University of Guelph

Top marks to University of Guelph physics researcher Ralf Gellert! For his work on the Mars rover project (depicted overleaf), Ralf's been awarded NASA's Outstanding Public Leadership Medal for 2013. This prestigious recognition is specifically for non-government employees whose leadership has significantly influenced the NASA mission. As well, Ralf's team (MSL APXS Instrument Development and Science Team) received NASA's 2013 Group Achievement Award. Congratulations Ralf and team!
