

Alexander von Humboldt fellowships and research support information session

Date	Location
Wednesday May 4, 2016 2:30pm to 3:30pm	UC 335

Description

Discover opportunities for conducting research in Germany. The Alexander von Humboldt Foundation provides fully funded opportunities for young scholars (within 12 years of attaining a Ph.D.) to visit Germany and carry out research with German scholars for varying lengths of time. It is ideal for a post-doctoral fellowship experience or that first sabbatical leave for new faculty. The presentation will outline some of the unique funding opportunities and there will be Humboldt scholars in attendance to share their own experiences. We look forward to seeing you!
