from transnational, colonial, imperial, and/or diasporic relations, through literatures in English addressing the Atlantic and contiguous lands. Texts will be selected from among the rich array of poetry, fiction, memoirs, letters, travel accounts, period histories and ethnographies, autobiographies and folkloric records that formed the literary culture of this period. Attention may be paid to diverse forms of oral and written expression, linguistic changes, the Creole continuum, representations of oceanic space, the erasure and fluidity at work in the metaphors of the sea, the evolution of national and racial stereotypes, and religious syncretism. Reading-intensive course.</td>
<td>Offered in even-numbered years.</td>
<td>7.50 credits including 0.50 credits in English (excluding ENGL*1030)</td>
<td></td>
<td>School of English and Theatre Studies</td>
</tr>
<tr>
<td>ENGL*3780</td>

</table>
ENGL*4240 Medieval & Early Modern Literatures U (3-0) [1.00]
This seminar provides the opportunity for intensive study of British literature from the beginnings to 1660. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4040 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4250 18th- & 19th-C Literatures U (3-0) [1.00]
This seminar provides the opportunity for intensive study of British literature from 1660 to 1900. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4050 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4270 United States Literatures U (3-0) [1.00]
This seminar provides the opportunity for intensive study of United States literatures. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4070 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4280 Canadian Literatures U (3-0) [1.00]
This seminar provides the opportunity for intensive study of Canadian literatures. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4080 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4310 Special Studies in English U (3-0) [1.00]
A seminar designed to provide students in semesters 7 and 8 with an opportunity to pursue studies in an area or areas of language or literature not available in other courses. The course may be taught by a visiting professor or members of the school.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4100, ENGL*4110 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4400 Postcolonial Literatures U (3-0) [1.00]
This course provides the opportunity for intensive study of a representative selection of literature in English by writers from Africa, India, the Caribbean, Australia, and the Pacific. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4200 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4410 Modern & Contemporary Literatures U (3-0) [1.00]
This course provides the opportunity for a study of significant works in fiction, poetry, and drama that demonstrate new approaches in form and content characteristic of 20th- and 21st-century writings in English. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4210 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4420 Women’s Writings U (3-0) [1.00]
This course provides for intensive study of issues relating to the aesthetic strategies, such as those associated with structure, imagery, and language, devised by women writers to reflect women's experience and perceptions. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4220 Restricted to students in the English majors, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4500 Non-fiction Prose U (3-0) [1.00]
This course offers an intensive study of non-fiction prose. Topics to be explored may include the roles and contexts of public and/or private writing, the role of literary criticism in reading texts sometimes marked as non-literary, the history of non-fictional prose forms, or the formal or ideological uses of the distinctions between fact and fiction.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4300 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

ENGL*4720 Creative Writing: Prose/Poetry F,W (3-0) [1.00]
A development and extension of the creative writing/reading skills and techniques introduced in the creative writing workshops. This course will involve the generation and revision of challenging new work, sophisticated critique of the work of other students, and focused discussion of the cultural, social, and political issues in which the practice of creative writing is enmeshed.
Prerequisite(s): 1 of ENGL*2920, ENGL*2940, ENGL*3050, ENGL*3060, ENGL*3070, ENGL*3090
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specialization or semester levels during certain periods. Please see departmental website for more information.
Department(s): School of English and Theatre Studies

ENGL*4810 Directed Reading S,F,W (3-0) [0.50]
This course is intended particularly as preparation for ENGL*4910. The student will design a course of readings and assignments with the instructor, whose consent must first be obtained. This option is intended only for students who have performed particularly well within the honours program. Exceptional students may take ENGL*4810 in preparation for a ENGL*4910 creative writing project, on the approval of the instructor.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): Instructor consent required.
Department(s): School of English and Theatre Studies

ENGL*4880 20th- & 21st-Century Poetry U (3-0) [1.00]
This seminar provides opportunities to study English-language modern and contemporary poetry. Students are advised to complete a 3000-level lecture course in this subject area prior to enrolling in the 4000-level course.
Prerequisite(s): ENGL*2080, (ENGL*2120 or ENGL*2130), (ENGL*3940 or ENGL*3960)
Restriction(s): ENGL*4680 Restricted to students in the English major, who have completed 14.00 credits with an average of 70% in all course attempts in English. Students can register in a maximum of 2.00 credits in English at the 4000 level.
Department(s): School of English and Theatre Studies

### ENVM*3500 Environmental Management Integrated Project W (5-0) [1.00]

Students will apply the skills and knowledge gained in earlier courses to analyzing environmental processes and issues associated with an industrial, municipal, or agricultural enterprise. Students will work in teams to complete a detailed environmental report with policy recommendations and action plans.

- **Prerequisite(s):** 5.00 credits
- **Restriction(s):** ENVM*2500 Registered in BBRM:EM
- **Department(s):** School of Environmental Sciences
Environmental Sciences

School of Environmental Sciences

Department of Food, Agricultural and Resource Economics

The program in Environmental Sciences is interdisciplinary, involving courses from several different departments. See the B.Sc.(Env.) program information in Section X—Undergraduate Degree Programs.

ENVS*1030 Introduction to Environmental Sciences F (6-0) [1.00]
This course introduces students to what it means to think critically from an environmental sciences perspective. It covers an introduction to: philosophy of science, philosophy of the environment, the evaluation of scientific evidence, and scientific arguments. The course focuses on how we understand and recognize environmental problems, how we decide what to do about them, and what role science can and should play in these discussions.
Restriction(s): ENVS*1100 Registration in the BSC(Env) program or BBRM.EM
Department(s): School of Environmental Sciences

ENVS*1060 Principles of Geology S,F,W (3-0) [0.50]
This course provides an introduction to geological principles, their historical development and application to interpreting Earth materials and processes. This course is suitable for those wishing a general knowledge of Earth sciences.
Offering(s): Offered through Distance Education format only.
Equate(s): GEOL*1100
Restriction(s): May not be taken for credit by students in BBRM, BSC or BSC(Env).
Department(s): School of Environmental Sciences

ENVS*1100 Fundamentals of Environmental Sciences F (3-0) [0.50]
This course introduces students to what it means to think critically from an environmental sciences perspective. It covers an introduction to: philosophy of science, philosophy of the environment, the evaluation of scientific evidence, and scientific arguments. The course focuses on how we understand and recognize environmental problems, how we decide what to do about them, and what role science can and should play in these discussions.
Restriction(s): ENVS*1030 Not available to students registered in BSC(Env) program and BBRM.EM
Department(s): School of Environmental Sciences

ENVS*2030 Meteorology and Climatology F (3-2) [0.50]
This course examines solar and terrestrial radiation; pressure systems and winds; atmospheric stability and vertical motions; air masses and fronts; clouds and precipitation; selected topics in applied meteorology including air pollution. The laboratory emphasizes the analysis and use of atmospheric data for solving environmental problems.
Prerequisite(s): 1 of IPS*1500, MATH*1080, MATH*1200, PHYS*1070, PHYS*1080, PHYS*1130, PHYS*1300
Department(s): School of Environmental Sciences

ENVS*2040 Plant Health and the Environment W (3-0) [0.50]
This is an interdisciplinary course on the nature and importance of diseases, insects and abiotic stresses on plant productivity and quality. A case history approach will be used to illustrate the biology of plant pests, the principles of pest population management, and related topics.
Prerequisite(s): BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090)
Equate(s): ENVB*2040
Department(s): School of Environmental Sciences

ENVS*2060 Soil Science S,F (3-2) [0.50]
This course is an introduction to the principles of soil science - the origin of soils, their classification and interpretation in natural and modified environments. Soil will be studied as a product of the natural environment, with a focus on formation processes and changes which occur when it is modified through use. A variety of uses including agriculture, forestry, recreation, and urban development will be considered.
Prerequisite(s): BIOL*1090
Equate(s): SOIL*2010
Restriction(s): AGR*2320.
Department(s): School of Environmental Sciences

ENVS*2070 Environmental Perspectives and Choice F (3-0) [0.50]
This is an interdisciplinary approach to environmental issues which offers opportunities to investigate social processes and philosophical considerations with respect to the position and influence of humankind, and the development of social conditions, values and economic activities that have led to our present situation. These investigations are carried out within the context of physical environmental considerations, such as the state of the earth, forests, air, water and our use of energy, and will lead the student to a detailed consideration of the future.
Offering(s): Offered through Distance Education format only.
Department(s): School of Environmental Sciences

ENVS*2080 Introduction to Environmental Microbiology W (2-3) [0.50]
This course will introduce students to environmental microbiology, with a focus on the important roles of microorganisms in various environments such as soil, water and sediments. Discussion will emphasize the physiology, biochemistry, molecular biology and ecology of microorganisms, and how a good understanding of these microbial processes can enable beneficial applications of microorganisms in biotechnology and bioremediation.
Prerequisite(s): BIOL*1070, BIOL*1090
Restriction(s): ENVM*1020, ENVS*2320
Department(s): School of Environmental Sciences

ENVS*2090 Problem Solving in Environmental Biology W (2-2) [0.50]
This course provides an introduction to current issues and problems in environmental biology. Approaches to characterizing and addressing problems through the systematic application of the scientific method will be critically examined. Students will have the opportunity to practice both oral and written presentation skills.
Prerequisite(s): BIOL*1070, BIOL*1090, CHEM*1050, MATH*1080
Department(s): School of Environmental Sciences

ENVS*2120 Introduction to Environmental Stewardship F (3-0) [0.50]
This course provides an introduction to the concepts of resource management, environmental planning and assessment, land stewardship and sustainable development. Case studies of specific issues such as parks and natural heritage conservation, agricultural land loss, and integrated rural resources management will provide insight on approaches to decision making. Included will be discussion of the concept of stewardship as an environmental ethics.
Offering(s): Offered through Distance Education format only.
Department(s): School of Environmental Sciences

ENVS*2130 Eating Sustainably in Ontario F,W (3-0) [0.50]
This course is intended to introduce students to the science behind food related issues within the context of Ontario agriculture and food systems. The course will provide students with an overview of the history of agriculture in Ontario and an opportunity to discuss both sides of current debates over food production and associated environmental and human health issues.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4.00 credits
Restriction(s): May not be taken by students in the BAS, BBRM, BSC, BSC(Agr) or BSC(Env) programs
Department(s): School of Environmental Sciences

ENVS*2210 Apiculture and Honey Bee Biology F,W (3-0) [0.50]
This course is designed to acquaint the student with the broad field of beekeeping. It will include honey bee biology and behaviour, management for honey production, products of the hive, pests and enemies and the value of bees as pollinators of agricultural crops.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): ENVB*2210
Department(s): School of Environmental Sciences

ENVS*2220 Communications in Environmental Science F (4-0) [0.50]
This course provides students with direct training in the academic skills used in researching and communicating environmental science. Within the context of current problems in environmental science, students will develop skills in library research, statistical interpretation, oral and poster presentation and written communication to diverse audiences. Students will research and report on scientific issues within environmental issues being reported in the media.
Prerequisite(s): 1 of ENVM*1000, ENVM*1200, ENVS*1030
Restriction(s): Registration in BBRM, BSC(Env) or BSC(Agr) programs.
Department(s): School of Environmental Sciences
ENVS*2240 Fundamentals of Environmental Geology F (3-3) [0.50]
This course introduces the concepts and real-world examples of environmental issues related to plate tectonics, natural resources and igneous, metamorphic and sedimentary processes and rocks, groundwater and structural geology. Students will develop laboratory skills in rock and mineral identification, geological map interpretation and site characterization.

Prerequisite(s): GEOG*1300
Restriction(s): ENVS*1050
Department(s): School of Environmental Sciences

ENVS*2250 Geology of Natural Disasters S,W (3-0) [0.50]
This course will offer insight into the mechanisms of natural geological disasters and their effects on Planet Earth, human civilization and life in general. Events before, during and after geological disasters such as earthquakes, volcanic eruptions, meteorite impact and climate change will be the focus of this course. This course will not count as a science credit for B.Sc. students.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of ENVS*1050, ENVS*1060, GEOL*1050, GEOL*1100, GEOG*1300, GEOG*1350
Equate(s): GEOL*2250
Department(s): School of Environmental Sciences

ENVS*2270 Impacts of Climate Change F,W (3-0) [0.50]
This course will provide students with an overview of recent research into what climate change means for Canada and Canadians. Students will learn about evidence for significant changes to the Boreal forests and about the potential impacts of climate change on human health through increasing heat waves and the heat stress on individuals. The course is intended to bridge the gap between abstract discussion of the climate and understanding what these changes mean at both personal and societal levels.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): Minimum of 4.00 credits
Restriction(s): May not be taken by students in the BAS, BBRM, BSC, BSC(Agr) or BSC(Env) programs
Department(s): School of Environmental Sciences

ENVS*2310 Introduction to Biogeochemistry W (4-0) [0.50]
This course explores quantitatively and qualitatively how biological processes control element fluxes between water, air, and earth materials. Students will gain an understanding of the cycles for major elements (C, N, P, S etc.) in Earth’s surface environments, including soil, rivers, lakes and oceans. Topics of current interest, such as resource extraction, climate change and geoengineering will be discussed in terms of their contributions to major element cycles. Seminars include quantitation exercises, hands-on exercises, and discussions to complement topics covered in the lectures.

Prerequisite(s): BIOL*1070, CHEM*1040
Department(s): School of Environmental Sciences

ENVS*2330 Current Issues in Ecosystem Science and Biodiversity F (4-0) [0.50]
This course provides an introduction to a range of specific environmental and scientific issues relating to ecological sciences. Issues to be covered include the biology of climate change, forest science and management of terrestrial ecosystems. Three examples of current problems of societal concern will be used as starting points to examine the role of science in addressing them, while developing students’ knowledge of the underlying science and its relation to policy and economics.

Prerequisite(s): 1 of BIOL*1050, BIOL*1070, ENVM*1000, ENVM*1200, ENVS*1030
Equate(s): ENVB*2330, ENVS*2150
Restriction(s): ENVB*3330, ENVS*2150
Department(s): School of Environmental Sciences

ENVS*3000 Nature Interpretation F,W (2-3) [0.50]
This course explores communication and experiential learning theories and their application to natural history interpretation and environmental education program design and delivery. Students will develop interpretive materials, plan an interpretive walk and deliver the interpretive walk to a community group.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): BIOL*2060
Equate(s): ENVB*3000
Department(s): School of Environmental Sciences

ENVS*3010 Climate Change Biology S,F (3-0) [0.50]
This course examines the impacts of climate change on living organisms, biological communities and ecosystems. The course focuses on what is known, and what is not known, about the ways in which the suite of changing climate variables influence biological systems.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090), CHEM*1040
Equate(s): ENVB*3010
Department(s): School of Environmental Sciences

ENVS*3020 Pesticides and the Environment F,W (3-0) [0.50]
This course examines the role and use of pesticides by various facets of society and the effect of these pesticides on biological activities in the environment. Preparation of a research proposal is required for the course.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of ENVS*1050, BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090), CHEM*1040
Equate(s): ENVB*3030
Department(s): School of Environmental Sciences

ENVS*3040 Natural Chemicals in the Environment F (3-0) [0.50]
This course explores the roles of naturally occurring chemicals in the interrelationships of organisms, and the historical and current uses of natural chemicals by humans for agricultural and medicinal purposes.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of ENVS*1050, BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090)
Equate(s): ENVB*3040
Department(s): School of Environmental Sciences

ENVS*3050 Microclimatology W (3-0) [0.50]
This course examines natural and intentionally-modified microclimates near the earth’s surface; energy budgets; transport of mass and heat. Familiarization with some instruments for microclimatric measurements will be required.

Prerequisite(s): ENVS*2030
Department(s): School of Environmental Sciences

ENVS*3060 Groundwater W (3-0) [0.50]
This course provides a general understanding of the physical and chemical processes that operate in the groundwater zone under natural and human-induced conditions. The interrelations between the groundwater regime and the other components of the hydrological cycle are studied. Considerable emphasis is placed on the applied aspects of topics such as exploration, testing and development of aquifers for water supply, the chemical quality of groundwater, and the hydrogeological aspects of waste disposal.

Prerequisite(s): AGR*2320 or ENVS*2060
Department(s): School of Environmental Sciences

ENVS*3080 Soil and Water Conservation F (3-0) [0.50]
This course examines the processes leading to deterioration of soil and water quality, the impact of deterioration on use, and preventative or corrective measures: soil erosion by water and wind, soil compaction and salinization, drainage channel maintenance, sedimentation and nutrient enrichment of water, conservation programs and policies, and reclamation of severely disturbed soils and saline-sodic soils. Emphasis will be on concepts and solutions to problems in a systems approach.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of AGR*2320, ENVS*2060, ENVS*2060, SOIL*3080
Equate(s): SOIL*3080
Department(s): School of Environmental Sciences

ENVS*3090 Insect Diversity and Biology W (3-3) [0.50]
This course is an overview of insect diversity and biology emphasizing groups of importance in conservation biology, outdoor recreation and economic entomology. Labs focus on insect identification and the development of a small insect collection.

Prerequisite(s): BIOL*1040 or (2 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090)
Equate(s): ENVB*3090
Department(s): School of Environmental Sciences
ENVS*3140 Forest Biodiversity W (4-0) [0.50]
This course examines biodiversity in forest ecosystems at a variety of scales from genes to landscapes. Relationships between biodiversity and forest ecosystem structure, function, and stability are explored. Approaches to conserving biodiversity in managed forests are discussed and evaluated. Analysis of the relevant scientific literature and practical experience with methods of quantifying biodiversity are emphasized in the weekly seminar.
Prerequisite(s): 1 of BIOL*2060, BOT*3050, ENVS*2330
Equate(s): ENVB*3270
Department(s): School of Environmental Sciences

ENVS*3150 Aquatic Systems W (3-2) [0.50]
In this course students will be taught how to apply quantitative methods to the analysis of aquatic systems of the earth from many simultaneous perspectives. The material will include the physical, chemical and biological components of the various liquid surficial structures and processes and also how they interact with humans. The economic, social and policy implications of humans interacting with aquatic systems will also be emphasized. The history of the analysis of aquatic systems will be systematically included in the material.
Prerequisite(s): 10.00 credits including (BIOL*1030, BIOL*1040) or (BIOL*1070, BIOL*1090), CHEM*1040
Restriction(s): BIOL*3450
Department(s): School of Environmental Sciences

ENVS*3180 Sedimentary Environments F (3-3) [0.50]
This course examines the principles of sedimentology and stratigraphy as applied to various ancient and modern sedimentary systems. Students will learn to describe and interpret sedimentary deposits in terrestrial and marine systems as well as the larger forces that control the preservation and evolution of these sedimentary systems over geological time. The course includes several field trips.
Prerequisite(s): ENVS*1050 or ENVS*2240
Restriction(s): ENVS*2400
Department(s): School of Environmental Sciences

ENVS*3210 Plant Pathology F (2-3) [0.50]
This course examines the nature of disease in plants, including their causal agents, etiology, biology, epidemiology, and management. Emphasis is placed on the historical and social importance of plant diseases, and on current issues in plant health. Each student is required to make a collection of 20 plant disease specimens. Students must contact the course instructor before starting their collection.
Prerequisite(s): 1 of BIOL*1040, BIOL*1050, BIOL*1070
Equate(s): ENVB*3210
Department(s): School of Environmental Sciences

ENVS*3220 Terrestrial Chemistry F (4-0) [0.50]
This course surveys the behaviour of elements in the Earth's surface environments, encompassing soils and saturated (wetland, lake, river) sediments. The course is focused on understanding the factors that control the chemical processes governing soils and freshwater sediments through the reactions of the elements and molecules that they contain. Students will extend their fundamental understanding of chemistry to the materials of the Earth's upper crust.
Prerequisite(s): CHEM*1050, (1 of ENVS*1050, ENVS*2060, ENVS*2240)
Department(s): School of Environmental Sciences

ENVS*3230 Agroforestry Systems F (2-2) [0.50]
The planned and systematic integration of trees into the agricultural landscape can potentially result in sustainable environmental, ecological, economic and social benefits. The key aspects of deriving these benefits, associated science and management considerations, application potentials at the landscape level and adoption challenges will be discussed. Common temperate and tropical agroforestry systems (e.g. intercropping of trees and crops) will be discussed. Emphasis will be given to successful research and development case studies.
Prerequisite(s): 5.00 credits, (1 of BIOL*1040, BIOL*1050, BIOL*1070)
Equate(s): ENVB*3230
Department(s): School of Environmental Sciences

ENVS*3250 Forest Health and Disease F (2-2) [0.50]
The impact of beneficial and pathogenic microorganisms on forest health, and the biology and management of tree diseases in natural and urban ecosystems is covered in this course. Emphasis will be placed on ecological processes, host-pathogen interactions, mutualistic associations, wood decay, and human impacts on tree health.
Prerequisite(s): 1 of BOT*2100, ENVB*2030, ENVS*2040, ENVS*2330
Equate(s): ENVB*3250
Department(s): School of Environmental Sciences

ENVS*3270 Forest Biodiversity W (4-0) [0.50]
This course examines biodiversity in forest ecosystems at a variety of scales from genes to landscapes. Relationships between biodiversity and forest ecosystem structure, function, and stability are explored. Approaches to conserving biodiversity in managed forests are discussed and evaluated. Analysis of the relevant scientific literature and practical experience with methods of quantifying biodiversity are emphasized in the weekly seminar.
Prerequisite(s): 1 of BIOL*2060, BOT*3050, ENVS*2330
Equate(s): ENVB*3270
Department(s): School of Environmental Sciences

ENVS*3300 Introduction to Controlled Environment Systems W (3-0) [0.50]
Canada is among the world's leading providers of research and technology development devoted to "biological life support" for humans on long duration space exploration missions. Students will be exposed to the broad scope of research activities and infrastructure at the U of G's Controlled Environment Systems Research Facility which represents Canada's main contribution to this field internationally. Discussions will focus on the technical challenges faced by space explorers and how the solutions relate to knowledge and technology transfer to Earth-based problems in issues from the environment to the economy. Students will prepare papers and discussions on relevant topics.
Prerequisite(s): BIOL*1050 or BIOL*1070
Department(s): School of Environmental Sciences

ENVS*3310 Soil Biodiversity and Ecosystem Function W (4-0) [0.50]
Soils are the site of complex interactions between minerals, water, air, organic matter and living organisms. This course will focus on the organisms that live in the soil and their activities in soil ecosystems, soil as a habitat for organisms, the key role of microorganisms in nutrient cycles and plant-microbe relationships and will review basic soil microbial and ecological principles.
Prerequisite(s): 10.00 credits including (1 of AGR*2320, ENVS*2060, SOIL*2010)
Equate(s): ENVS*3200, SOIL*3200
Department(s): School of Environmental Sciences

ENVS*3340 Environmental Data Analysis F (2-3) [0.50]
This course is focused on interpreting data of the physical environment. Students will access various online databases, such as meteorological and hydrological time series, and perform and interpret statistical analysis with the data. Issues around errors and data collection will be explored by performing simple experiments. Students will make a numerical simulation of a dynamic environmental phenomenon. Students will produce and interpret graphical presentations of data.
Prerequisite(s): 1 of ECON*2740, GEOG*2460, STAT*2040, STAT*2060, STAT*2230
Department(s): School of Environmental Sciences

ENVS*3370 Terrestrial Ecosystem Ecology W (3-0) [0.50]
In this course, the ecosystem is the biological level of organization of interest. Living organisms and their physical environment are considered as components of an integrated system. Key ecosystem processes such as energy flow, carbon and nutrient cycling, and succession, and the controls on these processes, are examined. The impacts of human activity and global change on ecosystem structure and function are investigated.
Prerequisite(s): BIOL*2060 or ENVS*2330
Department(s): School of Environmental Sciences

ENVS*4000 Toxicological Risk Assessment W (3-0) [0.50]
This advanced course will give students a working knowledge of current processes and techniques for toxicological risk characterization. The course material will cover problem definition, effect characterization, exposure characterization, risk assessment and risk management decision making.
Prerequisite(s): TOX*2000
Department(s): School of Environmental Sciences
ENVS*4010 Project in Environmental Sciences F (3-0) [0.50]

First part of the two-semester course ENVS*4011/2. The course permits the student the opportunity to integrate both the skills and knowledge acquired in earlier courses through application to current environmental problems and issues. Group research problems and exposure to critical environmental policy issues will form the core elements of the course. This is a two-semester course offered over consecutive semesters. When you select it you must select ENVS*4011 in the Fall semester and ENVS*4012 in the Winter semester. A grade will not be assigned to ENVS*4011 until ENVS*4012 is completed.

Equate(s): ENVS*4011
Restriction(s): 12.00 credits, Registration in the BSC(Env) program.
Department(s): School of Environmental Sciences

ENVS*4002 Project in Environmental Sciences W (3-0) [0.50]

This is the second part of the two-semester course ENVS*4011/2. The course permits the student the opportunity to integrate both the skills and knowledge acquired in earlier courses through application to current environmental problems and issues. Group research problems and exposure to critical environmental policy issues will form the core elements of the course. This is a two-semester course offered over consecutive semesters. When you select it you must select ENVS*4011 in the Fall semester and ENVS*4012 in the Winter semester. A grade will not be assigned to ENVS*4011 until ENVS*4012 is completed.

Prerequisite(s): ENVS*4011
Equate(s): ENVS*4012
Department(s): School of Environmental Sciences

ENVS*4030 Ecological W (3-0) [0.50]

This course introduces the emerging discipline of ecological, which focuses on interactions and feedbacks between the elements of the water cycle, ecosystems and organisms. The emphasis will be on how hydrological processes regulate ecological ones but also on the mechanisms of ecological regulation of hydrological processes – which are often ignored in traditional hydrologic investigations. Students will learn about complex dynamics prevailing in ecological systems using a blend of theory, quantitative tools and case studies. Students will also learn to synthesize recent literature, collect and analyze relevant data from open-access databases, and perform holistic ecological system analysis through a term project.

Prerequisite(s): (BIOL*3130 or GEOG*3610), (1 of GEOG*2460, STAT*2040, STAT*2060, STAT*2120, STAT*2230)
Department(s): School of Environmental Sciences

ENVS*4070 Pollinator Conservation W (3-0) [0.50]

This course will explore the ecology of pollination with an emphasis on the roles animals play in pollen movement. Students will critically examine hypothesized drivers of regional, national and global pollinator declines, and the range of potential strategies suggested to mitigate or reverse these declines. Students will examine the efficacy of a wide range of pollinator conservation strategies in different geographical, ecological and economic contexts to help them build an understanding of the available toolbox for conservation.

Prerequisite(s): BIOL*3130
Department(s): School of Environmental Sciences

ENVS*4090 Soil Management F (3-1) [0.50]

A lecture-tutorial course on the practical aspects of soil management for crop production as they relate to the physical, chemical and biological properties of soils. Major emphasis is placed on soil fertility as related to field soil properties and fertilizer, lime and manure use, soil and plant testing for mineral nutrients. The beneficial aspects of drainage, irrigation, erosion control and related tillage practices on soil fertility are also presented. Due regard is given to both economic and environmental aspects of soil management practices.

Prerequisite(s): 1 of AGR*2301/2, AGR*2320, ENVS*2060, SOIL*2010
Equate(s): SOIL*4090
Department(s): School of Environmental Sciences

ENVS*4100 Integrated Management of Invasive Insect Pests W (3-3) [0.50]

This course explores the concept of integrated pest management as it applies to the mitigation of invasive insect pests associated with agricultural and forest ecosystems.

Prerequisite(s): 1 of CROP*3300, CROP*3310, ENVB*2040, ENVB*3090, ENVS*2040, ENVS*3090, HORT*3280, HORT*3350, HORT*3510
Equate(s): ENVB*4100
Department(s): School of Environmental Sciences

ENVS*4160 Soil and Nutrient Management F (4-3) [0.50]

This course consists of the same lectures and seminars as (ENVS*4090 or SOIL*4090), but with an additional laboratory. The laboratory portion will focus on the regulatory requirements as stated under the Nutrient Management Act, 2001. Students will discuss nutrient management issues and gain practical experience using the NMAN software program.

Prerequisite(s): 1 of AGR*2301/2, AGR*2320, ENVS*2060, SOIL*2010
Equate(s): SOIL*4130
Restriction(s): ENVM*1070, (ENVS*4090 or SOIL*4090)
Department(s): School of Environmental Sciences

ENVS*4180 Insecticide Biological Activity and Resistance W (4-0) [0.50]

This course explores the diverse modes of action of botanical, microbial and synthetic insecticides. Detoxification mechanisms, selectivity, resistance management and the process of pesticide discovery and development are also considered. The course includes a review of insect physiological systems and discussion of the stability and distribution of pesticides in the environment.

Offering(s): Offered in even-numbered years.
Prerequisite(s): Minimum of 12.00 credits
Restriction(s): ENVB*4240, Registration in the BAS, BBRM, BSC(Env) program.
Department(s): School of Environmental Sciences

ENVS*4190 Biological Activity of Herbicides F (3-0) [0.50]

This course explores the diverse modes of action of botanical, microbial and synthetic herbicides. Detoxification mechanisms, selectivity, resistance management and the process of herbicide discovery and development are also considered. The course includes a review of plant physiological systems and discussion of the stability and distribution of herbicides in the environment.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): Minimum of 12.00 credits
Restriction(s): ENVB*4240, Registration in the BAS, BBRM, BSC(Env) program.
Department(s): School of Environmental Sciences

ENVS*4210 Meteorological and Environmental Instrumentation W (3-0) [0.50]

This course covers the design and implementation of measurement systems for atmospheric and environmental studies. Principles of operation and practical consideration of various meteorological and soil sensors will be discussed along with overall design and implementation procedures for environmental monitoring. Students will propose and perform a small independent experiment or field measurement of their own design.

Prerequisite(s): 1 of ENVS*3050, ENVS*3130, ENVS*3340, PHYS*3100
Equate(s): MET*4210
Department(s): School of Environmental Sciences

ENVS*4230 Biology of Aquatic Insects F (2-3) [0.50]

This course is a study of the adult and immature forms of aquatic insects. Students are required to present a collection of at least 200 insect specimens identified to genus. 

Offering(s): Offered in odd-numbered years.
Prerequisite(s): ENVB*3090 or ENVS*3090
Equate(s): ENVB*4220
Department(s): School of Environmental Sciences

ENVS*4260 Field Entomology FW (1-6) [0.50]

This course is taught in late April or May. Students may enroll in either the preceding Winter semester or following Fall semester. The course provides an introduction to insect identification, observation, habitat evaluation, and experimentation in field settings. Student activities are divided equally between observing, collecting and identifying specimens from more than 20 families and an experimental component involving one or more studies to test hypotheses about the ecology or behaviour of insects. There are occasional lectures and discussions to highlight particularly interesting observations of insects. Student evaluation is based on the student's insect collection and associated logbook, a written report describing their experiment, contributions to class discussions and activities, and peer evaluation. The field site is generally in the USA or South America. Course fees cover costs of room, board, supplies, and transportation to the field site(s). This course must be recorded as part of the student's Fall or Winter course selection and tuition and compulsory fees will be calculated accordingly. Detailed information is available from the Office of the Director - School of Environmental Sciences.

Prerequisite(s): ENVB*3090 or ENVS*3090 or (ENVB*4040 or ENVS*4040)
Equate(s): ENVB*4260
Restriction(s): Instructor consent required.
Department(s): School of Environmental Sciences
ENVS*4320 Laboratory and Field Methods in Soil Biodiversity W (1-3) [1.00]
This course will use a hand-on approach to investigate concepts and develop skills needed for understanding key soil functions. Emphasis will be on the transformation of nutrients and contaminants in soils and groundwater by microorganisms. Approaches for analyzing microbial populations and activities in the environment, including molecular techniques will be covered.  
Prerequisite(s): ENVS*3200 or ENVS*3310  
Department(s): School of Environmental Sciences

ENVS*4350 Forest Ecology F (3-3) [0.50]
This course will explore aspects of forest ecology with an emphasis on the ecological principles needed for sound forest management. Biotic and abiotic components of forest ecosystems will be discussed in the context of energy flow, nutrient cycling, forest succession and appropriate silvicultural systems.  
Prerequisite(s): BIOL*2060 or ENVS*2330  
Equate(s): ENVB*4780  
Department(s): School of Environmental Sciences

ENVS*4360 Glacial Environments W (4-0) [0.50]
This course will explore modern to ancient glacial environments, focusing on the sedimentary record they leave behind and applications of glacial geology including reconstructing past environments, examining how glacial deposits affect the distribution of resources or groundwater contaminants, and discovering the response of glaciers to recent and past climate change. Students will develop skills in critically evaluating literature and geological data, description and identification of glacial deposits.  
Prerequisite(s): ENVS*2400 or ENVS*3180  
Department(s): School of Environmental Sciences

ENVS*4370 Natural and Anthropogenic Compounds in the Environment W (3-0) [0.50]
This course discusses the chemical processes that influence organic compounds in the air, water, and soil. The relationships between anthropogenic compounds (pollutants, pesticides, etc.), natural organic matter (humic materials, dissolved organic matter, biomolecules) and environmental quality will be discussed. Topics include: the persistence and degradation of contaminants in the environment, environmental analysis, environmental forensics, organic aerosols, aquatic dissolved organic matter, and soil organic matter.  
Prerequisite(s): 1 of CHEM*3360, ENVS*3020, ENVS*3220, TOX*3360  
Department(s): School of Environmental Sciences

ENVS*4390 Soil Variability and Land Evaluation F (3-2) [1.00]
This course integrates formal in-field (including a two-day camp & excursions during orientation week) and laboratory training, with classroom discussions of concepts, to guide independent group projects on the gathering and interpreting of soilscape information. The principal focus is on soil, as a spatially- and temporally-variable product and component of ecosystems; special consideration is given to the factors controlling soil processes, from local to global scales. An examination of methods, for describing and quantifying the distribution of soils, includes survey and sensor-based techniques, in conjunction with data trend analysis and modelling. Students are required to notify the instructor in the preceding Winter semester of their intention to participate.  
Prerequisite(s): 15.00 credits including (1 of AGR*2320, ENVS*2060, ENVS*2310, ENVS*2340, SOIL*2010)  
Restriction(s): ENVS*3120, ENVS*4150, ENVS*4250, SOIL*4250  
Department(s): School of Environmental Sciences

ENVS*4410 Introduction to Advanced Independent Research S,F,W (1-0) [0.50]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to provide senior undergraduate students with an introduction to independent research work. The course includes work with a faculty advisor to develop a research project, formulate hypotheses/objectives, design and conduct preliminary experiments to test the hypotheses. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.  
Prerequisite(s): Minimum of 10.00 credits. Minimum cumulative average of 70%.  
Restriction(s): Registration in BSC(Env), BSC(Agr), BSC(H) or BBRM. Instructor consent required.  
Department(s): School of Environmental Sciences

ENVS*4420 Advanced Independent Research S,F,W (1-0) [0.50]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to provide a research intensive experience. This course is designed to be the completion of the research proposal developed in ENVS*4410. In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to provide a research intensive experience. This course is designed to be the completion of the research proposal developed in which the course is taken.  
Prerequisite(s): ENVS*4410. Minimum cumulative average of 70%.  
Restriction(s): ENVS*4430. Registration in BSC(Env), BSC(Agr), BSC(H) or BBRM. Instructor consent required.  
Department(s): School of Environmental Sciences

ENVS*4430 Advanced Independent Research S,F,W (0-12) [1.00]
In this course the student will undertake an independent research project of a practical or theoretical nature that relates to environmental sciences and is conducted under the supervision of a faculty member. This course is designed to be the completion of the research proposal developed in ENVS*4410 by the student in consultation with a faculty advisor. This course can be selected in place of ENVS*4420 if the student and faculty advisor deem the project to be of sufficient scope to necessitate a 1.00 credit course. Students must arrange with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.  
Prerequisite(s): ENVS*4410. Minimum cumulative average of 70%.  
Restriction(s): ENVS*4420. Registration in BSC(Env), BSC(Agr), BSC(H) or BBRM. Instructor consent required.  
Department(s): School of Environmental Sciences

ENVS*4510 Topics in Environmental Sciences S,F,W (0-0) [0.50]
This course provides an opportunity for students to engage in advanced independent research and study. Students will undertake a project based on research in the literature that relates to environmental sciences. Projects will be designed to be completed in a single semester. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A school registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the course is taken.  
Prerequisite(s): Minimum of 10.00 credits. Minimum cumulative average of 70%.  
Restriction(s): Restricted to students in the BBRM, BSC(Agr), BSC(H). Instructor consent required.  
Department(s): School of Environmental Sciences

Revision: 2020-2021 Undergraduate Calendar
XII. Course Descriptions, Equine

EQN*1010 Introduction to Equine Management F (2-6) [1.00]
This course provides the basis for understanding the equine industry, both from a practical and a theoretical perspective. Students will participate in daily routine care and management procedures, and learn basic techniques such as horse handling, grooming, bandaging, blanketting, tack, tractor driving and fire safety. Horse-environment interactions will focus on equine behaviour. The relationship of horses with humans will be explored from ancient through to modern times, including breeding for specific equestrian sports, prominent horsemen/women, and the variety of career options. Current issues will be explored including economic status and hot topics in the industry. Students may expect early morning and some weekend assignments. Students must provide their own grooming kit.
Restriction(s): ENVM*1090, EQN*1020, EQN*1030, EQN*1100 Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*2040 Equine Anatomy and Physiology W (3-3) [0.50]
This course examines the gross anatomy and physiology of the horse. All the major body organs will be studied in relation to their function in the equine. Comparative analysis will be made to other domestic farm animals.
Prerequisite(s): BIOL*1050
Restriction(s): Registration in BBRM.EQM, BSC(Agr).AGRS, and BSC.ABIO. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods.
Department(s): Department of Animal Biosciences

EQN*2050 Introduction to Equine Nutrition W (3-3) [0.50]
This course introduces fundamental concepts of nutrition from a biochemical perspective. The biological roles of carbohydrates, lipids and proteins are studied, as well as the role of metabolic pathways in maintaining equine health at the cellular, organ, and whole body levels. Diagnosis, management, and prevention of equine nutritional diseases are discussed.
Prerequisite(s): BIOL*1050
Restriction(s): Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*2080 Equine Event Management F (5-0) [1.00]
This course will introduce skills required to organize equine events, such as horse shows, clinics and conferences. Major topics include event planning, budgeting, promotions, sponsorship, managing event staff and volunteers, legacies and environmental impacts of events. Required activities outside of regularly scheduled class hours will be assigned. Students will assist in the planning and staging of equine events either on or off campus.
Prerequisite(s): EQN*1010
Equated(s): EQN*2060, EQN*2070
Restriction(s): Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*2150 Equine Facility Management and Design W (3-2) [0.50]
This course introduces students to the design, development and management of an equine facility. Aspects of the building, renovating and management of horse facilities including site planning and interior design are presented. Special consideration is given to environmental control, waste management and environmental stewardship. Management topics include theoretical and practical skills, interacting with people, recruiting, supervising, motivating, training employees, effective listening, dealing with difficult people, group dynamics and leadership.
Restriction(s): AGR*2100, EQN*1050, EQN*2020 Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*2200 Equine Industry Trends and Issues I F (3-0) [0.50]
This course discusses selected current global, national and regional issues in the horse industry. Analysis of strengths, weaknesses, opportunities and threats are applied to controversial issues in classroom discussions and reflective critical thinking.
Prerequisite(s): EQN*1010
Restriction(s): Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*2500 Equine Field Course F (0-4) [0.50]
In this 10-day field course, students will tour a selected area, visiting premier equine educational and industry locations managed by elite professionals. Students are exposed to a broad, high caliber learning experience from a variety of industry operations, providing a catalyst for future courses in the BBRM degree program. An additional fee will be assessed per student to cover the cost of transportation and accommodation. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Contact course instructor during the preceding March course selection period.
Prerequisite(s): EQN*1050 or EQN*2150
Restriction(s): Registration in BBRM.EQM. Instructor consent required.
Department(s): Department of Animal Biosciences

EQN*3060 Equine Reproduction W (3-3) [0.50]
Students will develop a solid foundation in reproductive endocrinology and physiology in the stallion and the mare, emphasis on physiology, breeding management and recognition of common reproductive problems in stallion, mare or foal. Practical experience includes dissection of reproductive tracts, semen collection and evaluation.
Prerequisite(s): BIOL*1090, EQN*2040
Restriction(s): Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*3070 Equine Health Management W (3-3) [0.50]
This course asks the equine student to apply principles of management to knowledge of the equine industry, equine facility design, biological systems and equine anatomy and physiology. The role of management in the optimization of the health of the horse is critical to success in the industry. Fundamental principles of horse health will be introduced including important indicators of individual and herd health, record keeping and the role of management in disease causation. Application of current, scientifically based management principles and techniques will ask the student to develop both proactive and reactive decision making skills in the context of equine health management.
Prerequisite(s): EQN*2040
Restriction(s): Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*3250 Equine Exercise Physiology F (3-3) [0.50]
This course considers the conversion of absorbed nutrients into metabolic fuels and the use of these substrates for work and heat production in horses. Practical application of theoretical knowledge develops an understanding for the basic physiological principles of muscle contraction and fatigue, thermoregulation, and energy utilization under differing exercise intensities, and how these principles can be applied to differential training strategies for equine athletes.
Prerequisite(s): ANSC*3080 or (EQN*2040, EQN*2050)
Equated(s): EQN*3050, EQN*3150
Restriction(s): Registration in BBRM.EQM, BSC(Agr) and BSC.ABIO. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods.
Department(s): Department of Animal Biosciences

EQN*4020 Advanced Equine Nutrition W (3-0) [0.50]
This course focuses on the nutrition of horses at peak levels of performance or endurance. The use of real-world, case-study scenarios allows for the evaluation of practical feeding programs across a range of equine performance situations.
Prerequisite(s): EQN*2050 or NUTR*3210
Department(s): Department of Animal Biosciences

EQN*4040 Equine Industry Trends and Issues II F (3-0) [0.50]
This seminar course integrates discussion on selected current global, national and regional issues in the equine industry, building upon knowledge gained in earlier courses. Current issues in the equine industry will be examined through debate and discussion.
Prerequisite(s): 12.50 credits including EQN*2200
Restriction(s): Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

EQN*4500 Equine Integrated Project F (0-6) [1.00]
This course facilitates education, communication and an exchange of ideas between students and equine businesses to enhance the development of the equine industry and its leaders. Student teams work together with an existing equine enterprise to develop and carry out a hands-on research project that is of benefit to the business owner. Students apply the knowledge gained in preceding courses in a holistic approach to the project as a culmination of their learning.
Prerequisite(s): 15.00 credits
Restriction(s): EQN*3500, Registration in BBRM.EQM
Department(s): Department of Animal Biosciences

**EURO*4740 Research Project in European Studies F,W (3-0) [0.50]**

An independent study course that requires a research project on an aspect of European Studies. The topic must be approved by the Coordinator of the European Studies Program. Research is undertaken with the guidance of a faculty advisor, and seminar presentations will be included. A final research paper must be written in the student's chosen core language. Note: In order to demonstrate language proficiency and complete the requirements of EURO*4740, students have another option. They may choose to spend their third year studying at a European university, in the country where their chosen core language is spoken. Those who can demonstrate that they have successfully written a major academic paper or exam in their chosen core language while registered in a course at a European university as part of their approved study year will be waived from EURO*4740. See the Coordinator for the European Studies program for more information.

**Prerequisite(s):** 10.00 credits including, (EURO*1100 or EURO*1200), EURO*2200, EURO*3000, EURO*3300

**Restriction(s):** Approval of the Coordinator for the European Studies Program.

**Department(s):** School of Languages and Literatures

### External Courses

All courses labeled XSEN*XXXX are Seneca College Courses. The corresponding Seneca Course numbers are provided. Detailed course profiles can be accessed through the Seneca College home page at http://www.senecac.on.ca/. All XSEN*XXXX courses are restricted to BSCH.BPCH and BSCH.BPCH:C.

#### XSEN*3030 Pharmacology and Applied Toxicology W (3-3) [0.50]
This subject is an introduction to the general aspects of pharmacology and toxicology. The lecture topics will cover the pharmacological activity of drugs on the autonomic nervous system, central nervous system and the cardiovascular system. The laboratory practicals will focus on testing, drug screening, and clinical trial methodology. This course is taught at Seneca College.

**Prerequisite(s):** BIOC*2580, CHEM*2400  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PHT-533  
**Department(s):** Department of Chemistry

#### XSEN*3040 Occupational Health and Chemistry W (2-3) [0.50]
A general coverage of general aspects of industrial hygiene. Specific topics include Canadian legislation with respect to Occupational Safety, modes of evaluation of chemical exposure, occupational toxicology, and instrumentation associated with the evaluation of the occupational environment. This course is taught at Seneca College.

**Prerequisite(s):** CHEM*2700  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #OCC-433  
**Department(s):** Department of Chemistry

#### XSEN*3060 Pharmaceutical Analysis - Advanced W (2-3) [0.50]
This course reinforces the concept of how the pharmaceutical laboratory works by focusing on method validation requirements within the pharmaceutical industry. It introduces students to the regulatory (ICH, FDA) requirements and guidelines for systems validation, including ICP-acceptable methods and GMP regulations. Validation methods that are taught include Related Substances, Assay, Dissolution and Cleaning. Critical validation parameters (e.g., linearity, specificity, limit of quantitation, etc.) are focused on as well as validation protocols including establishing specifications and dealing with exceptions or out-of-specification (OOS) results. Process validation characteristics (i.e., Design Qualification (DQ), Installation Qualification (IQ), Operation Qualification (OQ), Performance Qualification(PQ) or System Suitability) are also emphasized as well as “Best Practices” such as Process Capabilities and Annual Product Review. This course is taught at Seneca College.

**Prerequisite(s):** BIOC*2580, CHEM*2400  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PHT-533  
**Department(s):** Department of Chemistry

#### XSEN*3070 Pharmaceutical Product Formulations W (2-3) [0.50]
This subject deals with the theoretical and practical aspects of pharmaceutical product formulation with an emphasis on semi-solid and liquid formulations. The students prepare and test ointments, creams, lotions, and syrups in the laboratory. Formulation as it relates to overall product stability and efficacy is also covered in both theoretical and practical terms. This course is taught at Seneca College.

**Prerequisite(s):** CHEM*3750  
**Restriction(s):** XSEN*4020 , Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PAC-633  
**Department(s):** Department of Chemistry

#### XSEN*3090 Biopharmaceuticals W (3-0) [0.50]
This subject introduces the student to the rapidly developing field of biotechnology and biopharmaceuticals. Techniques used in the development of biopharmaceuticals will be emphasized as well as large-scale production of biologicals manufactured by genetic engineering processes. This course is taught at Seneca College.

**Prerequisite(s):** BIOC*2580, CHEM*2700  
**Restriction(s):** XSEN*4050 , Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #BPH-633  
**Department(s):** Department of Chemistry

#### XSEN*3200 Pharmaceutical Organic Chemistry W (1-3) [0.50]
The determination of the structure of organic compounds using spectroscopic methods such as N.M.R. and mass spectroscopy are discussed. Correlation of structure and reactivity (i.e. drug activity) of organic compounds is also explored. A multi-step synthesis of an anesthetic (lidocaine) and mass-spectrometric analysis of an unknown organic compound (or mixture) are examples of lab-projects. This course is taught at Seneca College.

**Prerequisite(s):** CHEM*3750  
**Restriction(s):** XSEN*4020 , Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #PAC-633  
**Department(s):** Department of Chemistry

#### XSEN*3210 Introduction to Pharmaceutical Manufacturing W (2-3) [0.50]
This laboratory oriented course is intended to introduce students to the world of pharmaceutical analysis and manufacturing. Certain select physical and chemical techniques used in the control of raw materials and finished dosage forms are emphasized. Topics will include the methods and equipment required to produce solid dosages.

**Prerequisite(s):** CHEM*2700  
**Restriction(s):** Restricted to BSCH.BPCH and BSCH.BPCH:C  
**External Course Code(s):** Seneca #IPM-472  
**Department(s):** Department of Chemistry
## Finance

**Department of Economics and Finance**

### FIN*2000 Introduction to Finance S,F,W (3-0) [0.50]
This course provides an introduction to the theory, application and real-world evidence of finance. The course examines financial decisions from two distinct points of view: of an individual investor and of a corporation. From the investor’s point of view, the course focuses on the valuation of financial assets, the formation of portfolios and the relation of risk versus return. From a corporation’s point of view, the course focuses on capital budgeting, capital structure and payout policy with a particular emphasis on long-term corporate financing.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** ECON*1050, (1 of IPS*1500, MATH*1030, MATH*1080, MATH*1200), (1 of ECON*2740, PSYC*1010, PSYC*2010, SOAN*2120, STAT*2040, STAT*2060, STAT*2080, STAT*2120)

**Equate(s):** ECON*2560

**Department(s):** Department of Economics and Finance

### FIN*3000 Investments S,F,W (3-0) [0.50]
This course provides an in-depth analysis of the theory, application and evidence of financial investments with particular emphasis on the stock market. The course reviews issues related to the valuation of financial assets, and then focuses on two main themes: building optimal domestic and international portfolios through dynamic asset allocation and assessing the risk-return relationship in the cross-section of stocks.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** ECON*2310, (ECON*2560 or FIN*2000)

**Equate(s):** ECON*3660

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Economics and Finance

### FIN*3100 Corporate Finance F,W (3-0) [0.50]
This is a course on the theory and practice of corporate finance. The course provides a framework for analyzing the main financial decisions of a corporation. Emphasis is placed on the application of corporate finance theory to real-world cases. The topics covered in this course include firm valuation, capital budgeting, cost of capital, capital structure, dividend policy, initial public offerings, and may include mergers and acquisitions.

**Offering(s):** ECON*2560 or FIN*2000

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Economics and Finance

### FIN*3200 Fundamentals of Derivatives W (3-0) [0.50]
This course provides an introduction to the analysis of financial derivatives. It covers the theory and application of forward contract, futures, options, and swaps, and explains how these instruments can be used for purposes such as investment, hedging risk, arbitrage and speculation.

**Prerequisite(s):** ECON*2310, (ECON*2560 or FIN*2000)

**Equate(s):** ECON*3760

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Economics and Finance

### FIN*3300 The Strategy of Mergers and Acquisitions F (3-0) [0.50]
As changes occur in product markets, public policy, and technology, the scope and scale required for companies to be competitive often changes as well. This course examines the role of mergers and acquisitions (M&A) in repositioning companies to remain competitive, to grow, or to exit. The course also examines how M&A can create value across a range of company types and situations. A means of assessment of M&A success required for companies to be competitive often changes as well. This course examines the role of mergers and acquisitions (M&A) in repositioning companies to remain competitive, to grow, or to exit. The course also examines how M&A can create value across a range of company types and situations. A means of assessment of M&A success.

**Prerequisite(s):** ECON*2310, ECON*2410, (ECON*2560 or FIN*2000)

**Equate(s):** ECON*3360

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Economics and Finance

### FIN*3400 International Finance F (3-0) [0.50]
This course focuses on international macroeconomic issues: the balance of payments; models of exchange rate determination; foreign exchange risk and covered interest arbitrage; alternative exchange rate regimes; small versus large economies; monetary and fiscal policy in an open economy.

**Prerequisite(s):** ECON*2410, (ECON*2560 or FIN*2000)

**Equate(s):** ECON*3860

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Economics and Finance

### FIN*3500 Money, Credit and the Financial System W (3-0) [0.50]
This course explores the economics of banking, other financial institutions and credit markets. Particular attention is paid to the issues of risk in the banking sector.

**Prerequisite(s):** ECON*2410, (ECON*2560 or FIN*2000)

**Equate(s):** ECON*3960

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Economics and Finance

### FIN*4000 Advanced Topics in Finance W (3-0) [0.50]
This course will examine selected advanced topics in finance, such as optimal capital structure under asymmetric information; theoretical and empirical analysis of mergers and acquisitions; asset pricing theory; pricing derivative securities; and financial econometrics.

**Prerequisite(s):** ECON*3710, ECON*3740, (1 of ECON*3100, ECON*3810, ECON*4700), (2 of ECON*3360, ECON*3660, ECON*3760, ECON*3860, ECON*3960, FARE*4240, FIN*3000, FIN*3100, FIN*3200, FIN*3300, FIN*3400, FIN*3500)

**Equate(s):** ECON*4560

**Department(s):** Department of Economics and Finance

### FIN*4100 Financial Econometrics W (4-0) [0.50]
This course involves the application of statistical methods to financial market data. The statistical methods covered will include asymptotic theory, maximum likelihood estimation, instrumental variables, simultaneous equation models and selected topics such as models for limited dependent variables, models for panel data, ARCH models, unit roots and error correction models.

**Prerequisite(s):** ECON*3740

**Equate(s):** ECON*4840

**Department(s):** Department of Economics and Finance

### FIN*4200 Risk Management in Finance and Insurance U (3-0) [0.50]
This course covers the advanced theory and applications of derivatives (for underlying assets such as equity and debt instruments, real assets and exchange rate instruments) and insurance in managing risk.

**Prerequisite(s):** FIN*3100, (ECON*3660 or FIN*3000), (ECON*3760 or FIN*3200)

**Equate(s):** ECON*4660

**Department(s):** Department of Economics and Finance

### FIN*4900 Special Study in Finance S,F,W (3-0) [0.50]
The special study option is designed to provide senior undergraduate students with an opportunity to review the literature on a specialized finance topic in order to prepare, submit and present a major paper. A formal agreement between the student and instructor of the course is required as well as the approval of the department chair or designee.

**Prerequisite(s):** ECON*3740,FIN*3100, (ECON*3660 or FIN*3000)

**Restriction(s):** Instructor consent required.

**Department(s):** Department of Economics and Finance
**Family Relations and Human Development**

Department of Family Relations and Applied Nutrition.

These courses support two majors offered by the Department of Family Relations and Applied Nutrition: Child Studies and Family Studies and Human Development.

---

**FRHD*1010 Human Development F,W (3-0) [0.50]**

This course is an introduction to the study of the development of the individual throughout the life cycle. Emphasis will be placed on the interrelationships between physiological, sociological and psychological aspects of normal human development.

**Offerings:** Also offered through Distance Education format.

**Restrictions:** Not available to Child, Youth & Family or Child, Youth & Family Co-op majors. This is a Priority Access course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*1020 Couple and Family Relationships W (3-0) [0.50]**

A survey of family dynamics throughout the life course, emphasizing themes of power, intimacy and family diversity. Topics may include: gender socialization, sexuality, mate selection, communication, abuse, couple interaction, parent-child relations, divorce, remarriage.

**Offerings:** Also offered through Distance Education format.

**Equates:** FRHD*2010

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*1100 Life: Health and Well-Being F (3-0) [0.50]**

This course integrates the theory, application and research of various aspects of health-related topics across the lifespan, emphasizing relevance to the lives of young adults.

**Offerings:** Offered through Distance Education format only.

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2040 Principles of Program Design for Children W (3-0) [0.50]**

This course will examine the elements involved in planning and implementing quality play-based programs for young children. Some of the issues include: the role of the teacher, meeting developmental needs, the materials and the organization of the environment, and instructional strategies. The course will involve a workshop component.

**Prerequisites:** FRHD*2270 or PSYC*2450

**Restrictions:** Restricted to students in B.A.Sc. Program (CYF, CYF:C, CSTU majors).

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2060 Adult Development and Aging F (3-0) [0.50]**

This course provides an overview of major theoretical approaches, research issues and methodologies, and significant research findings which relate to adult development and aging.

**Prerequisites:** 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2100 Development of Human Sexuality F,W (3-0) [0.50]**

This course covers a social scientific analysis of human sexuality. Emphasis will be placed on the development of sexuality within an interpersonal context.

**Offerings:** Also offered through Distance Education format.

**Restrictions:** 4.50 credits

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2110 Children and Youth with Exceptionalities F (3-0) [0.50]**

This course provides an overview of childhood exceptionalities including intellectual differences, communication disorders, sensory impairments, developmental and behavioural disorders, and health problems. Issues faced by the exceptional child as well as the parents and siblings are discussed.

**Offerings:** Also offered through Distance Education format.

**Prerequisites:** FRHD*1020, 1 of FRHD*2060, FRHD*2260, FRHD*2280, (FRHD*2270 or PSYC*2450)

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2260 Infant Development W (3-0) [0.50]**

This course is an examination of developmental principles and milestones characterizing infant development from conception to 24 months. Emphasis will be placed on understanding the nature of the reciprocal family-infant interactions during this period, and on the societal context influencing those interactions.

**Offerings:** Also offered through Distance Education format.

**Prerequisites:** 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2270 Development in Early and Middle Childhood F (3-0) [0.50]**

This course is an examination of development in the early and middle childhood years, with emphasis on family and societal contexts.

**Prerequisites:** 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100

**Restrictions:** PSYC*2450 This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2280 Adolescent Development F,W (3-0) [0.50]**

This course examines psychosocial development in adolescence, emphasizing physiological, social and emotional changes.

**Offerings:** Also offered through Distance Education format. Last offering - Winter 2021 as a Winter course First offering - Fall 2021

**Prerequisites:** 1 of ANTH*1150, FRHD*1010, FRHD*1100, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*2400 Introduction to Human Services W (3-0) [0.50]**

This course explores the roles, responsibilities and competencies of work in human services, emphasizing the development of professional knowledge, skills and ethical values for working with individuals and families in a variety of settings. Major topics covered in this course will include working with diverse populations, developing professional communication skills, professional values and ethical practice, self-awareness, self-care, career exploration, program planning and implementation.

**Prerequisites:** 1 of FRHD*1010, FRHD*2060, FRHD*2270, FRHD*2280, PSYC*2450

**Restrictions:** FRHD*2300, FRHD*2350, Restricted to students in BASc CYF, CYF:C, ADEV, ADEV:C, FSHD

**Department:** Department of Family Relations and Applied Nutrition

---

**FRHD*3040 Parenting and Intergenerational Relationships W (3-0) [0.50]**

This course is a study of research concerning parent-child relationships across the lifespan.

**Prerequisites:** 9.50 credits including FRHD*1020, 1 of FRHD*1100, FRHD*2060, FRHD*2260, FRHD*2270, FRHD*2280, PSYC*2450

**Restrictions:** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department:** Department of Family Relations and Applied Nutrition

---
FRHD*3060 Principles of Social Gerontology F (3-0) [0.50]
A study of social and health aspects of individual and population aging, including theories and implications for understanding and working with the elderly.
Prerequisite(s): 9.50 credits including (FRHD*1020 or SOAN*3100)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3070 Research Methods: Family Studies F (3-0) [0.50]
This course is a critical examination of research methods in family studies.
Prerequisite(s): 4.50 credits
Restriction(s): Restricted to students in B.A.Sc.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3090 Poverty and Health F,W (3-0) [0.50]
This course offers an in-depth examination of the factors associated with poverty across the lifespan, with a focus on the relationships between poverty and health and development. Poverty within vulnerable groups, issues concerning inequality and strategies to address poverty will also be explored.
Offering(s): Last offering - Winter 2022 as a Winter course First offering - Fall 2022 Offered in even-numbered years.
Prerequisite(s): 9.50 credits including (FRHD*1010 or FRHD*1100)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3150 Strategies for Behaviour Change W (3-0) [0.50]
This course will review the nature and use of behaviour change strategies commonly used in interventions with children, youth, and their families.
Offering(s): Last offering - Winter 2021
Prerequisite(s): 2 of FRHD*1010, FRHD*2060, FRHD*2260, (FRHD*2270 or PSYC*2450), FRHD*2280
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3180 Observation and Assessment Laboratory F (2-1) [0.50]
Direct observation as a strategy for collecting information on children's behaviour in applied and research settings is the focus of this laboratory course. Emphasis will be placed on theory, recording and interpreting observational data and communicating findings in written reports.
Prerequisite(s): FRHD*2110, (1 of FRHD*2040, FRHD*2300, FRHD*2400)
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3190 Administration of Programs for Children S,W (3-0) [0.50]
This course examines the roles and responsibilities of administrators in programs for children with emphasis on the development of appropriate policies and procedures; management of human and financial resources; and internal and external communication within the context of multidisciplinary settings. Attention will be given to quality assurance, professional ethics, and continuing professional development.
Offering(s): Offered through Distance Education format only. Offered in even-numbered years in the winter semester. Offered in odd-numbered years in the summer semester. Last offering - Summer 2021 as a summer course. First offering - Winter 2020 as a winter course.
Prerequisite(s): 7.00 credits including (1 of FRHD*2260, FRHD*2270, PSYC*2450)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3200 Practicum I: Child F,W (3-12) [1.00]
This practicum provides students with a seminar and supervised experience with children and is designed to demonstrate the application of theory studied earlier in the program. It will also provide opportunities for working directly with young people while examining such topics as the role of the teacher, teacher-child interaction, and program implementation. Students wishing to enrol in this course must consult with the instructor during course selection.
Prerequisite(s): FRHD*2040
Co-requisite(s): FRHD*3180, FRHD*3400
Restriction(s): Registration in the B.A.Sc. program (CYF, CYF-C, or CSTU majors).
Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3250 Practicum I: Youth F,W (3-12) [1.00]
Through seminar and supervised experience with youth, students will demonstrate the application of theory studied earlier in the program. This practicum course will also provide opportunities for working directly with youth in a community setting while examining the role of the professionals involved and the communication with youth and community members. Developing skills in programming planning, implementation, and evaluation is a primary objective. Students wishing to enrol in this course must consult with the instructor during course selection.
Prerequisite(s): FRHD*2300 or FRHD*2400
Co-requisite(s): FRHD*3400
Restriction(s): Registration in the B.A.Sc. program (CYF, CYF-C, or FSHD majors).
Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3290 Practicum I: Adult F,W (3-12) [1.00]
This course offers students an opportunity to participate in seminar and supervised field placement in health and social service agencies. The practicum and seminar will develop students' helping roles in agencies and facilitate the integration and application of theoretical knowledge from previous course work with practice. It will also provide opportunities for students to work directly with individuals and/or groups and to participate in on-going programs or services. Students wishing to enrol in this course must consult with the instructor during the course selection period.
Prerequisite(s): FRHD*2350 or FRHD*2400
Co-requisite(s): FRHD*3400
Restriction(s): Restricted to students in B.A.Sc. ADEV, ADEV-V, FSHD. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3400 Communication and Counselling Skills F,W (3-0) [0.50]
This course is an examination and analysis of the theories and methods of communication as applied within the processes of family counseling and consultation.
Prerequisite(s): 4.50 credits including (FRHD*1020 or FRHD*1100)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*3500 Research Internship S,F,W (0-6) [0.50]
This course will give students a direct, initial experience in conducting research in Family Relations and Human Development. The internship focuses on familiarizing students with the research process and building research skills through active engagement in research under the direct guidance of a faculty member.
Prerequisite(s): FRHD*3070, STAT*2900
Restriction(s): Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4020 Family Theory F (3-0) [0.50]
This course analyses theoretical approaches and concepts in the study of the family.
Prerequisite(s): 12.50 credits including FRHD*1020
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4070 Topics in Family Relations and Human Development U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in family studies. To be conducted by regular or visiting faculty with expertise in the area. Students should check with the Department of Family Relations and Applied Nutrition to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate.
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4080 Topics in Family Relations and Human Development U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic in family studies. To be conducted by regular or visiting faculty with expertise in the area. Students should check with the Department of Family Relations and Applied Nutrition to determine what topic will be offered during specific semesters and which prerequisites, if any, are appropriate.
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition
FRHD*4190 Assessment in Gerontology F (3-2) [0.50]
This course provides an examination and critique of current methods of assessing older adults. To be considered include those for assessing dementia, depression, and pain. Students will examine diagnostic criteria that form the underpinnings of most tests and then examine each test for its psychometric properties and appropriate use. An understanding of the ethical principles governing assessment will be gained.
Prerequisite(s): 14.50 credits including FRHD*2060
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4200 Issues in Human Sexuality W (3-0) [0.50]
An advanced analysis of sexual development. Specific attention will be given to sexual problems, and the concepts, methods and issues associated with sex education and counselling.
Prerequisite(s): FRHD*1020, FRHD*2100 and 1.00 credit at the 3000 level in Family Relations and Human Development, Psychology or Sociology
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4210 Social Policies for Children and Families W (3-0) [0.50]
This course focuses on current social policies, programs, and services that affect children's development and family well-being. Issues include policies that affect income security, parental effectiveness, social service provision, and community resources.
Prerequisite(s): 9.50 credits
Restriction(s): FRHD*4260. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4210 Senior Seminar in Early Education and Care F (3-0) [0.50]
The course offers a study of the historical and philosophical basis of programs for young children evaluated from a developmental perspective. Emphasis will be on current approaches and programs and contemporary issues in early childhood programming.
Prerequisite(s): FRHD*3200
Equates to: CSTU*4210
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4230 Social Policies W (3-0) [0.50]
This course focuses on current social policies, programs, and services that affect individuals and families. Issues include policies that affect caregiving, financial security, social service provision, and community resources.
Prerequisite(s): 9.50 credits including (FRHD*2060 or FRHD*2280)
Restriction(s): FRHD*4320. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4230 Practicum II: Child F.W. (3-16) [1.00]
This course enables students to extend their knowledge and professional skills in a second supervised placement working with children in a health, education or social service agency. The practicum and seminar provides students with additional opportunities to integrate theoretical knowledge with practice experiences. Students are expected to assume additional responsibilities related to program design and implementation and in their supervised work with individuals and/or groups.
Prerequisite(s): FRHD*3200 or FRHD*3250
Restriction(s): FRHD*4170, FRHD*4290, FRHD*4340, Restricted to students in CYF, CYF:C or FSHD major. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4250 Aging and Health W (3-0) [0.50]
This course offers upper level undergraduates a forum to explore issues related to aging and health across the adult life span. More specifically, the conceptual groundwork necessary for understanding the roles of the life span developmental perspective, individual development, physiological changes in human aging, contextual influences and interactions, and several models/theories of aging and health will be examined. A primary objective of the course is the integration of models and theory to facilitate understanding of aging and health topics. Topics include but are not limited to: age changes and disease processes (both acute and chronic); mental health and illnesses; medication use; disease prevention and health promotion; influence of health on family relationships, caregiving, and placement decisions; systemic and societal influences on health; and ethical issues and controversies surrounding the end-of-life care and decision making, advanced directives, assisted suicide, and death and dying.
Prerequisite(s): 10.00 credits including FRHD*2060
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4260 Social Policies W (3-0) [0.50]
This course focuses on current social policies, programs, and services that affect individuals and families. Issues include policies that affect caregiving, financial security, social service provision, and community resources.
Prerequisite(s): 9.50 credits including (FRHD*2060 or FRHD*2280)
Restriction(s): FRHD*4320. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4290 Practicum II: Adult F.W. (3-16) [1.00]
This course provides advanced undergraduate students with further direct experience working primarily with children aged 0-12 years within the context of a community or school setting. Students will continue to develop applied skills in leadership, communication, teamwork, and reflective practice; implement and evaluate effective programs/programming; assess personal interests and strengths in working with children; develop an appreciation of the role of the family in these settings; and examine the role of continuous professional learning for early childhood professionals.
Prerequisite(s): FRHD*4330
Restriction(s): Restricted to students in CYF, CYF:C or FSHD major. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4310 Professional Issues F (3-0) [0.50]
This course examines ethical and professional issues in working with children, youth, adults of all ages, and their families. A variety of institutional settings are considered (e.g., school systems, treatment agencies, youth residential programs, senior care facilities, hospitals). The complexities of professional practice with diverse populations are explored in depth. Professional communication skills and relevant legal aspects are also addressed.
Prerequisite(s): 14.00 credits including FRHD*3400
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4320 Practicum II: Child F.W. (3-16) [1.00]
This course enables students to extend their knowledge and professional skills in a second supervised placement working with youth in a health or social service agency. The practicum and seminar provides students with additional opportunities to integrate theoretical knowledge with practice experiences. Students are expected to assume additional responsibilities related to program design and implementation and in their supervised work with individuals and/or groups.
Prerequisite(s): FRHD*3200 or FRHD*3250
Restriction(s): FRHD*4170, FRHD*4290, FRHD*4340, Restricted to students in CYF, CYF:C or FSHD major. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4330 Practicum III: Child F.W. (3-16) [1.00]
This course provides advanced undergraduate students with further direct experience working primarily with children aged 0-12 years within the context of a community or school setting. Students will continue to develop applied skills in leadership, communication, teamwork, and reflective practice; implement and evaluate effective programs/programming; assess personal interests and strengths in working with children; develop an appreciation of the role of the family in these settings; and examine the role of continuous professional learning for early childhood professionals.
Prerequisite(s): FRHD*4330
Restriction(s): Restricted to students in CYF, CYF:C or FSHD major. Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

FRHD*4400 Youth, Risk and Resilience W (3-0) [0.50]
This course examines biological, and social-contextual aspects of developmental issues evident in childhood and adolescence. The theoretical perspective of developmental psychopathology will be used to examine literatures relating to risk, resilience, developmental trajectories, classification, assessment, and intervention. Students will have a chance to critically examine many mental health issues commonly found in childhood and adolescence.
Prerequisite(s): 14.00 credits including (1 of FRHD*1010, FRHD*2060, FRHD*2270, FRHD*2280, PSYC*2450)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition
**FRHD*4810 Thesis I U (3-0) [0.50]**
Planning, developing and writing a research proposal under individual faculty supervision. Topic to be decided by the student in consultation with the supervisory faculty member before they may course select or register for the course. Students are advised to contact the Department of Family Relations and Applied Nutrition for further information.

*Prerequisite(s):* FRHD*3070  
*Equate(s):* CSTU*4810  
*Restriction(s):* Instructor consent required.  
*Department(s):* Department of Family Relations and Applied Nutrition

**FRHD*4910 Thesis II U (6-0) [1.00]**
The student will conduct and write an undergraduate thesis under the direction of a faculty member.

