Agriculture and Agri-Food Canada (AAFC): Canada Food Waste Reduction Challenge Globally, food waste accounts for 8% of the world's greenhouse gas emissions, largely from edible food decomposing in landfills. In Canada, more than half of our food supply is wasted every year - that's over 50 billion dollars in avoidable food waste. Solving the problem of food waste...	<i>3 years 10 months ago</i>	Honours and Awards

What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to stay up to date on news from the Office of Research. Through Research Alerts, subscribers receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
