[Simons Fellows in](#)

[Mathematics 2025/26](#)

The Simons Foundation's Mathematics and Physical Sciences (MPS) division invites applications for the Simons Fellows in Mathematics program to make sabbatical research leaves more productive by extending them from a single term to a full academic year.

The foundation also strongly...

[Simons Fellows in](#)

[Mathematics and Theoretical Physics](#)

The Simons Fellows programs in both Mathematics and Theoretical Physics provide funds to faculty for up to a semester long research leave from classroom teaching and administrative obligations.

What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to stay up to date on news from the Office of Research. Through Research Alerts, subscribers

Physical Sciences and Engineering

Published on Research Alerts (<https://www.uoguelph.ca/research/alerts>)

receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