*Prerequisite(s):* FRHD*4810  
*Equate(s):* FRHD*4911/2  
*Restriction(s):* Instructor consent required.  
*Department(s):* Department of Family Relations and Applied Nutrition
Food, Agricultural and Resource Economics

FARE*1040 Intro to Environmental Economics, Law & Policy W (5-0) [1.00]
This course introduces students to a social science and policy perspective on environmental issues. The course emphasizes interactions among market exchange relationships, policy actions and legal rules and institutions. The role of scientific evidence in the resolution of environmental disputes is considered. Students participate in exercises representing different roles in environmental litigation.
Restrictions: ECON*1050 Registration in BBRM.EM, BSES, BSES.C.
Department(s): Department of Food, Agricultural and Resource Economics

FARE*1300 Poverty, Food & Hunger W (3-0) [0.50]
This course examines the nature of poverty, food security and hunger at both the local and global levels. In so doing, it explores the nature of international development more broadly and its relevance to students studying a wide range of disciplines. It aims to provide students with the basic concepts and analytical tools required to reflect critically on international development issues in the world today and the how global poverty, food insecurity and hunger might be alleviated.
Department(s): Department of Food, Agricultural and Resource Economics

FARE*1400 Economics of the Agri-Food System W (4-0) [1.00]
This course introduces students to the major aspects of economics, business and resource use in the Canadian agri-food sector. Students will be exposed to the techniques used by agri-food firms to plan, invest and measure performance. Decision making under both certainty and uncertainty will be considered. Students will be shown how the market equilibrium model can be used to conduct welfare analysis and modified to account for imperfect competition and externalities.
Restrictions: This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Food, Agricultural and Resource Economics

FARE*2410 Agri-food Markets and Policy W (3-0) [0.50]
Students will be provided with an introduction to agri-food markets, policies and institutions. Focus will be placed on: the role and function of futures markets; domestic agri-food policies; and agri-food trade policies, instruments and institutions. Economic analysis of contemporary issues in agri-food markets will be emphasized.
Prerequisite(s): FARE*1040 or FARE*1400
Department(s): Department of Food, Agricultural and Resource Economics

FARE*2700 Survey of Natural Resource Economics F (3-0) [0.50]
This course examines how humans, within a society, allocate natural resources - e.g., water, land, forests, and fisheries. Economic concepts and methods provide the basis for discussing and understanding both the use and misuse of natural resources.
Prerequisite(s): 1 of ECON*1050, FARE*1040, FARE*1400
Department(s): Department of Food, Agricultural and Resource Economics

FARE*3000 International Food Sector and Policy Analysis F (3-0) [0.50]
This course explores the structure and functioning of the agri-food sector and the determinants and outcomes of food markets in different parts of the world and in countries at varying levels of economic development. In so doing, the course explores how individual countries are positioned and linked within the global agri-food system. Using an applied industrial organization perspective, the course examines the behaviour of actors within the agri-food sector and the influence of policies at the national, regional and international levels on sector performance, for example in terms of the quality and safety, availability and price of food.
Prerequisite(s): 9.50 credits including (1 of ECON*1050, FARE*1040, FARE*1400), (1 of ECON*2740, STAT*2040, STAT*2060)
Department(s): Department of Food, Agricultural and Resource Economics

FARE*3030 The Firm and Markets F (3-1) [0.50]
A course in microeconomic theory applied to agricultural economics research. The theory of the firm is used to analyze production and resource use in agriculture. Resource allocation issues, risk sensitive decision-making, and firm strategy on vertical and horizontal integration are studied. Consumer theory is used to analyze food purchase decision. How theoretical relationships are quantified and used in the analysis of public policy issues is emphasized.
Prerequisite(s): ECON*2310, ECON*2770, ECON*3740
Department(s): Department of Food, Agricultural and Resource Economics

FARE*3170 Cost-Benefit Analysis W (3-0) [0.50]
The primary objective of this course is to introduce students to the basic principles of Cost-Benefit Analysis so that they can evaluate the worthiness of a public project or policy. Special emphasis is given to the trade-offs associated with agricultural, environmental and natural resource policies.
Prerequisite(s): 1 of ECON*2100, ECON*2310, ECON*2650, FARE*2700
Restriction(s): This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Food, Agricultural and Resource Economics

FARE*3250 Food and International Development F (3-0) [0.50]
This course provides students with an economic perspective on issues in international development related to food, agriculture, and household behaviors. Different economic theories and approaches are used to understand various economic phenomena in the development context. Students are encouraged to consider critically an economic approach to the analysis of development issues related to food and agriculture, alongside the perspectives of other social science disciplines. Throughout the course, food and agriculture as development issues are considered primarily on a micro level, with a special focus on household behavior and decision-making.
Prerequisite(s): (FARE*1040 or ECON*1050), (FARE*1300 or ECON*1100)
Department(s): Department of Food, Agricultural and Resource Economics

FARE*3310 Operations Management F,W (3-0) [0.50]
The decision-making role of the operations manager in transforming inputs into desired outputs is the primary focus of this course. The major issues and problems of designing, scheduling, operating, and controlling the production system will be examined.
Prerequisite(s): (ACCT*1220 or ACCT*2220), (1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060, STAT*2080, STAT*2120)
Restriction(s): HTM*3120. This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Food, Agricultural and Resource Economics

FARE*3320 Supply and Value Chain Management F (3-0) [0.50]
This course focuses on the coordination of decision-making along food industry supply chains and networks to achieve strategic and operational goals. This course uses a case-based approach to instruct students in the principles of supply chain management and key concepts for the analysis of supply chain management issues.
Prerequisite(s): FARE*3310
Restriction(s): This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Food, Agricultural and Resource Economics

FARE*4000 Agricultural and Food Policy W (3-0) [0.50]
A critical analysis of agricultural income, marketing, adjustment and trade problems and policies in the developed countries, with particular emphasis on Canadian agricultural policies.
Prerequisite(s): 15.00 credits including ECON*2310
Department(s): Department of Food, Agricultural and Resource Economics

FARE*4210 World Agriculture, Food Security and Economic Development F (3-0) [0.50]
This course examines the role of agriculture in determining food security within developing countries and in promoting overall processes of economic development. The course focuses on the coordination of decision-making along food industry supply chains and networks to achieve strategic and operational goals. This course uses a case-based approach to instruct students in the principles of supply chain management and key concepts for the analysis of supply chain management issues.
Prerequisite(s): FARE*3310
Restriction(s): This is a Priority Access Course. Restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Food, Agricultural and Resource Economics

FARE*4220 Advanced Agribusiness Management W (3-0) [0.50]
A course oriented toward practical application of theory and analytical principles to the identification, analysis and solution of an agribusiness organization/management problems. Students work on a major agribusiness project as management consultants with an owner/operator. The course builds upon students' prior training in accounting, finance, mathematical analysis, computer applications, economics, agriculture and management.
Prerequisite(s): 1 of FARE*2410, BUS*3320, ECON*2770, MGMT*3320
Department(s): Department of Food, Agricultural and Resource Economics
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FARE*4240</td>
<td>Futures and Options Markets W</td>
<td>3.0</td>
<td>This course is an introduction to the study of the theory and application of futures, options and other derivative instruments for marketing, hedging, investment and speculative purposes. Emphasis is placed on applications of agricultural and financial instruments to real business situations.</td>
</tr>
<tr>
<td>FARE*4290</td>
<td>Land Economics F</td>
<td>3.0</td>
<td>The economics of property rights is applied to issues in the allocation of land among agricultural, urban and other uses: contemporary trends, problems and policies in land planning, including expropriation and regulatory takings, soil erosion policy, farmland protection policy, endangered species policy and landfills and recycling.</td>
</tr>
<tr>
<td>FARE*4310</td>
<td>Resource Economics W</td>
<td>3.0</td>
<td>This course explores the role of property rights and related institutions in natural resource stewardship. Potential applications of this perspective to natural resource policy, both in Canada and internationally, are considered. Classes use a discussion based approach. The learning objective for the course is the development of critical thinking skills. The readings emphasize original sources. Students are expected to conduct original research on some aspect of the role of property rights and related institutions in the resolution of a current natural resource stewardship problem.</td>
</tr>
<tr>
<td>FARE*4330</td>
<td>Advanced Operations Management W</td>
<td>4.0</td>
<td>This course focuses on the decision-making role of the operations manager. It provides students with the opportunity to explore and apply their knowledge in a case-based and project-based course addressing operations issues and topics in the food industry. The course focuses on the fundamental concepts, issues, and techniques for efficient and effective operations. Topics include location strategy, process strategy, forecasting, inventory management, scheduling, project management, queuing management, supply chain management, lean operations and maintenance.</td>
</tr>
<tr>
<td>FARE*4360</td>
<td>Marketing Research W</td>
<td>3.0</td>
<td>A study of the marketing research function in business with emphasis on its role in providing information to assist managers in making marketing decisions.</td>
</tr>
<tr>
<td>FARE*4370</td>
<td>Food &amp; Agri Marketing Management F</td>
<td>3.0</td>
<td>The course focuses on the decision making role of the marketing manager who is responsible for formulating the strategic marketing plan for food and agricultural businesses. The theory of selecting market target(s) for the firm’s product and/or services and the development of the marketing mix (product, price, promotion, distribution) with the aid of market research is covered. Note: Students with credit for this course may not proceed to MCS*1000.</td>
</tr>
<tr>
<td>FARE*4380</td>
<td>Retailing, Merchandising and Sales W</td>
<td>3.0</td>
<td>This course explores the merchandising and sales function, strategies and practices used by the retail food sector. The course includes development and application of concepts tied to effective sales management, as well as strategies and approaches to undertaking retail merchandising. Where relevant, focus is placed on business-to-business or business-to-consumer approaches. Students will learn to plan, execute, and evaluate sales and retail merchandising programs in a variety of alternative distribution channels.</td>
</tr>
<tr>
<td>FARE*4450</td>
<td>Decision Science F</td>
<td>3.0</td>
<td>Quantitative techniques such as classical optimization, mathematical programming, simulation and input-output models are applied to firm, interregional, industry, and international problem situations in agricultural economics, including those dealing with resources and the environment. Time and risk and uncertainty dimensions are addressed.</td>
</tr>
<tr>
<td>FARE*4550</td>
<td>Independent Studies I S,F,W</td>
<td>3.0</td>
<td>An opportunity to conduct a second independent study project for majors in Agricultural Economics (of the Bachelor of Arts or Bachelor of Science in Agriculture degree programs), Agribusiness (of the Bachelor of Commerce degree program), and Environmental Economics and Policy (of the Bachelor of Science in Environmental Sciences degree program).</td>
</tr>
<tr>
<td>FARE*4560</td>
<td>Independent Studies II S,F,W</td>
<td>3.0</td>
<td>An opportunity to conduct a second independent study project for majors in Agricultural Economics (of the Bachelor of Arts or Bachelor of Science in Agriculture degree programs), Agribusiness (of the Bachelor of Commerce degree program), and Environmental Economics and Policy (of the Bachelor of Science in Environmental Sciences degree program).</td>
</tr>

Food Science

Department of Food Science

FOOD*2010 Principles of Food Science S.W. (3-0) [0.50]
The principles involved in the processing, handling and storage of foods are introduced in this course. The relationship of science and technology to food processing is discussed.
Offering(s): Offered through Distance Education format only.
Restriction(s): FOOD*2150, FOOD*3090, NUTR*2150
Department(s): Department of Food Science

FOOD*2100 Communication in Food Science W (3-0) [0.50]
Students will acquire basic skills in technical and business communication and be prepared to complete a variety of communication assignments in subsequent semesters. Students will learn and apply the principles of effective written and oral communication.
Restriction(s): Restricted to students in BSC.FOOD, BSC.FOOD:C, BBRM.FIM, BBRM.FIM:C majors
Department(s): Department of Food Science

FOOD*2150 Introduction to Nutritional and Food Science F (3-0) [0.50]
This interdisciplinary course provides an introduction to the Food and Nutritional Sciences from both historical and modern perspectives. Major themes are the nutritional and functional properties of food, nutrient assimilation, food preservation and safety, and the interactions between food processing, diets and health. (Also listed as NUTR*2150.)
Prerequisite(s): BIOL*1080, CHEM*1040
Equate(s): NUTR*2150
Restriction(s): FOOD*2010, FOOD*3090 Not available to students registered in BASC.AHN major.
Department(s): Department of Food Science

FOOD*2400 Introduction to Food Chemistry S (3-0) [0.50]
The chemistry and biochemistry of the major components of foods (lipids, proteins, carbohydrates and water/ice) are introduced in this course. In addition, an overview of some of the reactions and changes in food components which occur during processing, handling and storage will be presented. This course may not be taken for credit by students in the Food Science Major.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): CHEM*1040
Restriction(s): FOOD*3030, FOOD*3050
Department(s): Department of Food Science

FOOD*2410 Introduction to Food Processing W (3-0) [0.50]
Food processes and the relationships between chemistry, microbiology, and engineering as they apply to food processing are discussed. The following topics are included: high and low temperature processes; moisture control and intermediate moisture foods; concentration and dehydration processes; and novel food processing techniques.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): CHEM*1040, (1 of BIOL*1070, BIOL*1080, MICR*2420)
Restriction(s): FOOD*3140, FOOD*3160, FOOD*3170 Not available to students registered in BBRM.FIM, BBRM.FIM:C, BSC.FOOD or BSC.FOOD:C majors.
Department(s): Department of Food Science

FOOD*2420 Introduction to Food Microbiology F (3-0) [0.50]
An introduction to the major groups of microorganisms important in foods is presented in this course, including microbial spoilage of food, food-borne illness, and food fermentations. Sources of contamination during production, processing and storage of foods and evaluation of food processing conditions used to control the presence and/or growth of microorganisms in foods are discussed.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): BIOL*1070 or MICR*2420
Restriction(s): FOOD*3230, FOOD*3240. Not available to students registered in BBRM.FIM, BBRM.FIM:C, BSC.FOOD or BSC.FOOD:C majors.
Department(s): Department of Food Science

FOOD*2620 Food Engineering Principles W (3-2) [0.50]
Introduction to engineering principles and operations in food processing including heat transfer, fluid flow, material and energy balances, instrumentation and process control concepts.
Prerequisite(s): (BIOL*2580 or CHEM*2880), (1 of MATH*1030, MATH*1080, MATH*1200)
Department(s): Department of Food Science

FOOD*3030 Food Chemistry I F (3-3) [0.50]
This course covers the fundamental principles of the chemistry of foods. The course will discuss selected topics related to the chemistry (physical, organic and analytical) and physics of the major components in food materials such as lipids, proteins, carbohydrates and water.
Prerequisite(s): BIOC*2580
Restriction(s): Registration is limited to students registered in BSCH.FOOD, FOOD:C or BASC.AHN majors.
Department(s): Department of Food Science

FOOD*3040 Food Chemistry II W (3-3) [0.50]
This course covers the fundamental principles of the chemistry of foods, as a continuation of FOOD*3030. This course will discuss topics related to the chemistry (physical, organic and analytical) and physics of emulsions and emulsifiers, pigments, flavours and flavour perception, enzymes and processing additives.
Prerequisite(s): FOOD*3030
Restriction(s): Registration is limited to students registered in BSCH.FOOD or FOOD:C majors.
Department(s): Department of Food Science

FOOD*3050 Food Chemistry I F (3-0) [0.50]
This course covers the fundamental principles of the chemistry of foods. The course will discuss selected topics related to the chemistry (physical, organic and analytical) and physics of emulsions and emulsifiers, pigments, flavours and flavour perception, enzymes and processing additives. This course is the same as FOOD*3040, without the laboratory component.
Prerequisite(s): BIOC*2580
Restriction(s): FOOD*2400, FOOD*3090. Not available to students registered in BSCH.FOOD or FOOD:C majors.
Department(s): Department of Food Science

FOOD*3060 Food Chemistry II W (3-0) [0.50]
This course covers the fundamental principles of the chemistry of foods, as a continuation of FOOD*3050. This course will discuss topics related to the chemistry (physical, organic and analytical) and physics of emulsions and emulsifiers, pigments, flavors and flavor perception, enzymes and processing additives. This course is the same as FOOD*3040, without the laboratory component.
Prerequisite(s): FOOD*3030 or FOOD*3050
Restriction(s): FOOD*3040. Not available to students registered in BSCH.FOOD or FOOD:C majors.
Department(s): Department of Food Science

FOOD*3090 Food Science and Human Nutrition F (3-2) [0.50]
This course will introduce students to the chemistry and microbiology of food and post-production food handling and processing. It will also introduce students to the role of food components in human nutrition and the interactions between diets and health.
Prerequisite(s): AGR*1110, CHEM*1040 (1 of BIOL*1050, BIOL*1070, BIOL*1080)
Restriction(s): FOOD*2010, FOOD*2150, NUTR*2150. Restricted to students in BSC(Agr) as well as students in the Minor in Agriculture.
Department(s): Department of Food Science

FOOD*3140 Food Processing I F (3-0) [0.50]
This course builds on basic engineering principles to understand the operation of modern food processing plant facilities. The standard equipment used and the underlying principles that control their operation are examined for various high temperature (blanching, pasteurization, sterilization, evaporation, drying, extrusion) and ambient temperature (size reduction, homogenization, emulsification, centrifugation, filtration, extraction, irradiation) unit operations.
Prerequisite(s): ENGG*2660 or (FOOD*2620, MICR*2420)
Restriction(s): FOOD*3140. Not available to students registered in BSC.FOOD or BSC.FOOD:C majors.
Department(s): Department of Food Science

FOOD*3160 Food Processing I F (3-3) [0.75]
This course builds on basic engineering principles to understand the operation of modern food processing plant facilities. The standard equipment used and the underlying principles that control their operation are examined for various high temperature (blanching, pasteurization, sterilization, evaporation, drying, extrusion) and ambient temperature (size reduction, homogenization, emulsification, centrifugation, filtration, extraction, irradiation) unit operations.
Prerequisite(s): ENGG*2660 or (FOOD*2620, MICR*2420)
Restriction(s): FOOD*2620. Not available to students registered in BBRM.FIM or BBRM.FIM:C majors.
Department(s): Department of Food Science
FOOD*3170 Food Processing II W (3-3) [0.50]
This course looks at various low temperature food processing unit operations (e.g., refrigerated storage, freezers, freeze dryers), the design and operation of ancillary food plant equipment (e.g., refrigeration, boiler, pumping, control, sanitation, water, and wastewater treatment systems) and integration of the various unit operations into a functioning food process.

Prerequisite(s): FOOD*3140 or FOOD*3160
Department(s): Department of Food Science

FOOD*3230 Food Microbiology F (3-3) [0.75]
Important groups of microorganisms associated with food spoilage, food fermentations, food infections and intoxications are discussed in this course. Intrinsic and extrinsic factors and their relationship to microbial growth, control of microorganisms by food processing and application of Hazard Analysis Critical Control Points (HACCP) programs are also discussed. Laboratory classes will provide experience in microbiological techniques, sampling and basic genetic engineering.

Prerequisite(s): MICR*2420
Restriction(s): FOOD*2420, FOOD*3240 Restricted to students in BSCH.FOOD, FOOD.C, MICR, MICR.C and BASC.AHN majors.
Department(s): Department of Food Science

FOOD*3240 Food Microbiology F (3-3) [0.50]
The course will present microbiological and technological principles of the industrial application of microorganisms followed by specific examples. Lectures will cover the basics of metabolic pathways and how these can be manipulated through selection or genetic engineering to increase productivity. The main focus of the course will be in the production of alcoholic beverages but will also include production of biomass, solvents, amino acids and organic acids of direct relevance to the food industry. The laboratory component of the course will include winle production, beer brewing and dairy fermentations. Field trips to a commercial winery and brewery will also aid the learning experience.

Prerequisite(s): MICR*2420
Restriction(s): FOOD*2420, FOOD*3240 Restricted to students in BSCH.FOOD, FOOD.C, MICR, MICR.C and BASC.AHN majors.
Department(s): Department of Food Science

FOOD*3260 Industrial Microbiology W (3-3) [0.50]
The course will present microbiological and technological principles of the industrial application of microorganisms followed by specific examples. Lectures will cover the basics of metabolic pathways and how these can be manipulated through selection or genetic engineering to increase productivity. The main focus of the course will be in the production of alcoholic beverages but will also include production of biomass, solvents, amino acids and organic acids of direct relevance to the food industry. The laboratory component of the course will include winle production, beer brewing and dairy fermentations. Field trips to a commercial winery and brewery will also aid the learning experience.

Prerequisite(s): MICR*2420
Restriction(s): FOOD*2420, FOOD*3260 Students must be of legal drinking age in the Province of Ontario. Not available to students registered in BSCH.FOOD, FOOD.C, MICR, MICR.C majors.
Department(s): Department of Food Science

FOOD*3270 Industrial Microbiology W (3-3) [0.50]
The course will present microbiological and technological principles of the industrial application of microorganisms followed by specific examples. Lectures will cover the basics of metabolic pathways and how these can be manipulated through selection or genetic engineering to increase productivity. The main focus of the course will be in the production of alcoholic beverages but will also include production of biomass, solvents, amino acids and organic acids of direct relevance to the food industry. Field trips to a commercial winery and brewery will also aid the learning experience. This course is the same as FOOD*3260, without the laboratory component.

Prerequisite(s): MICR*2420
Restriction(s): FOOD*2420, FOOD*3260 Students must be of legal drinking age in the Province of Ontario. Not available to students registered in BSCH.FOOD, FOOD.C, MICR, MICR.C majors.
Department(s): Department of Food Science

FOOD*3340 Introduction to Food Analysis F (3-0) [0.50]
This course offers an introduction to quantitative analysis of foods by chemical, physical and instrumental means. Determination of both major and minor constituents of foods are discussed.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): FOOD*2400
Restriction(s): FOOD*4190
Department(s): Department of Food Science

FOOD*3700 Sensory Evaluation of Foods W (3-3) [0.50]
This course is an introduction to sensory science. Students will gain an understanding of the factors contributing to sensory perception of foods. Sensory methodology and statistical tools for evaluation of all sensory aspects of food will be provided and all students will gain hands-on experience with implementation, statistical analysis and interpretation of sensory data. Consumer sensory testing methods will also be discussed.

Prerequisite(s): (FOOD*2150 or HTM*2700), (1 of STAT*2040, STAT*2060, STAT*2080)
Restriction(s): This is a Priority Access Course. Registration may be restricted to students in BSCH.FOOD, BSCH.FOOD.C, BBRM.FIM, BBRM.FIM.C, BCOM.HTM, BCOM.HTM.C or BASC.AHN during certain periods.
Department(s): Department of Food Science

FOOD*4020 Quality Management in the Food Industry W (4-0) [0.50]
Functions of packaging in food preservation systems will be examined using a review of current packaging materials, their properties, production methods and applications for specific products. Additional topics include regulatory, environmental and marketplace influences on food packaging choices.

Prerequisite(s): 7.00 credits in science or engineering
Department(s): Department of Food Science

FOOD*4070 Food Packaging F (3-0) [0.50]
The course examines the relation of functional foods and nutraceuticals (FFN) to food and drugs. The safety and efficacy of individual FFN products, and the regulatory issues that influence the development and commercialization of FFN in global markets are emphasized. Also listed as NUTR*4090.

Prerequisite(s): NUTR*3210
Equate(s): NUTR*4090
Department(s): Department of Food Science, Department of Human Health and Nutritional Sciences

FOOD*4110 Meat and Poultry Processing W (2-3) [0.50]
The course focuses on the principles and techniques employed by the meat industry in the production of raw and semi/fully cooked products. Lectures include a study of muscle structure and its relation to meat quality, the physical properties of meat proteins, lipids and flavour compounds important in meat processing. Practical applications of processing techniques (including producing different products in labs) packaging and merchandizing are emphasized in the laboratory. Other sources of animal proteins, such as eggs, are also covered. Emphasis is put on learning how various food science principles (e.g. emulsification, preservation, HACCP) are used to optimize meat products quality and safety.

Prerequisite(s): 1 of ANSC*2340, FOOD*3090, FOOD*3140, FOOD*3160
Department(s): Department of Food Science

FOOD*4190 Advanced Food Analysis F (3-0) [0.50]
In this course the quantitative analysis of foods by chemical and physical methods will be studied with emphasis on modern/advanced technologies. Both major and minor constituents will be discussed.

Co-requisite(s): 1 of CHEM*2400, CHEM*2480, FOOD*3030, FOOD*3050
Department(s): Department of Food Science

FOOD*4220 Topics in Food Science S,F,W (0-3) [0.50]
Independent study of a selected topic in Food Science, involving a review and critical evaluation of the current literature. The course comprises independent library research and students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and the course co-ordinator in a prior course selection period.

Prerequisite(s): 14.00 credits including 1.50 credits at the 3000 level or higher in Food Science.
Restriction(s): Instructor consent required.
Department(s): Department of Food Science
FOOD*4230 Research in Food Science S,F,W (0-3) [0.50]
This course involves independent laboratory research of a selected topic in Food Science, under the supervision of an individual faculty. The laboratory research is based on the literature review conducted in FOOD*4220. In addition, a review and critical appraisal of experimental principles will guide the design of laboratory experiments. Students are required to present a concise report in a written paper and in a seminar. Students must make arrangements with both faculty supervisor and the course co-ordinator in a prior course selection period.
Prerequisite(s): FOOD*4220
Co-requisite(s): FOOD*4220
Restriction(s): Instructor consent required.
Department(s): Department of Food Science

FOOD*4260 Food Product Development I F (3-3) [0.50]
This course examines the research and development process related to new food products. Through a series of lectures and presentations students will learn the underlying theory behind food product development including idea generation, prototype development and new product manufacturing, evaluation and product marketing. Students will also gain a real world understanding of the process through their involvement and interaction with invited industry speakers. Students will work in teams with students from other disciplines to plan a food product development project.
Prerequisite(s): FOOD*2100, FOOD*3030, (FOOD*3050), (FOOD*3140 or FOOD*3160), (FOOD*3230 or FOOD*3240)
Restriction(s): MGMT*4020, MGMT*4030
Department(s): Department of Food Science

FOOD*4270 Food Product Development II W (3-3) [0.50]
This course will compliment the Food Product Development I course by further assisting students in gaining a comprehensive understanding of the principles and process of food product development. Students will use the theory obtained from the Food Product Development I course to put into practice and gain real life experience in the planning, conducting, and communicating results as a team while developing a pre-approved food product.
Prerequisite(s): FOOD*4260
Restriction(s): MGMT*4020, MGMT*4030
Department(s): Department of Food Science

FOOD*4310 Food Safety Management Systems W (3-0) [0.50]
Participants will learn and apply principles of food safety management and the systems involved. The course is organized in four modules: plant hygiene, principles of Hazard Analysis Critical Control Point (HACCP), HACCP based food safety programs in Canada, and ISO Food Safety Management Systems.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): (FOOD*2010 or FOOD*2150), (1 of FOOD*2410, FOOD*3140, FOOD*3160), (1 of FOOD*2420, FOOD*3230, FOOD*3240)
Department(s): Department of Food Science

FOOD*4400 Dairy Processing W (3-3) [0.50]
The production, processing, chemistry, microbiology and marketing of fluid milk, frozen dairy products, cheese, fermented dairy foods and butter are studied in this course.
Prerequisite(s): BIOC*2580, MICR*2420, (FOOD*2150 or FOOD*3090)
Department(s): Department of Food Science

FOOD*4520 Utilization of Cereal Grains for Human Food F (3-3) [0.50]
The course will cover topics related to the history of agriculture as it relates to cereal grains; basic principles behind grain breeding and its relevance to grain quality and functionality; regulations as they relate to grain quality; fractionation of cereal components and their utilization; relationship between grain structure/composition and processing of cereal-based foods; principles of analytical tools commonly used to assess grain and product quality; science and technology as it relates to manufacturing and shelf life of common cereal-based foods from wheat, corn, rice and barley; functional and nutritional attributes of cereal grains; recent advances in cereal science and technology and the non-food uses of cereal grain components.
Prerequisite(s): BIOC*2580, (1 of BIOL*1050, BIOL*1070, BIOL*1080), (1 of AGR*2470, FOOD*2150, FOOD*3090, NUTR*3210)
Department(s): Department of Food Science
XII. Course Descriptions, French Studies

School of Languages and Literatures

The School reserves the right to determine the appropriate level to be taken by students enrolling in language courses. To that end, students will be asked to fill out a placement questionnaire at the beginning of the course. Literary texts are, at all levels, studied in French. Students registering in these courses will be expected to have the appropriate language proficiency. Courses up to and including FREN*1200 should be taken in sequence (with the exclusion of FREN*1010); they should not be taken concurrently.

Francophone students will not normally be admitted into FREN*1200 and FREN*1300. It is recommended they start their program with FREN*2020, FREN*2060, FREN*2500, or FREN*2520 with the approval of the Faculty Advisor.

The following courses are all intended to improve the students’ ability to communicate in French. Use the following chart to determine the appropriate course in which to begin French studies.

Entry points for French studies

</table>
**FREN*3130 Representing the Self F (3-0) [0.50]**
By examining a variety of texts told by a real or fictional ‘I’, this course will explore such literary concerns as believable and unbelievable narrators, biography and autobiography and the construction of the self. Students will put to use their learning about the construction of the self in creating their own first person narrative in French.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** FREN*2020, FREN*2060, FREN*2520

**Department(s):** School of Languages and Literatures

---

**FREN*3140 Women in Literature, Art and Film W (3-0) [0.50]**
This course will study French or Francophone women as creators of literary, artistic and filmic works or might take the representation of women in literature, art or film as its focus. Drawing on specific contemporary theories, we will study representations of women’s place, of the female body, class and linguistic identity, and of the creation of artistic work. Particular attention will be paid to the relationship between the personal and the socio-political spheres, sexual difference, and gender roles.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** FREN*2020, FREN*2060, FREN*2520

**Department(s):** School of Languages and Literatures

---

**FREN*3160 Songs, Lyric Poetry and French F (3-0) [0.50]**
This course will provide students with the opportunity to explore the cultural richness of song lyrics and poetry in the Francophone world. By engaging with a variety of songs including, but not limited to: traditional folk, political songs ("chants engagés"), hip-hop to “World music”, students will explore several facets of this complex subject.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** FREN*2020, FREN*2060, FREN*2520

**Department(s):** School of Languages and Literatures

---

**FREN*3170 Fictions of Childhood F (3-0) [0.50]**
This course will examine the classics of francophone children’s literature (for example, works by Perrault, la Comtesse de Ségur, Jules Verne, or Goscinny) and take into account representations of children or childhood in autobiographical texts, novels or film. Students will address questions such as: How did children’s literature develop as a separate genre? What are the characteristics of the various types of writing for children (fairy tales, adventure fiction, novels of school and home, fantasy)? What is the function of a child narrator in novels for children or adults?

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** FREN*2020, FREN*2060, FREN*2520

**Department(s):** School of Languages and Literatures

---

**FREN*3300 French Translation II F (3-0) [0.50]**
This course introduces students to an analysis of the similarities and contrasts between French and English grammar. As well, the course introduces students to analysis of various literary styles, and to their application in written translation.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** FREN*2500

**Department(s):** School of Languages and Literatures

---

**FREN*3520 French Composition II W (3-0) [0.50]**
This is a continuation of FREN*2520 with special emphasis on creative writing.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** FREN*2020, FREN*2060, FREN*2520

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s):** School of Languages and Literatures

---

**FREN*3610 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3620 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3630 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3640 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3650 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3660 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3670 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3680 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3690 Studies in French Literature and Culture in Nice F,W (3-0) [0.50]**
Thematic courses relating to the literature, arts, and society of metropolitan France of the Francophone world. Options may include other languages, literatures, and other disciplines in the arts and social sciences. For Nice students only.

**Prerequisite(s):** 1 of FREN*2020, FREN*2030, FREN*2060

**Restriction(s):** Admission to Nice Program.

**Department(s):** School of Languages and Literatures

---

**FREN*3700 Experiential Learning and Language S,F,W (0-0) [0.50]**
This course provides an opportunity for independent study based on an experiential project in French Studies. The project (approximately 70 hours) must be approved by a faculty member in the School of Languages and Literatures. It will include research about experiential learning, a reflective piece of writing and a public oral presentation about the project.

**Prerequisite(s):** 10.00 credits including 1.50 credits in French Studies.

**Restriction(s):** A minimum cumulative average of 70% in all French Studies course attempts. Instructor consent required.

**Department(s):** School of Languages and Literatures

---

**FREN*3710 The Art of Adaptation F (3-0) [0.50]**
This course examines the relationship between source text and its adaptation(s). The art of adaptation will be addressed through theories of authorship, identity, intertextuality and genre. Students will reflect on the ways artistic creation is achieved by means of repetition and variation, and will analyse the forms and codes of the traditions that are inherited and often transgressed.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** 1.00 credits at the 3000-level in French.

**Department(s):** School of Languages and Literatures
### FREN*4020 Contemporary Francophone Theatre W (3-0) [0.50]
The focus of this course is French and Québécois plays by twentieth-century dramatists. The approach to the texts will center on the social, political, and cultural contexts of the plays as well as representations of class, gender, and the role of language. The course will look at theatre as text, dramaturgy, spectacle and role-playing, as well as examine the role of theatre in contemporary society.

**Offering(s):** Offered in odd-numbered years.
**Prerequisite(s):** 1.00 credits at the 3000-level in French.
**Restriction(s):** FREN*3120
**Department(s):** School of Languages and Literatures

### FREN*4290 Post-Colonial Francophone Fiction W (3-0) [0.50]
This is a survey course of the works of 20th-century Francophone writers from Maghreb, Black Africa and the Caribbean.

**Offering(s):** Offered in even-numbered years.
**Prerequisite(s):** 1.00 credits at the 3000-level in French.
**Department(s):** School of Languages and Literatures

### FREN*4600 Honours Seminar in French Studies F (3-0) [0.50]
This course is a seminar on literary genres, movements and themes, or on the French language.

**Offering(s):** Offered in odd-numbered years.
**Prerequisite(s):** 1.00 credits at the 3000-level in French.
**Department(s):** School of Languages and Literatures

### FREN*4740 Research Paper in French Studies I S,F,W (3-0) [0.50]
A research paper in French on an approved topic in French literature or language will be required. Individual attention will be given to methods of research and techniques of writing. This course is intended to serve as an introduction to future research at the M.A. and Ph.D. levels.

**Prerequisite(s):** 1.00 credits at the 3000-level in French.
**Restriction(s):** 70% average in all French Studies course attempts is required, although at least 75% is recommended. Instructor consent required.
**Department(s):** School of Languages and Literatures

### FREN*4770 Research Paper in French Studies II S,F,W (3-0) [0.50]
A research paper in French on an approved topic in French literature or language will be required. Individual attention will be given to methods of research and techniques of writing. This course is intended to serve as an introduction to future research at the M.A. and Ph.D. levels.

**Prerequisite(s):** FREN*4740
**Restriction(s):** 70% average in all French Studies course attempts is required, although at least 75% is recommended. Instructor consent required.
**Department(s):** School of Languages and Literatures
Geography

Department of Geography, Environment and Geomatics

Students majoring in other departments may take a number of Geography courses without the prerequisites listed below if they obtain the permission of the instructor.

Note: Several courses in Geography are listed as acceptable for the Natural and Mathematical Science B.A. Distribution Requirements or as Non-Science Electives for B.S. students.

For courses without a semester designation, or with an alternate year designation, please check with the department.

GEOG*1200 Society and Space F (3-1) [0.50]

This course introduces key concepts in contemporary Human Geography. The course applies a spatial perspective in exploring a wide ranging series of processes and issues in society. Topics include population growth and migration, models and challenges of urban and rural development, interpretation of cultural landscapes and selected issues relating to social welfare.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Geography, Environment and Geomatics

GEOG*1220 Human Impact on the Environment F,W (3-0) [0.50]

A global overview of the changing relationships among society, technology and the environment. This course emphasizes the major stages of human use of resources and the environmental consequences of global changes in production systems. It contrasts Third and First World experiences, focusing on core-periphery relationships.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Geography, Environment and Geomatics

GEOG*1300 Introduction to the Biophysical Environment F,W (3-2) [0.50]

This course provides an introduction to physical geography, focusing on the principles and processes governing climate, landforms, and vegetation systems and their interrelationships and will examine natural and human-induced changes to environmental systems. Laboratories will address techniques of measurement, representation and analysis of environmental systems using maps and satellite imagery, laboratory techniques, and field observation.

Department(s): Department of Geography, Environment and Geomatics

GEOG*1350 Earth: Hazards and Global Change F,W (3-0) [0.50]

This course investigates physical aspects of natural hazards that affect people and society and will focus on the natural systems and processes that cause climate variability and change, floods, earthquakes, volcanoes, landslides, hurricanes, tornadoes and other natural disasters.

Department(s): Department of Geography, Environment and Geomatics

GEOG*2000 Geomorphology F (3-2) [0.50]

This is an introduction to geomorphology emphasizing weathering, slope and fluvial processes within drainage basins, and glacial and periglacial processes. Field and laboratory techniques will be applied.

Prerequisite(s): 1 of ENGG*1100, ENVS*1050, ENVS*1060, GEOG*1300, GEOG*1350, GEOIL*1050, GEOIL*1100
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations.

Department(s): Department of Geography, Environment and Geomatics

GEOG*2030 Environment and Development F (3-0) [0.50]

This course examines the changing relations between society and ecology by focusing on relations of power, including intra- and inter-state structures and processes. Environmental movements, conflicts, identities and values are considered along with localization and globalization. Particular attention is paid to ecological and development processes and strategies in the developing world.

Prerequisite(s): 4.00 credits, GEOG*1220 is recommended
Department(s): Department of Geography, Environment and Geomatics

GEOG*2110 Climate and the Biophysical Environment W (3-1) [0.50]

The interrelationships between the atmosphere, lithosphere, hydrosphere, and biosphere to produce distinct physical landscapes (climates, soils, vegetation). Emphasis on the role of climate and the flows of energy, water, and biogeochemicals.

Prerequisite(s): GEOG*1300 or GEOG*1350
Department(s): Department of Geography, Environment and Geomatics

GEOG*2210 Environment and Resources W (3-0) [0.50]

This course examines the interrelationships between people and biophysical processes. The main themes are: 1) characteristics of natural resources and processes through which they are developed and used and 2) human response to environmental conditions, including natural hazards and global change. Contemporary Canadian case studies will be presented at the regional and national scales.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): GEOG*1220 is recommended
Department(s): Department of Geography, Environment and Geomatics

GEOG*2230 Commodity Chains and Cultures of Consumption F (3-0) [0.50]

An introduction to the spatial distribution of economic activity. The course examines patterns, processes and problems in extractive activities, manufacturing, marketing and the service sector, including the transportation of commodities and people. The principles of economic location are applied to regional economic analysis and development.

Prerequisite(s): GEOG*1200 or GEOG*1220
Department(s): Department of Geography, Environment and Geomatics

GEOG*2260 Applied Human Geography W (3-2) [0.50]

This course introduces students to the geographical research process, guiding them through key methodological issues and techniques in human geography. The lab component of the course focuses on data collection using secondary documents, surveys, interviews, and participant observation, as well as both quantitative and qualitative analysis techniques. Lab assignments and class illustrations draw on a range of topics in human geography.

Prerequisite(s): GEOG*1200 or (ANTH*1150 and GEOG*1220)
Department(s): Department of Geography, Environment and Geomatics

GEOG*2280 Analysis in Geography F (3-2) [0.50]

The application of modern techniques to geographic study. The interpretation of geographic phenomena by objective methods. Major honours students in Geography must complete this course by the end of semester 4.

Prerequisite(s): 0.50 credits at the 1000 level in Geography
Department(s): Department of Geography, Environment and Geomatics

GEOG*2480 Mapping and GIS F,W (3-2) [0.50]

An introduction to the theory and techniques of manipulating and displaying spatial data in a GIS (Geographic Information System). Mapping concepts such as scale, co-ordinate systems, map projections, symbolization and vector data encoding are introduced. Major honours students in Geography must complete this course by the end of semester 4.

Prerequisite(s): 5.00 credits
Department(s): Department of Geography, Environment and Geomatics

GEOG*2510 Canada: A Regional Synthesis W (3-0) [0.50]

This course is designed to provide a better understanding of the nature and basis of Canadian regionalism. The first section of the course stresses the biophysical base and the inequality of the natural resource endowment. The historical geographic approach and the systematic overviews of contemporary Canada stress respectively the development and nature of the Canadian space-economy. The final section on regions, regionalism and nationalism provides an overview of the heartland-hinterland dichotomy and centrifugal and centripetal forces operative in the nation.

Department(s): Department of Geography, Environment and Geomatics

GEOG*3000 Fluvial Processes F (3-2) [0.50]

This course examines processes and landforms associated with rivers. Particular emphasis is placed on the interaction between water and sediment movement and channel morphology. Case studies of human impact on river systems are presented.

Prerequisite(s): GEOG*2000, (GEOG*2460) or STAT*2040
Department(s): Department of Geography, Environment and Geomatics

GEOG*3020 Global Environmental Change S,F (3-1) [0.50]

The interrelationships between the atmosphere, lithosphere, hydrosphere, and biosphere to produce distinct physical landscapes (climates, soils, vegetation). Emphasis on the role of climate and the flows of energy, water, and biogeochemicals.

Prerequisite(s): GEOG*1300 or GEOG*1350
Department(s): Department of Geography, Environment and Geomatics

GEOG*3210 Environment and Resources W (3-0) [0.50]

This course examines the interrelationships between people and biophysical processes. The main themes are: 1) characteristics of natural resources and processes through which they are developed and used and 2) human response to environmental conditions, including natural hazards and global change. Contemporary Canadian case studies will be presented at the regional and national scales.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): GEOG*1220 is recommended
Department(s): Department of Geography, Environment and Geomatics

GEOG*3230 Commodity Chains and Cultures of Consumption F (3-0) [0.50]

An introduction to the spatial distribution of economic activity. The course examines patterns, processes and problems in extractive activities, manufacturing, marketing and the service sector, including the transportation of commodities and people. The principles of economic location are applied to regional economic analysis and development.

Prerequisite(s): GEOG*1200 or GEOG*1220
Department(s): Department of Geography, Environment and Geomatics

GEOG*3260 Applied Human Geography W (3-2) [0.50]

This course introduces students to the geographical research process, guiding them through key methodological issues and techniques in human geography. The lab component of the course focuses on data collection using secondary documents, surveys, interviews, and participant observation, as well as both quantitative and qualitative analysis techniques. Lab assignments and class illustrations draw on a range of topics in human geography.

Prerequisite(s): GEOG*1200 or (ANTH*1150 and GEOG*1220)
Department(s): Department of Geography, Environment and Geomatics

GEOG*3280 Analysis in Geography F (3-2) [0.50]

The application of modern techniques to geographic study. The interpretation of geographic phenomena by objective methods. Major honours students in Geography must complete this course by the end of semester 4.

Prerequisite(s): 0.50 credits at the 1000 level in Geography
Department(s): Department of Geography, Environment and Geomatics

GEOG*3480 Mapping and GIS F,W (3-2) [0.50]

An introduction to the theory and techniques of manipulating and displaying spatial data in a GIS (Geographic Information System). Mapping concepts such as scale, co-ordinate systems, map projections, symbolization and vector data encoding are introduced. Major honours students in Geography must complete this course by the end of semester 4.

Prerequisite(s): 5.00 credits
Department(s): Department of Geography, Environment and Geomatics

GEOG*2510 Canada: A Regional Synthesis W (3-0) [0.50]

This course is designed to provide a better understanding of the nature and basis of Canadian regionalism. The first section of the course stresses the biophysical base and the inequality of the natural resource endowment. The historical geographic approach and the systematic overviews of contemporary Canada stress respectively the development and nature of the Canadian space-economy. The final section on regions, regionalism and nationalism provides an overview of the heartland-hinterland dichotomy and centrifugal and centripetal forces operative in the nation.

Department(s): Department of Geography, Environment and Geomatics

GEOG*3000 Fluvial Processes F (3-2) [0.50]

This course examines processes and landforms associated with rivers. Particular emphasis is placed on the interaction between water and sediment movement and channel morphology. Case studies of human impact on river systems are presented.

Prerequisite(s): GEOG*2000, (GEOG*2460) or STAT*2040
Department(s): Department of Geography, Environment and Geomatics

GEOG*3020 Global Environmental Change S,F (3-1) [0.50]

Major global environmental issues examined include climate change, deforestation, desertification and global fisheries. This course is interdisciplinary, exploring the interactions of bio-physical processes with human socio-economic dynamics, including policy initiatives. Particular attention is given to global climate change, its causes, its nature and extent, its implications for ecosystems and societies, and its governance implications.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits
Department(s): Department of Geography, Environment and Geomatics
GEOG*2030 Development and the City W (3-0) [0.50]
This course examines different theoretical and policy perspectives of urbanization and urban development, as well as social, economic and environmental living conditions in cities of the global "south". It refers to concrete examples of cities in their national and international context, paying due attention to diversity and the fluidity of urban-rural boundaries. Specific urban development issues, including migration, housing, employment, health and environment are also addressed.

Prerequisite(s): GEOG*2030 or GEOG*2260
Department(s): Department of Geography, Environment and Geomatics

GEOG*2260 Gender and Environment F (3-0) [0.50]
This course introduces feminist scholarship and perspectives to explore men and women's experiences with both the natural and built environment. The course draws on case studies from developing and developed countries to demonstrate the importance of gender difference in understanding human interactions with the environment. Students will observe gendered use, access, knowledge, responsibility and control in rural and urban landscapes.

Prerequisite(s): 7.50 credits, (GEOG*2210 and GEOG*2260 recommended)
Department(s): Department of Geography, Environment and Geomatics

GEOG*3110 Biotic and Natural Resources F (2-2) [0.50]
This course focuses on the ecological basis for resource management, evaluates a number of current ecological theories and addresses their implications for resource management. Contemporary Canadian case studies will be presented at appropriate scales.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits including GEOG*2210
Department(s): Department of Geography, Environment and Geomatics

GEOG*3320 Food Systems: Issues in Security and Sustainability F (3-0) [0.50]
Many argue that current food systems are unsustainable and will be unable to provide adequate and appropriate nutrition for the global society in the 21st century. This course will explore this issue by taking a global and historic perspective to understand the structure and functioning of agriculture and food systems. We will pay particular attention to the interaction of farms with social, economic, institutional and environmental forces that combine to shape patterns of agricultural activity. In particular, we will explore ways of assessing the extent to which different kinds of food systems are "sustainable" as well as assess how resilient and robust these food systems are to environmental problems (such as climate change) and economic upheaval.

Prerequisite(s): 7.50 credits
Department(s): Department of Geography, Environment and Geomatics

GEOG*3420 Remote Sensing of the Environment W (3-2) [0.50]
This course explores the nature and acquisition of remotely sensed imagery, and provides students with the technical expertise required to process and interpret this type of digital data. The application of digital image processing techniques to analyzing geographic problems is stressed, and its integration in a Geographic Information Systems (GIS) environmental is demonstrated.

Prerequisite(s): 10.00 credits including GEOG*2420
Department(s): Department of Geography, Environment and Geomatics

GEOG*3430 Geomatics for Environmental Analysis F (3-2) [0.50]
This course enables students to explore the theory and techniques of GIS and remote sensing in applications related to the study of environmental processes. Focus will be on geomorphometry, spatial hydrology and catchment process modelling. Students reflect on the impacts of uncertainty in source data and the role of digital elevation model data processing techniques in geomatics-based analysis. Students will be trained in application areas including catchment mapping, stream network analysis, soil moisture modelling, automated soils mapping techniques, among other applications.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): GEOG*2420 or GEOG*2480
Department(s): Department of Geography, Environment and Geomatics

GEOG*3440 GIS for Decision-Making F (3-2) [0.50]
This course trains students to use geomatics techniques as part of a decision-making process, and to critically reflect on the relationship between geospatial analysis and policy decisions in government, community, and corporate settings. Topics may include: public and participatory GIS; webmapping and data visualization; database design; multi-criteria evaluation; scenario mapping. Students will gain familiarity with open and industry mapping software, apply these in practice to issues such as habitat conservation and sea level rise, and reflect on subjects such as uncertainty that challenge spatial data-driven decision-making.

Offering(s): Offered in even-numbered years.
Prerequisite(s): GEOG*2480
Department(s): Department of Geography, Environment and Geomatics

GEOG*3480 GIS and Spatial Analysis F,W (3-2) [0.50]
This course focuses on the use of raster and vector-based geographic information systems to analyze spatial data. Topics include map digitizing, data query and overlay, spatial interpolation, multi-criteria evaluation, least cost pathway determination and digital elevation models. This course requires some familiarity with numerical methods and computer operations.

Prerequisite(s): 10.00 credits, including GEOG*2480
Department(s): Department of Geography, Environment and Geomatics

GEOG*3490 Tourism and Sustainability S,F,W (3-0) [0.50]
An integrative perspective on tourism as a multi-scalar phenomenon, addressing diverse interactions between people and places. Emphasis is on the environmental, economic and cultural impacts of various types of tourism, and approaches to managing these impacts, drawing on geographical theories.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits
Department(s): Department of Geography, Environment and Geomatics

GEOG*3600 Geography of a Selected Region U (3-0) [0.50]
The study of an area which will include topics in physical, economic, social and historical aspects of geography.

Prerequisite(s): 7.50 credits
Department(s): Department of Geography, Environment and Geomatics

GEOG*3610 Environmental Hydrology W (3-1) [0.50]
An introductory course in hydrology, the study of water in the environment. Emphasis is placed on understanding and modeling the hydrologic cycle. Topics include hydrologic processes, water resources, and case studies of freshwater systems.

Prerequisite(s): 7.50 credits, (GEOG*2460 or STAT*2040), (1 of GEOG*2000, GEOG*2110, or another 2000 level earth science or engineering science course is recommended)
Department(s): Department of Geography, Environment and Geomatics

GEOG*4110 Environmental Systems Analysis F (3-0) [1.00]
An integrated systems approach to solving issues of environmental evaluation, impact and development. Focus will be on the biophysical components of the environment.

Prerequisite(s): GEOG*3110 or GEOG*3610
Department(s): Department of Geography, Environment and Geomatics

GEOG*4150 Catchment Processes W (3-2) [0.50]
This course examines the basic properties and flow characteristics of fluids that control the entrainment and transport of sediment by air and water. Bedform development in fluvial, coastal and aeolian environments are also discussed in relation to fluid flow mechanics. Lectures are complemented by weekly labs using the wind tunnel, flume and wave tank.

Prerequisite(s): GEOG*3000
Department(s): Department of Geography, Environment and Geomatics

GEOG*4200 Social Life of Cities F (3-0) [0.50]
Many of the traditional features of cities are changing in light of powerful forces of globalization. The course examines spatial patterns and processes of economic restructuring, social dynamics and political change in Canadian and non-Canadian cities. Students discuss and interpret evolving urban forms from a geographical perspective.

Prerequisite(s): GEOG*2260, (GEOG*2050 recommended)
Restriction(s): GEOG*3400
Department(s): Department of Geography, Environment and Geomatics

GEOG*4210 Environmental Governance F (3-1) [0.50]
This course provides an opportunity for advanced studies in resource and environmental decision making. A central aim is developing an understanding of principles, practices and emerging issues relating to environmental governance.

Prerequisite(s): GEOG*3210
Department(s): Department of Geography, Environment and Geomatics

| GEOG*4220  | Local Environmental Management W | 3-0 | This course explores local environmental management from two perspectives: state-driven (where local government agencies or forums created by governments are used) and non-state driven (where local actors come together in new governance arrangements to undertake environmental management). Through comparing and contrasting these broad perspectives in an experiential learning setting, the course builds understanding of a key trend in environmental governance. 

Prerequisite(s): GEOG*3210 
Department(s): Department of Geography, Environment and Geomatics |
| GEOG*4230  | Environmental Impact Assessment W | 3-0 | This course examines environmental impact assessment (EIA) from philosophical, methodological and institutional perspectives. The evolution of EIA in Canada will be the focus. Case studies illustrating major issues and applications will be presented at a variety of geographical scales. The preparation and presentation of a research project is an integral component. 

Prerequisite(s): GEOG*3210 
Equivalents: ENVS*4220 
Department(s): Department of Geography, Environment and Geomatics |
| GEOG*4390  | Seminar in Rural Geography W | 3-0 | This course surveys themes and issues in contemporary rural geography. Specific attention is given to the processes of restructuring and change in rural systems in Canada and other developed economies. Themes include transformations in the use of rural land, the new rural economy, restructuring in service delivery, and the sustainability of rural communities and systems. 

Prerequisite(s): GEOG*2260, GEOG*3320 
Department(s): Department of Geography, Environment and Geomatics |
| GEOG*4480  | Applied Geomatics W | 3-6 | This course adopts a project-oriented approach to the application of Geographic Information Systems (GIS) and remote sensing in spatial analysis. Students will have the opportunity to design and implement a research project using geomatics techniques to investigate a problem in any area of Geography. 

Prerequisite(s): GEOG*3480 
Department(s): Department of Geography, Environment and Geomatics |
| GEOG*4690  | Geography Field Research F | 3-6 | This course provides an opportunity for senior students to develop skills in the design, implementation and presentation of a field research project. The course involves a field trip of about 10-14 days, either in Canada or abroad. This component of the course takes place between the end of the summer session and the start of classes in the fall semester. Classes during the fall semester focus on the analysis and interpretation of data and incorporate student research seminars. Information on the location and cost of the field research course is available from the department in the winter semester prior to each fall offering. 

Prerequisite(s): 12.50 credits 
Restriction(s): Restricted to majors in Environmental Geomatics or Environmental Geoscience and Geomatics, Environmental Governance, Geography and B.Sc.(Env.) with an overall average of at least 70% at the time of registration. Instructor consent required. 
Department(s): Department of Geography, Environment and Geomatics |
| GEOG*4880  | Contemporary Geographic Thought W | 3-0 | A critical overview of the evolution and current status of Geography. Particular emphasis will be given to the variety of approaches and convergence and divergence within the discipline. The interaction between human and physical geographers and their approaches to issues and the subject will be analyzed. 

Restriction(s): Restricted to major honours students in Geography at semester 6 or above. 
Department(s): Department of Geography, Environment and Geomatics |
| GEOG*4990  | Independent Study in Geography S,F,W | 0-3 | The independent study option is designed to provide senior undergraduate students with an opportunity to pursue library or field research under faculty supervision and to prepare a research report. Formal agreement between the student and the faculty supervisor is required, as is approval of the department chair. 

Restriction(s): Restricted to majors in Environmental Geomatics (Co-op) or Environmental Geoscience and Geomatics, Environmental Governance, Geography and B.Sc.(Env.) students with an overall average of at least 70% at the time of registration. Instructor consent required. 
Department(s): Department of Geography, Environment and Geomatics |

<td>HIST*1010 Early Modern Europe S,F,W (3-0) [0.50]</td>
<td>This course will deal with the evolution and expansion of European society during the pre-industrial era. Commencing with the Renaissance and Reformation it will survey such themes as the voyages of exploration, the impact of western culture on indigenous societies, the development of commercial capitalism, the transformation of science and technology and the conflict between imperial powers in Europe and overseas.</td>
<td>Department of History</td>
<td>2.00 credits</td>
<td>Offered through Distance Education format only.</td>
<td>A wide-ranging look at the diverse religious of the world including Hinduism, Buddhism, Judaism, Christianity, and Islam. The course focuses on each faith’s social context and interactions from their beginnings to the present day.</td>
</tr>
<tr>
<td>HIST*1050 Invitation to History F,W (3-0) [0.50]</td>
<td>This course introduces students to the basics of the historian's craft, including interpreting primary sources, locating and critically analyzing secondary sources, and writing for history. For more detail on the content of sections consult the History department website.</td>
<td>Department of History</td>
<td>This is a Priority Access Course. Enrolment may be restricted to their individual programs.</td>
<td>Also offered through Distance Education format.</td>
<td>Students should check course outlines at the time of course selection.</td>
</tr>
<tr>
<td>HIST*1110 The Modern World F,W (3-0) [0.50]</td>
<td>This course is a survey of the twentieth century, focusing on major events and themes such as: the First and Second World Wars, the Great Depression, the rise and fall of fascism, social movements, revolutions, genocides, decolonization, nationalism, the Cold War, and the rise and decline of American power. The course draws its examples and case studies mainly from regions across the world, with the intention of broadening critical awareness and fostering global citizenship.</td>
<td>Department of History</td>
<td>2.00 credits, including 0.50 credits in History at the 1000 level</td>
<td></td>
<td>This is a Priority Access Course. Enrolment may be restricted to their individual programs.</td>
</tr>
<tr>
<td>HIST*1250 Science and Technology in a Global Context F,W (3-0) [0.50]</td>
<td>This course is an introduction to the culturally specific ways in which science and technology have developed historically from the ancient period through the twenty-first century. Emphasis will be placed on the patterns in which scientific knowledge and practices have traveled and been constructed across cultures and the interconnected but distinct histories of science and technology.</td>
<td>Department of History</td>
<td>2.00 credits</td>
<td></td>
<td>This course provides a historical survey of modern human-animal relationships and the contradictions that characterize them. Topics may include: hunting and sporting, horses and 19th century cities, natural history and the zoo, history of veterinary medicine, 20th century animal sports, the birth of industrial animal agriculture, animals as biotechnology, anti-cruelty movements, petkeeping and consumerism, animal figures in popular culture. The thematic or geographic focus of the course may vary according to the expertise of the instructor.</td>
</tr>
<tr>
<td>HIST*2000 The British Isles, 1066-1603 F (3-0) [0.50]</td>
<td>A comparative survey of the histories of England, Scotland, Ireland and Wales during the Medieval and Early Modern eras. Stress will be placed upon common themes such as institutional development, warfare and the often violent interaction between the English and the Celtic peoples.</td>
<td>Department of History</td>
<td></td>
<td></td>
<td>This course will explore the history of the moment to understand why the 9/11 happened and examine 9/11’s lasting legacy for both the West and the Arab-Muslim world. It will examine how the West was historically perceived in the Arab World, as well as the growth of Islamophobia in the US, Canada and Europe. This course will reflect on the intellectual climate of the US and the Arab world within a historical and political context often neglected, misunderstood, or ignored by proponents of the “clash of civilizations” argument.</td>
</tr>
<tr>
<td>HIST*2020 Film as History W (2-1) [0.50]</td>
<td>This course will consider film both as a source and as a comment on the past. Topics will vary depending on instructor expertise, and may include film as propaganda, the city in film, film as myth, women and gender in film, film and war.</td>
<td>Department of History</td>
<td></td>
<td></td>
<td>Students wishing to take a 4000 level course must have pass standing in at least 10.00 university credits.</td>
</tr>
<tr>
<td>HIST*2040 War and Society W (3-0) [0.50]</td>
<td>Concentrating on developments following the introduction of gunpowder, the course will consider the evolution of military strategy and tactics, the impact of technology on warfare, and the relationship between war and civilian populations.</td>
<td>Department of History</td>
<td></td>
<td></td>
<td>This course will explore the Celts of Ireland and Britain from the time of the druids to the post-millennium emergence of literature relating to a king called Arthur. Reflecting on what we know of the Celts, how we know it, and what the term means, the course will examine topics such as the development of kingdoms and elite ‘heroic’ culture, the spread of Christianity, the law, everyday life and the family, art and literature, and the interaction between the Celts and their neighbours.</td>
</tr>
</tbody>
</table>
HIST*2200 The Medieval World F (3-0) [0.50]
The major events and developments in Europe, north Africa and Western Asia from the fall of the Roman Empire to 1500 a.d. Emphasis will be placed on the evolution of western Christianity, the rise and expansion of Islam, the emergence of the University, and the growth of literacy and print culture culminating in the humanist movement of the late Middle Ages.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2220 Buying and Selling: Consumer Cultures S (3-0) [0.50]
This course explores how the things we buy shape our personal identities and how individuals relate to corporations and advertisers, in the context of the emergence of modern consumer society from the 18th century to the present. It critically examines the shift from home-production economies to mass production. Examining how developments such as department stores, product branding, modern advertising, urbanization, and suburbanization have shaped society, politics, and the economy, the course provides a historical context for contemporary debates about consumer culture.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2220 Women, War and Nation F (3-0) [0.50]
This course is a survey of the inter-connected nature of gender constructs, nation-states and violence in history, primarily focused on the nineteenth and twentieth centuries. This course proceeds in a roughly chronological order, examining individual, nations, revolutions, and wars across the globe. We engage in individual and comparative studies to question the gendered origins and effects of nationalism and violence in history – and their continuing relevance.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2250 Environment and History W (3-0) [0.50]
An introduction to the field of environmental history - its nature and uses. This course provides a historical perspective to environmental issues. It examines the causes and impact of human-induced modification of the natural world in selected areas of the globe, the evolution of attitudes and ideas about the natural world over time and the growth of conservation/environmental issues and movements.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2260 Religion and Society W (3-0) [0.50]
This course surveys the major trends in religious beliefs and practices and their social impact since the Reformation. The focus of the course is on the British Isles and North America with some discussion of developments in Continental Europe.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2280 Hockey in Canadian History S (3-0) [0.50]
Hockey provides a valuable prism through which major cultural, socio-economic and even political developments within Canada can be reflected. This course reviews the considerable role that hockey has played in Canada's post-Confederation history. From the late nineteenth century and throughout the twentieth century, hockey has helped to inform the nation's sense of self and has also reflected prevailing social attitudes and cultural values within Canada.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2300 The United States Since 1776 F (3-0) [0.50]
This course provides a survey of United States history from the Revolutionary period to the present. Course lectures, readings and assignments ask students to interrogate historically the social, cultural, economic and political changes and continuities in America, as well as the nation's emergence as a superpower.
Prerequisite(s): 2.00 credits
Restriction(s): HIST*2150, HIST*2650
Department(s): Department of History

HIST*2340 Slavery and Migrations in the Atlantic World, 1500-1850 W (3-0) [0.50]
The course will deal with the forced migration of Africans resulting from the Atlantic slave trade and the indentured labor migration of Indians to the Caribbean Isles, the latter which was associated with the demise of the slave trade and slavery. Issues to examine will include a comparison of forces internal and external to Africa and India productive of the exodus, the nature of diaspora communities established by the both set of migrants, and the socio-political and economic dynamics involved in their establishment as citizens of their new societies during the period.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2450 The Practising Historian F (3-0) [0.50]
This course is designed to acquaint students with the development of historical writing, the interpretive problems surrounding the study of history, and the methods employed by historians.
Prerequisite(s): 2.00 credits, including 0.50 credits in History at the 1000 level
Department(s): Department of History

HIST*2510 Modern Europe Since 1789 F (3-0) [0.50]
This course will deal with the emergence of modern European society as the result of socio-economic and consequent political changes from the French Revolution, through the World Wars, to the collapse of communism and the formation of the European Union.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2600 Post-Confederation Canada W (3-0) [0.50]
This course is a study of selected events and issues in post-Confederation Canadian history including political, economic, social, and cultural developments.
Prerequisite(s): 2.00 credits, including 0.50 credits in History at the 1000 level
Department(s): Department of History

HIST*2820 Modern France Since 1750 U (3-0) [0.50]
This course is designed to acquaint students with the development of historical writing, the interpretive problems surrounding the study of history, and the methods employed by historians.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2850 Ancient Greece and Rome W (3-0) [0.50]
The history of the Mediterranean World from prehistoric Greece through Classical Greece and Rome to the legalization of Christianity in the Roman Empire in the 4th century will be covered in this course.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2890 Early Islamic World F (3-0) [0.50]
This course is designed to acquaint students with the development of historical writing, the interpretive problems surrounding the study of history, and the methods employed by historians.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2910 Modern Asia W (3-0) [0.50]
An introduction to the histories and cultures of Asia since 1750. This course will consider the evolution of Asian religions, cultural identities, concepts of state and of society in the modern era.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*2920 Republican Latin America W (3-0) [0.50]
This course will study selected themes in the history of Latin American republics from the independence period to the modern era.
Prerequisite(s): 2.00 credits
Department(s): Department of History
XII. Course Descriptions, History

HIST*2930 Women and Cultural Change F (3-0) [0.50]
Using gender and ethnicity as the main categories of analysis, this course examines the history of women within one global geographical region such as Asia, South America and the Caribbean or North America. The roles women have played in political, economic and private life will be emphasized.
Prerequisite(s): 2.00 credits
Department(s): Department of History

HIST*3020 Sexuality and Gender in History F (3-0) [0.50]
This course provides an introduction to the issues of sexuality and gender within history. The course will enable students to develop an understanding of how issues of masculinity, femininity, and sexuality were developed and defined across cultures. The chronological and geographic focus of the course may vary according to the interests and expertise of the instructor.
Prerequisite(s): 7.50 credits including 1.00 credits in History
Department(s): Department of History

HIST*3070 Modern India W (3-0) [0.50]
This course studies the history of modern India from 1757 to the present day. Topics include: European and British imperialism in India, Indian reactions to imperialism, socio-religious movements, the birth of nationalism and the nation-state in India, civil society and social issues in a developing nation, regionalism, foreign policy and India’s place in the 21st century.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3080 United States in the World F (3-0) [0.50]
This course will cover the history and culture of the United States as a global phenomenon. Thematic topics will go beyond foreign policy and military history to include imperialism, immigration, globalization, race, gender, ethnicity, consumption, tourism, and international cultural industries.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3130 Popular Culture and Punishment, 1700-1900 S,F (3-0) [0.50]
The course will survey the social, political and intellectual influences upon the leisure activities of Europeans and Americans in the period with special reference to institutions such as the prison, the asylum, the reformatory and the regulation of popular culture and leisure activities. Witchcraft and the witch-hunt will be discussed.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits including (HIST*1010 or SOC*1500)
Department(s): Department of History

HIST*3140 Witch-hunts and Popular Culture S,F (3-0) [0.50]
This course will explore the phenomenon of the 'witch-hunts' in early modern Europe through a focus on Scotland in the period 1560-1700. In addition to placing the witch-hunts in their historical context by providing students with the background to Scotland’s political, religious, and social history in the early modern period, the course will introduce students to the considerable body of historical writing on the subject of the witch-hunts and give them hands on experience with primary source documents in order to discuss specific witch trials themselves. Popular and elite conceptions of witchcraft will be explored, as well as gender history.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 7.50 credits including 1.00 credits in History
Department(s): Department of History

HIST*3150 History and Culture of Mexico U (3-0) [0.50]
This course will cover the history and culture of Mexico from its Pre-Columbian civilizations to the present. Topics may include: Aztec and Mayan civilizations, European discovery and conquest, inquisition, convents, independence, the Mexican revolution, indigenismo, NAFTA and Zapatista insurgency in Chiapas.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3160 Canadian Political History U (3-0) [0.50]
This course consists of a detailed study of the background and development of the Canadian political process and culture. It devotes special attention to the changing role and character of the state.
Prerequisite(s): 7.50 credits including (1 of HIST*2100, HIST*2600 or HIST*2601/2, POLS*1400, POLS*2300)
Department(s): Department of History

HIST*3180 Canada Since 1945 U (3-0) [0.50]
This course provides an in-depth examination of political, social, cultural, and economic changes in Canada since the Second World War. Particular attention will be paid to the increased diversity of the Canadian population, the development of Canadian institutions, and the changing role played by Canada in the world.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3200 Youth in History F (3-0) [0.50]
This course examines the social history of childhood, youth and adolescence in western culture and how life-cycles vary as a function of class, race and ethnicity, gender and sexuality. It will examine the experiences of young people in different historical eras. Questions to be explored include: Does the notion of adolescence transcend history and culture? How have experts constructed institutions such as the high school, the juvenile justice system, the media, medical and social scientific research to channel youth rebellion? Historical case studies will be selected to show generations in political, community and domestic conflict. This interdisciplinary history course draws upon sociology, anthropology, cultural studies, art, music, literature, academic writing and research from Europe, Canada and the United States.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3230 Spain and Portugal, 1085 to 1668 F (3-0) [0.50]
The course examines the history of Spain and Portugal from the period of the reconquista to overseas expansion. The course covers the political, diplomatic, religious and cultural development of early modern Spain and Portugal and the rise of the overseas empire.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3240 Food History F (3-0) [0.50]
This course will examine the history of food and foodways from the early 19th century to the present. It will explore the impact of changing agricultural practices and the growth of the food processing industry, including the rise of nutritional science, and the impact on eating patterns.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3260 Cinema and the Moving Image F (3-0) [0.50]
This course provides a historical survey of cinema and the moving image, as well as the material, cultural, political and technological contexts of their production. Students will come to understand the broad development of the medium over the past one hundred and thirty years, beginning with early, pre-cinematic moving image technologies and ending with an analysis of the influence of other media and merchandizing on cinema. Students will also become familiar with crucial terminology for analyzing and writing about how films have been constructed and how they communicated to audiences over time. Geographical or thematic focus may vary according to the expertise of the instructor.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3270 Revolution in the Modern World W (3-0) [0.50]
This course offers a comparative analysis of revolutionary movements in the modern world. It focuses on the French Revolution, the development of a revolutionary tradition in the 19th century, the Russian Revolution, and the Communist Revolution in China. Comparative themes include the relative importance of ideology and class conflict, the emergence of professional revolutionaries, and the relationship between revolutions and international relations.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3310 Disease and History U (2-0) [0.50]
This interdisciplinary course provides an introduction to the historical interactions between disease and human society from the Middle Ages to the present. Major themes may include the co-construction of disease and society; disease and urbanization; disease and colonialism; disease and globalization; disease and gender.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3320 Modern China F (3-0) [0.50]
This course examines the history and culture of China since the nineteenth century. Topics may include economics, gender, imperialism, militarism, politics, and religion.
Prerequisite(s): 7.50 credits
Department(s): Department of History
HIST*3330 The Scottish Diaspora W (3-0) [0.50]
The course offers a comprehensive overview of Scottish Diaspora history, focusing on a broad range of themes and settlement locations. Covering the period c.1750 to 1945, the historical geographies of the Scottish Diaspora explored include the ‘near Diaspora’ of England, Wales and Ireland; Continental Europe; the traditional settler Dominions of the United States; Africa; and Asia.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3330 Modern Germany U (3-0) [0.50]
This course will be devoted to a study of major themes in modern German history, and to an analysis of Germany’s role in post-war Europe. Topics include the unification of Germany, the role of nationalism in modern German history, the significance of the Bismarck era, the rise of Hitler and the development of the two Germanies until their reunification in 1990.
Prerequisite(s): 7.50 credits
Restriction(s): HIST*2830.
Department(s): Department of History

HIST*3330 History and Culture of Brazil W (3-0) [0.50]
This course will cover the history and culture of Brazil from its early indigenous civilizations to the present. Topics may include: European discovery and contact, the colonial era, slave trade and slavery, Dutch occupation, hybrid Afro-Christian religions, the Inquisition, independence, abolitionism, samba and carnival, dictatorships, soccer, favelas, and issues related to race, class, gender and the environment.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3370 Canada and the First World War F (3-0) [0.50]
This course examines Canada’s role in the First World War. The question of how much the war was a transformative experience for Canadians will be central to students’ learning, as they grapple with issues pertaining to race, ethnicity, class, gender, militarism, pacifism, religion, age, and memory.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3380 British Imperialism in Asia and Africa F (3-0) [0.50]
This course examines the British Empire from the 18th through the 20th centuries. It focuses on: the empire in Asia and Africa; ideologies of empire; and European and non-European approaches and reactions to empire.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3390 Governments and Indigenous Spaces F (3-0) [0.50]
This course examines how colonial and neo-colonial governments interacted with Indigenous societies by restricting social, economic, and cultural activities. It will explore the day-to-day impacts of colonial and neo-colonial governments on Indigenous spaces. Engagement with case studies will deepen student understanding of both bureaucratic violence and Indigenous survivance.
Prerequisite(s): 7.50 credits including (1.00 credits in History or IDEV*2400)
Department(s): Department of History

HIST*3410 Religion in 19th-Century Africa F (3-0) [0.50]
This course will introduce students to the dynamic 19th-century religious landscape of Africa before European colonization, examining the role of Islam and Christianity in the social organization and political transformation of African societies. It will examine how both these religions (in Sudanic, North and Northeast Africa on the one hand) and indigenous religions (in much of southern Africa on the other) intermediated and coloured the character of the encounter between African societies and European colonizers. Attention will be given to the nature and impact of the Islamic revolutions that broke out across much of Sudanic and Northeast Africa during this period and the intersections between indigenous African religions, missionary Christianity, and the socio-political transformations that swept across much of coastal West and southern Africa.
Prerequisite(s): 7.50 credits including (1 of HIST*1150, HIST*2340, HIST*2960 )
Department(s): Department of History

HIST*3440 The Global Sixties F (3-0) [0.50]
This course examines the political, social, and cultural history of one of the most important decades in the twentieth century: the sixties. It adopts global perspectives to ask how and why the sixties mattered in the development of the modern world. A diverse range of themes may be covered, from the political controversies stirred up by the Vietnam War, decolonisation in Africa, Mao’s cultural revolution, the Cuban missile crisis, and the upheavals of 1968 to the social changes occasioned by the introduction of the birth control pill, the rise of The Beatles, and the emergence of television.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3450 The Uses of History U (2-1) [0.50]
As an introduction to the use of history outside the classroom, this course discusses public history and memory through the activities of governments, corporations, and voluntary associations. History as political propaganda, marketing strategy, and ideological support in a global and historical context is examined. Discussions will focus on history as presented in films, television, monuments, museums, commemorations, and other public and popular media.
Prerequisite(s): 7.50 credits including HIST*2450
Department(s): Department of History

