Enhance the Impact of your Research:
Create a Knowledge Mobilization Plan

Led by Caroline Duvieusart-Déry, Knowledge Mobilization Coordinator, Community Engaged Scholarship Institute

Your research matters.
What can you do to increase its impact and reach out to those who can benefit from it?

This workshop will lead you through the development of a knowledge mobilization (or knowledge translation) plan that will help identify and reach non-academic audiences. It will introduce good practices, examples of strategies, and tips for writing effective knowledge mobilization plans for grant proposals. Through hands-on activities, you will create your own plan adapted to your research.

Please bring your research project ideas or draft proposal to use as basis for building a knowledge mobilization plan relevant to your work!

November 17, 2016
12:00 – 2:00 PM
UC 442

All welcome!
