**RADICAL
RECOVERY**

A single mother, working on the front lines during the pandemic, became so overwhelmed by her responsibilities at work and at home that she considered taking her own life. Fortunately, she got the immediate support she needed through a walk-in counselling program funded by United Way.

This is the reality of just one person in our community who needed and received immediate help because of your donation.

We need a #RadicalRecovery.

Together, let's build an even stronger community.