HIST*3460 Natural Disasters in Global History W (3-0) [0.50]
The history of natural disasters offers insights into how the relationships between human societies and their natural environments have changed over time. Through a series of case studies, the course will trace the evolving history of natural disasters in global context from the late medieval period to the present. The course will address thematic issues including the construction of vulnerable landscapes and societies; the short-term impacts of disasters; changing patterns of disaster relief; and disasters and social change.
Prerequisite(s): 7.50 credits
Restriction(s): HIST*3430
Department(s): Department of History

HIST*3470 Independent Reading U (3-0) [0.50]
A course of independent study, based on a comprehensive reading list provided by the department. Evaluation will be based on two written examinations.
Prerequisite(s): 7.50 credits
Restriction(s): Instructor consent required.
Department(s): Department of History

HIST*3480 Workplace Learning U (0-0) [0.50]
An independent study course based on either History related voluntary or paid workplace experience. Evaluation will be based on assignments relating to work duties. These will usually be in the form of a weekly journal, and a major project relating to some specific aspect of the work experience. Students interested in this option must have their project approved by the department prior to the semester in which they plan to engage in their work experience. Students will then be assigned to a faculty supervisor who will oversee the project.
Prerequisite(s): 7.50 credits including 1.50 History or equivalent credits
Restriction(s): Instructor consent required.
Department(s): Department of History

HIST*3490 Canada and the Second World War W (3-0) [0.50]
This course examines Canada’s experience with the Second World War. Topics include: Canada’s changing roles in the world; the role and growth of the state; gender and sexuality; conscription and English-French relations; race, ethnicity and the experiences of Indigenous peoples during the war; the homefront and social transformations; military engagements and soldier experiences; nationalisms, citizenship and identity; wartime legacies and post-war ramifications; public history and the memory of the war.
Offering(s): Offered through Distance Education format only. Offered in odd-numbered years.
Prerequisite(s): 7.50 credits
Department(s): Department of History

HIST*3520 The Vikings: Early Medieval Encounters W (3-0) [0.50]
This course explores the topic of the Vikings in early medieval culture (700 - 1100). The focus will include the role of violence in early medieval society, the construction of the ‘Other’, as well as medieval and modern historiography. It provides students with enhanced knowledge of early medieval Europe, the Byzantine Empire and Russia.
Prerequisite(s): 7.50 credits including (HIST*2000 or HIST*2200)
Department(s): Department of History

<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST*3600</td>
<td>Quebec and French Canada U (3-0) [0.50]</td>
<td></td>
<td>This course examines selected themes in the social, economic, political and cultural evolution of Quebec and its relations with the rest of Canada. The course may also examine the development of French Canadian and Acadian communities in other provinces.</td>
</tr>
<tr>
<td>HIST*3610</td>
<td>Social History U (2-0) [0.50]</td>
<td></td>
<td>This course examines selected themes in the development of Canadian society such as the role of class, the social consequences of industrialization and urbanization, immigration, ethnicity and religion, education, and culture.</td>
</tr>
<tr>
<td>HIST*3620</td>
<td>Early Modern France U (3-0) [0.50]</td>
<td></td>
<td>This course surveys French History from the renaissance to the French Revolution. Students will examine the emergence of the powerful monarchy, 16th-century religious conflict and civil war, and the social, political and intellectual developments of the 17th and 18th centuries, which culminated in the 1789 Revolution.</td>
</tr>
<tr>
<td>HIST*3630</td>
<td>Modern Middle East W (3-0) [0.50]</td>
<td></td>
<td>This course explores struggles for national independence in the region after 1919, the impact of the developing oil industry, the creation of Israel and the resulting Arab-Israeli conflict, the rise of American influence, the divisiveness of Cold War politics, and the role of women in contemporary Islamic societies.</td>
</tr>
<tr>
<td>HIST*3640</td>
<td>Ottoman Empire, 1300-1923 W (3-0) [0.50]</td>
<td></td>
<td>This course examines the rise of the Ottoman Empire in the 14th century, both in Europe and the Middle East, and traces its evolution until its demise in the 20th century. Students investigate the historiographical debates surrounding various aspects of writing Ottoman history.</td>
</tr>
<tr>
<td>HIST*3650</td>
<td>Religion in Africa Since 1900 W (3-0) [0.50]</td>
<td></td>
<td>This course will examine the intersection of Islam, Christianity, and the colonial and post-colonial experience of Africans and how these religions helped to determine the opportunities for and limits of colonial impact and anti-colonial nationalist activities. It will also examine the role of Islam in North Africa and of Christianity (and to a limited extent of Islam) in much of sub-Saharan Africa in the emergence of a new class of elite through whose leadership modern African nation states emerged after independence. Finally, it will examine the increasingly globalized characteristics of these religions and the pivotal role they have played in the emerging socio-political realities of late 20th and early 21st century Africa.</td>
</tr>
<tr>
<td>HIST*3660</td>
<td>Gender and Culture W (3-0) [1.00]</td>
<td></td>
<td>This course will examine how masculinity and femininity has been constructed in popular culture using newspapers, magazines, advertisements, films and novels. Careful attention will be paid to the intersections of gender, race and class. In addition to analyzing some outstanding texts in this field, students will have the opportunity to write an original essay on a topic of their choice. (H)</td>
</tr>
<tr>
<td>HIST*3670</td>
<td>Canadian History (2-0) [0.50]</td>
<td></td>
<td>This advanced research seminar asks students to consider the role of the individual in history by reading theoretical works and examples drawn from the major schools of thought on this issue. Students will undertake to write a biography that will utilize primary sources and will include a detailed historiographical discussion of the works available on their chosen subject. (H)</td>
</tr>
<tr>
<td>HIST*3680</td>
<td>Topics in Scottish History U (3-0) [1.00]</td>
<td></td>
<td>This is a seminar course dealing with selected aspects of Scottish social, economic and political history. The seminars will be based upon an examination of primary sources from the University library's extensive Scottish Collections, as well as secondary literature. Students should consult with the department for specific offerings. (H)</td>
</tr>
<tr>
<td>HIST*3690</td>
<td>Reformation U (3-0) [0.50]</td>
<td></td>
<td>The changes in religious, social and cultural life in 16th century Europe will be discussed. This course will examine the impact of humanism, the developments in urban culture known as the Renaissance, the reform movements in central and western Europe, the Catholic response, and the resulting disintegration of the medieval social order.</td>
</tr>

Revision: 2020-2021 Undergraduate Calendar
HIST*4070 Experiential Learning: Research S,F,W (3-0) [1.00]
This course offers an opportunity for students to independently develop skills in the practice of historical research, such as working with archives, digitization, and database management. Students will work under the supervision of individual faculty members. Students must make arrangements with the faculty advisor well before course selection. (H)
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4080 Indigenous Resistance Writing and Movements F (3-0) [1.00]
This course explores both individual and collective acts of Indigenous resistance in settler-colonial societies. Diverse forms of resistance will be studied from text-based to action-based movements. Resistance may be examined through notable figures, delegations, marches, occupations, and literature. (H)
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4100 Africa and the Slave Trades U (3-0) [1.00]
This course will discuss the origins, character, and operation of slavery and the export slave trades in Africa. It will examine the interaction between domestic slavery and the export slave trades, on the one hand, and demographic, political, economic, social and cultural impact on African states and societies, on the other. Other themes to be examined include slave resistance in Africa, and abolition and the introduction of legitimate commerce and their impact on Africa. (H)
Prerequisite(s): 10.00 credits including (1 of HIST*2340, HIST*2960, HIST*3410, HIST*3910)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4120 Topics in Global History U (3-0) [1.00]
This course focuses on issues that emphasize the history of connections between different parts of the world. Topics may include the growth of the world economy; transformations of the global environment; trade and exchange; diasporas and migration. (H)
Prerequisite(s): 10.00 credits including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4140 Sexuality in the Middle Ages F (3-0) [1.00]
This course will provide a thematic approach to the foundations of western attitudes towards sex and sexuality as they developed in the European Middle Ages. It will examine the complex interweaving of Greek and Roman medicine, medieval Christian canon law and theology, and Germanic popular beliefs, which together provided the underpinnings of western values and practices pertaining to human sex and sexuality, with enduring results. The course will take an historiographical approach to topics and themes. (H)
Prerequisite(s): 10.00 credits including (1 of HIST*2000, HIST*2200, HIST*3020)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4160 Seminar in Canadian Political History U (3-0) [1.00]
Political events, key personalities, the political process, and state institutions and institutions will be analyzed with a view to understanding historical aspects of the political system and culture in Canada. (H)
Prerequisite(s): 10.00 credits including (HIST*2100 or HIST*2600)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4170 Exploration of Digital Humanities W (3-0) [1.00]
This course is designed to introduce students to applications of new and inter-disciplinary digital humanities approaches, methodologies and tools, and to explore their application to text, image, sound, map, and other media sources. It will appeal to students in literature, history, fine arts, and music who want an introduction to state-of-the-art digital humanities research. There will be flexibility to accommodate the specific disciplines and interests of the students. (H)
Prerequisite(s): 10.00 credits
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4180 American Identities F (3-0) [1.00]
This course analyzes how Americans have constructed and enacted identities in the U.S. as citizens and consumers through investigating concepts such as 'race', ethnicity, gender, sexuality, class, regional distinctions, and nationalism. (H)
Prerequisite(s): 10.00 credits including (HIST*2300 or HIST*2650)
Restriction(s): HIST*4210. Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4200 Health, Mind and Body F (3-0) [1.00]
This is a seminar course which will explore the history of health, the body and the mind. Possible topics include: the history of athletics and physical fitness, the history of disability, the history of nutritional science and advice, the history of women’s health, the history of disease, the history of mental illness, and the history of psychiatry. (H)
Prerequisite(s): 10.00 credits, including 1.50 credits in History at the 3000-level
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4220 Cities and Canadian Culture U (3-0) [1.00]
Reflecting the fact that Canada's population has been predominantly urban for a century, this seminar explores the role of urban centres in shaping Canadian cultural identity. Particular focus will be placed on the ways that city living and city form have affected the expression of Canadian identity through such topics as spectator sports, uses of public spaces, and metropolitan control of print and broadcast media (H)
Prerequisite(s): 10.00 credits including (HIST*2100 or HIST*2600)
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4270 Topics in Modern Asia W (3-0) [1.00]
This course will examine select topics in the development of Asian countries from the 18th to the 21st Century. Select themes including imperialism, nationalism, economics, society, and gender will be examined in a variety of Asian countries. (H)
Prerequisite(s): 10.00 credits including HIST*2910.
Restriction(s): HIST*4900
Department(s): Department of History

HIST*4280 Poverty and Policy in the Victorian Age U (3-0) [1.00]
Starting with the debates over the New Poor Law of 1834, this course will examine the changing content of the notion of poverty, and changing methods adopted to treat it. It will also look at the lives of the poor, in so far as these can be reconstructed from contemporary sources. (H)
Prerequisite(s): 10.00 credits including HIST*2500.
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4450 Life, Death and Migrations F (3-0) [1.00]
This seminar uses quantitative sources and methods to explore such themes as social inequality and demographic experience since 1800. It examines the value of such data for policy purposes, as well as the social and cultural contexts in which surveys are developed and undertaken. Students develop presentational and analytical skills through research projects. (H)
Prerequisite(s): 10.00 credits including HIST*2450, and at least 1.00 credits in History at the 3000 level or above.
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts.
Department(s): Department of History

HIST*4470 Special History Project Seminar I U (3-0) [0.50]
This course is designed to train honours students in the techniques of research, interpretation and writing of history. The student will choose a topic for intensive study from a list approved by the department. (H)
Prerequisite(s): 10.00 credits
Restriction(s): Restricted to students in the B.A. Honours program with a minimum of 70% average in all History course attempts. Instructor consent required.
Department(s): Department of History

## Horticultural Science

### HORT*1120 Grape and Wine Science W (3-0) [0.50]
This course will examine whole plant physiology as illustrated by the perennial system of a grapevine. Students will investigate all the primary functions of a green plant, with each function then related to a grapevine and how it functions in nature. Each function of the vine will be connected to the ultimate effects on fruit quality and by extension, wine quality throughout the course.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** Not acceptable for students in the BSC, BSC(Agr) or BSC(Env) programs.

**Department(s):** Department of Plant Agriculture

### HORT*1130 Science of Gardening F (3-0) [0.50]
This course examines the growth, development and physiology of horticultural species used for food and ornamental aesthetic purposes. The interaction between plants and impact of environmental factors as such as light, temperature, CO₂ and humidity on plant processes will be emphasized.

**Offering(s):** Not acceptable for students in the BSC, BSC(Agr) or BSC(Env) programs.

**Department(s):** Department of Plant Agriculture

### HORT*2450 Introduction to Turfgrass Science F (3-2) [0.50]
The biology, ecology, adaptation, and uses of cool-season and warm-season turfgrass species and cultivars will be introduced. Topics will include the identification and life strategies of different turfgrass species, principles of reproduction and techniques for establishment of turfgrass by seeding, sprigging and sodding. The ecology of management including mowing, irrigation, cultivation, mineral nutrition, repair and renovation, and management of stresses (thatch, weeds, insects, disease) will be covered. The turfgrass industry will be introduced, including application of ecological principles to athletic field management, sod production, golf course management, and professional lawn care.

**Prerequisite(s):** BIOL*1040 or [BIOL*1090, (1 of BIOL*1050, BIOL*1070, BIOL*1080)]

**Restriction(s):** HORT*3220

**Department(s):** Department of Plant Agriculture

### HORT*3010 Annual, Perennial and Indoor Plants - Identification and Use F (2-2) [0.50]
This course focuses on the identification and adaptation of annual, biennial, perennial herbaceous and indoor plants. Lectures will be integrated with outdoor laboratory activities to emphasize utilization of plant groups in park, perennial border, general landscape botanic garden and intersoscape settings.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 1 of AGR*2470, LARC*2240, 0.50 credits in botany

**Department(s):** Department of Plant Agriculture

### HORT*3050 Management of Turfgrass Insect Pests and Weeds F (3-2) [0.50]
Biological behavior and impact of insect pests of turfgrass and recognition of symptoms will be emphasized. Identification and management of weed species commonly found in turfgrass will be discussed. Environmental impacts of cultural and chemical control techniques will be discussed for each group of pests and advances in chemical and biological control methods will be developed.

**Prerequisite(s):** HORT*2450

**Restriction(s):** DTM*3300

**Department(s):** Department of Plant Agriculture

### HORT*3150 Principles and Applications of Plant Propagation F (2-2) [0.50]
Plant propagation is the art and science of multiplication of plant material involving the application of the principles of plant growth and development and the techniques of mass production. This course will explore biological, commercial, environmental, and social dimensions of plant propagation systems with emphasis on global trends in the plant production industry.

**Prerequisite(s):** AGR*2470 or BOT*2100

**Restriction(s):** HORT*3230, HORT*3350

**Department(s):** Department of Plant Agriculture

### HORT*3270 Medicinal Plants W (3-0) [0.50]
This course will focus on the application of recent biotechnology advances to elucidate the physiology, biochemistry, and conservation biology of medicinal plants for enhancing their efficacy in preventing and curing human disease.

**Prerequisite(s):** 1 of BIOL*1050, BIOL*1070, BIOL*1080, BIOL*1090

**Department(s):** Department of Plant Agriculture

### HORT*3280 Greenhouse Production W (3-3) [0.50]
This course examines the principles and practices of production, culture and marketing of greenhouse flower and vegetable crops.

**Prerequisite(s):** 1 of AGR*2050, AGR*2470, BOT*2100

**Department(s):** Department of Plant Agriculture

### HORT*3310 Plants, Food, and Health W (3-0) [0.50]
The course provides an in-depth understanding of plants grown for food, spices and grains as they relate to humans in terms of disease prevention and health. Plants and their familial characteristics, the metabolic pathways characteristic to specific food types, and their effects on human physiology are discussed. Topics are introduced in the context of world food habits, plants as food and hot spots of healthy populations and their food customs.

**Prerequisite(s):** BIOL*2580

**Department(s):** Department of Plant Agriculture

### HORT*3430 Wine-Grape Culture W (3-0) [0.50]
The history and impact of grape-growing in the New World will be presented and studied. Grape (Vitis) taxonomy (ampelography) and physiology will be studied as it relates to the Old World/New World wine growing. The physiology of fruiting and vegetative balance for managing wine quality in the vineyard will be studied in detail, especially as it pertains to cool climate and northern limit grape growing for premium wine quality. End product management and wine regions of the world will be examined.

**Prerequisite(s):** Offered through Distance Education format only.

**Department(s):** Department of Plant Agriculture

### HORT*3510 Vegetable Production F (3-3) [0.50]
The principles of vegetable production will be studied in terms of sustainable crop management and the impact of biotic and abiotic factors will be discussed. Consideration will also be given to storage processing and marketing.

**Prerequisite(s):** 1 of AGR*2050, AGR*2470, BOT*2100

**Department(s):** Department of Plant Agriculture

### HORT*4200 Plants, the Environment and Society W (3-0) [0.50]
The course will explore the environmental impact of plants in urban and rural landscapes and society's perception of the how those areas should be used. Emphasis will be placed on the ecology of managed landscapes and issues surrounding society's perception of management practices. The impact of public perception about the management and environmental impact of plants in urban and rural landscapes will be discussed, including the issues surrounding the use and maintenance of managed landscapes ecosystems.

**Prerequisite(s):** 1 of AGR*2470, BOT*2100, ENV*2330, LARC*2240

**Department(s):** Department of Plant Agriculture

### HORT*4300 Postharvest Physiology W (3-3) [0.50]
This course provides an examination and discussion of physiological and biochemical processes unique to postharvest development and deterioration. Principles and practices of storing fruits, vegetables, and florists' and nursery stocks as well as marketing pathways for horticultural crops will be considered.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** AGR*2470

**Department(s):** Department of Plant Agriculture

### HORT*4380 Tropical and Sub-Tropical Crops F (3-0) [0.50]
This course examines the production and utilization of tropical and sub-tropical crops in farming systems.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** 1 of AGR*2470, BOT*2100, (AGR*2050, AGR*2150)

**Department(s):** Department of Plant Agriculture

### HORT*4420 Fruit Crops W (3-3) [0.50]
Growth patterns, fruiting characteristics and adaptation to environmental conditions of fruit crops in temperate regions will be presented. Classification, cultural practices including propagation and the physiological principles underlying these practices will be emphasized.

**Prerequisite(s):** 1 of AGR*2050, AGR*2470, BOT*2100

**Department(s):** Department of Plant Agriculture
This course emphasizes on plant stressors and physiological responses of plants to stress. Interactions between the soil system, the plant and the environment are considered, with focus on how soil physical, chemical and biological properties as well as environmental factors affect turfgrass plant health and physiology. Principles and strategies of biological control, cultural practices that affect plant health, pest life cycles and pest population levels are addressed in order to develop integrated management plans for turf aimed at reducing pest levels in an environmentally benign manner.

Prerequisite(s): AGR*2050 or AGR*2470

Department(s): Department of Plant Agriculture
School of Hospitality, Food and Tourism Management

**HTM*2070 Event Management W (3-0) [0.50]**
This course takes a holistic approach to the sales, servicing and management of the meetings, events, conventions, exhibitions, and incentive travel industries. Emphasis is placed on both the supply (product and service providers) and demand (meeting and event managers) elements of the industry. The course focuses on the unique operational and managerial functions of a significant sector of the tourism and hospitality industry.

**Prerequisite(s):** 1 of HTM*1000, HTM*1160, HTM*1700, HTM*2020

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*2220 Communication and Media Strategy in Sport and Events F (3-0) [0.50]**
All successful communication and media strategies in sport and events must take into account the complexities of this diverse and dynamic market of sport-related goods and services. This course examines sport and event communications through the investigation of internal and external factors that shape consumer demand in related industry sectors with an emphasis on digital media applications. Specifically, it will analyze the social, cultural and economic factors influencing the marketing of products, services and ideas.

**Prerequisite(s):** HTM*2020, MCS*1000

**Restriction(s):** This is a Priority Access Course. Restricted to students in BCOMM.SPMT, BCOMM.SPMT.C. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*2700 Understanding Foods F,W (3-2) [0.50]**
This course explores the chemistry behind food preparation, food safety and handling; and the impact of different cooking methods on the colour, flavour and texture of food. Students will apply knowledge by cooking and assessing a series of prepared products.

**Restriction(s):** This is a Priority Access Course. Restricted to students in BCOMM.HAFA, B.COMM.HAFA:C, BCOMM.HTM, BCOMM.HTM:C or BCOMM.TMGT.

**Prerequisite(s):** 2.00 credits

**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*2740 Cultural Aspects of Food F (3-0) [0.50]**
Students are provided with an opportunity to learn about numerous cultural factors that influence food selection, preparation, and consumption patterns. Food history, religions, geographic location and culture are studied to develop an understanding of the impact of these factors on food related behaviours.

**Prerequisite(s):** 2.00 credits

**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*3020 The Impact of Business on Sport Industry F (3-0) [0.50]**
To understand the role of a sports manager, students will apply financial decision making concepts to evaluate the continually evolving sports industry. Students will explore how globalization trends, technological advancements, and demographic changes are impacting the sports industry and their effect on supply, demand, pricing, commercialization, labour policy, and revenue in the sports industry.

**Prerequisite(s):** HTM*2020, (ECON*2560 or FIN*2000)

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*3030 Beverage Management F (2-2) [0.50]**
Students will examine the beverage industry, including bottled water, energy drinks, coffee, tea and alcoholic beverages. In addition to the laws regulating production, labelling and marketing of these products, the course discusses the active components of beverages and their impact on the human body, consumption risks and recommended uses.

**Prerequisite(s):** 9.00 credits

**Restriction(s):** Students must be of legal drinking age in Ontario. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** School of Hospitality, Food and Tourism Management
XII. Course Descriptions, Hospitality and Tourism Management

HTM*3060 Lodging Management F (3-0) [0.50]
This course explores the principles and practices of lodging management and related activities. Students will use a systematic approach to lodging front office operations by detailing the flow of hotel business. Topics include rooms forecasting, reservations, registration, occupancy & revenue management, account settlement, a computer-based property management system (PMS), guest relations, and interdepartmental relationships. The essential internal and external information of lodging properties and the industry will be also overviewed and analyzed through multiple-set of industry performance reports.
Prerequisite(s): 9.00 credits including HTM*2010, (HTM*1160 or HTM*2100) 
Department(s): School of Hospitality, Food and Tourism Management

HTM*3080 Marketing Strategy for Hospitality Managers F,W (3-0) [0.50]
This course focuses on major marketing decisions that hospitality managers face in generating and sustaining demand for their products and services through creating value for, and establishing strong relationships with their customers. Course content covers key elements of strategic marketing including, segmentation and target marketing, positioning and branding, pricing, promotions, personal selling, and distribution system decisions within the context of the hospitality and tourism industry.
Prerequisite(s): 9.00 credits including HTM*2010, MCS*1000 
Department(s): School of Hospitality, Food and Tourism Management

HTM*3090 Restaurant Operations Management F,W (2-4) [1.00]
This course covers the application of managerial functions to restaurant and foodservice operations with the emphasis on teamwork and the principles of food production and service in a sustainable commercial restaurant setting. Students gain hands-on understanding of scheduling, purchasing, costing, nutritional analysis, and food safety while operating a student run restaurant.
Prerequisite(s): HTM*2030, HTM*2700 
Restriction(s): FARE*3310. Restricted to students in BCOMM.HAFA, BCOMM.HAFA:C, BCOMM.HTM:RAF, BCOMM.HTM:C:RAF, AHN:DIET 
Department(s): School of Hospitality, Food and Tourism Management

HTM*3120 Service Operations Analysis F,W (3-0) [0.50]
This course presents an overview of strategic analysis of operations management in service industries. Tools and concepts are introduced for planning and evaluating initiatives to support service design, productivity and delivery. Topics include layout, location, productivity, service design and yield management while further developing spreadsheet skills in analytical contexts.
Prerequisite(s): (ACCT*1220 or ACCT*2222), (1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060, STAT*2080) 
Restriction(s): FARE*3310. Restricted to students in BCOMM.HAFA, BCOMM.HAFA:C, BCOMM.HTM, BCOMM.HTM:C, BCOMM.SPMT, BCOMM.SPMT:C or BCOMM.TMGT. 
Department(s): School of Hospitality, Food and Tourism Management

HTM*3160 Destination Management and Marketing F (3-0) [0.50]
This course examines the attractiveness of communities (urban and rural; domestic and international) for visitors and the implications that result from the development of a tourism industry. Methods to encourage visitation are explored as are the attempts to create and manage the development of the community and the tourism industry in a sustainable manner.
Prerequisite(s): 1 of HTM*1070, HTM*2020, HTM*2170 
Restriction(s): Restricted to students in BCOMM.HAFA, BCOMM.HAFA:C, BCOMM.HTM, BCOMM.HTM:C, BCOMM.SPMT, BCOMM.SPMT:C, or BCOMM.TMGT, or BA.EURS Area of Emphasis in European Business. 
Department(s): School of Hospitality, Food and Tourism Management

HTM*3180 Casino Operations Management W (0-0) [0.50]
This course examines the application of business management principles and procedures within casinos. Major topics include: the global and Canadian casino industries, regulation and control, casino accounting and statistics, casino marketing, security and surveillance, human resources, customer service, and specific casino operational management components.
Offering(s): Offered through Distance Education format only. Offered in even-numbered years. 
Prerequisite(s): (1 of BUS*2090, HROB*2090, HROB*2100, ACCT*2230) 
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information. Students must be legal age of 19 or over. 
Department(s): School of Hospitality, Food and Tourism Management

HTM*3220 Sales, Sponsorship and Stakeholder Engagement in Sport W (3-0) [0.50]
This course introduces key tactical applications and practical concepts for future professionals in sport management and covers the major topics of sales, sponsorship and stakeholder engagement in the sport and event industry. The topic of sales includes learning sales techniques and processes related to tickets, suites, sponsorship, merchandise, and other products in the industry. The course delves deeper into sponsorship to build an understanding of this promotional tool. This course addresses engagement is one of the key success factors in the sport business today.
Prerequisite(s): 9.00 credits, HTM*2020 
Restriction(s): This is a Priority Access Course. Restricted to students in BCOMM:SPMT, SPMT:C. Enrolment may be restricted to particular programs or specializations. Please contact the department for more information. 
Department(s): School of Hospitality, Food and Tourism Management

HTM*3780 Managing Food in Canada W (3-0) [0.50]
This course examines management issues in the Canadian food system. Topics such as supply chain management, food legislation and regulation, food safety, consumer food-related behavior, and food product development are studied from the perspective of managers in various organizations comprising the food system.
Offering(s): Offered through Distance Education format only. 
Prerequisite(s): 1 of FOOD*2010, HTM*1700, HTM*2700 
Restriction(s): FARE*3320 
Department(s): School of Hospitality, Food and Tourism Management

HTM*4020 Advanced Concepts in Sport and Event Management W (3-0) [0.50]
Students will apply advanced sport and event business concepts in an interactive setting, using principles and concepts of sport and event management to develop strategic planning and organizational skills. The course applies these concepts towards effective decision-making for stakeholders in relation to financial resource management, contracting, networks, digital elements, revenue generation, operations and emerging issues in the sport and event industry.
Prerequisite(s): 14.00 credits, including HTM*3020, HTM*4080 
Restriction(s): This is a Priority Access Course. Restricted to students in BCOMM:SPMT, BCOMM.SPMTC. Enrolment may be restricted to particular programs or specializations. Please contact the department for more information. 
Department(s): School of Hospitality, Food and Tourism Management

HTM*4050 Wine and Oenology W (2-2) [0.50]
This course provides students with knowledge about the wine industry and will emphasize knowledge about product, purchasing, pricing, and service.
Prerequisite(s): 9.00 credits 
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information. Students must be of legal drinking age in Ontario. 
Department(s): School of Hospitality, Food and Tourism Management

HTM*4060 Advanced Lodging Management W (3-0) [0.50]
This course integrates knowledge and skills in lodging operation, restaurant management, marketing and sales, managerial accounting and finance, revenue management and human resources management. Students will formulate and implement strategic business plans and budgets and evaluate business performance utilizing a hotel simulation program. This course particularly emphasizes development of analytical decision-making and problem solving skills.
Prerequisite(s): HTM*3060 
Department(s): School of Hospitality, Food and Tourism Management

HTM*4080 Experiential Learning and Leadership in the Service Industry F,W (3-0) [0.50]
An integration of the students’ academic studies with their work experiences. Emphasis will be placed on applying and evaluating theoretical concepts in different working environments. Students will investigate the concept of workplace fit applying this to their prospective career path.
Prerequisite(s): 14.00 credits and a minimum of 700 hours of verified work experience in the hospitality, sport and tourism industries. 
Restriction(s): HTM*3150, Restricted to students in BCOMM:HAFA, BCOMM.HAFA:C, BCOMM.HTM, BCOMM.HTM:C, BCOMM.SPMT, BCOMM.SPMTC, BCOMM.TMGT. Instructor consent required. 
Department(s): School of Hospitality, Food and Tourism Management
**HTM*4090 Hospitality Development, Design and Sustainability F (3-0) [0.50]**
This course focuses on the development, design and management of the hospitality built environment. It explores issues related to the planning and development of hospitality and sporting event properties, provides an introduction to property and asset management as related to the hospitality and sport industry, and examines universal design as applied to the 'servicescape', all within the broad context of sustainability.  
**Prerequisite(s):** 14.00 credits including (1 of HTM*1000, HTM*1160, HTM*2020)  
**Restriction(s):** REAL*3890  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4110 Advanced Food Service Operations W (1-7) [0.50]**
This course focuses on the management and operation of food service events. Emphasis is placed on event planning and creativity in menu formulation, operational performance, and guest satisfaction. This includes ambiance, total service and the dynamic relationship between service and the product of food and beverages.  
**Prerequisite(s):** HTM*3090  
**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4130 Current Management Topics U (3-0) [0.50]**
Operating problems in the hospitality and tourism industry are analyzed and discussed using actual case studies. Students should check with the School of Hospitality, Food and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4140 Current Management Topics U (3-0) [0.50]**
Operating problems in the hospitality and tourism industry are analyzed and discussed. Students should check with the School of Hospitality, Food and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4150 Current Management Topics U (3-0) [0.50]**
Operating problems in the hospitality and tourism industry are analyzed and discussed. Students should check with the School of Hospitality, Food and Tourism Management to determine what topic will be offered during specific semesters, and which prerequisites, if any, are appropriate.  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4170 International Tourism W (3-0) [0.50]**
This course encourages students to develop a cross-cultural awareness of the dimensions and issues of tourism, and the trends that shape the various sectors of the industry in every region of the world. Students will gain knowledge of the social, political and economic impacts of tourism globally, the patterns of international travel, regional development and marketing implications.  
**Prerequisite(s):** 14.00 credits including HTM*3160  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4190 Hospitality and Tourism Industry Consultation F,W (3-0) [0.50]**
This is a project-based course that requires students to take a 'systems-thinking' approach to studying current business problems faced by hospitality and tourism organizations. Students are asked to identify issues, determine context, and use evidence-based research and analysis to provide alternative courses of action and recommendations for actual hospitality businesses.  
**Prerequisite(s):** 14.00 credits including ACCT*2230, HTM*3080  
**Restriction(s):** Restricted to students in BCOMM:HAFA, BCOMM:HAFA:C, BCOMM:HTM, BCOMM:HTM:C or BCOMM:TMGT.  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4250 Hospitality Revenue Management F,W (3-0) [0.50]**
This course is an advanced exploration of revenue management concepts, tools and application. The objective of the course is to provide a solid foundation in revenue management for careers in tourism, services, and hospitality management.  
**Prerequisite(s):** FARE*3310 or HTM*3120  
**Department(s):** School of Hospitality, Food and Tourism Management

**HTM*4500 Special Study in Hospitality and Tourism U (3-0) [0.50]**
The special study option is designed to provide senior undergraduate students with an opportunity to pursue an independent course of study. The topic selected will be determined by agreement between the student and the faculty member with expertise in the area.  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Hospitality, Food and Tourism Management
Human Resources and Organizational Behaviour

Gordon S. Lang School of Business and Economics, Department of Management

HROB*2010 Foundations of Leadership F,W (3-0) [0.50]

Using an integrated approach to studying leadership, this foundation course covers history, evolving theories, models, and research both from a theoretical point of view and practical application. This course will use a seminar style with applied workshops, class discussions, guest speakers, and student participation. Students will prepare elements of a skills portfolio and a research paper. This is a required course for the Certificate in Leadership.

Offering(s): Also offered through Distance Education format.

Equate(s): BUS*2100

Restriction(s): UNIV*2000

Department(s): Department of Management

HROB*2090 Individuals and Groups in Organizations F,W (3-0) [0.50]

This course serves as an overview to organizational behaviour. It examines the individual, the group, the organization and how the three interrelate in order to enhance performance and productivity. (Also offered through Distance Education format.)

Equate(s): BUS*2090

Restriction(s): HROB*2100, HROB*4000, PSYC*3080

Department(s): Department of Management

HROB*2290 Labour Relations F (3-0) [0.50]

This course provides students with a working knowledge of the institutions and processes (both regulatory and non-regulatory) that govern the relationship between employers and employees. Students will comprehensively explore the human resources implications of the labour relations system by examining the actors, the environmental factors impacting the parties, the establishment and maintenance of bargaining rights, contract negotiation, and the administration of the collective agreement.

Prerequisite(s): 2.00 credits

Equate(s): ECON*2200

Department(s): Department of Management

HROB*3090 Training and Development W (3-0) [0.50]

This course focuses on how organizations develop employee skills through training and development programs. Topics will include: adult learning principles, training needs assessments, training program design, instructional methodologies, coaching and mentoring, individualized development and program evaluation.

Prerequisite(s): 1 of BUS*3000, HROB*2100, HROB*2290, HROB*3000, PSYC*3070

Equate(s): BUS*3090, PSYC*3090

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

Department(s): Department of Management

HROB*3010 Compensation Systems F (3-0) [0.50]

This course examines the essential human resource function of planning, staffing, employee training and development, employee assistance programs, the legal environment and employee maintenance in a variety of organizational settings.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 1 of BUS*2090, BUS*2220, HROB*2090

Restriction(s): BUS*3000, HROB*2100, HROB*3000, PSYC*3070 This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

Department(s): Department of Management

HROB*3050 Employment Law F (3-0) [0.50]

This course will introduce students to Canadian employment law, specifically rules that govern the relations between employees and employers. Subject areas will include the history of employment law, employment contracts, creation and modification of the employment relationship, employer and employee obligations, employment standards, human rights legislation and termination. International comparisons will also be examined.

Offering(s): Last offering - Fall 2021

Prerequisite(s): 9.00 credits including (1 of BUS*3000, HROB*2100, HROB*2290, HROB*3000, PSYC*3070)

Restriction(s): Restricted to students in BCOMM, BASC:AHN, and BA:EURS.

Department(s): Department of Management

HROB*3070 Recruitment and Selection F (3-0) [0.50]

This course will provide students with the appropriate tools needed to recruit and select employees, identify related competencies, identity performance appraisal methods, and evaluate the effectiveness of these programs within the context of our Canadian legal framework.

Offering(s): Also offered through Distance Education format

Prerequisite(s): 1 of BUS*3000, HROB*2100, HROB*2290, HROB*3000, PSYC*3070

Equate(s): BUS*3070

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

Department(s): Department of Management

HROB*4000 Leadership and Organizational Management Capstone W (3-0) [0.50]

This course examines the management of human resources from a strategic perspective, focusing on how organizations can achieve competitive advantage through their people. Students will be challenged to integrate their knowledge of organizational behaviour and the various human resource functions to develop strategic solutions to organizational issues.

Offering(s): Last offering - Winter 2021

Prerequisite(s): HROB*4100

Department(s): Department of Management

HROB*4010 Leadership Certificate Capstone W (3-0) [0.50]

This course is the capstone course for students completing the Certificate in Leadership. Based on their prior course work and leadership experience, students will examine the relationships between leadership theory and practice, assess their effectiveness in a leadership role, and develop a personal plan for further developing their leadership skills.

Offering(s): Offered through Distance Education format only.

Prerequisite(s): HROB*2010, (1 of PHIL*2120, PHIL*2600, POLS*3440), (2 of BUS*3000, EDRD*3140, EDRD*3160, EDRD*4120, HROB*2090, HROB*2290, HROB*3000, MGMT*2150, PHIL*2100, POLS*2250) plus 120 hours of leadership experience.

Restriction(s): Instructor consent required.

<td>HROB*4030</td>
<td>Advanced Topics In Leadership and Organizational Management U</td>
<td>(3-0) [0.50]</td>
<td>Students will actively examine issues in selected topic areas of human resource management at an advanced level and with a focus on application in an actual organizational setting. The focal area of the course, or range of human resource management topics covered by the course, will vary depending on instructor. Selected topic areas may include corporate social responsibility, leadership issues, strategic human resource management, gender issues, human rights issues, recruitment methods and outcomes, functional job analysis and validation methods, job performance criteria and appraisal tools, selection processes and tools, organizational justice, work attitudes, and prejudice and discrimination in the workplace. Specific topic areas will be announced prior to the course selection period.</td>

</table>
**Human Kinetics**

*Department of Human Health and Nutritional Sciences*

**HK*2270 Principles of Human Biomechanics F (3-1) [0.50]**

This course will address the application of mechanical principles to the study of human movement. Topics will include: motion analysis techniques, anthropometrics, biological tissue tolerance, muscle force generation, static and dynamic equilibrium, work/energy and impulse/momentum as they apply to the description of motion, injury of musculoskeletal tissues and optimization of human performance.

**Prerequisite(s):** 4.00 credits including BIOL*1090, PHYS*1080

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*2810 Human Physiology I - Concepts and Principles W (3-0) [0.50]**

This course will introduce the fundamental concepts and principles of communication systems (transport, ion movement, nerve and synapse, muscle) in humans. It will focus on primary physiological communication systems, such as the endocrine and central nervous systems, and integrate basic principles to understand larger systems such as the gastrointestinal tract.

**Prerequisite(s):** BIOC*2580, BIOL*1080

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3100 Neuromuscular Physiology W (3-0) [0.50]**

Normal muscle movement is controlled by the motor cortex or by reflexes within the context of the sensory environment. This course will introduce key concepts in motor control of mammalian, human movement, coordination of movement, motor program selection, motor program execution, motor unit recruitment, skeletal muscle excitation-contraction coupling. This course is required for students wishing to gain certification by the Ontario Kinesiology Association.

**Prerequisite(s):** 1 of BIOM*3200, HK*3810, ZOO*3600

**Restriction(s):** Restricted to B.S.C., Major in Human Kinetics or Neuroscience Minor.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3401 Human Anatomy: Dissection F (3-3) [0.75]**

First part of the two-semester course HK*3401/2. A two-semester lecture and laboratory course in human anatomy which includes a detailed study of the skeleton, upper and lower limbs, thorax, abdomen, pelvis, perineum, head, neck and central nervous system. The labs involve hands-on dissection. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*3401 in the Fall semester and HK*3402 in the Winter semester. A grade will not be assigned to HK*3401 until HK*3402 has been completed.

**Co-requisite(s):** HK*3810

**Restriction(s):** HK*3401, HK*3402 Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science. Instructor consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3402 Human Anatomy: Dissection W (3-3) [0.75]**

Second part of the two-semester course HK*3401/2. A two-semester lecture and laboratory course in human anatomy which includes a detailed study of the skeleton, upper and lower limbs, thorax, abdomen, pelvis, perineum, head and neck and central nervous system. The labs involve hands-on dissection. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*3401 in the Fall semester and HK*3402 in the Winter semester. A grade will not be assigned to HK*3401 until HK*3402 has been completed.

**Prerequisite(s):** HK*3401

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3501 Human Anatomy: Prosection F (3-2) [0.75]**

First part of the two-semester course HK*3501/2. A two-semester lecture and laboratory course in human anatomy which includes a detailed study of the skeleton, upper and lower limbs, thorax, abdomen, pelvis, perineum, head and central nervous system. Labs involve observation of anatomical details using prostheses and dissected specimens. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*3501 in the Fall semester and HK*3502 in the Winter semester. A grade will not be assigned to HK*3501 until HK*3502 has been completed.

**Co-requisite(s):** HK*3810

**Restriction(s):** HK*3401, HK*3402 Registration in the B.Sc. Major in Human Kinetics or Bio-Medical Science. Instructor consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3502 Human Anatomy W (3-2) [0.75]**

Second part of the two-semester course HK*3501/2. A two-semester lecture and laboratory course in human anatomy which includes a detailed study of the skeleton, upper and lower limbs, thorax, abdomen, pelvis, perineum, head, neck and central nervous system. Labs involve observation of anatomical details using prostheses and dissected specimens. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*3501 in the Fall semester and HK*3502 in the Winter semester. A grade will not be assigned to HK*3501 until HK*3502 has been completed.

**Prerequisite(s):** HK*3501

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3500 Human Physiology II - Integrated Systems F (4-0) [0.75]**

This course will build on the fundamental concepts and principles of communication systems developed in Human Physiology I and examine more complex physiological phenomena such as the control of blood volume and blood pressure, which integrates tissue of the cardiovascular system, the heart, vasculature and kidney, and acid-based physiology, which integrates the respiratory system and the kidney. Finally, all systems will be integrated to determine how the body responds to challenges such as altitude, exercise and shock (blood loss).

**Prerequisite(s):** HK*2270

**Co-requisite(s):** HK*3810

**Restriction(s):** Registration in the Human Kinetics major.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3600 Applied Human Kinetics I F (3-3) [0.75]**

This course covers laboratory techniques which are central to human biology, together with their underlying concepts. Human performance and function are evaluated through cellular, organic, systemic and whole person studies. The student's technical competence and conceptual understanding are emphasized.

**Prerequisite(s):** HK*2270

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*3810 Human Physiology II - Integrated Systems F (4-0) [0.75]**

This course will build on the fundamental concepts and principles of communication systems developed in Human Physiology I and examine more complex physiological phenomena such as the control of blood volume and blood pressure, which integrates tissue of the cardiovascular system, the heart, vasculature and kidney, and acid-based physiology, which integrates the respiratory system and the kidney. Finally, all systems will be integrated to determine how the body responds to challenges such as altitude, exercise and shock (blood loss).

**Prerequisite(s):** HK*2270

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4070 Clinical Biomechanics W (3-2) [0.50]**

This course covers functional anatomy, neurophysiology and mechanical characteristics of humans at the tissues and whole-body levels. Pathomechanics of human movement resultant from disease, abuse or trauma will be examined. Special emphasis will be placed on etiology, testing and correction of functional disorders with special reference to balance, gait and orthopaedic biomechanics.

**Prerequisite(s):** ENGG*2660 or (HK*2270, HK*3600)

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4230 Advanced Study in Human Health and Nutritional Sciences S,F,W (3-0) [0.50]**

The student will conduct independent literature research of an approved topic to be decided by the student in consultation with a faculty advisor. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** 12.00 credits

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4240 Occupational Biomechanics and Ergonomics W (3-2) [0.75]**

This course introduces the methods available for reducing musculoskeletal injuries in the workplace. Topics include: biomechanical, psychophysical, physiological, and integrated approaches to performing physical demands analyses, anatomy and etiology of low back injuries and upper limb disorders, principles of redesigning tasks to reduce the risk of injury, pre-employment screening and legislated guidelines. Students apply the course material to ergonomic assessments performed in industrial environments.

**Prerequisite(s):** ENGG*1210 or HK*3600

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4340 Genomics: Exercise and Disease F (3-0) [0.50]**

This course is an in-depth examination of how exercise 1) effects gene transcription to influence elite performance (ie. training for sport) and 2) can be used as a therapeutic strategy to influence the expression of specific genes to recover the health of an individual (e.g. exercising for health). The course represents a unique opportunity to understand the beneficial effects of physical activity and exercise at the genetic level.

**Prerequisite(s):** NUTR*3360

**Department(s):** Department of Human Health and Nutritional Sciences
**HK*4360 Research in Human Health and Nutritional Sciences S,F,W (0-12) [1.00]**

The student will select a research topic and design and complete a project in an area of interest, in consultation with a faculty advisor. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** 12.00 credits

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4371 Research in Human Health and Nutritional Sciences II S,F,W (0-6) [0.50]**

First part of the two-semester course HK*4371/2. The student will select a research topic and design and complete a project in an area of interest, in consultation with a faculty advisor. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*4371 in the first semester and HK*4372 in the second semester. A grade will not be assigned to HK*4371 until HK*4372 has been completed. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** 12.00 credits

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4372 Research in Human Health and Nutritional Sciences II F,W,S (0-6) [0.50]**

Second part of the two-semester course HK*4371/2. The student will select a research topic and design and complete a project in an area of interest, in consultation with a faculty advisor. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*4371 in the first semester and HK*4372 in the second semester. A grade will not be assigned to HK*4371 until HK*4372 has been completed. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** HK*4371

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4441 Advanced Study in Human Anatomy F (1-10) [1.00]**

First part of the two-semester course HK*4441/2. This course will provide students who have completed HK*3402 with the opportunity to pursue anatomical studies in an interdisciplinary fashion at the advanced level. Students will use their knowledge in anatomy to develop educational material and/or teach anatomical concepts and applications of human anatomy. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*4441 in the first semester and HK*4442 in the second semester. A grade will not be assigned to HK*4441 until HK*4442 has been completed. Students must make arrangements with the course coordinator at least one semester in advance, and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** HK*3402, (HK*3810 or HK*3940) or HK*3810 or HK*3940

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4442 Advanced Study in Human Anatomy W (1-10) [1.00]**

Second part of the two-semester course HK*4441/2. This course will provide students who have completed HK*3402 with the opportunity to pursue anatomical studies in an interdisciplinary fashion at the advanced level. Students will use their knowledge in anatomy to develop educational material and/or teach anatomical concepts and applications of human anatomy. This is a two-semester course offered over consecutive semesters. When you select it you must select HK*4441 in the first semester and HK*4442 in the second semester. A grade will not be assigned to HK*4441 until HK*4442 has been completed. Students must make arrangements with the course coordinator at least one semester in advance, and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** HK*4441

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4460 Regulation of Human Metabolism W (3-0) [0.50]**

The course focuses on the underlying metabolic events that occur in association with exercise. Skeletal muscle metabolism and substrate delivery are discussed with respect to the intracellular biochemical events integrated with both the endocrine and the chemical aspects of neural mechanisms.

**Prerequisite(s):** (HK*3810 or HK*3940), NUTR*4210

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4510 Teaching, Learning & Knowledge Transfer S,F,W (0-12) [1.00]**

In consultation with a faculty advisor, the student will select, design and complete an independent project on the scholarship of teaching, learning and/or knowledge transfer in human health. Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** 10.00 credits including BIOL*1080

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4511 Teaching, Learning & Knowledge Transfer II S,F,W (0-6) [0.50]**

First part of a two-semester course HK*4511/2. In consultation with a faculty advisor, the student will select, design and complete an independent project on the scholarship of teaching, learning and/or knowledge transfer in human health. This is a two-semester course offered over consecutive semesters; when you select it you must select HK*4511 in the first semester and HK*4512 in the second semester (a grade will not be assigned to HK*4511 until HK*4512 has been completed). Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** 10.00 credits including BIOL*1080

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4512 Teaching, Learning & Knowledge Transfer II S,F,W (0-6) [0.50]**

Second part of a two-semester course HK*4511/2. In consultation with a faculty advisor, the student will select, design and complete an independent project on the scholarship of teaching, learning and/or knowledge transfer in human health. This is a two-semester course offered over consecutive semesters; when you select it you must select HK*4511 in the first semester and HK*4512 in the second semester (a grade will not be assigned to HK*4511 until HK*4512 has been completed). Students must make arrangements with both a faculty advisor and the course coordinator at least one semester in advance and the signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the student is registered for the course.

**Prerequisite(s):** HK*4511

**Restriction(s):** Course coordinator consent required.

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4550 Human Cardio-respiratory Physiology F (3-0) [0.50]**

The central focus of this course is a comprehensive examination of the effects of a variety of work parameters on normal cardio-respiratory adjustments required to meet metabolic demands. Immediate adjustments to increase metabolic rate as well as long term cardio-respiratory adaptability will be discussed.

**Prerequisite(s):** HK*3810 or HK*3940

**Department(s):** Department of Human Health and Nutritional Sciences

**HK*4600 Applied Human Kinetics II W (3-3) [0.75]**

The objective of this course is to expand on the introductory laboratory practices developed in HK 3600 Applied Human Kinetics I. Students will examine the functioning of a human body at rest and in motion, while learning clinical and advanced laboratory techniques. The students will be introduced to the underlying concepts of various physiological and biomechanical measures in lecture. Subsequently, the principles from the lecture will be used to make direct measures in the laboratory, with an emphasis on understanding exercise physiology, clinical testing practices, and integrative approaches to studying human movement. Students will be asked to critically analyze the laboratory measures and findings, and to integrate the lecture and laboratory material in formalized laboratory reports.

**Prerequisite(s):** HK*3600

**Restriction(s):** Restricted to students in Human Kinetics.

**Department(s):** Department of Human Health and Nutritional Sciences

</tr>
</thead>
<tbody>
<tr>
<td>This course presents an overview of bone and joint function from a biomechanics perspective, within the framework of health and injury. Particular emphasis is placed on the influence of biomechanical signals on the regulation of bone and joint structure and function. Individual diseases, such as osteoarthritis, will be considered as they impact the various tissues of the joint (cartilage, ligament and bone) and the neuromuscular system. The laboratory will provide supplementary material illustrating particular aspects of musculoskeletal function including in vivo and in vitro biomechanical testing.</td>

Offered in odd-numbered years.

Dean's Office, College of Arts

Admission to the India Semester.

HUMN*1300 Fundamentals of Arts Management I W (3-0) [0.50]

This course provides an introduction to arts, culture, and heritage management as a career possibility. Students will develop an understanding of management and communication as they relate to the cultural sector (visual art, film and theatre, sound/music, and heritage). Course assignments and projects will deal with the broad range of issues facing those who work in management/administration of the arts, whether in the public or the private sectors.

Department(s): School of Languages and Literatures

Offering(s): Offered in odd-numbered years.

HUMN*1300 Fundamentals of Arts Management II F (3-0) [0.50]

This course provides an introduction to arts, culture, and heritage management as a career possibility. Students will develop an understanding of management and communication as they relate to the cultural sector (visual art, film and theatre, sound/music, and heritage). Course assignments and projects will deal with the broad range of issues facing those who work in management/administration of the arts, whether in the public or the private sectors.

Department(s): School of Languages and Literatures

Offering(s): Offered in odd-numbered years.

HUMN*1300 Fundamentals of Arts Management II W (3-0) [0.50]

This course provides an introduction to arts, culture, and heritage management as a career possibility. Students will develop an understanding of management and communication as they relate to the cultural sector (visual art, film and theatre, sound/music, and heritage). Course assignments and projects will deal with the broad range of issues facing those who work in management/administration of the arts, whether in the public or the private sectors.

Department(s): School of Languages and Literatures

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 2.00 credits

Restriction(s): Instructor consent required.

HUMN*2020 Criminal and Criminals in Italian Cinema W (3-0) [0.50]

This course explores the representation of criminality in Italian cinema through genres such as noir, thriller, and 'cop movies' from the postwar period to the present. It examines the collusion between crime, politics, and society, the homogenized Italian terrorism of the 1970s, and post-millennial representations of the connections between mafia and other criminal activities.

Department(s): School of Languages and Literatures

Offering(s): Offered in even-numbered years.

Prerequisite(s): HUMN*1300

HUMN*2300 Fundamentals of Arts Management II F (3-0) [0.50]

This course provides an introduction to arts, culture, and heritage management as a career possibility. Students will develop an understanding of management and communication as they relate to the cultural sector (visual art, film and theatre, sound/music, and heritage). Course assignments and projects will deal with the broad range of issues facing those who work in management/administration of the arts, whether in the public or the private sectors.

Department(s): School of Languages and Literatures

Offering(s): Offered in even-numbered years.

Prerequisite(s): 2.00 credits

Restriction(s): Instructor consent required.

HUMN*3000 Narratives of Migration W (3-0) [0.50]

People move from one location to another for a variety of reasons. This course examines how literary texts and other forms of creative expression represent various forms of dislocation such as migration and exile. The focus of the course will be on theories of migration and creative works in an array of texts and media. Texts will be read in English translation.

Department(s): School of Languages and Literatures

Offering(s): Offered in even-numbered years.

Prerequisite(s): 7.50 credits

HUMN*3020 Myth and Fairy Tales in Germany F (3-0) [0.50]

The course explores the role of mythology, fairy tales and legends in German literature and culture. Topics may include the formation of a national identity, the allegorical fairy tale and its role in Romanticism, women and the fairy tale, the fairy tale and the socialization of children (incl. Disney), adaptations of mythology in modern literature. Authors may include Goethe, Brothers Grimm, ETA Hoffmann. Lectures and texts are in English. This course is offered in conjunction with GERM*3020.

Department(s): School of Languages and Literatures

Offering(s): Offered in even-numbered years.

Prerequisite(s): 5.00 credits

HUMN*3100 London Studies in the Humanities W (2-3) [0.50]

An integrated course of studies in the Humanities (including 2 or more of theatre, visual arts, history, music, literature and philosophy) as they relate to London cultural resources. For London Semester students only.

Department(s): Dean's Office, College of Arts

Offering(s): Admission to London Semester.

Prerequisite(s): Admission to London Semester.

HUMN*3150 Paris Studies in the Humanities W (2-3) [0.50]

An integrated course of study in the Humanities (including 2 or more of theatre, visual arts, history, music, literature and philosophy) as they relate to Paris cultural resources. For Paris Semester students only.

Department(s): Dean's Office, College of Arts

Offering(s): Admission to Paris Semester.

Prerequisite(s): Admission to Paris Semester.

HUMN*3180 Community Engagement Project W (3-0) [0.50]

This course adopts a team-based experiential learning approach to consider professional development via the conceptualization and execution of projects in the Arts and Humanities. Students will investigate experiential learning initiatives within higher education settings, including key debates surrounding the possibilities, limitations, justifications and ethics surrounding these activities. Students will work independently and collaboratively in groups to plan and present a research-informed community project (community partners will be identified by the College of Arts in advance).

Department(s): Dean's Office, College of Arts

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 7.50 credits

Restriction(s): Instructor consent required.

HUMN*3190 Experiential Learning S,F,W (0-0) [0.50]

This course provides an opportunity for independent study based in the Arts and/or Humanities related to either voluntary or paid experience. Evaluation will be based on assignments directly related to the experience. Students interested in this course must have their project approved by the instructor and the office of the Associate Dean (Academic) of the College of Arts prior to the semester in which they plan to engage in their experiential learning experience.

Department(s): Dean's Office, College of Arts

Offering(s): Offered in odd-numbered years.

HUMN*3210 Introduction to Polish History and Culture F (6-4) [1.00]

The core course for the Krakow Semester consisting of three major components: 1) Polish language training, 2) a general introduction to Polish geography, politics and contemporary life and, 3) Polish history and the arts. For Krakow Semester students only.

Department(s): Dean's Office, College of Arts

Offering(s): Admission to Krakow Semester.

Prerequisite(s): Admission to the Krakow Semester.

HUMN*3220 Krakow Studies in the Humanities I F (3-2) [0.50]

An integrated course of studies in the humanities as they relate to the resources of Krakow, Poland. For Krakow Semester students only.

Department(s): Dean's Office, College of Arts

Offering(s): Admission to the Krakow Semester.

Prerequisite(s): Admission to the Krakow Semester.

HUMN*3230 Krakow Studies in the Humanities II F (3-2) [0.50]

An integrated course of studies in the humanities as they relate to the resources of Krakow, Poland. For Krakow Semester students only.

Department(s): Dean's Office, College of Arts

Offering(s): Admission to the Krakow Semester.

Prerequisite(s): Admission to the Krakow Semester.

HUMN*3240 India Studies in the Humanities W (3-0) [0.50]

An integrated course of studies in the humanities as they relate to India. This course looks at selected aspects of one or more areas in the humanities, including Indian religions, philosophy, literature (in English), history, language (Hindi), art and music. For India Semester students only.

Department(s): Dean's Office, College of Arts

Offering(s): Admission to the India Semester.

Prerequisite(s): Admission to the India Semester.

HUMN*3300 Latin American Studies in the Humanities F,W (1-2) [0.50]

This is an integrated course of studies in the humanities as they relate to the resources of Latin America. It is offered either as preparation for the Latin America semester (in fall) or during this study abroad program (in winter).

Department(s): Dean's Office, College of Arts

Offering(s): Admission to the Latin America semester.

Prerequisite(s): Admission to the Latin America semester.

Restriction(s): Instructor consent required.

HUMN*3400 Renaissance Lovers and Fools F (3-0) [0.50]

In this course, students will read Italian Renaissance plays such as Machiavelli’s “The Mandrake” and Bibbiena’s “Calandria” with special attention to the portrayals of lovers and fools. The course will place particular emphasis on representations of class and gender relations. Additional readings in medieval literature, history, and critical theory will provide background and context for the plays. Lectures and texts are in English. This course is offered in conjunction with ITAL*3400.

Department(s): Dean's Office, College of Arts

Offering(s): Offered in odd-numbered years.

Prerequisite(s): Admission to the Latin America semester.

Restriction(s): Instructor consent required.

Department(s): Dean's Office, College of Arts

Offering(s): Offered in odd-numbered years.
### HUMN*3470 Holocaust & WWII in German Lit. & Film F (3-0) [0.50]

This course focuses on texts and films pertaining to World War II and the Holocaust, the development of the thoughts and the language of genocide, and the representation of the Holocaust in literature and films. The objective is to gain an understanding of the ideas and emotions underlying ethnocentrism and anti-Semitism, and to consider artistic responses to the experience of persecution and mass-murder. Lectures and discussions are in English. Students who wish for a German credit must register for GERM*3470.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** 5.00 credits

**Department(s):** School of Languages and Literatures

### HUMN*4190 Experiential Learning S,F,W (0-0) [0.50]

This course provides an opportunity for independent study based in the Arts and/or Humanities related to either voluntary or paid experience. Evaluation will be based on assignments directly related to the experience. Students interested in this course must have their project approved by the instructor and the office of the Associate Dean (Academic) of the College of Arts prior to the semester in which they plan to engage in their experiential learning experience.

**Prerequisite(s):** 10.00 credits

**Restriction(s):** Instructor consent required.

**Department(s):** Dean's Office, College of Arts

Interdisciplinary Physical Science

IPS*1500 Integrated Mathematics and Physics I F (6-4) [1.00]
This is a foundational course for students in B.Sc. mathematical and physical sciences majors. The disciplines of Mathematics and Physics are taught in an integrated fashion that demonstrates how they support and enrich one another. Atomic structure, algebra and trigonometry, forces and Newton's laws, functions and graphing, differentiation, angular momentum and energy conservation, limits, integration, kinematics, and special relativity are presented in a harmonized fashion to ensure students have an improved understanding of these fundamentals.

Prerequisite(s): 1 of 4U Physics, PHYS*1020, PHYS*1300
Restriction(s): MATH*1080, MATH*1200, PHYS*1000, PHYS*1080
Department(s): Department of Physics, Department of Mathematics and Statistics

IPS*1510 Integrated Mathematics and Physics II W (6-4) [1.00]
This is the second foundational course for students in B.Sc. mathematical and physical sciences majors. The disciplines of Mathematics and Physics are taught in an integrated fashion that demonstrates how they support and enrich one another. Thermodynamics, integration, electrostatics, partial derivatives, multidimensional integrals, simple harmonic motion, Taylor's series, and spectroscopy are presented in a harmonized fashion to ensure students have an improved understanding of these fundamentals.

Prerequisite(s): IPS*1500
Restriction(s): MATH*1090, MATH*1210, MATH*2080, PHYS*1010, PHYS*1070, PHYS*1130
Department(s): Department of Physics, Department of Mathematics and Statistics

IPS*3000 Science Communication F (3-3) [0.50]
This course focuses on developing the skills required to communicate science for non-specialist audiences. The principles and practices of public speaking and writing will be explored, employing a variety of media. Through multiple oral and written assignments, students will explore tailoring their message for various audience-types.

Prerequisite(s): 2.00 credits in PHYS at the 2000 level or higher
Restriction(s): PHYS*4300
Department(s): Department of Physics
# Interdisciplinary Social Science

**College of Social and Applied Human Sciences**

**ISS*2000 Asia U (3-0) [0.50]**
This course will survey China and/or India, noting the major historical trends, cultural factors, economic systems, and political institutions and political processes.

*Department(s):* Department of Political Science

**ISS*3100 London Studies in the Social Sciences W (2-3) [0.50]**
An integrated course of studies in the social sciences as they relate to the resources of London. For London Semester students only.

*Restriction(s):* Admission to the London Semester.

*Department(s):* Dean's Office, College of Arts

**ISS*3150 Paris Studies in the Social Sciences W (2-0) [0.50]**
An integrated course of studies in the social sciences as they relate to the resources of Paris. For Paris Semester students only.

*Restriction(s):* Admission to the Paris Semester.

*Department(s):* Dean's Office, College of Arts

**ISS*3250 Krakow Studies in the Social Sciences I F (3-2) [0.50]**
An integrated course of studies in the social sciences as they relate to the resources in Krakow, Poland. For Krakow students only.

*Restriction(s):* Admission to the Krakow Semester.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

**ISS*3260 Krakow Studies in the Social Sciences II F (3-2) [0.50]**
An integrated course of studies in the social sciences as they relate to the resources in Krakow, Poland. For Krakow students only.

*Restriction(s):* Admission to the Krakow Semester.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

**ISS*3270 India Studies in the Social Sciences W (3-0) [0.50]**
An integrated course of studies in the social sciences as they relate to India. This course looks at selected aspects of one or more areas in the social, geographic, economic and political aspects of Indian society. For India Semester students only.

*Restriction(s):* Admission to the India Semester.

*Department(s):* Dean's Office, College of Social and Applied Human Sciences

**ISS*3300 Latin American Studies in the Social Sciences F,W (1-2) [0.50]**
This is an integrated course of studies in the social sciences as they relate to the resources of Latin America. It is offered either as preparation for the Latin America semester (in fall) or during this study abroad program (in winter).

*Restriction(s):* Admission to the Latin America semester. Instructor consent required.

*Department(s):* Dean's Office, College of Arts

**ISS*3420 Women Social and Political Theorists W (3-0) [0.50]**
The writings of seventeenth and nineteenth century women social and political theorists will be explored as contributing to the development of classical and contemporary social and political theory. These women wrote on status of women and gender role issues as well as dealing with such fundamental matters as the nature and origin of society/social contract, political rights and obligations, government, constitutional change, revolution, slavery, socialism, the welfare state, imperialist racism. An important feature of the course would be to show women theorists' contributions on central political interests and the integration of gender issues with those of class and race.

*Prerequisite(s):* SOAN*2112 or POLS*2000

*Restriction(s):* Not available to students in Anthropology, Criminal Justice & Public Policy or Sociology areas of study.

*Department(s):* Department of Sociology and Anthropology, Department of Political Science
Interdisciplinary University

UNIV*3500 , UNIV*3550 and UNIV*4500 are re-numbered and now appear under Environmental Design and Rural Development (EDRD)

UNIV*1200 First Year Seminar F,W (3-0) [0.50]
First Year Seminars are interdisciplinary courses designed especially for first year students. The goal of the First Year Seminar course is to provide opportunities for students to participate in small enrolment, discussion-oriented classes in their first year. Different seminar topics are offered each year in each separate course section, reflecting the particular research or professional interest of the course instructor. The seminar course counts as a free elective in the student’s Schedule of Studies. For information about how the seminar courses may in some cases fulfill particular program distribution requirements, students should contact their program counsellor. A list of current and archived offerings is available by following the links on the First Year Seminars, web page.
Restriction(s): Fewer than 5.00 credits.
Department(s): Provost & VP Academic

UNIV*1250 Experiential Learning Opportunity I: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will not be assigned to UNIV*1250 until UNIV*1260 has been completed. Students who wish to enroll in this course should see Student Life and Careers for more information.
Restriction(s): Instructor consent required. Acceptance in the Peer Helper program.
Department(s): Associate VP Academic

UNIV*1260 Experiential Learning Opportunity II: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will be assigned at the end of the completion of both UNIV*1250 and UNIV*1260. Student who wish to enroll in this course should see Student Life for more information.
Restriction(s): Open only to students who have been accepted into the Peer Helper program.
Department(s): Associate VP Academic

UNIV*2010 Anti-Discrimination and Anti-Oppression F,W (3-0) [0.50]
This course engages students in an introductory discussion of anti-discrimination and anti-oppression principles. Students will be introduced to the historical and lived realities of discrimination that equity-seeking groups have encountered and continue to encounter in Canadian society. In so doing, the course explores social, philosophical, and legal responses to discrimination. Students will also consider social theories of anti-oppression, established principles of intersectional allyship, and strategies to foster and support inclusive spaces.
Department(s): Dean's Office, College of Arts

UNIV*2020 Pandemics: Culture, Science, and Society F,W (3-0) [0.50]
This course introduces students to interdisciplinarian perspectives on the implications of pandemics, past and present. Drawing on expertise from across the university, the course is structured around a series of webinar panels and seminar discussions. Topics to be explored include pandemics in history, COVID-19 and ethics, COVID-19 and technology, knowledge, misinformation and discourse around pandemics, and the implications of COVID-19 on institutions, work, food, community, resilience.
Prerequisite(s): 2.90 credits
Department(s): Dean's Office, College of Arts, Dean's Office, College of Biological Science, Dean's Office, College of Engineering and Physical Sciences, Dean's Office, College of Social and Applied Human Sciences

UNIV*2100 Career Ready: Develop Your Future F,W (3-0) [0.50]
This course introduces students to career development theory and provides the practical knowledge required to succeed in the current and future world of work. Students will examine key concepts from career development theory and will engage in reflective and experiential learning activities aimed at preparing them for job search and the world of work. Within the context of career development, issues related to mental well-being, diversity, intercultural competencies, and the implications of disclosure and accommodation will be studied.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 4.00 credits
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to non-BComm and non-Co-op students.
Department(s): Department of Management

UNIV*2200 Towards Sustainability F (3-0) [0.50]
This course will introduce students to the complex and interrelated issues of sustainability. It will explore why it is important to understand the environmental, economic and social issues of our world and why they must be addressed in a holistic way. It will allow students to realize the impact they will make on the world and give them to knowledge to develop values that will help chart their career. This course will provide the opportunity to understand issues beyond their chosen discipline.
Prerequisite(s): 4.50 credits
Department(s): Department of Management

UNIV*2250 Experiential Learning Opportunity III: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will not be assigned to UNIV*2250 until UNIV*2260 has been completed. Students who wish to enroll in this course should see Student Life and Careers for more information.
Prerequisite(s): Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will be assigned at the end of the completion of both UNIV*2250 and UNIV*2260. Students who wish to enroll in this course should see Student Life and Careers for more information.
Prerequisite(s): UNIV*1250, UNIV*1260
Department(s): Associate VP Academic

UNIV*2260 Experiential Learning Opportunity IV: Peer Helper U (0-0) [0.00]
Open only to students who have been accepted into the Peer Helper program. This 0.00 credit course recognizes the successful completion of the Peer Helper training program and a supervised field experience in an approved Peer Helper placement. A pass/fail grade will be assigned at the end of the completion of both UNIV*2250 and UNIV*2260. Students who wish to enroll in this course should see Student Life and Careers for more information.
Prerequisite(s): UNIV*2250
Department(s): Associate VP Academic

UNIV*2410 Engaged Global Citizenship F (3-0) [0.50]
In this course students will gain an understanding of the concepts, values, and skills related to effective community engagement and responsible global citizenship. As culturally-aware global citizens, students will be challenged to identify a meaningful role for themselves in contributing to a more equitable and sustainable environment by developing an action plan for participating in community engagement opportunities at the local, national or international scale. This is the required introductory course for the Certificate in Civic Engagement and Global Citizenship.
Prerequisite(s): 4.00 credits
Restriction(s): Fewer than 10.50 credits.
Department(s): Department of Political Science

UNIV*2800 Independent Research S,F,W (3-0) [0.50]
This course offers students in any program the opportunity to pursue credit for relevant research experience (paid or unpaid) with the addition of course assignments either during the research experience or in a following semester. Details of the learning outcomes and requirements will be outlined in a learning contract initiated by the student and approved by a faculty supervisor. Open to students in any undergraduate program. Students should consult their program counsellor to determine how the course will count toward their program. Please consult the website for more information.
Prerequisite(s): 4.00 credits completed; minimum 60% cumulative average
Restriction(s): Instructor consent required.
Department(s): Associate VP Academic

UNIV*3000 Civic Engagement & Service Learning W (3-0) [0.50]
This course provides a unique opportunity for students to develop civic leadership skills and increase their awareness and appreciation for the social relevance of higher education through a community service-learning experience. Curricular and co-curricular learning are integrated through continued academic study and its application, modification, and critique in a community context. Students will conduct research and seminars on a selected topic while simultaneously completing a placement in a community agency appropriate to that topic.
Prerequisite(s): 9.00 credits
Department(s): Associate VP Academic

UNIV*3010 University Studies in London I U (3-0) [0.50]
This course is an intensive and integrated study in the arts, social sciences and/or sciences as they relate to the resources of London. This course is for London Session Semester students only.
Prerequisite(s): Admission to the London Semester.
Department(s): Dean's Office, College of Arts
UNIV*3020 University Studies in London II U (3-0) [0.50]
This course is an intensive and integrated study in the arts, social sciences and/or sciences as they relate to the resources of London. This course is for London Session Semester students only.
Prerequisite(s): Admission to the London Semester.
Department(s): Dean's Office, College of Arts

UNIV*3140 Flexible Internship in Agri-Food F,W (2-0) [0.50]
This course offers an experiential learning opportunity through an unpaid 40-hour internship in the agri-food sector with partners in government, industry or civil society organizations. Students will learn about the integrated nature of the agri-food industry in Canada and the forces that shape this system, including their own food choices. Knowledge of current and future trends in the agri-food system will assist students with developing career-readiness skills that will be applied during the process of securing and working in an internship position. This internship is flexible and can be completed during the course or by the end of the following semester. Completing the internship is required for completing the course.
Prerequisite(s): 9.00 credits
Restriction(s): UNIV*2100. Not available to co-op students. Must have at least a 70% cumulative grade average. Must be in class levels 05, 06 or 07 to be able to complete internship requirement before graduation. Instructor consent required.
Department(s): Department of Food, Agricultural and Resource Economics

UNIV*3150 University Studies in Paris I W (2-3) [0.50]
An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.
Prerequisite(s): Admission to the Paris Semester.
Department(s): Dean's Office, College of Arts

UNIV*3160 University Studies in Paris II W (2-3) [0.50]
An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.
Prerequisite(s): Admission to the Paris Semester.
Department(s): Dean's Office, College of Arts

UNIV*3170 University Studies in Paris III W (2-3) [0.50]
An integrated course of study in subject areas that will vary from year to year but relate to resources in Paris.
Prerequisite(s): Admission to the Paris Semester.
Department(s): Dean's Office, College of Arts

UNIV*3210 Contemporary China F (3-3) [1.00]
The course focuses on aspects of Shanghai as exemplifying the emergence of contemporary China. The course engages perspectives from the humanities and social sciences.
Prerequisite(s): Admission to the Shanghai semester.
Restriction(s): Instructor consent required.
Department(s): Dean's Office, College of Arts

UNIV*3220 University Studies in Shanghai I F (3-0) [0.50]
This is an intensive and integrated course which focuses on a topic relating to Shanghai.
Prerequisite(s): Admission to the Shanghai semester.
Restriction(s): Instructor consent required.
Department(s): Dean's Office, College of Arts

UNIV*3230 University Studies in Shanghai II U (3-0) [0.50]
This is an intensive and integrated course which focuses on a topic relating to Shanghai.
Prerequisite(s): Admission to the Shanghai semester.
Restriction(s): Instructor consent required.
Department(s): Dean's Office, College of Arts

UNIV*3240 University Studies in Shanghai III U (3-0) [0.50]
This is an intensive and integrated course which focuses on a topic relating to Shanghai.
Prerequisite(s): Admission to the Shanghai semester.
Restriction(s): Instructor consent required.
Department(s): Dean's Office, College of Arts

UNIV*3800 Independent Research S,F,W (3-0) [0.50]
This course offers students in any program the opportunity to pursue credit for relevant research experience (paid or unpaid) with the addition of course assignments either during the research experience or in a following semester. Details of the learning outcomes and requirements will be outlined in a learning contract initiated by the student and approved by a faculty supervisor. Open to students in any undergraduate program. Students should consult their program counsellor to determine how the course will count toward their program. Please consult the website for more information.
Prerequisite(s): 4.00 credits completed; minimum 60% cumulative average
Restriction(s): Instructor consent required.
Department(s): Associate VP Academic

UNIV*4200 Ideas Congress F (3-0) [0.50]
Ideas Congress (ICON) applies collaboration and student innovation to solve authentic systems problems in a mentored, project-based learning environment. With a focus on career readiness, ICON teaches students valuable interpersonal, team and communication skills coupled with a focus on innovation and social entrepreneurship. Students will be challenged to innovate ideas for today’s most pressing sustainability challenges. ICON partners students and faculty with community groups introducing students to broad, legitimate challenges (e.g., food insecurity, food waste, etc.), and providing students with access to expertise from across campus and the community.
Prerequisite(s): 13.50 credits
Restriction(s): Instructor consent required.
Department(s): Department of Integrative Biology, School of Computer Science

UNIV*4410 Civic Engagement with Communities W (3-0) [0.50]
In this capstone course students will critically reflect on the connections they have developed between their personal identity as engaged citizens and the impacts their contributions have made with the broader community. An e-portfolio of their Certificate experience will be used to gain an appreciation of their personal growth and acquired skills, and to identify the challenges and opportunities in a lifelong commitment to social justice, sustainability, and respect for diversity. This is the required capstone course for the Certificate in Civic Engagement and Global Citizenship.
Prerequisite(s): UNIV*2410, 90 hours of approved community engagement.
Restriction(s): Instructor consent required.
Department(s): Department of Political Science

UNIV*4800 Independent Research S,F,W (3-0) [0.50]
This course offers students in any program the opportunity to pursue credit for relevant research experience (paid or unpaid) with the addition of course assignments either during the research experience or in a following semester. Details of the learning outcomes and requirements will be outlined in a learning contract initiated by the student and approved by a faculty supervisor. Open to students in any undergraduate program. Students should consult their program counsellor to determine how the course will count toward their program. Please consult the website for more information.
Prerequisite(s): 4.00 credits completed; minimum 60% cumulative average
Restriction(s): Instructor consent required.
Department(s): Associate VP Academic
# Integrative Biology

## IBIO*4500 Research in Integrative Biology I F,W (0-12) [1.00]

This is the first of two courses that explore global and local issues in biodiversity as a capstone experience for biodiversity majors. The overall goal of the course is to provide opportunities for students to engage the application of their knowledge and skills to complex problems and issues involving “real-life” biodiversity projects within academic, government, or industry spheres. The learning outcomes include the application of key skills for interpreting biodiversity, the collection and analysis of biodiversity data. This student-centred experience will culminate with an oral presentation and written report to the “clients”, classmates and instructors.

