[State-of-the-art research e-system launched at the University of Guelph](#)

9 years 5 months ago

Research Management and Support

By Liz Snyder

The Office of Research has launched a new project to implement a state-of-the art database and web portal that is accessible 24/7 from anywhere in the world.

This new system – currently named Research Administration and Information Management System (RAIMS) -- will...

[Statistics Canada Research Data Centre Alternatives: Conducting Research During COVID-19](#)

4 years 11 months ago

Workshops and Events

This webinar will be of particular interest to graduate students and faculty.

## What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to stay up to date on news from the Office of Research. Through Research Alerts, subscribers receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