**Prerequisite(s):** 12.00 credits
**Restriction(s):** Enrolment restricted to BSCH:BIOD majors.
**Department(s):** Department of Integrative Biology

## IBIO*4521 Thesis in Integrative Biology F (0-12) [1.00]

This is the second part of the two-semester course IBIO*4521/2. This course is a two-semester (F,W) undergraduate project in which students conduct a comprehensive, independent research project in organismal biology under the supervision of a faculty member in the Department of Integrative Biology. Projects involve a thorough literature review, a research proposal, original research communicated in oral and poster presentations, and in a written, publication quality document. This two-semester course offers students the opportunity to pursue research questions and experimental designs that cannot be completed in the single semester research courses. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the fall semester. This is a two-semester course offered over consecutive semesters F-W. When you select this course, you must select IBIO*4521 in the Fall semester and IBIO*4522 in the Winter semester. A grade will not be assigned to IBIO*4521 until IBIO*4522 has been completed.

**Prerequisite(s):** IBIO*4521
**Department(s):** Department of Integrative Biology

## IBIO*4522 Thesis in Integrative Biology W (0-12) [1.00]

This course is the second part of the two-semester course IBIO*4521/2. This course is a two-semester (F,W) undergraduate project in which students conduct a comprehensive, independent research project in organismal biology under the supervision of a faculty member in the Department of Integrative Biology. Projects involve a thorough literature review, a research proposal, original research communicated in oral and poster presentations, and in a written, publication quality document. This two-semester course offers students the opportunity to pursue research questions and experimental designs that cannot be completed in the single semester research courses. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the fall semester. This is a two-semester course offered over consecutive semesters F-W. When you select this course, you must select IBIO*4521 in the Fall semester and IBIO*4522 in the Winter semester. A grade will not be assigned to IBIO*4521 until IBIO*4522 has been completed.

**Prerequisite(s):** 12.00 credits
**Restriction(s):** Normally a minimum cumulative average of 70%. Permission of course coordinator.
**Department(s):** Department of Integrative Biology

## IBIO*4550 Research in Integrative Biology II F,W (0-12) [1.00]

The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

**Prerequisite(s):** 12.00 credits
**Restriction(s):** Minimum cumulative average of 70%. Instructor consent required.
**Department(s):** Department of Integrative Biology

## IBIO*4551 Research in Integrative Biology II F,W (0-12) [1.00]

The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

**Prerequisite(s):** IBIO*4500
**Restriction(s):** Minimum cumulative average of 70%. Instructor consent required.
**Department(s):** Department of Integrative Biology

## IBIO*4600 Integrative Marine and Freshwater Research F (3-3) [1.00]

In this course, students will integrate theory and analytical methods to address common problems in marine and freshwater biology. Particular emphasis will be placed on the process of inquiry including: development of research problems, data retrieval from existing literature, design and interpretation of experiments, sampling, statistical inference, and written and oral presentation.

**Prerequisite(s):** BIOL*3450, (STAT*2040 or STAT*2230), (ZOO*3210 or ZOO*3610)
**Restriction(s):** Restricted to students in BSCH:MBF.
**Department(s):** Department of Integrative Biology

## IBIO*4610 Integrating Biodiversity I W (1.5-3) [0.50]

This is the first of two courses that explore global and local issues in biodiversity as a capstone experience for biodiversity majors. The overall goal of the course is to provide opportunities for students to engage the application of their knowledge and skills to complex problems and issues involving “real-life” biodiversity projects within academic, government, or industry spheres. The learning outcomes include the application of key skills for interpreting biodiversity, the collection and analysis of biodiversity data. This student-centred experience will culminate with an oral presentation and written report to the “clients”, classmates and instructors.

**Prerequisite(s):** IBIO*3100
**Restriction(s):** Enrolment restricted to BSCH:BIOD majors.
**Department(s):** Department of Integrative Biology

## IBIO*4650 Integrating Biodiversity II F (1.5-3) [1.00]

This is the second of two courses that explore global and local issues in biodiversity as a capstone experience for biodiversity majors. The overall goal of the course is to provide opportunities for students to engage the application of their knowledge and skills to complex problems and issues involving “real-life” biodiversity projects within academic, government, or industry spheres. The learning outcomes include the application of key skills for interpreting biodiversity, the collection and analysis of biodiversity data. This student-centred experience will culminate with an oral presentation and written report to the “clients”, classmates and instructors.

**Prerequisite(s):** IBIO*3100
**Restriction(s):** Enrolment restricted to BSCH:BIOD majors.
**Department(s):** Department of Integrative Biology

## IBIO*4810 Interpreting Biodiversity I W (1.5-3) [0.50]

This is the first of two courses that explore global and local issues in biodiversity as a capstone experience for biodiversity majors. The overall goal of the course is to provide opportunities for students to engage the application of their knowledge and skills to complex problems and issues involving “real-life” biodiversity projects within academic, government, or industry spheres. The learning outcomes include the application of key skills for interpreting biodiversity, the collection and analysis of biodiversity data. This student-centred experience will culminate with an oral presentation and written report to the “clients”, classmates and instructors.

**Prerequisite(s):** 12.00 credits
**Restriction(s):** Minimum cumulative average of 70%. Instructor consent required.
**Department(s):** Department of Integrative Biology

## IBIO*4820 Interpreting Biodiversity II F (1.5-3) [0.50]

This is the second of two courses that explore global and local issues in biodiversity as a capstone experience for biodiversity majors. The overall goal of the course is to provide opportunities for students to engage the application of their knowledge and skills to complex problems and issues involving “real-life” biodiversity projects within academic, government, or industry spheres. The learning outcomes include the application of key skills for interpreting biodiversity, the collection and analysis of biodiversity data. This student-centred experience will culminate with an oral presentation and written report to the “clients”, classmates and instructors.

**Prerequisite(s):** 12.00 credits
**Restriction(s):** Minimum cumulative average of 70%. Instructor consent required.
**Department(s):** Department of Integrative Biology

## IBIO*4950 Capstone Experience F,W (0-12) [1.00]

The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

**Prerequisite(s):** 12.00 credits
**Restriction(s):** Minimum cumulative average of 70%. Instructor consent required.
**Department(s):** Department of Integrative Biology

## IBIO*4951 Capstone Experience II F,W (0-12) [1.00]

The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

**Prerequisite(s):** IBIO*4500
**Restriction(s):** Minimum cumulative average of 70%. Instructor consent required.
**Department(s):** Department of Integrative Biology
International Development

IDEV*1000 Understanding Development and Global Inequalities S,F,W (3-0) [0.50]
The objective of the course is to provide an introduction to the study of international development as a contested and evolving effort to counteract global inequalities. Students will learn about the historical and political origins of the international development system, as well as the main development actors and institutions. The course will provide an introduction to foundational concepts within development studies, including poverty, inequality, human rights, foreign aid, and sustainable development.
Offering(s): Also offered through Distance Education format.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2000 The Development Landscape: Actors and Institutions F (3-0) [0.50]
This course examines the local and global context within which inclusive and sustainable development takes place. It explores why particular economic, social, political and institutional structures are in place and the implications of those structures for inclusive and sustainable development. Key issues will include global institutions, religion, the global economy, natural and physical environment, gender, urbanization, power structures, aid architecture, nature of non-governmental organizations, local and international business, governance and fragility, and corruption.
Prerequisite(s): IDEV*1000 or POLS*1150
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2100 Research in International Development F (3-0) [0.50]
This course explores the ethical dimensions of conducting research and producing knowledge in a context of inclusive and sustainable development. Students will explore the cultural, methodological and ethical challenges of conducting research in vulnerable communities, using concepts of positonality, difference, identity and intersectionality to understand the ways in which they might engage in a mutually-respectful process of research and engagement. The course provides a broad survey of research methods including documentary, observational, qualitative, and quantitative approaches, exploring their key characteristics, strengths and weaknesses and ethical implications of producing knowledge for development.
Prerequisite(s): IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2200 Policy, Economy and Society F (3-0) [0.50]
This course focuses on the analysis of the major development and social justice policy problems facing societies across the globe by applying systematic principles and approaches to the study of the economy and its interconnectedness to society. Examples of policy problems that will be examined include poverty, inequality, environmental sustainability, work and employment, and technology and innovation, amongst others. Throughout the course, students engage in the handling and analysis of data that is necessary for the analysis of policy problems.
Prerequisite(s): GEOG*1220 or IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2300 Theoretical Perspectives on Development S,W (3-0) [0.50]
This course will explore alternative theoretical perspectives on inclusive and sustainable development, drawing from an interdisciplinary lens of economics, sociology, geography and political science, amongst others. Students will examine how theoretical perspectives have changed over time and how they differ according to alternative disciplinary and philosophical perspectives. How dominant theoretical perspectives on development at any point in time influence policy and practice aimed at bringing about inclusive and sustainable development will also be explored.
Prerequisite(s): ECON*1050, ECON*1100, IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2400 Development, Social Justice and Human Rights W (3-0) [0.50]
This course will explore the nature of social justice and links to concepts and practice of development. It examines how development can be seen in terms of the advancement of social justice. Students will identify and critically assess alternative approaches to promoting social justice within a development context and the related actions by actors locally and globally. It will explore the related ethical issues associated with development policy and practice. Key topics will include poverty, hunger, power, gender, race, and class.
Prerequisite(s): IDEV*1000
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*2500 International Development Studies W (4-0) [0.50]
This course is an introduction to a broad range of topics in international development as studied by various researchers and from perspectives of different social-science disciplines. Special emphasis will be placed on research arising from the seven areas of emphasis in the undergraduate IDS program, the integration of diverse disciplines and paradigms, and the implications for public policy. Students in the International Development major should complete this course before semester five.
Prerequisite(s): POLS*2080, (ANTH*1150 or ECON*1050)
Equate(s): IDEV*2010
Restriction(s): Registration in B.A. International Development major, minor or area of concentration.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3000 Poverty and Inequality F (3-0) [0.50]
This course explores the nature and determinants of poverty and inequality at the local and global levels and the interrelationship between these. It examines the patterns and dynamics of poverty and inequality, for example over time and geographically. In so doing, it explores the nature and practical application of alternative approaches to their assessment and measurement. Students will reflect on and critically assess diverse approaches to reducing poverty and inequality locally and globally.
Prerequisite(s): 7.50 credits including IDEV*2500
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3100 Achieving Sustainable Development W (3-0) [0.50]
This course explores the environmental, social, and economic dimensions of sustainability and the interrelationships and trade-offs between sustainability and inclusive development. Alternative approaches for assessing and measuring sustainability will be covered. The course enables students to reflect and critically assess diverse approaches to promoting inclusive development that is sustainable locally to globally. Key issues might include climate change, urbanization, trade, extractive industries, conservation and eco-tourism, pollution, resource depletion, and water and sanitation.
Offering(s): First offering - Winter 2022
Prerequisite(s): 9.00 credits including IDEV*2000, IDEV*2100, IDEV*2300
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3101 Case Studies in International Development F,W (3-0) [0.50]
This course is an in-depth examination of select case studies in international development.
Prerequisite(s): 10.00 credits including IDEV*2010 or IDEV*2500
Restriction(s): Registration in B.A. International Development major. Minimum of 68% overall cumulative average.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3200 Individual Work/Study in International Development S,F,W (3-0) [0.50]
This course is intended for students who seek to combine work and study in development with their academic course work. It may be used in connection with internships or work at international development agencies or other appropriate businesses and organizations (in Canada and abroad), for research and/or experience in a developing country, or for other practica or programs. Any faculty member at the University of Guelph with appropriate expertise may supervise the work/study project. In each case, the student and faculty member will agree on an outline of the work/study project and evaluation criteria. In all cases the project will involve a writing component.
Prerequisite(s): 10.00 credits
Restriction(s): Instructor consent required. Written approval of the faculty advisor for International Development.
Department(s): Dean's Office, College of Social and Applied Human Sciences

IDEV*3300 Engaging in Development Practice F,W (3-0) [0.50]
This course provides an opportunity for students to engage with development practitioners in a real-world context. Students will implement a community engagement project determined in consultation with a community partner. The focus of engagement opportunities will be on the analysis of a development issue and defining related policy and/or practice options. The course explores the challenges associated with engaging with development practitioners in the real world and equips students with the necessary skills for successful engagement.
Prerequisite(s): 7.50 credits including IDEV*2500
Restriction(s): Restricted to students in BAH.IDEV.
Department(s): Dean's Office, College of Social and Applied Human Sciences
### IDEV*3400 Managing and Evaluating Change in Development W (3-0) [0.50]

This course explores the key practical skills required by those engaged in the implementation of development policy and practice including logical frameworks, theories of change, impact assessment, and project management. It aims to equip students with an understanding of the nature of these techniques, and how and where they are employed. The strengths and weaknesses of these techniques and their implications for development policy and practice are explored.

**Prerequisite(s):** 7.50 credits including IDEV*2500  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*3500 Field Course in Development Studies S (3-0) [1.00]

This course examines development within the context of an international or Canadian location, with the location varying each year. The course is comprised of an on-campus teaching component followed by a field trip during the summer semester. Topics may include poverty, food security, global migration, sustainable development, gender, community engagement. Information on the location and cost of the field school is available in the fall semester from the department with applications in January, prior to each summer offering.

**Prerequisite(s):** 7.50 credits  
**Restriction(s):** A cumulative average of 70%. Instructor consent required.  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*4000 Development in Action F,W (3-0) [1.00]

This capstone course for the Major in Development Studies course equips students to analyze complex issues in inclusive and sustainable development by applying and integrating the diverse theoretical and empirical concepts, approaches and ideas taught throughout their studies in International Development. Students will reflect on their personal positions and perspectives on development and drawing on their engagement experience. The course shows how different perspectives on sustainable and inclusive development can influence understanding and proposed solutions to development issues.

**Offering(s):** First offering - Fall 2022  
**Prerequisite(s):** 14.00 credits including IDEV*2400, IDEV*3000, IDEV*3100, IDEV*3300  
**Restriction(s):** Registration in B.A. International Development major. Minimum of 68% overall cumulative average. Instructor consent required.  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*4100 Thesis in International Development Studies I S,F,W (3-0) [0.50]

Supervised by a faculty member, students will undertake a literature review and plan, develop and write a research proposal. The topic of thesis will be selected in consultation with the supervisory faculty member prior to registration for the course. Students are advised to contact the IDS Academic Advisor for further information.

**Offering(s):** First offering - Fall 2022  
**Prerequisite(s):** 14.00 credits including IDEV*3000, IDEV*3100, IDEV*3300  
**Restriction(s):** Registration in B.A. IDS major with a minimum average of 80% in all IDS major course attempts. Instructor consent required.  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*4150 Thesis in International Development Studies II S,F,W (3-0) [0.50]

Students conduct, write and present an undergraduate thesis under the supervision of a faculty member.

**Offering(s):** First offering - Winter 2023  
**Prerequisite(s):** IDEV*4100  
**Restriction(s):** Restricted to students in BAH.IDS. Instructor consent required.  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*4190 Regional Context S,F,W (1.5-0) [0.25]

In this course students will learn about a region that they intend to study further in an advanced work/study project (IDEV*4200) or in a structured semester abroad. It may be offered as a reading course or as a seminar.

**Prerequisite(s):** 10.00 credits including IDEV*2010 or IDEV*2500  
**Restriction(s):** Instructor consent required. Written approval of the faculty advisor for International Development.  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*4200 Advanced Work/Study in International Development S,F,W (3-0) [0.75]

Individual work/study option at an advanced level. See IDEV*3200 for course description.

**Prerequisite(s):** IDEV*4190  
**Restriction(s):** Instructor consent required. Written approval of the faculty advisor for International Development.  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*4500 International Development Seminar F,W (3-0) [1.00]

This course brings together students in international development in their final year of study to examine key debates and to integrate knowledge from different areas of emphasis in the specialization. Students draw from a variety of disciplinary and inter-disciplinary perspectives in lectures, text-based seminars and in reaction to guest speakers. In addition, students develop and present research projects which focus theoretical insight on practical concerns.

**Prerequisite(s):** 15.00 credits  
**Restriction(s):** Registration in B.A. International Development major. Minimum of 68% overall cumulative average.  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences

### IDEV*4600 Advocating and Effecting Change in Development Policy and Practice S,F,W (3-0) [0.50]

This course aims to equip students with the knowledge and understanding needed to advocate for, and bring about, change in policy and practice that impact inclusive and sustainable development within government, civil society organizations and the private sector. The course examines the actions and processes through which changes in policy and practice take place, and the barriers that need to be overcome in order to effect such changes. These might include formal legal, political and administrative engagement, use of social media, protest, civil disobedience, etc. The course predominantly involves the in-depth analysis of successes and failures of advocacy and activism efforts at bringing about changes that have positive development impacts.

**Offering(s):** First offering - Fall 2022  
**Prerequisite(s):** 14.00 credits including IDEV*2400, IDEV*3000, IDEV*3100, IDEV*3300  
**Department(s):** Dean's Office, College of Social and Applied Human Sciences
## Italian Studies

### School of Languages and Literatures

Note: Literary texts are, at all levels, studied in the original language. Students registering in these courses will be expected to have the appropriate knowledge.

### ITAL*1060 Introductory Italian I F,W (4-0) [0.50]

This is a beginning course in Italian providing the fundamentals of grammar, structure and idiom. Introduction to aspects of Italian life and culture through audio-visual aids.

**Offering(s):** Also offered through Distance Education format.

**Restriction(s):** Not available to students who have credit for 4U Italian or equivalent.

**Department(s):** School of Languages and Literatures

### ITAL*1070 Introductory Italian II W (3-1) [0.50]

This course is a continuation of ITAL*1060. In addition to basic grammar and composition, texts from contemporary culture are introduced.

**Prerequisite(s):** ITAL*1060

**Restriction(s):** This course may not be taken by students who have OAC Italian or equivalent.

**Department(s):** School of Languages and Literatures

### ITAL*2090 Intermediate Italian F (4-0) [0.50]

An intensive language course that continues the grammar begun at the introductory level while introducing additional speaking, listening, and writing practice.

**Prerequisite(s):** ITAL*1070

**Department(s):** School of Languages and Literatures

### ITAL*3060 Advanced Italian W (3-0) [0.50]

This course will combine Italian grammar, composition, and translation with Italian literature and film. While addressing aspects of modern and contemporary Italian literature, history and culture, the course will teach students to understand spoken Italian, to converse, and to communicate in written Italian at an advanced level.

**Prerequisite(s):** ITAL*2090

**Department(s):** School of Languages and Literatures

### ITAL*3400 Renaissance Lovers and Fools F (4-0) [0.50]

In this course, students will read Italian Renaissance plays such as Machiavelli’s “The Mandrake” and Bibbiena’s “Calandria” with special attention to the portrayals of lovers and fools. The course will place particular emphasis on representations of class and gender relations. Additional readings in medieval literature, history, and critical theory will provide background and context for the plays. Lectures and texts are in English. Students registered in ITAL*3400 will meet a fourth hour per week to discuss texts in Italian. This course is offered in conjunction with HUMN*3400.

**Prerequisite(s):** ITAL*3060

**Co-requisite(s):** HUMN*3400

**Department(s):** School of Languages and Literatures

### ITAL*3700 Experiential Learning and Language S,F,W (0-0) [0.50]

This course provides an opportunity for independent study based on an experiential project in Italian. The project (approximately 70 hours) must be approved by a faculty member in the School of Languages and Literatures. It will include research about experiential learning, a reflective piece of writing and a public oral presentation about the project.

**Prerequisite(s):** 10.00 credits including 1.50 credits in Italian.

**Restriction(s):** A minimum cumulative average of 70% in all Italian course attempts. Instructor consent required.

**Department(s):** School of Languages and Literatures

### ITAL*4900 Research Project in Italian Studies F,W (3-0) [0.50]

This is a research project on some aspect of Italian language, literature, or thought. The topic must be approved by the section; the paper will be written under the regular guidance of a faculty advisor.

**Prerequisite(s):** ITAL*3060, ITAL*3400

**Department(s):** School of Languages and Literatures
XII. Course Descriptions, Landscape Architecture

LARC*1100 Introduction to Design and Communication Studio F (3-3) [0.75]
An introduction to the physical design professions that emphasize design awareness, the design process, creativity and communication skills.
Restriction(s): Registration in the B.L.A. program.
Department(s): School of Environmental Design and Rural Development

LARC*1950 History of Cultural Form F (3-0) [0.50]
This course is an exploration of the historical roots of landscape design with an emphasis on the influence of past works on the present practice of landscape architecture.
Department(s): School of Environmental Design and Rural Development

LARC*2020 Foundational Design Studio W (2-4) [0.75]
The focus of this course is on the theory, process and vocabulary of spatial design. Students will explore the anthropomorphic, social, psychological, aesthetic and behavioural forces to which a designer must respond. The course also provides an introduction to design development and digital visual communication skills.
Prerequisite(s): LARC*1100
Department(s): School of Environmental Design and Rural Development

LARC*2100 Landscape and Site Analysis F (2-2) [0.50]
This course is an introduction to biophysical factors and their influence on design. Site assessment methods and data presentation techniques will be outlined. Students will learn to formulate and conduct site assessments that include resource inventories and the analysis for land use suitability.
Prerequisite(s): LARC*2020
Department(s): School of Environmental Design and Rural Development

LARC*2230 Planting Design W (1-2) [0.50]
This course introduces the visual, physical, and cultural characteristics of plants and their use. Students will apply design theory at a site specific scale using plants for a wide range of applications.
Prerequisite(s): LARC*1100
Department(s): School of Environmental Design and Rural Development

LARC*2240 Plants in the Landscape F (1-2) [0.50]
This course explores the identification and cultural requirements of native and introduced plants in cultivated and naturalized landscapes from a design perspective.
Prerequisite(s): LARC*2230
Department(s): School of Environmental Design and Rural Development

LARC*2410 Site Engineering F (3-1) [0.50]
This course introduces earthwork, circulation, drainage and sub-grade utility networks and their connection to design through site grading. Field surveying, technical drawing, cut and fill calculations and quantity take-offs are introduced and applied.
Prerequisite(s): LARC*2020, LARC*2420
Department(s): School of Environmental Design and Rural Development

LARC*2420 Materials and Techniques W (3-0) [0.50]
This course is an introduction to the materials and techniques commonly used for landscape construction. Students will learn to prepare technical construction drawings and will develop a basic understanding of landscape architectural construction specifications and contracts.
Prerequisite(s): LARC*1100
Department(s): School of Environmental Design and Rural Development

LARC*2820 Urban and Regional Planning W (3-0) [0.50]
Introduction to the evolution and history of planning and its conceptual base. A study of the theoretical foundations of planning. Emphasis on the Canadian scene and on Canadian planning literature.
Offering(s): Also offered through Distance Education format.
Department(s): School of Environmental Design and Rural Development

LARC*3040 Site Design Studio F (2-4) [0.75]
This course focuses on applying elements of the site planning process, including programming, site inventory and analysis, conceptual design, functional analysis and diagramming in design. The role of theory in site design is also emphasized as a primary element within this course.
Prerequisite(s): LARC*2020
Department(s): School of Environmental Design and Rural Development

LARC*3050 Urban Design Studio W (2-4) [0.75]
This course provides lectures and projects that emphasize the integration of design theory, skills and knowledge using site scale and urban design projects as examples
Prerequisite(s): LARC*3040
Department(s): School of Environmental Design and Rural Development

LARC*3060 Landscape Rehabilitation Design Studio F (2-4) [0.75]
This course introduces students to regional and intermediate scale projects emphasizing conservation, development and rehabilitation of landscapes. Projects will focus on biophysical, cultural and visual resources as primary design determinants.
Prerequisite(s): LARC*3050
Department(s): School of Environmental Design and Rural Development

LARC*3070 Urban and Community Design Studio F (2-6) [1.00]
This course provides exercises in urban design and master planning to provide an understanding of the integrative design process that considers ecological, technological, socio-economic, human and aesthetic factors in the land development process. Projects focus on land planning, community design, urban design, and public engagement.
Prerequisite(s): LARC*3060
Department(s): School of Environmental Design and Rural Development

LARC*3320 Principles of Landscape Ecology F (3-0) [0.50]
This course offers an integrated approach to understanding the functioning of landscapes. The emerging theories, concepts and methodologies of landscape science and their application to landscape and environmental management will be discussed.
Prerequisite(s): LARC*2100, LARC*2240
Department(s): School of Environmental Design and Rural Development

LARC*3430 Introduction to Landscape Construction W (2-4) [0.50]
This course covers the production of construction drawings, specifications, tenders, contract documents and cost estimates. There is an emphasis on digital tools and techniques in communicating construction documentation.
Prerequisite(s): LARC*3430
Department(s): School of Environmental Design and Rural Development

LARC*3440 Landscape Construction and Documentation F (2-4) [0.75]
This course provides lectures and studio exercises that integrate construction documentation with site design. The technical procedures needed to direct design implementation including layout, grading, utility design and plan preparation related to site preparation are also examined as part of the course content.
Prerequisite(s): LARC*2410
Department(s): School of Environmental Design and Rural Development

LARC*3500 Independent Study S,F,W (0-6) [0.50]
In this course each student establishes, in consultation with the faculty member chosen, the content of special study within the area of expertise of that instructor.
Prerequisite(s): LARC*3040
Restriction(s): Instructor consent required.
Department(s): School of Environmental Design and Rural Development

LARC*4090 Seminar W (3-0) [0.50]
This course provides an integrated overview of professional issues involving practice, ethics, environmental concerns, government policy, research needs and professional responsibilities to society. Emphasis is placed on writing and oral presentations.
Prerequisite(s): LARC*3070
Department(s): School of Environmental Design and Rural Development

LARC*4510 Honours Thesis F (3-0) [0.50]
In this course, students will identify and select significant problems related to landscape architecture, and explore the scholarship related to problem identification and resolution. Students will use the knowledge and skills acquired in preceding courses to create an undergraduate thesis that emphasizes oral and written communication.
Prerequisite(s): LARC*3060
Department(s): School of Environmental Design and Rural Development

LARC*4610 Professional Practice F (3-0) [0.50]
This course includes lectures and assignments dealing with professional ethics, organizations, contract law and procedures, relationships with clients, contractors and professional practitioners, office procedure and professional promotion practices and trends in landscape architecture.
Prerequisite(s): LARC*3050
Department(s): School of Environmental Design and Rural Development

Revision: 2020-2021 Undergraduate Calendar
### LARC*4620 Landscape Architecture Internship S,F,W (0-10) [1.00]
Students will engage in a paid experiential learning opportunity working in a professional office. Students are mentored in aspects of landscape architecture practice by a registered Landscape Architect and the program coordinator. Students are required to submit weekly reports and two reflective work experience papers.

**Prerequisite(s):** LARC*3060, LARC*3440, LARC*4610  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Environmental Design and Rural Development

### LARC*4710 Capstone Design Studio W (2-6) [1.00]
Students are required to submit a project work plan, prepare professional quality design and presentation drawings, and make formal presentations. Students are encouraged to select problems that require an interdisciplinary approach that integrate skills and knowledge obtained in previous courses to produce a comprehensive final design project.

**Prerequisite(s):** LARC*3070, LARC*4510  
**Department(s):** School of Environmental Design and Rural Development

### LARC*4730 Special Study in Landscape Architecture S,F,W (0-4) [0.50]
This course is a faculty supervised independent study involving design competitions or other special projects and can be taught in either an individual or a group format.

**Prerequisite(s):** LARC*3040  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Environmental Design and Rural Development

### LARC*4740 Case Studies S,F,W (0-6) [0.50]
Students participate in a case study supervised by a faculty member. Travel and field studies may be involved and may entail additional costs. Students are required to submit a major paper or project.

**Prerequisite(s):** LARC*3040  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Environmental Design and Rural Development
Latin
School of Languages and Literatures

Note: Literary texts are, at all levels, studied in the original language. Students registering in these courses will be expected to have the appropriate knowledge. Higher level courses in Latin are available as language modules attached to selected Classical Studies courses which are taken as double-weighted courses. (See Classical Studies course descriptions.)

## Linguistics

**School of Languages and Literatures**

### LING*1000 Introduction to Linguistics F,W (3-0) [0.50]

The nature of language. An elementary survey of linguistic disciplines. Phonetics, morphology, syntax, semantics, language, and society.

**Offering(s):** Also offered through Distance Education format.

**Department(s):** School of Languages and Literatures

### LING*2400 Phonetics W (3-0) [0.50]

This course studies central concepts in phonetics such as speech anatomy, acoustics, articulation, analysis and perception of vowels, consonants and suprasegmentals as well as the International Phonetic Alphabet.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** LING*1000

**Department(s):** School of Languages and Literatures
**Management**

**Department of Management**

**Department of Marketing and Consumer Studies**

**School of Hospitality, Food, and Tourism Management**

**MGMT*1000 Introduction to Business F (4-0) [1.00]**

This course is intended for B.Comm. students in semester one. It provides students with an understanding of the evolution of forms of business organization and their role in social and economic development. The main focus is on current economic, social and environmental issues that impact business organizations and which, in turn, are impacted by business decisions. Ethical considerations and the concept of sustainability are essential components. Students develop oral and written communication skills in small seminar groups.

*Restriction(s):* CME*1000, MGMT*2150. Registration in BCOMM and fewer than 7.50 credits.

*Department(s):* School of Hospitality, Food and Tourism Management

**MGMT*1100 Business Career Preparation F,W (1-0) [0.00]**

This course is designed to provide students with knowledge and tools to enhance their career readiness skills, leading to a greater level of confidence and success when approaching the career search process. Students will be guided through a framework for career management and steps to create a personal “career toolkit.” This would include materials and resources such as a resume and cover letter, best practices for making more informed decisions about career paths, how to access to career opportunities and presenting themselves professionally to employers. The majority of the course will be delivered online via CourseLink, supplemented by two in-class activities. A pass/fail grade will be assigned upon completion of the course.

*Prerequisite(s):* 4.00 credits

*Restriction(s):* COOP*1100. Restricted to students in BCOMM with fewer than 10.00 credits. This is a Priority Access Course. Enrolment may be restricted to particular majors during certain periods.

*Department(s):* Dean’s Office, Gordon S. Lang School of Business and Economics

**MGMT*1200 Principles of Management W (3-0) [0.50]**

This course provides an overview of the role of managers in the modern organization. Students will learn about the history of management theory and will examine in depth the major management functions of planning, leading, organizing and controlling. The concepts of management ethics and sustainability are also introduced.

*Prerequisite(s):* MGMT*1000

*Department(s):* Department of Management

**MGMT*2150 Introduction to Canadian Business Management S,F,W (3-0) [0.50]**

This is an introductory course in the fundamentals of business management in Canada. Students will be exposed to the basic functions of business and management. This course will also cover small business and entrepreneurship, forms of business ownership, competing in the global business environment and the economic and political realities of business in Canada today. Note: Students registered in the B.Comm program are required to select MGMT*1000 Introduction to Business.

*Offering(s):* Also offered through Distance Education format.

*Equate(s):* HTM*2150

*Restriction(s):* MGMT*1000

*Restriction(s):* Not available to students in the BCOMM program.

*Department(s):* School of Hospitality, Food and Tourism Management

**MGMT*2260 Introduction to International Business F (3-0) [0.50]**

This course provides an overview of the strategic factors shaping international business. Students will examine fundamental theories, concepts and practices of managing business in a global setting. The course will include an exploration of multiculturalism, diversity, and cultural perspectives in the conduct of international business.

*Prerequisite(s):* MGMT*1000 or MGMT*2150

*Department(s):* Department of Management

**MGMT*2500 Fundamentals of Entrepreneurship F (3-0) [0.50]**

Students in this course will learn the theoretical concepts of entrepreneurship, use a variety of tools and frameworks to assess market opportunities and learn creative problem-solving techniques. Weekly topics will discuss resource and marketing of a startup, elements of customer discovery, risk assessment and ethics when developing a potential new venture.

*Prerequisite(s):* MGMT*1000 or MGMT*2150

*Restriction(s):* This is a Priority Access Course. Restricted to students in the Minor in Entrepreneurship.

*Department(s):* Department of Management

**MGMT*3020 Corporate Social Responsibility S,F,W (3-0) [0.50]**

This course provides students an opportunity to examine a comprehensive range of topics and issues related to business and sustainability and aims to explore the implications of changing stakeholder expectations, and opportunities for organizational sustainable value creation. Key topics will include CSR theories and frameworks, global issues and role of business in society; socially responsible investing, green consumption, CSR and firm competitive advantage, reputation, corporate governance and ethics, regulation and social/environmental reporting.

*Offering(s):* Also offered through Distance Education format.

*Prerequisite(s):* 9.00 credits

*Equate(s):* BUS*3020

*Restriction(s):* This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

*Department(s):* Department of Management

**MGMT*3030 Managerial Communications and Team Leadership W (3-0) [0.50]**

This course is designed to enhance managerial skills in interpersonal communication (both oral and written), team leadership and meeting facilitation through an intensive seminar experience. The content of the seminars are based on a review of the ‘great books’ of leadership and management. Students will collectively select, review, discuss and debate the texts, and upon successful completion of the course will have further developed their skills in critical enquiry, consultation, evaluation, presentation, facilitation and leadership.

*Prerequisite(s):* 12.50 credits.

*Restriction(s):* Restricted to students in BCOMM Minimum of 70% cumulative average. Instructor consent required.

*Department(s):* School of Hospitality, Food and Tourism Management

**MGMT*3140 Business Analytics S,F (3-0) [0.50]**

Business analytics is an evidence-based approach to management decision-making using analytic tools to transform data into insight. This course will combine student’s existing math / statistics skills and business knowledge with modern analytic tools (spreadsheets and other applications) in order to develop a toolkit of analysis tools for solving a variety of business problems. Topics include data management and transformation, visualization, optimization, simulation, and regression. Descriptive, predictive, and prescriptive analytics will be covered.

*Prerequisite(s):* 9.00 credits including (1 of MATH*1030, MATH*1080, MATH*1200, 1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060)

*Restriction(s):* Restricted to students in BCOMM. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

*Department(s):* Department of Management

**MGMT*3300 Negotiation and Conflict Management F (3-0) [0.50]**

This course teaches students about negotiation theory in addition to practical strategies and styles that can improve their conflict management and negotiation skills. The course covers conflict management from a variety of perspectives, including as first party and as third party skills.

*Prerequisite(s):* HROB*2290, MGMT*1200

*Department(s):* Department of Management

**MGMT*3300 Project Management F,W (3-0) [0.50]**

This course provides students with an understanding of the concepts, principles, and practices for project management with special focus on planning, controlling, and managing projects to success. The course also emphasizes the techniques most frequently used in the context of both internal and external organizational roles of a project manager.

*Prerequisite(s):* 4.00 credits.

*Restriction(s):* This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

*Department(s):* Department of Management

**MGMT*3320 Financial Management S,F,W (3-0) [0.50]**

The viewpoint taken in the course is that of the senior financial officer of a business firm. The focus is on the management of cash, accounts receivable, inventory and short and intermediate term liabilities. Emphasis is placed on the analysis and forecasting of financial information.

*Offering(s):* Also offered through Distance Education format.

*Prerequisite(s):* 1 of ACCT*2230, BUS*2230, HFA*3070, HTM*3070

*Equate(s):* BUS*3320

*Restriction(s):* Registration in BCOMM or BA.EURS area of emphasis in European Business Studies.

*Department(s):* Department of Management

---

Revision: 2020-2021 Undergraduate Calendar
MGMT*3400 Current Topics in Management S,F,W (3-0) [0.50]
This course provides a lecture, discussion or seminar program on a selected topic or current issue in management. The specific topic of the course will be identified on an ad hoc basis as contemporary issues and topics in management arise.
Prerequisite(s): 9.00 credits including (MGMT*1000 or MGMT*2150)
Restriction(s): BUS*4250, HTM*4200. Restricted to students in BCOMM and BA:H:EURS: EBS. This is a Priority Access Course. See department for more information.
Department(s): Department of Management

MGMT*3500 Design Thinking F,W (3-0) [0.50]
Using principles of Design Thinking, students in this course will work effectively in teams to critically analyze industry-specific problems to thoughtfully develop solutions to industry problems. Students will engage in critical thinking and self-reflection to examine relevant issues from a variety of perspectives and will be required to present proposed solutions in a meaningful and impactful way.
Prerequisite(s): MGMT*2500
Restriction(s): This is a Priority Access Course. Restricted to students in the Minor in Entrepreneurship.
Department(s): Department of Management

MGMT*4000 Strategic Management F,W (3-0) [0.50]
Strategic management is a synthesis of the principles of business management with emphasis upon the formation of business decisions and policies. The purpose of this course is to enable the student to draw on analytical tools and factual knowledge from other courses in analyzing comprehensive business problems and establishing viable plans and methods to implement the developed plans of action.
Prerequisite(s): MGMT*3320, 1 of ( ECON*2560 or FIN*2200), ECON*3460, ECON*3560, 1 of ( FARE*3310, HTM*3120, REAL*3890)
Restriction(s): BUS*4250, HTM*4200. Restricted to students in BCOMM and BA:H:EURS: EBS. This is a Priority Access Course. See department for more information.
Department(s): School of Hospitality, Food and Tourism Management

MGMT*4020 Interdisciplinary Food Product Development I F (3-3) [0.50]
This is an interdisciplinary course that involves management, food science and human health and nutrition majors. This course requires interdisciplinary teams of students to develop new food products, services and business ventures for the agricultural and food industries. Processes include analyzing, planning, coordinating and implementing information required for the conception, promotion and distribution of new food products and marketing ideas designed to create and maintain beneficial exchanges between food and agricultural industries while meeting the expectations and demands of consumers and the economy.
Prerequisite(s): 14.00 credits, minimum 70% cumulative average
Restriction(s): FOOD*4260. Students in BCOMM, BSC:FOOD and BSC:NANS majors. Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

MGMT*4030 Interdisciplinary Food Product Development II W (3-3) [0.50]
This is an interdisciplinary food product development course that involves management, food science and human health and nutrition majors. This course requires interdisciplinary teams of students to develop new food products, services and business ventures for the agricultural and food industries. Processes include analyzing, planning, coordinating and implementing information required for the conception, promotion and distribution of new food products and marketing ideas designed to create and maintain beneficial exchanges between food and agricultural industries while meeting the expectations and demands of consumers and the economy.
Prerequisite(s): MGMT*4020, minimum 70% cumulative average
Restriction(s): FOOD*4270. Students in BCOMM, BSC:FOOD and BSC:NANS majors. Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

MGMT*4040 Advanced Topics in Management W (3-0) [0.50]
This advanced topics course provides a lecture-discussion or seminar program on a selected topic or issue in management. The specific topics covered in this course may change on an annual basis. The course topics will be announced prior to the course selection process.
Prerequisite(s): 12.00 credits including MGMT*1200
Department(s): Department of Management

MGMT*4050 Business Consulting F,W (3-0) [0.50]
Offered through the John F. Wood Centre for Business and Student Enterprise (Wood Centre), this project-based course is designed to provide students with an opportunity to engage with community organizations by working as consultants in interdisciplinary teams, and to investigate and propose sustainable solutions to live cases put forth by real world clients. Project requirements will vary based on the needs of the assigned client.
Prerequisite(s): 1 of ( MCS*1000, MGMT*1000, MGMT*2150). 10.00 credits, minimum 70% cumulative average
Restriction(s): Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

MGMT*4060 Business Consulting F,W (3-0) [0.50]
Offered through the John F. Wood Centre for Business and Student Enterprise (Wood Centre), this project-based course is designed to provide students with an opportunity to engage with community organizations by working as consultants in interdisciplinary teams, and to investigate and propose sustainable solutions to live cases put forth by real world clients. Project requirements will vary based on the needs of the assigned client.
Prerequisite(s): 1 of ( MCS*1000, MGMT*1000, MGMT*2150). 10.00 credits, minimum 70% cumulative average
Restriction(s): Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

MGMT*4100 Management Decision Making F (3-0) [0.50]
This course is designed to improve decision-making skills and will examine the process of decision-making, taking into account complexity, risk and outcomes, and the impact of decisions on people, the community and the organization. The course also considers the role of rational/non-rational in decision-making and examine how uncertainty and ambiguity may influence management perceptions of choices and risks.
Prerequisite(s): MGMT*3140, MGMT*3200
Department(s): Department of Management

MGMT*4140 Advanced Business Analytics F (3-0) [0.50]
This course builds on the theory-driven Business Analytics foundations of earlier courses by introducing students to data-driven (i.e., machine learning) analytics approaches to business data and decision making. Topics include data gathering and cleaning, clustering and classification techniques, and dimensionality reduction. Beyond the use of leading-edge analysis tools, a full systems lifecycle approach will be utilized in this course.
Offering(s): First offering - Fall 2021
Restriction(s): This is a Priority Access Course.
Department(s): Department of Management

MGMT*4200 Management Capstone W (3-0) [0.50]
This course examines management from a strategic perspective, focusing on how organizations can achieve competitive advantage through leveraging their resources. Students will be challenged to integrate their knowledge of management theories to develop strategic solutions to organizational issues.
Prerequisite(s): HRB*3100, MGMT*3200
Equate(s): HRB*4000
Department(s): Department of Management

MGMT*4260 International Business W (3-0) [0.50]
This course covers international business and deals with the strategic and functional areas of management in the international business environment. This course examines the factors that shape strategic management outside a firm's domestic markets. It uses a mix of readings, lectures, case studies, individual and group projects.
Prerequisite(s): 14.50 credits including MGMT*2260
Restriction(s): This is a Priority Access Course. Enrollment may be restricted to particular programs or specializations. See department for more information.
Department(s): Department of Management

MGMT*4300 Advanced Project Management W (3-0) [0.50]
This course builds on the Project Management foundations by introducing coverage of advanced topics in project scheduling, risk and quality management, and cost control as well as providing comprehensive knowledge of scheduling and other project management tools. Through a capstone project management simulation activity, this course also addresses the many issues associated with the delivery of complex projects.
Prerequisite(s): HRB*2100, HRB*3100, MGMT*3300
Restriction(s): This is a Priority Access Course. Restricted to students in the Minor in Project.
Department(s): Department of Management

**Prerequisites:**
- MGMT*4350
- MGMT*4500
- MGMT*4991

**Restrictions:**
- Restricted to students in BCOMM
- Minimum of 70% cumulative average
- Instructor consent required.
Marketing and Consumer Studies

Department of Marketing and Consumer Studies
For courses without semester designations, please check with the department. Advance schedules are available in the department.

MCS*1000 Introductory Marketing S,F,W (3-0) [0.50]
This course covers the marketing of both products and services. Students will be introduced to the theoretical concepts through lectures and class discussions and have the opportunity to apply these concepts through case analysis and discussion.
Offering(s): Also offered through Distance Education format.
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*2000 Business Communication S,F,W (3-0) [0.50]
This course provides an overview of business communication by reviewing and discussing key issues (such as ethics and globalization), and the components of a business case. Weekly lectures are supplemented by discussions of business cases and hand-in assignments designed to introduce students to basic business communication skills.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4.00 credits
Restriction(s): Restricted to students in B.Comm.
Department(s): Department of Marketing and Consumer Studies

MCS*2020 Information Management S,F,W (3-0) [0.50]
In this course students are introduced to the concepts and principles of information acquisition, manipulation and management as relevant to organizational decision-making. Experience in the evaluation of information technology applications used in organizations is provided.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4.00 credits
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Not available to students registered in BCOMP program.
Department(s): Department of Marketing and Consumer Studies

MCS*2100 Personal Financial Management S,F,W (3-0) [0.50]
This introductory course is designed to help students develop and achieve their personal goals in financial management.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 5.00 credits
Equate(s): COST*2100
Department(s): Department of Marketing and Consumer Studies

MCS*2600 Fundamentals of Consumer Behaviour, F,W (3-0) [0.50]
Organizations survive and achieve their goals by satisfying the needs and wants of consumers as well as or better than their competitors. This course examines consumer behaviours, the economic, social, cultural and psychological factors related to consumer behaviours, the evolution and change in behaviours and relationships, and the ways in which consumers respond to stimuli employed in the marketing of products, services and ideas.
Prerequisite(s): MCS*1000, (1 of BUS*2900, HROB*2900, HROB*2100, PSYC*1000, PSYC*1200). Although not required, it is recommended that students take PSYC*1000 prior to MCS*2600.
Restriction(s): Registration in BCOMM programs, BCOMM.MKTG minor, or BAH.EURS_EB This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3000 Advanced Marketing F (3-0) [0.50]
This course provides students with an opportunity to extend their knowledge of the marketing principles and strategies they learned in MCS*1000 to develop a marketing plan and to explore sales as a career.
Prerequisite(s): 10.00 credits including MCS*1000
Restriction(s): Not available to BCOMM: students registered in BCOMM.MKMN, BCOMM.MKMN.C, AGBU. AGBU.C majors.
Department(s): Department of Marketing and Consumer Studies

MCS*3010 Quality Management W (3-0) [0.50]
This course covers general concepts and expectations of quality assurance from consumer, government, managerial and technological points of view and examines the relationship of national and international groups concerned with quality assurance. Seminars apply concepts to selected products and services.
Prerequisite(s): 10.00 credits including (1 of ECON*2740, PSYC*1010, STAT*2040, STAT*2060, STAT*2080)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3030 Research Methods F,W (3-0) [0.50]
This course examines the concepts, principles and practices for consumer, market and product development research processes. Topics include research problem definition, research objectives, research design, measurement, sampling methods, execution and research management, analysis and interpretation, and report writing.
Prerequisite(s): 1 of ECON*2740, PSYC*1010, STAT*2060
Restriction(s): Registration in BCOMM.MKMN, BCOMM.MKMN.C, BCOMM.REH, BCOMM.REH.C, or the BCOMM.MKMN, BCOMM.MKTG minor. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3040 Business and Consumer Law S,F,W (3-0) [0.50]
This course introduces students to statutory and common law concerning business and consumer transactions. An overview of the laws of contracts and torts forms the basis of business and producer/consumer relationships. Discussion topics include sale of goods and consumer protection legislation; debtor-creditor relations; competition law; intellectual property rights and manufacturers' product liability.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4.00 credits
Restriction(s): Registration in BCOMM. program, BA:BADM minor, or BA:EURS area of emphasis in European Business Studies. This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3050 Digital Marketing F,W (3-0) [0.50]
This course examines actionable marketing strategies and tactics that can be implemented and measured with a variety of digital tools. We will examine the convergence of owned media, earned media and paid media in digital spaces, and learn how a strategic plan can be supported on digital marketing platforms. Marketing management principles, and the design, measurement and evaluation of communication programs will be viewed through the lens of digital marketing.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 10.00 credits including MCS*1000, MCS*2020
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. See the departmental website for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3500 Marketing Analytics F,W (3-0) [0.50]
This course teaches students decision making theory and the methods of analysis that support decision making in the marketing discipline. Topics include customer, competitor and market analysis and methods such as forecasting and decision modeling.
Prerequisite(s): 10.00 credits including ECON*1050, (MATH*1000 or MATH*1030), MCS*2600, (1 of ECON*2740, PSYC*1010, STAT*2060)
Equate(s): MCS*3610
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

MCS*3600 Consumer Information Processes F,W (3-0) [0.50]
This course provides an in-depth treatment of information processing research and theories as they relate to consumer judgement and choice. Components of theory addressed include: attention and perception, motivation, processing capacity, encoding and memory storage, retrieval and decision processes. Applications to marketplace policy and strategy are discussed.
Prerequisite(s): 15.00 credits including MCS*2600, MCS*3030
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.

Mathematics

Department of Mathematics and Statistics

Suggested initial course sequence:
1. For students with 4U or OAC Calculus and expecting to pursue further studies in mathematics or the physical sciences: MATH*1200, MATH*1210.
2. For students interested in applications to the biological sciences: MATH*1080, MATH*2080.
3. For students not expecting to pursue further studies in mathematics: MATH*1030, one STAT*XXXX course.

MATH*1030 Business Mathematics F,W (3-0) [0.50]

Primarily intended for business and economics students, this course is designed to introduce and reinforce the essential mathematical skills needed to understand, analyze, and solve mathematical problems related to business and economics. Topics covered include basic algebra; functions, including a review of exponential and logarithmic functions; sequences and series with financial applications; limits; continuity; and differential calculus including derivatives, higher order derivatives, and curve sketching.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 4U Advanced Functions
Restriction(s): MATH*1080, MATH*1200 Not available to students registered in the BSC program.
Department(s): Department of Mathematics and Statistics

MATH*1080 Elements of Calculus I F,W (3-1) [0.50]

This course provides an introduction to the calculus of one variable with emphasis on mathematical modelling in the biological sciences. The topics covered include elementary functions, sequences and series, difference equations, differential calculus and integral calculus.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of 4U Advanced Functions, 4U Advanced Functions and Calculus or equivalent
Restriction(s): IPS*1500, MATH*1200
Department(s): Department of Mathematics and Statistics

MATH*1090 Elements of Calculus II W (3-1) [0.50]

This course will expand on integration techniques, and introduce students to difference and differential equations, vectors, vector functions, and elements of calculus of two or more variables such as partial differentiation and multiple integration. The course will emphasize content relevant to analyzing biological systems, and methods will be illustrated by application to biological systems.

Prerequisite(s): 1 of IPS*1500, MATH*1080, MATH*1200
Restriction(s): IPS*1510, MATH*1210, MATH*2080
Department(s): Department of Mathematics and Statistics

MATH*1160 Linear Algebra I F,W (3-0) [0.50]

This course provides an introduction to linear algebra in Euclidean space. Topics covered include: N-dimensional vectors, dot product, matrices and matrix operations, systems of linear equations and Gaussian elimination, linear independence, subspaces, basis and dimension, matrix inverse, matrix rank and determinant, eigenvalues, eigenvectors and diagonalization, orthogonalization and projections, linear transformations. Some fundamental proofs and applications of these topics will be included.

Prerequisite(s): 4U Calculus and Vectors or 4U Advanced Functions
Restriction(s): ENGG*1500, MATH*2150, MATH*2160
Department(s): Department of Mathematics and Statistics

MATH*1200 Calculus I F (3-1) [0.50]

This is a theoretical course intended primarily for students who expect to pursue further studies in mathematics and its applications. Topics include inequalities and absolute value; compound angle formulas for trigonometric functions; limits and continuity using rigorous definitions; the derivative and derivative formulas (including derivatives of trigonometric, exponential and logarithmic functions); Fermat's theorem; Rolle's theorem; the mean-value theorem; applications of the derivative; Riemann sums; the definite integral; the fundamental theorem of calculus; applications of the definite integral; the mean value theorem for integrals.

Prerequisite(s): 1 of 4U Calculus and Vectors, 4U Advanced Functions and Calculus or Grade 12 Calculus
Restriction(s): IPS*1500, MATH*1080
Department(s): Department of Mathematics and Statistics

MATH*1210 Calculus II W (3-1) [0.50]

This course is a continuation of MATH*1200. It is a theoretical course intended primarily for students who need or expect to pursue further studies in mathematics, physics, chemistry, engineering and computer science. Topics include inverse functions, inverse trigonometric functions, hyperbolic functions, indeterminate forms and l'Hopital's rule, techniques of integration, parametric equations, polar coordinates, Taylor and Maclaurin series; functions of two or more variables, partial derivatives, and if time permits, an introduction to multiple integration.

Prerequisite(s): MATH*1080 or MATH*1200
Restriction(s): IPS*1510, MATH*1090, MATH*2080
Department(s): Department of Mathematics and Statistics

MATH*2000 Proofs, Sets, and Numbers F (3-1) [0.50]

This course exposes the student to formal mathematical proof, and introduces the theory of sets and number systems. Topics include relations and functions, number systems including formal properties of the natural numbers, integers, and the real and complex numbers. Equivalence relations and partial and total orders are introduced. The geometry and topology of the real number line and Cartesian plane are introduced. Techniques of formal proof are introduced including well-ordering, mathematical induction, proof by contradiction, and proof by construction. These techniques will be applied to fundamental theorems from linear algebra.

Prerequisite(s): 1 of IPS*1500, MATH*1080, MATH*1160, MATH*1200
Department(s): Department of Mathematics and Statistics

MATH*2130 Numerical Methods W (3-1) [0.50]

This course provides a theoretical and practical introduction to numerical methods for approximating the solution(s) of linear and nonlinear problems in the applied sciences. The topics covered include: solution of a single nonlinear equation; polynomial interpolation; numerical differentiation and integration; solution of initial value and boundary value problems; and the solution of systems of linear and nonlinear algebraic equations.

Prerequisite(s): (CIS*1300 or CIS*1500), (1 of IPS*1510, MATH*1090, MATH*1210, MATH*2080)
Department(s): Department of Mathematics and Statistics

MATH*2200 Advanced Calculus I F (3-0) [0.50]

This course continues the study of multiple integrals, introducing spherical and cylindrical polar coordinates. The course also covers vector and scalar fields, including the gradient, divergence, curl and directional derivative, and their physical interpretation, as well as line integrals and the theorems of Green and Stokes.

Prerequisite(s): MATH*2200
Department(s): Department of Mathematics and Statistics

MATH*2210 Advanced Calculus II W (3-0) [0.50]

This course continues the study of multiple integrals, introducing spherical and cylindrical polar coordinates. The course also covers vector and scalar fields, including the gradient, divergence, curl and directional derivative, and their physical interpretation, as well as line integrals and the theorems of Green and Stokes.

Prerequisite(s): MATH*2200
Department(s): Department of Mathematics and Statistics

MATH*2270 Applied Differential Equations F (3-1) [0.50]

This course covers the solution of differential equations that arise from problems in engineering and science. Topics include linear equations of first and higher order, systems of linear equations, Laplace transforms, series solutions of second-order equations, and an introduction to partial differential equations.

Prerequisite(s): (1 of ENGG*1500, MATH*1160, MATH*2150, MATH*2160), (1 of IPS*1510, MATH*1090, MATH*1210, MATH*2080)
Department(s): Department of Mathematics and Statistics

MATH*3100 Differential Equations II W (3-1) [0.50]

This course continues the study of differential equations. Power series solutions around regular singular points including Bessel equations are presented. First order linear systems and their general solution by matrix methods are thoroughly covered. Nonlinear systems are introduced along with the concepts of linearization, stability of equilibria, phase plane analysis, Lyapunov's method, periodic solutions and limit cycles. Two-point boundary value problems are discussed and an introduction to linear partial differential equations and their solution by separation of variables and Fourier series is given.

Prerequisite(s): MATH*2270, (1 of ENGG*1500, MATH*1160, MATH*2150, MATH*2160)
Department(s): Department of Mathematics and Statistics
MATH*3130 Abstract Algebra F (3-0) [0.50]
This course is an introduction to abstract algebra, covering both group theory and ring theory. Specific topics covered include an introduction to group theory, permutations, symmetric and dihedral groups, subgroups, normal subgroups and factor groups. Group theory continues through the fundamental homomorphism theorem. Ring theory material covered includes an introduction to ring theory, subrings, ideals, quotient rings, polynomial rings, and the fundamental ring homomorphism theorem.
Offering(s): Offered in even-numbered years.
Prerequisite(s): MATH*2000, (1 of MATH*1160, MATH*2150 , MATH*2160 )
Department(s): Department of Mathematics and Statistics

MATH*3160 Linear Algebra II W (3-0) [0.50]
The topics in this course include complex vector spaces, direct sum decompositions of vector spaces, the Cayley-Hamilton theorem, the spectral theorem for normal operators and the Jordan canonical form.
Prerequisite(s): (MATH*1160 or MATH*2160 ), 1.00 credits in MATH or STAT at the 2000 level or above
Department(s): Department of Mathematics and Statistics

MATH*3200 Real Analysis F (3-0) [0.50]
This course provides a basic foundation for real analysis. The rigorous treatment of the subject in terms of theory and examples gives students the flavour of mathematical reasoning and intuition for other advanced topics in mathematics. Topics covered include the real number line and the supremum property; metric spaces; continuity and uniform continuity; completeness and compactness; the Banach fixed-point theorem and its applications to ODEs; uniform convergence and the rigorous treatment of the Riemann integral.
Prerequisite(s): MATH*2000, MATH*2210, (MATH*1160 or MATH*2160 )
Department(s): Department of Mathematics and Statistics

MATH*3240 Operations Research F (3-0) [0.50]
This is a course in mathematical modelling which has applications to engineering, economics, business and logistics. Topics covered include linear programming and the simplex method, network models and the shortest path, maximum flow and minimal spanning tree problems as well as a selection of the following: non-linear programming, constrained optimization, deterministic and probabilistic dynamic programming, game theory and simulation.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): (1 of MATH*1160, MATH*2150 , MATH*2160 ), 0.50 credits in MATH or STAT at the 2000 level or above
Co-requisite(s): MATH*2200
Department(s): Department of Mathematics and Statistics

MATH*3260 Complex Analysis W (3-0) [0.50]
This course extends calculus to cover functions of a complex variable; it introduces complex variable techniques which are very useful for mathematics, the physical sciences and engineering. Topics include complex differentiation, planar mappings, analytic and harmonic functions, contour integration, Taylor and Laurent series, the residue calculus and its application to the computation of trigonometric and improper integrals, conformal mapping and the Dirichlet problem.
Prerequisite(s): MATH*2200
Department(s): Department of Mathematics and Statistics

MATH*3510 Biomathematics W (3-0) [0.50]
This course will convey the fundamentals of applying mathematical modelling techniques to understanding and predicting the dynamics of biological systems. Students will learn the development, analysis, and interpretation of biomathematical models based on discrete-time and continuous-time models. Applications may include examples from population biology, ecology, infectious diseases, microbiology, and genetics.
Prerequisite(s): MATH*2270, (1 of ENGG*1500, MATH*1160, MATH*2150 , MATH*2160 )
Department(s): Department of Mathematics and Statistics

MATH*4050 Topics in Mathematics I W (3-0) [0.50]
In this course students will discuss selected topics at an advanced level. It is intended mainly for mathematics students in the 6th to 8th semester. Content will vary from year to year. Sample topics include: probability theory, Fourier analysis, mathematical logic, operator algebras, number theory combinatorics, philosophy of mathematics, fractal geometry, chaos, stochastic differential equations.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): MATH*3200
Department(s): Department of Mathematics and Statistics

MATH*4060 Topics in Mathematics II W (3-0) [0.50]
In this course students will discuss selected topics at an advanced level as in MATH*4050, but with different choice of topic.
Offering(s): Offered in even-numbered years.
Prerequisite(s): MATH*3200
Department(s): Department of Mathematics and Statistics

MATH*4150 Topics in Mathematics III F,W (3-0) [0.50]
In this course students will discuss selected topics at an advanced level as in MATH*4050, but with different choice of topics.
Prerequisite(s): MATH*3200
Department(s): Department of Mathematics and Statistics

MATH*4200 Advanced Analysis W (3-0) [0.50]
This senior course in analysis will cover basic operator theory on Hilbert spaces, including self-adjoint operators and the spectral theorem. Other topics may include weak solutions, Sobolev spaces, inverse problems, measure theoretic probability or advanced topics from linear or nonlinear functional analysis.
Offering(s): Offered in even-numbered years.
Prerequisite(s): MATH*3200
Department(s): Department of Mathematics and Statistics

MATH*4240 Advanced Topics in Modeling and Optimization F (3-0) [0.50]
This course is a study of advanced topics in the areas of optimization and modeling. Topics may include continuous and discrete models together with techniques for their analysis and design, and optimization topics such as game theory, networks, nonlinear problems, Markov chains, queuing theory, agent-based models, computational intelligence based techniques and computational optimization techniques.
Prerequisite(s): 0.50 credits in Mathematics at the 3000 level.
Department(s): Department of Mathematics and Statistics

MATH*4270 Partial Differential Equations F (3-0) [0.50]
This course focuses on first and second-order partial differential equations, with examples and applications from selected fields such as physics, engineering and biology. Topics may include the wave equation, the heat equation, Laplace’s equation, linearity and separation of variables, solution by Fourier series, Bessel, Legendre and Green’s functions, an introduction to the method of characteristics and Fourier transforms. The classification of linear second-order partial differential equations is discussed.
Prerequisite(s): MATH*3100
Department(s): Department of Mathematics and Statistics

MATH*4310 Combinatorics and Graph Theory W (3-0) [0.50]
This course is an introduction to combinatorics with a focus that includes graph theory. Specific topics covered are enumerative combinatorics up to inclusion-exclusion, the theory of simple graphs, Latin squares and orthogonal Latin squares, and introductory coding theory. Instructors may continue to one or more of the Polya theory of counting, graph coloring and embedding, combinatorial design theory, Ramsey theory, or advanced topics in enumerative combinatorics.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 10.00 credits including MATH*2000
Department(s): Department of Mathematics and Statistics

MATH*4440 Case Studies in Mathematics and Statistics W (3-0) [0.50]
This capstone course for the Mathematical Science major provides students with an opportunity to synthesize knowledge and utilize problem-solving skills accumulated over the course of their studies. The course will focus on case studies drawn from engineering, computer science, biology, life and physical sciences, medicine, and/or economics.
Prerequisite(s): At least 3.0 mathematics and/or statistics credits at the 3000 level or above.
Restriction(s): Restricted to students in the Mathematical Science major.
Department(s): Department of Mathematics and Statistics

MATH*4600 Advanced Research Project in Mathematics F,W (0-6) [1.00]
Each student in this course will undertake an individual research project in some area of mathematics, under the supervision of a faculty member. A written report and a public presentation of the project will be required.
Prerequisite(s): 1.00 credits in Mathematics at the 3000 level or above.
Restriction(s): Approval of a supervisor and the course coordinator.
Department(s): Department of Mathematics and Statistics
Microbiology

School of Environmental Sciences
Department of Molecular and Cellular Biology
Department of Pathobiology

**MICR*2420 Introduction to Microbiology S,F,W (3-3) [0.50]**
This course will introduce students to the diversity of microorganisms, including bacteria, viruses, and fungi, and the impact of microbes on everyday life. The interactions of microorganisms with the biotic and abiotic worlds will be discussed. Topics will include the roles of microorganisms in host-pathogen interactions in disease, the beneficial aspects of microorganisms in bioremediation and food production, and their application in biotechnology.

Prerequisite(s): 4.00 credits including 1 of BIOL*1070, BIOL*1080, BIOL*1090, CHEM*1040
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Molecular and Cellular Biology

**MICR*2430 Methods in Microbial Culture and Physiology F,W (1.5-3) [0.50]**
This course uses a hands-on approach to investigate microbial growth and factors that impact growth and the interactions of microbes with biotic and abiotic environments. This course will explore the ecological diversity of microorganisms in selected environments. Students will develop a wide range of microbiology-related laboratory skills.

Prerequisite(s): MICR*2420
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Molecular and Cellular Biology

**MICR*3090 Mycology F (3-3) [0.50]**
This course provides an introduction to the fungal lifestyle and to classification and evolution of the major groups of fungi, including microfungi, yeasts and other eukaryotic microbes. The characteristics of fungal cell structure, genetics and metabolism will be presented, and fungal reproduction and sporulation processes discussed with reference to the life cycles of representative forms. The ecological and economic importance of fungi will be demonstrated by considering fungal ecology, symbiotic relationships, mycotoxins and pathogenic fungi and industrial applications of fungi and yeasts.

Prerequisite(s): BOT*2100 or MICR*2430
Department(s): Department of Molecular and Cellular Biology

**MICR*3220 Plant Microbiology F (3-3) [0.50]**
In this course the interaction between plants and microorganisms will be studied. Topics include molecular plant-microbe interactions, plant defenses, bacterial ice nucleation, interaction among plant microbes, root nodulation, mycorrhizae, wood decay, and decomposition of plant litter.

Prerequisite(s): BIOL*1070, BIOL*1090
Department(s): School of Environmental Sciences

**MICR*3230 Immunology F (3-3) [0.50]**
This course provides an introduction to the immune response of the vertebrate host, the cells and tissues of the lymphoid system, humoral and cell-mediated immunity, the concept of immunity to diseases and current techniques in immunology.

Prerequisite(s): BIOL*1090, BIOC*2580
Department(s): Department of Molecular and Cellular Biology, Department of Pathobiology

**MICR*3240 Microbial Physiology and Genetics F (3-3) [0.50]**
In this course students examine the genetic and physiological responses of microorganisms to their diverse and changing environments. Topics covered include gene regulation, bacterial quorum sensing and bacterial phage immunity.

Prerequisite(s): BIOC*3560, MBG*2040, MICR*2420
Restriction(s): MBG*3080 , MICR*3260
Department(s): Department of Molecular and Cellular Biology

**MICR*3280 Microbial Cell Biology F (3-3) [0.50]**
This course explores the structure-function relationships of macromolecular complexes and cellular ultrastructures involved in fundamental microbial processes. The structures of macromolecular machines will be considered from the perspective of the cellular requirements for survival in different environments and will be discussed in the context of their integration into building the basic elements of the microbial cell, as well as their exploitation as targets for antibiotics and other therapeutic approaches.

Prerequisite(s): BIOC*3560, MBG*2040, MICR*2420
Restriction(s): MBG*3080 , MICR*4520
Department(s): Department of Molecular and Cellular Biology

**MICR*3330 World of Viruses F (3-3) [0.50]**
Viruses infecting many organisms will be covered in the context of their global impact on disease and history, beneficial uses of viruses, and their role in advances of molecular theory. A fundamental virology background will be achieved by understanding the diversity of viruses, their replication strategies and their interactions with the host in disease. The relevance of viruses in society will be highlighted by discussion of historical accounts and contemporary news articles.

Prerequisite(s): MCB*2050
Department(s): Department of Molecular and Cellular Biology

**MICR*3420 Microbial Diversity and Ecology F (3-3) [0.50]**
The cycling of elements (carbon, nitrogen, sulphur) within ecosystems involves the contributions of diverse microorganisms. This course will study the diversity of predominantly Bacteria and Archaea in selected ecosystems at an organismal level, investigate the metabolic and enzymatic diversity in microbes that contribute to and thrive within these environments, and examine the methodologies used to study the relationships and evolution of microorganisms within an ecosystem.

Prerequisite(s): BIOC*3560, MBG*2040, MICR*2430
Department(s): Department of Molecular and Cellular Biology

**MICR*3430 Advanced Methods in Microbiology W (1-6) [0.75]**
This course will use a hands-on approach to investigate concepts and develop skills needed for the isolation, identification and classification of microorganisms. Classical, molecular, and bioinformatic techniques will be used to isolate and identify bacteria and viruses from natural environments.

Prerequisite(s): MICR*2430, (MBG*3080 or MICR*3240)
Co-requisite(s): MBG*3550
Department(s): Department of Molecular and Cellular Biology

**MICR*4010 Pathogenic Microbiology F (3-3) [0.50]**
This course focuses on the interactions between microbial pathogens and host animals, including immune and inflammatory responses of the host's defense mechanisms. The structural and physiological characteristics of a number of important microbes causing human and animal diseases are considered.

Prerequisite(s): MCB*2050, MICR*3230, (MBG*3080 or MICR*3240)
Department(s): Department of Molecular and Cellular Biology

**MICR*4330 Molecular Virology W (2-3) [0.50]**
This course will focus on molecular aspects of virus replication cycles and the diverse strategies used for replication of select RNA and DNA viruses. Virus-host interactions including tumour virology and host antiviral responses such as interferon and apoptosis will be discussed. Viral anti-host defence responses as well as recent advances in molecular virology and evolution will be also covered.

Prerequisite(s): MICR*3330, (MICR*2430 is recommended)
Department(s): Department of Molecular and Cellular Biology

**MICR*4430 Medical Virology W (3-0) [0.50]**
This course is designed to present an overview of the major viruses causing important diseases in humans. The course focuses on the molecular mechanisms of viral pathogenesis, determinants of viral virulence and the host response to infections. Diagnosis of viral infections, vaccines and controls of viral infections are also discussed. The first part of the course will cover the basic principles and concepts used in the study of viral diseases, modern diagnostic methods and recent advances in the application of molecular virology to the development of recombinant vaccines and other means to combat viral diseases. The second half of the course will include material on the individual diseases and causative viruses.

Prerequisite(s): MICR*3330
Department(s): Department of Pathobiology

**MICR*4530 Immunology II W (3-0) [0.50]**
This course will focus on advanced aspects of the structure and function of the vertebrate immune system in health and disease. Various topics including inflammation, hypersensitivity reactions, immune-mediated diseases such as allergy and autoimmunity, immune response to infection, vaccine development, experimental systems, immunoinformatics and antibody engineering will be discussed.

Prerequisite(s): MICR*3230
Department(s): Department of Molecular and Cellular Biology
### Molecular and Cellular Biology

#### MCB*2050 Molecular Biology of the Cell F,W (4-0) [0.50]
This course will develop an understanding of the key concepts of the molecular biology of the cell, integrating principles of cell structure and function with the underlying molecular mechanism(s). Discussions will focus on aspects of gene regulation, genomics, cell cycle control, protein synthesis, intracellular protein trafficking and protein degradation in eukaryotic cells. Many of these concepts will be discussed in the context of how defects in cellular processes give rise to disease.

**Prerequisite(s):** BIOC*2580, MBG*2040  
**Department(s):** Department of Molecular and Cellular Biology

#### MCB*3010 Dynamics of Cell Function and Signaling W (3-0) [0.50]
This course examines the dynamic properties of cells as they relate to cell-cell and cell-substrate interactions and elaborates on the fundamentals of intracellular signal transduction during these interactions. Topics will include the function and regulation of signalling modules, the cytoskeleton, and membrane component in the context of cellular interactions with other cells and with the extracellular matrix. These concepts will be integrated to develop a deeper understanding of dynamic cellular function within different tissue environments and physiological settings.

**Prerequisite(s):** BIOC*3560, MCB*2050  
**Department(s):** Department of Molecular and Cellular Biology

#### MCB*4010 Advanced Cell Biology W (3-0) [0.50]
This course examines the cellular and molecular biology of signal transduction. The major theme is an understanding of how eukaryotic cells receive, transmit and respond to environmental signals. Topics will include cellular regulation of cell cycle progression and cell death as well as the consequences of deregulated signal transduction in terms of disease, primarily cancer.

**Prerequisite(s):** MCB*3010  
**Department(s):** Department of Molecular and Cellular Biology

#### MCB*4500 Research Project in Molecular & Cellular Biology I S,F,W (0-12) [1.00]
This course involves independent research of a practical or theoretical nature on a specific topic in molecular and cellular biology. It is carried out under the supervision of an individual faculty member. Students should make arrangements with both a faculty advisor and the course coordinator at least one semester in advance of taking the course. The signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from, and submitted to, the course coordinator no later than the 2nd class day of the semester in which the student is registered for the course.

**Prerequisite(s):** MCB*4510. Grade requirements may be waived in exceptional circumstances at the discretion of faculty advisor and course coordinator. Course coordinator consent required.

**Department(s):** Department of Molecular and Cellular Biology

#### MCB*4510 Research Project in Molecular & Cellular Biology S,F,W (0-12) [1.00]
This course involves independent research of a practical or theoretical nature on a specific topic in molecular and cellular biology. It is carried out under the supervision of an individual faculty member. Students should make arrangements with both a faculty advisor and the course coordinator at least one semester in advance of taking the course. The signature of the course coordinator will be required to select the course. A departmental registration form must be obtained from, and submitted to, the course coordinator no later than the 2nd class day of the semester in which the student is registered for the course.

**Prerequisite(s):** MCB*4500 or equivalent laboratory experience at the discretion of the student's faculty advisor. Normally, students must have completed 6 semesters in an appropriate program in the biological sciences. Minimum 70% cumulative average in science courses during the first 6 semesters of the relevant majors. Students in programs offering project courses cannot enroll in MCB*4500. Coordinator consent required.

**Department(s):** Department of Molecular and Cellular Biology
MBG*1000 Genetics and Society W (3-1) [0.50]
This course covers the basic principles of genetics at work in human society. The roles of genes and inheritance in the biology of humans and the organisms with which we interact. Introduction to some of the social and ethical consequences of genetic knowledge and practice. This is a science course designed primarily for students in the Arts or Social and Applied Human Sciences.
Restriction(s): Students in the BAS, BSC and BSC(ENV) program cannot take this course for credit.
Department(s): Department of Molecular and Cellular Biology

MBG*2040 Foundations in Molecular Biology and Genetics F,W (4-0) [0.50]
This course will develop an understanding of the fundamental concepts in genetics, including patterns of inheritance, allelic variation, gene interaction, linkage, gene mapping and changes in chromosome structure and number. This will be followed by in-depth discussions on gene structure, replication, transcription, translation, recombination, mutation and DNA repair, and an introduction to gene regulation.
Prerequisite(s): 4.00 credits including BIOL*1090
Department(s): Department of Molecular and Cellular Biology

MBG*2400 Fundamentals of Plant and Animal Genetics F (3-2) [0.50]
Fundamental aspects of plant and animal genetics are covered in this course including the chromosomal basis of inheritance, natural and artificial selection, domestication, epigenetics and quantitative traits. Population dynamics and the effect of selection on allele frequencies will be introduced with examples from agricultural crop and animal species and companion animal species. Genomics will be introduced with an emphasis on the development and use of molecular genetic markers in marker assisted selection.
Prerequisite(s): (BIOL*1050 or BIOL*1070), BIOL*1090
Department(s): Department of Animal Biosciences

MBG*3040 Molecular Biology of the Gene F (3-0) [0.50]
In this course, the structure, expression, control and modification of eukaryotic genes will be discussed with an emphasis on the underlying mechanisms and structure/function relationships. Many topics covered in introductory courses are included but discussed at a more advanced level. Students will have the opportunity to learn current genetic concepts and principles through lectures, as well as the application of this knowledge in the real world through primary literature reading and group research projects.
Prerequisite(s): MB*2050
Restriction(s): MBG*4080
Department(s): Department of Molecular and Cellular Biology

MBG*3050 Human Genetics W (3-3) [0.50]
This course is designed to introduce the student to the study of biological inheritance in humans. The course includes discussion of the genetic basis of human individual differences, gene frequencies in human populations, human behavioral genetics, human cytogenetics, biochemical genetics and developmental genetics, medical genetics and other aspects of human heredity.
Prerequisite(s): MB*2050
Department(s): Department of Molecular and Cellular Biology

MBG*3060 Quantitative Genetics W (3-0) [0.50]
This course examines the nature of Mendelian inheritance when extended to quantitative traits that are jointly influenced by the environment and the simultaneous segregation of many genes. Prediction of response to natural and artificial selection in populations will also be studied.
Prerequisite(s): MBG*2400, 0.50 credits in statistics.
Department(s): Department of Animal Biosciences

MBG*3100 Plant Genetics W (3-2) [0.50]
This course examines reproduction in plants, genome organization, organelle and polyploid genetics, and analyses of mutations, genetic variation and linkage with classical and modern approaches.
Prerequisite(s): (MBG*2040 or MBG*2400), STAT*2040
Department(s): Department of Plant Agriculture

MBG*3350 Laboratory Methods in Molecular Biology S,F,W (1.5-8) [0.75]
This course involves laboratory based instruction in the basic methodologies of Molecular Biology. Students will have the opportunity to develop technical skills and practical knowledge sufficient to perform basic procedures independently, and to diagnose and analyze experimental results obtained with these techniques.
Prerequisite(s): BIOC*2580, MCB*2050
Restriction(s): Registration in the BSC, BIOC (major or minor), BIOC: C, BTOX, BTOX:C, BPG:C, MIRC (major or minor), MIRC:C, MBG (major or minor), PRTC, PLSC (major or minor), TOX, TOX:C
Department(s): Department of Molecular and Cellular Biology

MBG*3660 Genomics W (3-0) [0.50]
This course examines the genomes of eukaryotes and prokaryotes including how genomes are mapped and sequenced, the function of the genome and ethical issues arising from genomic information. How genomic data is used for understanding and treating human disease and for the study of evolution will also be discussed.
Prerequisite(s): MCB*2050
Department(s): Department of Molecular and Cellular Biology

MBG*4020 Genetics of Companion Animals F (3-0) [0.50]
This course explores theoretical and applied aspects of breeding programs for performance, pleasure and hobby animal populations to enhance genetic selection and population viability. Case studies are used to explore the theory and practice of designing practical and sustainable breeding programs that integrate molecular genetics, animal breeding and statistical genomics for a variety of single and multiple birth species.
Prerequisite(s): MBG*3060
Equate(s): ANSC*4020
Department(s): Department of Animal Biosciences

MBG*4030 Animal Breeding Methods and Applications W (3-2) [0.50]
Theoretical and scientific aspects of practical animal breeding programs which lead to genetic improvement of efficiency and profitability of animal production will be presented along with applications to livestock and poultry species. This course integrates quantitative genetics with concepts of statistics, economics, biology and biotechnology and expands into development of practical breeding plans.
Prerequisite(s): MBG*3060
Department(s): Department of Animal Biosciences

MBG*4040 Genetics and Molecular Biology of Development F (3-2) [0.50]
This course provides an examination of the genetic mechanisms that underlie organismal development. The molecular biology of cell determination and differentiation and the genetic control of morphogenesis and pattern formation will be emphasized.
Prerequisite(s): MBG*3040
Department(s): Department of Molecular and Cellular Biology

MBG*4110 Epigenetics (3-0) [0.50]
This course presents classical non-Mendelian phenomena, including analysis of chromosome breakage, transposition, imprinting and paramutation. Modern advances in gene regulation via epigenetic phenomena will be a central theme, focusing on chromatic remodeling, gene silencing and RNA interference as they pertain to organism development, with an emphasis on plants.
Prerequisite(s): MBG*3040
Department(s): Department of Molecular and Cellular Biology

MBG*4160 Plant Breeding F (3-2) [0.50]
This course examines the application of genetic principles to plant improvement. Topics include breeding objectives, mating systems, selection, testing and germplasm maintenance of horticultural and crop plants.
Prerequisite(s): (MBG*2040 or MBG*2400), STAT*2040
Department(s): Department of Plant Agriculture

MBG*4240 Applied Molecular Genetics in Medicine and Biotechnology W (3-0) [0.50]
This course will examine advanced techniques and methods used in molecular biology, medicine and biotechnology such as genome, transcriptome and proteome analysis, contemporary genetic screens, genetic engineering, transgenic organisms and gene therapy. The course will highlight the most recent developments and applications of such techniques.
Prerequisite(s): MBG*3040
Department(s): Department of Molecular and Cellular Biology
### MBG*4270 DNA Replication, Recombination and Repair W (3-0) [0.50]

This course will examine the DNA transactions that determine the structure and function of the genome, with an emphasis on natural and synthetic mutagens and their mode of action, replication and recombination of genetic material, recognition and repair of DNA damage, and inherited and somatic genetic diseases arising from abnormal DNA metabolism.

**Prerequisite(s):** MCB*2050  
**Department(s):** Department of Molecular and Cellular Biology

### MBG*4300 Plant Molecular Genetics F (3-0) [0.50]

This course studies the molecular genetics of plants. The topics include: plant genome diversity and synten; Arabidopsis thaliana genome, hormonal, environmental and developmental regulation of gene expression; chloroplast and mitochondrial genomes; and gene expression and silencing in transgenics. The course will be delivered using a lecture and paper discussion format. Students will learn and use a variety of computer techniques to search and analyze plant genome databases.

**Offering(s):** Offered in odd-numbered years.  
**Prerequisite(s):** MBG*2040 or MBG*2400  
**Department(s):** Department of Plant Agriculture
Music

School of Fine Art and Music

Ensembles

Chamber Ensembles

Choir (Symphonic Choir, Chamber Choir, Siren-Women's Choir)

Concert Winds

Contemporary Music Ensemble

Early Music Ensemble

Jazz Band

Note: All ensembles are not necessarily offered every semester.

Solo Performance (Applied Music): Private instruction is offered in piano, voice, orchestral instruments, and various jazz and early instruments. In order to register in Applied Music (MUSC*1500), students must arrange an audition with the School of Fine Art and Music at the time of course selection. Applied Music is restricted to students registered in a Music program (general, area of concentration; honours, major or minor), in Semesters 1-4 (with the exception of Honours Majors in Music, who may audit to register in MUSC*1500 at any time in their studies).

Applied Music courses are designed to be taken in successive semesters. Registration in this sequence following an interruption of more than one semester requires permission of the Director of the School. Students may be required to re-apply before registering to continue in Applied Music. Students must achieve a minimum grade of 70% in Applied Music courses in order to proceed to the next level.

MUSC*1060 Amadeus to Zeppelin: Music and Culture F (3-0) [0.50]

This course explores the place classical music holds in contemporary society, drawing upon texts from popular and cyber culture. Focusing on examples that engage with Western art music from 1100 – 1791 C.E., this course teaches students the skills necessary for media and information literacy while also developing music-historical knowledge and providing foundational training in university-level writing about music. No prior musical training is necessary.

Offering(s): Also offered through Distance Education format.

Restriction(s): MUSC*2280

Department(s): School of Fine Art and Music

MUSC*1090 Physics of Music F (3-0) [0.50]

This course is designed for arts and social science students with an interest or background in music. The fundamentals of vibrations and waves will be introduced and applied to a study of archetypal instruments. The psychoacoustic basis of pitch and loudness will be discussed.

Offering(s): Offered in even-numbered years.

Equate(s): PHYS*1810

Restriction(s): Students who have standing in any 1000 level physics course, except PHYS*1300 or PHYS*1600, may enrol in this course only if they are completing an honours or general B.A. program in Music. In this case, permission of the instructor is required.

Department(s): School of Fine Art and Music

MUSC*1130 Introduction to Musicianship F,W (0-8) [0.50]

Fundamentals of ear training, sight-singing, keyboard, and written skills (rudiments such as scales, intervals and basic chord identification) are introduced. Proficiency on an instrument is not required, but previous experience with note-reading is expected. MUSC*1130 cannot be counted toward a specialization in music.

Offering(s): Offered through Distance Education format only.

Restriction(s): MUSC*1180

Department(s): School of Fine Art and Music

MUSC*1180 Musicianship I F,W (3-0) [0.50]

This course explores the inner workings of music--its harmonic, melodic, and rhythmic building blocks. Through intense exercises that hone skills in ear training, dictation, keyboard, improvisation, and harmonization, students gain a deep understanding of how music works, and acquire practical musical skills that contribute to future work in composition, music theory, ethnomusicology, pedagogy, and performance. A solid base in rudiments is required for this course, and will be assessed upon registration.

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): School of Fine Art and Music

MUSC*1500 Applied Music I F,W (1-6) [0.50]

This course provides individual instruction in the technical and stylistic aspects of artistic solo instruments or vocal performance. In order to register for this course, students must arrange an audition with the School of Fine Art and Music at the time of course selection.

Restriction(s): Successful completion of an audition. Registration in semesters 1 to 4 (with the exception of BA Honours Music Majors, who may apply at any time). Registration in a Music Specialization.

Department(s): School of Fine Art and Music

MUSC*1510 Applied Music II S,F,W (1-6) [0.50]

This course is a continuation of MUSC*1500.

Prerequisite(s): A minimum grade of 70% in MUSC*1500.

Restriction(s): Registration in a Music Specialization.

Department(s): School of Fine Art and Music

MUSC*2010 The Musical Avant-Garde F (3-0) [0.50]

This course offers an introduction to the avant-garde musical life of the 20th century and beyond including the works of Debussy, Stravinsky, Satie, Schoenberg, Cage, Cowell, and others.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2030 Music in Canada F (3-0) [0.50]

The background and development of musical life in Canada. Cultivation of understanding of Canadian music using recorded examples with emphasis on 20th-century compositions.

Offering(s): Offered in even-numbered years.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2100 Creating Music on the Computer F,W (3-0) [0.50]

An introduction to computer technologies as they apply to the creation and manipulation of music. Topics will be drawn from the areas of sound synthesis and processing, recording, encoding, and transcription. The course will include a classroom and an applied component.

Prerequisite(s): 2.00 credits

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods.

Department(s): School of Fine Art and Music

MUSC*2140 History of Jazz F,W (3-0) [0.50]

A survey of the major styles, personalities, and performances of the jazz tradition in terms of its social and cultural contexts through the examination of jazz texts and commentary, autobiographies of musicians, and recorded examples of important performances.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2150 Music and Popular Culture F,W (3-0) [0.50]

A survey of the major genres, styles, personalities and performance of popular music primarily in the 20th-century through lectures, listening, discussion and reading. Issues such as the relationships between popular music and race, class, technology, and art will be examined. Technical knowledge of music is not required.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2180 Musicianship II F,W (3-0) [0.50]

A continuation of MUSC*1180.

Prerequisite(s): MUSC*1180

Department(s): School of Fine Art and Music

MUSC*2220 Electronic Music in the Digital Age W (3-0) [0.50]

This course will provide an introduction to digital music, from the initial "cybernetic" experiments of the 1950s to the evolution of software tools for synthesizing, processing, and analyzing sound to the development of music/audio-related hardware such as digital synthesizers, samplers, recorders, mixers, and workstations. An overview of musical genres utilizing digital technology will be presented (experimental, techno, dance, rap, ambient, etc.). Digital technology, including the revolutionary MIDI protocol, will be set into historical context, looking at musical and social developments and milestones, as well as related non-digital technology such as analog synthesizers and multi-track recorders.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music

MUSC*2270 World Music W (3-0) [0.50]

This course offers an ethnomusicological introduction to the musical life of Sub-Saharan Africa, India, South America, the Middle East, Indonesia, and the Far East.

Prerequisite(s): 2.00 credits

Department(s): School of Fine Art and Music
XII. Course Descriptions, Music

MUSC*2330 Beethoven to Broadway: Music and Culture II W (3-0) [0.50]
This course explores the connections between contemporary culture and the history of Western Art Music. Focusing on material from 1750 to 1890, this course considers how cyber and popular culture engage with and often distort the historical origins of "classical" music. Students will further develop media and research literacy skills and will continue to hone their command of writers' craft. The ability to read music is required for this course.

Prerequisite(s): MUSC*1060
Restriction(s): MUSC*2600, MUSC*2610, MUSC*2620
Department(s): School of Fine Art and Music

MUSC*2380 Classical Music from Concert Hall to Cinema S (3-0) [0.50]
This is a music appreciation course intended for non-music majors. This course explores the sonic codes of western art music ("Classical" music) as they developed in their original contexts, as well as their use and meaning in today's film soundtracks. The works chosen for study are those likely to be encountered in modern concert and opera halls and are selected primarily from the Baroque, Classical, and Romantic eras.

Offering(s): Offered through Distance Education format only.
Prerequisite(s): 2.00 credits
Restriction(s): MUSC*1060. Not available to students registered in a Music specialization.
Department(s): School of Fine Art and Music

MUSC*2410 Applied Composition and Improvisation I F (3-0) [0.50]
This course offers class instruction in the technical and aesthetic aspects of music composition and improvisation.

Prerequisite(s): MUSC*2180
Restriction(s): Registration in a Music Program (Honours major or minor, General).
Department(s): School of Fine Art and Music

MUSC*2420 Applied Composition and Improvisation II W (3-0) [0.50]
This course is a continuation of MUSC*2410.

Prerequisite(s): A minimum grade of 70% in MUSC*2410.
Restriction(s): Registration in a Music Program (Honours major or minor, General).
Department(s): School of Fine Art and Music

MUSC*2500 Applied Music III S,F,W (1-6) [0.50]
A continuation of MUSC*1510.

Prerequisite(s): (MUSC*1180 or MUSC*2180), a minimum grade of 70% in MUSC*1510. (MUSC*1180 or MUSC*2180 may be taken as co-requisite)
Restriction(s): Registration in a Music specialization.
Department(s): School of Fine Art and Music

MUSC*2510 Applied Music IV S,F,W (1-6) [0.50]
A continuation of MUSC*2500.

Prerequisite(s): A minimum grade of 70% in MUSC*2500
Restriction(s): Registration in a Music specialization.
Department(s): School of Fine Art and Music

MUSC*2530 Instrumental Ensembles I F,W (0-2) [0.25]
The study and performance of selected instrumental music through participation in one of the School's ensembles: Chamber Ensemble, Concert Winds, Contemporary Music Ensemble, Jazz Ensemble. In order to register for an ensemble, the student must arrange for an audition with the School of Fine Art and Music. Auditions will be held prior to the first day of classes each Fall and Winter semester. Students must check with the School of Fine Art and Music office for audition dates. Students are encouraged to audition for an ensemble in the Fall semester and to participate in it for both Fall and Winter semesters. Not all ensembles will be able to accept new members in Winter. Consult the School of Fine Art and Music office for further information.

Restriction(s): Instructor consent required. Successful completion of an audition.
Department(s): School of Fine Art and Music

MUSC*2540 Instrumental Ensembles II F,W (0-2) [0.25]
A continuation of MUSC*2530.

Prerequisite(s): MUSC*2530
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*2550 Choral Ensembles I F,W (0-2) [0.25]
The study and performance of selected choral literature through participation in one of the School's ensembles: the University of Guelph Symphonic Choir, the Gryphon Singers. In order to register for an ensemble, the student must arrange for an audition with the School of Fine Art and Music. Auditions will be held prior to the first day of classes each Fall and Winter semester. Students must check with the School of Fine Art and Music office for audition dates. Students are encouraged to audition for an ensemble in the Fall semester and to participate in it for both Fall and Winter semesters. Not all ensembles will be able to accept new members in Winter. Consult the School of Fine Art and Music for further information.

Equate(s): MUSC*2520
Restriction(s): Instructor consent required. Successful completion of an audition.
Department(s): School of Fine Art and Music

MUSC*2560 Choral Ensembles II F,W (0-2) [0.25]
A continuation of MUSC*2550.

Prerequisite(s): MUSC*2550
Equate(s): MUSC*2520
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*2570 Keyboard Accompaniment I F,W (0-2) [0.25]
Development of sight-reading and accompaniment skills for pianists in close coordination with vocal and instrumental applied music students.

Prerequisite(s): MUSC*2510 on piano.
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*2580 Keyboard Accompaniment II F,W (0-2) [0.25]
A continuation of MUSC*2570.

Prerequisite(s): MUSC*2570
Department(s): School of Fine Art and Music

MUSC*2660 Materials of Music I F (3-0) [0.50]
This course is a study of music theory and analysis. It builds on rudiments and musicianship skills developed in MUSC*1180 and introduces students to materials of music including melodic construction, phrase structure, linear counterpoint, rhythmic organization, and diatonic harmony. Students will work on both applied and analytical assignments.

Prerequisite(s): MUSC*1180
Co-requisite(s): MUSC*2180
Restriction(s): MUSC*1250, MUSC*2360
Department(s): School of Fine Art and Music

MUSC*3010 Materials of Music II W (3-0) [0.50]
This course continues the study of music theory and analysis. Students move on to learn about and work with more advanced concepts of tonal harmony and music analysis. The second half of the course introduces students to post-tonal music (20th-century). Students will work on both applied and analytical assignments.

Prerequisite(s): MUSC*2180, MUSC*2660
Restriction(s): MUSC*2360, MUSC*2370, MUSC*2670
Department(s): School of Fine Art and Music

MUSC*3150 Music in London F (3-0) [0.50]
A lecture/seminar course that will examine in depth choral and instrumental music of major composers from representative periods and media, performed at London, England. Compositions will be analyzed in relation to their stylistic technique, formal structure, and historical place in the repertoire of music. A professor of music will present weekly seminars, arrange assignments, and give personal supervision in London.

Restriction(s): Admission to the London Semester.
Department(s): School of Fine Art and Music

MUSC*3210 Instrumental Ensembles III F,W (0-2) [0.25]
This course is a continuation of MUSC*2540.

Prerequisite(s): MUSC*2540
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music

MUSC*3220 Instrumental Ensembles IV F,W (0-2) [0.25]
This course is a continuation of MUSC*3210.

Prerequisite(s): MUSC*3210
Restriction(s): Instructor consent required.
Department(s): School of Fine Art and Music
### MUSC*3230 Choral Ensembles III F,W (0-2) [0.25]
This course is a continuation of MUSC*2560.

**Prerequisite(s):** MUSC*2560  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Fine Art and Music

### MUSC*3240 Choral Ensembles IV F,W (0-2) [0.25]
This course is a continuation of MUSC*3230.

**Prerequisite(s):** MUSC*3230  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Fine Art and Music

### MUSC*3410 Applied Composition and Improvisation III F,W (1-6) [0.50]
This course is a continuation of MUSC*2420.

**Prerequisite(s):** A minimum grade of 70% in MUSC*2420 and (2 of MUSC*2530, MUSC*2540, MUSC*2550, MUSC*2560).  
**Restriction(s):** Registration in a Music Program (Honours major or minor, General).  
**Department(s):** School of Fine Art and Music

### MUSC*3420 Applied Composition and Improvisation IV F,W (1-6) [0.50]
This course is a continuation of MUSC*3410.

**Prerequisite(s):** A minimum grade of 70% in MUSC*3410.  
**Restriction(s):** Registration in a Music Program (Honours major or minor, General).  
**Department(s):** School of Fine Art and Music

### MUSC*3500 Applied Music V S,F,W (1-6) [0.50]
A continuation of MUSC*2510.

**Prerequisite(s):** 3.00 credits in music courses including a minimum grade of 70% in MUSC*2510  
**Restriction(s):** Registration in a Music Program (Honours major or minor, General).  
**Department(s):** School of Fine Art and Music

### MUSC*3510 Applied Music VI S,F,W (1-6) [0.50]
A continuation of MUSC*3500 including preparation and performance of a juried recital, restricted to students in a Music program (honours major or minor or general, area of concentration).

**Prerequisite(s):** 4.00 credits in music courses including a minimum grade of 70% in MUSC*3500  
**Restriction(s):** Registration in a Music Program (Honours major or minor, General, Area of Concentration).  
**Department(s):** School of Fine Art and Music

### MUSC*3350 Collaborative Performance Project I F,W (0-3) [0.25]
The study and performance of selected instrumental or vocal chamber music through participation in a small ensemble under the guidance of a supervising instructor. Students will organize the ensemble, which normally consists of two to six vocalists and/or instrumentalists, design a project with the instructor, and submit the proposal to the Music Faculty Committee for approval by the last day of course selection in Fall (for Winter) or Winter (for the following Fall). A form is available from the School office for this purpose.

**Prerequisite(s):** MUSC*2500, (2 of MUSC*2530, MUSC*2540, MUSC*2550, MUSC*2560)  
**Restriction(s):** Registration in a Music Program (Honours major or minor, General, Area of Concentration). Instructor consent required.  
**Department(s):** School of Fine Art and Music

### MUSC*3560 Collaborative Performance Project II F,W (0-3) [0.25]
A continuation of MUSC*3350.

**Prerequisite(s):** MUSC*3350  
**Restriction(s):** Instructor consent required.  
**Department(s):** School of Fine Art and Music

### MUSC*3630 Tragedy, Technology, and Torture: Music Post 1900 F (3-0) [0.50]
This course examines music from the late 19th century (Debussy and post-romantic composers) to the present from both historical and theoretical perspectives.

**Prerequisite(s):** MUSC*2660, (MUSC*2330 or MUSC*2620)  
**Co-requisite(s):** MUSC*3010  
**Department(s):** School of Fine Art and Music

The following topics courses normally focus on current areas of faculty research. It is expected that students will have completed at least 7.50 credits before taking these upper-level courses.
**MUSC*4450 Honours Seminar in Music W (3-0) [1.00]**

The Honours Seminar in Music teaches advanced research methods common to a range of musical investigations: musicology (including ethnomusicology, popular music and jazz), music theory, music pedagogy, and musical creation. In addition, the Honours Seminar in Music allows students to engage in individual research with concentrated energy through a one semester/one credit course in a supportive peer environment. Students will develop a research project proposal for approval by the instructor in the semester prior to enrolling in this course.

**Prerequisite(s):** Completion of the music core.

**Restriction(s):** Instructor consent required.

**Department(s):** School of Fine Art and Music

---

**MUSC*4460 Honours Music Recital Preparation S,F,W (1-6) [0.50]**

First part of a two-semester performance project culminating in a music recital at the end of the second semester. Students will present a preparatory performance at the end of the first semester. Qualified instrumentalists, vocalists, and composers who have completed the applied music or applied composition course sequences are eligible to present a full-length recital. In the case of composers it is the responsibility of the student to organize performers to present the music. Recital proposals must be submitted in advance for approval to the Music Faculty Committee. MUSC*4460 and MUSC*4470 are normally taken over consecutive semesters.

**Prerequisite(s):** Completion of the music core, a minimum grade of 70% in MUSC*3510

**Equate(s):** MUSC*4401

**Restriction(s):** Permission of the School and registration in an honours major in music.

**Department(s):** School of Fine Art and Music

---

**MUSC*4470 Honours Music Recital S,F,W (1-6) [0.50]**

Second part of a two-semester performance project culminating in a music recital at the end of the second semester. MUSC*4460 and MUSC*4470 are normally taken over consecutive semesters.

**Prerequisite(s):** A minimum grade of 70% in MUSC*4460

**Equate(s):** MUSC*4402

**Restriction(s):** Registration in an honours major in music.

**Department(s):** School of Fine Art and Music
### Nanoscience

#### NANO*1000 Introduction to Nanoscience F (3-0) [0.50]

This course introduces students to the emerging field of nanoscience. Its representation in popular culture and journalism will be contrasted with the present and near future realities in the field. Current industrial and business applications will be discussed. Guest lectures will be given by faculty performing research in the field. The course also aims to help students in their transition to the academic life by emphasizing skills and values such as academic integrity and problem solving and by actively connecting their first-year science core courses to the field of nanoscience.

**Prerequisite(s):** 4U Chemistry or 4U Physics  
**Restriction(s):** Registration in Nanoscience Major.  
**Department(s):** Department of Chemistry

#### NANO*2000 Synthesis and Characterization of Nanomaterials I F (3-3) [0.50]

This course explores the structural, mechanical, and electronic properties of matter. Methods to fabricate nanostructured materials such as nanoparticles, nanocomposites, thin films, polymers, and ferrofluids will be discussed. Techniques that have been developed to analyze these materials are also discussed, including scattering, microscopy and spectroscopy.

**Prerequisite(s):** CHEM*1050, [IPS*1510 or ( MATH*1210, PHYS*1010)]  
**Restriction(s):** Registration in Nanoscience Major.  
**Department(s):** Department of Chemistry

#### NANO*3200 Nanolithographic Techniques F (3-3) [0.50]

Lithographic techniques applied at the micrometer and nanometer scale are key to the production of devices for the electronic and related industries. Projection and proximity techniques (XUV, electron, and ion beams) and writing processes (electron beam, ion beam, and scanned probe) will be explored. Emphasis will also be placed on soft lithographic techniques such as stamping and dip-pen nanolithography.

**Prerequisite(s):** NANO*2000  
**Department(s):** Department of Physics

#### NANO*3300 Spectroscopy of Nanomaterials W (3-3) [0.50]

The interaction of nanostructured matter with light gives rise to some of its most important observable properties. The absorption and fluorescence properties of nanomaterials will be studied. Particular attention will be paid to experiments which require nanoscale path lengths, such as IR spectroscopy of monomolecular thin films. Local spectroscopic probes with nanoscale resolution such as Near-field Scanning Optical Microscopy (NSOM) and Scanning Probe Spectroscopy (SPS) will be explored.

**Prerequisite(s):** NANO*2100, (CHEM*3860 or PHYS*3230)  
**Department(s):** Department of Chemistry

#### NANO*3500 Thin Film Science F (3-3) [0.50]

The deposition and growth of thin layers of materials is an important process on the production of many devices. This course will study the various methods by which thin films are grown including physical and chemical vapour deposition, molecular beam epitaxy, atomic layer epitaxy, and self-assembled monolayers. Experimental techniques for analyzing the properties of thin films will also be discussed.

**Prerequisite(s):** NANO*2100  
**Department(s):** Department of Chemistry

#### NANO*3600 Computational Methods in Materials Science W (3-3) [0.50]

Many computational techniques have been brought to bear on the study of nanostructured matter. This course will present several of these techniques and will introduce a number of computational packages that can be used to study matter. Monte Carlo and ab initio methods along with molecular dynamics simulations will be studied, with an emphasis upon the implementation of the software packages and the appropriate interpretation of the results.

**Prerequisite(s):** (MATH*1160 or MATH*2160 ), ( MATH*2170 or MATH*2270), (CHEM*3860 or PHYS*3230)  
**Department(s):** Department of Physics

#### NANO*4100 Biological Nanomaterials F (3-0) [0.50]

Biological systems provide a rich range of examples of specialized chemical systems that are structured on the nanoscale. Nanofibres, microtubules, viruses, and ribosomes are examples of systems that can be studied from the perspective of nanoscience. Using these systems or developing artificial systems which mimic their functionality are important growth areas in nanoscience and will be explored in this course.

**Prerequisite(s):** MATH*2270, (CHEM*2820 or PHYS*2240)  
**Department(s):** Department of Physics

#### NANO*4200 Topics in Nanomaterials W (3-0) [0.50]

This course will introduce students to special topics in nanostructured materials. The course will illustrate how to design, create, characterize and utilize new materials in which the presence of a nanoscale structural elements results in new properties of fundamental and technological importance.

**Prerequisite(s):** NANO*3300, NANO*3500, (CHEM*3860 or PHYS*3230)  
**Department(s):** Department of Chemistry

#### NANO*4700 Concepts in Quantum Computing F (3-0) [0.50]

This course introduces concepts in quantum computation and quantum information. Following an introduction to the basics of linear algebra, quantum mechanics, and computer science, presented from the viewpoint of quantum information theory, topics covered will include quantum computation, quantum algorithms, quantum error correction, quantum cryptography and quantum communication.

**Prerequisite(s):** MATH*1160, (CHEM*3860 or PHYS*3230)  
**Department(s):** Department of Chemistry

#### NANO*4900 Advanced Studies in Nanoscience W (1-5) [0.50]

This course will guide students through the primary literature of the field with readings from recent achievements. Students will select individual topics on which they will prepare seminars and written reports.

**Prerequisite(s):** 1.50 credits in NANO courses at the 3000 level.  
**Restriction(s):** PHYS*4300  
**Department(s):** Department of Physics

#### NANO*4910 Nanoscience Research Project I S,F,W (0-12) [1.00]

Students will work with faculty in their laboratories on research topics of current interest. A final written paper and oral presentation of the work will be given by the students.

**Prerequisite(s):** 1.50 credits in NANO courses at the 3000 level.  
**Restriction(s):** Instructor consent required.  
**Department(s):** Department of Chemistry

#### NANO*4920 Nanoscience Research Project II S,F,W (0-12) [1.00]

Students will work with faculty in their laboratories on research topics of current interest. A final written paper and oral presentation of the work will be given by the students.

**Prerequisite(s):** NANO*4910  
**Restriction(s):** Instructor consent required.  
**Department(s):** Department of Chemistry
Neuroscience

**NEUR*2000 Introduction to Neuroscience F (3-0) [0.50]**

This course offers an introduction to the mammalian nervous system, with emphasis on the structure and function of the human brain. General principles of the function and organization of nervous systems will be discussed, providing both an overview of the subject and a foundation for advanced courses. Topics will include the physical and chemical bases for action potentials, synaptic transmission, and sensory transduction; anatomy; development; sensory and motor pathways; and the neuroscience of brain diseases.

*Prerequisite(s):* BIOL*1090, PSYC*1000

*Restriction(s):* PSYC*2410. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods.

*Department(s):* Department of Psychology

**NEUR*3100 Molecular Mechanisms of Neurological Disorders F (3-0) [0.50]**

This course will follow the life of nervous system cells from birth, through their functional life, and ending in ageing and degenerative disease. Focus will be on the molecular and cellular events that govern these processes and the diseases and pathologies, such as Parkinson’s and Alzheimer’s, that arise as a consequence of their dysfunction. Finally, students will be introduced to the new and rapidly advancing field of adult neural stem cells and the promises and potential problems of their use in treating many of the diseases that will have been discussed throughout.

*Prerequisite(s):* MCB*2050, (NEUR*2000 or PSYC*2410),

*Restriction(s):* This is a Priority Access Course. Enrolment may be restricted to particular programs (BSCH.NEUR, NEUR minor) or semester levels during certain periods.

*Department(s):* Department of Molecular and Cellular Biology

**NEUR*3500 Techniques in Neuroscience W (2-3) [1.00]**

This course provides an introduction to selected techniques used in Neuroscience. Students will investigate and learn key methods in neurophysiology and biomechanics, neuroanatomy, cognitive neuroscience, and molecular and cellular neurobiology, used to address contemporary problems in this multidisciplinary field. These techniques will be introduced through literature review, hands-on laboratory exercises and demonstrations. A diversity of vertebrate and invertebrate model organisms will be considered as well as the ethical considerations that accompany the use of animals or human subjects in research.

*Prerequisite(s):* MCB*2050, PSYC*3270, (NEUR*2000 or PSYC*2410), (1 of BIOM*3200, HK*2810, ZOO*3600)

*Restriction(s):* This is a Priority Access Course. Enrolment may be restricted to particular programs (BSCH.NEUR) or semester levels during certain periods.

*Department(s):* Department of Molecular and Cellular Biology, Department of Biomedical Sciences, Department of Psychology, Department of Human Health and Nutritional Sciences

**NEUR*4000 Current Issues in Neuroscience F (3-0) [0.50]**

This course will consist of guest lectures offered by faculty who are working in the field and will complement the seminars given by the students on topics that they have prepared in studying the primary literature. Students will also prepare a major paper on a neuroscience topic.

*Prerequisite(s):* 14.00 credits

*Restriction(s):* Enrolment restricted to BSC.NEUR major and minor.

*Department(s):* Department of Biomedical Sciences

**NEUR*4100 Neuropharmacology F (4-0) [0.50]**

This course will explore pharmacological manipulation of the nervous system. Content will focus on the physiology of major neurotransmitter systems in the brain, followed by current pharmacological interventions for selected brain disorders, and the use and abuse of common pharmacological agents.

*Prerequisite(s):* BIOM*3090, (NEUR*2000 or PSYC*2410)

*Restriction(s):* This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods: (e.g. BSC.NEUR major, minor, and BSC.BIOM)

*Department(s):* Department of Biomedical Sciences

**NEUR*4401 Research in Neurosciences S,F,W (0-12) [1.00]**

This is the first part of the two-semester course NEUR*4401/2. In this course, students will conduct independent research of a current topic in any of the biomedical neurosciences: (such as anatomy, physiology, pharmacology, toxicology, molecular biology, biochemistry). Students work under the supervision of individual faculty. Faculty consent must be obtained prior to being admitted into the course by the course coordinator. This is a two-semester course offered over consecutive semesters. When you register for this course you must select NEUR*4401 in the first semester and NEUR*4402 in the second semester. A grade will not be assigned in NEUR*4401 until NEUR*4402 has been completed.

*Prerequisite(s):* 14.00 credits

*Restriction(s):* BIOM*4510, BIOM*4521, BIOM*4522, NEUR*4450. Instructor consent required. Enrolment restricted to BSC.NEUR major and minor.

*Department(s):* Department of Biomedical Sciences

**NEUR*4402 Research in Neurosciences S,F,W (0-6) [0.50]**

This is the second part of the two-semester course NEUR*4401/2. In this course, students will conduct independent research of a current topic in any of the biomedical neurosciences: (such as anatomy, physiology, pharmacology, toxicology, molecular biology, biochemistry). Students work under the supervision of individual faculty. Faculty consent must be obtained prior to being admitted into the course by the course coordinator. This is a two-semester course offered over consecutive semesters. When you register for this course you must select NEUR*4401 in the first semester and NEUR*4402 in the second semester. A grade will not be assigned in NEUR*4401 until NEUR*4402 has been completed.

*Prerequisite(s):* NEUR*4401

*Restriction(s):* BIOM*4510, BIOM*4521, BIOM*4522, NEUR*4450. Enrolment restricted to BSC.NEUR major and minor.

*Department(s):* Department of Biomedical Sciences

**NEUR*4450 Research in Neurosciences S,F,W (0-12) [1.00]**

In this course, students will conduct independent laboratory research on a current topic in any of the biomedical neurosciences: (such as anatomy, physiology, pharmacology, toxicology, molecular biology, biochemistry). Students work under the supervision of individual faculty. Faculty consent must be obtained prior to being admitted into the course by the course coordinator.

*Prerequisite(s):* 14.00 credits

*Restriction(s):* BIOM*4510, BIOM*4521, BIOM*4522, NEUR*4401. NEUR*4402. Instructor consent required. Enrolment restricted to BSC.NEUR major and minor.

*Department(s):* Department of Biomedical Sciences
## Nutrition

**Department of Animal Biosciences**

**Department of Family Relations and Applied Nutrition**

**Department of Human Health and Nutritional Sciences**

### NUTR*1010 Introduction to Nutrition F,W (3-0) [0.50]

This course is an introduction to human nutrition, with major emphasis on nutrients and their dietary sources, functions, and relationships to health. Topics will include the energy-containing nutrients, selected vitamins and minerals and weight management. We will also explore current popular topics and emerging diet-disease relationships.

Offering(s): Also offered through Distance Education format.

Restriction(s): This is a Priority Access Course. For B.A.Sc. and FCS minor and some restrictions may apply during some time periods.

Department(s): Department of Family Relations and Applied Nutrition

### NUTR*1020 Professional Practice in Applied Nutrition W (3-0) [0.50]

Through lectures, readings, group activities, and case studies students will explore the key knowledge and skills needed for a successful professional career in applied nutrition in Canada. Critical thinking, regulatory and ethical issues as applied in business, health care, public health and social services contexts are emphasized.

Restriction(s): Restricted to students in B.A.Sc.AHN major.

Department(s): Department of Family Relations and Applied Nutrition

### NUTR*2050 Nutrition Through the Life Cycle F (3-0) [0.50]

This course explores how individual, family, community and societal factors influence nutritional needs and dietary intake from infancy through older adulthood. Implications for nutrition care and community-level programs are discussed.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): NUTR*1010

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please see the departmental website for more information.

Department(s): Department of Family Relations and Applied Nutrition

### NUTR*2150 Introduction to Nutritional and Food Sciences F (3-0) [0.50]

This interdisciplinary course provides an introduction to the Food and Nutritional Sciences from both historical and modern perspectives. Major themes are the nutritional and functional properties of food, nutrient assimilation, food preservation and safety, and the interactions between food processing, diets and health. (Also listed as FOOD*2150.)

Prerequisite(s): (BIOL*1040 or BIOL*1080), CHEM*1040

Equival(f): FOOD*2150

Restriction(s): FOOD*2010, FOOD*3090. Not available to students registered in B.A.Sc. AHN major.

Department(s): Department of Food Science

### NUTR*3070 Nutrition and Physical Activity Interventions W (3-0) [0.50]

This course examines the development, implementation, and evaluation of: a) integrated interventions to improve both nutrition and physical activity behaviours; and, b) interventions to improve physical activity behaviours of people of different ages in various settings. Various theories and models used to develop nutrition and physical activity interventions will be examined.

Prerequisite(s): FRHD*3070, NUTR*2050

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. See departmental website for more information.

Department(s): Department of Family Relations and Applied Nutrition

### NUTR*3090 Clinical Nutrition I W (3-3) [1.00]

The epidemiology, pathophysiology, and role of nutrition will be considered in the prevention and management of several major chronic conditions including cardiovascular diseases, disorders of energy balance and diabetes mellitus. There is an emphasis on developing the skills for high risk individual management approaches.

Prerequisite(s): (BIOM*2000 or BIOM*3200), FRHD*3070, NUTR*2050, ( NUTR*3190 or NUTR*3210), STAT*2090

Co-requisite(s): FRHD*3400

Restriction(s): NUTR*3040. Registration is limited to students registered in the B.A.Sc. AHN major.

Department(s): Department of Family Relations and Applied Nutrition

### NUTR*3110 Food Security W (3-0) [0.50]

This is the foundation course for the study of nutrition. The occurrence, uptake and metabolic role of nutrients will be discussed in relation to growth, reproduction and longevity in human subjects, domestic animals and other species.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): NUTR*2070

Department(s): Department of Family Relations and Applied Nutrition

### NUTR*3150 Aging and Nutrition W (3-0) [0.50]

This course provides an in-depth study of the determinants of food intake and nutrient recommendations for aging adults. Specific consideration will be given to eating environments and physiological changes that influence access, preparation, and consumption of food by older adults living in the community and in facilities. An emphasis will be placed on chronic disease prevention and management.

Prerequisite(s): 1 of NUTR*1010, NUTR*2150, NUTR*3210

Department(s): Department of Family Relations and Applied Nutrition

### NUTR*3210 Fundamentals of Nutrition S,F,W (3-0) [0.50]

This is a Priority Access Course. Enrolment may be restricted to certain periods. Please see the departmental website for more information.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): BIOC*2580

Department(s): Department of Human Health and Nutritional Sciences

### NUTR*3330 Micronutrients, Phytochemicals and Health F (3-0) [0.50]

This course explores how genes and lifestyle choices (in particular diet and exercise) interact to affect cell and tissue function, and impact human health. These concepts will be examined through in-depth discussions of common metabolic diseases. The course is designed to highlight the integrative and inter-connected cellular, molecular, and physiological mechanisms underlying these conditions.

Prerequisite(s): BIOC*2580, BIOL*1080, MBG*2040

Restriction(s): Registration in BSC.HK and BSC.NANS (major or minor).

Department(s): Department of Human Health and Nutritional Sciences

### NUTR*3360 Lifestyle Genomics S (3-0) [0.50]

This course introduces the concept of personalized nutrition and nutrigenomics. Students will learn about the interactions between genes and nutrition in the context of diet and lifestyle. The course will also address the ethical implications of personalized nutrition including regulatory and marketing/consumer issues.

Prerequisite(s): NUTR*3210

Restriction(s): Registration in the B.Sc. NANS major or minor and the B.Sc. FFAN minor.

Department(s): Department of Human Health and Nutritional Sciences

### NUTR*3390 Applied Nutritional and Nutraceutical Sciences I F (3-3) [0.75]

This course will introduce and develop key concepts of the applied aspects of the Nutritional and Nutraceutical Sciences. Enrichment of foods with health protectant chemicals and identifying biomarkers of diet, disease, and risk factors is a fundamental aspect of this course. Chemical analysis and applications and the role of vitamins and minerals in the prevention of chronic disease will be discussed.

Prerequisite(s): NUTR*3210

Restriction(s): Registration in the B.Sc. NANS major or minor and the B.Sc. FFAN minor.

Department(s): Department of Human Health and Nutritional Sciences

### NUTR*4010 Nutritional Assessment F (3-0) [0.50]

This course examines the principles and methods used in nutritional assessment of individuals and populations in health and disease states. Dietary, anthropometric and biochemical techniques will be primary components. Nutritional screening, advanced techniques for body composition assessment, physical exam and clinical indicators will also be addressed. Significant independent learning will be required.

Prerequisite(s): 14.50 credits including NUTR*2050, NUTR*3210

Restriction(s): Registration in the B.A.Sc. AHN major.

Department(s): Department of Family Relations and Applied Nutrition
NUTR*4040 Clinical Nutrition II F (3-0) [0.50]
This course is a continuation of NUTR*3090. This lecture based course is concerned with the application of nutrition to clinical conditions. Methods and content of medical nutrition therapy in prevention and treatment of gastrointestinal, renal, hepatic diseases and catabolic states will be emphasized. Ethical issues in nutrition management of disease and health professional practice will be addressed.
Prerequisite(s): 14.50 credits including, (1 of BIOM*2000, ( BIOM*3100 or BIOM*3110 ), BIOM*3200), ( NUTR*3040 or NUTR*3090)
Restriction(s): Registration in the B.A.Sc. AHN major.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4070 Nutrition Education F (3-0) [0.50]
This course covers methods and approaches in nutrition education with particular emphasis on community programs in nutrition for different age groups; dietary counselling; nutrition education in the preschool, in prenatal and other specialized programs.
Prerequisite(s): FRHD*3400, NUTR*2050
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see departmental website for more information.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4090 Functional Foods and Nutraceuticals W (3-0) [0.50]
The course examines the relation of functional foods and nutraceuticals (FFN) to foods and drugs. The safety and efficacy of individual FFN products, and the regulatory issues that influence the development and commercialization of FFN in global markets are emphasized. (Also listed as FOOD*4090.)
Prerequisite(s): NUTR*3210
Equate(s): FOOD*4090
Department(s): Department of Human Health and Nutritional Sciences, Department of Food Science

NUTR*4120 Applied Clinical Skills W (0-3) [0.50]
This is a laboratory-based course which will enable students to gain skills in independently completing nutrition assessments and care plans of individuals and groups as they would be expected to do as nutrition professionals. Students will comprehensively assess nutritional status, apply knowledge of human physiology, pathophysiology, medical terminology and nutritional assessment to diagnose nutritional problems/issues and formulate, implement and evaluate a nutrition intervention.
Prerequisite(s): NUTR*4010, NUTR*4040
Restriction(s): NUTR*4850. Restricted to students in B.A.Sc. AHN with at least 75% grade average in all completed NUTR and FRHD courses.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4210 Nutrition, Exercise and Energy Metabolism F (3-0) [0.50]
In this course energy metabolism will be considered under the headings: thermodynamic principles, energy deposition and hormonal control of metabolism; nutrition, exercise and environmental influences on energy balance and enzyme adaptation; nutrition and exercise in the control of body composition.
Prerequisite(s): NUTR*3210, (1 of BIOM*3200, HK*3810)
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4320 Nutrition and Metabolic Control of Disease W (3-0) [0.50]
This course provides a discussion of disorders of metabolism, either inherited or acquired, in which nutrition plays a major role in the etiology, pathogenesis, or treatment. The nutritional control of the affected metabolic pathways and the interaction of nutrition with exercise, drugs and gene therapy will be presented.
Prerequisite(s): NUTR*3210, (1 of BIOM*3200, HK*3810, ZOO*3210, ZOO*3620)
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4330 Applied Nutritional and Nutraceutical Sciences II W (3-3) [0.75]
In this course laboratory and other investigational techniques are covered, together with their underlying concepts. The course is designed to enhance understanding of the design and use of nutraceuticals for human and animal health.
Prerequisite(s): NUTR*3330, NUTR*3390, HK*3810
Restriction(s): Registration in B.Sc. NANS major or minor.
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4360 Current Issues in Nutrigenomics W (3-0) [0.50]
This course discusses controversial and/or emerging topics in Human Health and Nutritional and Nutraceutical Sciences as it relates to nutrigenomics.
Prerequisite(s): NUTR*3210, (BIOM*3200 or HK*3810)
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4510 Toxicology, Nutrition and Food F (3-0) [0.50]
This course examines the role of foods, herbs and nutraceuticals as sources of antinutrients, natural toxins and environmental contaminants. The impact of toxic exposures on nutritional status, the impact of nutritional status on safe metabolism of toxins, and the use of this knowledge in the design of functional foods are also examined. Assessing the risk of genetically modified foods and radioactive contamination of a food supply.
Prerequisite(s): NUTR*3210
Department(s): Department of Human Health and Nutritional Sciences

NUTR*4810 Applied Human Nutrition Thesis I U (3-0) [0.50]
Planning, developing and writing a research proposal under individual faculty supervision. Topic to be decided by the student in consultation with the supervisory faculty member before course selection or registration period.
Prerequisite(s): FRHD*3070, NUTR*2050, ( NUTR*3040 or NUTR*3090)
Restriction(s): Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4850 Field Experience in Nutrition Education W (2-4) [0.50]
This course offers a supervised experience in nutrition education and a seminar. Students will apply principles of program planning, nutrition education theory and professional behaviour in a community setting. Placements may be arranged in institutional or community health settings, educational facilities, social services, or food industry. Seminar topics include professional ethics, exploring values, and issues management.
Prerequisite(s): FRHD*3400, NUTR*4040, NUTR*4070
Restriction(s): NUTR*4120 Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4900 Selected Topics in Human Nutrition W (3-0) [0.50]
This course requires reading and discussion on selected areas in human nutrition and its application; formal class reports and term papers. Primarily for Applied Human Nutrition majors.
Prerequisite(s): FRHD*3070, ( NUTR*3040 or NUTR*3090), NUTR*4010
Restriction(s): Registration in B.A.Sc. AHN major.
Department(s): Department of Family Relations and Applied Nutrition

NUTR*4910 Applied Human Nutrition Thesis II U (6-0) [1.00]
The student will conduct and write an undergraduate thesis under the direction of a faculty member.
Prerequisite(s): NUTR*4810
Restriction(s): Instructor consent required.
Department(s): Department of Family Relations and Applied Nutrition
### Organic Agriculture

One Health

**ONEH*1000 Introduction to One Health W (3-0) [0.50]**

Calendar Description: (Three to four sentences MAX; description must be written in full sentence form) This course introduces One Health, an approach to understanding, managing and mitigating local and globally complex societal challenges at the intersection of human, animal and environmental health. The course will examine the scope and integrative nature of One Health and its historical development; explore concepts of health from scientific and socio-cultural perspectives; introduce a basic framework for Open Health inquiry; and relate current challenges such as climate change, pollution and environmental contamination, emerging and zoonotic diseases, antimicrobial resistance, bio- and cultural diversity loss, and food insecurity to a One Health perspective. Key skills such as systems thinking, communication and professionalism in the field of One Health will also be developed.

Department(s): Dean's Office, College of Biological Science
# Pathology

**Department of Pathobiology**

Additional course listings may be found in the course descriptions for Veterinary Medicine.

## PATH*3040 Principles of Parasitology W (3-3) [0.50]

Parasitism is the most common biological association on the planet; virtually all organisms are parasitized by numerous parasites and many, such as the protists that cause malaria, are responsible for serious medical and/or veterinary diseases. This course will provide an in depth introduction to parasites and parasitism by exploring common protists, helminths and arthropods that infect animals and humans globally. The nature of parasitism will be explored by examining the development and transmission of many common parasitic agents, including their pathogenesis, zoonotic potential, diagnosis and treatment options.

**Prerequisite(s):** 10.00 credits including at least 1.50 credits in biology.

**Department(s):** Department of Pathobiology

## PATH*3610 Principles of Disease S,F,W (3-0) [0.50]

A course designed for students with particular interests in nutrition and biology. The course presents basic concepts of disease in the cells, tissues, organs and fluids of the body. Emphasis will be on disease processes resulting from physical, toxic and microbiological and other causes.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 1.50 credits in biology

**Restriction(s):** PATH*3600

**Department(s):** Department of Pathobiology

## PATH*4100 Diseases of Aquatic Animals F (2-2) [0.50]

A course designed to familiarize the fisheries manager, researcher or veterinarian with the basic principles of diagnosis, prevention, and control of disease of free living and captive aquatic animals, with emphasis on fish.

**Offering(s):** Offered in odd-numbered years.

**Prerequisite(s):** PATH*3610

**Department(s):** Department of Pathobiology
Pharmacology

Department of Biomedical Sciences.

For course listings and descriptions see Biomedical Sciences.

Additional course listings may be found in the course descriptions for Veterinary Medicine and Toxicology.
**Philosophy**

**Department of Philosophy**

**Note:** Specific descriptions of all courses to be offered in a given semester will be available from the Department of Philosophy in each preceding semester. Students are advised to consult these descriptions. Different sections of a course often emphasize different aspects of that course.

1. All 2000 level philosophy courses are open to students who have completed 2.00 credits or who have completed one of PHIL*1000, PHIL*1010, PHIL*1050.
2. Unless otherwise noted, 3000 level philosophy courses are open to students who have completed at least 1.50 credits in philosophy or 7.50 credits.
3. For most 4000 level courses, students are expected to have completed at least 1.00 credits in philosophy at the 3000 level. Some 4000 level credits have specific prerequisites, e.g. PHIL*4230, PHIL*4360 (see course descriptions in the following pages). If a student is taking several credits with such prerequisites, then the number of other philosophy credits which need to be completed may exceed the general requirement of 1.00 credits at the 3000 level. PHIL*4310 is designed to be open to seventh and eighth semester students who have no previous philosophy credit. If in doubt about being well prepared for a particular course, the student should consult with either the instructor or the chair of the department.
4. Students may receive credit for PHIL*1000, PHIL*1010 and PHIL*1050, but only one may be counted towards the minimum number of philosophy credits required for a degree in philosophy. Students intending to proceed in the discipline at the 2000 level are advised to take only 0.50 credits at the 1000 level.

**PHIL*1000 Classic Thinkers F (3-0) [0.50]**

This course will deal with enduring philosophical questions through an exploration of primary texts in the history of philosophy. Topics covered may include the nature of knowledge and the different types of knowledge, the relationship between the mind and the body, and the nature of good and evil. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department's website.

**Offering(s):** Department of Philosophy

**PHIL*1010 Introductory Philosophy: Social and Political Issues F,W (3-0) [0.50]**

This course introduces philosophy through an examination of important issues in politics and society, such as punishment, animal rights, discrimination, war and violence, equality and property. These issues may be introduced through contemporary or historical philosophical writings.

**Offering(s):** Department of Philosophy

**PHIL*1030 Sex, Love, and Friendship F,W (3-0) [0.50]**

This course introduces students to philosophical inquiry through the careful study of the forms of interpersonal relationships. Issues central to friendship, love, and sexuality which may be addressed include pleasure, happiness, responsibility, power and oppression, gender, marriage and morality.

**Offering(s):** Department of Philosophy

**PHIL*1050 Ethics, Knowledge, and Reality W (3-0) [0.50]**

This course introduces students to philosophy through the exploration of basic perennial philosophical problems and questions, such as whether there is free will, a God, objective right and wrong, genuine knowledge of the world, and other topics. The readings for the course will consist primarily of 20th century philosophical writing.

**Offering(s):** Department of Philosophy

**PHIL*2000 Philosophy of Biology W (3-0) [0.50]**

This course focuses on philosophical issues that arise within biology, such as the explanation of altruism, the question of whether species are real, and the challenge of how to identify adaptations. The course also examines philosophical issues that arise at the interface between biology and society, such as the implications of evolutionary theory for traditional views about human nature, or the proper role for scientists in advocating for environmental policies.

**Prerequisite(s):** 2.00 credits including 0.50 credits in BIOL

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Offering(s):** Department of Philosophy

**PHIL*2030 Philosophy of Medicine F (3-0) [0.50]**

Medicine is a philosophical, not merely a practical, empirical enterprise. This course covers philosophical concepts which are widely used to evaluate health and health-practices that include: autonomy, consent, mind, will, rights, harm, fairness, dignity, truth and even ‘health’ itself. Issues central to health and health care practice include: the nature of professional-client relationships, genetic counseling, passive and active euthanasia, pharmacology and behaviour modification, resource allocation, and the special set of issues raised by reproductive technologies.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Offering(s):** Department of Philosophy

**PHIL*2060 Philosophy of Feminism I W (3-0) [0.50]**

This course examines metaphysical, epistemological and ethical issues in feminist philosophy, including such topics as the nature and consequences of patriarchy, human nature, sexual divisions of labour, women's studies, rationalizations of inequalities and explorations into a contemporary feminist agenda for social, political and economic changes.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

**PHIL*2070 Philosophy of the Environment W (3-0) [0.50]**

Environmental Philosophy asks questions such as: How has ‘nature’ been conceptualized in the Western philosophical tradition, in aesthetics, science, and ethics? What arguments have been offered for the view that humans are superior among creatures? What connections might there be between the ways that nature, humankind, and animals have been conceptualized and the ways that humans have tended to act toward the non-human natural environment? This course may cover such topics as: climate change, resource extraction and justice, biotechnology, obligations to future generations, risk assessment and discount rates, species lost, conservation vs. preservation.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

**PHIL*2080 Animals in Philosophy S (3-0) [0.50]**

This course will examine the concept of the animal itself, the nature of animal minds, the importance of species membership, and the relationship between human and non-human animals. It will discuss applied issues related to animal welfare, wildlife, agriculture, experimentation, and the environment. It will also explore some of the ethical, social, political and feminist perspectives on animals as they are addressed by philosophers. As such, the course aims to enable students to analyze growing concerns that animals play in our lives.

**Offering(s):** Offered through Distance Education format only.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

**PHIL*2100 Critical Thinking F,W (3-0) [0.50]**

This course is designed to develop clarity of thought and method in the analysis and construction of arguments. By contrast to PHIL*2110, the emphasis here is upon informal principles of critical thinking and arguments stated in terms of ordinary language. Topics include the nature and methods of arguing, classification, definition and fallacies.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

**PHIL*2110 Formal Logic W (3-0) [0.50]**

This course studies the basic principles and techniques of formal logic. The analysis of the logical structure of sentences and arguments is explored, together with the fundamental principles of elementary sentential logic and quantification.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

**PHIL*2120 Ethics F,W (3-0) [0.50]**

Philosophical ethics is the attempt to systematize, explain, and justify the standards by which we evaluate our conduct as persons. The course may include treatment of controversial ethical issues such as abortion, euthanasia, war, and the treatment of animals and will cover many of the following questions: can we expect to find a single, universal code of ethics that applies to all human beings, or do such codes vary for each society or even for each individual? What are the roles of reason and emotion in ethics? Is morality grounded on a principle, and if so, what is it? Are there any traits of character that one must have to be a good person? Given that traditional ethical codes have been almost universally sexist, how must ethics be refashioned in order for women to achieve equal recognition?

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1050)

**Department(s):** Department of Philosophy

**PHIL*2140 Ancient Greek Philosophy F (3-0) [0.50]**

A survey of the beginnings of Western philosophy, this course will focus on themes such as the nature of reality, the ways we might come to have knowledge, and the good life for human beings. This course will typically consider such thinkers as Socrates, Plato, Aristotle, and Epicurus, although the specific course content will vary with the instructor.

**Prerequisite(s):** 2.00 credits or (1 of PHIL*1000, PHIL*1010, PHIL*1030, PHIL*1050)

**Department(s):** Department of Philosophy

Revision: 2020-2021 Undergraduate Calendar
PHIL*3190 Epistemology F (3-0) [0.50]
This course is an advanced introduction to the central issues in epistemology, such as the nature of knowledge and how it differs from mere true belief. Possible topics include skepticism, theories of justification and rationality, self-knowledge and the sources of belief.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3200 Continental Philosophy F (3-0) [0.50]
This course focuses on 20th century French and German philosophy and the influences that shaped it. The course will be part historical, part contemporary. The historical part may survey touchstones of current Continental thought in ancient and modern philosophy. The contemporary part of this course may focus on any of the hundred or so key figures in 20th or 21st century Continental thought, or groupings thereof according to particular thematic.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3210 Women in the History of Philosophy F (3-0) [0.50]
This course will examine selected works of women philosophers and their contributions to the major philosophical debates of their day. The philosophers covered may be drawn from any period in the history of philosophy, up to, and including, the 20th century and topics covered have ranged across feminist issues, epistemology, metaphysics, and ethics. Because texts and topics will vary with the instructor, students are advised to consult the departmental website.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3230 Theories of Justice W (3-0) [0.50]
This is a course in social and political philosophy. It is the area of philosophy concerned with the morality of major social institutions such as the state, the economy, and the family. This course may engage in the detailed examination of one or more of the following questions: what justifies the state’s claim to authority? What are the proper dimensions of individual liberty? What levels of material and social equality are required for a society to be just? These questions will be pursued through reading historical and/or contemporary philosophical texts.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3250 Philosophy of Language F (3-0) [0.50]
This course will explore the relationship between human beings and language, and between language and the world. In particular, it may address such fundamental questions as: What is it about the way in which we use words that gives them the meanings they have? And what is the relationship between words and objects to which they refer? Authors studied may include representatives from the analytic and/or continental traditions in philosophy.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3260 Set Theory and Modal Logic U (3-0) [0.50]
Both set theory and modal logic are important tools in contemporary philosophy. Set theory is about relationships among collections of things. Modal logic elaborates the notions of necessity and possibility in formal models of different possible worlds. Students will explore these topics by producing and understanding informal proofs of important facts, and by doing exercises developing understanding of the semantics of modal logic.

Prerequisite(s): PHIL*2110
Restriction(s): PHIL*4110
Department(s): Department of Philosophy

PHIL*3280 21st Century Philosophy F (3-0) [0.50]
This course is an introduction to the most current philosophical texts and movements developed since the beginning of the 21st Century. Students will be taught to understand and work creatively with the most recent ideas in the discipline. Material covered will focus almost exclusively on the philosophical texts written in or after the year 2000.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3290 Advanced Ethical Theory F (3-0) [0.50]
This course focuses on the theoretical foundations of morality. Ethical theory comprises metaethics, which is primarily concerned with the objectivity of moral judgments; normative ethics, which is concerned with the principles of sound moral judgment, and moral psychology, which is concerned with moral motivation and moral reasoning.

Offering(s): First offering - Fall 2018
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3300 Democracy and Its Critics F (3-0) [0.50]
This course will review classical and contemporary positions on the nature and value of democracy, including arguments for and against it from a variety of stances in political philosophy. It will also examine the merits of competing models of democracy, issues dealing with limitations on majority rule in pluralistic societies, and the applicability of democracy in international contexts.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3350 Selected Topics in Philosophy U (3-0) [0.50]
The topics for this course will vary from one offering to the next, and will deal with material, such as Philosophy of History, Philosophy of Social Science and advanced Philosophy of Religion generally arising from the instructor's current research interests. This course gives students a chance to explore topics and texts not usually covered in other courses. Students are encouraged to consult the departmental website for course content and availability.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3360 Nineteenth Century Philosophy F (3-0) [0.50]
This course provides a survey of 19th century philosophy, a period of extreme change and upheaval, championed mainly by German thinkers. The course will engage with topics such as the nature of individual freedom; historical approaches to understanding concepts of reality and moral norms; proposed radical revisions to traditional moral and social order; and confronting the possible meaningless or absurdity of human life.

Offering(s): First offering - Fall 2018 Offered in even-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Restriction(s): PHIL*3080 , PHIL*3090
Department(s): Department of Philosophy

PHIL*3410 Major Texts in the History of Philosophy W (3-0) [0.50]
This course will consider central and continually philosophical issues through an exploration of primary texts in the history of philosophy. The readings and periods stressed will vary from year to year, but could cover significant and enduring texts from the ancient period right up to the 21st century. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department’s website.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*3450 Ethics in the Life Sciences W (3-0) [0.50]
This course is an advanced introduction to the ethical implications of values and practices guiding research in the life sciences. Fields of discussion may include ethics in health care, genetics and human reproduction, environmental sciences, agriculture, animal husbandry, animal welfare, and food technologies. Material covered will be drawn from current books and articles by philosophers in this rapidly expanding area.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits. PHIL*2120, PHIL*2180 are recommended.
Department(s): Department of Philosophy

PHIL*3710 Directed Reading F.W (3-0) [0.50]
This course is intended as an intensive course of reading chosen by the student in consultation with the faculty member.

Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*3910 Indian Philosophy F (3-0) [0.50]
This course provides an analysis of selected primary sources of Indian philosophy in translation, from the Vedic Upanishads to the "integral yoga" of Sri Aurobindo. Emphasis will be on the basic inspirational works of Hinduism and Buddhism, and their respective views on the ultimate nature of reality, the self, suffering, freedom, ignorance and enlightenment.

Offering(s): Offered in even-numbered years.
Prerequisite(s): 1.50 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy
PHIL*3920 Chinese Philosophy W (3-0) [0.50]
This course analyzes selected primary sources of Chinese philosophy, in translation, from the 1 Ching to Mao Tse-tung. Emphasis will be on the foundational works of Confucianism, Taoism, Ch' an (or Zen) Buddhism, and Neo-Confucianism, concerning such issues as the ultimate nature of being, non-being and human destiny, property of the self, the family and society, and the principles and practice of enlightenment.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 1.00 credits in Philosophy or 7.50 credits
Department(s): Department of Philosophy

PHIL*4040 Advanced Philosophy of the Environment U (3-0) [0.50]
This course is an exploration in detail of central debates in environmental philosophy. Possible topics include: genetic modification of plants and animals, duties to future generations, obligations to distant global others, the ethics of encounters, animal welfare, trans-species communication, restoration and conservation projects, aesthetics, virtue ethics, and stewardship.
Prerequisite(s): (PHIL*1010 or PHIL*2120), PHIL*2070
Department(s): Department of Philosophy

PHIL*4060 Philosophy of Feminism II U (3-0) [0.50]
This course is an advanced study of problems in feminist philosophy. The course may cover specific topics or the work of one or more feminist philosophers. Topics may be drawn from feminist ethics, epistemology, and/postmodernism. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department's website.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or PHIL*2060
Department(s): Department of Philosophy

PHIL*4120 Current Debates in Language and Mind U (3-0) [0.50]
Each offering of this course will focus on a specific issue or set of related issues that are now being debated in Philosophy of mind and Philosophy of language. Readings will be contemporary works.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4130 Current Debates in Continental Philosophy U (3-0) [0.50]
Each offering of this course will focus on close study of either one or two figures of contemporary relevance in discussions of Continental European philosophy, or a specific issue or set of related issues that are now being debated in that field.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4140 Current Debates in Philosophy of Science U (3-0) [0.50]
Each offering of this course will focus on a specific issue or set of related issues that are now being debated in Philosophy of Science. Readings will be contemporary works.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4160 Philosophy Field Course F (3-0) [1.00]
This variable content course addresses an issue which is relevant to the contemporary world from a range of philosophical perspectives. The course is built on research into the issue, including material gathered during a 1-2 week field trip which is held in the summer immediately preceding the semester in which the student takes the course. The field trip is a mandatory component of the course, one for which the student assumes the costs of transportation, food and lodging.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 13.00 credits and a minimum cumulative average of 70%.
Restriction(s): Restricted to students in Philosophy major or minor. Instructor consent required.
Department(s): Department of Philosophy

PHIL*4230 Current Debates in Social and Political Philosophy U (3-0) [0.50]
This is an advanced level course that examines in detail selected historical or contemporary treatments of specific issues in social and political philosophy.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4310 Applied Ethics U (3-0) [0.50]
An advanced study of specific problems in applied ethics. This is an intensive course designed for philosophy majors as well as for seventh and eighth semester students who have had no previous philosophy course.
Department(s): Department of Philosophy

PHIL*4340 Current Debates in Ethics U (3-0) [0.50]
This course offers an advanced study of problems in ethical theory. This course will examine contemporary and perennial issues in ethics through recent or historical texts. Texts and topics will vary with the instructor; students are advised to consult the Philosophy department's website.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4360 Current Debates in Epistemology U (3-0) [0.50]
An examination of central problems concerning the nature of knowledge. In some offerings the selection will emphasize problems in the Philosophy of Language.
Prerequisite(s): 1 of (1.00 credits in Philosophy at the 3000 level, 12.50 credits, PHIL*3190)
Department(s): Department of Philosophy

PHIL*4370 Current Debates in Metaphysics U (3-0) [0.50]
An advanced study of problems concerning the nature of reality.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level or 12.50 credits
Department(s): Department of Philosophy

PHIL*4410 Major Texts in Philosophy U (3-0) [0.50]
Advanced study of a major text in philosophy not treated in either PHIL*4400 or PHIL*4420.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level
Department(s): Department of Philosophy

PHIL*4420 Major Texts in Philosophy U (3-0) [0.50]
Advanced study of a major text in philosophy not treated in either PHIL*4400 or PHIL*4410.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level
Department(s): Department of Philosophy

PHIL*4710 Directed Reading F,W (3-0) [0.50]
This course is intended as an intensive course of reading chosen by the student in consultation with the faculty member.
Prerequisite(s): 1.00 credits in Philosophy at the 3000-level
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*4720 Directed Reading F,W (3-0) [0.50]
This course is intended as an intensive course of reading chosen by the student in consultation with the faculty member.
Prerequisite(s): 1.00 credits in Philosophy at the 3000-level
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*4800 Honours Philosophy Research Paper I U (3-0) [0.50]
The preparation of a major research paper under the supervision of a faculty member. Normally open only to 7th semester honours philosophy students.
Prerequisite(s): 1.00 credits in Philosophy at the 3000 level
Restriction(s): Instructor consent required.
Department(s): Department of Philosophy

PHIL*4820 Philosophy Research Presentation F,W (3-0) [0.50]
The focus of this course is mastering the oral presentation of a philosophical argument, and engaging in respectful, intellectually honest discussion with one’s audience. Students will develop and present a philosophical claim which they will explain and defend during a question period after the presentation. Students are expected to have topic for their presentation at the beginning of the course.
Prerequisite(s): 14.00 credits including 1.00 credits in Philosophy at the 3000-level
Restriction(s): Restricted to students in Philosophy major.
Department(s): Department of Philosophy
Physics

PHYS*1010 Introductory Electricity and Magnetism W (3-3) [0.50]
This course is for engineering and physical science students on the phenomena of electromagnetism and introductory DC circuit analysis. Topics include electric charges and fields, electric potential and current, electric resistance, capacitance, inductance, magnetic fields, electric circuits, Ohm’s Law, and application of Kirchhoff’s Laws to node and mesh analysis of DC circuits. The course will conclude with an introduction to AC circuits.
Prerequisite(s): (1 of MATH*1080, MATH*1200), (4U Physics or equivalent )
Restriction(s): IPS*1510
Department(s): Department of Physics

PHYS*1020 Introductory Physics S (3-0) [0.50]
This course stresses the fundamental properties of particles and waves, designed for students without 4U Physics or equivalent. Topics include: the motion of particles, force, field, momentum, energy and associated conservation laws; basic interactions between particles; properties of waves. It is expected that students will have at least 1 4U mathematics credit. This course is intended only for students who require the equivalent of 4U Physics in order to proceed to IPS*1500, PHYS*1130, PHYS*1010, PHYS*1080, or PHYS*1070.
Offering(s): Offered through Distance Education format only.
Department(s): Department of Physics

PHYS*1070 Physics for Life Sciences II W (3-3) [0.50]
This course discusses physics of matter and energy at the macroscopic and microscopic levels, with special emphasis on topics of importance to the biological sciences. Topics include properties of waves, acoustics and hearing, optical systems and vision, quantum nature of radiation and its interaction with biomolecules, electricity, high energy radiation and radioactivity.
Prerequisite(s): (4U Physics or PHYS*1020 ), 4U Mathematics
Restriction(s): IPS*1510, PHYS*1130, PHYS*1300. This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Physics

PHYS*1080 Physics for Life Sciences F,W (3-3) [0.50]
This course discusses aspects of classical physics with particular emphasis on topics of importance in the biological and environmental sciences. Topics include mechanics and applications to anatomical problems, fluid statics and dynamics, molecular motion, diffusion, osmosis, and heat.
Prerequisite(s): (1 of 4U Physics, PHYS*1020 , PHYS*1300 ), 4U Mathematics
Restriction(s): IPS*1500, PHYS*1000 . This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Physics

PHYS*1130 Physics with Applications F (3-1) [0.50]
This is an introductory physics course for engineering students. Topics include measurement and error analysis, translational and rotational kinematics and dynamics, simple harmonic motion, waves, acoustics, and optics, with an emphasis on relevant applications of these physical concepts. The course will conclude with an introduction to quantum phenomena.
Prerequisite(s): (4U Calculus and Vectors or equivalent), (4U Physics or equivalent)
Restriction(s): IPS*1500, PHYS*1080
Department(s): Department of Physics

PHYS*1300 Fundamentals of Physics F (3-3) [0.50]
This course introduces students to fundamental phenomena in physics, with particular emphasis on applications to the biological sciences. Topics include: analyzing one-dimensional and two-dimensional motion; Newton’s laws; momentum, energy and associated conservation laws; interactions between charges, resistive direct-current circuits; the fundamentals of waves, with applications to acoustics; ionizing radiation, radioactivity and medical applications. This course is designed for students who have not completed 4U Physics (or equivalent): students with credit in 4U Physics (or equivalent) may not take this course for credit.
Restriction(s): SPI 4U (or equivalent) PHYS*1020 PHYS*1070. This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Physics

PHYS*1600 Contemporary Astronomy F (3-0) [0.50]
This course is designed for non-science students. Emphasis will be on the interdisciplinary and contemporary aspects of astronomy with the object of providing a perspective of our place in the physical universe. Topics will include the solar system, stars and stellar evolution, pulsars, black holes, quasars and cosmology. Students are encouraged to suggest and participate in discussion on items of special interest.
Offering(s): Offered through Distance Education format only.
Restriction(s): Students with standing in any other 1000 level course credit in physics (except (PHYS*1020 or PHYS*1300), PHYS*1810) may not use this course for credit. B.Sc. students may not take this course for credit.
Department(s): Department of Physics

PHYS*1810 Physics of Music F (3-0) [0.50]
This course is designed for arts and social science students with an interest or background in music. The fundamentals of vibrations and waves will be introduced and applied to a study of archetypal instruments. The psychoacoustic basis of pitch and loudness will be discussed.
Offering(s): Offered in even-numbered years.
Equating(s): MUSC*1090
Restriction(s): Students who have standing in any 1000 level physics course, (except PHYS*1300 or PHYS*1600) may enrol in this course only if they are completing an honours or general B.A. program in Music. In this case, permission of the instructor is required.
Department(s): Department of Physics

PHYS*2030 Biophysics of Excitable Cells W (3-1) [0.50]
An intermediate biophysics course with special emphasis on the physical properties of nerve cells and of biological transducers such as the ear and the eye.
Prerequisite(s): 1.00 credits in physics (excluding PHYS*1020 , PHYS*1600, PHYS*1810)
Department(s): Department of Physics

PHYS*2180 Experimental Techniques in Physics W (3-3) [0.50]
This course is designed to aid students in the development of core practical skills in physics. Students will be required to conduct a series of experiments exploring fundamental concepts in mechanics, electricity & magnetism, thermal physics, as well as the experimental basis of quantum physics. There will be a strong emphasis on data and error analysis with a variety of software applications.
Prerequisite(s): PHYS*2330
Department(s): Department of Physics

PHYS*2240 Thermal Physics F (3-0) [0.50]
This course will introduce students to the basic ideas of thermal physics, including temperature, heat, work, thermal and diffusive equilibrium, and the Boltzmann distribution. The statistical basis for entropy and for thermodynamics will be discussed. Applications of thermodynamics to both non-interacting and interacting systems will be presented.
Prerequisite(s): (1 of IPS*1510, MATH*1210, MATH*2080 ), (IPS*1500 or PHYS*1080)
Restriction(s): CHEM*2820
Department(s): Department of Physics

PHYS*2310 Mechanics W (4-0) [0.50]
This course continues building the foundation in mechanics begun in the first year. Topics include, one, two and three dimensional motion, damped and forced harmonic oscillator, gravitation and orbital motion, special relativity, noninertial reference frames, and rigid body dynamics.
Prerequisite(s): MATH*2270, (1 of IPS*1500, PHYS*1000 , PHYS*1080)
Restriction(s): PHYS*2440
Department(s): Department of Physics

PHYS*2330 Electricity and Magnetism F (4-0) [0.50]
This course continues building the foundation in electricity and magnetism begun in the first year and is intended for students proceeding to advanced studies in the physical sciences. Topics include vector calculus, electric fields, potential, electric work and energy, Gauss’s Law, Poisson’s and Laplace’s equations, capacitors, D.C. circuits, transients and dielectric materials.
Prerequisite(s): IPS*1510 or ([MATH*1210 or MATH*2080 ] , (1 of PHYS*1010, PHYS*1070, PHYS*1130))
Restriction(s): PHYS*2460
Department(s): Department of Physics

Department(s): Department of Physics

Revision:
PHYS*2340 Electricity and Magnetism II W (4-0) [0.50]
This course is a continuation of PHYS*2330. Topics include magnetic forces and fields, the Biot-Savart equation, Ampere's Law, magnetic induction, LRC transients, A.C. circuits and magnetic materials.
Prerequisite(s): PHYS*2330
Restriction(s): PHYS*2470
Department(s): Department of Physics

PHYS*2600 General Astronomy F (4-1) [0.50]
An introduction to astronomy, this course covers the solar system, the sun, stellar and galactic structure.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): IPS*1500 or (1 of PHYS*1010, PHYS*1070, PHYS*1080, PHYS*1130, PHYS*1300), (1 of MATH*1030, MATH*1080, MATH*1160, MATH*1200)
Department(s): Department of Physics

PHYS*3000 Optics: Fundamentals and Applications W (3-0) [0.50]
This course will introduce students to the fundamental principles of wave and geometric optics, with an emphasis on applications. Topics will include reflection, refraction, diffraction, interference, and polarization, as well as fibre optics, imaging systems and lasers.
Prerequisite(s): PHYS*2340, PHYS*3130
Restriction(s): PHYS*3220
Department(s): Department of Physics

PHYS*3080 Energy W (3-0) [0.50]
This course covers energy resources and the production, transmission, interconversion, consumption and waste of energy in the industrial society. Emphasis is placed on environmental impact and human safety. Topics include fossil fuels, nuclear fission and fusion, wind and solar power, the hydrogen economy, and conservation strategies.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): IPS*1500 or PHYS*1080, (1 of MATH*1000, MATH*1080, MATH*1200), (1 of IPS*1510, PHYS*1010, PHYS*1070, PHYS*1130, PHYS*1300)
Department(s): Department of Physics

PHYS*3130 Mathematical Physics F (3-0) [0.50]
This course covers a number of mathematical techniques that are required in all areas of physics. Curvilinear coordinates, special functions, Fourier series and integral transforms, Green’s functions, and a number of advanced topics will be discussed. The course emphasizes the application of these techniques to solve a variety of physics problems, providing context to the fundamental tools of the discipline.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), MATH*2200, MATH*2270, PHYS*2310, PHYS*2340
Department(s): Department of Physics

PHYS*3170 Radioactivity and Radiation Interactions F (3-0) [0.50]
This course will provide a fundamental understanding of radiation physics and dosimetry, as well as assist students in the development of their problem solving skills in this field. Topics will include: atomic and nuclear structure, radioactivity, interaction of radiation with matter, radiobiology, radiation dosimetry, and external radiation protection. Throughout the course, applications of radiation physics in medicine will be highlighted.
Prerequisite(s): (1 of IPS*1510, MATH*1210, MATH*2080), MATH*2170 or MATH*2270
Department(s): Department of Physics

PHYS*3230 Quantum Mechanics I F (4-0) [0.50]
This course consists of a formal treatment of quantum mechanics. Topics include wave packets and free particle motion, the Schrodinger equation, harmonic oscillator, precwise constant potentials, central forces and angular momentum, and the hydrogen atom.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), MATH*2170 or MATH*2270, (PHYS*2340 or PHYS*2470)
Department(s): Department of Physics

PHYS*3400 Advanced Mechanics F (3-0) [0.50]
This course covers Lagrangian mechanics and Hamiltonian mechanics. Topics include least action principles, Poisson brackets, Liouville's theorem, Hamilton- Jacobi theory, the transition to quantum mechanics and introduction to non-linear dynamics.
Prerequisite(s): ( MATH*2170 or MATH*2270), (PHYS*2310 or PHYS*2440)
Department(s): Department of Physics

PHYS*3510 Intermediate Laboratory F,W (0-6) [0.50]
This modular course consists of experiments in modern and classical physics. Modules include laboratory instrumentation employing computers, modern physics, waves and optics, molecular physics, biophysics, and solid state physics.
Prerequisite(s): PHYS*2180 or (NANO*2100, PHYS*2310)
Department(s): Department of Physics

PHYS*4001 Research in Physics F (0-6) [0.50]
This course is the first part of the two-semester course PHYS*4001/2. This is a two-semester (F-W) course in which students apply their knowledge and skills through independent research of an experimental or theoretical nature within physics. Students will be required to present their results in both oral and written reports. Students must make arrangements with a faculty supervisor and obtain approval of the course co-ordinator before course selection. Approval of the course co-ordinator will only be granted upon receipt of a completed registration form, available from the co-ordinator during the course selection period. This is a two-semester course offered over consecutive semesters. When you select it, you must select PHYS*4001 in the Fall semester and PHYS*4002 in the Winter semester. A grade will not be assigned to PHYS*4001 until PHYS*4002 has been completed.
Prerequisite(s): PHYS*3510
Restriction(s): PHYS*4510. Instructor consent required.
Department(s): Department of Physics

PHYS*4002 Research in Physics W (0-6) [0.50]
This course is the second part of the two-semester course PHYS*4001/2. This is a two-semester (F-W) course in which students apply their knowledge and skills through independent research of an experimental or theoretical nature within physics. Students will be required to present their results in both oral and written reports. Students must make arrangements with a faculty supervisor and obtain approval of the course co-ordinator before course selection. Approval of the course co-ordinator will only be granted upon receipt of a completed registration form, available from the co-ordinator during the course selection period. This is a two-semester course offered over consecutive semesters. When you select it, you must select PHYS*4001 in the Fall semester and PHYS*4002 in the Winter semester. A grade will not be assigned to PHYS*4001 until PHYS*4002 has been completed.
Prerequisite(s): PHYS*4001
Department(s): Department of Physics

PHYS*4040 Quantum Mechanics II W (4-0) [0.50]
This is a second course in quantum mechanics. Topics include spin and two-level systems, quantum systems of multiple particles, quantum description of fermions and bosons, time independent perturbation theory, and the fine structure of hydrogen.
Prerequisite(s): PHYS*3230
Department(s): Department of Physics

PHYS*4070 Clinical Applications of Physics in Medicine W (3-0) [0.50]
This course provides an overview of the application of physics to medicine. The physical concepts underlying the diagnosis and treatment of disease will be explored. Topics will include general imaging principles such as resolution, intensity, and contrast; x-ray imaging and computed tomography; radioisotopes and nuclear medicine, SPECT and PET; magnetic resonance imaging; ultrasound imaging and radiation therapy.
Prerequisite(s): ENGG*3390 or PHYS*3130
Restriction(s): ENGG*4040, PHYS*4560
Department(s): Department of Physics

PHYS*4120 Atomic and Molecular Physics F (3-0) [0.50]
The application of quantum theory to atomic and molecular structure, and the interaction between electromagnetic radiation and atoms and simple molecules.
Prerequisite(s): PHYS*4040
Department(s): Department of Physics

PHYS*4130 Subatomic Physics W (3-0) [0.50]
This course surveys the field of subatomic physics from radioactive emanations to conjectured subunits of nucleons. Topics include quark models; strong, electromagnetic and weak interactions; isospin, strangeness, conservation laws and symmetry principles; systematics of nuclear properties, nuclear radioactivity, nuclear models and reactions.
Prerequisite(s): PHYS*4040
Department(s): Department of Physics

PHYS*4150 Solid State Physics W (3-0) [0.50]
The topics covered in this course include: bonding in solids, thermal and electrical properties of solids, energy bands, imperfections in solids, properties of semiconductors and insulators.
Prerequisite(s): PHYS*4040, PHYS*4240
Department(s): Department of Physics
PHYS*4180 Advanced Electromagnetic Theory F (3-0) [0.50]
This course covers Maxwell's equation, Lorentz-force law, conservation of charge, and conservation of energy (Poynting's theorem). In addition, the course will discuss potentials, gauge transformations, wave equations, and multipole expansions as well as Green's functions for the Poisson and wave equations. Additional topics include electrostatics and magnetostatics (including boundary-value problems), motion of charged particles in electromagnetic fields, and propagation and generation of electromagnetic waves.
Prerequisite(s): (PHYS*2340 or PHYS*2470)  
Department(s): Department of Physics

PHYS*4240 Statistical Physics II F (3-0) [0.50]
A continuation of PHYS*2240 including a discussion of the grand canonical distribution, quantum statistics, and transport theory.
Prerequisite(s): (PHYS*2240 or PHYS*3240), PHYS*3230  
Department(s): Department of Physics

PHYS*4500 Advanced Physics Laboratory F,W (0-6) [0.50]
This is a modular course for students in any physics-related major in which techniques of nuclear, solid state and molecular physics will be studied.
Prerequisite(s): PHYS*3510  
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.  
Department(s): Department of Physics

PHYS*4540 Molecular Biophysics W (3-0) [0.50]
Physical methods of determining macromolecular structure: energetics, intramolecular and intermolecular forces, with applications to lamellar structures, information storage, DNA and RNA, recognition and rejection of foreign molecules.
Prerequisite(s): 0.50 credits in biochemistry, (CHEM*3860 or PHYS*3230)  
Department(s): Department of Physics

PHYS*4910 Advanced Topics in Physics I U (3-0) [0.50]
The content of this course is determined by the interests of the students. Possible topics include fluid mechanics, theory of elastic solids, general relativity, astrophysics, and chaos. This course is not offered every year.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), (MATH*2170 or MATH*2270), [(PHYS*2450, PHYS*2470) or (PHYS*2180, PHYS*2310, PHYS*2340)]  
Department(s): Department of Physics

PHYS*4920 Advanced Topics in Physics II U (3-0) [0.50]
The content of this course is determined by the interests of the students. Possible topics include fluid mechanics, theory of elastic solids, general relativity, astrophysics, and chaos. This course is not offered every year.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), (MATH*2170 or MATH*2270), [(PHYS*2450, PHYS*2470) or (PHYS*2180, PHYS*2310, PHYS*2340)]  
Department(s): Department of Physics

PHYS*4930 Advanced Topics in Physics III U (3-0) [0.50]
The content of this course is determined by the interests of the students. Possible topics include fluid mechanics, theory of elastic solids, general relativity, astrophysics, and chaos. This course is not offered every year.
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), (MATH*2170 or MATH*2270), [(PHYS*2450, PHYS*2470) or (PHYS*2180, PHYS*2310, PHYS*2340)]  
Department(s): Department of Physics
Physiology

Department of Biomedical Sciences

For course listings and descriptions see Biomedical Sciences.

Additional course listings may be found in the course descriptions for Veterinary Medicine and Human Kinetics.
### XII. Course Descriptions, Plant Biology

#### PBIO*3110 Crop Physiology W (3-3) [0.50]
This course examines the physiological basis of crop yield determination, with emphasis on phenomena that express themselves at the whole canopy (rather than single plant) level of organization. It covers canopy scale measurements of crop growth, development, and solar radiation capture; photosynthesis, beginning at the level of biochemistry and working up to the whole canopy scale; how photoassimilates are used in the processes of respiration, growth and yield formation; and crop - environment interactions, including water stress, nutrient uptake and utilization, and light quality effects on photomorphogenesis.

**Prerequisite(s):** 1 of BIOL*1050, BIOL*1070, BIOL*1090

**Department(s):** Department of Plant Agriculture

#### PBIO*3750 Plant Tissue Culture F (2-3) [0.50]
This course examines the principles, protocols and utilization of plant cell tissue culture systems. In vitro propagation and regeneration, mutagenesis and selection, secondary metabolite elicitation and cell transformation techniques including protoplast fusion, direct DNA uptake and plant bacterial co-cultivation will be emphasized.

**Prerequisite(s):** AGR*2470 or BOT*2100

**Department(s):** Department of Plant Agriculture

#### PBIO*4000 Molecular and Cellular Aspects of Plant-Microbe Interactions F (3-0) [0.50]
This course examines molecular and cellular aspects of the interaction between plants and microorganisms such as mycorrhizae, pathogenic fungi, Agrobacterium, pathogenic bacteria, and plant viruses. Topics include microbial virulence, signaling, gene expression, and disease resistance in plants.

**Prerequisite(s):** 1 of BOT*2100, MICR*2030, (BIOL*1070, BIOL*1090, MBG*2040)

**Department(s):** School of Environmental Sciences

#### PBIO*4070 Biological and Cultural Control of Plant Diseases W (3-0) [0.50]
This course explores current concepts and approaches to managing plant pathogens and diseases in crops and natural plant communities by measures that have minimal impact on the environment. Topics include naturally-occurring biological control such as suppressive soils and induced host resistance, use of microbial agents and their modes of action, transgenic disease resistance, use of organic soil amendments and mulches to promote microbial diversity and suppress pathogens, and effects of sanitation, crop sequences, tillage, flooding, soil solarization and other cultural practices on microbial communities, including pathogens and on disease epidemics.

**Prerequisite(s):** 1 of ENVB*3210, ENVS*3210, MICR*3090, MICR*3220

**Equate(s):** ENVB*4070

**Department(s):** Department of Plant Agriculture

#### PBIO*4150 Molecular and Cellular Aspects of Plant Development W (3-0) [0.50]
This course explores the molecular and cellular processes that underlie cellular differentiation and organ formation in plants. The roles of homeotic genes, gene regulation, cell polarity, morphogens and environmental effects in development will be discussed. Subjects will be introduced by a lecture and examined in detail in discussions of pertinent research papers.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** (AGR*2470 or BOT*2100), (MBG*2040 or MBG*2400)

**Department(s):** Department of Plant Agriculture

#### PBIO*4290 Cannabis Production W (3-0) [0.50]
This course covers the essential biology and biochemistry of cannabis (Cannabis sativa), as well as the science and technologies of propagation, cultural management and production, postharvest storage and processing of the plant, and the potential environmental impacts and related remediation technologies. It will also discuss the history of cultivation and uses of the plant, and current legislation of cannabis production and consumption in different cultures/countries. Students will learn through lectures (including guest lectures), hands-on laboratory practices, site visits, literature research and presentations, and group discussions.

**Prerequisite(s):** 14.50 credits including CHEM*1040, ENVS*3300, (ENVS*2040 or ENVS*3210)

**Department(s):** Department of Plant Agriculture

#### PBIO*4530 Plants and Environmental Pollution W (3-0) [0.50]
This course analyzes the environmental pollution effects on physiological and ecological processes of plants, in both managed and unmanaged ecosystems. Pollutants under study include contaminants of air (such as ozone, sulphur dioxide, NOx) and soil (such as metals). This course also covers how to use plants to improve air (both indoor and outdoor), water and soil environment. The format includes both lecture and presentation/discussion of current and historical peer-reviewed literature.

**Prerequisite(s):** (1 of BIOL*2060, BOT*2100, ENVM*1200, ENVS*2040, ENVS*2330, PBIO*3110), CHEM*1040

**Department(s):** School of Environmental Sciences

#### PBIO*4750 Genetic Engineering of Plants W (3-3) [0.50]
This course provides an examination and discussion of the principles, protocols and applications of molecular biology and transformation technology to the genetic improvements of plants.

**Prerequisite(s):** (AGR*2470 or BOT*2100), (MBG*2040 or MBG*2400)

**Department(s):** Department of Plant Agriculture
Political Science

Department of Political Science

For courses without semester designations, please check with the department. Advance schedules are available in the department.

The department works in cooperation with the department of Political Science at the University of Waterloo to offer courses via the video link classroom. These courses are identified by the designation LINK in their course description. Further information can be obtained from the department.

POLS*1150 Understanding Politics F,W (3-1) [0.50]
This is the recommended introductory course for students intending to pursue a specialization in Political Science. An introduction to the basic concepts of politics, such as liberty, equality, social justice, constitutionalism, sovereignty, federalism, parliamentary versus presidential government. The course will emphasize the meaning and use of these terms within Canada in the context of other political systems.

Restriction(s): POLS*1000 , POLS*1300
Department(s): Department of Political Science

POLS*1500 World Politics F (3-0) [0.50]
An examination of the fundamental patterns of international politics, focusing especially on the major issues and contemporary events at the root of international conflict. As well, the reality of globalization and interdependence is assessed in terms of the alternative patterns of international cooperation in the contemporary world.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Political Science

POLS*2000 Political Theory F (3-0) [0.50]
A study of the philosophic and ideological developments which have led to the emergence of the modern state and contemporary politics.

Offering(s): Offered through Distance Education format only.
Restriction(s): PHIL*2280
Department(s): Department of Political Science

POLS*2080 Development and Underdevelopment F (3-0) [0.50]
An examination of the politics of development, distribution and conflict in Africa, Asia, the Middle East and the Americas from a comparative and international perspective.

Offering(s): Last offering - Fall 2020
Department(s): Department of Political Science

POLS*2100 Comparative Politics W (3-0) [0.50]
An examination of the evolution, purposes, structures and functions of the state in relation to the economy and civil society.

Department(s): Department of Political Science

POLS*2150 Gender and Politics W (3-0) [0.50]
This course introduces students to competing approaches to gender and politics. Students will examine the interrelationship of gender, politics and the state, focusing on its implications for political mobilization, representation and participation, public policy, global gender issues in international relations, and cultural and regional differences in gender politics. The course provides the student with the conceptual and analytical tools for upper-year courses on politics in general and on gender, sexuality and politics in particular.

Department(s): Department of Political Science

POLS*2200 International Relations F (3-0) [0.50]
An introduction to basic theories and concepts in the study of international relations, including an analysis of power, national interest, security, survival, nationalism, sovereignty, decision-making, interdependence, integration, and transnationalism.

Department(s): Department of Political Science

POLS*2230 Public Policy F,W (3-0) [0.50]
The course introduces students to public policy, including the differences between applied and explanatory policy analyses, within the larger context of politics and government. Case studies of different policy areas are used to illustrate the challenges of developing, implementing, and explaining policy in various (and often interrelated) contexts from the local to the global.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits
Department(s): Department of Political Science

POLS*2250 Public Administration and Governance W (3-0) [0.50]
The course explores, from both practical and theoretical perspectives, planning and implementation of programs and services through government departments and agencies and “alternative” processes and structures, sometimes involving non-governmental actors. The course critically evaluates the changing role of bureaucracy; financial and human resource management; and the evolving concepts of responsibility and accountability.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 2.00 credits
Department(s): Department of Political Science

POLS*2300 Canadian Government and Politics F,W (3-0) [0.50]
This course explores the core institutions of Canadian government, including parliamentary government, federalism, the Charter of Rights and Freedoms and electoral systems. How these institutions shape and are shaped by political parties and social forces, as well as current issues like Quebec nationalism, identity politics and Aboriginal governance, are covered.

Offering(s): Also offered through Distance Education format.
Department(s): Department of Political Science

POLS*2350 Law from a Political Science Perspective F (3-0) [0.50]
This course will consider law as both the output of political action and as the structure in which political action occurs. It will introduce students to core legal concepts, explore the impact of law on private and public actors, and help students develop legal research skills.

Prerequisite(s): 2.00 credits
Department(s): Department of Political Science

POLS*2650 Political Inquiry and Research Methods F (3-0) [0.50]
This course offers an introduction to the principles of inquiry in political science. Students will study the crucial components of research and engage subjects such as theorization, research ethics, conceptualization, operationalization, research design, case selection, and both quantitative and qualitative methods of data collection.

Prerequisite(s): 4.00 credits including POLS*1150
Restriction(s): POLS*3180
Department(s): Department of Political Science

POLS*3000 Politics of Africa U (3-0) [0.50]
Africa in the 20th Century has been the scene of rapid political and economic change. This course analyzes African politics in the light of contemporary problems of development and modernization.

Prerequisite(s): 1 of IDEV*2000, POLS*2080, POLS*2100
Department(s): Department of Political Science

POLS*3050 Canadian Campaigns & Elections W (3-0) [0.50]
This course provides an introduction to the electoral process in Canada. It will explore factors that explain citizens’ vote choices and the strategies used by candidates and their campaigns to win these votes. The course integrates literature on the electoral system, campaign financing, political parties, political communication, and voting behaviour.

Prerequisite(s): POLS*1400 or POLS*2300
Department(s): Department of Political Science

POLS*3060 Politics of the Middle East and North Africa U (3-0) [0.50]
Students will examine the political dynamics of selected states and societies (e.g. Egypt, Syria, Saudi Arabia, Iran, Israel, Jordan and Algeria) in the Middle East and North Africa (MENA). Issues to be covered: the impact of early Middle Eastern/North African history upon today's politics; class structures in the MENA countries and their impact on politics; the rise of Arab nationalism; Zionism; the politics of oil; the status of women; the political impact of economic restructuring; Islamic movements; state-building; and political liberalization and democratization in the Middle East and North Africa.

Prerequisite(s): 1 of IDEV*2000, POLS*2080, POLS*2100
Department(s): Department of Political Science

POLS*3080 Politics of Latin America U (3-0) [0.50]
An exploration of Latin American politics from a multidimensional perspective. It analyzes the interaction among contemporary political structures, ideologies and processes in the context of socio-economic change.

Prerequisite(s): 1 of IDEV*2000, POLS*2080, POLS*2100
Department(s): Department of Political Science

POLS*3130 Law, Politics and Judicial Process U (3-0) [0.50]
This course emphasizes the study of the judicial system as a branch of government and highlights the interaction between the judiciary, law, the political process and public policy. Issues such as judicial selection and Charter of Rights decisions by courts will be explored. Comparisons with the judicial process in other countries will supplement the focus on the Canadian judicial process.

Prerequisite(s): 1 of POLS*2350, POLS*2250, POLS*2300
Department(s): Department of Political Science

Revision: 2020-2021 Undergraduate Calendar
POLS*3140 Canadian Charter of Rights and Freedoms W (3-0) [0.50]
This course examines the legal and political effects of the Canadian Charter of Rights and Freedoms. Issues to be examined may include the Charter’s influence on Canadian political culture and identity, interest groups and social movements, the power of the courts, and public policy. Analysis of specific Charter sections and judicial decisions along with comparisons to other countries will be used to aid the analysis.
Prerequisite(s): POLS*2300 or POLS*2350
Department(s): Department of Political Science

POLS*3160 Global Gender Justice F (3-0) [0.50]
This course will introduce students to theories and concepts of gender justice and women’s political empowerment in the Global South, the Global North, and across borders. It will also examine selected topics and cases such as political representation, gender and culture, religion, nationalism, gender and disability, household authority, and reproductive rights.
Prerequisite(s): POLS*2080 or POLS*2100
Department(s): Department of Political Science

POLS*3210 The Constitution and Canadian Federalism S,W (3-0) [0.50]
Canada's constitution and its federal system lie at the heart of the ongoing crisis facing the Canadian Confederation. This course examines the major features of our constitutional development, how the current system of intergovernmental relations has evolved, and the challenges posed by Canada’s cultural diversity, pressures for decentralisation, and the maintenance of national sovereignty.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): HIST*2600 or POLS*2300
Department(s): Department of Political Science

POLS*3230 Modern Political Thought W (3-0) [0.50]
This course explores the impact of modern science and technology, and its impact on the western tradition of justice from the seventeenth century to the twentieth century. It will explore this theme in writers such as Thomas Hobbes, Jonathan Swift, J-J Rousseau, Edmund Burke, Friedrich Nietzsche and George Grant. The exact selection of thinkers will vary from year to year and students are advised to check the course outline.
Prerequisite(s): POLS*2000 or POLS*3280
Restriction(s): POLS*3021
Department(s): Department of Political Science

POLS*3250 Public Policy: Challenges and Prospects F (3-0) [0.50]
This course covers the dominant theories that explain the origins and character of public policy in Canada, and other countries. The focus will be on both governmental and nongovernmental actors.
Prerequisite(s): POLS*2230 or POLS*2250
Department(s): Department of Political Science

POLS*3270 Local Government in Ontario U (3-0) [0.50]
Municipal governments are major spenders of public funds in Canada, and are also the level of government closest to the people. In this course, students will examine the major problems confronting urban government in Ontario.
Prerequisite(s): 7.50 credits
Department(s): Department of Political Science

POLS*3300 Governing Criminal Justice U (3-0) [0.50]
The course provides an overview of the policy process and outcomes of the Canadian criminal justice system. Particular emphasis is placed on examining, using various public policy and public management perspectives, the practices and interactions of governmental agencies within the system, such as police agencies and boards, departments of Justice, Solicitor-General, corrections and parole agencies, courts and the legal profession.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 1 of POLS*2350, POLS*2250, POLS*2300
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*3320 Politics of Aid & Development F (3-0) [0.50]
This course examines the motivations and mechanisms by which industrialized states have designed and implemented foreign aid programs and policy, primarily since the end of the Second World War. Particular emphasis will be placed on the role of multilateral, bilateral and nongovernmental organizations in the delivery of development assistance and humanitarian relief.
Prerequisite(s): IDEV*2000 or POLS*2080
Department(s): Department of Political Science

POLS*3370 Environmental Polities and Governance S,F (3-0) [0.50]
This course examines environmental politics and governance in Canada as well as in comparative and international contexts. This is accomplished by surveying how various political, legal, administrative, and private-public actors and processes influence the development and implementation of environmental policy.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 7.50 credits
Department(s): Department of Political Science

POLS*3410 U.S. Politics and Government U (3-0) [0.50]
This course involves a treatment of the basic principles and institutions of national government and politics in the United States as well as the making and execution of public policy at the national and state levels.
Prerequisite(s): POLS*2100 or POLS*2300
Department(s): Department of Political Science

POLS*3440 Corruption, Scandal and Political Ethics F (3-0) [0.50]
This course will introduce students to the phenomenon of political corruption and the study of its incidence. Attention will be paid to historical examples, contemporary scandals, and analytical articles, dealing with the nature, causes and effects, and proposed cures of political corruption, and the ethical dilemmas inherent in political life.
Offering(s): Also offered through Distance Education format.
Prerequisite(s): 5.00 credits
Department(s): Department of Political Science

POLS*3450 European Governments and Politics F (3-0) [0.50]
Europe has forged a new form of political organization, the European Union, in addition to its variety of national democratic forms. This course offers a comparative examination of selected national governments, as well as an exploration of this new supra-national organization.
Prerequisite(s): 4.00 credits including 1 of EURO*1050 , POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3470 Business-Government Relations in Canada U (3-0) [0.50]
The public and private sectors in Canada have become more and more interrelated in recent years as evidenced by tax and expenditure policies, the role of regulation and public enterprise, and the increasing emphasis on consultation and co-ordination. This course examines the evolving relationship between governments and the private sector in Canada, including business (both large and small), organized labour, specific sectors such as agriculture and consumer affairs and voluntary organizations.
Prerequisite(s): POLS*1400 or POLS*2250
Department(s): Department of Political Science

POLS*3490 Conflict and Conflict Resolution F (3-0) [0.50]
This course will examine the growing body of literature which considers violent conflict and its management. Materials are organized to reflect the trajectory of many contemporary conflicts: from explanations for violence, to identifying conditions and means to resolve conflict and, finally, to post-conflict governance.
Prerequisite(s): 1 of POLS*1500, POLS*2100, POLS*2200
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*3510 Quantitative Methods of Data Analysis W (3-0) [0.50]
This course examines quantitative research methods of data analysis used in political science. Students learn how to apply basic descriptive and inferential statistical procedures to research political problems and test hypotheses. In lab, students will acquire the skills to perform data analysis
Prerequisite(s): 1 of POLS*2650, POLS*3180, SOAN*2120
Restriction(s): Registration in Criminal Justice & Public Policy or Political Science (major, minor or area of concentration) or International Development (major only).
Department(s): Department of Political Science

POLS*3670 Comparative Public Policy F (3-0) [0.50]
This course examines the political factors that shape the policymaking process. Using the major theoretical perspectives, the course compares public policies in different countries. Empirically, the focus is on a variety of pressing issues that societies currently face.
Prerequisite(s): 1 of POLS*2080, POLS*2100, POLS*2230
Department(s): Department of Political Science
XII. Course Descriptions, Political Science

POLS*3710 Politics and Sexuality U (3-0) [0.50]
Sexuality is treated as a subject for political theory from a number of critical and interdisciplinary perspectives. The course examines the relationship between sexuality and politics by analyzing the dynamics of power in the context of sexuality.
Prerequisite(s): POLS*2000 or PHIL*2060
Department(s): Department of Political Science

POLS*3790 International Political Economy W (3-0) [0.50]
This course examines major features of the contemporary international political economy, treating major theories and concepts within this approach to international relations (hegemony, globalization, interdependence, world systems theory, etc.) and focusing on the operation of key international institutions and regimes (i.e. communications, trade and transport policy).
Prerequisite(s): 1 of IDEV*2000, IDEV*2010, IDEV*2500, POLS*2080, POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3850 Experiential Learning in Political Science U (3-0) [0.50]
This course allows students to reflect upon their involvement in some form of politically related activity, including simulations, volunteer programs, or internship work with government or non-government organizations. The student must find a faculty member from the Department of Political Science willing to act as a supervisor for the course. See the Political Science website for the learning contract and other requirements that must be completed in advance of registering for this course.
Prerequisite(s): Minimum of 10.00 credits, 2.00 of which must be in Political Science.
Restriction(s): Approval of the experience and evaluation criteria by the Undergraduate Committee of the Department of Political Science. Instructor consent required.
Department(s): Department of Political Science

POLS*3890 Government and Politics of India W (3-0) [0.50]
The course is designed to provide a survey of the history, society, culture, politics, government, bureaucracy and foreign relations of India.
Prerequisite(s): 1 of POLS*2080, POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3920 Politics of China F (3-0) [0.50]
This course is a detailed study of the political history of modern China and its current politics. The main objective is to assess the extent to which the Chinese Communist Party has fulfilled its mandate, which is to build a sovereign and united China as well as to modernize the country within a socialist framework.
Prerequisite(s): 1 of POLS*2080, POLS*2100, POLS*2200
Department(s): Department of Political Science

POLS*3960 Selected Topics in Political Science S,F,W (3-0) [0.50]
Readings and research in selected areas of the discipline not covered by regular course offerings. Students present a proposal and seek approval from a member of the department in the semester previous to enrolment in this course. The method of course presentation, emphasis, and evaluation are at the discretion of the instructor.
Prerequisite(s): 1.50 credits at the 3000 level in Political Science or equivalent
Restriction(s): Instructor consent required.
Department(s): Department of Political Science

POLS*4030 Contemporary Political Theory U (3-0) [0.50]
This course provides an analysis of selected theories and political issues discussed by prominent 20th-Century thinkers. These contemporary works will be examined as part of the long tradition of political discourse dating back to the classical period.
Prerequisite(s): POLS*2000 and at least 1.00 credits at the 3000 level in the Political Thought stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods.
Department(s): Department of Political Science

POLS*4050 Advanced Topics in Law and Politics U (3-0) [1.00]
This course explores advanced topics in law and politics depending on the interests of the instructor. Potential topics include investigating the law and politics of social change or analyzing debates about the political power of courts in Canada or in comparative perspectives.
Prerequisite(s): POLS*3130, (0.50 credits at the 3000-level in the Law, Policy and Governance stream or the Comparative Politics stream).
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods.
Department(s): Department of Political Science

POLS*4060 Advanced Topics in Law and Politics F,W (3-0) [0.50]
This advanced lecture course explores topics in law and politics. Specific topics vary depending on the interests of the instructor. Potential topics include the relationship between law and social change, human rights, the relationship between law and power, judicial decision-making, and the relationship between law, class, gender, race, and sexuality.
Prerequisite(s): 1 of POLS*2350, POLS*3130, POLS*3140, POLS*3300
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4070 Courts and Parliament F (3-0) [1.00]
The course critically examines the complex relationship between the judiciary and representative institutions. By comparing the treatment of current political controversies (assisted suicide, prostitution, drug treatment), students will better appreciate the often-subtle exchanges between the two institutions and further enhance their research abilities in regards to both legal and legislative processes.
Prerequisite(s): 1 of POLS*2350, POLS*3130, POLS*3300
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4100 Women, Justice and Public Policy U (3-0) [1.00]
This course will use gender-based analysis in examining a series of justice and public policy issues affecting the lives of women, including equality rights, pay and employment equity, domestic violence, sexual assault, family policy, health care policy, and pornography. How do current policies that developed out of neoliberalism influence the lives of women in different ways than men? How can/should they be changed to recognize the different life experiences of women as distinguished from men? The primary focus of the topics covered in this course will be Canadian, although the experiences in other countries will be covered, particularly as it relates to "best practices," where appropriate.
Prerequisite(s): 2 of POLS*2250, POLS*2300, POLS*3250 and 1.00 credits in the Public Policy, Governance and Law or Canadian Politics.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4140 Conceptions of Canada W (3-0) [1.00]
This course will explore evolving conceptions of Canadian identity and nationalism through consideration of political culture, institutions and constitutional arrangements. Possible topics include: multiculturalism, Aboriginal identity and community, Quebec nationalism, social citizenship, rights and representation, as well as Canada's global role and significance.
Prerequisite(s): POLS*2300 and 1.00 credits at the 3000 level in the Canadian Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4150 Advanced Lecture in Conceptions of Canada W (3-0) [0.50]
This advanced lecture course will explore evolving conceptions of Canadian identity and nationalism through a consideration of political culture, institutions and constitutional arrangements. Possible topics include: multiculturalism, Aboriginal identity and community, Quebec nationalism, social citizenship, rights and representation, as well as Canada's global role and significance.
Prerequisite(s): POLS*2300, (2 of HIST*3160, POLS*3050, POLS*3210, POLS*3270, POLS*3470)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science
POLSc*2200 International Political Economy U (3-0) [1.00]
This course relies on theoretical approaches in IPE to examine relationships between politics and economics across national and regional levels. The evolution of the global political economy and its governance structures is explored, as well as contemporary debates about globalization and state and non-state actors’ responses. Issue-areas may include: money and power, technology, trade, development and the environment.
Prerequisite(s): POLSc*2250 and 1.00 credits at the 3000 level in the Political Science stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*2250 Topics in Public Management W (3-0) [1.00]
This course will examine various topics related to governance, such as public management reform, public sector leadership, third sector organizations or budgeting and human resources.
Prerequisite(s): POLSc*2250 and 1.00 credits at the 3000 level in the Public Policy, Governance and Law stream or the Canadian Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*2420 Topics in Public Policy U (3-0) [1.00]
This course will examine various public policy issues such as social policy or health care policy in a Canadian or comparative context.
Prerequisite(s): (2 of POLSc*2200, POLSc*2300, POLSc*3250), 1.00 credits in the Public Policy, Governance and Law stream or the Canadian Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*4270 Advanced Lecture in Public Management F (3-0) [0.50]
This advanced lecture course examines various topics related to governance, such as public management reform, public sector leadership, third sector organizations, or budgeting and human resources.
Prerequisite(s): POLSc*2250, (2 of HIST*3160, POLSc*3050, POLSc*3130, POLSc*3210, POLSc*3250, POLSc*3270, POLSc*3300, POLSc*3370, POLSc*3440, POLSc*3470, POLSc*3670)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Students may not receive credit for both POLSc*4250 and POLSc*4270.
Department(s): Department of Political Science

POLSc*4280 Advanced Lecture in Public Policy W (3-0) [0.50]
The advanced lecture course will examine various public policy issues, such as social policy, health care policy, environmental policy, or economic policy in a Canadian or comparative context.
Prerequisite(s): (2 of POLSc*2250, POLSc*2300, POLSc*3250), (2 of HIST*3160, POLSc*3050, POLSc*3130, POLSc*3210, POLSc*3270, POLSc*3300, POLSc*3370, POLSc*3440, POLSc*3470, POLSc*3670)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*4300 Human Rights, Ethics, and Development W (3-0) [1.00]
This course will examine the political and ethical consequences of adopting a human rights framework in national and international contexts by both state and non-state actors. This subject will be explored from a range of historical, theoretical and practical perspectives.
Prerequisite(s): (1 of POLSc*2080, POLSc*2100, POLSc*2200), 1.00 credits at the 3000 level in Political Science.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*4310 Advanced Lecture in Women, Justice and Public Policy F/W (3-0) [0.50]
This advanced lecture course will use gender-based analysis in examining a series of justice and public policy issues affecting the lives of women, including equality rights, pay and employment equity, domestic violence, sexual assault, family policy, health care policy and pornography. The primary focus of the topics covered in the course will be Canadian, although the experiences of women in other countries will be covered, particularly as it relates to "best practices" where appropriate.
Prerequisite(s): (2 of POLSc*2250, POLSc*2300, POLSc*2350, POLSc*3250), (2 of HIST*3160, POLSc*3050, POLSc*3130, POLSc*3210, POLSc*3270, POLSc*3300, POLSc*3370, POLSc*3440, POLSc*3470, POLSc*3670)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*4320 Advanced Lecture on Human Rights, Ethics and Development F (3-0) [0.50]
This advanced lecture course examines the political and ethical consequences of adopting a human rights framework in national and international contexts by both state and non-state actors. This subject will be explored from a range of historical, theoretical and practical perspectives.
Prerequisite(s): (1 of POLSc*2080, POLSc*2100, POLSc*2200), 1.00 credits at the 3000 level in Political Science.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*4340 Nationalism, State-building and Identity U (3-0) [1.00]
The course examines the role of nationalism in contemporary politics. Nationalism as such is understood as a major political force in state-building. Its impact on both global and national politics is assessed in relation to other forms of identity-based politics.
Prerequisite(s): (1 of POLSc*2000, POLSc*2100, POLSc*2200), (0.50 credits at the 3000 level in the Comparative Politics stream or 0.50 credits at the 3000 level in the International Relations and Global Studies stream).
Department(s): Department of Political Science

POLSc*4710 Topics in Comparative Politics U (3-0) [1.00]
This course considers theories and problems in comparative politics and government in developing and industrialized countries. The geographical and theoretical focus of the course will reflect the interests of the instructor.
Prerequisite(s): (POLSc*2080 or POLSc*2100) and 1.00 credits at the 3000 level in the Comparative Politics stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLSc*4720 Topics in International Relations U (3-0) [1.00]
This course considers theories and problems in the field of International Relations. The theoretical and/or geographical focus of the course will reflect the interests of the instructor.
Prerequisite(s): POLSc*2200 and 1.00 credits at the 3000 level in the International Relations and Global Studies stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science
POLS*4730 International Relations of the Middle East W (3-0) [1.00]
This course is designed as an advanced introduction to the international relations of the Middle East. The course focuses on theories of international relations and their applicability to specific case studies of Middle Eastern politics. The course provides a critical examination of conflicts in the region, and contextualizes those conflicts within both realist and neo-realist theories of international relations. The course also provides a critical examination of the Arab-Israeli crisis, with a focus on peace negotiations. The course is offered as a seminar, with a heavy emphasis on class participation. Students participate in a simulation of an Arab-Israeli peace negotiation.
Prerequisite(s): POLS*2200, (1.00 credit at the 3000 level in the Comparative Politics and/or International Relations and Global Studies streams)
Restriction(s): POLS*4910
Department(s): Department of Political Science

POLS*4740 Advanced Topics in Rights and Liberties F (3-0) [1.00]
The course explores rights and liberties from various perspectives depending on the interests of the instructor. Potential topics include exploring the political, social, and legal factors and theories that explain the development of rights and liberties; rights and liberties in a comparative and international context; or the philosophical and policy debates surrounding rights and liberties.
Prerequisite(s): (POLS*3130 or POLS*3210) and at least 1.00 credits at the 3000 level in the Public Policy, Governance and Law stream.
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4760 Advanced Lecture in Comparative Politics W (3-0) [0.50]
This advanced lecture course examines theories and problems in comparative politics and government in developing and industrialized countries. The geographical and theoretical focus of the course will vary depending on the interests of the instructor.
Prerequisite(s): (POLS*2080 or POLS*2100), (2 of POLS*3000, POLS*3060, POLS*3080, POLS*3160, POLS*3220, POLS*3410, POLS*3440, POLS*3450, POLS*3670, POLS*3890, POLS*3920)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4770 Advanced Lecture in International Relations F (3-0) [0.50]
This advanced lecture course considers rights and liberties from various perspectives depending on the interests of the instructor. Potential topics include exploring the political, social, and legal factors and theories that explain the development of rights and liberties; rights and liberties in a comparative and international context; or the philosophical and policy debates surrounding rights and liberties.
Prerequisite(s): POLS*2200, (2 of POLS*3160, POLS*3320, POLS*3490, POLS*3790)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4780 Advanced Lecture in Rights and Liberties F,W (3-0) [0.50]
This lecture course explores rights and liberties from various perspectives depending on the interests of the instructor. Potential topics include exploring the political, social, and legal factors and theories that explain the development of rights and liberties; rights and liberties in a comparative and international context; or the philosophical and policy debates surrounding rights and liberties.
Prerequisite(s): POLS*2350, (1 of POLS*3130, POLS*3210, POLS*3300, POLS*3310, POLS*33140)
Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the departmental website for more information.
Department(s): Department of Political Science

POLS*4900 Special Topics Seminar in Political Science S,F,W (3-0) [1.00]
This seminar-based course explores a current issue in Political Science. Topics will vary from year to year and will reflect the research and teaching interests of the faculty member directing the course. Information on the topic of the current offering can be found on the departmental website.
Prerequisite(s): 14.00 credits, including 1.00 credits in Political Science at the 3000 level.
Department(s): Department of Political Science

POLS*4910 Selected Topics in Political Science II S,F,W (3-0) [0.50]
This course provides for independent reading and research in selected areas of the discipline not covered by regular course offerings. Prior to enrollment in the course, approval must be obtained from a member of the department willing to supervise the research. Students should approach potential supervisors with a proposal for readings and research, which may include reflection and expansion on a subject matter addressed in previous course assignments.
Prerequisite(s): 1.50 credits at the 3000 level in Political Science or equivalent
Restriction(s): Instructor consent required.
Department(s): Department of Political Science

POLS*4930 Selected Topics in Political Science S,F,W (3-0) [1.00]
This course provides for independent reading and research in selected areas of the discipline not covered by regular course offerings. Prior to enrollment in the course, approval must be obtained from a member of the department willing to supervise the research. Students should approach potential supervisors with a proposal for readings and research, which may include reflection and expansion on a subject matter addressed in previous course assignments.
Prerequisite(s): 1.50 credits at the 3000 level in Political Science or equivalent
Restriction(s): Instructor consent required.
Department(s): Department of Political Science

POLS*4970 Honours Political Science Research I S,F,W (3-0) [0.50]
This is Part I of the Honours Essay. Students complete the necessary reading and research for their Honours Essay under the supervision of a department advisor. A research proposal is expected by the end of the semester. Political science majors who wish to pursue an honours thesis must register in this course in their 7th semester. Student selection of an approved subject area and instructor must be completed in the semester previous to enrolment in this course.
Prerequisite(s): 70% average in all POLS courses. Recommendation: Students with less than a 75% average are advised not to take this course.
Restriction(s): Instructor consent required.
Department(s): Department of Political Science

POLS*4980 Honours Political Science Research II S,F,W (3-0) [0.50]
This is Part II of the Honours Essay. Students organize and write their essays under the supervision of their department advisor. A research proposal is expected by the end of the semester. Political science majors who wish to pursue an honours thesis must register in this course in their 8th semester.
Prerequisite(s): POLS*4970
Restriction(s): Instructor consent required.
Department(s): Department of Political Science

<tr>
<td>POPM*4040</td>
<td>Epidemiology of Food-borne Diseases F (3-0) [0.50]</td>
<td>This course examines the epidemiology and prevention of food-borne infections and intoxications, including those of both microbiological and chemical origin. Drawing on outbreak investigations, surveys, risk assessments, government surveillance systems and basic research, the biological, ecological, socio-economic and public health context of these diseases will be discussed.</td>
<td><strong>Prerequisite(s):</strong> 1 of FOOD<em>3230, POPM</em>3240 <strong>Restriction(s):</strong> FOOD*4210. <strong>Department(s):</strong> Department of Population Medicine</td>
</tr>
<tr>
<td>POPM*4230</td>
<td>Animal Health F (3-0) [0.50]</td>
<td>This course examines the causes and effects of important diseases of food animals in Canada, with a focus on dairy cattle. Elements of physiology, epidemiology, microbiology, nutrition, and production management are integrated into a health management approach emphasizing disease prevention. The course is directed at senior undergraduate students with interest in and knowledge of, food animal production agriculture.</td>
<td><strong>Offering(s):</strong> Offered in-class in even-numbered years. Offered Distance Education format in odd-numbered years. <strong>Prerequisite(s):</strong> ANSC<em>2340 or ANSC</em>3080 <strong>Restriction(s):</strong> This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. ### Portuguese

**PORT*1100 Introductory Portuguese (Brazilian Culture) F (3-0) [0.50]**

This course provides the basics of spoken and written Portuguese for students with no previous studies in the language. The learning context will be present-day Brazilian culture.

*Department(s):* School of Languages and Literatures

**PORT*1110 Intermediate Portuguese (Brazilian Culture) W (3-0) [0.50]**

This course is a continuation of Introductory Portuguese with emphasis on oral work. The learning context will be present-day Brazilian culture.

*Prerequisite(s):* PORT*1100

*Restriction(s):* Instructor consent required.

*Department(s):* School of Languages and Literatures
**Psychology**

**Department of Psychology**

Psychology majors are encouraged to participate in the ongoing research of the department, through independent study courses: PSYC*3240, PSYC*4240, PSYC*4870, and PSYC*4880.

The required number of Psychology credits for the Major is 9.00. Students may choose to take up to an additional 2.00 credits in Psychology. The maximum number of credits at each level is as follows:

- 1000 level courses: no cap
- 2000 level courses: 3.50 credits
- 3000 level courses: 3.50 credits
- 4000 level courses: 3.00 credits

_Students wishing to take a 2000, 3000 or 4000 level course without having completed the appropriate prerequisites must receive permission of the Psychology Academic Advisor and Manager who will determine whether the student has the required background for the course._

**Honours Courses:** Courses designated with (H) are for students in Psychology Honours programs. These include: B.A. Honours Psychology (PSYC, PSYC:C) major or minor, B.A. Information Systems and Human Behaviour (ISHB) major, B.Sc. Psychology: Brain and Cognition (PBC), major or minor, and the Neuroscience (NEUR) major or minor. A cumulative average of at least 70% in all course attempts in Psychology or registration in the ISHB major, NEUR minor, or PBC major or minor is required to enroll in H designated courses.

_For courses without semester designations, please check with the department. The remaining courses will normally be offered as indicated. Advance schedules are available in the department._

---

**PSYC*1000 Introduction to Psychology S.F.W (3-0) [0.50]**

This is an introduction to the content and methods of psychology. It will cover the major areas such as neuroscience, sensation and perception, learning, cognition, motivation, human development, personality, psychopathology and its treatment, and social psychology.

**Offering(s):** Also offered through Distance Education format.

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s):** Department of Psychology

---

**PSYC*1010 Making Sense of Data in Psychological Research F.W (3-0) [0.50]**

This course introduces research designs and quantitative approaches used in psychological science, with an emphasis on conceptual understanding. Specific topics include distributions, meta-analysis, confidence intervals and p-values, effect size, and regression, as well as the differences between descriptive, correlational, and experimental research designs.

**Prerequisite(s):** PSYC*1000

**Restriction(s):** STAT*2040, STAT*2060, STAT*2080, STAT*2120 This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s):** Department of Psychology

---

**PSYC*1500 Foundational Skills for Psychology F,W (3-0) [0.50]**

This course is designed to help Psychology majors to optimize their learning in the Psychology program. The primary focus is on individual skill development with respect to academic learning, written and oral communication, career planning, and working in groups. Specific topics will vary by instructor.

**Co-requisite(s):** 1 of PSYC*1000, PSYC*1100, PSYC*1200

**Restriction(s):** Restricted to Psychology majors BAH, BAH:C, BSC:PBC, and Psychology Area of Concentration

**Department(s):** Department of Psychology

---

**PSYC*2020 Abnormal Psychology W (3-0) [0.50]**

This course is an introduction to abnormal psychology including a multidimensional conceptualization of mental health, assessment, diagnosis, and treatment. Common psychological disorders will be explored with respect to etiology, assessment, current diagnosis and classification, as well as treatment. Emphasis will be given to broad empirical research and to the experiences of individuals with these disorders.

**Prerequisite(s):** PSYC*1000

**Restriction(s):** PSYC*3390, This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s):** Department of Psychology

---

**PSYC*2070 Teams, Leadership, and Professional Behaviour F,W (3-0) [0.50]**

This course will focus on the theory and practical application of Organizational Psychology with regard to leadership, teams, and professional behaviour. The course will provide students with opportunities to assess their leadership and teamwork skills, as well as active learning activities to practice these skills. Key topics will include work motivation, time management, personal organizational skills, goal setting, conflict management, social influence and stress management.

**Prerequisite(s):** PSYC*1500 or 4.00 credits in Psychology

**Restriction(s):** PSYC*3080, Restricted to Psychology majors BAH, BAH:C, BSC:PBC, and Psychology Area of Concentration

**Department(s):** Department of Psychology

---

**PSYC*2310 Social Psychology S.F.W (3-0) [0.50]**

This course introduces students to the field of social psychology. Major topics introduced will include: social influence, social cognition, attitude, stereotype and prejudice, the self, attraction and interpersonal relationships, group processes and intergroup relations. The course also aims for students to use the knowledge acquired to think critically about how their actions and those of others are influenced by social forces. In addition, the course aims to introduce students to the role of culture in shaping thoughts and behaviour and to provide them an opportunity to appreciate diverse perspectives.

**Offering(s):** Also offered through Distance Education format.

**Restriction(s):** 1 of PSYC*1000, PSYC*1100, PSYC*1200

**Department(s):** Department of Psychology

---

**PSYC*2330 Principles of Learning F (3-0) [0.50]**

This course provides a detailed description of principles and concepts of learning and motivation, as well as an introduction to their underlying neurobiological mechanisms. Through the examination of empirical evidence in the fields of Psychology and Behavioural Neuroscience, this course offers a comprehensive description of the role of conditioning in normal and abnormal behaviours.

**Prerequisite(s):** PSYC*1000

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s):** Department of Psychology

---

**PSYC*2360 Psychological Methods and Statistics F.W (3-0) [0.50]**

This course builds on students’ understanding of basic psychological research methods and statistics, with an emphasis on designing, interpreting, and communicating research. Topics covered throughout the term may include: research ethics, the scientific method, qualitative and quantitative measures, reliability and validity, complex research designs using multiple predictor or independent variables, and the reading and writing of psychological journal articles.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** (1 of PSYC*1000, PSYC*1100, PSYC*1200), (1 of PSYC*1010, PSYC*2010, STAT*2040)

**Department(s):** Department of Psychology

---

**PSYC*2390 Sensation and Perception W (3-0) [0.50]**

The course objective is to consider the processes of sensory inputs and perception. Approaches ranging from psychophysiology and cognitive psychology to physiology and anatomy will be used. In considering the psychology of sensation and perception, some of the anatomical and physiological aspects of selected senses will be covered in detail and the roles of experience, organization of inputs, and theories of perception are discussed. Topics to be emphasized will vary with the instructor, but may include ontogenetic development, learning, and modification of inputs and their perception. Students will participate in on-line laboratory demonstrations and experiments. (C)

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 1 of PSYC*1000, PSYC*1100, PSYC*1200

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s):** Department of Psychology

---

**PSYC*2410 Behavioural Neuroscience I F (3-0) [0.50]**

This course is a general introduction to the structure and function of the nervous system. The physiological basis of sensory (input) systems and the motor (output) system are examined as are central physiological bases of processes such as learning and memory.

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):** 1 of PSYC*1000, PSYC*1100, PSYC*1200

**Restriction(s):** This is a Priority Access Course. Some restrictions may apply during some time periods.

**Department(s):** Department of Psychology
**PSYC*2450 Developmental Psychology F (3-0) [0.50]**

This course is an introduction to and an analysis of the major theories of developmental psychology. Emphasis will be placed on the processes of development in the child, including physical growth, perception, cognition, personality and interactions with the social environment. The application of developmental psychology to educational and social issues will be discussed.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 1 of PSYC*1000, PSYC*1100, PSYC*1200

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): Department of Psychology

**PSYC*2650 Cognitive Psychology W (3-0) [0.50]**

This course is an introduction to cognitive processes, including topics in the areas of attention, memory, language and reasoning. Students will be exposed to and participate in on-line laboratory demonstrations and experiments.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 1 of PSYC*1000, PSYC*1100, PSYC*1200

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): Department of Psychology

**PSYC*2740 Personality W (3-0) [0.50]**

This course is a review of the theory, assessment procedures and research findings pertinent to major personality constructs. Personality research, methodology and design will also be covered.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 1 of PSYC*1000, PSYC*1100, PSYC*1200

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): Department of Psychology

**PSYC*3000 Historical and Critical Perspectives on Psychology F,W (3-0) [0.50]**

The purpose of this course is to help students understand the socio-historical and theoretical context of modern psychological research and practice. This includes: 1) evaluating basic assumptions underlying modern psychology by drawing on historical, theoretical and philosophical perspectives, and 2) investigating historical and current controversies within psychology. Topics may include the question of psychology's scientific status, the assumptions embedded in psychological theory and research methodology, social constructionism, free will/agency, and the relations between psychology, power, ethics, and politics.

Prerequisite(s): PSYC*2070, PSYC*2360 (2 of PSYC*2020, PSYC*2310, PSYC*2450, PSYC*2740), (2 of PSYC*2330, PSYC*2390, PSYC*2410, PSYC*2650)

Restriction(s): PSYC*4370, PSYC*4900. Restricted to psychology majors BAH, BAH.C, BSCH.PBC, and Psychology area of concentration

Department(s): Department of Psychology

**PSYC*3020 Psychology of Law U (3-0) [0.50]**

An examination of psychological methods, findings and theories in the study of law. Topics will include the fallibility of the eyewitness; juror decisional processes; credibility of witnesses and attorneys; socialization into legal systems, police behaviour, etc.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 2.50 credits in Psychology or PSYC*2310

Department(s): Department of Psychology

**PSYC*3030 Neurochemical Basis of Behaviour W (3-0) [0.50]**

This course analyses how drugs act on various neurochemical systems to regulate motivation and behaviour. Topics of discussion may include psychopathology and its treatment.

Prerequisite(s): 2.00 credits in Psychology, (1 of BIOM*3090, NEUR*2000, PSYC*2410)

Department(s): Department of Psychology

**PSYC*3100 Evolutionary Psychology F (3-0) [0.50]**

Evolutionary Psychology (EP) offers a Darwinian frame of reference for studying questions about human nature. After reviewing basic material on genetics and natural selection, we will examine and criticize the contribution of EP to the understanding of the various aspects of individual and social behaviour, such as altruism, logic, mate selection, health, morality, aesthetics, and the role of culture.

Offering(s): Offered in even-numbered years.

Prerequisite(s): 2.50 credits in Psychology

Department(s): Department of Psychology

**PSYC*3110 Topics in Health Psychology W (3-0) [0.50]**

This course covers research in health psychology. Possible topics include the interplay of psychosocial factors, behaviour, and physical health; pediatric health psychology; health interventions at the individual, family, group or community levels.

Offering(s): Offered in even-numbered years.

Prerequisite(s): NEUR*2000 or 2.50 credits in Psychology

Department(s): Department of Psychology

**PSYC*3240 Independent Research Project S,F,W (0-6) [0.50]**

This course provides individual students with hands-on experience conducting a research project. Students are supervised directly by a faculty member as they conduct an in-depth investigation of a specific topic within psychology. Typically, the course involves both the practice and reporting of research. Through this experience students will develop a broader appreciation of the relations between knowledge, theory and research while acquiring basic skills in research methodologies and modes of inquiry. In addition, students will develop their written and oral communication skills (e.g., integration of relevant literature, reporting of research). Course registration requires the signature of the Psychology Academic Manager. This signature is contingent upon the student demonstrating they have obtained a faculty supervisor's signature and satisfy the course prerequisites. Please see the Psychology department website for more information.

https://www.uquelearn.ca/psychology/

Prerequisite(s): 2.50 credits in Psychology including PSYC*2360

Equate(s): PSYC*3900

Restriction(s): A minimum grade point average of 75% in Psychology courses.

Instructor consent required.

Department(s): Department of Psychology

**PSYC*3250 Psychological Measurement F,W (3-0) [0.50]**

This course focuses on training students on how to conduct research such that measurement theory guides measure selection and construction. Consequences of measurement theory (reliability/validity) for the accuracy of research findings and interpretation of test scores are also covered. A variety of individual difference variables are examined with an emphasis on how measurement strategies differ depending on the nature of the construct.

Prerequisite(s): PSYC*2360

Restriction(s): Restricted to students in BAH.PSYC, BAH.PSYC:C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum cumulative average of 70% in all Psychology course attempts.

Department(s): Department of Psychology

**PSYC*3270 Cognitive Neuroscience F (3-0) [0.50]**

This course provides an overview of the neural process that support cognitive abilities such as attention, perception, memory, emotion, and reasoning. An emphasis is placed on primary research with the goal of revealing the types of methods that cognitive neuroscientists use, and types of questions that they ask, as they try to understand the relationship between our minds and brains.

Prerequisite(s): 1 of NEUR*2000, PSYC*2390, PSYC*2410, PSYC*2650

Restriction(s): PSYC*4600

Department(s): Department of Psychology

**PSYC*3280 Minds, Brains & Machines U (3-0) [0.50]**

This course will introduce the student to basic issues in cognitive science from philosophical and psychological perspectives. Connectionism, Turing Machines, artificial intelligence, and alternative naturalistic models of the mind will be among the topics explored.

Prerequisite(s): 2.50 credits in Psychology or 3.00 credits in Philosophy

Department(s): Department of Psychology

**PSYC*3290 Conducting Statistical Analyses in Psychology F,W (3-1) [0.50]**

This course focuses on training students in the quantitative analysis and communications skills needed to become a researcher in psychology. Students conduct a correlation-based meta-analysis to help them concretely understand sampling distributions and the difficulties associated with obtaining study results that replicate. This meta-analytic foundation is then leveraged to teach traditional psychological analysis techniques (e.g., t-test, analysis of variance, and bi-variate/multiple regression) with an emphasis on maximizing factors that increase the probability of study findings that replicate. The value of interpreting results using effect sizes with confidence intervals is discussed and the logic of null-hypothesis testing is briefly reviewed.

Prerequisite(s): 2.50 credits in Psychology including PSYC*2360

Restriction(s): PSYC*2400, STAT*2050

Department(s): Department of Psychology
PSYC*3300 Psychology of Gender W (3-0) [0.50]
This course will examine the theories and psychological research that deals with the impact of gender upon people’s lives and behaviour. Topics will include gender-role socialization and stereotypes; gender-related status and power differentials; and gender differences and dynamics in the physiological, intrapsychic, interpersonal, and socio-cultural domains.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.50 credits in Psychology including PSYC*2310
Department(s): Department of Psychology

PSYC*3330 Memory and Attention F (3-0) [0.50]
This course provides an overview of attention and memory: how we prioritize some objects and events over others and how such prior experience influences our subsequent thoughts, feelings and actions. The course will cover what is known about memory and attention from research in the overlapping fields of cognitive psychology, neuropsychology, and cognitive neuroscience.
Prerequisite(s): 2.50 credits in Psychology including PSYC*2650
Department(s): Department of Psychology

PSYC*3350 Cross-Cultural Psychology F (3-0) [0.50]
This course provides an examination of cultural differences from the perspective of psychology, and of individual and group relations within and between culturally diverse societies. The primary goal of this course is to provide a framework and knowledge base with which to understand the various contexts, processes and outcomes of intercultural contact.
Offering(s): Offered in odd-numbered years.
Prerequisite(s): 2.50 credits in Psychology including PSYC*2310
Department(s): Department of Psychology

PSYC*3410 Behavioural Neuroscience II W (3-2) [0.50]
This course will focus on contemporary research and theory related to such selected topics as physiological correlates of memory, learning, motivation, emotion, stress, sensory and motor functions. Both the central and peripheral components of the nervous system will be examined in relation to the above.
Prerequisite(s): NEUR*2000 or PSYC*2410
Restriction(s): Restricted to students in Neuroscience (major or Minor). This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*3450 Social and Personality Development W (3-0) [0.50]
This course is an examination of research, methodological issues and theories concerning personality-social development. Topics may include temperament, imitation, parent-child interaction, and the development of attachments, sex-roles, morality, aggression and pro-social behaviour.
Prerequisite(s): 2.50 credits in Psychology including (FRHD*2270 or PSYC*2450)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): Department of Psychology

PSYC*3470 Putting Psychology to Work W (3-0) [0.50]
This course provides students with the opportunity to prepare for the transition to post-graduate programs and work, by exploring psychology as it relates to work. Topics include: the history of work and industrial psychology, career management, job analysis, recruitment, selection, employment law, compensation and benefits, performance appraisal, training and development, as well as succession planning.
Prerequisite(s): PSYC*2070, PSYC*2360, (2 of PSYC*2020, PSYC*2310, PSYC*2450, PSYC*2740), (1 of PSYC*2330, PSYC*2390, PSYC*2410, PSYC*2650)
Restriction(s): PSYC*3070, Restricted to psychology majors BAH, BAH:C, Psychology area of concentration This is a Priority Access Course. (BAG Psychology area of concentration)
Department(s): Department of Psychology

PSYC*3480 Psychology of Sport U (3-0) [0.50]
This course provides an examination of individual and group behaviour in physical activities and sports. Emphasis will be placed on understanding psychological concepts which are pertinent to sports, e.g., motivation, social and personality development, cognition, leadership and group dynamics.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): PSYC*2310 or PSYC*2740
Department(s): Department of Psychology

PSYC*3490 Social and Organizational Psychology F (3-0) [0.50]
A number of applied issues will be examined from a social and organizational psychological perspective. The topics will include health and well-being; attributions and person perception; intergroup relations and prejudice; and social influence. Students will learn how to apply psychological theories and research to understand and ameliorate applied issues.
Prerequisite(s): 3.00 credits in Psychology including PSYC*2070, PSYC*2310
Restriction(s): PSYC*3080, This is a Priority Access Course. For Psychology majors BAH, BAH:C, BSC: PBC, and Psychology area of concentration
Department(s): Department of Psychology

PSYC*3570 The Psychology of Death and Dying U (3-0) [0.50]
An examination of theory, research, and issues in the psychology of death and dying. Emphasis is upon the cognitive operations used to process information about death and the influence of death constructs in daily life. Topics include the development of death concepts throughout the life-span, death anxiety in society, the needs of the dying person, the psychology of grieving, and unexpected losses such as deaths by suicide or miscarriage.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of FRHD*2270, PSYC*2310, PSYC*2740, PSYC*2450
Department(s): Department of Psychology

PSYC*3800 Psychology and Education U (3-0) [0.50]
The application of psychological principles and techniques to the study of the educational process.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): 1 of FRHD*2270 or PSYC*2450
Department(s): Department of Psychology

PSYC*3850 Intellectual Disabilities U (3-0) [0.50]
This course covers applied and theoretical aspects of intellectual disabilities, and lays a foundation for work in the area of intellectual disabilities.
Offering(s): Offered through Distance Education format only.
Prerequisite(s): FRHD*2270 or PSYC*2450
Department(s): Department of Psychology

PSYC*3910 Psychology Externship F,W,S (0-6) [0.50]
An independent program of study formally integrating the student’s academic study with one or more work experiences, to be decided by the student in consultation with the supervisory faculty (normally the department's co-op coordinator) prior to registration in the course. In order to qualify for this course, the student must be employed in a work setting at the time of registration to help ensure that a suitable project is feasible in the context of a work placement or employment. The department is not responsible for obtaining employment. The course project is aimed at making a significant contribution to the work setting. The student must consult with the supervisory faculty before selecting or registering for the course. (Enrolment is limited. Not open to co-op students.)
Prerequisite(s): PSYC*2070, PSYC*2360, (2 of PSYC*2020, PSYC*2310, PSYC*2450, PSYC*2740), (1 of PSYC*2330, PSYC*2390, PSYC*2410, PSYC*2650)
Restriction(s): Restricted to Psychology majors BAH, BAH:C, Psychology area of concentration. Instructor consent required.
Department(s): Department of Psychology

PSYC*4240 Advanced Independent Research Project S,F,W (3-6) [0.50]
This course provides individual students with hands-on experience conducting a research project. Students are supervised directly by a faculty member as they conduct an in-depth investigation of a specific topic within psychology. Typically, the course involves both the practice and reporting of research. Students will apply the research and communication skills they have acquired through prior coursework in order to work more independently. Course registration requires the signature of the Psychology Academic Manager. This signature is contingent upon the student having obtained a faculty supervisor's signature and satisfy the course prerequisites. Please see the Psychology department website for more information. https://www.guelph.uo.ca/psychology/
Prerequisite(s): 14.00 credits including [(PSYC*2040 or PSYC*3290) 1.00 credits in Psychology at the 3000 level]
Restriction(s): PSYC*4500, PSYC*4510 Restricted to students in BAH,PSYC, BAH,PSYC:B, BAH:ISHB, BSC: PBC or a major or minor in Neurosciences with a minimum grade point average of 75% in all Psychology course attempts. Instructor consent required.
Department(s): Department of Psychology
XII. Course Descriptions, Psychology

PSYC*4310 Advanced Topics in Social and Applied Psychology W (3-0) [0.50]

This is an in-depth examination of specific advances in social psychological research, theory, and/or applications. Selected topic areas may include the psychology of social groups, women's health and well-being, and community interventions. Specific topics, to be announced prior to course selection, will vary according to the interests of the instructor of the course.

Prerequisite(s): 14.00 credits including [PSYC*2310, PSYC*3250, (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): Department of Psychology

PSYC*4330 Industrial/Organizational Psychology F (3-0) [0.50]

Students will examine theoretical and methodological issues in selected topic areas of industrial/organizational psychology. Selected topic areas may include diversity issues, trust and justice, job performance, employment selection, and stress and well-being.

Specific topics, to be announced prior to course selection, will vary according to the interests of the instructor of the course.

Prerequisite(s): 14.00 credits including [PSYC*3250, (1 of PSYC*2070, PSYC*3070, PSYC*3080, PSYC*3490), (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): Department of Psychology

PSYC*4460 Advanced Topics in Clinical and Applied Developmental Psychology W (3-0) [0.50]

This course covers issues and theories in clinical or applied developmental psychology. Topics may include pediatric (child health) psychology, attachment relationships, non-suicidal self-injury, and aggression. The selected topic, to be announced prior to course selection, will vary on the basis of the expertise of the instructor.

Prerequisite(s): 14.00 credits including [PSYC*3250, (PSYC*2020 or PSYC*3390), (PSYC*2450 or PSYC*2740), (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): Department of Psychology

PSYC*4470 Advanced Topics in Behavioural and Cognitive Neuroscience F (3-0) [0.50]

Major areas of contemporary behavioural or cognitive neuroscience will be covered in a seminar format. Selected topic areas may include the neural basis of learning, memory, attention, sensation, and perception. The selected topic, to be announced prior to course selection, will vary on the basis of the expertise of the instructor.

Prerequisite(s): PSYC*3270, (NEUR*2000 or PSYC*2410)
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC, BSCH.NEUR, or a major or minor in Neuroscience with a minimum grade point average of 70% in all Psychology course attempts, and a minimum of 14.00 completed credits. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): Department of Psychology

PSYC*4540 Practical Applications of Psychology F.W (3-0) [1.00]

This is a required capstone course for students in Psychology’s BA and BSc Honours major programs, excepting those who are taking the Honours Thesis courses (PSYC*4780, 4880). The course adopts a problem-based learning approach in which students will be presented with problems resembling those that they will face in their professional and personal lives. Students will apply their psychological knowledge and skills to analyze the problem, consider solutions, and communicate recommendations to hypothetical stakeholders.

Prerequisite(s): 14.00 credits including [PSYC*3250, (PSYC*3000 or 7.50 credits in Psychology ), (PSYC*2040 or PSYC*3290)]
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC or a major or minor in Neurosciences with a minimum grade point average of 70% in all Psychology course attempts.

Department(s): Department of Psychology

PSYC*4570 Special Topics in Applied Psychology U (3-0) [0.50]

This is an in-depth examination of specific advances in the application of psychology theory and methods. Specific topics will vary according to the expertise of the instructor.

Prerequisite(s): 14.00 credits including [PSYC*3250, (PSYC*2040 or PSYC*3290), 0.50 credits in Psychology at the 3000 level]
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC or a major or minor in Neurosciences with a minimum grade point average of 70% in all Psychology course attempts.

Department(s): Department of Psychology

PSYC*4580 Special Topics in Behavioural Sciences U (3-0) [0.50]

This course provides an in-depth examination of specific theoretical and methodological advances for understanding human and/or animal behaviour. Specific topics will vary according to the expertise of the instructor, but could include advances in Social Psychology, Industrial/Organizational Psychology, Cognitive or Behavioural Neuroscience.

Prerequisite(s): 14.00 credits including [PSYC*2040 or PSYC*3290], 1.00 credits in Psychology at the 3000 level
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC, or a major or minor in Neurosciences with a minimum grade point average of 70% in all Psychology course attempts.

Department(s): Department of Psychology

PSYC*4750 Seminar in Motivation and Emotion W (3-0) [0.50]

This course provides an in-depth examination of human motivation and emotion—the neurocognitive mechanisms and corresponding subjective feelings that focus thoughts and behaviours in an adaptive way toward some objects and events in the environment and away from others. The course material and assignments will cover what is known about motivation and emotion from research in the overlapping fields of cognitive and social psychology, emotion theory, and cognitive-affective neuroscience.

Prerequisite(s): 14.00 credits including 1.50 credits in Psychology at the 3000 level
Restriciton(s): Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC, or a major or minor in Neurosciences with a minimum grade point average of 70% in all Psychology course attempts.

Department(s): Department of Psychology

PSYC*4780 Advanced Research Methods and Statistics F (3-0) [0.50]

As a companion to honours thesis, this course focuses on advanced research methods, including qualitative methods, and statistical techniques, and presenting research in oral and written form. Topics of emphasis will be internal validity, ecological validity, and construct validity, as well as the correspondence between complex designs and the statistical techniques that can be used to analyze the data resulting from such designs. In addition to readings, lectures, and in-class exercises, students will be guided through the process of analyzing qualitative data and reporting on an empirical investigation in oral and written form.

Prerequisite(s): 14.00 credits including PSYC*3250, (1 of PSYC*2040 or PSYC*3290 or STAT*2050)
Co-requisite(s): PSYC*4870
Restriciton(s): PSYC*3370, PSYC*3380. Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC, or a major or minor in Neuroscience with a minimum cumulative average of 70% in all Psychology course attempts. Instructors consent required.

Department(s): Department of Psychology

PSYC*4870 Honours Thesis I S,F,W (3-0) [0.50]

Under individual faculty supervision, students plan, develop, and write a research proposal and prepare an extensive review paper on their area of research. Group sessions are held on research ethics, subject protocols and computer data handling techniques. This course will be graded on a Pass/Fail basis. Note that enrolment in this course is limited and academic records are used for student selection. Course registration requires the signature of the Course Instructor. This signature is contingent upon the student demonstrating they have obtained a Thesis Supervisor's signature on the department’s Thesis Registration Form and have an academic standing appropriate for application to graduate programs (see Graduate Advisory under Major).

Prerequisite(s): 14.00 credits including (1 of NEUR*3500, PSYC*3000, 7.50 credits in Psychology)
Co-requisite(s): NEUR*4000 or PSYC*4780 or (PSYC*3370, PSYC*3380)
Restriciton(s): PSYC*4540. Restricted to students in BAH.PSYC, BAH.PSYC.C, BAH.ISHB, BSCH.PBC or a major or minor in Neurosciences with a minimum grade point average of 75% in all Psychology course attempts. Instructors consent required.

Real Estate and Housing

Gordon S. Lang School of Business and Economics, Department of Marketing and Consumer Studies.

REAL*1820 Real Estate and Housing F (3-0) [0.50]
This course acquaints students with the theories, practices and principles of real estate and housing. Topics include how real estate assets and markets differ from other assets, government involvement in the housing and real estate sectors, non-market housing in Canada, financing real estate, and development.

Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*2820 Real Estate Finance W (3-0) [0.50]
This course examines the financing of both residential and commercial investment real estate. A mathematical approach is used to examine the impact of various lender and borrower decisions about loan terms (amortization periods, pre-payment options, etc.). The evolution of the Canadian housing finance system is contrasted with that in the United States. New methods of financing real estate other than traditional mortgages are discussed.

Prerequisite(s): 5.00 credits
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*2850 Service Learning in Housing F (3-0) [0.50]
This course provides an introduction to ethics and social capital as they apply to the housing and real estate industries. Students will be required to participate in a 10-15 hour service learning exercise where they volunteer for a frontline housing agency/provider. They will then share their experiences with their classmates during the final week of classes.

Prerequisite(s): 4.00 credits
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*3810 Real Estate Market Analysis F (3-0) [0.50]
In this course students examine supply and demand for real estate now and in the future in order to make better decisions. The course focuses on using various research methodologies to define the scope of analysis; identify data needs; collect information from various sources, evaluate their reliability and interpret the results. Applications to different property types are discussed. Current market trends are also examined.

Prerequisite(s): REAL*1820, (ECON*2740 or STAT*2060)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*3870 Topics in Housing U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic or area of specialization related to housing to be conducted by faculty with special interests or expertise in the area. Students should confirm with the department prior to course selection what topic(s), if any, will be offered during specific semesters.

Prerequisite(s): 10.00 credits including REAL*1820
Restriction(s): Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

REAL*3880 Topics in Real Estate U (3-0) [0.50]
Lecture-discussion or seminar on a selected topic related to real estate to be conducted by faculty with special interests or expertise in the area. Students should confirm with the department prior to course selection what topic(s), if any, will be offered during specific semesters.

Prerequisite(s): 10.00 credits including REAL*1820
Restriction(s): Instructor consent required.
Department(s): Department of Marketing and Consumer Studies

REAL*3890 Property Management W (3-0) [0.50]
This course considers the various strategies which a well-managed property can use to benefit tenants, employees and investors. Given the increasing professionalization of the industry, the relationship between property management and asset management is discussed. Issues faced by managers of residential, office, retail, industrial and mixed-use properties are covered.

Prerequisite(s): REAL*1820, (ACCT*2230 or REAL*2820)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*4820 Real Estate Appraisal F (3-0) [0.50]
This course deals with the basic principles involved in valuing real estate. The market comparison, cost and income approaches of appraisal are covered. The major emphasis in the course is on using discounted cash flow projections to value income-producing real estate. The term project involves the use of a spreadsheet program to estimate property value for a property chosen by the student. While valuation of single family homes is covered, the main emphasis is on investment real estate.

Prerequisite(s): (1 of CIS*1200, CIS*1500, MCS*2020), (1 of ACCT*2230, ECON*2560, FIN*2000, REAL*2820)
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*4830 Real Estate Development Project W (6-0) [1.00]
This is a capstone course covering the real estate development process and bringing together concepts from all other Real Estate and Housing courses. It deals with the development, redevelopment and renewal of real estate and housing services. Students will complete a phased project that considers all aspects of development feasibility including market analysis, physical constraints, financial viability and government regulation.

Prerequisite(s): 15.00 credits including REAL*3810, REAL*4840
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*4840 Housing and Real Estate Law F (3-0) [0.50]
This course lays out the legal principles which guide the expanding and changing body of law dealing with housing and real estate development and forms of occupancy; statutory and regulatory matters are explored.

Prerequisite(s): 9.00 credits including REAL*1820, REAL*2820
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies

REAL*4870 Sustainable Real Estate F (3-0) [0.50]
This course is designed to give students an understanding of how topics in sustainability and climate change affect and are affected by real estate and urban economics. Students will develop an understanding of the reasons for and benefits of sustainability practices in real estate and planning.

Prerequisite(s): 14.00 credits
Restriction(s): This is a Priority Access Course. Some restrictions may apply during some time periods. Please contact the department for more information.
Department(s): Department of Marketing and Consumer Studies
Sociology

Department of Sociology and Anthropology offers three types of courses: sociology courses with the prefix SOC*; anthropology courses with the prefix ANTH*; and departmental courses with the prefix SOAN*.

Courses will normally be offered in the semesters designated. For information on other semesters these courses will be offered and the semesters those courses without designations will be offered, please check with the department. In addition to regularly scheduled courses, students may elect to do independent study. A student who wishes to do a reading course should first consult the professor with whom they wish to work. Please note: a student is allowed a total of 1.00 credits only for reading courses.

SOAN*2112, SOAN*2120

This is a Priority Access Course. Enrolment may be restricted to Department of Sociology and Anthropology

SOAN*2112, SOAN*2120

This course will introduce students to the study of crime and criminal justice. It will examine the various criminological theories, types of criminal behaviour, and the criminal justice system.

Department(s): Department of Sociology and Anthropology

SO*1100 Sociology S,F,W (3-0) [0.50]

An introductory course dealing with the basic concepts and methods of sociology applied to societies, groups and individuals. Students will gain an understanding of basic social processes such as socialization, social exchange, deviance and conformity, social change and basic social institutions such as the economy, the polity, the family, religion, education.

Offering(s): Also offered through Distance Education format.

Department(s): Department of Sociology and Anthropology

SOC*1500 Crime and Criminal Justice F,W (3-0) [0.50]

This course will examine the social basis of law. Specific topics include the law as an instrument of stability or change, and the role of law makers, law enforcers and interpreters, including the legal profession, the police, judges and courts.

Prerequisite(s): SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2070 Social Deviance F,W (3-0) [0.50]

An introduction to some of the basic theories of deviance and social control and their application to selected social problems.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): SOC*1100 or SOC*1500

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website.

Department(s): Department of Sociology and Anthropology

SOC*2080 Rural Sociology W (3-0) [0.50]

An introduction to the structure and processes of rural society. This course deals with diverse topics such as agrarian movements, the rise of the agro-industrial complex, the role of the state in agriculture, the question of community, and rural environmental issues. A comparative perspective is cultivated, although the primary emphasis is on Canadian society.

Prerequisite(s): 1 of ANTH*1150, IDEV*1100, GEOG*1220, SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2280 Society and Environment F (3-0) [0.50]

An introduction to the nature and dimensions of the environmental crisis. The values, interests and social institutions (including government and industry) that promote pollution or environmentalism will be considered. Issues to be examined may include global warming, nuclear energy, environmental toxins, species extinction and population growth pressures.

Prerequisite(s): 1 of ANTH*1150, GEOG*1220, IDEV*1100, SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2390 Class and Stratification U (3-0) [0.50]

An examination of the persistent bases of social inequalities such as wealth, income, power and prestige including class formation, class consciousness, political activity and social mobility.

Prerequisite(s): SOC*1100

Department(s): Department of Sociology and Anthropology

SOC*2700 Criminological Theory F,W (3-0) [0.50]

This course will examine the development of criminological theory from the late 1700s to contemporary times.

Prerequisite(s): SOC*1500

Department(s): Department of Sociology and Anthropology

SOC*2760 Homicide S,F,W (3-0) [0.50]

This course will review legal definitions of homicide, statistical trends in homicide—both in Canada and internationally—and theoretical explanations of homicide. The course will also examine the key criminological/sociological empirical research studies on the various types of homicide, such as: femicide, familialicide, serial and mass murder.

Offering(s): Offered through Distance Education format only.

Prerequisite(s): 1 of ANTH*1150, FRHD*1010, PHIL*1010, POLS*1400, PSYC*1000, PSYC*1100, PSYC*1200, SOC*1100, SOC*1500

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website for more information.

Department(s): Department of Sociology and Anthropology

SOC*3130 Politics and Society U (3-0) [0.50]

An interpretation of the political process and its relationship to other aspects of the social structure, including such topics as political parties, movements, factions, citizen participation, power structures and the process of political exchange.

Prerequisite(s): SOAN*2112, SOAN*2120

Department(s): Department of Sociology and Anthropology

SOC*3310 Contemporary Theory F (3-0) [0.50]

This course outlines and evaluates the major theories in use today. A central aspect of the course is instruction in the application of these theories.

Prerequisite(s): SOAN*2112, SOAN*2120

Department(s): Department of Sociology and Anthropology

SOC*3380 Society and Nature W (3-0) [0.50]

The course provides a range of worldviews which address the relations between society and the environment. Material in the course will include historical perspectives and contemporary perspective, thereby allowing students to understand that worldviews concerning this crucial relation are dynamic, changing and reflect the diverse, and sometimes competing, perspectives of a society within particular moments of history.

Prerequisite(s): GEOG*2210 or SOC*2280

Department(s): Department of Sociology and Anthropology

SOC*3410 Individual and Society W (3-0) [0.50]

This course deals with the relationship between the individual and society through close examination of social interaction in a variety of settings. Students will be exposed to a range of theories, methods and concepts from cognitive, micro, dramaturgical, and interpretive sociologies, and will learn to apply these to the analysis of personal relationships, intercultural encounters, institutional life, collective action, and everyday life-worlds.

Prerequisite(s): SOAN*2112, SOAN*2120

Department(s): Department of Sociology and Anthropology

SOC*3490 Law and Society W (3-0) [0.50]

This course examines the social basis of law. Specific topics include the law as an instrument of stability or change, and the role of law makers, law enforcers and interpreters, including the legal profession, the police, judges and courts.

Prerequisite(s): SOAN*2112 or SOC*2700, SOAN*2120

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. Please see the departmental website.

Department(s): Department of Sociology and Anthropology

SOC*3710 Youth Justice F,W (3-0) [0.50]

This course examines concerns about youth crime in Canada and elsewhere. It examines the history of legislation to control youth crime, criminal justice processing and practices, public reactions and concerns about youth crime and theoretical models used to explain youth crime.

Prerequisite(s): SOAN*2112 or SOC*2700, SOAN*2120

Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).

Department(s): Department of Sociology and Anthropology
SOC*3730 Courts and Society W (3-0) [0.50]
This course is an introduction to the social processes involved in the court, particularly the criminal court. Typical concerns will be the place of courts in society, public opinion and confidence in courts, purposes and principles of sentencing, sentencing reforms and disparities (e.g., across gender and race), the role of criminal records, juries, the roles of judges, and alternatives to criminal courts.
Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).
Department(s): Department of Sociology and Anthropology

SOC*3740 Corrections and Penology F (3-0) [0.50]
This course will examine the current state of knowledge regarding the role of corrections and penology. It will examine such specific issues as public perception and reaction to the criminal justice system's methods of punishment and treatment of criminal offenders, the effectiveness of sentencing options and policies, including fines, probation, prison sentences and parole. It will also examine the various theoretical and methodological approaches to the study of corrections, corrections and penology.
Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).
Department(s): Department of Sociology and Anthropology

SOC*3750 Police in Society F,W (3-0) [0.50]
This course will examine the role of police in society. It will examine theories of policing, the history of policing and such issues as police-citizen interaction, relations with visible minorities, methods for controlling police behaviour, and the effectiveness of the police in carrying out specific policy directives.
Prerequisite(s): (SOAN*2112 or SOC*2700), SOAN*2120
Restriction(s): Registration in Anthropology, Criminal Justice & Public Policy or Sociology (major, minor or area of concentration).
Department(s): Department of Sociology and Anthropology

SOC*3840 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.
Prerequisite(s): 10.00 credits including (1 of SOAN*2112, SOC*2080, SOC*2700), SOAN*2120
Department(s): Department of Sociology and Anthropology

SOC*3850 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.
Prerequisite(s): 10.00 credits including (1 of SOAN*2112, SOC*2080, SOC*2700), SOAN*2120
Department(s): Department of Sociology and Anthropology

SOC*3950 Special Projects in Sociology S,F,W (3-0) [0.50]
This special study option/reading course is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the study is required.
Prerequisite(s): 10.00 credits
Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.
Department(s): Department of Sociology and Anthropology

SOC*4010 Violence and Society F,W (3-0) [0.50]
This course will focus on the changing nature of violence in our society by critically evaluating theory, research and public policy on the causes and control of violence. The links among structural, institutional and interpersonal violence will be examined as well as the social construction of violence, particularly why some forms of violence are considered to be more serious social problems than others.
Prerequisite(s): 14.00 credits including (SOC*2700 or SOC*3310), (SOAN*3120 or POLS*3650)
Restriction(s): Restricted to students in BAH:CJPP and BAH:SOC with an average of 70% in all course attempts in Political Science, Sociology and Anthropology courses
Department(s): Department of Sociology and Anthropology

SOC*4030 Advanced Topics in Criminology F (3-0) [0.50]
This is an in-depth study of selected issues in criminology.
Prerequisite(s): 14.00 credits including (2 of SOC*3490, SOC*3710, SOC*3730, SOC*3740, SOC*3750), (1 of ANTH*3690, SOC*2700, SOC*3310), (SOAN*3120 or POLS*3650)
Restriction(s): Restricted to students in BAH:CJPP with an average of 70% in all course attempts in Political Science, Sociology and Anthropology
Department(s): Department of Sociology and Anthropology

SOC*4200 Advanced Topics in Criminal Justice W (3-0) [0.50]
This is an in-depth study of issues in criminal justice.
Prerequisite(s): 14.00 credits including (2 of SOC*3490, SOC*3710, SOC*3730, SOC*3740, SOC*3750), (1 of ANTH*3690, SOC*2700, SOC*3310), (SOAN*3120 or POLS*3650)
Restriction(s): Restricted to students in BAH:CJPP with an average of 70% in all course attempts in Political Science, Sociology and Anthropology
Department(s): Department of Sociology and Anthropology

SOC*4300 Theoretical and Methodological Issues U (3-0) [0.50]
This course will provide an opportunity for sociology majors to consider in detail the integration of theoretical and methodological issues at an advanced level. It is meant to engage students in the latest developments in a particular area of the discipline. Course topics will be announced and course outlines will be available at course selection time.
Prerequisite(s): 14.00 credits including SOAN*3070, SOAN*3120, SOC*3310
Department(s): Department of Sociology and Anthropology

SOC*4410 Women, Work and Public Policy F,W (3-0) [0.50]
In this course students will critically assess the transformation of women's work in contemporary society. A range of topics pertaining to women's work will be explored with particular attention paid to the processes through which class, gender, race, ethnicity and age shape divisions of work. The course will also focus on theories that have attempted to explain the transformation of women's work.
Prerequisite(s): 12.50 credits including (1 of ANTH*2160, ANTH*2180, SOAN*2112, SOC*2700), SOAN*2120
Department(s): Department of Sociology and Anthropology

SOC*4420 Sociology of Food F (3-0) [0.50]
This course is directed towards upper level students in sociology and related disciplines who wish to consider the variety of contentious issues surrounding food in the contemporary world. The course will encourage a sociological approach to food systems that is both historically informed and comparative in scope.
Prerequisite(s): 12.50 credits including (IDEV*2100 or SOAN*2120), (1 of ANTH*2160, ANTH*2180, IDEV*2300, SOAN*2112)
Department(s): Department of Sociology and Anthropology

SOC*4430 Alternative Social Possibilities W (3-0) [0.50]
This course uses the full range of sociological theory to suggest what alternative ways of organizing society might be possible. Students will examine different accounts of theories of why outcomes are not equal from functionalist theories of stratification to theories of class domination and exploitation to economic market accounts to feminist accounts based on patriarchy. This course will allow students to bring together for themselves a wide range of theories used in other courses and apply them to how their own ideals might be implemented.
Prerequisite(s): 12.50 credits including (1 of ANTH*3690, SOC*2700, SOC*3310), (1 of POLS*2650, POLS*3180, SOAN*2120)
Department(s): Department of Sociology and Anthropology

SOC*4740 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.
Prerequisite(s): 12.50 credits including SOC*3130, SOAN*3070, SOAN*3120
Department(s): Department of Sociology and Anthropology
SOC*4840 Seminar in Sociology F,W (3-0) [0.50]
This course will be offered as a structured seminar on various topics depending upon the interests of the faculty member teaching the course. Topics will be announced and course outlines will be available at course selection. The availability of third and fourth year seminar courses will vary. Students must check with the Department of Sociology and Anthropology to see when seminar courses are available.
Prerequisite(s): 12.50 credits including SOC*3310, SOAN*3070, SOAN*3120
Department(s): Department of Sociology and Anthropology

SOC*4880 Special Projects in Sociology S,F,W (3-0) [0.50]
This special study/reading course option is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the project is required.
Prerequisite(s): 12.50 credits
Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.
Department(s): Department of Sociology and Anthropology

SOC*4890 Special Projects in Sociology S,F,W (3-0) [0.50]
This special study/reading course option is designed to provide advanced undergraduates with an opportunity to explore independently the frontiers and foundations of a field of knowledge. Under supervision, the student will study in greater depth topics related to regular upper-level courses offered in the department which the student has taken or is taking. Permission of the instructor who will be supervising the project is required.
Prerequisite(s): 12.50 credits
Restriction(s): Instructor consent required. Please note, a student is allowed a total of 1.00 credits only for reading courses.
Department(s): Department of Sociology and Anthropology

SOC*4900 Honours Sociology Thesis I S,F,W (3-0) [0.50]
Development and design of an honours thesis proposal conducted under the supervision of a faculty member. Recommended to Honours students.
Prerequisite(s): 15.00 credits including SOC*3310, SOAN*3070, SOAN*3120. CJPP students must have 15.00 credits including SOC*2700, SOAN*3120, or POLS*3650
Restriction(s): A cumulative average of 70% in all Sociology and Anthropology courses. Instructor consent required.
Department(s): Department of Sociology and Anthropology

SOC*4910 Honours Sociology Thesis II S,F,W (3-0) [0.50]
Completion and presentation of honours thesis.
Prerequisite(s): SOC*4900
Restriction(s): Instructor consent required.
Department(s): Department of Sociology and Anthropology
Sociology and Anthropology

Department of Sociology and Anthropology

The Department of Sociology and Anthropology offers three types of courses: sociology courses with the prefix SOC*; anthropology courses with the prefix ANTH*; and departmental courses with the prefix SOAN*.

SOAN*2111 Classical Theory F (3-0) [0.50]

First part of the two-semester course SOAN*2111/2. This course explores the origins and early development of sociological theory in its classical and early contemporary traditions. When you select it you must select SOAN*2111 in the Fall semester and SOAN*2112 in the Winter semester. A grade will not be assigned to SOAN*2111 until SOAN*2112 has been completed.

Prerequisite(s): 1 of ANTH*1150, SOC*1100, SOC*1500

Department(s): Department of Sociology and Anthropology

SOAN*2112 Classical Theory W (3-0) [0.50]

Second part of the two-semester course SOAN*2111/2. This course explores the origins and early development of sociological theory in its classical and early contemporary traditions. When you select it you must select SOAN*2111 in the Fall semester and SOAN*2112 in the Winter semester. A grade will not be assigned to SOAN*2111 until SOAN*2112 has been completed.

Prerequisite(s): SOAN*2111

Department(s): Department of Sociology and Anthropology

SOAN*2120 Introductory Methods F.W (3-0) [0.50]

A general introduction to the process of social research emphasizing research design, techniques of data collection, analysis and interpretation of research results.

Prerequisite(s): 1 of ANTH*1150, SOC*1100, SOC*1500

Restriction(s): Restricted to students in ANTH, BECN, CIPP, ID, SOC, BAG, ARTS

Department(s): Department of Sociology and Anthropology

SOAN*2290 Identities and Cultural Diversity U (3-0) [0.50]

An examination of the interrelationships among Canadian ethnic, racial and linguistic groups including their locations in the Canadian mosaic.

Prerequisite(s): ANTH*1150 or SOC*1100

Department(s): Department of Sociology and Anthropology

SOAN*2400 Introduction to Gender Systems S.F (3-0) [0.50]

An introduction to the examination of the characteristics of gender relationships both historically and cross-culturally. Amongst the emphases are theoretical approaches to gender analysis, methodologies, case studies and attention to themes such as class and stratification, race and ethnicity, identities and global restructuring as these shape gender dynamics.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): ANTH*1150 or SOC*1100

Department(s): Department of Sociology and Anthropology

SOAN*3040 Globalization of Work and Organizations F (3-0) [0.50]

This course examines the social, economic, and political dimensions of work, locating work and its transformation within the broader context of globalization, economic restructuring, and shifts in public policy. Theoretical approaches and concepts used in the study of work will be introduced and critically assessed.

Prerequisite(s): 1 of ANTH*2160, ANTH*2180, IDEV*2500, SOAN*2112

Restriction(s): SOAN*2040

Department(s): Department of Sociology and Anthropology

SOAN*3070 Qualitative and Observational Methods W (3-0) [0.50]

Non-quantitative techniques in social research including participant observation, unobtrusive methods, case studies and interviewing.

Prerequisite(s): SOAN*2120

Department(s): Department of Sociology and Anthropology

SOAN*3100 Gender Perspectives on Families and Households F (3-0) [0.50]

This course explores families and households from a gender perspective, using insights from sociology and anthropology.

Prerequisite(s): (1 of ANTH*2160, ANTH*2180, SOAN*2112, SOAN*2400), SOAN*2120

Restriction(s): FRID*3120

Department(s): Department of Sociology and Anthropology

SOAN*3120 Quantitative Methods F (3-0) [0.50]

This course introduces basic descriptive and inferential techniques used in quantitative social research. Students will acquire the skills needed to perform basic analyses and to read the research literature. They will also acquire skills in using a standard computer package to perform data analyses. Topics include: data organization, sample description, hypothesis testing and measures of association.

Prerequisite(s): SOAN*2120

Restriction(s): Restricted to students registered in Anthropology, Criminal Justice and Public Policy, Sociology, International Development (GAD or RAD).

Department(s): Department of Sociology and Anthropology

SOAN*3130 Protest, Resistance, and Collective Action W (3-0) [0.50]

The course introduces students to the study of social movements and contentious collective action, looking at the motivations, tactics, outcomes of movement participants, and how these are theorized.

Prerequisite(s): 1 of ANTH*2160, ANTH*2180, IDEV*2300, IDEV*2500, SOAN*2112

Department(s): Department of Sociology and Anthropology

SOAN*3240 Gender & Global Inequality I F (3-0) [0.50]

In this course, students will develop their ability to use a gender perspective to study social change in the context of global inequalities. Students will develop their knowledge of the core concepts and theories in Gender and Development (GAD) thinking and practice, while exploring the development process from a critical perspective.

Prerequisite(s): 1 of ANTH*2160, ANTH*2180, IDEV*2010, IDEV*2500, SOC*2080

Department(s): Department of Sociology and Anthropology

SOAN*3250 Social Change in Latin America W (3-0) [0.50]

This course provides a critical, comparative examination of the socio-structural and cultural transformations occurring in Latin America in a context of deepening integration with the global north. Topics to feature prominently may include land reform, depesantization, out-migration, maquiladoras, informal employment, race and ethnic relations, religiosity and religious identification, and social movements. The particular sub-regional focus may vary.

Prerequisite(s): 1 of ANTH*2160, ANTH*2180, IDEV*2010, IDEV*2500, SOC*2080

Department(s): Department of Sociology and Anthropology

SOAN*3380 Contemporary Issues in Culture, Society, Nature W (3-0) [0.50]

This course focusses on interdisciplinary explorations of contemporary intersections of culture, society, and nature. This includes considerations of issues such as the production of environmental knowledge, ethics of human-non-human interactions, the Anthropocene, and conservation politics.

Prerequisite(s): 1 of ANTH*2230, GEOG*2210, SOC*2080

Restriction(s): SOC*3380

Department(s): Department of Sociology and Anthropology

SOAN*3680 Perspectives on Development F (3-0) [0.50]

This course examines theories and processes relating to international development and the responses to these by anthropologists and/or sociologists.

Prerequisite(s): 1 of ANTH*2160, ANTH*2180, IDEV*2010, IDEV*2300, IDEV*2500, SOC*2080

Restriction(s): ANTH*3680. Registration in Anthropology, Sociology or International Development.

Department(s): Department of Sociology and Anthropology

SOAN*4210 Indigenous-Settler Relations in Canadian Society W (3-0) [0.50]

This seminar-based course is designed to provide students with an opportunity to explore contemporary Indigenous-Settler relations in Canadian Society. Grounded in an exploration of worldviews and meaningful knowledge systems engagement, the course may explore governance, decolonisation, re-appropriation, reconciliation, etc. The specific content areas will vary depending on the instructor.

Prerequisite(s): 12.50 credits including (1 of ANTH*2660, IDEV*2400, IDEV*2500, GEOG*2210, SOAN*2290), (1 of GEOG*2260, IDEV*2100, SOAN*3070)

Prerequisites: SOC*4310

Department(s): Department of Sociology and Anthropology

SOAN*4220 Gender and Change in Rural Canada F (3-0) [0.50]

This course examines socio-cultural structures affecting historically gendered positions and roles in rural Canada.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 12.50 credits including (1 of ANTH*2160, ANTH*2180, IDEV*2300, SOC*2080), (1 of IDEV*2100, SOAN*2120, WMST*3000)

Department(s): Department of Sociology and Anthropology
### SOAN*4230 Gender & Global Inequality II W (3-0) [0.50]
An in-depth and critical examination of a range of gender issues in the context of development, this course aims to enhance students’ ability to critically analyze development theory and practices using gender analysis. It provides students an opportunity to deepen their understanding of gender issues in a global context, with the aim of further equipping them to participate effectively in gender and development-related research, policy-making, and implementation.

**Prerequisite(s):**
12.50 credits including SOAN*3240, (1 of GEOG*3090, POLS*2650, POLS*3180, SOAN*2120)

**Restriction(s):**
SOAN*4240

**Department(s):** Department of Sociology and Anthropology

### SOAN*4250 Energy and Society F (3-0) [0.50]
This seminar addresses the links between social relations and various types of energy including petroleum, other hydrocarbons, nuclear and solar energies. Topics may include corporations, states, international organizations and popular movements.

**Prerequisite(s):**
12.50 credits including (IDEV*2100 or SOAN*2120), (1 of ANTH*2160, ANTH*2180, IDEV*2300, SOAN*2112, SOC*2080)

**Department(s):** Department of Sociology and Anthropology

### SOAN*4260 Migration, Inequality and Social Change W (3-0) [0.50]
This seminar critically examines the complex relationships between migration, inequality and social change. Students will develop their understanding of key debates in contemporary migration, exploring relevant theory, research and public policy. Topics may include the migration-development nexus, the role of migration policies in structuring inequalities, migrant rights and resistance, and transnational families.

**Prerequisite(s):**
12.50 credits including (IDEV*2100 or SOAN*2120), (1 of ANTH*2160, ANTH*2180, IDEV*2300, IDEV*2500, SOAN*2112, SOC*2080)

**Department(s):** Department of Sociology and Anthropology

### SOAN*4320 Transition from School to Work W (3-0) [0.50]
This applied course examines the evolving research and models in the transitions from school to work area. There is an evolving literature in this area based, in part, on the successful application of research in the transition from high school to postsecondary education. This 'capstone' course also considers the practical issues involved in making such a move, considering the knowledge, skills, and values needed by university students to succeed in the modern workplace (public, private, and not-for-profit sectors) in Canada. Students will complete an "Action Sociology/Anthropology Project," as well as a "Skills Portfolio," and other work related to their own transition.

**Restriction(s):** Registration in Sociology, Anthropology or Criminal Justice & Public Policy majors in semester 7 or 8.

**Department(s):** Department of Sociology and Anthropology

### SOAN*4500 Community Development W (3-0) [0.50]
An analysis of approaches to community development defined as planned, change-directed action undertaken by individuals, groups and organizations. The course will include the examination of actual community development practices.

**Prerequisite(s):**
(1 of ANTH*2160, ANTH*2180, IDEV*2010, IDEV*2500, SOC*2080), (GEOG*2210 or SOAN*2120)

**Restriction(s):**
SOAN*3300

**Department(s):** Department of Sociology and Anthropology
Spanish

School of Languages and Literatures

All courses are conducted in Spanish (reading, writing and speaking), and literary texts are, at all levels, studied in the original language.

SPAN*1100 Introductory Spanish I F,W (3-1) [0.50]
This course introduces students to the basics of spoken and written Spanish through the study of grammar and vocabulary. The course is for students with no previous studies in Spanish.

Offering(s): Also offered through Distance Education format.
Equate(s): HISP*1100
Department(s): School of Languages and Literatures

SPAN*1110 Introductory Spanish II F,W (3-1) [0.50]
This is a continuation of SPAN*1100. Students will develop and apply increased reading, writing, listening and oral skills in Spanish through the study of new vocabulary and grammatical structures and culture.

Equate(s): HISP*1110
Department(s): School of Languages and Literatures

SPAN*2000 Intermediate Spanish I F,W (3-1) [0.50]
This course is for students who have completed either first year University Spanish or 4U Spanish as well as for those who are heritage speakers. This course examines cultural topics and grammatical structures in greater depth while focusing on vocabulary acquisition, and development of oral, written, and listening skills.

Prerequisite(s): SPAN*2000 or SPAN*2000
Equate(s): HISP*2000
Department(s): School of Languages and Literatures

SPAN*2010 Intermediate Spanish II F,W (3-1) [0.50]
Students will acquire and apply improved skills in reading, writing, and conversation through further study of grammar and culture. The course encourages students to enhance their analytical and linguistic skills through the use of appropriate structures as they formulate and support opinions.

Prerequisite(s): HISP*1110 or SPAN*1110
Equate(s): HISP*2040
Department(s): School of Languages and Literatures

SPAN*2040 Culture of Spain F (3-0) [0.50]
This course is an examination of the historical and cultural events that provided the background for the development of modern Spain, as well as a visual survey of Spanish culture.

Prerequisite(s): HISP*1110 or SPAN*1110
Equate(s): HISP*2040
Department(s): School of Languages and Literatures

SPAN*2990 Hispanic Literary Studies W (3-0) [0.50]
This course is an introduction to literary studies in Spanish. The course focuses on critical terminology and methods through a selection of prose, poetry and drama from Spain and Spanish America.

Prerequisite(s): HISP*1110 or SPAN*1110
Equate(s): HISP*2990
Department(s): School of Languages and Literatures

SPAN*3080 Spanish American Culture W (3-0) [0.50]
This course is a survey through selected readings, class discussion and audio-visual materials of the Spanish American countries, their histories, society, institutions and culture.

Prerequisite(s): HISP*2000 or SPAN*2000
Equate(s): HISP*3080
Department(s): School of Languages and Literatures

SPAN*3210 Topics in Hispanic Studies F,W (3-0) [0.50]
This course, taught in Spanish, with texts in the original language, provides an intensive study of a specific aspect of Hispanic Studies.

Prerequisite(s): (HISP*3200 or SPAN*3200) or (HISP*3230 or SPAN*3230)
Equate(s): HISP*3210
Department(s): School of Languages and Literatures

SPAN*3220 Literature and Arts I: Spain F (3-0) [0.50]
This course will be taught in Spanish, with texts studied in the original language, and provides a detailed examination of a theme, period or movement in the literature and/or arts of Spain.

Prerequisite(s): HISP*2990 or SPAN*2990
Equate(s): HISP*3220
Department(s): School of Languages and Literatures

SPAN*3230 Literature and Arts II: Latin America W (3-0) [0.50]
This course will be taught in Spanish, with texts studied in the original language, and provides a detailed examination of a theme, period or movement in the literature and/or arts of Latin America.

Prerequisite(s): HISP*2990 or SPAN*2990
Equate(s): HISP*3230
Department(s): School of Languages and Literatures

SPAN*3240 Topics in Hispanic Linguistics W (3-0) [0.50]
This course offers an introduction to linguistic topics including history of the Spanish language, language variation and change, and Spanish phonetics, which may vary from year to year.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): HISP*1110 or SPAN*1110
Equate(s): HISP*3240
Department(s): School of Languages and Literatures

SPAN*3350 Advanced Spanish I F (3-0) [0.50]
This is an advanced language course that focuses on the refinement of students’ written and verbal communication skills in Spanish.

Prerequisite(s): HISP*2010 or SPAN*2010
Equate(s): HISP*3350
Department(s): School of Languages and Literatures

SPAN*3500 Advanced Spanish II F (3-0) [0.50]
This is an advanced language course that focuses on the refinement of students’ written and verbal communication skills in Spanish.

Prerequisite(s): HISP*2010 or SPAN*2010
Equate(s): HISP*3500
Department(s): School of Languages and Literatures

SPAN*3700 Experiential Learning and Language S,F,W (0-0) [0.50]
This course provides an opportunity for independent study based on an experiential project in Spanish or Hispanic Studies. The project (approximately 70 hours) must be approved by a faculty member in the School of Languages and Literatures. It will include research about experiential learning, a reflective piece of writing and a public oral presentation about the project.

Offering(s): Also offered through Distance Education format.
Prerequisite(s): 10.00 credits including 1.50 credits in Spanish.
Restriction(s): A minimum cumulative average of 70% in all Spanish course attempts. Instructor consent required.
Department(s): School of Languages and Literatures

SPAN*3800 Directed Readings in Hispanic Studies U (3-0) [0.50]
A reading course in Spanish or Spanish American literature designed according to the previous studies and the interests of the individual student. Normally, students will not be permitted to take more than two courses in the Directed Readings sequence.

Prerequisite(s): 1.00 credits from the following: (HISP*3220 or SPAN*3220), (HISP*3230 or SPAN*3230), SPAN*3080
Equate(s): HISP*3800
Department(s): School of Languages and Literatures

SPAN*3810 Directed Readings in Hispanic Studies U (3-0) [0.50]
A reading course in Spanish or Spanish American literature designed according to the previous studies and the interests of the individual student. Normally, students will not be permitted to take more than two courses in the Directed Readings sequence.

Prerequisite(s): 1.00 credits from the following: (HISP*3220 or SPAN*3220), (HISP*3230 or SPAN*3230), SPAN*3080
Equate(s): HISP*3810
Restriction(s): Instructor consent required.
Department(s): School of Languages and Literatures

SPAN*4100 Seminar in Hispanic Studies F,W (3-0) [1.00]
This seminar is taught in Spanish, with texts studied in the original language. It provides an opportunity for students to study and research a specific aspect of Hispanic Studies.

Prerequisite(s): (HISP*4410 or SPAN*4410), (HISP*4420 or SPAN*4420)
Department(s): School of Languages and Literatures

SPAN*4410 Seminar in Latin American W (3-0) [1.00]
This capstone seminar is taught in Spanish, with texts studied in the original language, and will explore in detail a major movement, period or theme in Latin American literature or culture. Students who have completed this course previously should register in SPAN*4410.

Offering(s): Offered in odd-numbered years.
Prerequisite(s): HISP*2990 or SPAN*2990
Department(s): School of Languages and Literatures

Statistics

Department of Mathematics and Statistics

Suggested initial course sequences:

1. For students interested in applied statistics a minimal course sequence is: STAT*2040, STAT*2050, STAT*3210, STAT*3240, STAT*3320.
2. Credit may be obtained in only 1 of STAT*2050 or STAT*2090 and only 1 of STAT*2040, STAT*2060, STAT*2080, STAT*2120.
3. Graduate students may be admitted to later parts of a sequence by permission of the department.

STAT*2040 Statistics I S,E,F,W (3-0) [0.50]

This course focuses on the practical methods of Statistics and the topics include: descriptive statistics; univariate models such as binomial, Poisson, uniform and normal; the central limit theorem; expected value; the t, F and chi-square models; point and interval estimation; hypothesis testing methods up to two-sample data; simple regression and correlation; introduction to analysis of variance. Assignments will deal with real data from the natural sciences and involve the use of statistical software for computing and visualization.

Offering(s): Also offered through Distance Education format.

Prerequisite(s): 1 of 4U Calculus and Vectors, Advanced Functions and Calculus, OAC Calculus, MATH*1080

Restriction(s): STAT*2060, STAT*2080, STAT*2120, STAT*2230 This is a Priority Access Course. Enrollment may be restricted to particular programs or specializations. See department for more information.

Department(s): Department of Mathematics and Statistics

STAT*2050 Statistics II F,W (3-0) [0.50]

In this course, students will learn how to implement good study design and analyze data from complex studies. This course follows naturally from STAT*2040 and features both previously unseen statistical techniques, as well as studying in greater depth some topics covered in STAT*2040. These topics will include: experiments and observational studies; a review of t-tests and confidence intervals; confounding variables; association and causality; Analysis of Variance (ANOVA); simple and multiple linear regression; binary responses (logistic regression); odds ratios and relative risk; and an introduction to experimental design (including blocked designs and factorial treatment designs). Assignments carried out using modern statistical software will form the basis for mastering the material.

Prerequisite(s): 1 of STAT*2040, STAT*2060, STAT*2120, STAT*2230

Restriction(s): STAT*2090

Department(s): Department of Mathematics and Statistics

STAT*2080 Introductory Applied Statistics I F (3-0) [0.50]

The topics covered in this course include: Frequency distributions, graphing and tabulation of data; measures of central tendency, variability and association; elementary probability; hypothesis testing and confidence intervals; basic concepts of experimental design; treatment designs; simple linear regression and correlation. Examples come from a variety of disciplines, including family studies, education, marketing, medicine, psychology and sociology.

Prerequisite(s): 4U mathematics or equivalent) or 0.50 credit in mathematics

Restriction(s): STAT*2040, STAT*2080, STAT*2120. Not available to B.Sc. students.

Department(s): Department of Mathematics and Statistics

STAT*2090 Introductory Applied Statistics II W (3-0) [0.50]

The topics covered in this course include: analysis of qualitative data; analysis of variance for designed experiments; multiple regression; exposure to non-parametric methods; power and sample size calculations; special topics such as logistic regression. Examples come from a variety of disciplines, including nutrition, family studies, education, marketing, medicine, psychology and sociology.

Prerequisite(s): STAT*2080

Restriction(s): BIOL*2250, STAT*2050, STAT*2250

Department(s): Department of Mathematics and Statistics

STAT*2120 Probability and Statistics for Engineers F,W (3-0) [0.50]

The topics covered in this course include: Sample spaces; probability, conditional probability and independence; Bayes' theorem; probability distributions; probability densities; algebra of expected values; descriptive statistics; inferences concerning means, variances, and proportions; curve fitting, the method of least squares and correlation. An introduction to quality control and reliability is provided. This course is recommended for students in the B.Sc.(Eng.) program.

Prerequisite(s): 1 of IPS*1510, MATH*1210, MATH*2080

Restriction(s): STAT*2040, STAT*2060, STAT*2080, STAT*2100

Department(s): Department of Mathematics and Statistics

STAT*2230 Biostatistics for Integrative Biology W (3-2) [0.50]

This course introduces students to the design, completion and interpretation of research projects, including identifying categories of research questions, types of data, data gathering methods, efficient graphic and numeric methods to summarize data, standard statistical analyses involving parameter estimation and hypothesis tests and interpreting results in the context of research goals. Statistical concepts underlying practical aspects of biological research will be emphasized. Computer-intensive laboratory sessions will focus on practical data organization, visualization, statistical analysis using software, and interpretation and communication of statistical results.

Prerequisite(s): BIOL*1070

Restriction(s): BIOL*2250, STAT*2040, STAT*2060, STAT*2080, STAT*2210, STAT*2250. Restricted to students in the BSC majors in BIOD, MFB, WBC, WLB, and ZOO, and BSES majors in ECOL and ECOL:C.

Department(s): Department of Mathematics and Statistics, Department of Integrative Biology

STAT*3100 Introductory Mathematical Statistics I F (3-0) [0.50]

Estimation, unbiasedness, Cramer-Rao inequality, consistency, sufficiency, method of moments, maximum likelihood estimation; hypothesis testing, Neyman-Pearson lemma, likelihood ratio test, uniformly most powerful test; linear regression and correlation; non-parametric methods.

Prerequisite(s): STAT*3100

Department(s): Department of Mathematics and Statistics

STAT*3110 Introductory Mathematical Statistics II W (3-0) [0.50]

This course covers the basic principles of design: randomization, replication, and local control (blocking); RCBD, Latin square and crossover designs, incomplete block designs, factorial and split-plot experiments, confounding and fractional factorial designs, response surface methodology; linear mixed model computer analysis of the designs; nonparametric methods; Taguchi philosophy.

Offering(s): Offered in even-numbered years.

Prerequisite(s): STAT*2050

Department(s): Department of Mathematics and Statistics

STAT*3210 Experimental Design F (3-0) [0.50]

This course presents the basic principles of design: randomization, replication, and local control (blocking); RCBD, Latin square and crossover designs, incomplete block designs, factorial and split-plot experiments, confounding and fractional factorial designs, response surface methodology; linear mixed model computer analysis of the designs; nonparametric methods; Taguchi philosophy.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): 1 of IPS*1510, MATH*1210, MATH*2080, (STAT*2040 or STAT*2120)

Department(s): Department of Mathematics and Statistics

STAT*3240 Applied Regression Analysis F (3-1) [0.50]

This course reviews simple linear regression and introduces multiple regression with emphasis on theory of least squares estimation, residual analysis, and model interpretation. Within the multiple regression context, transformations of variables, interactions, model selection techniques, ANOVA, influence diagnostics and multicollinearity will be discussed. Topics may also include Box-Cox transformations, weighted regression, and logistic and Poisson regression. This course is supplemented with computer labs involving interactive data analysis using statistical software.

Prerequisite(s): 1 of IPS*1510, MATH*1210, MATH*2080, (1 of MATH*1160, MATH*2150, MATH*2160), STAT*2050

Department(s): Department of Mathematics and Statistics

STAT*3320 Sampling Theory with Applications F (3-0) [0.50]

This course focuses on the design and analysis of survey samples for finite populations. Topics covered include: non-probability and probability sampling, simple random sampling, stratified sampling, cluster sampling, systematic sampling, double sampling, two-phase sampling and multi-stage cluster sampling. Expectation, variance estimation procedures and sample size calculations for the above techniques are included.

Offering(s): Offered in even-numbered years.

Prerequisite(s): 1 of IPS*1510, MATH*1210, MATH*2080, (1 of STAT*2050, STAT*3240, STAT*3100)

</tr>
</thead>
</table>
| STAT*3510  | Environmental Risk Assessment | 3-0 | Contemporary statistical methods for assessing risk are discussed. Topics covered include dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk, trend analysis, survey of models for assessing risk. Case studies are used to illustrate the methods.  
Prerequisite(s): STAT*2050  
Department(s): Department of Mathematics and Statistics |
| STAT*4000  | Statistical Computing | 3-0 | The topics in this course will include pseudorandom number generation, numerical optimization as used in statistics, simulation study design, Monte Carlo integration and variance reduction, and bootstrapping. Other topics may include permutation tests, visualization of multivariate data, and big data.  
Prerequisite(s): MATH*2130, STAT*2050, STAT*3110  
Department(s): Department of Mathematics and Statistics |
| STAT*4050  | Topics in Applied Statistics I | 3 | Topics such as statistical computing procedures, quality control, bioassay, survival analysis and introductory stochastic processes will be covered. This course is intended for statistics students and interested students from other disciplines who have appropriate previous courses in statistics. Information on particular offerings will be available at the beginning of each academic year.  
Offering(s): Offered in odd-numbered years.  
Prerequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4060  | Topics in Applied Statistics II | 3 | Same as for STAT*4050.  
Offering(s): Offered in even-numbered years.  
Prerequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4150  | Topics in Applied Statistics III | 3 | In this course students will discuss selected topics at an advanced level as in STAT*4050, but with different choice of topics.  
Prerequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4340  | Statistical Inference | 3 | This course reviews and extends the theory of estimation introduced in STAT*3110. Topics including point estimation, interval estimation, hypothesis testing and decision theory will be presented from both the frequentist and likelihood-based perspectives. Foundational issues concerning the frequentist and Bayesian paradigms will also be discussed.  
Prerequisite(s): STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4350  | Applied Multivariate Statistical Methods | 3 | This course introduces the multivariate normal, and Wishart and Hotelling’s T-square distributions. Topics covered include: statistical inference on the mean vector, canonical correlation, multivariate analysis of variance and covariance, multivariate regression, principal components analysis, and factor analysis. Topics will be illustrated using examples from various disciplines.  
Prerequisite(s): (1 of MATH*1160, MATH*2150, MATH*2160), STAT*3110, STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4360  | Applied Time Series Analysis | 3 | This course will investigate the nature of stationary stochastic processes from the spectral and time domain points of view. Aspects of parameter estimation and prediction in a computationally intensive environment will be the presentation style. The methods developed in this course will have applicability in many sciences such as engineering, environmental sciences, geography, soil sciences, and life sciences.  
Prerequisite(s): STAT*3240  
Department(s): Department of Mathematics and Statistics |
| STAT*4600  | Advanced Research Project in Statistics | 3-6 | Each student in this course will undertake an individual research project in some area of statistics, under the supervision of a faculty member. A written report and a public presentation of the project will be required.  
Prerequisite(s): 1.00 credits in Statistics at the 3000 level or above.  
Restriction(s): Approval of a supervisor and the course coordinator.  
Department(s): Department of Mathematics and Statistics |
# Studio Art

**School of Fine Art and Music**

Admission to all Studio Art courses is based on the university's policy with regard to Priority Access Courses. Admission to ALL Studio Courses at the 3000-level and above is restricted to students who:

1. are currently registered in the Art History or Studio Art Specializations of the Bachelor of Arts Program;
2. have an average of 70% in all ARTH and SART course attempts;
3. have completed (ARTH*1220 or ARTH*2220), (ARTH*1510 or ARTH*1520), SART*1050 and SART*1060.

**Studio supplies:** The majority of the cost of supplies must be borne by the student. In order to permit the University to subsidize this cost and to allow for savings through discount buying, some materials are obtained through the School of Fine Art and Music by payment of a lab fee. The amount of the fee is established for each semester prior to registration.

*Note:* Due to limited faculty resources and facilities, enrolment in these courses may be restricted to Studio Art majors or minors.

---

### SART*1050 Foundation Studio F,W (2-4) [0.50]

This course provides a foundation in the technical and theoretical aspects of contemporary two-dimensional media. Through a combination of lectures, studio projects, readings and a field trip the students will explore perceptual, conceptual and topical dimensions of art making practices.

**Restriction(s):** Registration in semesters one, two, three or four. May not register in SART*1060 in the same term. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations during certain periods. Please see the departmental website for more information.

**Department(s):** School of Fine Art and Music

### SART*1060 Core Studio F,W (2-4) [0.50]

This course provides a foundation in the technical and theoretical aspects of contemporary three-dimensional and time-based media. Through a combination of lectures, studio projects and guest speakers, students will explore perceptual, conceptual and topical dimensions of contemporary art making practices.

**Restriction(s):** Registration in semesters one, two, three or four. May not register in SART*1050 in the same term. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations during certain periods. Please see the departmental website for more information.

**Department(s):** School of Fine Art and Music

### SART*1150 Contemporary Artistic Practice F (3-0) [0.50]

This course, which uses a web-based platform, is an introduction to contemporary art and artists. Lectures will be augmented by studio art assignments and online discussions in order to develop an understanding of material covered in the course.

**Offering(s):** Offered through Distance Education format only.

**Department(s):** School of Fine Art and Music

### SART*2090 Drawing I F,W (0-6) [0.50]

This course will consider the activity of drawing as an ability to work with a varied range of applications – all of them concerned with the investigation and development of ideas through making an image. This course is an introduction to the basic concepts, techniques and media of drawing, through disciplined observational and imaginative study.

**Prerequisite(s):** (1 of ARTH*1220, ARTH*1510, ARTH*1520), SART*1050, SART*1060

**Co-requisite(s):** SART*1060 can be taken as co-requisite

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

**Department(s):** School of Fine Art and Music

### SART*2200 Painting I F,W (0-6) [0.50]

This course is designed to introduce students to the fundamentals of observational painting in oil and acrylic paint. In addition to developing skill in colour-mixing, composition, and using value to create space and form, students will learn proper care for tools and how to prepare supports. Regular discussions of contemporary and relevant historical examples will assist students to understand their work as part of the broader conversation and discourse in painting. Prior or concurrent Drawing classes are recommended.

**Prerequisite(s):** (1 of ARTH*1220, ARTH*1510, ARTH*1520), SART*1050, SART*1060

**Co-requisite(s):** SART*1060 can be taken as co-requisite

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

**Department(s):** School of Fine Art and Music

### SART*2300 Sculpture I,F,W (0-6) [0.50]

This course is an introduction to contemporary sculptural concerns through projects, readings and visual research. Sculptural principles of form and space will be addressed through hands-on engagement with a variety of materials and methods. Readings provide an overview of Modernist sculpture and basic critical theory.

**Prerequisite(s):** (1 of ARTH*1220, ARTH*1510, ARTH*1520, ARTH*2220), SART*1050, SART*1060

**Co-requisite(s):** SART*1050 can be taken as co-requisite

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

**Department(s):** School of Fine Art and Music

### SART*2460 Printmaking I F (0-6) [0.50]

This course is an introduction to the printmaking media of intaglio, relief and silkscreen. Conceptual issues will be examined in relation to the creation of prints with discussions around the characteristics of the edition, the monoprint and the series through printmaking objects and readings.

**Prerequisite(s):** (1 of ARTH*1220, ARTH*1510, ARTH*1520), SART*1050, SART*1060

**Co-requisite(s):** SART*1060 can be taken as co-requisite

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

**Department(s):** School of Fine Art and Music

### SART*2610 Photography I F,W (0-6) [0.50]

This course is an introduction to the historic, conceptual, and material nature of photography in contemporary art. Content will include basic digital, analogue and studio techniques, and an exploration of historic techniques such as the Photogram and Camera Obscura. Readings, discussions, and assignments will forge connections between historic and contemporary modes of image making, and will encourage students to experiment with innovative ways of utilizing the photographic medium.

**Prerequisite(s):** (1 of ARTH*1220, ARTH*1510, ARTH*1520), SART*1050, SART*1060

**Co-requisite(s):** SART*1060 can be taken as co-requisite

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

**Department(s):** School of Fine Art and Music

### SART*2700 Digital Media I: Using Vector and Raster Images F (0-6) [0.50]

This course provides an in-depth introduction to the image making possibilities in digital media. Students will learn various methods of drawing vector-based imagery and compositing raster images in industry-leading drawing and image creation applications. Readings covering relevant principles and theories in digital media will form a critical supplement to the course. Some computer experience is recommended.

**Prerequisite(s):** (1 of ARTH*1220, ARTH*1510, ARTH*1520, ARTH*2220), SART*1050, SART*1060

**Co-requisite(s):** SART*1060 can be taken as co-requisite

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

**Department(s):** School of Fine Art and Music

### SART*2710 Digital Media II: Animation W (0-6) [0.50]

This course adds to the important key concepts and methods unique to digital media introduced in Digital Media I with an in-depth introduction to animation in digital media. Students will learn a number of basic principles and methods in animation using industry standard digital tools. Students will apply their understanding of these concepts and methods for the production of a number of short animated sequences using industry leading vector-based animation and motion graphics application software. Readings covering relevant principles and theories will form a critical supplement to the course.

**Prerequisite(s):** SART*2700

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations, majors or semester levels during certain periods. Please see the department for more information.

**Department(s):** School of Fine Art and Music
SART*3090 Drawing II F,W (0-6) [0.50]

This course attempts to foster understanding of the basis and technical issues necessary to the making of drawings while introducing the philosophical and critical issues related to the discipline. This course will consider drawing as an activity with a wide range of applications.

Prerequisite(s): SART*2000
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3200 Painting II F,W (0-6) [0.50]

In this course, technical, aesthetic and philosophical issues central to contemporary painting will be investigated. These include diverse approaches to representational painting today as well as an introduction to abstraction and other non-representational strategies. Activities such as class discussions, field trips and presentations on contemporary artists will assist students to situate their own developing practices within the field.

Prerequisite(s): SART*2200
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3300 Sculpture II F,W (0-6) [0.50]

This is a technical and experimental course. Critical issues in modernist and post-modernist sculpture will be explored and deployed. Projects will focus on the tools and operations of the wood shop, axioms and principles of modernism, operations of the welding shop and 3D printing, and the critical and generative principles of post-modernism.

Prerequisite(s): SART*2300
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3470 Printmaking and Photo/Digital Technologies F (0-6) [0.50]

This course will introduce the use of contemporary digital imaging for printmaking applications in etching, silkscreen and lithography. File preparation, film input, digital prints and mixed media approaches will be covered. Conceptual issues will be examined in relation to the creation of prints with discussions around the use of digital files and output as a source for printmaking.

Prerequisite(s): SART*2460
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3480 Digital Media III: Creating Content for the Web F (0-6) [0.50]

This course introduces students to key methods behind the design, development, and delivery of a modern website. Students will gain a stronger grasp of the syntax, standards and methods for using HTML, CSS, and will be introduced to JavaScript to display a variety of static and dynamic content on the Web introduced in Digital Media I and II. Readings covering relevant principles and theories will give students a stronger critical awareness of the Internet as a medium for expression, and a variety of in-class exercises will guide students towards the completion of a fully functional final website.

Prerequisite(s): SART*2710
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3600 Digital & Non-Silver Photography W (0-6) [0.50]

This course combines non-silver and digital photographic methods as the basis for an aesthetic investigation into the formal, conceptual, technical and theoretical issues related to historic and new technologies in photographic practice. Course content will include non-silver printing such as Platinum/Palladium, large format photography, and an exploration of scale in digital photographic production. In-class discussions, readings and seminars are designed to provide students with a critical and historical understanding of the art-making process.

Prerequisite(s): SART*2610
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3660 Printmaking II F,W (0-6) [0.50]

This course provides an introduction to stone lithography and will continue to investigate the formal and technical aspects of printmaking techniques covered in SART*2460. Students will be actively engaged in exploring contemporary concerns in printmaking through ideas of dissemination, sequence and systems through scrutiny of printmaking objects and readings.

Prerequisite(s): SART*2460
Restriction(s): SART*3450

Department(s): School of Fine Art and Music

SART*3750 Photography II F,W (0-6) [0.50]

This course encourages visual problem solving and analytical skills within an experimental and exploratory studio arts practice. Course material is presented through lectures, labs, and critiques to engage with the form, content and technical attributes of the medium. Scale, electronic flash lighting, medium format photography, and darkroom printing will be covered. In-class discussions, readings and seminars are designed to provide students with a critical and historical understanding of the art-making process.

Prerequisite(s): SART*2610
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3770 Experimental Studio II F,W (0-6) [0.50]

Students will explore and consider the found object and appropriation in art, the use of language and text in art, and other conceptual art practices in various media. In a context of critical reading, writing, class exercises and discussion - students will continue developing their technical skills in video and sound production. We may also consider such forms as collage, the artist book and/or artist multiple, performance, social practice art, and other experimental studio strategies.

Prerequisite(s): SART*2800
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*3800 Experiential Learning I S,F,W (0-6) [0.50]

This is an independent study course based on Studio Art-related practical experience. Evaluation will be based on assignments related to work duties. Written proposals, signed by the supervisor and a faculty member, must be submitted to the Director for the School for approval by the last day of course selection in the Fall (for Winter) or Winter (for the following Summer or Fall).

Prerequisite(s): 3.00 credits in Studio Art
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts. Instructor consent required.

Department(s): School of Fine Art and Music

SART*3900 Experiential Learning II S,F,W (0-6) [0.50]

This course provides students with an opportunity to continue the workplace or activity begun in SART*3800 in greater depth, or to experience a new work/study situation. Evaluation will be based on assignments related to work duties. Written proposals, signed by the supervisor and a faculty member, must be submitted to the Director for the School for approval by the last day of course selection in the Fall (for Winter) or Winter (for the following Summer or Fall) semester.

Prerequisite(s): SART*3800 and 3.50 credits in Studio Art
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 80% in all ARTH and SART course attempts. Instructor consent required.

Department(s): School of Fine Art and Music
SART*4090 Drawing III F (0-6) [0.50]
This course will study the technical development of observational drawing as well as the experimental and intentional development of drawing as a contemporary art form. Drawings will be made and discussed with attention to semiotic theory in order to examine the production and interpretation of meaning.

Prerequisite(s): SART*3090
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4130 Drawing IV W (0-6) [1.00]
This is an advanced course which explores drawing through individually oriented production supported by critical study of diverse contemporary approaches to the medium. In this course drawings will continue to be considered in the light of semiotic theory in order to examine the production and interpretation of meaning.

Prerequisite(s): SART*4090
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4200 Painting III F (0-6) [0.50]
This course focuses on experimentation as a means to investigate the possibilities available to a contemporary painter. Representational and non-representational approaches will continue to be explored, with emphasis on the development of the student’s own research interests. Critical readings, in-class discussions and gallery visits help position their research within the discourse. Paintings will be analyzed with attention to semiotic theory in order to examine the production and interpretation of meaning.

Prerequisite(s): SART*3200
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4240 Painting IV W (0-6) [1.00]
This capstone course offers advanced investigations into the theory and practice of painting, with strong emphasis on the development of a critically informed and engaged individual painting practice. Studio work is supplemented with critical readings and a gallery field trip. Students collaborate to mount an exhibition of their work at the end of the semester.

Prerequisite(s): SART*4200
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4250 Special Topics in Painting and Drawing W (0-6) [0.50]
This is a variable-content advanced course where topics change every year and each allows for in-depth focus on a specific theme, subject or technique of interest to both painting and drawing students. Studio work will be supported by readings in contemporary theory and criticism and lectures on pertinent artists. The emphasis is on contemporary approaches to artmaking.

Prerequisite(s): SART*3090 or SART*3200
Restriction(s): Registration is limited to students registered in the Art History specialization or Studio Art Major, with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4260 Topics in Experimental Studio F (0-6) [0.50]
For this advanced course, a specific and timely theme, subject, or technique will be explored in a context of critical reading, writing, class exercises and discussion. Topics will vary according to the proposals of artist-instructors. Students will be encouraged to produce works in media such as video art, audio art, artist book and/or multiple, performance, social practice art, interventions, and other “post-studio” and experimental studio practices.

Prerequisite(s): SART*3770
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4300 Sculpture III F,W (0-6) [0.50]
Contemporary issues in sculpture will be addressed through studio projects, readings, research and critique. Students will study various materials and conceptual methodologies in an environment which emphasizes production, independent research and group interaction.

Prerequisite(s): SART*3300
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4330 Sculpture IV F,W (0-6) [1.00]
In this capstone course contemporary issues in sculpture will be addressed through independent projects, readings, research and critique. Students will study various material and conceptual methodologies associated with contemporary art in an environment which stresses production, independent research and group interaction. Interdisciplinary and collaborative projects based on the students' own research are encouraged.

Prerequisite(s): SART*4300
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4360 Printmaking III F (0-6) [1.00]
Contemporary issues in printmaking will be addressed through studio projects, readings and independent work in close consultation with the instructor. Interdisciplinary projects will be encouraged using any of the techniques studied in printmaking to this point. Conceptual approaches, including prints and installation, modular and sculptural applications can be explored.

Prerequisite(s): SART*3660 or (3 of SART*2460, SART*2470, SART*3410, SART*3450, SART*3470)
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4410 Printmaking IV W (0-6) [1.00]
This course focuses on independent work with an emphasis on an experimental use of printmaking media. Students will continue to investigate digital and traditional printmaking methods. There will be greater emphasis on the critical issues relevant to printmaking with attention to clarity of personal statement, originality and professionalism both in studio practice and discussion.

Prerequisite(s): SART*4410
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4470 Printmaking IV W (0-6) [1.00]
This course focuses on independent work with an emphasis on an experimental use of printmaking media. Students will continue to investigate digital and traditional printmaking methods. There will be greater emphasis on the critical issues relevant to printmaking with attention to clarity of personal statement, originality and professionalism both in studio practice and discussion.

Prerequisite(s): SART*4410
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.
Department(s): School of Fine Art and Music

SART*4660 Topics in Experimental Studio F (0-6) [0.50]
SART*4670 Topics in Experimental Studio F (0-6) [0.50]

For this advanced course, a specific and timely theme, subject, or technique will be explored in a context of critical reading, writing, class exercises and discussion. Topics will vary according to the proposals of artist-instructors. Students will be encouraged to produce works in media such as video art, audio art, artist book and/or multiple, performance, social practice art, interventions, and other “post-studio” and experimental studio practices.

Prerequisite(s): SART*3770
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*4700 Photography III F (0-6) [0.50]

This course offers some directed projects, but also provides students with the opportunity to generate, sustain, and complete a self-directed body of work. Students will explore various approaches to historical and contemporary modes of photography, with an emphasis on experimental, hybrid, and material-based approaches to the medium. An emphasis will be placed on conceptual development, exploring the interaction of formal and representational concerns within the practice of photography.

Prerequisite(s): SART*3600 or SART*3750
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): School of Fine Art and Music

SART*4720 Photography IV W (0-6) [1.00]

This course will emphasize research, problem solving, technical experimentation, and material and aesthetic project development. Students can choose to work with black and white, colour, non-silver, digital or hybrid photographic techniques in order to produce a body of work for exhibition. Opportunities for interdisciplinary approaches to photographic practice and independent and sustained research methodologies will be encouraged. The course will also cover professional skills, such as how to write an artist statement, how to apply for funding, and how to organize, curate and install a group exhibition.

Prerequisite(s): SART*4700
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): School of Fine Art and Music

SART*4750 Specialized Studio Practice I F (0-6) [1.00]

This is an advanced and specialized course in individual studio work, which affords students opportunities for interdisciplinary and collaborative approaches and oversees the development of independent student projects. Students will research and complete a major self-directed project. This course is not intended for all Honours students. This course is intended to assist in the preparation for graduate school and professional practices in the Arts.

Prerequisite(s): A minimum of 0.50 credits at the 4000-level in Studio Arts, a minimum cumulative average of at least 80% in SART courses and ARTH courses, 6.50 credits in SART and ARTH.
Restriction(s): Instructor consent required. Selection is by a process of portfolio submission and interview.

Department(s): School of Fine Art and Music

SART*4760 Specialized Studio Practice II W (0-6) [1.00]

This course is a continuation of SART*4750.
Prerequisite(s): SART*4750
Restriction(s): Instructor consent required. Selection for entry into SART*4750 is by a process of portfolio submission and interview.

Department(s): School of Fine Art and Music

SART*4800 Special Topics in Sculpture W (0-6) [0.50]

This is an advanced course which focuses on a specific topic, concept or technique in sculpture. Subject matter will vary according to the instructor or instructors and will consist of topics not otherwise available in the curriculum. Topics may include, for example, digital media, public art, mold making, and installation.

Prerequisite(s): SART*3300
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*4810 Experimental Studio III W (0-6) [0.50]

This course consists of thematic projects that elaborate on issues and practices that are timely and significant to contemporary art. In a context of critical reading, writing, class exercises and discussion — students will be encouraged to consider various forms and media to realize their ideas. Students will continue developing their technical skills in video and sound production and are encouraged to explore such forms as collage, assemblage, the artist book and/or multiple, performance, social practice art, interventions, and other “post-studio” and experimental studio strategies.

Prerequisite(s): 1 of SART*3770, SART*4660, SART*4670
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): School of Fine Art and Music

SART*4870 Special Topics in Sculpture W (0-6) [0.50]

This is an advanced course which focuses on a specific topic, concept or technique in sculpture. Subject matter will vary according to the instructor or instructors and will consist of topics not otherwise available in the curriculum. Topics may include, for example, digital media, public art, mold making, and installation.

Prerequisite(s): SART*3300
Restriction(s): Registration is limited to students registered in the Art History or Studio Art specializations with an average of 70% in all ARTH and SART course attempts.

Department(s): School of Fine Art and Music

SART*4880 Experimental Studio IV W (0-6) [1.00]

In this capstone course students will respond to thematic projects that elaborate on issues and practices that are timely and significant in contemporary art, in addition to producing independent project centered on their own research, in close consultation with the instructor. In a context of critical reading, writing, class exercises and discussion, students are expected to produce professional quality artworks in forms such as video art, audio art, artist book and/or multiple, performance, social practice art, interventions, and other “post-studio” and experimental studio strategies. Students will also develop professional skills including giving presentations on their work, writing artist statements and exhibition proposals.

Prerequisite(s): 1 of SART*4660, SART*4670, SART*4810
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): School of Fine Art and Music

SART*4890 Digital Media IV W (0-6) [1.00]

SART*4890 Digital Media IV W (0-6) [1.00]

This course examines the intellectual and creative ethic of the Internet and considers the realities of establishing an art practice in a culture of instant gratification and overwhelming interruptions. Informed by course readings and self-directed research, students create multimedia projects that engage the Internet as a distinct contemporary medium.

Prerequisite(s): SART*3480
Restriction(s): Registration is limited to students registered in the Studio Art Major with an average of 70% in all ARTH and SART course attempts. This is a Priority Access Course. Some restrictions may apply during some time periods.

Department(s): School of Fine Art and Music
## Theatre Studies

### Course Descriptions, Theatre Studies

### Directed Readings

**School of English and Theatre Studies**

**THST*3600 [0.50]** Directed Readings

**THST*3630 [0.50]** Special Studies in Studio Practice

**THST*4650 [0.50]** Honours Essay

For times and dates of auditions, interviews, or the deadline for applications, students should consult the School. All students applying for entry to these courses must obtain the signature of the Theatre Studies Program advisor or the Director, who will admit students only after consultation with the instructor.

Iterations of some courses may include field trips for which there are supplemental fees. The Theatre Studies program has a particular interest in the drama and theatre of Canada. Course offerings will reflect this concentration where appropriate.

### Introduction to Performance F,W (3-0) [0.50]

This course functions as a foundation for the study of theatre, performance, and media. Students will be introduced to the formative terms and theories of theatre, performance, and media as an academic discipline and to the conceptual and social terms of theatre and media as cultural practices. This course includes attendance at performances.

**Department(s):** School of English and Theatre Studies

### Theatre Workshop I W (3-2) [0.50]

This course provides a fundamental introduction to the processes of theatrical production, with practical application and study of the analytic, creative and technical skills that bring an idea to life on the stage. Students will learn how to analyze a play-script from the perspective of the director, actor, designer and technician and will also be introduced to the fundamentals of theatre technology, scene study and production decision-making.

**Prerequisite(s):** THST*1040

**Restriction(s):** This is a Priority Access Course. Enrolment may be restricted to students registered in the Theatre Studies major, minor, or area of concentration.

**Department(s):** School of English and Theatre Studies

### The Languages of Media F (3-2) [0.50]

This introductory course examines film, radio, television, and digital media, focusing on the codes and conventions used by different media to create relationships between structure and content, to make meaning.

**Department(s):** School of English and Theatre Studies

### Theatre Research II W (3-0) [0.50]

This course examines major approaches to the study of communication, including cybernetic, anthropological, semiotic and other perspectives, focusing on how people transmit information and construct meaning.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** THST*1200

**Department(s):** School of English and Theatre Studies

### Contemporary Cinema W (2-3) [0.50]

The course is designed to give the student knowledge and understanding of contemporary cinematic expression.

**Equate(s):** DRMA*2500

**Department(s):** School of English and Theatre Studies

### Experiential Learning S,F,W (3-0) [0.50]

Under the supervision of a faculty member, students in this course will be placed in experiential learning situations at the university or in the wider community where they will support a community or academic project. Students will be required to become familiar with the goals and procedures of the project, to frame and articulate learning objectives, and to express in writing their learning outcomes. Depending on the placement, a police record check may be required in order to placed. Please consult with the Theatre Studies website for further information on experiential learning opportunities.

[https://www.uoguelph.ca/sets/theatre-studies/ba](https://www.uoguelph.ca/sets/theatre-studies/ba)

**Prerequisite(s):** 7.50 credits, including THST*2050, THST*2190

**Restriction(s):** Restricted to students in a Theatre Studies specialization. Instructor consent required.

**Department(s):** School of English and Theatre Studies

### Performance and the Past W (3-0) [0.50]

This course introduces students to the play creation techniques of devising, in which the codes and conventions used by different media to create relationships between structure and content, to make meaning. Students will be introduced to the formative terms and theories of theatre, performance, and media as an academic discipline and to the conceptual and social terms of theatre and media as cultural practices. This course includes attendance at performances.

**Department(s):** School of English and Theatre Studies

### Devising W (3-0) [0.50]

This course introduces students to the play creation techniques of devising, in which the script is generated collaboratively by the creative team (performers, directors, designers and dramaturges) in the rehearsal process. Students will work collaboratively on demonstration exercises including physicalization, visualization, improvisation, and scripting, culminating in rehearsing and performing original material. Significant attention is paid to creative and collaborative problem solving in this studio course.

**Prerequisite(s):** THST*1040, THST*1190

**Restriction(s):** THST*2080 Restricted to students in a Theatre Studies specialization.

**Department(s):** School of English and Theatre Studies

### Writing for Performance F (3-0) [0.50]

This course is a theoretical and applied study of creative writing for performance.

**Prerequisite(s):** THST*1040

**Department(s):** School of English and Theatre Studies

### Theatre Workshop II F (3-2) [1.00]

This course is an intensive study of the methods of theatrical production, organized around a creative project. Students will rotate through modules focusing on skill development in the areas of acting, design, costumes, sets, lights, sound, media and stage management. Depending on the scale of the production and the class size, this course may be co-taught with Theatre Workshop III. Students in the course may undertake performance or production roles in a public performance.

**Prerequisite(s):** THST*1040, THST*1190

**Restriction(s):** THST*2230 Restricted to students in a Theatre Studies specialization.

**Department(s):** School of English and Theatre Studies

### Performance and the Past W (3-0) [0.50]

This course examines major approaches to the study of communication, including cybernetic, anthropological, semiotic and other perspectives, focusing on how people transmit information and construct meaning.

**Offering(s):** Offered in even-numbered years.

**Prerequisite(s):** THST*1040

**Department(s):** School of English and Theatre Studies
THST*3170 Special Topics F (3-0) [0.50]
This course provides students with the opportunity to work intensively in an area of theatre work in a project defined by faculty research. The material and topic will vary but the course will consistently engage with an area of creative practice, such as scenography and design, directing, acting studio or playwriting. This course may be offered as a performance-centered studio, a design workshop studio, or a playwriting seminar, depending on the instructor. Consult the Theatre Studies website for more information on a specific iteration of the course.
Prerequisite(s): 7.50 credits, including THST*2270
Restriction(s): THST*3540, THST*3550, THST*3620, THST*3650, THST*3660, THST*3850 Restricted to students in a Theatre Studies specialization.
Department(s): School of English and Theatre Studies

THST*3190 Theatre Workshop III F (3-2) [1.00]
Students in this course will undertake the design, technical production and performance of a fully realized theatrical production. All production assignments (cast, technical crews, front of house, dramaturgy, assistant director, assistant designer) will be drawn from students enrolled in the course and in cooperation with senior students enrolled in THST*4500. The course will be taught as a workshop with skill-specific modules, out-of-class rehearsals, and technical training crew calls. Depending on the scale of the production and the class enrolments, this course may be co-taught with THST*2190.
Prerequisite(s): 7.50 credits, including THST*2190
Restriction(s): THST*3080, THST*3110, THST*3120, THST*3220, THST*3230 Restricted to students in a Theatre Studies specialization.
Department(s): School of English and Theatre Studies

THST*3260 Shakespeare: Text & Performance S (3-0) [0.50]
The course offers an analysis of a selection of plays by William Shakespeare. In addition to textual analysis, the students will be introduced to the stage history of the plays being considered, with attention to conditions of production. The course normally will include consideration of plays by Shakespeare which are currently in production at the Stratford Festival; students will have the opportunity to see the plays in performance for which an additional fee may be charged. The course is taught as an intensive seminar in conjunction with the Stratford Festival and is offered in Stratford, Ontario. This course is designed to give the student knowledge and understanding of Canadian film and film makers. This course is co-taught with THST*2270.
Prerequisite(s): 2.50 credits in Theatre Studies including (1 of THST*2010, THST*3140, 1.00 credits in English)
Department(s): School of English and Theatre Studies

THST*3340 Voice and Text in Performance S (6-6) [0.50]
Within a studio context, students are introduced to techniques of voice, particularly in relation to performing verse. The course is taught as an intensive lab in conjunction with the Stratford Festival and is offered in Stratford, Ontario. The course may involve a lab fee. Admission to the course is by application to the School of English and Theatre Studies. Further information is available from the School.
Prerequisite(s): 2.50 credits in Theatre Studies including (1 of THST*3080, THST*3110, THST*3190)
Co-requisite(s): THST*3260
Restriction(s): Instructor consent required.
Department(s): School of English and Theatre Studies

THST*3500 Performance Praxis I W (3-2) [0.50]
Students will collaborate in the exploration of theory and creative practice in a project-based course. The projects may be theatrical or media-based, or an integration of both depending on the iteration of the course. Please consult the Theatre Studies website for more information.
Prerequisite(s): THST*2050, THST*2270
Restriction(s): THST*3430, THST*3460, THST*3480, THST*3550, THST*3700 Restricted to students in a Theatre Studies major or minor.
Department(s): School of English and Theatre Studies

THST*3530 Canadian Cinema F (2-3) [0.50]
This course is designed to give the student knowledge and understanding of Canadian film and film makers.
Offering(s): Offered in even-numbered years.
Prerequisite(s): 7.50 credits
Department(s): School of English and Theatre Studies

THST*3600 Directed Readings U (3-0) [0.50]
This course provides Independent study opportunities based upon bibliographies established in consultation with the instructor. An essay will normally constitute the written requirement for the course. Tutoring and/or consultation will be arranged, depending on the topic or materials for study. Projects for this course are subject to the approval of the School, and must be submitted to the Director, on forms provided by the School, no later than the last day of classes in the semester prior to enrolment in the course.
Prerequisite(s): 3.00 credits in Theatre Studies including [(THST*2010, THST*2230) or (THST*3140, THST*2190), (1 of THST*2050, THST*2080, THST*2120, THST*2240)]
Equate(s): DRMA*3630
Restriction(s): Instructor consent required.
Department(s): School of English and Theatre Studies

THST*3630 Special Studies in Studio Practice U (3-0) [0.50]
The course provides an intensive exploration of one aspect of studio practice: playwriting, acting, design or technical theatre.
Prerequisite(s): 3.00 credits in Theatre Studies including one of the following, as appropriate to the topic of the course: THST*2080, THST*2120, THST*2230, THST*2240.
Department(s): School of English and Theatre Studies

THST*3850 Drama in London U (2-4) [0.50]
A course designed for students taking the London Semester consisting of a study of theatre events in London, through attending performances, reading texts and meeting for weekly seminars.
Equate(s): DRMA*3950
Restriction(s): Permission of the Co-ordinator of the London Semester.
Department(s): School of English and Theatre Studies

THST*4190 Theatre Workshop IV F (3-2) [1.00]
This course is an intensive study of the methods of theatrical production, organized around a creative project. Students will focus on skill development in the areas of acting, design, costumes, sets, lights, sound, media and stage management. This course may be co-taught with Theatre Workshop II and III. Students in the course may undertake performance or production roles in a public performance.
Prerequisite(s): THST*3190
Restriction(s): Restricted to students in a Theatre Studies specialization with an average of 70% in the specialization. Instructor consent required.
Department(s): School of English and Theatre Studies

THST*4240 Theatrical Organization and Culture F (3-0) [0.50]
This course studies various models of theatrical organization such as social context, theatrical funding, board and management structures, and artistic mandates together with their implications for theatrical production and interpretation.
Prerequisite(s): 10.00 credits including 1.00 credits in Theatre Studies.
Restriction(s): THST*3240
Department(s): School of English and Theatre Studies

THST*4270 Research Seminar I F (3-0) [0.50]
This course is a research seminar in selected topics in media, theatre and performance. The course features variable content. Please consult the Theatre Studies website for more information.
Prerequisite(s): 10.00 credits, including (1 of THST*2270, THST*3140, THST*3550, THST*3650, THST*3660)
Restriction(s): THST*4320, Restricted to students in a Theatre Studies specialization, with an average of 70% in the specialization.
Department(s): School of English and Theatre Studies

THST*4280 Ensemble Project W (6-9) [1.00]
Students will engage throughout the semester with the processes of forming a theatre company, theorizing its organizational structure, exploring fundraising and publicity exercises, casting, designing, dramaturging, directing, and mounting a production, and engaging in post-production analysis that assesses the social and theatrical impact of the decisions taken and procedures employed.
Prerequisite(s): [(THST*2010, THST*2230), (2 of THST*2080, THST*2120, THST*2240), (THST*3550, THST*3850, (THST*3650 or THST*3660)) or (THST*2190, THST*2120, THST*3140, THST*3170, THST*3500)]
Restriction(s): Restricted to majors in Theatre Studies who have completed a minimum of 14.00 credits with 70% cumulative average in Theatre Studies.
Department(s): School of English and Theatre Studies

**Toxicology**

**Department of Biomedical Sciences**
**Department of Chemistry**
**School of Environmental Sciences**
**Department of Mathematics and Statistics**
**Department of Molecular and Cellular Biology**
**Department of Pathobiology**

**TOX*2000 Principles of Toxicology F (3-0) [0.50]**

This course will establish the scientific principles underlying the toxic actions of various substances and will introduce the various challenges within the field of toxicology. The chemical nature of injurious substances, their uptake and metabolism by non-target organisms, and their mode of toxic action will be studied in addition to the methods used in safety evaluations and risk assessment.

**Prerequisite(s):**
- CHEM*1050, (1 of IPS*1500, MATH*1080, MATH*1200), (1 of BIOL*1040, BIOL*1070, BIOL*1080, BIOL*1090)

**Department(s):** Department of Chemistry

**TOX*3300 Analytical Toxicology F (3-3) [0.50]**

A course in trace analysis designed for students in toxicology and related programs. Analytical techniques of value in analyzing samples of toxicological importance will be presented with emphasis also on sample collection and preparation prior to analysis.

**Offering(s):** Last offering - Fall 2020

**Prerequisite(s):**
- CHEM*2480, BIOC*2580, TOX*2000 (TOX*2000 may be taken concurrently)

**Restriction(s):**
- CHEM*3430, This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Chemistry

**TOX*3360 Environmental Chemistry and Toxicology S,W (3-0) [0.50]**

This course examines the chemistry of the natural environment and the influence of pollutants upon the environment. Topics will include methods of introduction of pollutants to, and removal of pollutants from, the environment. (Also listed as CHEM*3360.)

**Offering(s):** Also offered through Distance Education format.

**Prerequisite(s):**
- CHEM*1050

**Department(s):** Department of Chemistry

**TOX*4000 Medical Toxicology F (3-0) [0.50]**

This course will focus on the toxicology of mammalian body systems with emphasis on dose-response, mechanisms and the sites of action of major groups of chemical toxicants and biological toxins. The course is designed for students majoring in Bio-Medical Sciences, Biomedical Toxicology and Toxicology.

**Prerequisite(s):**
- BIOM*3090

**Restriction(s):**
- This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

**Department(s):** Department of Biomedical Sciences

**TOX*4100 Toxicological Pathology W (2-2) [0.50]**

Evaluation of the pathologic responses of cells and tissues to toxic compounds. The course is designed for students majoring in toxicology.

**Prerequisite(s):**
- PATH*3610 (or equivalent)

**Department(s):** Department of Pathobiology

**TOX*4200 Topics in Toxicology W (3-0) [0.50]**

Topics in toxicology will consist of oral and written presentations by students, faculty members, and guest lecturers. The emphasis will be on the broad integrative aspects of toxicology with particular reference to the whole organism and higher levels of natural systems; risk assessment and regulatory toxicology.

**Prerequisite(s):**
- TOX*2000, (CHEM*3430, TOX*3300)

**Restriction(s):**
- Restricted to students in BSCH.TOX, BSCH.TOX.C

**Department(s):** Department of Biomedical Sciences, School of Environmental Sciences

**TOX*4590 Biochemical Toxicology F (3-0) [0.50]**

This course will focus on the biotransformation of drugs, carcinogens, and other toxicants, including consideration of human health implications of these metabolic processes. The enzymes catalyzing these reactions will be discussed in detail.

**Prerequisite(s):**
- (1 of BIOC*3570, CHEM*3430, TOX*3300, BIOC*3560, ( MBG*2020 or MBG*2040)

**Department(s):** Department of Chemistry

**Revision:**

**TOX*4900 Toxicology Research Project I S,F,W (0-9) [1.00]**

This research project in toxicology is designed to provide senior undergraduate students with an opportunity to conduct research in an area of toxicology. Students should note that most projects are of two semesters' duration, and should plan their studies with the expectation that they will also register in TOX*4910 in a subsequent semester. Students must make arrangements with both the faculty supervisor and the course coordinator at least one semester in advance. The project supervisor should normally be a faculty member from the Toxicology Program.

**Prerequisite(s):**
- CHEM*3430 or TOX*3300

**Restriction(s):**
- Normally a minimum cumulative average of 70% is required. Instructor consent required.

**Department(s):** Department of Chemistry

**TOX*4910 Toxicology Research Project II S,F,W (0-9) [1.00]**

This course involves a research project in toxicology. Students must make arrangements with both the faculty supervisor and the course coordinator at least one semester in advance. The project supervisor should normally be a faculty member from the Toxicology Program.

**Prerequisite(s):**
- TOX*4900

**Restriction(s):**
- Normally a minimum cumulative average of 70% is required. Instructor consent required.

**Department(s):** Department of Chemistry
### XII. Course Descriptions, Veterinary Medicine

#### Department of Biomedical Sciences

**Veterinary Medicine**

- **VETM*3070 Veterinary Anatomy P1 (2-6) [2.00]**
  - An introduction to comparative, topographical anatomy, primarily of 4 domestic mammals: cat, dog, horse and cow. Full dissections of these species are related to the living animal and to imaging, to form the basis for future studies in clinical morphology. Students are first introduced to the major anatomical systems and then to the regions in detail: thorax, abdomen, pelvis and perineum, limbs, and head and neck. Active learning, problem solving, communication skills and the integration of material across concurrent courses are fostered.
  - **Co-requisite(s):** All Phase 1 courses.
  - **Department(s):** Department of Biomedical Sciences

- **VETM*3080 Veterinary Physiology and Biochemistry P1 (3-3) [2.00]**
  - The course describes the physiological processes carried out by the major tissues and organ systems, and the regulatory mechanisms that affect tissue and organ function. Topics dealt with in the course include the following: the cellular and chemical constituents of blood, blood coagulation and haemostasis, the function of the immune system, resistance to infectious agents and the principles of immunoprophylaxis, cardiac function, cardiovascular haemodynamics, blood pressure, peripheral and regional circulation of blood, the lymph circulation, the structure and function of the mammalian nervous system and organs associated with special senses, the functions of the digestive tract, lungs and kidney thermoregulation and water, electrolyte and acid-base balance. The homestatic features and species variation of the tissue organ systems will be emphasized.
  - **Co-requisite(s):** All Phase 1 courses.
  - **Department(s):** Department of Biomedical Sciences, Department of Pathobiology

- **VETM*3120 Veterinary Histology and General Pathology P1 (3-3) [0.75]**
  - A lecture and laboratory course emphasizing the gross and microscopic organization of the tissues and organs of domestic animals in various physiological states. A comparative approach is used to highlight normal and abnormal gross anatomy and histology to understand how disease affects gross and microanatomical organ structure and function. The lecture and laboratory components are well integrated to provide students with an excellent hands-on experience in histology and pathology.
  - **Co-requisite(s):** All Phase 1 courses.
  - **Department(s):** Department of Biomedical Sciences, Department of Pathobiology

- **VETM*3210 Art of Veterinary Medicine I P1 (V-V) [0.50]**
  - In a series of integrated modules, this course will assist students in increasing their self-awareness and comprehension of a range of legal, professional and ethical values and behaviours that are essential and normal components of veterinary medicine. Emphasis will be placed on understanding, evaluating and improving interpersonal relations and oral and written communication skills. The ethical principles that underlie veterinary medicine will be explored in depth. The course will also assist students in understanding their position in the developing history of veterinary medicine and inform them of emerging trends. Issues related to professional development, how other species interact with humans, and the client/patient/veterinarian triad will be introduced. The application of these learned skills in the resolution of problems will be introduced.
  - **Co-requisite(s):** All Phase 1 courses.
  - **Department(s):** Dean's Office, Ontario Veterinary College, Department of Population Medicine, Veterinary Teaching Hospital

- **VETM*3220 Art of Veterinary Medicine II P2 (2-0) [0.50]**
  - Using modules, this course will build on, and enhance, the knowledge base and skill set acquired in Phase I in the area of communications, human-animal interactions, professional development, and the client/patient/veterinarian triad. The focus in these areas will now move towards recognising difficulties that may arise and how to differentiate abnormal situations from normal ones. Problem-solving, conflict resolution and stress management through application of innate and acquired knowledge and skills will be developed. In addition, the course will introduce concepts of business and entrepreneurial skills which are required for successful veterinary practice.
  - **Prerequisite(s):** VETM*3210
  - **Co-requisite(s):** All Phase 2 courses.
  - **Department(s):** Dean's Office, Ontario Veterinary College, Department of Population Medicine, Veterinary Teaching Hospital

- **VETM*3390 Developmental Biology P1 (1-1) [0.50]**
  - This course introduces key concepts of veterinary embryology, genomics, and regenerative medicine. A comparative and application-based approach is taken when presenting the course material. The focus is to present issues relevant to veterinary medicine and to apply principles and theories to veterinary practice.
  - **Co-requisite(s):** All Phase 1 courses.
  - **Department(s):** Department of Biomedical Sciences

- **VETM*3400 Health Management I P1 (3-1) [0.75]**
  - The course is the first of two comprehensive and integrated courses that will span the first two phases of the DVM program. Both courses are intended to establish the foundation for, and contribute to the students' achievement of selected DVM Program elements of competency in the context of the principles of health management. The primary emphasis of this component is to establish the historical perspective and basic tools required for health promotion and disease prevention.
  - **Co-requisite(s):** All Phase 1 courses.
  - **Department(s):** Department of Population Medicine

- **VETM*3410 Health Management II P2 (3-0) [0.75]**
  - This course is a continuation of the Phase 1 course Health Management I. Previously presented concepts will be explored in greater depth and complexity. Additional emphasis will be placed on relevant epidemiological tools for monitoring, outbreak investigation, critical appraisal and the applications of principles from the previous course in the series to measure performance, including relevant production genetics, and animal behaviours in a species/industry context.
  - **Prerequisite(s):** All Phase 1 courses.
  - **Co-requisite(s):** All Phase 2 courses.
  - **Department(s):** Department of Population Medicine

- **VETM*3430 Clinical Medicine I P1 (V-V) [0.25]**
  - The course will contribute to students' achievement of selected DVM program elements of competency in the areas of animal handling and the clinical examination of various species. Students will become familiar with the expected variation in common clinical parameters and how this variation is impacted by aging, changes in health status, and external environmental influences and other sources of stress. Students will be introduced to clinical problem solving using case material from the Health Sciences Centre. They will develop their verbal and written communication skills through case simulations and analyses. The course will be presented using lectures, laboratory classes and independent study. The graduating competencies can be found on the OVC website (http://www.ovcnet.uoguelph.ca/homepage/html).
  - **Co-requisite(s):** All Phase 1 courses.
  - **Department(s):** Department of Clinical Studies

- **VETM*3440 Clinical Medicine II P2 (0-2) [0.50]**
  - The course is a continuation of Clinical Medicine I. It will contribute to students' achievement of selected elements of graduating competency in the areas of clinical examination of specific organ systems of various species. Students will enhance and refine their clinical problem solving skills using case material from the Veterinary Teaching Hospital. They will continue to develop their verbal and written communication skills through case simulations and analyses. The course will be presented using lectures, laboratory classes and independent study.
  - **Prerequisite(s):** All Phase 1 courses.
  - **Co-requisite(s):** All Phase 2 courses.
  - **Department(s):** Department of Clinical Studies

- **VETM*3450 Principles of Disease in Veterinary Medicine P2 (V-V) [2.75]**
  - This course addresses several major topics, including principles of disease induction and transmission, host response to threat and injury, pathogenetic mechanisms of infectious and toxic agents, and manipulation of disturbances in health. The interaction among host, environmental, and etiologic factors in the development of disease will be highlighted. Students will learn to recognize, describe, and evaluate disturbances of health and homeostasis at the level of the population, individual animal, organ system, tissue and cell using a variety of diagnostic modalities.
  - **Prerequisite(s):** All Phase 1 courses.
  - **Co-requisite(s):** All Phase 2 courses.
  - **Department(s):** Department of Biomedical Sciences, Department of Pathobiology
VETM*3460 Theriogenology P2 (V-V) [0.75]
A lecture and laboratory course covering the normal and abnormal reproductive systems of domestic animals. The course will include mammalian reproductive physiology and histology, diagnosis and treatment of reproductive disorders, including infertility, and management of breeding programs of the common domestic species. An introduction to the new reproductive technologies used in theriogenology will also be provided.
Prerequisite(s): All Phase 1 courses.
Co-requisite(s): All Phase 2 courses.
Department(s): Department of Biomedical Sciences, Department of Population Medicine

VETM*3470 Anaesthesiology and Pharmacology P2 (V-V) [0.75]
This course provides the general principles, pharmacologic basis, and practical applications of general and local anaesthesia in small and large animals. Other topics covered include fluid and acid-base imbalance and the prevention and treatment of surgical shock.
Prerequisite(s): All Phase 1 courses.
Co-requisite(s): All Phase 2 courses.
Department(s): Department of Biomedical Sciences, Department of Clinical Studies

VETM*3510 Principles of Surgery P2 (2-0) [0.25]
The principles of surgery in various animal species are given. The lecture topics include patient and surgeon preparation, tissue handling instrumentation, suturing and surgical principles and approaches to various organ systems and anatomical regions.
Prerequisite(s): All Phase 1 courses.
Co-requisite(s): All Phase 2 courses.
Department(s): Department of Biomedical Sciences, Department of Clinical Studies

VETM*4220 Art of Veterinary Medicine III P3 (2-0) [0.50]
This modular course will require students to apply the knowledge and skills acquired in Phases 1 and 2 to problems that incorporate aspects of one or more of the following areas: communications and conflict resolution, ethics, professional behaviour, human-animal interactions, analysis and planning, and business issues. This course will focus on methods to resolve difficulties in the above areas that are interfering with intrapersonal and interpersonal relationships and with how to return abnormal situations to normal ones. Problem-solving, conflict resolution and stress management through application of innate and acquired knowledge and skills will be expected. The course will be taught primarily through case analysis.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Dean's Office, Ontario Veterinary College, Department of Population Medicine, Veterinary Teaching Hospital

VETM*4420 Clinical Pharmacology P3 (V-V) [0.25]
This course stresses rational drug therapy through an understanding of drug factors, host factors and disease factors, with emphasis on clinically relevant properties of selected major drug classes and used for therapy (prevention and treatment) in small animals, food animals, and horses.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Restriction(s): Registration in the D.V.M. Program
Department(s): Department of Biomedical Sciences

VETM*4450 Equine Medicine and Surgery P3 (3-0) [0.50]
The course will contribute to students' achievement of selected DVM Program elements of competency in the context of the horse. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Clinical Studies

VETM*4460 Food Animal Medicine and Surgery P3 (V-V) [1.00]
The course will contribute to students' achievement of selected DVM Program elements of competency in the context of the common ruminant species and swine. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Clinical Studies, Department of Population Medicine

VETM*4470 Medicine and Surgery of Dog and Cat P3 (V-V) [1.00]
The course will contribute to students' achievement of selected DVM Program elements of competency in the context of the dog and cat. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Clinical Studies

VETM*4480 Comparative Medicine P3 (V-V) [0.75]
The course will contribute to students' achievement of selected elements of graduating competency in the context of pet birds, commercial poultry and non-traditional species (fish, amphibians, reptiles, rabbits, rodents, ferrets, non-domestic carnivores and non-domestic ungulates). The primary emphasis is directed towards enhancing the skills, knowledge and attitudes that will permit the entry-level veterinarian to develop strategies to deal with common and uncommon diagnoses.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Pathobiology

VETM*4490 Systems Pathology P3 (V-V) [1.00]
The course will contribute to students' achievement of selected elements of graduating competency in the context of pathobiology across the range of species. The primary emphasis is directed towards developing the skills, knowledge and attitudes that will permit the entry-level veterinarian to carry out the post-mortem examinations, select and perform relevant ancillary diagnostic tests and procedures, interpret findings, and initiate and interpret results of further investigations.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Pathobiology

VETM*4530 Health Management III P3 (V-V) [0.50]
The course will contribute to students' achievement of greater depth in selected elements of graduating competency in the context of health management in species of their choice. The primary emphasis is directed towards developing species-specific skills, knowledge and attitudes that will permit the entry-level veterinarian to assess and advise on animal production and performance and evaluate the necessity for, and implementation of, health management programs. The course is constructed of a series of species-based modules. Students will be required to take two of the modules.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Population Medicine

VETM*4540 Surgical Exercises P3 (V-V) [1.75]
Veterinary students receive training in preoperative planning, anaesthesia and surgical techniques, operative room decision making and post-operative care in this laboratory course. Students begin by practicing technical skills on inanimate models. They progress to performing a series of supervised operations designed to parallel the most commonly performed surgeries in private practice. A once weekly rounds period allows discussion of issues arising from the previous anaesthesia and surgery, and planning for the upcoming laboratory. Though some didactic material is presented, the course is mainly experiential. The evaluation outcome of the course is outstanding, pass or fail.
Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Restriction(s): Registration in the D.V.M. Program
Department(s): Department of Clinical Studies

VETM*4610 Small Animal Stream P4 (V-V) [7.50]
This course is for students who have selected the Small Animal Stream in Phase 4 of the DVM Program. The goal of the small animal stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.
Prerequisite(s): All Phase 3 courses.
Co-requisite(s): VETM*4900
Restriction(s): Registration in the DVM program.
Department(s): Dean's Office, Ontario Veterinary College
VETM*4660 Rural Community Practice Stream P4 (V-V) [7.50]
This course is for students who have selected the Rural Community Practice Stream in Phase 4 of the DVM Program. The goal of the rural community practice stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.

Prerequisite(s): All Phase 3 courses.
Co-requisite(s): VETM*4900
Restriction(s): Registration in the DVM program.
Department(s): Dean's Office, Ontario Veterinary College

VETM*4710 Food Animal Stream P4 (V-V) [7.50]
This course is for students who have selected the Food Animal Stream in Phase 4 of the DVM Program. The goal of the food animal stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.

Prerequisite(s): All Phase 3 courses.
Co-requisite(s): VETM*4900
Restriction(s): Registration in the DVM program.
Department(s): Dean's Office, Ontario Veterinary College

VETM*4870 Clinical Medicine III P3 (0-2) [0.25]
This course will contribute to students' achievement of selected DVM Program elements of competency in the context of the hospital environment. This is an integrated course in which students will enhance a variety of clinical skills, including physical examination, history taking, problem solving, and ancillary diagnostic tests and procedures. The emphasis is directed towards enhancing the skills, knowledge and attitudes that will permit the student to maximize the benefit to be derived from senior year courses.

Prerequisite(s): All Phase 2 courses.
Co-requisite(s): All Phase 3 courses.
Department(s): Department of Clinical Studies

VETM*4900 Veterinary Externship P4 (0-0) [2.50]
This is an eight-week experiential learning opportunity that junior students in the DVM Program must organize by the mid-way through Phase 3. The externship must be in approved private, primary care, veterinary practice. Senior students in the DVM Program, under the supervision of a designated host veterinarian, will experience being part of a team providing health care services to the public. This course will provide students with the opportunity to integrate and apply their knowledge and experience from previous courses, and further refine their problem-solving and communication skills, and enhance their ability to work as part of a team. The evaluation outcome of this course is outstanding, pass or fail.

Prerequisite(s): All Phase 1, Phase 2 and Phase 3 courses.
Department(s): Department of Clinical Studies

VETM*4920 Equine Stream P4 (V-V) [7.50]
This course is for students who have selected the Equine Stream in Phase 4 of the DVM Program. The goal of the equine stream course is to assist in the role transformation from veterinary student to veterinary practitioner. The course is largely experiential in structure and process where students progress through 30 weeks of core and elective rotations that provide applied learning experiences in the context of veterinary medicine.

Prerequisite(s): All Phase 3 courses.
Co-requisite(s): VETM*4900
Restriction(s): Registration in the DVM program.
Department(s): Dean's Office, Ontario Veterinary College
## Women's Studies

### WMST*1000 Introduction to Women's Studies S,F (3-0) [0.50]
An introduction to the methods and analyses of Women's Studies. An interdisciplinary feminist and multicultural examination of research about women and the gendered nature of societies and cultures. Areas of inquiry may include psychology, law, science, culture, work, family, violence, health, and sexuality.

**Offering(s):** Also offered through Distance Education format.

**Department(s):** Dean's Office, College of Arts

### WMST*2000 Women and Representation W (3-0) [0.50]
An interdisciplinary analysis of the role gender plays in representation, drawing on areas such as television, film, music, literature, visual arts, ethnography, medicine and law. International and cross-cultural perspectives included.

**Department(s):** Dean's Office, College of Arts
ZOO*3000 Comparative Histology F (3-3) [0.50]
This course provides an introduction to the microscopic structure of the major organ systems of the vertebrate body. Beginning with an examination of epithelial, connective, muscular, and nervous tissues, the course then examines the comparative histology of the circulatory, nervous, digestive, integumentary, respiratory, excretory, reproductive, endocrine, and sensory systems of vertebrates.
Prerequisite(s): ZOO*2090
Department(s): Department of Integrative Biology

ZOO*3050 Developmental Biology W (3-3) [0.50]
This course will focus on the development of vertebrates and invertebrates from fertilized egg to adult. It will examine fertilization, cell differentiation into tissues and organs, regulation of cell growth, and transmission of developmental information to the next generation. Throughout, the course will emphasize the evolutionary mechanisms that have shaped developmental patterns in animals.
Prerequisite(s): MBG*2040, BIOL*2400 is strongly recommended.
Department(s): Department of Integrative Biology

ZOO*3600 Comparative Animal Physiology I F (3-0) [0.50]
This course will examine the physiological processes that enable animals to live within a diverse range of environments. Lectures will focus on the underlying molecular and cellular events that mediate physiological processes and contribute to whole animal homeostasis, and emphasize strategies and adaptations used by different animals when influenced by various environmental conditions. Fundamental mechanisms in animal physiology such as diffusion, osmosis, feedback systems, and homeostasis will be explored in nervous, muscular, endocrine and sensory physiological systems. An associated lab course (ZOO*3610) is available.
Prerequisite(s): BIOL*2580, ZOO*2090, (STAT*2040 or STAT*2230 is recommended)
Department(s): Department of Integrative Biology

ZOO*3610 Lab Studies in Animal Physiology I F (0-3) [0.25]
This hands-on laboratory course will provide practical experience in comparative animal physiology and complement themes covered in the lecture course (ZOO*3600). Students will learn skills and techniques used for conducting experiments on living animals with the goal of characterizing physiological processes. Students will learn how to collect data, statistically analyze results and write formal laboratory reports.
Prerequisite(s): STAT*2040 or STAT*2230
Co-requisite(s): ZOO*3600
Department(s): Department of Integrative Biology

ZOO*3620 Comparative Animal Physiology II W (3-0) [0.50]
This course will examine the physiological processes that enable animals to live within a diverse range of environments. With a focus on respiratory, cardiovascular, osmoregulatory and digestive physiological processes, the lectures will examine the underlying molecular and cellular events that mediate physiological processes and contribute to whole animal homeostasis. An associated lab course (ZOO*3630) is available.
Prerequisite(s): ZOO*3600
Restriction(s): ZOO*3210
Department(s): Department of Integrative Biology

ZOO*3630 Lab Studies in Animal Physiology II W (0-3) [0.25]
In this hands-on laboratory course, students will apply skills and techniques to conduct experiments on living animals with the goal of characterizing physiological processes. Students will advance their writing skills through preparation of several full lab reports. The last experiment in the course is a self-directed study where students will develop hypotheses, generate and test predictions and design the experiment using tools they have learned in the course.
Prerequisite(s): ZOO*3610
Co-requisite(s): ZOO*3620
Restriction(s): ZOO*3210
Department(s): Department of Integrative Biology

ZOO*3700 Integrative Biology of Invertebrates F (3-3) [0.50]
This course explores variation in physiology, reproduction and life history among invertebrates, and the role of invertebrates in marine, freshwater and terrestrial ecosystems. Through field experiences, lab study and a class experiment, we will examine the diverse solutions that invertebrates have evolved to live in very different environments, including: circulation and gas exchange; feeding and digestion; osmoregulation and excretion, nervous system and sensory structures; locomotion and biomechanics, and invertebrate communities.
Prerequisite(s): ZOO*2700
Department(s): Department of Integrative Biology

ZOO*4070 Animal Behaviour F (3-0) [0.50]
This course provides an introduction to the theories and principles of the behaviour of animals. It includes comparative studies of learning, socialization, social interaction, and other components of animal behaviour.
Prerequisite(s): BIOL*2400, (STAT*2040 or STAT*2230)
Department(s): Department of Integrative Biology

ZOO*4170 Experimental Comparative Animal Physiology W (3-3) [0.50]
This course provides an advanced analysis of the physical and biogeochemical processes that influence aquatic environments on life styles, behavioral patterns, physiological responses, population biology and community structure. The use of niche, habitat and ecotope concepts in defining the role of fishes in representative types of aquatic ecosystems will be examined.
Prerequisite(s): 1 of BIOM*3200, HK*2810, ZOO*3210 . , ZOO*3600
Department(s): Department of Integrative Biology

ZOO*4300 Marine Biology and Oceanography F (3-3) [0.75]
This intensive two-week course is held in late August or early September before classes commence for the Fall semester. The course is held at the Huntsman Marine Science Centre, St. Andrews, New Brunswick. The ecology, behaviour, physiology, biochemistry, biomechanics of marine plants and animals will be studied as well as basic oceanographic techniques. Students will be able to familiarize themselves with the techniques and equipment involved in various branches of marine biology and oceanography. In addition to regular tuition fees, students are responsible for the cost of transportation to St. Andrews, and for charges levied by the Huntsman Marine Science Centre for room and board. These fees are paid to Student Finance and Awards of the University of Guelph. A department application form must be submitted for approval before course selection. The signature of the course coordinator is required to select the course. This course must be recorded as part of your Fall course selection and tuition and compulsory fees will be calculated accordingly. Students taking this course DO NOT use course numbers reserved for Ontario Universities Program in Field Biology.
Prerequisite(s): BIOL*3450, ZOO*2700
Department(s): Department of Integrative Biology

ZOO*4330 Biology of Fishes W (2-3) [0.50]
This course provides a comparative examination of selected freshwater and marine fishes to illustrate the influence of aquatic environments on life styles, behavioral patterns, physiological responses, population biology and community structure. The use of niche, habitat and ecotope concepts in defining the role of fishes in representative types of aquatic ecosystems will be examined.
Prerequisite(s): 15.00 credits including (STAT*2040 or STAT*2230), ZOO*2090
Department(s): Department of Integrative Biology

ZOO*4570 Marine Ecological Processes F (3-1) [0.50]
This course provides an advanced analysis of the physical and biogeochemical processes in the world’s oceans and the dependence of biological processes on physical and chemical processes from micro- to macro-scales. Topics to be discussed include production and energy transfer within pelagic food webs, export of energy to the benthos, and structure and dynamics of marine communities.
Prerequisite(s): BIOL*2060, BIOL*3450, PHYS*1080
Department(s): Department of Integrative Biology

XIII. Diploma Programs

For information about Associate Diploma Programs offered at the University of Guelph and Ridgetown Campus, please refer to the current Diploma Program Calendar. The current Diploma Program Calendar is available on http://www.uoguelph.ca/diploma_calendar/.
XIV. General Information

Centre for International Programs

The Centre for International Programs, the first of its kind in Canada, aims to facilitate, stimulate and support a continuously growing range of University involvement in international activities. This goal is accomplished by developing and maintaining contacts with university partners around the world, supporting study abroad programs, and providing liaison with government agencies, private sector companies and non-governmental organizations. The Centre provides information on international opportunities and resources to students and faculty, and manages the University’s student exchange programs. The Centre contributes to university policy on internationalization and serves as a focal point for links with other universities, government agencies, and private sector firms wishing to cooperate with the university in international activities.

Diversity and Human Rights

The Office of Diversity and Human Rights located at the north side of the campus at Fielding House, 15 University Avenue East. All enquiries are confidential. Office hours are Monday-Friday: 8:45a.m. - 4:45p.m. Phone: 824-4120, ext. 53000; Website: https://www.uoguelph.ca/diversity-human-rights/

Definitions

Harassment is a course of comments or actions that are known, or ought reasonably to be known, to be unwelcome. It can involve words or actions that are known or should be known to be offensive, embarrassing, humiliating, demeaning or unwelcome, based on a ground of discrimination. (as identified in the preceding section.)

Discrimination refers to any form of unequal treatment based on a Code ground that results in disadvantage, whether imposing extra burdens or denying benefits. It may be intentional or unintentional. It may involve direct actions that are discriminatory on their face, or it may involve rules, practices or procedures that appear neutral, but have the effect of disadvantaging certain groups of people. It may be obvious, or it may occur in very subtle ways. Discrimination needs only to be one factor among many factors in a decision or action for a finding of discrimination to be made.

Inquiries and Complaints

All members of the University community (including students, staff and faculty) have the right to seek confidential advice and information about concerns or complaints regarding harassment or discrimination. DHR may assist individuals to resolve complaints by serving as a resource to the parties involved, providing mediation, or facilitating the University’s human rights concern and complaint resolution procedures. In addition, any party may consult with DHR regarding any university decision which may relate to human rights.

Services

DHR delivers training and awareness on inclusion, equity, accessibility and human rights issues to all members of the University community; connects students, staff and faculty involved in human rights disputes with trained and independent support personnel; and in collaboration with university constituents, coordinates the university’s compliance with federal and provincial initiatives and legislation relating to human rights, equity, and accessibility.

Policy on Intellectual Property

The University of Guelph (the “University”) is one of the most research intensive universities in Canada, and has a long history of high-quality, innovative research that changes lives and improves life. The University is committed to enabling and supporting the people and partnerships that advance the quality, pre-eminence and societal values of the University’s research and creative endeavors.

It is recognized that in the course of research, new Intellectual Property will be created that may be commercially valuable and that may require patent or other protection in order to reach its full potential. Accordingly, the goal of this Policy is to encourage the creation of Intellectual Property and to facilitate its development and commercialization, while preserving the principles of academic and intellectual freedom.

No Personnel will be obliged to engage in the commercial exploitation of the results of their University Activities or to provide commercial justification for it, except as required in any grant application, award, or Contract.

The fundamental principle of this Policy is that, subject to the specific exceptions set out herein, Intellectual Property is owned by those who create it.

This Policy replaces the Inventions Policy (1991), the Copyright Policy (1989) and the Software Creation Policy (1989). It does not replace or supersede any other policy or collective agreement.

This Policy is effective as of May 1, 2014 and is not retroactive. This Policy applies to all Personnel.

Section 1: Definitions

1.1 “Commercialization” means the patenting, marketing, manufacturing, sale, distribution, licensing, sublicensing, transferring, granting of rights of use or leasing of Intellectual Property or products or services covered by, claimed by, or incorporating Intellectual Property.

1.2 “Contract” means a written agreement between the University and a Personnel and/or a third party. Contract shall also mean the terms or conditions under which funding is provided to the University to support the Personnel’s University Activities.

1.3 “Copyright” means the rights granted under the Copyright Act, RSC 1985, c.4-2, as amended from time to time.

1.4 “Creator” means the person or persons who creates, conceives, designs, discovers, develops, invents or authors Intellectual Property.

1.5 “Intellectual Property” means any result of intellectual or artistic activity and includes, but is not limited to Works, Tangible Research Property, software, databases and database layouts, Inventions, industrial or artistic designs, trade-marks, trade names, domain names, integrated circuit topographies, know-how and trade secrets, whether or not registerable or registered or protected under the law.

1.6 “Invention” means the rights associated with any patentable or potentially patentable idea, discovery or know-how and any associated or supporting technology that is required for development or application of the idea, discovery or know-how.

1.7 “Moral Rights” means the Canadian statutory rights of an author of a work in which Copyright subsists to be associated with the work and to prevent the distortion, mutilation or modification of the work to the prejudice of the honour and reputation of the author.

1.8 “Net Revenue” equal those gross receipts that the University is entitled to retain from Commercialization activity, less: (i) the University’s out-of-pocket costs and fees associated with securing, maintaining and enforcing intellectual property protection such as patenting and litigation expenses, (ii) out-of-pocket costs incurred by the University in the licensing of the intellectual property and (iii) any out-of-pocket expenses in making, shipping or otherwise distributing Tangible Research Property.

1.9 “Personnel” means one or more individuals carrying on the University Activities, paid or unpaid and who is/are not a Member as defined in the Collective Agreement between the University of Guelph and the University of Guelph Faculty Association. Personnel include but are not limited to, Professor Emeriti, staff, students, sessional lecturers, post-doctoral fellows, volunteers and adjunct faculty. In the absence of a Contract governing new Intellectual Property created during their visit, visiting scientists and visiting students are considered Personnel for the purpose of this Policy.

1.10 “Principal Investigator” means the Personnel who is identified as principally responsible for the performance and supervision of research associated with a Contract.

1.11 “Tangible Research Property” means plant germplasm, cell lines, organisms, proteins, plasmids, DNA/RNA, chemical compounds, transgenic animals and other materials useful for research or for commercial purposes for which patent applications are not filed or, if filed, do not issue.

1.12 “University Activities” means activities which are carried on by Personnel in the course of their employment or association with the University, or using University funds, facilities, equipment or other resources.

1.13 “Work” means original literary, dramatic, musical and artistic work and includes every original production in the literary, scientific or artistic domain, whatever maybe the mode or form of its expression such as websites, books, texts, articles, monographs, glossaries, bibliographies, cartographic materials, modular posters, study guides, laboratory manuals, correspondence course packages, interactive textbooks, course work delivered on the Internet, including distance education, multimedia instructional packages, syllabi, tests and work papers, lectures, musical and/or dramatic compositions, choreographic works, performers’ performances, unpublished scripts, films, filmstrips, charts, transparencies, other visual aids, video and audio tapes and cassettes, computer programs, live video and audio broadcasts, programmed instructional materials, drawings, paintings, sculptures, photographs, and other works of art.

Section 2: Copyright

1. Copyright belongs to Personnel who create Work, even if it is produced during the course of their University Activities, except in those cases where:
   a. there is a pre-existing Contract that assigns the ownership rights to the University or to a third party; or
   b. the Work is produced according to Section 2.2.

2. No Personnel shall claim any rights, and the University reserves to itself the ownership rights in any Works that are:
3. Personnel shall not be required to waive their Moral Rights.

4. In the event that Work is the creation of more than one Personnel, the provisions of this Policy shall apply on a pro rata basis to all the Creators of the Work, unless a written agreement among the Creators, or a Contract states otherwise.

5. Where a Work is owned by a Personnel, Personnel may enter into an agreement with the University, at each party’s discretion, for the performance of commercialization activities such as evaluation, marketing and negotiation of licenses. The Creator(s) will be entitled to receive sixty-five percent (65%) of Net Revenues received by the University as a result of successful commercialization of a Work owned by a Personnel.

6. The University may, at any time, elect to terminate or relinquish its rights in any Work. In the event that the University or assignee relinquishes its rights in any Work, all Intellectual Property rights shall revert back to the Creator(s). In the event that any Creator is deceased, the rights shall revert to the estate of that Creator.

7. All Personnel who own Copyright pursuant to this Policy hereby grant to the University:
   a. a nonexclusive, royalty-free, irrevocable and non-transferable license to use such works in other, non-commercial teaching and/or scholarly, research or creative activities of the University, subject to copyright requirements of academic journals and other vehicles of scholarly publication; and
   b. in the case of written works submitted as partial fulfillment of the requirements for completing a degree at the University, the non-exclusive right to reproduce, translate, and/or distribute the written work worldwide in print and electronic format and in any medium, including but not limited to audio or video.

This license shall not apply to a Personnel’s personal documents, including unpublished lecture notes, course notes, lab notes or any work-in-progress.

Section 3: Inventions and Tangible Research Property

3.1 Inventions and Tangible Research Property belong to Personnel who create the Invention or Tangible Research Property, even if it is produced during the course of their University Activities, except in those cases where:
   a. there is a pre-existing Contract that assigns the ownership rights to the University or to a third party; or
   b. the Invention or Tangible Research Property is created according to Section 3.2.

3.2 No Personnel shall claim any ownership, and Personnel hereby assign ownership to the University in any Inventions or Tangible Research Property that is:
   a. encompassed within section 3.1(a) above;
   b. produced by Personnel at the specific request or direction of the University; or
   c. produced by Personnel employed for the express purpose of creating or producing Works, or where there is an explicit requirement in a Personnel’s job description for this responsibility.

3.3 Prior to proceeding with a patent application or Commercialization activity, Personnel shall provide written disclosure to the University of any Invention made by them. Such disclosure shall assert whether ownership of the Invention is claimed by Personnel according to this Policy and the Personnel’s intention to pursue Commercialization independently or with the assistance of the University. If the University fails to challenge in writing the assertions of the Personnel within three (3) months of the receipt of disclosure of the Invention, the University shall be deemed to have accepted as accurate the assertions set out in the disclosure. Failure by a Personnel to disclose an Invention shall not terminate or waive any potential claim by the University regarding Intellectual Property rights.

3.4 Subject to section 3.3, where Personnel own an Invention or Tangible Research Property according to this Policy, they may, at their sole discretion, make arrangements for protection and Commercialization at their sole expense and benefit.

3.5 Where an Invention or Tangible Research Property is owned by Personnel, Personnel may enter into an agreement with the University, at each party’s discretion, for the performance of commercialization activities such as evaluation, patent protection, marketing and negotiation of licenses. The Creator(s) will be entitled to receive fifty percent (50%) of Net Revenues as a result of commercialization of an Invention or Tangible Research Property by the University.
Purpose and Jurisdiction
1. The University of Guelph is an environment that develops the person, scholar & citizen. This Policy sets out the University’s expectations regarding student conduct as members of the University of Guelph community.
2. In this Policy, a “student” is any person registered in a diploma, undergraduate or graduate program at the University of Guelph or otherwise taking credit or non-credit courses offered by the University of Guelph, or any person who was a student at the time the alleged breach occurred. “Campus” means the physical grounds of either the University’s main campus or the regional campuses. This Policy does not apply to students registered at University of Guelph-Humber programs and attending Humber College.
3. Except as noted in paragraph 4, 5 and 6 this Policy applies to all student non-academic behaviour on campus and to students who are engaged in University programs off campus. Allegations regarding other off campus conduct may be brought forward under this Policy if the violation in question materially affects the safety, integrity or educational interests of the University community or as provided under the Community Standards Protocol.
4. Alleged breaches of this Policy which arise within University residences may in the discretion of Student Housing Services, proceed under the Residence Community Living Standards.
5. Alleged breaches of this Policy which arise at the Ridgetown campus will be subject to the process and procedures specific to that campus.
6. Alleged breaches of this Policy committed by students who are identified as Students-at-Risk by the Student At-Risk Team (“SART”) may at the discretion of the SART team, proceed under the Protocol for Responding to Students At-Risk. Alleged incidents of sexual violence, as defined in the Sexual Violence Policy, will proceed under the Sexual Violence Policy and the Sexual Violence Policy – Procedures Document for Students.

University Community Values
7. The University of Guelph’s core value is the pursuit of truth. It is animated by a spirit of free and open enquiry, collaboration, and mutual respect. It asserts the fundamental equality of all human beings and is committed to creating for all members of its community, an environment that is hospitable, safe, supportive, equitable, pleasurable, and above all, intellectually challenging (University of Guelph Act, 1964). It is expected that all members of the University community will support and enrich these values by interacting with each other in a manner that is respectful, civil and consistent with the following responsibilities. Failure to abide by these responsibilities, or assisting or conspiring with another individual to act contrary to these responsibilities may result in penalties.

Diversity
8. Students have a responsibility to help create and uphold an environment that respects the diversity and differences of members of our campus, and allows all members to be treated with dignity, worth and respect. An example of this type of responsibility is the requirement to abide by the University’s commitment to the Ontario Human Rights Code and the Human Rights at the University of Guelph Policy 1, including but not limited to refraining from engaging in activities that express intolerance on grounds prohibited by the Human Rights at the University of Guelph Policy.

1 Allegations of breach may be pursued either under this Policy or the applicable human rights policy or legislation

Integrity
9. Students have a responsibility to help maintain the integrity of the University as a community for learning. An example of this type of responsibility is the requirement to abide by all Federal, Provincial and Municipal laws2 and University policies including but not limited to:

a. Drugs and Drug Paraphernalia - to not possess, use, supply or traffic illegal drugs, drug paraphernalia or controlled substances.
b. Alcohol - to possess, purchase, and/or use of liquor by those under the age of 19 is prohibited. The sale or provision of alcohol to anyone under the age of 19 is prohibited. Consumption or open possession of liquor is prohibited on campus other than in those areas where it has been specifically permitted.
c. Smoking - to abide by the University’s policy, Smoking in the Workplace, which includes not smoking or using an electronic cigarette inside any University building or vehicle, or within nine metres of any building entrance or exit.
d. Information Technology (IT) - to use computer login codes or passwords and University IT resources (e.g., computing account or workstation) in accordance with the University’s Acceptable Use Policy.

2 Allegations of criminal or other offences may be addressed off-campus under the applicable legislation. The University may also initiate charges under this Policy with respect to the same incident(s) if Campus Community Police in consultation with the Associate Vice-President Student Affairs determine that the allegation in question materially affects the safety, integrity and/or educational interests of the University community.

Learning
10. Students have a responsibility to help support community members’ access to the tools they need to engage in their learning and development, both in and outside of the classroom. An example of this type of responsibility is the requirement to abide by the following:

a. University Property - to respect posted hours and limits on entry where such conditions exist.
b. Property - to not destroy, tamper with, deface or vandalize, monopolize, unlawfully access, remove, obtain through fraudulent means, or possess property not your own, including but not limited to property of the University and personal property.
c. Disruption - to not interfere with the normal functioning of the University, nor to intimidate, interfere with, threaten or otherwise obstruct any activity organized by the University, including classes, or to hinder other members of the University community from being able to carry on their legitimate activities, including their ability to speak or associate with others.

Safety
11. Students have a responsibility to support an environment that enables students to be safe and free from harm3 An example of this type of responsibility is the requirement to abide by the following:

a. Harassment - to treat all members of the University community with respect and without harassment. Harassment is defined as any attention or conduct (oral, written, virtual, graphic or physical) by an individual or group who knows, or ought reasonably to know, that such attention or conduct is unwelcome/unwanted, offensive or intimidating. Examples include but are not limited to bullying and haz ing.
b. Bodily Harm - to not engage in activities that are likely to endanger the health or safety of yourself or another person, or to assault or threaten to assault another person or to knowingly cause another person to fear bodily harm.
c. Firearms and Other Weapons - to not bring onto campus any firearms or weapons (examples include but not limited to: BB guns, sling shots, paintball guns, firecrackers, gunpowder or any other forms of unauthorized hazardous materials). Students are not allowed to use any objects to injure, threaten or intimidate a person.
d. Fire and Life Safety Equipment - to not tamper or interfere with, discharge or activate any life safety or fire equipment on campus unless for the purposes of responding to an emergency. Life safety equipment includes but is not limited to defibrillators, fire extinguishers, fire alarms and emergency phones.
e. Guests - to take reasonable steps to ensure your guests comply with this Policy. Students may be held responsible for any breach of the rules committed by your guests on campus.

3 Alleged incidents of Sexual Violence, as defined in the Sexual Violence Policy, will proceed under the Sexual Violence Policy and the Sexual Violence Policy – Procedures Document for Students.

Interim Suspension
12. If a student has been charged with a breach under this Policy and a student’s conduct raises a reasonable apprehension of harm to the student or to others at the University, or the normal functioning of the University, the President or designate may, in their discretion, implement an interim suspension order. A Judicial Hearing will be undertaken as soon as possible and, in any event, no longer than fourteen working days from the laying of the charge.

Process - Main Campus
13. Students who do not comply with these responsibilities may be charged with a breach of this Policy in two ways:

a. a Notice of Offence issued by Campus Community Police, or
b. a charge laid by an individual or by the University.

14. The hearing process under this Policy is carried out by the Judicial Committee based on the principles of fairness, participation and efficiency.

15. The Judicial Committee has authority to issue orders and penalties as outlined in its Terms of Reference. If a student has been found guilty of previous breaches of this Policy or the Residence Community Living Standards, that information is made available to the Judicial Committee for penalty consideration.

Information on the Judicial procedures or common penalties may be obtained from the Judicial Website, or by calling the Judicial Officer, University Centre, at extension 52464 or from the Director's Office at Ridgetown campus.

Process - Regional Process and Procedures for the Ridgetown campus is available at:
http://www.uoguelph.ca/registrar/calendars/diploma/current/
Periodic Review Process

This Policy will be reviewed no less frequently than every five years by the Student Rights & Responsibilities Committee. Comments and specific suggestions for amendments or additions to the Policy are welcome at any time and should be referred to the Office of Student Affairs at: st_affs@uoguelph.ca.

Notification of Disclosure of Personal Information to Statistics Canada

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide range of matters, including education. It is essential to be able to follow students across time and institutions to understand, for example, the factors affecting enrolment demand at postsecondary institutions. The increased emphasis on accountability for public investment means that it is also important to understand ‘outcomes’. In order to conduct such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada, student identification information (student's name, student ID number, Social Insurance Number), student contact information (address and telephone number), student demographic characteristics, enrolment information, previous education, and labour force activity. The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used for statistical purposes only, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student. Students who do not wish to have their information used can ask Statistics Canada to remove their identifying information from the national database. On request by a student, Statistics Canada will delete an individual's contact information (name, address, or other personal identifiers) from the PSIS database. To make such a request, please contact us: Via telephone: Monday to Friday 8:30 A.M. to 4:30 P.M. EST/EDST 1-800-263-1136 (Toll Free) or 1-514-283-8300 Via mail: Institutional Surveys Section, Centre for Education Statistics, Statistics Canada, Main Building, SC 2100-K 100 Tunney's Pasture, RHC 13th floor Ottawa, Ontario, K1A 0T6 Via e-mail: PSIS-SIEP_contact@statcan.gc.ca Further details on the use of this information can be obtained from the Statistics Canada website http://www.statcan.gc.ca/eng/start

University ID Cards

A University ID Card is issued to each student registered at the University. The following regulations apply:

1. The University of Guelph Card must have: the University of Guelph logo; the cardholder's surname, first name and identification number; a colour photograph of the cardholder; a bar code for Library check-out privileges; a magnetically encoded stripe on the back of the card; and a brief summary of the rules and regulations for use of the card.

2. The Card is the property of the University of Guelph.

3. The Card is not transferable and the cardholder will be responsible for all use made of the Card unless and until written notice is received by Enrolment Services, Office of Registrarial Services.

4. Presentation of the Card will be required before certain University services will be extended. University services may be denied to an individual who does not present a valid card.

5. The Card may not be retained as collateral for any University service except for those services holding and displaying a permit, signed by the Registrar authorizing the withholding of the student, faculty or staff identification card for short periods while that person is utilizing the services offered.

6. A University Card will be issued to each new student. New students who do not obtain a card must contact the ID Card Centre at Enrolment Services, level 3, University Centre for assistance.

7. The University of Guelph ID Card colour photo must show a clear, front view of the applicant’s full face. Hats, headbands or sunglasses may not be worn in the photo. The applicant’s eyes must be open and looking directly ahead. Head coverings worn for religious or medical reasons can be worn but must not cover any part of the applicant’s face. The head covering must not obscure or obstruct a full front view of the applicant’s face, nor can it cast a shadow on the face. Persons with a niqab or burka who require their University ID Card be issued at the University of Guelph campus will have a female staff member photograph and verify the individual’s identity in a private setting.

8. Loss or finding of the University Card should be reported to the ID Card Centre at Enrolment Services.

9. A service charge will be levied for replacement cards.
## XV. Summary of Attendance

### November 1, 2019 Resource Planning and Analysis

Glossary

Academic Evaluation
The Academic Evaluation Report is a report of a student's academic progress towards the completion of a specified program and specialization.

Academic Sanction
Academic sanction is the penalty applied to students who fail to make payment, or suitable arrangements for payment, of their University account. Students on academic sanction may not receive semester examination results or official transcripts; may not receive clearance to graduate; and/or may not be allowed to register for a subsequent semester.

Academic Session
See Academic Term.

Academic Term
An academic term is an independent academic period of 15 weeks. Also referred to as a semester (see definition below).

Academic Year
An academic year is two semesters; undergraduate traditionally classified as first year (freshman), second year (sophomore), third year (junior), or fourth year (senior). Under the semester system this classification has less meaning than under a whole year system but is occasionally used to indicate the level at which a student has arrived.

Add Period
The add period opens prior to the beginning of the semester where students are permitted to add courses for the current semester.

Assigned Grade
An assigned grade is a numerical grade based on the instructor's recommendation and granted at the discretion of the Program Committee to students who have not completed required courses.

Audit
An audit is registration in a course for which degree or diploma credit is not sought. Audited courses are not reported on the official transcript or academic record.

Baccalaureate
Baccalaureate refers to an undergraduate degree awarded by the University upon successful completion of the requirements of a program.

Certificate (degree level)
See Secondary Area of Study.

Class Days
Class days are used to express deadlines. Class days are calculated from the start of the regular class schedule. (See Schedule of Dates).

Class Level
Class level is a determination of a student's progression in an academic program by credit weights with increments of 2.50 credits.

Clearance to Graduate
Clearance to graduate denotes that an applicant for graduation has satisfied all program requirements and is recommended for graduation.

Cohort Year
Cohort year refers to the academic calendar year for your first admission to the university OR the calendar year for subsequent admission to a new program or readmission to the same program or a new program. Tuition fees are assessed based on this assigned year.

Compassionate Grounds
Compassionate grounds are reasons of a serious personal nature which, subject to the approval of a committee or authorized person, justifies a variation of the rules in the case of a particular student.

Confers
Grants degrees.

Convocation
The ceremony at which degrees are granted. The conferral date of degrees coincides with convocation dates for semesters in which a convocation ceremony is observed.

Core course
A core course is one which is listed in a schedule of studies in the Undergraduate Calendar and identified as being a required course for a program.

Corequisite
A corequisite is a course where the content is integrated with that of another course such that the courses must be taken simultaneously.

Course
A course is an organized unit of study extending over a semester, (e.g. Economics ECON*1100).

Course Attempt
A course attempt reflects the situation where a student has completed courses either satisfactorily or unsatisfactorily.

Course Equate
Equate indicates a course identical to the one under which it is listed. The course may have been re-numbered or may be cross-listed under two subject areas. Students will not be permitted to register in both equated courses.

Course Level
Course level denotes the seniority of a course. 1000-level and 2000-level courses are considered first and second year courses. 3000-level and 4000-level courses are considered senior level courses.

Course Load
Course load denotes the total weight of the credits in which a student is enrolled determining part-time or full-time status. Courses taken via Letter of Permission are not used to calculate course load.

Course Restriction
A restriction is a "rule" that is placed on the computer system (Colleague) at the direction of an academic department so that particular students may or may not register in particular courses. The course may be restricted because there is sufficient over-lap in content with another course so that it is inappropriate for the student to take a similar course for credit. In a different instance, the course may be restricted by "Instructor Consent" so that the student must discuss the special requirements of the course with the instructor before enrolling. Or, alternatively, the restriction may reflect a "Priority Access" designation for enrolment management purposes. (See Priority Access).

Course Section
A course section is a subgroup of a course that denotes time and location.

Course Selection
Course selection is the process by which students select course sections for the succeeding semesters.

Credit
A credit is a unit of academic measurement equivalent to a single-weighted one-semester course.

Credit Standing
Credit standing (CRD) denotes that the student has successfully completed a course, but was not assigned a numerical grade.

Cumulative Average
Cumulative Average is calculated by dividing the weighted course total by the total credit attempts over all semesters (see Weighted Course Total).

Degree Program
See Program and Baccalaureate.

Deferred Privilege
A deferred privilege (DEF) is a temporary extension of time granted at the discretion of a Program Committee to a student for completion of the requirements of a course, normally for illness or compassionate reasons.

Diploma (degree-level)
See Secondary Area of Study.

Diploma Program Calendar
The Diploma Program Calendar is an annual publication containing official information about Associate Diploma Programs and regulations of the University of Guelph and Ridgetown campus.
Drop Deadline
Students can drop one-semester courses from their schedule up until the last day of classes. The deadline to drop two-semester courses is the last day of classes in the second semester. See Two-Semester Courses.

Elective
An elective is a course, acceptable within the program but chosen at the discretion of the student.

Equate
See Course Equate.

Faculty Advisor
See Chapter VII - Academic Advising.

Grade Report
A grade report is released by the Registrar to each student at the conclusion of a semester via WebAdvisor. It notes the courses attempted and the grades assigned (if applicable).

Hiatus
See Withdrawal.

In-course Student
In-course refers to a student enrolled in a program of study at the University.

Mailing Address
The mailing address is a temporary address used for mailing if one is recorded; otherwise the home address is used.

Minor
See Secondary Area of Study.

New Student
New student refers to a student who has never before been registered at the University of Guelph.

Prerequisite
A prerequisite is a prior requirement for entry into a course. Where a course is specified as a prerequisite, pass standing in the course is required.

Priority Access
Priority Access is the process by which a department implements course restriction rules in order to limit registration in a course where enrolment demand habitually exceeds course capacity and where there is demonstrated need to restrict access to a particular cohort of students on a priority basis. In general, course restrictions are clearly defined in the calendar course listings so that students are advised in advance of the intended audience for the course.

Program
A program is a structure of courses leading to a University degree (e.g. B.A.Sc. program).

Program Counsellor
See Chapter VII - Academic Advising.

The Program Counsellor is someone who assists students in the development of educational plans which are realistic and compatible with their life goals by helping to identify and assess alternatives and consequences of decisions, and providing interpretation of regulations applying to the specific degree program.

Reading Weeks and Study Breaks
Reading weeks and study breaks are designated periods where normal class schedules and academic requirements are suspended for a period of time.

Registration
Registration is the official enrolment of students in the University for a particular semester, and includes the selection of course sections and the payment of tuition fees and, where appropriate, other University fees.

Required to Withdraw
See Rustication.

Restricted Elective
A restricted elective is a course which must be chosen from a stated group of courses to satisfy the program requirements.

Restriction
See Course Restriction

Rustication
A defined period of time during which the student is not eligible to register in their current academic program as a result of an academic review decision. After the period of rustication the student must apply for re-admission to the University of Guelph.

Schedule of Dates
A list of significant dates at the University, developed using policies approved by Senate.

Schedule of Studies
A schedule of studies is the requirements for specializations, majors, minors, and various levels of concentration of study within a degree program, including programs without specialization. Schedules of studies are completed within a specific degree program and must normally be declared by the start of semester 3. Students need to be aware that progress within a program and graduation with a degree from that program depends upon a) the degree program requirements, and b) the requirements for the declared schedule of studies.

Secondary Area of Study
An identified set and sequence of courses, and/or other units of study, research and practice within an area of disciplinary or interdisciplinary study, which is completed on an optional basis while fulfilling the requirements for the awarding of a degree, and may be recorded on the graduate's academic record. The curriculum of a secondary area of study may be composed of elements of the core course offerings of a major, or may be a coherent package of courses organized around a theme, a course of study that bridges two or more disciplines, and/or a training program for a particular skill. Secondary Area may be a minor or degree-level certificate or diploma.

Semester
An independent period of fifteen (15) weeks. Summer semester is from May to August. Fall semester is from September to December. Winter semester is from January to April.

Semester Average
Semester Average is calculated by dividing the weighted course total by the total credit attempts in the semester (see Weighted Course Total).

Semester Level
See Class Level.

Session
An independent academic period within the summer semester of seven (7) weeks.

Specialization
For specialization see schedule of studies.

Subject
A subject is a defined sector of study composed of 1 or more courses within a discipline.

Supplemental Privilege
Supplemental privileges are granted at the discretion of the Program Committee, and in consultation with the instructor, affording a student who has received a failing grade on the original course attempt, the opportunity to obtain credit for the course while retaining the original failing grade.

Transcript
A transcript is an official document prepared by the Registrar recording a student’s courses and grades. After convocation, the degree earned including the area(s) of specialization (major, minor, area of concentration, area of emphasis), graduation standing, and the conferment date are noted on the transcript.

Two-Semester Course
A two-semester course is a course that is taken over 2 continuous semesters and counts as 2 course attempts for classification, continuation of study and calculation of fees. Two semester courses cannot be split.

Undergraduate Calendar
The undergraduate calendar is an annual publication containing official information about the undergraduate academic programs and regulations of the University.

**Weekdays**

Days of the week other than Saturday or Sunday.

**Weighted Course Total**

Weighted Course Total is the sum of the credit weights multiplied by the grade received in each course.

**Withdrawal**

Withdrawal of registration for an academic term after the start of classes.

**Withdrawal with Failure**

Withdrawal with failure may be applied to a course or an academic term. The notation "WF" will appear against the course(s) in the grade field on the official transcript.
Revisions

On the basis of information received from program committees, colleges or departments the 2020-2021 Undergraduate Calendar includes the following revisions:

Note
Those who may have used the PDFs to download and print off these calendar sections are advised to re-print the revised sections accordingly. Please be aware sectioning, page numbering, table of contents may have changed.

February 4, 2020
Initial publication of the 2020-2021 Undergraduate Calendar.

July 8, 2020
Second publication of the 2020-2021 Undergraduate Calendar.

- Disclaimer - updated
- Chapter 8 - Undergraduate Degree Regulations and Procedures -- Credit/No Credit Grading Option - added
- Chapter 8 - Undergraduate Degree Regulations and Procedures -- Grades -- Grading Procedures -- updated
- Chapter 10 - Degree Programs - B.Sc.(Agr.) - AGRS Schedule of Studies - Restricted Electives - Option B -- updated
- Chapter 10 - Degree Programs - B.Sc.(Env.) - ENVS:C Schedule of Studies - Semester 6 -- updated
- Chapter 10 - Degree Programs - B.Sc. - BTOX:C Schedule of Studies - Semester 4 and Semester 5 -- updated
- Chapter 10 - Degree Programs - B.Sc. - GIS Minor - name changed to Applied Geomatics (AG)
- Chapter 12 - Course Descriptions - addition of UNIV*2800, UNIV*3800 and UNIV*4800

July 28, 2020
Third publication of the 2020-2021 Undergraduate Calendar.

- Chapter 12 - Course Descriptions - addition of CTS*1000, CTS*2000, ONEH*1000, UNIV*2010, UNIV*2020, UNIV*4200
- Chapter 12 - Course Descriptions - course change to MUSC*1060
- Chapter 16 - Administration and Faculty - Changes and updates to various listings.
